A. D. 1804-1805.—Expedition of Lewis and Clark across the continent.—The first exploration of the Missouri and beyond.—Captain Meriwether Lewis and Captain William Clark "were the first men to cross the continent in our zone, the truly golden zone. A dozen years before them, Mackenzie had crossed in British dominions far north, but settlements are even now sparse in that parallel. Still earlier had Mexicans traversed the narrowing continent from the Gulf to the Pacific, but seemed to find little worth discovery. It was otherwise in the zone penetrated by Lewis and Clark. There development began at once and is now nowhere surpassed. Along their route ten States, with a census in 1890 of eight and a half millions, have arisen in the wilderness. . . . The credit of our Great Western discovery is due to Jefferson, though he never crossed the Alleghanies. When Columbus saw the Orinoco rushing into the ocean with irrepressible power and volume, he knew that he had anchored at the mouth of a continental river. So Jefferson, ascertaining that the Missouri, though called a branch, at once changed the color and character of the Mississippi, felt sure that whoever followed it would reach the innermost recesses of our America. Learning afterward that Capt. Gray had pushed into the mouth of the Columbia only after nine days' breasting its outward current, he deemed that river a worthy counterpart of the Missouri, and was convinced that their headwaters could not be far apart in longitude. Inaugurated in 1801, before his first Presidential term was half over he had obtained, as a sort of secret-service fund, the small sum which sufficed to fit out the expedition. He had also selected Lewis, his private secretary, for its head, and put him in a course of special training. But the actual voyage up the Missouri, purchased April 30, 1803, was not begun till the middle of May, 1804. Forty-five persons in three boats composed the party. . . . After 171 days the year's advance ended with October, for the river was ready to freeze. The distance up stream they reckoned at 1,600 miles, or little more than 9 miles a day, a journey now made by railroad in forty-four hours. . . . Winter quarters were thirty miles above the Bismarck of our day. Here they were frozen in about five months. The huts they built and abundant fuel kept them warm. Thanks to their hunters and Indian traffic, food was seldom scarce. Officials of the Hudson's Bay Company (who had a post within a week's journey) and many inquisitive natives paid them visits. From all these it was their tireless endeavor to learn everything possible concerning the great unknown of the river beyond. Scarcely one could tell about distant places from personal observation, but some second-hand reports were afterward proved strangely accurate, even as to the Great Falls, which turned out to be a thousand miles away. It was not long, however, before they learned that the wife of Chaboneau, whom they had taken as a local interpreter, was a captive whose birth had been in the Rocky Mountains. She, named the Bird-woman, was the only person discoverable after a winter's search who could by possibility serve them as interpreter and guide among the unknown tongues and labyrinthine fastnesses which they must encounter. Early in April, 1805, the explorers, now numbering thirty-two, again began to urge their boats up the river, for their last year's labors had brought them no more than half-way to their first objective, its source. No more Indian purveyors or pilots: their own rifles were the sole reliance for food. Many a wigwam, but no Indian, was espied for four months and four days after they left their winter camp. It was through the great Lone Land that they groped their dark and perilous way. In twenty days after the spring start they arrived at the Yellowstone, and in thirty more they first sighted the Rocky Mountains. Making the portage at the Great Falls cost them a month of vexatious delay. Rowing on another month brought them on August 12 to a point where one of the men stood with one foot each side of the rivulet, and 'thanked God that he had lived to bestride the Missouri, heretofore deemed endless.' They dragged their canoes, however, up the rivulet for five days longer. It was 460 days since they had left the mouth of the river, and their mileage on its waters had been 3,096 miles. A mile further they stood on the great divide, and drank of springs which sent their water to the Pacific. But meantime they had been ready to starve in the mountains. Their hunters were of the best, but they found no game: buffaloes had gone down into the lowlands, the birds of heaven had fled, and edible roots were mostly unknown to them. For more than four months they had looked, and lo! there was no man. It was not till August 13 that, surprising a squaw so encumbered with pappooses that she could not escape, and winning her heart by the gift of a looking-glass and painting her cheeks, they formed friendship with her nation, one of whose chiefs proved to be a brother of their Bird-woman. Horses were about all they could obtain of these natives, streams were too full of rapids to be navigable, or no timber fit for canoes was within reach. So the party, subsisting on horse-flesh, and afterwards on dog-meat, toiled on along one of the worst possible routes. Nor was it till the 7th of October that they were able to embark in logs they had burned hollow, upon a branch of the Columbia, which, after manifold portages and perils, bore them to its mouth and the goal of their pilgrimage, late in November. Its distance from the starting-point, according to their estimate, was 4,134 miles. . . . Many an episode in this eventful transcontinental march and countermarch will hereafter glorify with romantic associations islands, rivers, rocks, cañons, and mountains all along its track. Among these none can be more touching than the story of the Bird-woman, her divination of routes, her courage when men quailed, her reunion with a long-lost brother, her spreading as good a table with bones as others could with meat, her morsel of bread for an invalid benefactor, her presence with her infant attesting to savages that the expedition could not be hostile. But when bounties in land and money were granted to others, she was unthought of. Statues of her, however, must yet be reared by grateful dwellers in lands

she laid open for their happy homes. Western poets will liken her to Ariadne and Beatrice."—*The Nation, Oct.* 26, 1893 (*Reviewing Dr. Coues' edition of "History of the Expedition under the Command of Lewis and Clark"*).

A. D. 1804-1805.—Jefferson's Plans of National defense.—His Gunboat fleet.—Mr. Jefferson's views as to the measures required for national defense, in the disturbed foreign relations of the country, were indicated in his message to Congress, when it assembled in November, 1804, but were afterwards communicated more fully to Mr. Nicholson, of Maryland, chairman of the committee to which the subject was referred. "Concerning fortifications, he remarks that the plans and estimates of those required for our principal harbours, made fifty millions of dollars necessary for their completion. It would require 2,000 men to garrison them in peace, and 50,000 in war. When thus completed and manned, they would avail but little, as all military men agree that when vessels might pass a fort without tacking, though it may annoy, it cannot prevent them. Two modes of effecting the same object might be 'adopted in aid of each other.' 1. Heavy cannon on travelling carriages, with militia trained to the management of them. 2. Floating batteries or gunboats. There were, he estimated, fifteen harbours in the United States needing and deserving defence. They would require 250 gunboats. The cost of these had been estimated at 2,000 dollars each, but he puts it down at 4,000, amounting in all to 1,000,000 dollars. Such of them as were kept under a shelter, ready to be launched, when wanted, would cost nothing more than an inclosure, or sentinel; those that were afloat, with men enough to take care of them, about 2,000 dollars a year each; and those fully manned for action about 8,000 dollars a year. He thought twenty-five of the second description enough, when France and England were at war. When at war ourselves, some of the third description would be required, the precise number depending on circumstances. There were ten then built and building, and fifteen more it was thought would be sufficient to put every harbour into a respectable state of defence. Congress, neither fulfilling the wishes of the President, nor altogether resisting them, gave the President the means of partially trying his favourite scheme, by the appropriation of 60,000 dollars. The sufficiency of this species of naval defence occasioned a good deal of discussion about this time between the opponents and the supporters of the administration. . . . The scheme was vehemently assailed by his adversaries in every form of argument and ridicule, and was triumphantly adduced as a further proof that he was not a practical statesman. The officers of the navy were believed to be, with scarcely an exception, opposed to the system of gunboats, especially those who were assigned to this service, partly because it was found to be personally very uncomfortable, and yet more, perhaps, because the power they wielded was so inferior, and their command so insignificant, compared with that to which they had been familiarized. It was like compelling a proud man to give up a fine richly caparisoned charger for a pair of panniers and a donkey. To stem the current of public opinion, which so far as it was manifested, set so strong against these gunboats, and to turn it in their favour, Mr. Jefferson prevailed on Paine, who had since his return been addressing the people of the United States on various topics, through the newspapers, to become their advocate. He set about it with his wonted self-confidence and real talent in enforcing his views, and proceeded to show that a gun from a gunboat would do the same execution as from a seventy-four, and cost no more, perhaps less; but a ship carrying seventy-four guns, could bring only one half to bear on an enemy at once, whereas if they were distributed among seventy-four boats, they could all be equally effective at once. In spite of this logic, the public, pinning its faith on experienced men, remained incredulous; and when, soon afterwards, many of the new marine were driven ashore in a tempest, or were otherwise destroyed, no one seemed to regard their loss as a misfortune, and the officers of the navy did not affect to conceal their satisfaction: nor has any attempt been since made to replace them. . . . The error of Mr. Jefferson was not, as his enemies charged, in adopting a visionary scheme of defence, but in limiting his views from a motive of economy, to the protection of the harbours, and in leaving his country's commerce and seamen, on the ocean, defenceless."—G. Tucker, *The Life of Thomas Jefferson, v.* 2, *ch.* 8.

A. D. 1804-1809.— Difficulties with Great Britain. — Neutral rights.— The Right of Search.—Impressment.—Blockade by Orders in Council and the Berlin and Milan Decrees.—Embargo and Non-intercourse.— For a time, after 1803, almost the whole carrying trade of Europe was in American hands. "The merchant flag of every belligerent, save England, disappeared from the sea. France and Holland absolutely ceased to trade under their flags. Spain for a while continued to transport her specie and her bullion in her own ships protected by her men-of-war. But this, too, she soon gave up, and by 1806 the dollars of Mexico and the ingots of Peru were brought to her shores in American bottoms. It was under our flag that the gum trade was carried on with Senegal; that the sugar trade was carried on with Cuba; that coffee was exported from Caracas; and hides and indigo from South America. From Vera Cruz, from Carthagena, from La Plata, from the French colonies in the Antilles, from Cayenne, from Dutch Guiana, from the Isles of France and Reunion, from Batavia and Manilla, great fleets of American merchantmen sailed for the United States, there to neutralize the voyage and then go on to Europe. They filled the warehouses at Cadiz and Antwerp to overflowing. They glutted the markets of Embden and Lisbon, Hamburg and Copenhagen with the produce of the West Indies and the fabrics of the East, and, bringing back the products of the looms and forges of Germany to the New World, drove out the manufactures of Yorkshire, Manchester, and Birmingham. But this splendid trade was already marked for destruction. That Great Britain should long treat it with indifference was impossible. . . . She determined . . . to destroy it, and to destroy it in two ways: by paper blockades and by admiralty decisions. In January, 1804, accordingly, Great Britain blockaded the ports of Guadeloupe and Martinique. In April her commander at Jamaica blockaded Curaçoa. In August she extended the blockade to the

Straits of Dover and the English Channel."—J. B. McMaster, *Hist. of the People of the U. S.*, *v.* 3, *pp.* 225–226.—"It had not yet come to be the acknowledged law of nations that free ships make free goods. But nearly the same purpose was answered, if the property of belligerents could be safely carried in neutral ships under the pretense of being owned by neutrals. The products of the French colonies, for example, could be loaded on board of American vessels, taken to the United States and reshipped there for France as American property. England looked upon this as an evasion of the recognized public law that property of belligerents was good prize. . . . It was denied that neutrals could take advantage of a state of war to enter upon a trade which had not existed in time of peace; and American ships were seized on the high seas, taken into port, and condemned in the Admiralty Courts for carrying enemy's goods in such a trade. The exercise of that right, if it were one by the recognized law of nations, would be of great injury to American commerce, unless it could be successfully resisted. . . . A war with England must be a naval war; and the United States not only had no navy of any consequence, but it was a part of Mr. Jefferson's policy, in contrast with the policy of the preceding administrations, that there should be none, except . . . gunboats kept on wheels and under cover in readiness to repel an invasion. But there was no fear of invasion, for by that England could gain nothing. 'She is renewing,' Madison wrote in the autumn of 1805, 'her depredations on our commerce in the most ruinous shapes, and has kindled a more general indignation among our merchants than was ever before expressed.' These depredations were not confined to the seizing and confiscating American ships under the pretense that their cargoes were contraband. Seamen were taken out of them on the charge of being British subjects and deserters, not only on the high seas in larger numbers than ever before, but within the waters of the United States. No doubt these seamen were often British subjects and their seizure was justifiable, provided England could rightfully extend to all parts of the globe and to the ships of all nations the merciless system of impressment to which her own people were compelled to submit at home. . . . But even if it could be granted that English naval officers might seize such men without recourse to law, wherever they should be found and without respect for the flag of another nation, it was a national insult and outrage, calling for resentment and resistance, to impress American citizens under the pretense that they were British subjects. But what was the remedy? As a last resort in such cases, nations have but one. Diplomacy and legislation may be first tried, but if these fail, war must be the final ordeal. For this the Administration made no preparation, and the more evident the unreadiness the less was the chance of redress in any other way. . . . The first measure adopted to meet the aggressions of the English was an act prohibiting the importation of certain British products. This had always been a favorite policy with Madison. . . . The President and Secretary were in perfect accord; for Jefferson preferred anything to war, and Madison was persuaded that England would be brought to terms by the loss of the best market for her manufactures. . . . But the Administration did not rely upon legislation alone in this emergency. The President followed up the act prohibiting the introduction of British goods by sending William Pinkney to England in the spring of 1806, to join Monroe, the resident minister, in an attempt at negotiation. These commissioners soon wrote that there was good reason for hoping that a treaty would be concluded, and thereupon the non-importation act was for a time suspended. In December came the news that a treaty was agreed upon, and soon after it was received by the President. . . . Monroe and Pinkney were enjoined, in the instructions written by the Secretary of State, to make the abandonment of impressment the first condition of a treaty. A treaty, nevertheless, was agreed upon, without this provision. . . . Without consulting the Senate, though Congress was in session when the treaty was received, and although the Senate had been previously informed that one had been agreed upon, the President rejected it. . . . As England's need of seamen increased, the captains of her cruisers, encouraged by the failure of negotiation, grew bolder in overhauling American ships. . . . In the summer of 1807 an outrage was perpetrated on the frigate Chesapeake, as if to emphasize the contempt with which a nation must be looked upon which only screamed like a woman at wrongs which it wanted the courage and strength to resent, or the wisdom to compound for. The Chesapeake was followed out of the harbor of Norfolk by the British man-of-war Leopard, and when a few miles at sea, the Chesapeake being brought to under the pretense that the English captain wished to put some dispatches on board for Europe, a demand was made for certain deserters supposed to be on the American frigate. Commodore Barron replied that he knew of no deserters on his ship, and that he could permit no search to be made, even if there were. After some further altercation the Englishman fired a broadside, killing and wounding a number of the Chesapeake's crew. Commodore Barron could do nothing else but surrender, for he had only a single gun in readiness for use, and that was fired only once and then with a coal from the cook's galley. The ship was then boarded, the crew mustered, and four men arrested as deserters. Three of them were negroes,—two natives of the United States, the other of South America. The fourth man, probably, was an Englishman. . . . For this direct national insult, explanation, apology, and reparation were demanded, and at the same time the President put forth a proclamation forbidding all British ships of war to remain in American waters. . . . Some preparation was made for war, but it was only to call upon the militia to be in readiness, and to order Mr. Jefferson's gunboats to the most exposed ports. Great Britain was not alarmed. The captain of the Leopard, indeed, was removed from his command, as having exceeded his duty; but a proclamation on that side was also issued, requiring all ships of war to seize British seamen on board foreign merchantmen, to demand them from foreign ships of war, and if the demand was refused to report the fact to the admiral of the fleet. . . . New perils all the while were besetting American commerce. In November, 1806, Napoleon's Berlin decree was promulgated, for-

bidding the introduction into France of the products of Great Britain and her colonies, whether in her own ships or those of other nations. . . . The decree, it was declared, was a rightful retaliation of a British order in council of six months before, which had established a partial blockade of a portion of the French coast. . . . In the autumn of 1807 [the President] called a special session of Congress. . . . He sent a special message to the Senate, recommending an embargo. An act was almost immediately passed, which, if anything more was needed to complete the ruin of American commerce, supplied that deficiency. A month before this time the English ministry had issued a new order in council — the news of which reached Jefferson as he was about to send in his message—proclaiming a blockade of pretty much all Europe, and forbidding any trade in neutral vessels, unless they had first gone into some British port and paid duties on their cargoes; and within 24 hours of the President's message, recommending the embargo, Napoleon proclaimed a new decree from Milan, by which it was declared that any ship was lawful prize that had anything whatever to do with Great Britain. . . . Within four months of its enactment, Josiah Quincy of Massachusetts declared, in a debate in Congress, that 'an experiment, such as is now making, was never before — I will not say tried — it never before entered into the human imagination. There is nothing like it in the narrations of history or in the tales of fiction.' . . . The prosperity and tranquillity which marked the earlier years of Jefferson's administration disappeared in its last year. . . . The mischievous results of the embargo policy were evident enough to a sufficient number of Republicans to secure, in February, 1809, the repeal [by the Non-intercourse Bill] of that measure, to take effect the next month as to all countries except England and France."— S. H. Gay, *James Madison, ch.* 17.— The Non-intercourse Bill which repealed the general provisions of the Embargo Act "excluded all public and private vessels of France and England from American waters; forbade under severe penalties the importation of British or French goods; . . . and gave the President authority to reopen by proclamation the trade with France or England in case either of these countries should cease to violate neutral rights. . . . Such a non-intercourse merely sanctioned smuggling."— H. Adams, *Hist. of the U. S.: Second Administration of Jefferson, v.* 2, *p.* 445.

A. D. 1806-1807.—Aaron Burr's filibustering scheme. — His arrest and trial. — Aaron Burr had been chosen vice-president in 1800. But he had lost all his friends in both parties in the election. In the course of a bitter political quarrel in New York, in 1804, he challenged Hamilton to a duel. Hamilton was mad enough to accept the challenge and was killed. Burr, "after his duel with Gen. Hamilton, and after the term of his office as vice-president had expired, . . . seemed to be left alone, and abandoned by all political parties. The state of public feeling in New-York was such, after the death of Hamilton, that his presence in that city could not be endured. In New-Jersey he had been indicted by a grand jury for murder. Thus situated, his ambitious, active and restless spirit rendered his condition intolerable to himself. On the 22nd March, but a few days after he left forever the presidency of the United States senate, he wrote to his son-in-law, Mr. Joseph Alston, that he 'was under ostracism. In New-York,' said he, 'I am to be disfranchised, and in New-Jersey to be hanged. Having substantial objections to both, I shall not, for the present, hazard either, but shall seek another country.' Accordingly, early in May, he left Philadelphia for the western country, and arrived at Lexington, in Kentucky, on the 20th of that month. After travelling with great rapidity through that state, he directed his course to Nashville, in Tennessee, and from thence he journied through the woods to Natchez. From Natchez he went by land to New-Orleans, where he arrived on the 25th June, 1805. At that time, Gen. Wilkinson was in that city, or in its neighborhood, and commanded the United States troops stationed there. It does not appear that he remained long in New-Orleans, but soon again returned to Lexington, in Kentucky, by the way of Nashville. He was at Cincinnati, and at several places in Ohio, but in a very short time made his appearance at St. Louis, in Missouri, and from thence he travelled to Washington, at which place he arrived on the 29th day of November. These immense journies he performed in a little more than six months; before the great western rivers were rendered navigable by steam, and when the roads were badly constructed; and through a considerable part of the country traversed by him there were no roads at all. His movements were veiled in mystery, and all men wondered what could be the motive which induced these extraordinary journies. From January, 1806, to the month of August following, he spent his time principally in Washington and Philadelphia; but, in the month of August, he again set his face towards the west, and was soon afterwards found in Kentucky. About this time boats were provided, provisions and munitions of war were collected, and men were gathering at different points on the Ohio and Cumberland rivers. Government now began to be alarmed. Mr. Tiffin, governor of Ohio, under the advice of the president (Jefferson), seized the boats and their cargo, and Burr was arrested in Kentucky; but no sufficient proof appearing against him he was discharged. On the 23d January, 1807, Mr. Jefferson sent a message to congress, accompanied by several affidavits, in which he gave the history of Burr's transactions, so far as they had come to the knowledge of the administration. The message stated that, on the 21st of October, Gen. Wilkinson wrote to the president that, from a letter he had received from Burr, he had ascertained that his objects were, a severance of the union on the line of the Allegany mountains, an attack upon Mexico, and the establishment of an independent government in Mexico, of which Burr was to be the head. That to cover his movements, he had purchased, or pretended to have purchased, of one Lynch, a tract of country claimed by Baron Bastiop, lying near Natchitoches, on which he proposed to

make a settlement. That he had found, by the proceedings of the governor and people of Ohio and Kentucky, that the western people were not prepared to join him; but notwithstanding, there was reason to believe that he intended, with what force he could collect, to attack New-Orleans, get the control of the funds of the bank, seize upon the military and naval stores which might be found there, and then proceed against Mexico. The president assured congress that there was no reason to apprehend that any foreign power would aid Col. Burr. A considerable part of the evidence going to show that Burr entertained criminal designs, depended on the affidavit of Wilkinson. It is not my intention to examine into the proofs of the guilt or innocence of Burr, further than to remark, that from the character of the vain, vaporing and unprincipled Wilkinson, as before and since developed, no dependence can safely be placed upon his statements, unless supported by strong circumstances, or other evidence; and I believe it will not at this day be doubted, that if Burr plotted treason, Wilkinson, in the first instance, agreed to be his accomplice; that, as their operations progressed, he began seriously to doubt of success, and then communicated his knowledge of the affair to the government, in order to save himself, and perhaps obtain a reward. . . . That Burr himself was deceived by Wilkinson, there can be no doubt. . . . But there was other evidence besides that of Wilkinson, against Burr, which has never been explained. . . . If his object was merely an attack upon Mexico, why did he not openly avow it, when charged and indicted for treason against his country? . . . Again, unless Col. William Eaton, the man who had then recently so gallantly distinguished himself on the Barbary coasts, has perjured himself, Burr did form a treasonable plot against his country. Col. Eaton, on the 26th January, deposed, in open court, held before Judge Cranch and others, at Washington, that during the preceding winter (1806), Burr called upon him, and, in the first instance, represented that he was employed by the government to raise a military force to attack the Spanish Provinces in North America, and invited Eaton to take a command in the expedition; that Eaton, being a restless, enterprising man, readily acceded to the proposal; that Burr made frequent calls upon him, and in his subsequent interviews complained of the inefficiency and timidity of the government, and, eventually, fully developed his project; which was to separate the western states from the union, and establish himself as sovereign of the country. . . . Burr did not succeed in collecting and organizing a force on the western waters; but, on the 1st day of March, he was discovered wandering alone in the Tombigbee country, near the line of Florida. . . . The trial of the indictment against Burr, for treason, occupied many weeks, but he was finally acquitted by the jury, without swearing any witness in his defence. The acquittal seems to have been on technical grounds. . . . After his acquittal, Col. Burr appears still to have persevered in the project of making an effort to detach Mexico from the Spanish government. On the 7th of June, 1808, he sailed from New-York for Europe, it would seem in the hope of engaging the British government to fit out an expedition against Mexico, in which he would take a part. In this he was entirely unsuccessful. His application to the French government was equally vain and useless. He spent four years wandering about in Europe."—J. D. Hammond, *Hist. of Political Parties in the State of N. Y., ch.* 12 (*v.* 1).

A. D. 1806-1812.—The Cumberland Road.—The first National work of "Internal Improvement."—"In 1806 the United States began the Cumberland Road, its first work of the kind; but it was intended to open up the public lands in Ohio and the country west, and was nominally paid for out of the proceeds of those public lands. Just as the embargo policy was taking effect, Gallatin, encouraged by the accumulation of a surplus in the Treasury, brought in a report, April 4, 1808, suggesting the construction of a great system of internal improvements: it was to include coastwise canals across the isthmuses of Cape Cod, New Jersey, upper Delaware and eastern North Carolina; roads were to be constructed from Maine to Georgia, and thence to New Orleans, and from Washington westward to Detroit and St. Louis. He estimated the cost at twenty millions, to be provided in ten annual instalments. Jefferson himself was so carried away with this prospect of public improvement that he recommended a constitutional amendment to authorize such expenditures. The whole scheme disappeared when the surplus vanished; but from year to year small appropriations were made for the Cumberland Road, so that up to 1812 more than $200,000 had been expended upon it."—A. B. Hart, *Formation of the Union* (*Epochs of Am. Hist.*), *sect.* 121.—"The Cumberland Road was always a pet enterprise with Mr. Clay. . . . Its eastern terminus was Cumberland on the Potomac, from which it takes its name. Thence it was projected to Wheeling on the Ohio, crossing the Alleganies; from Wheeling to Columbus, Ohio; and thence westward through Indiana, Illinois, and Missouri, to Jefferson, the capital of the latter State. . . . After Mr. Clay went to Congress in 1806, and while he was there, this great national work required and realized his constant attention and zealous advocacy. It was owing to his exertions chiefly that it ever reached Wheeling, and passed on so far into the State of Ohio. The last appropriations made for this road were in 1834 and 1835, with a view of repairing it, and giving it over to the States through which it passed, if they would accept it, and keep it in repair."—C. Colton, *Life, Corr., and Speeches of Henry Clay, v.* 6, *p.* 7.

A. D. 1807.—Practical beginning of steamboat navigation. See Steam Navigation.

A. D. 1807.—Abolition of the Slave-Trade.—The measure in Congress.—Significance of Southern action.—By the terms of the Constitution, Congress was deprived of power to interfere with the importation of slaves before the year 1808, but no longer. The time now approached when that restraint would cease, and the President in his annual message brought the subject to notice. "It was referred to a com-

mittee of which Mr. Early of Georgia was the chairman. There was no difference of opinion as to the prohibition of the traffic, or at least no expression of any; but the practical details of the law, the penalties by which it was to be enforced, and, above all, the disposition to be made of such negroes as might be brought into the country in violation of it, gave rise to violent and excited debates. The committee reported a law prohibiting the slave-trade after the 31st of December, 1807, imposing certain penalties for its breach, and providing that all negroes imported after that date should be forfeited. The object of this provision undoubtedly was to obtain directly what the Constitution only gave indirectly and by implication,—the sanction of the government of the United States to the principle of slave-holding, by making it hold and sell men as property. The astuteness of the slave-holding mind on all points touching slavery was shown in this proposition, and all the tactics of bullying and bluster with which later Congressional campaigns have made us familiar, were employed in the debate to which it gave rise. It having been moved that the words 'shall be entitled to his or her freedom' should be inserted after the word 'forfeited,' a furious fight ensued over this amendment. The Southern members resisted it, on the ground that the emancipation of the imported Africans would increase the number of free negroes, who, as Mr. Early affirmed, 'were considered in the States where they are found in considerable numbers as instruments of murder, theft, and conflagration.' And so craftily was this proposition of forfeiture to the government qualified, that its drift was not at first discerned by the Northern members. For, strong as was their disapprobation of slavery in the abstract, they felt no disposition to expose their Southern brethren to all the horrors of insurrection which it was assumed would follow the multiplication of free negroes. Indeed, Mr. Early candidly said, that, if these negroes were left free in the Southern States, not one of them would be alive in a year. And although the Federalists as a party, and Mr. Quincy eminently among them, regarded the political element of slavery as full of dangers to the future of the nation, these opinions had worked no personal and social alienation between Northern and Southern men, such as has since taken place. . . . There was, therefore, quite disposition enough to arrange this matter in the way the most satisfactory to the masters, without so rigid a regard to the rights of the negroes as, it is to be hoped, would have been had in later times. Mr. Quincy at first opposed striking out the forfeiture clause, on the ground that this was the only way in which the United States could get the control of the Africans, so as to dispose of them in the manner most for their own interest. . . . These views influenced a majority of the Northern members until the question of the final passage of the bill approached. At last they came to a sense of the disgrace which the forfeiture of the negroes to the government, and the permission to it to sell them as slaves if it so pleased, would bring upon the nation, and the whole matter was recommitted to a committee of one from each State. . . . This committee reported a bill providing that such imported negroes should be sent to such States as had abolished slavery, there to be bound out as apprentices for a term of years, at the expiration of which they should be free. This bill produced a scene of great and violent excitement on the part of the slaveholders. Mr. Early declared that the people of the South would resist this provision with their lives! This resistance to a measure which proposed doing all the slaveholders had demanded for their own safety, to wit, removing the imported negroes from the slaveholding domain and providing for them in the Free States, showed that their purpose was, at least in part, to have the negroes sold as slaves to themselves. This object they did virtually gain at last, as the final settlement was by a bill originating in the Senate, providing that, though neither importer nor purchaser should have a title to such negroes, still the negroes should be subject to any regulation for their disposal that should be made by the States into which they might be brought. The design of the slaveholding party to make the United States recognize the rightfulness of property in man was thus avoided, but it was at the cost of leaving the imported Africans to the tender mercies of the Slave States. The fact that the slaveholders were greatly incensed at the result, and regarded it as an injury and an affront, does not make this disposition of these unfortunates any the less discreditable to Congress or the nation."—E. Quincy, *Life of Josiah Quincy, ch.* 5.—See, also, SLAVERY, NEGRO: A. D. 1792–1807.

A. D. 1808.—The effects of the Embargo.—"The dread of war, radical in the Republican theory, sprang not so much from the supposed waste of life or resources as from the retroactive effects which war must exert upon the form of government; but the experience of a few months showed that the embargo as a system was rapidly leading to the same effects. . . . Personal liberties and rights of property were more directly curtailed in the United States by embargo than in Great Britain by centuries of almost continuous foreign war. . . . While the constitutional cost of the two systems was not altogether unlike, the economical cost was a point not easily settled. No one could say what might be the financial expense of embargo as compared with war. Yet Jefferson himself in the end admitted that the embargo had no claim to respect as an economical measure. . . . As the order was carried along the seacoast, every artisan dropped his tools, every merchant closed his doors, every ship was dismantled. American produce — wheat, timber, cotton, tobacco, rice — dropped in value or became unsalable; every imported article rose in price; wages stopped; swarms of debtors became bankrupt; thousands of sailors hung idle round the wharves trying to find employment on coasters, and escape to the West Indies or Nova Scotia. A reign of idleness began; and the men who were not already ruined felt that their ruin was only a matter of time. The British traveller, Lambert, who visited New York in 1808, described it as resembling a place ravaged by pestilence:—'The port indeed was full of shipping, but they were dismantled and laid up; their decks were cleared, their hatches fastened down, and scarcely a sailor was to be found on board. Not a box, bale, cask, barrel, or package was to be seen upon the wharves.' . . . In New England, where the struggle of existence was keenest, the embargo

struck like a thunderbolt, and society for a moment thought itself at an end. Foreign commerce and shipping were the life of the people, —the ocean, as Pickering said, was their farm. The outcry of suffering interests became every day more violent, as the public learned that this paralysis was not a matter of weeks, but of months or years. . . . The belief that Jefferson, sold to France, wished to destroy American commerce and to strike a deadly blow at New and Old England at once, maddened the sensitive temper of the people. Immense losses, sweeping away their savings and spreading bankruptcy through every village, gave ample cause for their complaints. Yet in truth, New England was better able to defy the embargo than she was willing to suppose. She lost nothing except profits which the belligerents had in any case confiscated; her timber would not harm for keeping, and her fish were safe in the ocean. The embargo gave her almost a monopoly of the American market for domestic manufactures; no part of the country was so well situated or so well equipped for smuggling. . . . The growers of wheat and live stock in the Middle States were more hardly treated. Their wheat, reduced in value from two dollars to seventy-five cents a bushel, became practically unsalable. . . . The manufacturers of Pennsylvania could not but feel the stimulus of the new demand; so violent a system of protection was never applied to them before or since. Probably for that reason the embargo was not so unpopular in Pennsylvania as elsewhere, and Jefferson had nothing to fear from political revolution in this calm and plodding community. The true burden of the embargo fell on the Southern States, but most severely upon the great State of Virginia. Slowly decaying, but still half patriarchal, Virginia society could neither economize nor liquidate. Tobacco was worthless; but 400,000 negro slaves must be clothed and fed, great establishments must be kept up, the social scale of living could not be reduced, and even bankruptcy could not clear a large landed estate without creating new encumbrances in a country where land and negroes were the only forms of property on which money could be raised. Stay-laws were tried, but served only to prolong the agony. With astonishing rapidity Virginia succumbed to ruin, while continuing to support the system that was draining her strength." —H. Adams, *Hist. of the U. S.: Second Administration of Jefferson, v.* 2, *ch.* 12.—" 'Our passion,' said Jefferson, 'is peace.' He not only recoiled as a philanthropist from bloodshed, but as a politician he with reason dreaded military propensities and sabre sway. Such preparations for war as he could be induced to make were scrupulously defensive, and his fleet of gun-boats for the protection of the coast to be launched when the invader should appear excited a smile. Alone among all statesmen he tried to make war without bloodshed by means of an embargo on trade. . . . It is not the highest of his titles to fame in the eyes of his countrymen, but it may be not the lowest in the court of humanity, that he sacrificed his popularity in the attempt to find a bloodless substitute for war. His memory recovered from the shock and his reign over American opinion endured."—Goldwin Smith, *The United States: An outline of Political History*, 1492–1871, *ch.* 3.

A. D. 1808.—Sixth Presidential Election.—Jefferson succeeded by Madison.—"In anticipation of Jefferson's retirement there had been . . . no little dispute and lively canvassing as to the next incumbency of the presidential chair. . . . Upon Madison, it was generally considered that Jefferson had fixed his personal preference. . . . But Madison had many political enemies in the Republican ranks among Virginians themselves. . . . Monroe was the growing favorite. Republicans in Congress, who, from one cause or another, had become disaffected to the Secretary of State, made their new choice manifest. The Quids [see Quids], having courted Monroe by letter when he was abroad, crowded about him when he passed through Washington on his way home, just as the Embargo became a law. . . . Monroe hesitated, unwilling to make a breach; and rather than hazard the Republican cause, or the future prospects of their favorite, his more temperate friends took him off the list of candidates, so that at the usual Congressional caucus, held at the capital, Madison was nominated almost unanimously for President, and George Clinton for Vice-President. But out of 139 Republican Senators and Representatives only 89 were present at this caucus, some being sick or absent from the city, and others keeping away because dissatisfied. Clinton had been a disappointed candidate, as well as Monroe, for the highest honors. . . . His ambition was pursued beyond the caucus, notwithstanding his renomination as Vice-President, until the friends of Madison, who had profited by the diversion among competitors, threatened to drop Clinton from the regular ticket unless he relinquished his pretensions to a higher place than that already assigned him. Meantime the schismatic Republicans had united in protesting to the country against Congressional dictation, at the same time pronouncing that the caucus which had nominated Madison was irregularly held. This open letter was signed by 17 Republican members of Congress. . . . Unfortunately for their influence in the canvass, however, they could not agree as to whether Monroe or Clinton should head the ticket. Objectionable, moreover, as the Congressional caucus might be, many more Presidential terms elapsed before other nominating machinery superseded it. National delegates, the national congress or convention of a party, was an idea too huge as yet for American politics to grasp in these days of plain frugality. . . . Harassed with foes within and without, with dissensions among the friends of rival candidates for the succession, with an odious and profitless measure to execute, against which citizens employed both cunning and force, it seemed, at one time, as if the administration party would go down in the fall elections. But Jefferson's wonderful popularity and the buoyancy of Republican principles carried the day. The regular Presidential ticket prevailed, not without a diminished majority."—J. Schouler, *Hist. of the U. S., ch.* 6, *sect.* 2 (*v.* 2).—James Madison, Democratic Republican, was elected, receiving 122 votes in the Electoral College; George Clinton, of the same party, receiving 6, and Charles C. Pinckney, Federalist, 47. George Clinton was chosen Vice President.

A. D. 1808-1810. — Substitution of Non-intercourse for Embargo. — Delusive conduct of Napoleon.—"All through the year 1808 and the first two months of 1809, the heavy hand of the embargo was laid on American commerce. The close of Jefferson's administration was signalized by an important change in the policy of the American Government. Almost the last act which Jefferson performed as President was to sign the new law which repealed the embargo, and substituted non-intercourse—a law which instead of universal prohibition of trade, merely prohibited commerce with Great Britain and with the countries under French control. The statute further authorized the President to suspend this prohibition as to either Great Britain or France as soon as one or the other should desist from violating neutral rights. An excuse for renewing commercial relations was not long delayed. On April 21, 1809, immediately upon the rather unexpected conclusion of a liberal and satisfactory diplomatic arrangement with Erskine, the British minister in Washington, the non-intercourse act was suspended as to Great Britain; and foreign trade, long dormant, suddenly sprang into excessive activity. This happy truce was short-lived. Erskine had effected his arrangement by a deliberate and almost defiant disregard of Canning's instructions; and his acts were promptly disavowed by his government. His recall was followed by a renewal of non-intercourse under a presidential proclamation of August 9, 1809. But notwithstanding the disavowal of Erskine, the British Government had made an apparent concession to the United States by the adoption of new orders in council which revoked the stringent prohibitions of the orders of 1807, and substituted a paper blockade of all ports and places under the government of France—a distinction which, on the whole, was perhaps without any important difference. France, on the other hand, entered upon a course of further aggressions. Louis Bonaparte was driven from his kingdom of Holland because he refused to attack neutral commerce, and all American ships found lying at Amsterdam were seized. Finally, by the decree of Rambouillet, every American ship found in any French port was confiscated and ordered sold. England and the United States thus seemed for the moment to be slowly drawing together in the presence of a common enemy, when suddenly the whole situation of affairs was changed by the formal announcement on August 5, 1810, of the Emperor's intended revocation of the decrees of Berlin and Milan, such revocation to take place on the first day of the following November, provided the British Government revoked their orders in council, or (and this was the important provision) the United States caused their rights to be respected. This promise, as Napoleon had privately pointed out a few days before, committed him to nothing; but it was accepted with all seriousness on the part of the United States. In reliance upon the imperial word, commercial intercourse with Great Britain—which had been once more resumed in May, 1810—was for the third time suspended. This, it was thought, was 'causing American rights to be respected'; and although the condemnation of American ships went on without a pause in every continental port, the Government of the United States clung with the strongest pertinacity to the belief that Napoleon's declarations were sincere. The practical effect of all this was to bar the door against any possible settlement with Great Britain. Commerce was now permanently suspended; there was a long list of grievances to be redressed, and negotiation was exhausted." —G. L. Rives, ed., *Selections from the Corr. of Thomas Barclay, ch.* 6.

A. D. 1810.—The Third Census.—Total population, 7,215,791 (being an increase of nearly 36½ per cent. over the population shown in 1800), classed and distributed as follows:

North.	White.	Free black.	Slave.
Connecticut	255,279	6,453	310
Illinois	11,501	613	168
Indiana	23,890	393	237
Maine	227,736	969	....
Massachusetts	465,303	6,737	....
Michigan	4,618	120	24
New Hampshire	213,390	970	....
New Jersey	226,861	7,843	10,851

	2,208,785	108,265	1,163,854

A. D. 1810-1812.—Continued provocation from England and France. — The "War of 1812" against Great Britain declared.—"Congress, on May 1, 1810, passed an act providing that commercial non-intercourse with the belligerent powers should cease with the end of the session, only armed ships being excluded from American ports; and further, that, in case either of them should recall its obnoxious orders or decrees, the President should announce the fact by proclamation, and if the other did not do the same within three months, the non-intercourse act should be revived against that one,—a measure adopted only because Congress, in its helplessness, did not know what else to do. The conduct of France had meanwhile been no less offensive than that of Great Britain. On all sorts of pretexts American ships were seized in the harbors and waters controlled by French power. A spirited remonstrance on the part of Armstrong, the American Minister, was answered by the issue of the Rambouillet Decree in May, 1810, ordering the sale of American vessels and cargoes seized, and directing like confiscation of all American vessels entering any

ports under the control of France. This decree was designed to stop the surreptitious trade that was still being carried on between England and the continent in American bottoms. When it failed in accomplishing that end, Napoleon instructed his Minister of Foreign Affairs, Champagny, to inform the American Minister that the Berlin and Milan Decrees were revoked, and would cease to have effect on November 1, 1810, if the English would revoke their Orders in Council, and recall their new principles of blockade, or if the United States would 'cause their rights to be respected by the English,'— in the first place restore the non-intercourse act as to Great Britain. . . . The British government, being notified of this by the American Minister, declared on September 29 that Great Britain would recall the Orders in Council when the revocation of the French decrees should have actually taken effect, and the commerce of neutrals should have been restored. . . . Madison, . . . leaning toward France, as was traditional with the Republican party, and glad to grasp even at the semblance of an advantage, chose to regard the withdrawal of the Berlin and Milan Decrees as actual and done in good faith, and announced it as a matter of fact on November 1, 1810. French armed ships were no longer excluded from American ports. On February 2, 1811, the non-importation act was revived as to Great Britain. In May the British Court of Admiralty delivered an opinion that no evidence existed of the withdrawal of the Berlin and Milan Decrees, which resulted in the condemnation of a number of American vessels and their cargoes. Additional irritation was caused by the capture, off Sandy Hook, of an American vessel bound to France, by some fresh cases of search and impressment, and by an encounter between the American frigate President and the British sloop Little Belt, which fired into one another, the British vessel suffering most. But was American commerce safe in French ports? By no means. . . . Outrages on American ships by French men-of-war and privateers went on as before. . . . The pretended French concession was, therefore, a mere farce. Truly, there were American grievances enough. Over 900 American ships had been seized by the British, and more than 550 by the French. . . . By both belligerents the United States had been kicked and cuffed like a mere interloper among the nations of the earth, who had no rights entitled to respectful consideration. Their insolence seemed to have been increased by the irresolution of the American government, the distraction of counsel in Congress, and the division of sentiment among the people. . . . But . . . young Republican leaders came to the front to interpret the 'national spirit and expectation.' They totally eclipsed the old chiefs by their dash and brilliancy. Foremost among them stood Henry Clay; then John C. Calhoun, William Lowndes, Felix Grundy, Langdon Cheves, and others. They believed that, if the American Republic was to maintain anything like the dignity of an independent power, and to preserve, or rather regain, the respect of mankind in any degree,— ay, its self-respect,— it must cease to submit to humiliation and contemptuous treatment; it must fight, — fight somebody who had wronged or insulted it. The Republicans having always a tender side for France, and the fiction of French concessions being accepted, the theory of the war party was that, of the two belligerents, England had more insolently maltreated the United States. Rumors were spread that an Indian war then going on, and resulting in the battle of Tippecanoe on November 7, 1811, was owing to English intrigues. Adding this to the old Revolutionary reminiscences of British oppression, it was not unnatural that the national wrath should generally turn against Great Britain. . . . Not only the regular army was increased, but the President was authorized to accept and employ 50,000 volunteers. Then a bill was introduced providing for the building of ten new frigates. . . . The war spirit in the country gradually rose, and manifested itself noisily in public meetings, passing resolutions, and memorializing Congress. It was increased in intensity by a sensational 'exposure,' a batch of papers laid before Congress by the President in March, 1812. They had been sold to the government by John Henry, an Irish adventurer, and disclosed a confidential mission to New England, undertaken by Henry in 1809 at the request of Sir James Craig, the governor of Canada, to encourage a disunion movement in the Eastern States. This was the story. Whatever its foundation, it was believed, and greatly increased popular excitement." On the 4th of April the President signed a bill laying an embargo on commerce with Great Britain for ninety days. "All over the country the embargo was understood as meaning an immediate preparation for war. . . . In May, 1812, President Madison was nominated for reëlection by the congressional caucus. It has been said that he was dragooned into the war policy by Clay and his followers with the threat that, unless he yielded to their views, another candidate for the presidency would be chosen. This Clay denied, and there was no evidence to discredit his denial. Madison was simply swept into the current by the impetuosity of Young America. . . . On June 1 the President's war message came. On June 18 a bill in accordance with it, which had passed both Houses, was signed by the President, who proclaimed hostilities the next day. Thus Young America, led by Henry Clay, carried their point. But there was something disquieting in their victory. The majority they commanded in Congress was not so large as a majority for a declaration of war should be. In the House, Pennsylvania and the states south and west of it gave 62 votes for the war, and 32 against it; the states north and east of Pennsylvania gave 17 yeas and 32 nays,—in all 79 for and 49 against war. This showed a difference of sentiment according to geographical divisions. Not even all the Republicans were in favor of war. . . . Nor were the United States in any sense well prepared for a war with a first-class power."—C. Schurz, *Life of Henry Clay, v.* 1, *ch.* 5.

A. D. 1811.—General Harrison's campaign against Tecumseh and his league.—The Battle of Tippecanoe.—"During the interval

between the Tripolitan war and the war of 1812, one noticeable campaign was made against the Indians. The operation took place in 1811, under General William H. Harrison, governor of Indiana Territory, and was directed against the Shawnees and other tribes which adhered to Tecumseh. This chief, with his brother, known as 'the Prophet,' had been engaged since 1806 in planning a species of crusade against the whites, and had acquired great influence among the northwestern Indians. For the previous two years Harrison's suspicions had been aroused by reports of Tecumseh's intrigues, and attempts had been made from time to time to negotiate with him, but without satisfactory results. In the summer of 1811 it was decided to strike a decisive blow at the Indians, and in the autumn Harrison, with a regiment of regulars under Colonel Boyd, and a force of militia, marched upon Tecumseh's town, situated on the Tippecanoe River. On the 7th of November the Indians, in Tecumseh's absence, attempted to surprise Harrison's camp, but in the battle which followed they were driven off, and presently abandoned their town, which Harrison burned. The invading force then retired. The importance of the expedition was largely due to the military reputation which Harrison acquired by it."—J. R. Soley, *The Wars of the U. S.* (*Narrative and Critical Hist. of the U. S., v.* 7, *ch.* 6).

A. D. 1812 (April).—Admission of Louisiana into the Union. See Louisiana: A. D. 1812.

A. D. 1812 (June — October). — Rioting at Baltimore.—The opening of the war and the unreadiness of the nation for it.—Hull's disastrous campaign and surrender, at Detroit.— "It was perhaps characteristic of the conduct of the war, that the first blood spilled should be American blood, shed by Americans. . . . In the night of June 22d, three days after the proclamation of war, a mob in Baltimore sacked the office of the 'Federal Republican,' edited by Alexander Hanson, because he had opposed the war policy. The mob also attacked the residences of several prominent Federalists, and burned one of them. Vessels in the harbor, too, were visited and plundered. About a month later Hanson resumed the publication of his paper, and in the night of July 26th the mob gathered again." This time they were resisted and one was killed; whereupon the authorities seized Hanson and his friends and lodged them in jail. "The rioters, thus encouraged by those whose business it was to punish them, attacked the jail the next night, murdered General Lingan [one of Hanson's defenders], injured General [Henry] Lee so that he was a cripple for the rest of his life, and beat several of the other victims and subjected them to torture. The leaders of the mob were brought to trial, but were acquitted! In this state of affairs, the war party in the country being but little stronger than the peace party, the youngest and almost the weakest of civilized nations went to war with one of the oldest and most powerful. The regular army of the United States numbered only 6,000 men; but Congress had passed an act authorizing its increase to 25,000, and in addition to this the President was empowered to call for 50,000 volunteers, and to use the militia to the extent of 100,000. Henry Dearborn, of Massachusetts, was made a major-general and appointed to command the land forces. Against the thousand vessels and 144,000 sailors of the British navy, the Americans had 20 war-ships and a few gunboats, the whole carrying about 300 guns. But these figures, taken alone, are deceptive; since a very large part of the British force was engaged in the European wars, and the practical question was, what force the United States could bring against so much as England could spare for operations on the high seas and on this side of the Atlantic. In that comparison, the discrepancy was not so great, and the United States had an enormous element of strength in her fine merchant marine. Her commerce being temporarily suspended to a large degree, there was an abundance both of ships and sailors, from which to build up a navy and fit out a fleet of privateers. Indeed, privateering was the business that now offered the largest prizes to mariners and ship-owners. . . . War with Great Britain being determined upon, the plan of campaign that first and most strongly presented itself to the Administration was the conquest of the British provinces on our northern border. . . . In planning for the invasion of Canada, the Administration counted largely upon a supposed readiness of the Canadians to throw off their allegiance to Great Britain and join with the United States. Such expectations have almost never been realized, and in this instance they were completely disappointed. In the preceding February, William Hull, Governor of the Territory of Michigan, who had rendered distinguished service in the Revolution, had been made a brigadier-general and placed in command of the forces in Ohio, with orders to march them to Detroit, to protect the Territory against the Indians, who were becoming troublesome. In June he was in command of about 2,000 men, in northern Ohio, moving slowly through the wilderness. On the day when war was declared, June 18th, the Secretary of War wrote him two letters. The first, in which the declaration was not mentioned, was despatched by a special messenger, and reached General Hull on the 24th. The other informed him of the declaration of war, but was sent by mail to Cleveland, there to take its chance of reaching the General by whatever conveyance might be found. The consequence was, that he did not receive it till the 2d of July. But every British commander in Canada learned the news several days earlier. Hull arrived at Detroit on the 5th of July and set about organizing his forces. On the 9th he received from the War Department orders to begin the invasion of Canada by taking possession of Malden, 15 miles below Detroit, on the other side of the river, if he thought he could do so with safety to his own posts. He crossed on the 12th, and issued a proclamation to the Canadians." He found the enemy too strongly fortified at Malden to be prudently assaulted with raw troops and without artillery. "So it was decided to defer the attack, and in a few days came the news that, on the declaration of war, a force of over 600 — British and Indians — had promptly moved against the American post at Michilimackinac — on the rocky little island of

Mackinaw, commanding the strait between Lake Huron and Lake Michigan — and the garrison of 61 officers and men capitulated on the 16th of July. This disaster to the Americans roused the Indians to renewed hostility against them, while it proportionately disheartened Hull, and seems to have been the first step in the breaking down of his courage. After a few skirmishes, he recrossed to Detroit on the 7th of August. Meanwhile the British Colonel Proctor had arrived at Malden with reënforcements, and on Hull's withdrawal to Detroit he threw a force across the river to intercept his supplies. This force consisted of a small number of British regulars and a considerable number of Indians commanded by the famous Tecumseh." Two considerable engagements occurred between this force and detachments sent out to meet an expected supply train. In the first, the Americans were badly beaten; in the second, they drove the enemy to their boats with heavy loss; but the supply train was not secured. "During this gloomy state of things at Detroit, a bloody affair took place on ground that is now within the city of Chicago. Fort Dearborn stood at the mouth of Chicago River, and was occupied by a garrison of about 50 soldiers, with several families. Captain Nathan Heald, commanding the post, had been ordered by General Hull to abandon it and remove his force to Detroit." To conciliate the neighboring Indians who professed friendliness, he promised to give them all the property in the fort which he could not carry; but before making the delivery to them he foolishly destroyed all the arms, the gunpowder and the liquors. Enraged by this proceeding, which they considered a trick, the savages pursued Captain Heald's small party, waylaid them among the Sand-hills on the lake shore, and massacred the greater part, twelve children included. The scalps which they took were sold to Colonel Proctor, "who had offered a premium for American scalps." The same day on which this occurred, August 15th, "the British General Isaac Brock, who had arrived at Malden a few days before and assumed command there, formally demanded the surrender of Detroit. This demand included a plain threat of massacre in case of refusal. Said Brock in his letter: 'It is far from my intention to join in a war of extermination; but you must be aware that the numerous bodies of Indians who have attached themselves to my troops will be beyond my control the moment the contest commences.' . . . Brock's force, according to his own testimony, numbered 1,330 men, including 600 Indians, and he had also two ships of war. Hull had present for duty about 1,000 men. Brock sent a large body of Indians across the river that night, at a point five miles below the fort, and early in the morning crossed with the remainder of his troops, and at once marched on the place." On the approach of the attacking force Hull offered to surrender. "The articles of capitulation were drawn up, and the American general surrendered, not merely the fort and its garrison, but the whole Territory of Michigan, of which he was Governor. . . . Hull's officers were incensed at his action, and he was subsequently court-martialled, convicted of cowardice, and condemned to death; but the President pardoned him, in consideration of his age and his services in the Revolution. . . . Subsequent investigations, if they do not exonerate General Hull, have at least greatly modified the blame attached to him."—R. Johnson, *Hist. of the War of* 1812–15, *ch.* 2.

A. D. 1812. — The opposition of the Federalists to the war. — "Unfortunately for the Federalists, while they were wholly right in many of their criticisms on the manner in which the war came about, they put themselves in the wrong as to its main feature. We can now see that in their just wrath against Napoleon they would have let the nation remain in a position of perpetual childhood and subordination before England. No doubt there were various points at issue in the impending contest, but the most important one, and the only one that remained in dispute all through the war, was that of the right of search and impressment. . . . It must be understood that this was not a question of reclaiming deserters from the British navy, for the seamen in question had very rarely belonged to it. There existed in England at that time an outrage on civilization, now abandoned, called impressment, by which any sailor and many who were not sailors could be seized and compelled to serve in the navy. The horrors of the 'press-gang,' as exhibited in the sea-side towns of England, have formed the theme of many novels. It was bad enough at home, but when applied on board the vessels of a nation with which England was at peace, it became one of those outrages which only proceed from the strong to the weak, and are never reciprocated. Lord Collingwood said well, in one of his letters, that England would not submit to such an aggression for an hour. Merely to yield to visitation for such a purpose was a confession of national weakness; but the actual case was far worse than this. . . . We have . . . Cobbett's statement of the consequences. 'Great numbers of Americans have been impressed,' he adds, 'and are now in our navy. . . . That many of these men have died on board our ships, that many have been worn out in the service, there is no doubt.' . . . In 1806 the merchants of Boston had called upon the general government to 'assert our rights and support the dignity of the United States.' . . . Yet it shows the height of party feeling that when, in 1812, Mr. Madison's government finally went to war for these very rights, the measure met with the bitterest opposition from the whole Federalist party, and from the commercial States generally. A good type of the Federalist opposition on this particular point is to be found in the pamphlets of John Lowell. John Lowell was the son of the eminent Massachusetts judge of that name; he was a well-educated lawyer, who was president of the Massachusetts Agricultural Society, and wrote under the name of 'A New England Farmer.' In spite of the protests offered half a dozen years before by his own neighbors, he declared the whole outcry against impressment to be a device of Mr. Madison's party. . . . He argued unflinchingly for the English right of search, called it a 'consecrated' right, main-

tained that the allegiance of British subjects was perpetual, and that no residence in a foreign country could absolve them. . . . While such a man, with a large party behind him, took this position, it must simply be said that the American republic had not yet asserted itself to be a nation. Soon after the Revolution, when some one spoke of that contest to Franklin as the war for independence, he said, 'Say rather the war of the Revolution; the war for independence is yet to be fought.' The war of 1812 was just the contest he described. To this excitement directed against the war, the pulpit very largely contributed, the chief lever applied by the Federalist clergy being found in the atrocities of Napoleon. . . . The Federalist leaders took distinctly the ground that they should refuse to obey a conscription law to raise troops for the conquest of Canada; and when that very questionable measure failed by one vote in the Senate, the nation may have escaped a serious outbreak. . . . It might, indeed, have been far more dangerous than the Hartford Convention of 1814 [see below: A. D. 1814 (DECEMBER)], which was, after all, only a peaceable meeting of some two dozen men, with George Cabot at their head —men of whom very few had even a covert purpose of dissolving the Union, but who were driven to something very near desperation by the prostration of their commerce and the defencelessness of their coast."—T. W. Higginson, *Larger Hist. of the U. S., ch.* 15.

A. D. 1812 (September — November).—The opening of the war on the New York frontier. —The Battle of Queenstown Heights.—"To put Dearborn [who commanded in the northern department] in a condition to act with effect, Governor Tompkins [of the state of New York] made the greatest efforts to get out the New York quota of militia. The Democratic Legislature of Vermont voted to add to the pay of their militia in service as much as was paid by the United States. At the same time they passed a stringent drafting law, and offered $30 bounty to volunteers. By the co-operating exertions of these states and of the war department, some 3,000 regulars and 2,000 militia were presently assembled on Lake Champlain, under Dearborn's immediate command. Another force of 2,000 militia was stationed at different points along the south bank of the St. Lawrence, their left resting on Sackett's Harbor. A third army was collected along the Niagara River, from Fort Niagara to Buffalo, then a village of a thousand or two inhabitants, in the midst of a newly-settled district. This latter force of nearly 6,000 men, half regulars and volunteers and half militia, was under the immediate command of Major-general Van Rensselaer, a Federalist. . . . The first skirmishes on the New York frontier grew out of attempts, not unsuccessful, made principally from Ogdensburg, a new but much the largest village on the American side of the St. Lawrence, to intercept the British supplies proceeding upward in boats. The militia officer in command at Ogdensburg was General Jacob Brown. A Pennsylvanian by birth, a Quaker by education, while employed as a teacher in the city of New York, some newspaper essays of his had attracted the attention of Alexander Hamilton, to whom, during the quasi war of '98, he became military secretary. Removing afterward to the new settlements of Northwestern New York, his enterprise had founded the flourishing village of Brownsville, not far from Sackett's Harbor. . . . His success in repulsing a British force of 700 men, which attempted to cross from Prescott to attack Ogdensburg, laid the foundation of a military reputation which soon placed him at the head of the American army. There had been built on Lake Ontario, out of the gun-boat appropriations, but by a fortunate improvement upon Jefferson's model, a sloop of war of light draft, mounting 16 guns. This vessel, called the Oneida, just before the breaking out of the war had been furnished with a regular-bred commander and crew. She was attacked shortly after at Sackett's Harbor by five British vessels, three of them larger than herself, but manned only by lake watermen. By landing part of her guns, and establishing a battery on shore, she succeeded, however, in beating them off. Hull's failure having shown how important was the control of the lakes, a judicious selection was made of Captain Chauncey, hitherto at the head of the New York Navy Yard, to take command on those waters. Along with Henry Eckford as naval constructor, and soon followed by ship-carpenters, naval stores, guns, and presently by parties of seamen, he was sent to Sackett's Harbor [September, 1812], then held by a garrison of 200 regulars. That newly-settled region could supply nothing but timber; every thing else had to be transported from Albany at vast expense. . . . A 24-gun ship was at once commenced; for immediate use, Chauncey purchased six of the small schooners employed in the then infant commerce of the lake, which, though very ill adapted for war, he armed with four guns each. With these and the Oneida he put out on the lake, and soon [November 8] drove the British ships into Kingston. . . . While thus employed, Chauncey had sent Lieutenant Elliot to Buffalo, with a party of seamen, to make arrangements for a force on the upper lakes. Elliot, soon after his arrival, succeeded in cutting out [October 9] from under the guns of Fort Erie, nearly opposite Buffalo, two British vessels just arrived from Detroit. One, the late Adams, which the British had armed and equipped, grounded, and it became necessary to destroy her. The other, the Caledonia, of two guns, was brought off, and became the nucleus of the naval force of Lake Erie. Elliot also purchased several small schooners lying in the Niagara River; but they, as well as the Caledonia, lay blockaded at Black Rock [now a part of the city of Buffalo], the passage into the lake being commanded by the guns of Fort Erie. The troops along the Niagara frontier, highly excited by Elliot's exploit, demanded to be led against the enemy; and, under the idea that the British village of Queenstown, at the foot of the falls [a few miles below] might furnish comfortable winter quarters for a part of his troops, Van Rensselaer resolved to attack it."—R. Hildreth, *Hist. of the U. S., 2d series, ch.* 25 (*v.* 3).—"The Niagara River, 35 miles long, which conducts the waters of the upper lakes through Erie into Ontario, constituted an important military frontier in such a war; its banks sparsely

settled, and the crossing a narrow one. Below the roaring cataracts had assembled another little army, supplied in great measure by regiments of the New York quota, Major-General Van Rensselaer, of the militia of that State, a prominent Federalist, being in command. Hull's sudden surrender left Brock free to confront this second adversary with a moderate force from the Canada side, not without feeling uncertain as to where the American blow would be struck. By October Van Rensselaer had 6,000 men, half of them regulars; and, yielding to the impatience of his volunteers and the public press, he gave orders to cross the river from Lewiston to Queenston. High bluffs arose on either side. There were not boats enough provided to carry more than half the advance party at a time. Too much reliance was placed upon militia, while regulars won the laurels. Wool, a young captain, and Lieutenant-Colonel Scott did gallant work on Queenston Heights; and General Brock, the conqueror of Detroit, fell mortally wounded; but reinforcements crossed too slowly, and with the green militia dreading death, many of the reserve pleading legal exemption from service in an enemy's country, their deserted comrades on the Canada side, unable to return, were forced to surrender. Van Rensselaer, whose advance had been premature, resigned in disgust, leaving a less capable but more pretentious officer, of Virginia birth, General Alexander Smyth, to succeed him. Smyth had a gift of windy composition, which fortunately, imposed upon the inhabitants of Western New York just long enough to check despondency and restore a glow to the recruiting service. 'Come on, my heroes,' was his cry, 'and when you attack the enemy's batteries, let your rallying word be: "The cannon lost at Detroit, or death!"' All this inkshed promised an exploit for invading Canada from the upper end of the Niagara, between Fort Erie and Chippewa. By the 27th of November Smyth had concentrated at Black Rock, near Buffalo, a fair army, 4,500 troops, comprising, in addition to the regulars, volunteer regiments from Maryland, Pennsylvania, and New York; the last under the command of General Porter, the representative in Congress, whose report, twelve months before, had given the first loud note of war. The big moment approached; but, notwithstanding the sonorous promise of 'memorable to-morrows,' and an embarkation to the music of 'Yankee Doodle,' one or two shivering attempts were made to land on the opposite shore, and then the volunteers were dismissed to their homes, and regulars ordered into winter-quarters. Disorderly scenes ensued. Our insubordinate and mortified soldiers discharged their muskets in all directions. Porter having openly charged Smyth with cowardice, the two crossed to Grand Island to fight a duel, and then shook hands. . . . But the country could not be reconciled to such generalship, and Smyth was presently cashiered."—J. Schouler, *Hist. of the U. S., v.* 2, *ch.* 8, *sect.* 2.

A. D. 1812-1813.—Indifference to the Navy at the beginning of the war.—Its Efficiency and its Early Successes.—"The young leaders of the war party in congress looked to successes on land and territorial conquest, and had an indifference to the field which the ocean afforded. And yet the triumphs of our young fleet in the Revolution, the alarm which John Paul Jones excited in English homes, and, later, the brilliant achievements in the Mediterranean, the heroes of which were still in the prime of their service, might have inspired better counsel. Madison's cabinet were said to have without exception opposed the increase and use of our navy; indeed, somewhat after Jefferson's idea in imposing the embargo — to save our vessels by laying them up. The advice of Captains Charles Stewart and William Bainbridge, who happened to be in Washington at the time of the declaration of war, determined Madison to bring the navy into active service. One of the chief causes of the war being the impressment of our seamen, it seems to-day surprising that their ardor in defense of 'Free Trade and Sailors' Rights,' — the cry under which our greatest triumphs were won —should have been either passed by or deprecated."—J. A. Stevens, *Second War with Great Britain* (*Mag. of Am. Hist., May—June,* 1893).—"Although [the American navy] had never been regarded by the government with favor, it happened that the three most essential measures had been adopted to secure its efficiency, — the ships built for it were the best of their class in the world, the officers had been carefully selected (200 out of a total of 500 having been retained under the Peace Establishment Act), and they had received — at least a large number of them — in Preble's squadron at Tripoli a training such as had fallen to the lot of few navies, either before or since. To these three causes the successes of 1812 were directly due; and although Commodore Preble died in 1807, the credit of the later war belongs more to him than to any other one man. It was not only that he formed many of the individual officers who won the victories of 1812–15,—for Hull, Decatur, Bainbridge, Macdonough, Porter, Lawrence, Biddle, Chauncey, Warrington, Charles Morris, and Stewart were all in his squadron,— but he created in the navy the professional spirit or idea, which was the main quality that distinguished it from the army in the war with Great Britain. At the outbreak of the war there were 18 vessels in the navy, ranging from 44-gun frigates to 12-gun brigs. There were also 176 gunboats, on which a large sum of money had been expended, but which were of no use whatever. . . . Immediately after the declaration of war, the frigates in commission in the home ports, together with two of the sloops, put to sea as a squadron under Commodore John Rodgers. They fell in with the English frigate 'Belvidera,' but she got away from them; and after an ineffectual cruise across the Atlantic, they returned home, without meeting anything of conse-

quence. Three weeks later, the 'Constitution,' under Captain Hull, sailed from Annapolis. Soon after leaving the Chesapeake she came upon a British squadron of one sixty-four and four frigates, and then ensued the famous three days' chase, in the course of which, by a marvel of good seamanship and good discipline, the American frigate escaped. After a short respite in Boston, Hull set out again, and on the 19th of August he fought and captured the 'Guerrière,' Captain Dacres, in an engagement lasting about an hour. The 'Constitution,' being armed with 24-pounders instead of 18's, threw at a broadside a weight of shot half as large again as that of the 'Guerrière,' and her crew was numerically superior in a still greater degree. Nevertheless, the immensely greater disproportion in the casualties which the 'Constitution' inflicted and received, and the short time which she took to do the work, cannot be explained by the difference in force alone; for the 'Guerrière' had five times as many killed and wounded as her opponent, and at the close of the engagement she was a dismasted wreck, while the 'Constitution' had suffered no injury of importance. The essential point of difference lay in the practical training and skill of the crews in gunnery. . . . In the next action, in October, the sloop 'Wasp,' Captain Jacob Jones, captured the English brig 'Frolic,' of approximately the same force. The relative loss of English and Americans was again five to one. Both vessels were soon after taken by a seventy-four. Later in the same month, another frigate action took place, the 'United States,' under Decatur, capturing the 'Macedonian.' The advantage of the Americans in men was about the same as in the first action, while in guns it was greater. The American casualties were 13, the English 104. This difference was not due to the fact that the American guns were 24's and 42's, instead of 18's and 32's, or that the Americans had three more of them in a broadside; it was really due to the way in which the guns on both sides were handled. Shortly after this capture, a cruise in the Pacific was projected for a squadron to be composed of the 'Constitution,' 'Essex,' and 'Hornet.' The 'Essex' failed to meet the other vessels at the rendezvous off the coast of Brazil, and went on the Pacific cruise alone [having great success]. The 'Constitution,' now commanded by Bainbridge, met the frigate 'Java,' near Brazil, on the 29th of December. The antagonists were more nearly matched than in the previous frigate actions, but the fight, lasting a little over an hour, resulted in the total defeat and surrender of the 'Java,' with a loss of 124 to the Americans' 34. The 'Java' was a wreck, and could not be taken into port, and Bainbridge returned home. Two months later, February 24, 1813, the 'Hornet,' commanded by Lawrence, met the 'Peacock' off the Demerara, and reduced her in fifteen minutes to a sinking condition, while the 'Hornet's' hull was hardly scratched. The English sloop sank so quickly that she carried down part of her own crew and three of the 'Hornet's' who were trying to save them. The casualties, apart from those drowned, were 5 in the 'Hornet' and 38 in the 'Peacock.'. . . The moral effect in England of these defeats was very great. . . . In March, 1813, Admiral Sir John Warren assumed the command of the British squadron on the American coast. Although rather past his prime, his defects were more than compensated by the activity of his second in command, Rear-Admiral Cockburn, who during this summer and the next kept the coasts of Chesapeake Bay in a continuous state of alarm by successful raids, in which much valuable property was destroyed. Among the more important of the actions of 1813 were the capture and destruction (in part) of Havre de Grace, Md., early in May, and an attack on the village of Hampton, Va., on the 25th of June. 'Acts of rapine and violence' on the part of the invading forces characterized the latter attack, which excited intense indignation throughout the country. . . . In the summer of 1813 occurred the first serious reverse of the navy during the war. On the 1st of June the frigate 'Chesapeake,' Captain James Lawrence, sailed from Boston to engage the 'Shannon,' which was lying outside, waiting for the battle. The two ships were nearly matched in guns and men, what slight difference there was being in favor of the 'Chesapeake'; but the crew of the latter had been recently shipped and was partly composed of disaffected men, and Lawrence had had no time to discipline them. The engagement was short and decisive. Ranging up alongside of the 'Shannon,' whose crew had been brought to the highest state of efficiency by Captain Broke their commander, the 'Chesapeake' at the first fire received a severe injury in the loss of several of her officers. Falling foul of the 'Shannon' she was effectually raked, and presently a boarding party, led by Captain Broke, got possession of her deck. The great mortality among the officers [including Captain Lawrence, who had received a mortal wound just before his ship was boarded, and whose dying appeal, 'Don't give up the ship,' became the battle cry of the American navy during the remainder of the war], and the want of discipline in the crew, resulted in a victory for the boarders. The battle lasted fifteen minutes only, and the 'Chesapeake' was carried as a prize to Halifax. During this summer the naval war on the ocean continued with varying fortunes, two important actions being fought. The brig 'Argus,' Captain Allen, after a successful voyage in the Irish Sea, in which many prizes were taken and destroyed, was captured by the English brig 'Pelican,' on the 14th of August. Early in September the brig 'Enterprise,' commanded by Lieutenant Burrows, captured the English brig 'Boxer,' near Portland, Me."—J. R. Soley, *The Wars of the U. S.* (*Narrative and Critical Hist. of the U. S., v.* 7, *ch.* 6).

Also in: T. Roosevelt, *The Naval War of 1812, ch.* 2–5.—J. F. Cooper, *Hist. of the Navy of the U. S., v.* 2, *ch.* 9–22.—A. S. Mackenzie, *Life of Decatur, ch.* 10–12.—D. D. Porter, *Mem. of Com. David Porter.*

A. D. 1812-1813.—Harrison's northwestern campaign. — Winchester's defeat. — Perry's naval victory on Lake Erie.—The Battle of the Thames and death of Tecumseh.—Recovery of Detroit and Michigan. — "Great was the indignation of the West, great the mortification of our whole people, on learning that, instead of capturing Upper Canada at the first blow, we had lost our whole Michigan Territory. The task now was to retake Detroit under a competent commander. Ohio and Kentucky went on filling rapidly their quotas, while urging the administration to march

them under Harrison. The President hesitated, doubtful whether Harrison was a man of sufficient military experience. He proposed that Monroe should go to the scene, as a volunteer, if not to command; but Monroe restrained his first military ardor, as was prudent, and Winchester, of Tennessee, another of the recent brigadiers, and a revolutionary veteran, was selected. The selection, however, gave umbrage to the Kentuckians, whose State government had already made Harrison a brevet major-general of militia. The hero of Tippecanoe was finally assigned to the chief command of the Western army, Madison countermanding his first orders. Harrison's route for Detroit was by way of Fort Wayne and Fort Defiance to the falls of the Maumee. But it was late in the fall [October 1812] before the new military arrangements could be completed; and through a swampy wilderness, infested as it was with hostile Indians, the progress of the column was toilsome and discouraging; and, except for the destruction of a few Indian villages on the way, the deeds of prowess were reserved for a winter campaign. . . . The winter expedition of the Northwest army . . . [was] retarded by a disaster which overtook Winchester's command near the Maumee Rapids, at a little village on the River Raisin. By Harrison's orders Winchester had started for these Rapids, whence, having first concentrated troops as if for winter quarters, the design was that he should advance 50 miles farther, when weather permitted, cross the frozen Detroit, and fall suddenly upon Malden. Winchester not only pushed on incautiously to his first destination, but, with a design more humane than prudent, undertook to protect against a British and Indian raid the alarmed inhabitants of Frenchtown [now Monroe, Michigan], a place 30 miles nearer Malden. Here [January 22, 1813] he was overpowered by the enemy, which fell upon the American force suddenly at daybreak, with yells and a shower of bomb-shells and canister. Winchester having been taken prisoner, Colonel Proctor, the British commander, extorted from him the unconditional surrender of all his troops, some 700 in number, as the only means of saving them from the tomahawk and scalping-knife. . . . Our sick and wounded . . . the British commander shamefully abandoned to their fate. . . . Officers and men, many of them the flower of Kentucky, perished victims to barbarities . . . abhorrent to civilized warfare, of which the British Colonel Proctor and Captain Elliott were not innocent. Besides the American loss in prisoners at the sad affair of the Raisin, nearly 200 were killed and missing. Hearing at the Upper Sandusky of Winchester's intended movement, Harrison had pressed to his relief with reinforcements, but fugitives from Frenchtown brought the melancholy tidings of disaster; and Harrison fell back to the Rapids, there to strengthen the post known as Fort Meigs, and go into winter quarters. The terms of many of his troops having now expired, the Northwestern army was for many months too feeble to begin a forward movement. But Harrison possessed the unabated confidence of the West, and, promoted to be one of the new major-generals, he received, through the zealous co-operation of Ohio and Kentucky, whose people were inflamed to take vengeance, enough volunteer reinforcements [May] to relieve Fort Meigs [which was twice besieged in 1813 by British and Indians] from Proctor's investment in the spring, and at length the quota requisite for resuming the offensive; other frontier plans of the War Department having long deranged his own in this quarter. The splendid co-operation of an American flotilla on Lake Erie opened the way to Detroit and victory. For that memorable service Commodore Chauncey had detailed an aspiring young naval officer, Captain Oliver H. Perry, of Rhode Island. Our little Lake squadron was tediously constructed at Presqu' Isle (now Erie). When all at last was ready [in August, 1813], Perry, who had long chafed in spirit while the British fleet hovered in sight like a hawk, sailed forth to dispute the supremacy of the broad inland waters. His heavier vessels were floated over the bar not without difficulty. After conferring at Sandusky upon the combined plan of operations with General Harrison, from whom he received a small detail of soldiers to act as marines and supply vacancies in his crews, he offered battle to Barclay, the British commander, — the latter a veteran in naval experience, who had served under Nelson at Trafalgar. Barclay had lain idly for several weeks at Malden, in hopes of procuring additional sailors, purposely avoiding an action meanwhile. But Proctor's army having now run short of provisions, longer delay was inexpedient. At sunrise on September 10th Perry descried the approaching British fleet from his look-out, a group of islands off Sandusky. Ten miles to the north of this locality, which was known as Put-in-bay, the two squadrons at noon engaged one another, — Perry approaching at an acute angle, and keeping the weather-gage, while Barclay's vessels hove to in close order. In officers and men the fleets were about equally matched; there were 6 British vessels to the American 9, but the former carried more guns, and were greatly superior for action from a distance. With 30 long guns to Perry's 15, Barclay had the decided advantage at first, and our flag-ship, the Lawrence, exposed to the heaviest of the British cannonade, became terribly battered, her decks wet with carnage, her guns dismounted. Undismayed by this catastrophe, Perry dropped into a little boat with his broad pennant and banner, and crossed to his next largest vessel, the Niagara, the target for 15 minutes of a furious fire while being rowed over. Climbing the Niagara's deck, and hoisting once more the emblems of commander, our brave captain now pierced the enemy's line with his new flag-ship, followed by his smaller vessels, and, gaining at last that advantage of a close engagement which for nearly three hours had eluded him, he won the fight in eight minutes. The colors of the Detroit, Barclay's flag-ship, struck first, three others followed the example, and two of the British squadon attempting to escape were overtaken and brought back triumphantly. 'We have met the enemy and they are ours,' was Perry's laconic dispatch to Harrison, written in pencil on the back of an old letter, with his navy-cap for a rest; 'two ships, two brigs, one schooner, and one sloop.' . . . Barclay lay dangerously wounded, and his next in command died that evening. . . . To Harrison's expectant army, augmented by 3,500 mounted Kentuckians, whom Governor Shelby led in per-

son, the word of advance was now given. . . . Perry's flotilla, aided by the captured vessels, presently landed the American troops on the Canada side. Proctor had already begun the retreat, having first dismantled the fort at Malden and burned the barracks. Harrison pursued him beyond Sandwich, covered by the flotilla, until near a Moravian town, up the river Thames [some 30 miles east of Lake St. Clair], the enemy was overtaken, with Tecumseh's braves. Here, upon well-chosen ground, the British made a final stand [October 5], but at the first impetuous charge of our cavalry their line broke, and only the Indians remained to engage in a desperate hand-to-hand fight. Among the slain was the famous Tecumseh, dispatched, as tradition asserts, by the pistol of Colonel Johnson, a Kentucky officer prominent in the battle. Proctor himself escaped in a carriage with a few followers, incurring afterwards the royal reprimand. . . . The baleful British and Indian alliance was broken up by these victories, while Detroit, Michigan, and all that Hull had lost, and a fair portion of Upper Canada besides, passed into American control. Among American generals in this war Harrison enjoyed the rare felicity of having fully accomplished his undertaking."—J. Schouler, *Hist. of the U. S., ch.* 8, *sect.* 2 *and ch.* 9, *sect.* 1 (*v.* 2).—"The victory of Lake Erie was most important, both in its material results and in its moral effect. It gave us complete command of all the upper lakes, prevented any fears of invasion from that quarter, increased our prestige with the foe and our confidence in ourselves, and ensured the conquest of Upper Canada; in all these respects its importance has not been overrated. But the 'glory' acquired by it most certainly has been estimated at more than its worth. . . . The simple truth is, that, where on both sides the officers and men were equally brave and skilful, the side which possessed the superiority in force, in the proportion of three to two, could not well help winning. . . . Though we had nine guns less, yet, at a broadside, they threw half as much metal again as those of our antagonist."—T. Roosevelt, *The Naval War of* 1812, *ch.* 6.

A. D. 1813 (April—July).—The burning of Toronto.—The capture of Fort George.—"The American fleet on Lake Ontario had been increased, and in 1813 controlled the lake. General Sheaffe had succeeded Brock as Governor as well as commander of the forces. Some 600 troops were in York [now Toronto], the capital. York had about 1,000 inhabitants, and was not regarded as of strategic importance. The Americans, however, set sail from Sackett's Harbour with 16 sail and 2,500 men to attack it. The enemy landed [April 27] to the west of the town, and General Sheaffe evacuated the works, and retired down the Kingston Road. The Americans invested the town, and though skirmishing took place, had an easy victory. The land force was under General Pike, an officer well known as having, when a lieutenant, explored the sources of the Mississippi. Just as the Americans had well filled the fort, the powder-magazine exploded with violence, killing and wounding about 250. General Pike, struck in the breast by a flying stone, died soon after. The Americans, contrary to the articles of surrender, shamefully burnt the town, and retired from York on the 2nd of May, 1813. While the squadron was absent, Sackett's Harbour was attacked by a strong force. The garrison seemed to be on the point of surrendering the fort, when Sir George Prevost, to the surprise of all, ordered a retreat. Little York taken, Commodore Chauncey then crossed the lake to Fort George at the mouth of the Niagara River. General Vincent commanded the fort. Twenty-four of Hull's guns frowned from its bastions. Its defender had 1,340 men. The American army on the Niagara frontier numbered 6,000. Chauncey had eleven war-vessels and 900 seamen. On the 27th of May the expected day came. Vincent drew his men out about a mile from the fort and awaited the attack. He was overpowered and retired, having lost nearly 450 soldiers. The Canadian force retired to a strong position, 'Beaver Dams,' twelve miles from Niagara on the heights, having given up Fort Erie and Chippewa and blown up Fort George. Vincent had now 1,600 men, and with these he retired to Burlington Heights, near the present city of Hamilton. An American army of 2,500 men followed General Vincent to Stoney Creek. On the night of the 8th of June, Colonel Harvey of the British force, with upwards of 750 men, fell stealthily on the sleeping American army, scattered the troops, killed many, captured the American generals Chandler and Winder, and about 100 men, along with guns and stores. The adventurers then retired to their camp. The scattered American soldiers reassembled in the morning and retired in a disorderly manner down the country to Fort George. Vincent now followed the retreating army and reoccupied Beaver Dams. One of his outposts was held by Lieutenant Fitzgibbon and 30 men. Smarting with defeat, the American general sought to surprise this station as a basis for future attacks. He secretly despatched Colonel Boerstler with nearly 700 men to capture it. A wounded militiaman, living within the lines at Queenston, heard by chance of the expedition. . . . The alarm was given [by the militiaman's wife, who travelled 20 miles through the forest, at night] and that night the men lay on their arms. Early next morning the American party came, but an ambuscade had been prepared for them, and after severe fighting 542 men surrendered into the hands of some 260. General Dearborn soon after retired from the command of the American army, to be succeeded by General Boyd. British parties captured Fort Schlosser and Black Rock on the Niagara River at this time, though at the latter place with the loss of Colonel Bishopp, the idol of his men. Colonel Scott, in command of troops on board Commodore Chauncey's fleet, again scoured Lake Ontario. Landing at Burlington Heights on the 31st of July, they did nothing more than reconnoitre the works and depart. Afterwards the second attack on York was made and the barracks burnt. After this a trial of strength took place between Sir James Yeo's fleet, now sent forth from Kingston Harbour, and Chauncey's squadron. The Americans lost two vessels in a squall, and two were cap-

tured by the British, but the result between the two fleets was indecisive."—G. Bryce, *Short Hist. of the Canadian People, ch.* 8, *sect.* 5.

A. D. 1813 (October—November). — The abortive expedition against Montreal. — "While Perry and Harrison were . . . reclaiming our lost ground on Lake Erie and in the northwest, Armstrong was preparing to carry out his favorite plan of a descent on Kingston and Montreal. When he accepted the post of Secretary of War, he transferred his department from Washington to Sackett's Harbor, so that he might superintend in person the progress of the campaign. . . . Although Wilkinson had superseded Dearborn, as commander-in-chief of this district in July, he did not issue his first orders to the army till the 23d of August. . . . General Wade Hampton, who had been recalled from the fifth military district to the northern frontier, encamped with his army, 4,000 strong, at Plattsburg, on Lake Champlain. The plan finally adopted by the Secretary was, to have Wilkinson drop down the St. Lawrence, and without stopping to attack the English posts on the river, form a junction with General Hampton, when the two armies should march at once on Montreal. These two Generals were both Revolutionary officers, and consequently too advanced in years to carry such an expedition through with vigor and activity. Besides, a hostile feeling separated them, rendering each jealous of the other's command. . . . Chauncey, in the mean time, after an action with Yeo, in which both parties claimed the victory, forced his adversary to take refuge in Burlington Bay. He then wrote to Wilkinson that the lake was clear of the enemy, and reported himself ready to transport the troops down the St. Lawrence. The greatest expectations were formed of this expedition. The people knew nothing of the quarrel between Wilkinson and Hampton, and thought only of the strength of their united force. . . . While Wilkinson was preparing to fulfill his part of the campaign, Hampton made a bold push into Canada on his own responsibility. Advancing from Plattsburg, he marched directly for St. John, but finding water scarce for his draft cattle, owing to a severe drought, he moved to the left, and next day arrived at Chateaugay Four Corners, a few miles from the Canada line. Here he was overtaken by an order from Armstrong, commanding him to remain where he was, until the arrival of Wilkinson. But jealous of his rival, and wishing to achieve a victory in which the honor would not be divided, he resolved to take upon himself the responsibility of advancing alone. Several detachments of militia had augmented his force of 4,000, and he deemed himself sufficiently strong to attack Prevost, who he was told had only about 2,000 ill assorted troops under him. He therefore gave orders to march, and cutting a road for 24 miles through the wilderness, after five days great toil, reached the British position. Ignorant of its weakness, he dispatched Colonel Purdy at night by a circuitous route to gain the enemy's flank and rear and assail his works, while he attacked them in front. Bewildered by the darkness, and led astray by his guide, Colonel Purdy wandered through the forest, entirely ignorant of the whereabouts of the enemy or of his own. General Hampton, however, supposing that he had succeeded in his attempt, ordered General Izard to advance with the main body of the army, and as soon as firing was heard in the rear to commence the attack in front. Izard marched up his men and a skirmish ensued, when Colonel De Salaberry, the British commander, who had but a handful of regulars under him, ordered the bugles, which had been placed at some distance apart on purpose to represent a large force, to sound the charge. The ruse succeeded admirably, and a halt was ordered. The bugles brought up the lost detachment of Purdy, but suddenly assailed by a concealed body of militia, his command was thrown into disorder and broke and fled. Disconcerted by the defeat of Purdy, Hampton ordered a retreat, without making any attempt to carry the British intrenchments. . . . Hampton, defeated by the blasts of a few bugles, took up his position again at the Four Corners, to wait further news from Wilkinson's division. The latter having concentrated his troops at Grenadier Island, embarked them again the same day that Hampton advanced, against orders, towards Montreal. Three hundred boats, covering the river for miles, carried the infantry and artillery, while the cavalry, 500 strong, marched along the bank. . . . They were two weeks in reaching the river. Wilkinson, who had been recalled from New Orleans, to take charge of this expedition, was prostrated by the lake fever, which, added to the infirmities of age, rendered him wholly unfit for the position he occupied. General Lewis, his second in command, was also sick. The season was already far advanced—the autumnal storms had set in earlier than usual—everything conspired to ensure defeat; and around this wreck of a commander, tossed an army, dispirited, disgusted, and doomed to disgrace. General Brown led the advance of this army of invasion, as it started for Montreal, 180 miles distant. . . . When it reached the head of the long rapids at Hamilton, 20 miles below Ogdensburg, Wilkinson ordered General Brown to advance by land and cover the passage of the boats through the narrow defiles, where the enemy had established block houses. In the mean time the cavalry had crossed over to the Canadian side and, with 1,500 men under General Boyd, been despatched against the enemy, which was constantly harassing his rear. General Boyd, accompanied by Generals Swartwout and Covington as volunteers, moved forward in three columns. Colonel Ripley advancing with the 21st Regiment, drove the enemy's sharp shooters from the woods, and emerged on an open space, called Chrystler's Field, and directly in front of two English regiments. Notwithstanding the disparity of numbers this gallant officer ordered a charge, which was executed with such firmness that the two regiments retired. Rallying and making a stand, they were again charged and driven back. . . . At length the British retired to their camp and the Americans maintained their position on the shore, so that the flotilla passed the Saut in safety. This action [called the battle of Chrystler's Farm, or Williamsburg] has never received the praise it deserves—the disgraceful failure of the campaign having cast a shadow upon it. The British, though inferior in numbers, had greatly the advantage in having possession of a stone house

in the midst of the field. . . . Nearly one-fifth of the entire force engaged were killed or wounded. . . . The army, however, still held its course for Montreal. Young Scott, who had joined the expedition at Ogdensburg, was 15 miles ahead, clearing, with a detachment of less than 800 men, the river banks as he went. Montreal was known to be feebly garrisoned, and Wilkinson had no doubt it would fall an easy conquest. He therefore sent forward to Hampton to join him at St. Regis, with provisions. Hampton, in reply, said, that his men could bring no more provisions than they wanted for their own use, and informed him, in short, that he should not co-operate with him at all, but make the best of his way back to Lake Champlain. On receiving this astounding news, Wilkinson called a council of war, which reprobated in strong terms the conduct of Hampton, and decided that in consideration of his failure, and the lateness of the season, the march should be suspended, and the army retire to winter quarters. This was carried into effect, and Wilkinson repaired to French Mills, on Salmon river, for the winter, and Hampton to Plattsburg."—J. T. Headley, *The Second War with England, v.* 1, *ch.* 13.

A. D. 1813 (December).—Retaliatory devastation of the Niagara frontier.—Fort Niagara surprised.—The burning of Buffalo.—"The withdrawal of troops from the Niagara frontier to take part in Wilkinson's expedition left the defence of that line almost entirely to militia, and the term for which the militia had been called out expired on the 9th of December. The next day General George McClure, who had been left in command at Fort George, found himself at the head of but 60 effective men, while the British General Drummond had brought up to the peninsula 400 troops and 70 Indians — released by the failure of Wilkinson's expedition — and was preparing to attack him. McClure thereupon determined to evacuate the fort, as the only alternative from capture or destruction, and remove his men and stores across the river to Fort Niagara. He also determined to burn the village of Newark, that the enemy might find no shelter. The laudable part of this plan was but imperfectly carried out; he failed to destroy the barracks, and left unharmed tents for 1,500 men, several pieces of artillery, and a large quantity of ammunition, all of which fell into the hands of Drummond's men. But the inexcusable part — the burning of a village in midwinter, inhabited by noncombatants who had been guilty of no special offence — was only too faithfully executed. The inhabitants were given twelve hours in which to remove their goods, and then the torch was applied, and not a house was left standing. This needless cruelty produced its natural result; Drummond determined upon swift and ample retaliation. In the night of December 18th, just one week after the burning of Newark, he threw across the Niagara a force of 550 men. They landed at Five Mile Meadows, three miles above Fort Niagara, and marched upon it at once, arriving there at four o'clock in the morning. McClure, who had received an intimation of the enemy's intention to devastate the American frontier, had gone to Buffalo to raise a force to oppose him. The garrison of the fort consisted of about 450 men, a large number of whom were in the hospital. The command had been left to a Captain Leonard, who at this time was three miles away, sleeping at a farm-house. The most elaborate preparations had been made for the capture of the fort, including scaling-ladders for mounting the bastions. But the Americans seemed to have studied to make the task as easy as possible. The sentries were seized and silenced before they could give any alarm, and the main gate was found standing wide open, so that the British had only to walk straight in and begin at once the stabbing which had been determined upon. The guard in the south-east block-house fired one volley, by which the British commander, Colonel Murray, was wounded, and a portion of the invalids made what resistance they could. A British lieutenant and five men were killed, and a surgeon and three men wounded. Sixty-five Americans, two-thirds of whom were invalids, were bayoneted in their beds; 15 others, who had taken refuge in the cellars, were despatched in the same manner, and 14 were wounded; 20 escaped, and all the others, about 340, were made prisoners. . . . On the same morning, General Riall, with a detachment of British troops and 500 Indians, crossed from Queenstown." Lewiston, Youngstown, Tuscarora and Manchester (now Niagara Falls) were plundered and burned, and the houses and barns of farmers along the river, within a belt of several miles, were destroyed. "The bridge over Tonawanda Creek had been destroyed by the Americans, and at this point the enemy turned back, and soon recrossed the Niagara to the Canada side. The alarm at Buffalo brought General Hall, of the New York militia, to that village, where he arrived the day after Christmas. He found collected there a body of 1,700 men, whom it would have been gross flattery to call a 'force.' They were poorly supplied with arms and cartridges, and had no discipline and almost no organization. Another regiment of 300 soon joined them, but without adding much to their efficiency. On the 28th of December, Drummond reconnoitred the American camp, and determined to attack it; for which purpose he sent over General Riall on the evening of the 29th with 1,450 men, largely regulars, and a body of Indians. One detachment landed two miles below Black Rock, crossed Canajokaties [or Scajaquada] Creek in the face of a slight resistance, and took possession of a battery. The remainder landed at a point between Buffalo and Black Rock [two villages then, now united in one city], under cover of a battery on the Canadian shore. Poor as Hall's troops were, they stood long enough to fire upon the invaders and inflict considerable loss. . . . Both sides had artillery, with which the action was opened. As it progressed, however, the American line was broken in the centre, and Hall was compelled to fall back. His subsequent attempts to rally his men were of no avail, and he himself seems to have lost heart, as Lieutenant Riddle, who had about 80 regulars, offered to place them in front for the encouragement of the militia to new exertion, but Hall declined. . . . Both Buffalo and Black Rock were sacked and burned, and no mercy was shown. With but two or three exceptions, those of the inhab-

itants who were not able to run away were massacred. . . . It is related that in Buffalo a widow named St. John 'had the address to appease the ferocity of the enemy so far as to remain in her house uninjured.' Her house and the stone jail were the only buildings not laid in ashes. In Black Rock every building was either burned or blown up, except one log house, in which a few women and children had taken refuge. . . . Five vessels lying at the wharves were also burned. In this expedition the British lost 108 men, killed, wounded or missing. More than 50 of the Americans were found dead on the field. Truly, an abundant revenge had been taken for the burning of Newark. . . . On New Year's day of 1814 the settlers along the whole length of the Niagara — those of them who survived — were shivering beside the smouldering embers of their homes."—R. Johnson, *Hist. of the War of* 1812–'15, *ch.* 9.

A. D. 1813-1814.— British blockade of the Atlantic coast.—"The blockade of the Atlantic coast was enforced by British vessels from the beginning of the year 1813. At first they were inclined to spare the coast of New England, which they supposed to be friendly to Great Britain, but this policy was soon abandoned, and the whole coast was treated alike. Groups of war-vessels were stationed before each of the principal sea-ports, and others were continually in motion along the coast, from Halifax on the north to the West Indies. Early in 1813, they took possession of the mouth of Chesapeake Bay as a naval station, and the American Government ordered all the lights to be put out in the neighboring light-houses. The Atlantic coast was thus kept in a state of almost constant alarm, for the British vessels were continually landing men at exposed points to burn, plunder, and destroy. . . . In 1813, the defenceless towns of Lewes, Havre de Grace, and Hampton (near Fortress Monroe) were bombarded, and Stonington, Conn., in 1814; and a number of smaller towns were burned or plundered. Attacks on New York and other larger cities were prevented only by fear of torpedoes, by means of which the Americans had nearly blown up one or two British ships which ventured too near New York. . . . Maine, as far as the Penobscot River, was seized by the British in 1814, and was held until the end of the war."— A. Johnston, *Hist. of the U. S. for Schools, sect.* 384–386.

A. D. 1813-1814 (August — April). — The Creek War.—General Jackson's first campaign.—"The great Indian chief Tecumseh had been trying for years to unite all the red men against the whites. There would have been an Indian war if there had been no war with England, but the latter war seemed to be Tecumseh's opportunity. Among the southwestern Indians he found acceptance only with the Creeks, who were already on the verge of civil war, because some wanted to adopt civilized life, and others refused. The latter became the war party, under Weatherford [Red Eagle], a very able half-breed chief. The first outbreak in the Southwest, although there had been some earlier hostilities, was the massacre of the garrison and refugees at Fort Mims, at the junction of the Alabama and Tombigbee rivers, August 30, 1813. There were 553 persons in the fort, of whom only 5 or 6 escaped. . . . The result of the massacre at Fort Mims was that Alabama was almost abandoned by whites. Terror and desire for revenge took possession of Georgia and Tennessee. September 25th the Tennessee Legislature voted to raise men and money to aid the people of Mississippi territory against the Creeks." Andrew Jackson, one of the two major-generals of the Tennessee militia, was then confined to his bed by a wound received in a recent fight with Thomas H. Benton and Benton's brother. "As soon as he possibly could, Jackson took the field. Georgia had a force in the field under General Floyd. General Claiborne was acting at the head of troops from Louisiana and Mississippi. This Indian war had a local character and was outside the federal operations, although in the end it had a great effect upon them. . . . The Creek war was remarkable for three things: (1) the quarrels between the generals, and the want of concert of action; (2) lack of provisions; (3) insubordination in the ranks. . . . On three occasions Jackson had to use one part of his army to prevent another part from marching home, he and they differing on the construction of the terms of enlistment. He showed very strong qualities under these trying circumstances. . . . In the conduct of the movements against the enemy his energy was very remarkable. So long as there was an enemy unsubdued Jackson could not rest, and could not give heed to anything else. . . . At the end of March [1814] Jackson destroyed a body of the Creeks at Tohopeka, or Horse-Shoe Bend, in the northeast corner of the present Tallapoosa County, Alabama. With the least possible delay he pushed on to the last refuge of the Creeks, the Hickory Ground, at the confluence of the Coosa and Tallapoosa, and the Holy Ground a few miles distant. The medicine men, appealing to the superstition of the Indians, had taught them to believe that no white man could tread the latter ground and live. In April the remnant of the Creeks surrendered or fled to Florida, overcome as much by the impetuous and relentless character of the campaign against them as by actual blows. Fort Jackson was built on the Hickory Ground. The march down through Alabama was a great achievement, considering the circumstances of the country at the time. . . . The Creek campaign lasted only seven months. In itself considered, it was by no means an important Indian war, but in its connection with other military movements it was very important. Tecumseh had been killed at the battle of the Thames, in Canada, October 5, 1813. His scheme of a race war died with him. The Creek campaign put an end to any danger of hostilities from the southwestern Indians, in alliance either with other Indians or with the English. . . . This campaign . . . was the beginning of Jackson's fame and popularity, and from it dates his career. He was 47 years old. On the 31st of May he was appointed a major-general in the army of the United States, and was given command of the department of the South. He established his headquarters at Mobile in August, 1814."—W. G. Sumner, *Andrew Jackson as a Public Man, ch.* 2.

ALSO IN: G. C. Eggleston, *Red Eagle.*—J. W. Monette, *Discovery and Settlement of the Valley of the Mississippi, bk.* 5, *ch.* 14 (*v.* 2).—B. J. Lossing, *Field Book of the War of* 1812, *ch.* 33-34.

A. D. 1814 (July—September).—On the Niagara Frontier.—Chippewa.—Lundy's Lane.—Fort Erie.—"After the desolation of the Niagara frontier in 1813, there appeared to be nothing for the parties to contend for in that quarter. No object could be obtained by a victory on either side, but the temporary occupation of a vacant territory; yet both parties seemed to have selected this as the principal theatre on which to display their military prowess in the year 1814. Lieutenant General Drummond, governor of Upper Canada, concentrated the forces of that province at fort George, and retained the possession of Niagara. The American Generals Smyth, Hampton, Dearborn, and Wilkinson, under whose auspices the campaigns of 1812 and 13, on the Canada border, were conducted, had retired from that field; and General Brown was appointed major general, and, with the assistance of Brigadiers Scott and Ripley, designated to the command of the Niagara frontier. He left Sackett's Harbour in May, with a large portion of the American troops. . . . On his arrival at Buffalo, calculating upon the co-operation of the Ontario fleet, he determined on an attempt to expel the British from the Niagara peninsula. With this view he crossed the river on the 3d of July. . . . On the same day he invested fort Erie, and summoned it to surrender, allowing the commandant two hours to answer the summons. At five in the afternoon the fort surrendered, and the prisoners, amounting to 137, were removed to Buffalo. On the morning of the fourth General Scott advanced with his brigade and corps of artillery, and took a position on the Chippewa plain, half a mile in front of the village, his right resting on the river, and his front protected by a ravine. The British were encamped in force at the village. In the evening General Brown joined him with the reserve under General Ripley, and the artillery commanded by Major Hindman. General Porter arrived the next morning, with the New-York and Pennsylvania volunteers, and a number of Indians of the six nations. . . . At four in the afternoon, General Porter advanced, taking the woods in order to conceal his approach, and . . . met the whole British force approaching in order of battle. General Scott, with his brigade and Towser's artillery, met them on the plain, in front of the American encampment, and was directly engaged in close action with the main body. General Porter's command gave way. . . . The reserve were now ordered up, and General Ripley passed to the woods in left of the line to gain the rear of the enemy; but before this was effected, General Scott had compelled the British to retire. Their whole line now fell back, and were eagerly pursued. . . . The British left 200 dead on the ground. . . . The American loss was 60 killed, and 268 wounded and missing. After the battle of Chippewa, the British retired to fort George; and General Brown took post at Queenston, where he remained some time, expecting reinforcements. . . . On the 20th, General Brown advanced with his army towards fort George, drove in the outposts, and encamped near the fort, in the expectation that the British would come out and give him battle. On the 22d, he returned to his former position at Queenston; here he received a letter from General Gaines, informing him that the heavy guns, and the rifle regiment, which he had ordered from Sackett's harbour, together with the whole fleet, were blockaded in that port, and no assistance was to be expected from them. On the 24th, he fell back to Chippewa, and on the 25th received intelligence that the enemy, having received large reinforcements from Kingston, were advancing upon him. The first brigade under General Scott, Towser's artillery, all the dragoons and mounted men, were immediately put in motion on the Queenston road. On his arrival at the Niagara cataract, General Scott learned that the British were in force directly in his front, separated only by a narrow piece of wood. Having despatched this intelligence to General Brown, he advanced upon the enemy, and the action commenced at six o'clock in the afternoon. . . . The British artillery had taken post on a commanding eminence, at the head of Lundy's lane, supported by a line of infantry, out of the reach of the American batteries. This was the key of the whole position; from hence they poured a most deadly fire on the American ranks. It became necessary either to leave the ground, or to carry this post and seize the height. The latter desperate task was assigned to Colonel Miller. On receiving the order from General Brown, he calmly surveyed the position, and answered 'I will try, sir,' which expression was afterwards the motto of his regiment. . . . Colonel Miller advanced coolly and steadily to his object, amid a tremendous fire, and at the point of the bayonet, carried the artillery and the height. The guns were immediately turned upon the enemy; General Ripley now brought up the 23d regiment, to the support of Colonel Miller; the first regiment was rallied and brought into line, and the British were driven from the hill. . . . The British rallied under the hill, and made a desperate attempt to regain their artillery, and drive the Americans from their position, but without success; a second and third attempt was made with the like result. General Scott was engaged in repelling these attacks, and though with his shoulder fractured, and a severe wound in the side, continued at the head of his column, endeavouring to turn the enemy's right flank. The volunteers under General Porter, during the last charge of the British, precipitated themselves upon their lines, broke them, and took a large number of prisoners. General Brown . . . received a severe wound on the thigh, and in the side, and . . . consigned the command to General Ripley. At twelve o'clock, both parties retired from the field to their respective encampments, fatigued and satiated with slaughter. . . . The battle [called Lundy's Lane, or Bridgewater, or Niagara] was fought to the west of, and within half a mile of the Niagara cataract. . . . Considering the numbers engaged, few contests have ever been more sanguinary. . . . General Brown states his loss to be, killed, 171; wounded, 572; missing, 117; [total] 860. General Drummond acknowledges a loss of, killed, 84; wounded, 559; missing and prisoners, 235; [total] 878. . . . General Ripley, on the 26th, fell back to fort Erie. General Brown retired to Buffalo, and General Scott to Batavia, to recover from their wounds."—S. Perkins, *Hist.*

of the Late War, ch. 17.—"Fort Erie was a small work with two demi-bastions; one upon the north and the other upon the south front. It was built of stone, but was not of sufficient strength to resist ordnance heavier than the field artillery of that day. Ripley at once commenced to strengthen the position. Fortunately, General Drummond delayed his advance for two days, giving the Americans an opportunity of which they industriously availed themselves. . . . Fort Erie was changed into an entrenched camp, with its rear open toward the river. General Drummond appeared before the fort, on the 3d of August, with a force of 5,350 men. He established his camp two miles distant, back of Waterloo, and commenced a double line of entrenchments within 400 yards of the main work. The same morning he threw a force of about 1,000 men across the river, and landed them below Squaw Island, with the intention of seizing Buffalo, destroying the stores gathered there, and interrupting the communications of the American army. This soldierly plan was happily frustrated by Major Morgan with a battalion of the First Rifles, 250 strong. . . . During the following fortnight several skirmishes occurred in front of Fort Erie, in one of which the gallant Colonel Morgan was killed. General Drummond, having been still further reinforced, determined not to wait for the slow results of a siege, but to carry the place by assault. At two o'clock in the morning of the 3d of August, the British army moved to the attack in three columns. One was ordered to carry the Douglass battery, upon the extreme right of our position; another column was to engage the fort itself; but the main attack was directed against the Towson battery upon Snake Hill. Brigadier-General Gaines, who had lately arrived, was now in command of the American forces. . . . The evening before, a shell had exploded a small magazine in Fort Erie, and General Gaines was apprehensive that the enemy would take advantage of this disaster and attack him,—one-third of the troops were therefore kept at their post through the night, which was dark and rainy. His precautions were well taken. At half-past two the tramp of a heavy column was heard approaching Towson's redoubt. Instantly a sheet of fire flashed from our lines, lighting up the night, and revealing the enemy 1,500 strong. They had been ordered to attack with the bayonet; and, to insure obedience, the flints had been removed from their muskets. With complete courage they approached to within reach of the light abattis, between Snake Hill and the lake. But after a desperate struggle they fell back. Again they advanced, and this time succeeded in planting scaling ladders in the ditch in front of the redoubt. But their ladders were too short, and the assailants were driven off with severe loss. Meanwhile a detachment endeavored to turn our position by wading out into the river, and passing round our left. Ripley met them promptly. Numbers were killed or wounded, and were carried off by the current, and the remainder of the detachment were captured. Five times the obstinate English returned to the assault, but each time without success. . . . The other British columns waited until the engagement on the left was at its height. On our right the enemy advanced to within 50 yards of the Douglass battery, but were then driven back. At the fort the contest was more severe. The assailants, led by Colonel Drummond, an officer of singular determination, advanced through a ravine north of the fort, and attacking simultaneously all the salient points, they swarmed over the parapet into the north bastion. . . . The garrison of the fort rallied, and after a severe contest succeeded in regaining possession of the bastion. A second and third time Drummond returned to the assault with no better success. But with invincible tenacity he clung to his purpose. Moving his troops, under cover of the night and the dense cloud of battle which hung along the ramparts, silently round the ditch, he suddenly repeated the charge. The English ran up their ladders so quickly that they gained the top of the glacis before the defenders could rally to resist them. . . . The garrison of the fort made repeated unsuccessful efforts to retake the bastion; but at day-break it was still in the enemy's possession. Powerful detachments were then brought up from the left and center, and a combined attempt was made from several different directions to drive the British from their position; but, after a desperate struggle, this likewise failed. The guns of the Douglass battery, and those under Captain Fanning, were turned upon the bastion, and Captain Biddle was placing a piece of artillery to enfilade it, while several hundred of the American reserve stood ready to rush upon it. At this moment a loud explosion shook the earth, and the whole bastion leaped into the air, carrying with it both its assailants and defenders. The cause of this explosion has never been accurately ascertained. It is generally supposed to have been accidental. . . . The shattered columns of the foe now retired to their encampment. The British report stated their loss at 905 killed, wounded and missing; of whom 222 were killed, including 14 officers; 174 wounded; and 186 prisoners remained in our hands. Our loss, including 11 prisoners, was 84 men. In the bombardment of the day before we had 45 killed and wounded; swelling our total loss to 129. A few days after this, Drummond was reinforced by two regiments, and reopened fire along his own line. The bombardment continued through the remainder of the month of August. On the 28th, General Gaines was wounded by a shell, which fell into his quarters, and General Ripley again assumed the command, but was soon superseded by General Brown, who had recovered from the wound received at Lundy's Lane. General Porter, by dint of superhuman efforts, gathered a considerable body of militia at Buffalo, to reinforce the fort. . . . Notwithstanding the victory I have just described, and the reinforcements brought by Porter, the American army at Fort Erie was in a very dangerous situation. Their foe was daily increasing in number, and three new batteries were thrown up, whose fire was rapidly making the position untenable. . . . Under the pressure of this great necessity, General Porter planned a sortie, which was submitted to General Brown; who approved it, and ordered it to be carried out. . . . By this enterprise, altogether the most brilliant military event which occurred on this frontier during the war, all of the enemy's guns in position were made useless, and their entrenchments destroyed. We took 385 prisoners, including 11 commissioned officers,

and killed or wounded 600 men. Our own loss was 510. . . . Four days after this, General Drummond raised the siege, and fell back to Fort George."—W. Dorsheimer, *Buffalo during the War of* 1812 (*Buffalo Hist. Soc. Pub's, v.* 1).

A. D. 1814 (August—September).—Capture and destruction of the national Capital.—Attempt against Baltimore.—Early in the "summer of 1814, rumors spread through the capital of a great British armament preparing at Bermuda, some said for an attack on New York, others on Baltimore and Annapolis, while others asserted quite as vehemently that the national capital was the chosen object of British vengeance. How easy it would be, they argued, for Admiral Sir George Cockburn, who had been a year with his fleet in Chesapeake Bay, when reinforced by the Bermuda armament to disembark a strong column at any point on the western shore of the Chesapeake—but forty miles distant—and by a forced march capture the city. But by some strange fatuity, the President and his cabinet treated these possibilities as unworthy of credence. 'The British come here!' a Cabinet officer is reported to have said, in answer to the representations of citizens. 'What should they come here for?' Sure enough: a provincial village of 6,000 inhabitants. But then there were the state papers and public buildings, the moral effect of capturing an enemy's capital, and the satisfaction of chastising the city where a British minister had been obliged to ask for his recall on the ground of ill-treatment. . . . Colonel James Monroe, a gallant soldier of the Revolution, was now Secretary of State; another Revolutionary soldier, General Armstrong, was Secretary of War, and acting on their advice, President Madison did substantially nothing for the defence of his capital. Fort Washington, commanding the Potomac, which Major L'Enfant had planned early in the war, was hurried forward to completion; but no defences on the landward side were erected, and no army was called out to defend it. What was done was this: The District of Columbia, Maryland, and that part of Virginia north of the Rappahannock, were created a tenth military district under command of General W. H. Winder, a brave officer, who had seen service in the Northwest, and who had recently returned from long detention in Canada as prisoner of war. General Winder on taking command (June 26, 1814) found for the defence of Washington detachments of the 36th and 38th regulars, amounting to a few hundred men, but nothing more—no forts, no guns, no army. A force of 13 regiments of Virginia, Maryland, and Pennsylvania militia had been drafted, but were not to be called into active service until the enemy should appear—an arrangement against which General Winder protested in vain. . . . While these weak and ineffectual preparations are being made, the enemy has been marshalling his forces. Early in August Rear-Admiral Cockburn's blockading squadron had been joined in the Potomac by the fleet of Vice-Admiral Cochrane, who as ranking officer at once took command." A few days later the expected Bermuda expedition arrived, bringing 4,000 troops—veterans from Wellington's army—under General Ross. A little flotilla of gunboats on the Chesapeake, commanded by Commodore Barney, was driven into Patuxent River and there abandoned and burned. Then the enemy landed in force at Benedict and marched on Washington, while the Secretary of War still insisted that Baltimore must be, in the nature of things, the place they would strike. At Bladensburg they were met (August 24th) by General Winder with some 5,000 hastily collected militia and volunteers and less than 1,000 regular troops, sailors, and marines—poor materials for an army with which to face 4,000 hardened veterans of the Peninsular War. The battle ended in the utter routing of the American forces and the abandonment of Washington to the British invaders.—C. B. Todd, *The Story of Washington, ch.* 8.—"This battle, by which the fate of the American capital was decided, began about one o'clock in the afternoon, and lasted till four. The loss on the part of the English was severe, since, out of two-thirds of the army, which were engaged, upwards of 500 men were killed and wounded; and what rendered it doubly severe was, that among these were numbered several officers of rank and distinction. . . . On the side of the Americans the slaughter was not so great. Being in possession of a strong position, they were of course less exposed in defending than the others in storming it; and had they conducted themselves with coolness and resolution, it is not conceivable how the battle could have been won. But the fact is that, with the exception of a party of sailors from the gun boats, under the command of Commodore Barney, no troops could behave worse than they did."—G. R. Gleig, *Campaigns of the British Army at Washington and New Orleans, ch.* 9.—When Winder's troops abandoned Washington "fire was put at the navy yard to a new frigate on the stocks, to a new sloop-of-war lately launched, and to several magazines of stores and provisions, for the destruction of which ample preparations had been made. By the light of this fire, made lurid by a sudden thunder-gust, Ross, toward evening, advanced into Washington, at that time a straggling village of some 8,000 people, but, for the moment, almost deserted by the male part of the white inhabitants. From Gallatin's late residence, one of the first considerable houses which the column reached, a shot was fired which killed Ross's horse, and which was instantly revenged by putting fire to the house. After three or four volleys at the Capitol, the two detached wings were set on fire. The massive walls defied the flames, but all the interior was destroyed, with many valuable papers, and the library of Congress—a piece of Vandalism alleged to be in revenge for the burning of the Parliament House at York. [Chaplain Gleig, who was with the British forces under Ross, states in the narrative quoted from above that the party fired upon from Gallatin's house bore a flag of truce, and that Ross's destructive proceedings in Washington were consequent on that fact.] . . . The president's house, and the offices of the Treasury and State Departments near by, were set on fire. . . . The next morning the

War Office was burned. . . . Several private houses were burned, and some private warehouses broken open and plundered; but, in general, private property was respected." On the night of the 25th the British withdrew, returning as they came; but on the 29th their frigates, ascending the Potomac, arrived at Alexandria and plundered that city heavily. "Within less than a fortnight after the re-embarkation of Ross's army, the British fleet, spreading vast alarm as it ascended the Chesapeake, appeared off the Patapsco [September 12]. . . . A landing was effected the next day at North Point, on the northern shore of that estuary, some eight miles up which was Fort M'Henry, an open work only two miles from Baltimore, commanding the entrance into the harbor, which found, however, its most effectual protection in the shallowness of the water. The defense of the city rested with some 10,000 militia. . . . A corps 3,000 strong had been thrown forward toward North Point. As Ross and Cockburn, at the head of a reconnoitering party, approached the outposts of this advanced division, a skirmish ensued, in which Ross was killed. . . . The fleet, meanwhile, opened a tremendous cannonade on Fort M'Henry; but . . . at such a distance as to render their fire ineffectual. It was under the excitement of this cannonade that the popular song of the 'Star Spangled Banner' was composed, the author [Francis Scott Key] being then on board the British fleet, whither he had gone to solicit the release of certain prisoners, and where he was detained pending the attack. An attempt to land in boats also failed; and that same night, the bombardment being still kept up, the British army, covered by rain and darkness, retired silently to their ships and re-embarked."—R. Hildreth, *Hist. of the U. S.*, *v.* 6, *pp.* 510–520.

A. D. 1814 (September).—Prevost's invasion of New York.—Macdonough's naval victory on Lake Champlain.—Lake Champlain, "which had hitherto played but an inconspicuous part, was now to become the scene of the greatest naval battle of the war. A British army of 11,000 men under Sir George Prevost undertook the invasion of New York by advancing up the western bank of Lake Champlain. This advance was impracticable unless there was a sufficiently strong British naval force to drive back the American squadron at the same time. Accordingly, the British began to construct a frigate, the Confiance, to be added to their already existing force, which consisted of a brig, two sloops, and 12 or 14 gun boats. The Americans already possessed a heavy corvette, a schooner, a small sloop, and 10 gun-boats or row-galleys; they now began to build a large brig, the Eagle, which was launched about the 16th of August. Nine days later, on the 25th, the Confiance was launched. The two squadrons were equally deficient in stores, etc.; the Confiance having locks to her guns, some of which could not be used, while the American schooner Ticonderoga had to fire her guns by means of pistols flashed at the touchholes (like Barclay on Lake Erie). Macdonough and Downie were hurried into action before they had time to prepare themselves thoroughly; but it was a disadvantage common to both, and arose from the nature of the case, which called for immediate action. The British army advanced slowly toward Plattsburg, which was held by General Macomb with less than 2,000 effective American troops. Captain Thomas Macdonough, the American commodore, took the lake a day or two before his antagonist, and came to anchor in Plattsburg harbor. The British fleet, under Captain George Downie, moved from Isle-aux-Noix on Sept. 8th, and on the morning of the 11th sailed into Plattsburg harbor." The American force consisted of the ship Saratoga, Captain Macdonough, the brig Eagle, the schooner Ticonderoga, the sloop Preble, and ten row-galleys, or gunboats mounting one or two guns each — "in all, 14 vessels of 2,244 tons and 882 men, with 86 guns throwing at a broadside 1,194 lbs. of shot, 480 from long, and 714 from short guns. The force of the British squadron in guns and ships is known accurately, as most of it was captured." It consisted of the frigate Confiance, the brig Linnet, the sloops Chubb and Finch, and twelve gunboats — "in all, 16 vessels, of about 2,402 tons, with 937 men, and a total of 92 guns, throwing at a broadside 1,192 lbs., 660 from long and 532 from short pieces. . . . Young Macdonough (then but 28 years of age) calculated all . . . chances very coolly and decided to await the attack at anchor in Plattsburg Bay, with the head of his line so far to the north that it could hardly be turned. . . . The morning of September 11th opened with a light breeze from the northeast. Downie's fleet weighed anchor at daylight, and came down the lake with the wind nearly aft, the booms of the two sloops swinging out to starboard. At half-past seven, the people in the ships could see their adversaries' upper sails across the narrow strip of land ending in Cumberland Head, before the British doubled the latter. . . . As the English squadron stood bravely in, young Macdonough, who feared his foes not at all, but his God a great deal, knelt for a moment, with his officers, on the quarter-deck; and then ensued a few minutes of perfect quiet." The fierce battle which followed lasted about two hours and a half, with terribly destructive effects on both sides. The British commander, Downie, was killed early in the action. "On both sides the ships had been cut up in the most extraordinary manner; the Saratoga had 55 shot-holes in her hull, and the Confiance 105 in hers, and the Eagle and Linnet had suffered in proportion. The number of killed and wounded can not be exactly stated; it was probably about 200 on the American side, and over 300 on the British. . . . The effects of the victory were immediate and of the highest importance. Sir George Prevost and his army [which had arrived before Plattsburg on the 6th, and which, simultaneously with the naval advance, had made an unsuccessful attack on the American defensive works, at the mouth of the Saranac, held by General Alexander Macomb] at once fled in great haste and confusion back to Canada, leaving our northern frontier clear for the remainder of the war; while the victory had a very great effect on the negotiations for peace. In this battle the crews on both sides behaved with equal bravery, and left nothing to be desired in this respect; but from their rawness they of course showed far less skill than the crews of most of the American and some of the British ocean cruisers. . . . Macdonough in this battle won a higher fame than any other commander of the war,

British or American. He had a decidedly superior force to contend against, the officers and men of the two sides being about on a par in every respect; and it was solely owing to his foresight and resource that we won the victory. He forced the British to engage at a disadvantage by his excellent choice of position, and he prepared beforehand for every possible contingency. . . . Down to the time of the Civil War he is the greatest figure in our naval history."—T. Roosevelt, *The Naval War of* 1812, *ch.* 8.

Also in: R. Johnson, *Hist. of the War of* 1812–'15, *ch.* 15.

A. D. 1814 (December).—The Hartford Convention.—"The commercial distress in New England, the possession by the enemy of a large part of the District of Maine, the fear of their advance along the coast, and the apparent neglect of the Federal Government to provide any adequate means of resistance, had led the Legislature of Massachusetts, in October, to invite the other New England States to send delegates to Hartford, Connecticut, 'to confer upon the subject of their public grievances.' Delegates [26 in number] from Massachusetts, Rhode Island and Connecticut, and from parts of Vermont and New Hampshire, met at Hartford in December and remained in session for three weeks. In their report to their State Legislatures they reviewed the state of the country, the origin and management of the war, and the strong measures lately proposed in Congress, and recommended several Amendments to the Constitution, chiefly with intent to restrict the powers of Congress over commerce, and to prevent naturalized citizens from holding office. In default of the adoption of these Amendments, another convention was advised, 'in order to decide on the course which a crisis so momentous might seem to demand.' This was the famous Hartford Convention. The peace which closely followed its adjournment removed all necessity or even desire for another session of it. Its objects seem to have been legitimate. But the unfortunate secrecy of its proceedings, and its somewhat ambiguous language, roused a popular suspicion, sufficient for the political ruin of its members, that a dissolution of the Union had been proposed, perhaps resolved upon, in its meetings. Some years afterward those concerned in it were compelled in self-defense to publish its journal, in order to show that no treasonable design was officially proposed. It was then, however, too late, for the popular opinion had become fixed. Neither the Federal party which originated, nor the Federalist politicians who composed, the assembly, were ever freed from the stigma left by the mysterious Hartford Convention."—A. Johnston, *Hist. of Am. Politics, 2d ed., ch.* 8.—The language of the report of the Hartford Convention "was so skillfully selected that it cannot be said with certainty whether the convention deduced from the nature of the Union a positive right in the individual states to withdraw from the Union, or whether it claimed only a moral justification for revolution. It was prudent enough in the declaration of its position on the constitutional question not to venture beyond vague, double-meaning expressions, except so far as it could appeal to its opponents. But it went just far enough to repeat almost verbatim the declaration of faith laid down in the Kentucky resolutions of 1798. If the members of the convention, and those in sympathy with them, were 'Maratists,' they could claim that they had become so in the school of Madison and Jefferson."—H. von Holst, *Const. and Pol. Hist. of the U. S., v.* 1, *p.* 268.

Also in: T. Dwight, *Hist. of the Hartford Convention.*—H. C. Lodge, *Life and Letters of George Cabot, ch.* 11–13.

A. D. 1814 (December).—The Treaty of Peace concluded at Ghent.—"In September, 1812, Count Romanzoff suggested to Mr. [John Quincy] Adams the readiness of the Emperor [of Russia] to act as mediator in bringing about peace between the United States and England. The suggestion was promptly acted upon, but with no directly fortunate results. The American government acceded at once to the proposition, and, at the risk of an impolitic display of readiness, dispatched Messrs. Gallatin and Bayard to act as Commissioners jointly with Mr. Adams in the negotiations. These gentlemen, however, arrived in St. Petersburg only to find themselves in a very awkward position," since the offered mediation of the Czar was declined by England. The latter power preferred to negotiate directly with the United States, and presently made proposals to that effect, intimating her readiness "to send Commissioners to Göttingen, for which place Ghent was afterwards substituted, to meet American Commissioners and settle terms of pacification. The United States renewed the powers of Messrs. Adams, Bayard, and Gallatin, . . . and added Jonathan Russell, then Minister to Sweden, and Henry Clay. England deputed Lord Gambier, an Admiral, Dr. Adams, a publicist, and Mr. Goulbourn, a member of Parliament and Under Secretary of State. These eight gentlemen accordingly met in Ghent on August 7, 1814. It was upwards of four months before an agreement was reached. . . . The eight were certainly an odd assemblage of peacemakers. The ill-blood and wranglings between the opposing Commissions were bad enough, yet hardly equalled the intestine dissensions between the American Commissioners themselves. . . . The British first presented their demands, as follows: 1. That the United States should conclude a peace with the Indian allies of Great Britain, and that a species of neutral belt of Indian territory should be established between the dominions of the United States and Great Britain, so that these dominions should be nowhere conterminous, upon which belt or barrier neither power should be permitted to encroach even by purchase, and the boundaries of which should be settled in this treaty. 2. That the United States should keep no naval force upon the Great Lakes, and should neither maintain their existing forts nor build new ones upon their northern frontier; it was even required that the boundary line should run along the southern shore of the lakes; while no corresponding restriction was imposed upon Great Britain, because she was stated to have no projects of conquest as against her neighbor. 3. That a piece of the province of Maine should be ceded, in order to give the English a road from Halifax to Quebec. 4. That the stipulations of the treaty of 1783, conferring on English subjects the right of navigating the Mississippi, should be now formally renewed. The Americans were astounded; it seemed to them

hardly worth while to have come so far to listen to such propositions." But, after long and apparently hopeless wrangling, events in Europe rather than in America brought about a change of disposition on the part of the British government; instructions to the commissioners were modified on both sides, and, quite to their own surprise, they arrived at agreements which were formulated in a Treaty and signed, December 24, 1814. "Of the many subjects mooted between the negotiators scarcely any had survived the fierce contests which had been waged concerning them. The whole matter of the navigation of the Mississippi, access to that river, and a road through American territory, had been dropped by the British; while the Americans had been well content to say nothing of the Northeastern fisheries [see FISHERIES, NORTH AMERICAN: A. D. 1814–1818], which they regarded as still their own. The disarmament on the lakes and along the Canadian border, and the neutralization of a strip of Indian territory, were yielded by the English. The Americans were content to have nothing said about impressment; nor was any one of the many illegal rights exercised by England formally abandoned. The Americans satisfied themselves with the reflection that circumstances had rendered these points now only matters of abstract principle, since the pacification of Europe had removed all opportunities and temptations for England to persist in her previous objectionable courses. For the future it was hardly to be feared that she would again undertake to pursue a policy against which it was evident that the United States were willing to conduct a serious war. There was, however, no provision for indemnification. Upon a fair consideration, it must be admitted that, though the treaty was silent upon all the points which the United States had made war for the purpose of enforcing, yet the country had every reason to be gratified with the result of the negotiation."—J. T. Morse, *John Quincy Adams, pp.* 75–96.—"Instead of wearing themselves out over impracticable, perhaps impossible, questions, the commissioners turned their attention to the northern boundary between the two countries, and it was by them forever settled, and in such manner as to give the United States the foundation for its future greatness. . . . The victory of the American diplomats at Ghent was two-fold: first, they secured the benefits desired without enumerating them — even to a greater extent than if the benefits had been enumerated; and second, if they had insisted upon an enumeration of the benefits obtained, it is apparent they would have periled the entire treaty and lost all."—T. Wilson, *The Treaty of Ghent* (*Mag. of Am. Hist., Nov.*, 1888).

ALSO IN: C. Schurz, *Life of Henry Clay, ch.* 6 (*v.* 1).—J. Q. Adams, *Memoirs* (*Diary*) *ch.* 9 (*v.* 2–3). Following is the text of the treaty:

Article I. There shall be a firm and universal peace between His Britannic Majesty and the United States, and between their respective countries, territories, cities, towns, and people, of every degree, without exception of places or persons. All hostilities, both by sea and land, shall cease as soon as this treaty shall have been ratified by both parties, as hereinafter mentioned. All territory, places, and possessions whatsoever, taken by either party from the other during the war, or which may be taken after the signing of this treaty, excepting only the islands hereinafter mentioned, shall be restored without delay, and without causing any destruction or carrying away any of the artillery or other public property originally captured in the said forts or places, and which shall remain therein upon the exchange of the ratifications of this treaty, or any slaves or other private property. And all archives, records, deeds, and papers, either of a public nature or belonging to private persons, which, in the course of the war, may have fallen into the hands of the officers of either party, shall be, as far as may be practicable, forthwith restored and delivered to the proper authorities and persons to whom they respectively belong. Such of the islands in the Bay of Passamaquoddy as are claimed by both parties, shall remain in the possession of the party in whose occupation they may be at the time of the exchange of the ratifications of this treaty, until the decision respecting the title to the said islands shall have been made in conformity with the fourth article of this treaty. No disposition made by this treaty as to such possession of the islands and territories claimed by both parties shall, in any manner whatever, be construed to affect the right of either.

Article II. Immediately after the ratification of this treaty by both parties, as hereinafter mentioned, orders shall be sent to the armies, squadrons, officers, subjects and citizens of the two Powers to cease from all hostilities. And to prevent all causes of complaint which might arise on account of the prizes which may be taken at sea after the said ratifications of this treaty, it is reciprocally agreed that all vessels and effects which may be taken after the space of twelve days from the said ratifications, upon all parts of the coast of North America, from the latitude of twenty-three degrees north to the latitude of fifty degrees north, and as far eastward in the Atlantic Ocean as the thirty-sixth degree of west longitude from the meridian of Greenwich, shall be restored on each side: that the time shall be thirty days in all other parts of the Atlantic Ocean north of the equinoctial line or equator, and the same time for the British and Irish Channels, for the Gulf of Mexico, and all parts of the West Indies; forty days for the North Seas, for the Baltic, and for all parts of the Mediterranean; sixty days for the Atlantic Ocean south of the equator, as far as the latitude of the Cape of Good Hope; ninety days for every other part of the world south of the equator; and one hundred and twenty days for all other parts of the world, without exception.

Article III. All prisoners of war taken on either side, as well by land as by sea, shall be restored as soon as practicable after the ratifications of this treaty, as hereinafter mentioned, on their paying the debts which they may have contracted during their captivity. The two contracting parties respectively engage to discharge, in specie, the advances which may have been made by the other for the sustenance and maintenance of such prisoners.

Article IV. Whereas it was stipulated by the second article in the treaty of peace of one thousand seven hundred and eighty-three, between His Britannic Majesty and the United States of America, that the boundary of the United States should

comprehend all islands within twenty leagues of any part of the shores of the United States, and lying between lines to be drawn due east from the points where the aforesaid boundaries, between Nova Scotia on the one part, and East Florida on the other, shall respectively touch the Bay of Fundy and the Atlantic Ocean, excepting such islands as now are, or heretofore have been, within the limits of Nova Scotia; and whereas the several islands in the Bay of Passamaquoddy, which is part of the Bay of Fundy, and the Island of Grand Menan, in the said Bay of Fundy, are claimed by the United States as being comprehended within their aforesaid boundaries, which said islands are claimed as belonging to His Britannic Majesty, as having been, at the time of and previous to the aforesaid treaty of one thousand seven hundred and eighty-three, within the limits of the Province of Nova Scotia: In order, therefore, finally to decide upon these claims, it is agreed that they shall be referred to two Commissioners to be appointed in the following manner, viz: One Commissioner shall be appointed by His Britannic Majesty, and one by the President of the United States, by and with the advice and consent of the Senate thereof; and the said two Commissioners so appointed shall be sworn impartially to examine and decide upon the said claims according to such evidence as shall be laid before them on the part of His Britannic Majesty and of the United States respectively. The said Commissioners shall meet at St. Andrews, in the Province of New Brunswick, and shall have power to adjourn to such other place or places as they shall think fit. The said Commissioners shall, by a declaration or report under their hands and seals, decide to which of the two contracting parties the several islands aforesaid do respectively belong, in conformity with the true intent of the said treaty of peace of one thousand seven hundred and eighty-three. And if the said Commissioners shall agree in their decision, both parties shall consider such decision as final and conclusive. It is further agreed that, in event of the two Commissioners differing upon all or any of the matters so referred to them, or in the event of both or either of the said Commissioners refusing, or declining, or wilfully omitting to act as such, they shall make, jointly or separately, a report or reports, as well to the Government of His Britannic Majesty as to that of the United States, stating in detail the points on which they differ, and the grounds upon which their respective opinions have been formed, or the grounds upon which they, or either of them, have so refused, declined, or omitted to act. And His Britannic Majesty and the Government of the United States hereby agree to refer the report or reports of the said Commissioners to some friendly sovereign or State, to be then named for that purpose, and who shall be requested to decide on the differences which may be stated in the said report or reports, or upon the report of one Commissioner, together with the grounds upon which the other Commissioner shall have refused, declined or omitted to act, as the case may be. And if the Commissioner so refusing, declining or omitting to act, shall also wilfully omit to state the grounds upon which he has so done, in such manner that the said statement may be referred to such friendly sovereign or State, together with the report of such other Commissioner, then such sovereign or State shall decide ex parte upon the said report alone. And His Britannic Majesty and the Government of the United States engage to consider the decision of such friendly sovereign or State to be final and conclusive on all the matters so referred.

Article V. Whereas neither that point of the highlands lying due north from the source of the river St. Croix, and designated in the former treaty of peace between the two Powers as the northwest angle of Nova Scotia, nor the northwesternmost head of Connecticut River, has yet been ascertained; and whereas that part of the boundary line between the dominions of the two Powers which extends from the source of the river St. Croix directly north to the above mentioned northwest angle of Nova Scotia, thence along the said highlands which divide those rivers that empty themselves into the river St. Lawrence from those which fall into the Atlantic Ocean to the northwesternmost head of Connecticut River, thence down along the middle of that river to the forty-fifth degree of north latitude; thence by a line due west on said latitude until it strikes the river Iroquois or Cataraquy, has not yet been surveyed: it is agreed that for these several purposes two Commissioners shall be appointed, sworn, and authorized to act exactly in the manner directed with respect to those mentioned in the next preceding article, unless otherwise specified in the present article. The said Commissioners shall meet at St. Andrews, in the Province of New Brunswick, and shall have power to adjourn to such other place or places as they shall think fit. The said Commissioners shall have power to ascertain and determine the points above mentioned, in conformity with the provisions of the said treaty of peace of one thousand seven hundred and eighty-three, and shall cause the boundary aforesaid, from the source of the river St. Croix to the river Iroquois or Cataraquy, to be surveyed and marked according to the said provisions. The said Commissioners shall make a map of the said boundary, and annex to it a declaration under their hands and seals, certifying it to be the true map of the said boundary, and particularizing the latitude and longitude of the northwest angle of Nova Scotia, of the northwesternmost head of Connecticut River, and of such other points of the said boundary as they may deem proper. And both parties agree to consider such map and declaration as finally and conclusively fixing the said boundary. And in the event of the said two Commissioners differing, or both or either of them refusing, declining, or wilfully omitting to act, such reports, declarations, or statements shall be made by them, or either of them, and such reference to a friendly sovereign or State shall be made in all respects as in the latter part of the fourth article is contained, and in as full a manner as if the same was herein repeated.

Article VI. Whereas by the former treaty of peace that portion of the boundary of the United States from the point where the forty-fifth degree of north latitude strikes the river Iroquois or Cataraquy to the Lake Superior, was declared to be "along the middle of said river into Lake Ontario, through the middle of said lake, until it strikes the communication by water between that lake and Lake Erie, thence along the middle of

said communication into Lake Erie, through the middle of said lake until it arrives at the water communication into the Lake Huron, thence through the middle of said lake to the water communication between that lake and Lake Superior;" and whereas doubts have arisen what was the middle of the said river, lakes, and water communications, and whether certain islands lying in the same were within the dominions of His Britannic Majesty or of the United States: In order, therefore, finally to decide these doubts, they shall be referred to two Commissioners, to be appointed, sworn, and authorized to act exactly in the manner directed with respect to those mentioned in the next preceding article, unless otherwise specified in this present article. The said Commissioners shall meet, in the first instance, at Albany, in the State of New York, and shall have power to adjourn to such other place or places as they shall think fit. The said Commissioners shall, by a report or declaration, under their hands and seals, designate the boundary through the said river, lakes and water communications, and decide to which of the two contracting parties the several islands lying within the said rivers, lakes, and water communications, do respectively belong, in conformity with the true intent of the said treaty of one thousand seven hundred and eighty-three. And both parties agree to consider such designation and decision as final and conclusive. And in the event of the said two Commissioners differing, or both or either of them refusing, declining, or wilfully omitting to act, such reports, declarations, or statements shall be made by them, or either of them, and such reference to a friendly sovereign or State shall be made in all respects as in the latter part of the fourth article is contained, and in as full a manner as if the same was herein repeated.

Article VII. It is further agreed that the said two last-mentioned Commissioners, after they shall have executed the duties assigned to them in the preceding article, shall be, and they are hereby, authorized upon their oaths impartially to fix and determine, according to the true intent of the said treaty of peace of one thousand seven hundred and eighty-three, that part of the boundary between the dominions of the two Powers which extends from the water communication between Lake Huron and Lake Superior, to the most northwestern point of the Lake of the Woods, to decide to which of the two parties the several islands lying in the lakes, water communications, and rivers, forming the said boundary, do respectively belong, in conformity with the true intent of the said treaty of peace of one thousand seven hundred and eighty-three; and to cause such parts of the said boundary as require it to be surveyed and marked. The said Commissioners shall, by a report or declaration under their hands and seals, designate the boundary aforesaid, state their decision on the points thus referred to them, and particularize the latitude and longitude of the most northwestern point of the Lake of the Woods, and of such other parts of the said boundary as they may deem proper. And both parties agree to consider such designation and decision as final and conclusive. And in the event of the said two Commissioners differing, or both or either of them refusing, declining, or wilfully omitting to act, such reports, declarations, or statements shall be made by them, or either of them, and such reference to a friendly sovereign or State shall be made in all respects as in the latter part of the fourth article is contained, and in as full a manner as if the same was herein repeated.

Article VIII. The several boards of two Commissioners mentioned in the four preceding articles shall respectively have power to appoint a Secretary, and to employ such surveyors or other persons as they shall judge necessary. Duplicates of all their respective reports, declarations, statements and decisions and of their accounts, and of the journal of their proceedings, shall be delivered by them to the agents of His Britannic Majesty and to the agents of the United States, who may be respectively appointed and authorized to manage the business on behalf of their respective Governments. The said Commissioners shall be respectively paid in such manner as shall be agreed between the two contracting parties, such agreement being to be settled at the time of the exchange of the ratifications of this treaty. And all other expenses attending the said Commissions shall be defrayed equally by the two parties. And in the case of death, sickness, resignation or necessary absence, the place of every such Commissioner, respectively, shall be supplied in the same manner as such Commissioner was first appointed, and the new Commissioner shall take the same oath or affirmation, and do the same duties. It is further agreed between the two contracting parties, that in case any of the islands mentioned in any of the preceding articles, which were in the possession of one of the parties prior to the commencement of the present war between the two countries, should, by the decision of any of the Boards of Commissioners aforesaid, or of the sovereign or State so referred to, as in the four next preceding articles contained, fall within the dominions of the other party, all grants of land made previous to the commencement of the war, by the party having had such possession, shall be as valid as if such island or islands had, by such decision or decisions, been adjudged to be within the dominions of the party having had such possession.

Article IX. The United States of America engage to put an end, immediately after the ratification of the present treaty, to hostilities with all the tribes or nations of Indians with whom they may be at war at the time of such ratification; and forthwith to restore to such tribes or nations, respectively, all the possessions, rights and privileges which they may have enjoyed or been entitled to in one thousand eight hundred and eleven, previous to such hostilities: Provided always that such tribes or nations shall agree to desist from all hostilities against the United States of America, their citizens and subjects, upon the ratification of the present treaty being notified to such tribes or nations, and shall so desist accordingly. And His Britannic Majesty engages, on his part, to put an end immediately after the ratification of the present treaty, to hostilities with all the tribes or nations of Indians with whom he may be at war at the time of such ratification, and forthwith to restore to such tribes or nations respectively all the possessions, rights and privileges which they may have enjoyed or been entitled to in one thousand eight hundred and eleven, previous to such hostilities: Provided always that such tribes or

nations shall agree to desist from all hostilities against His Britannic Majesty, and his subjects, upon the ratification of the present treaty being notified to such tribes or nations, and shall so desist accordingly.

Article X. Whereas the traffic in slaves is irreconcilable with the principles of humanity and justice, and whereas both His Majesty and the United States are desirous of continuing their efforts to promote its entire abolition, it is hereby agreed that both the contracting parties shall use their best endeavors to accomplish so desirable an object.

Article XI. This treaty, when the same shall have been ratified on both sides, without alteration by either of the contracting parties, and the ratifications mutually exchanged, shall be binding on both parties and the ratifications shall be exchanged at Washington, in the space of four months from this day, or sooner if practicable. In faith whereof we, the respective Plenipotentiaries, have signed this treaty, and have thereunto affixed our seals. Done, in triplicate, at Ghent, the twenty-fourth day of December, one thousand eight hundred and fourteen.

A. D. 1814.—The last fighting at Sea.—The exploits of "Old Ironsides."—"During the latter part of the war, as might have been foreseen, there was little opportunity for American frigates to show that they could keep up the fame they had so gloriously won. The British were determined that none of them that ventured out to sea should escape; and by stationing a squadron, which their great resources enabled them to do, before each port where a frigate lay, they succeeded in keeping it cooped up and inactive. . . . The 'Adams,' which had been a 28-gun frigate, but which was now a corvette, managed to slip out from Washington in January, 1814, under the command of Charles Morris. . . . Six months were passed in cruising, part of the time off the Irish coast, but with no great success." Returning home, the "Adams" went ashore at the mouth of the Penobscot, but was got off, much injured, and was taken up the river for repairs. An English expeditionary force pursued the crippled vessel, and her commander was forced to set her on fire. "At this time the 'Constitution' [Old Ironsides, as she was popularly called] was . . . lying at Boston, watched by a squadron of the enemy. She had proved a lucky ship, . . . and her present captain, Charles Stewart, who had been one of Preble's lieutenants at Tripoli, was certainly a man well fitted to make the most of any chance he had. The frigate had been in port since April, at first repairing, and later unable to get out owing to the presence of the enemy's squadron." In December, however, the "Constitution" contrived to give the blockaders the slip and made her way across the Atlantic to the neighborhood of Madeira, where she fought and captured, at one time, two British war vessels—the corvette "Cyana" of 22 guns, and the sloop "Levant," of 20 guns. A few days afterwards, as the "Constitution," with her two prizes, was lying at anchor in Port Praya, Cape de Verde Islands, Capt. Stewart sighted, outside, no less than three ships of the very blockading squadron which he had slipped away from at Boston, and which had pursued him across the ocean. He made his escape from the port, with both his prizes, in time to avoid being hemmed in, and speedily outsailed his pursuers. The latter, giving up hope of the "Constitution," turned their attention to one of the prizes and succeeded in recovering her. "The only other frigate that left port in the last year of the war was less fortunate than the 'Constitution.' This was the 'President,' now under Commodore Decatur. She was at New York, and for some time had lain at anchor off Staten Island watching for an opportunity to pass the blockading squadron." On a stormy night in January, 1815 (after the treaty of peace had been actually signed at Ghent, but before news of it had reached America), he made the attempt, but was discovered and chased by four of the blockading ships. After a race which lasted from dawn until nearly midnight, and a running fight of two hours, Decatur found escape to be impossible and surrendered his ship.—J. R. Soley, *The Boys of 1812, ch.* 17.

A. D. 1815 (January).—Jackson's victory at New Orleans.—In October of the last year "dispatches from the American envoys abroad announced that 12,000 to 15,000 British troops would leave Ireland early in September for New Orleans and Mobile. Intelligence reached Washington, December 9th, by way of Cuba, that the British Chesapeake force, under Admiral Cochrane, had united at Jamaica with these other troops, and all were ready to sail for the mouths of the Mississippi. 'Hasten your militia to New Orleans,' now urged Monroe upon the Executives of Tennessee, Kentucky, and Georgia; 'do not wait for this government to arm them; put all the arms you can find into their hands; let every man bring his rifle or musket with him; we shall see you paid.' . . . Great results had been expected by Great Britain from the secret expedition fitted out against Louisiana. . . . Fifty British vessels, large and small, bore 7,000 British land troops—comprising the invading force from the Chesapeake and a veteran reinforcement from England—across the Gulf of Mexico from Jamaica to the ship channel near the entrance of Lake Borgne, thus approaching New Orleans midway between the Mississippi River and Mobile Bay. Here the fleet anchored; and, after dispersing a meagre flotilla of American gunboats, which opposed their progress in vain, the invaders took full possession of Lake Borgne, and, by means of lighter transports, landed troops upon a lonely island at the mouth of the Pearl River, which served as the military rendezvous. Crossing thence to the northwestern end of Lake Borgne, a sparsely-settled region, with plantations and sugar-works, half of this invading army, by the 23d [December], struck the Mississippi at a point within nine miles of New Orleans. Not a gun had been fired since the trifling engagement with the American flotilla. The British believed their near approach unknown, and even unsuspected, in the city; they meant to capture it by an assault both brilliant and sudden. . . . But Jackson had received his instructions in good season, and from the 2d of December New Orleans had been, under his vigilant direction, a camp in lively motion." Martial law was proclaimed; "free men of color were enrolled; convicts were released to become soldiers; the civic force was

increased to its utmost. Jackson inspected and strengthened the defences in the vicinity, erecting new batteries. . . . With his newly arrived volunteers from neighboring States, quite expert, many of them, in the use of the rifle and eager for fight, Jackson found himself presently at the head of 5,000 effective men, less than 1,000 of whom were regulars." With a portion of these, supported by one of the two armed vessels on the river, he boldly attacked the enemy, on the evening of the 23d, but accomplished little more than to demonstrate the energy of the defence he was prepared to make. On the 28th the English (having previously destroyed one of the troublesome vessels in the river, the Carolina, with hot shot) returned the attack, but did not break the American lines. Then General Pakenham, the English commander, brought up heavy guns from the fleet, and soon convinced General Jackson that cotton bales, which the latter had piled up before his men, were too light and too combustible for breastworks against artillery; but the lesson proved more useful than otherwise, and the British batteries were answered with fully equal effect by an American cannonade. "Pakenham's last and boldest experiment was to carry Jackson's lines by storm on both sides of the river; and this enterprise, fatal, indeed, to those who conceived it, gives immortal date to the 8th of January,—the day on which the battle of New Orleans was fought. Four days before this momentous battle, over 2,000 Kentucky militia, under General Adair, arrived at New Orleans, ready soldiers, but miserably equipped. Of their number 700 were marched to the front. Pakenham's army, swelled by a body of reinforcements, commanded by General Lambert, another of Wellington's officers, now consisted in all of 10,000 troops, the flower of British veterans. On the day of the battle Jackson had only half as many soldiers on the New Orleans side of the river, and of these the greater part were new recruits under inexperienced officers. On the opposite bank General Morgan, with about 1,500 men, among them detachments of Kentuckians and Louisiana militia, had intrenched himself in expectation of an assault. Jackson had penetrated the enemy's design, which was to make the main attack upon his lines, while a lesser force crossed the Mississippi to drive Morgan up the bank. Jackson's grand defences, extending for a mile and a half from the Mississippi, along his ditch or canal, to an impassable cypress swamp, consisted of earthworks, a redoubt next the river to enfilade the ditch, and eight batteries, all well mounted. The schooner Louisiana and Commander Patterson's marine battery across the river protected this line. Another intrenchment had been thrown up a mile and a half in the rear, as a rallying-point in case of need. There was a third line just below the city. . . . The morning fog rolled away on the 8th of January. Pakenham, under the fire of a battery he had erected during the night, advanced with the main body of British troops to storm Jackson's position." The Americans, behind their breastworks, withheld their fire until the storming columns were 200 yards away, and then poured volley on volley into the approaching mass of men. "This, with the steady fire from the American batteries all along the line, as the foe advanced over a large bare plain, made hideous gaps in the British ranks, throwing them into utter confusion. It was a fearful slaughter. Dead bodies choked the ditch and strewed the plain. Gallant Highlanders flung themselves forward to scale the ramparts only to fall back lifeless. Soldiers who had served under Wellington in Spain broke, scattered, and ran. Of the four British generals commanding, Pakenham was killed, Gibbs mortally wounded, Keane disabled by a shot in the neck; only Lambert remained. Thornton, across the river, had driven Morgan from his lines meantime, and silenced Patterson's battery; but this enterprise might have cost him dearly, had he not in season received orders from Lambert to return instantly. In this battle the British lost not less than 2,600, all but 500 of whom were killed or wounded; while only 8 were killed and 13 wounded on the American side. Having buried his dead presently under a flag of truce, Lambert, whom this calamity had placed in command, retreated hastily under cover of the night, abandoning the expedition. Re-embarking at Lake Borgne, and rejoining the fleet, he next proceeded to invest Fort Bowyer, at the entrance of Mobile Bay, only to learn, after its little garrison had surrendered, that a treaty of peace [signed December 24, 1814, two weeks before the battle of New Orleans was fought] annulled the conquest. . . . Rude and illiterate as he was, Jackson showed at New Orleans the five prime attributes of military genius: decision, energy, forethought, dispatch, skill in employing resources."—J. Schouler, *Hist. of the U. S. of Am., ch.* 9, *sect.* 1 (*v.* 2).

A. D. 1816.—Eighth Presidential Election.—James Monroe, Democratic Republican, was elected over Rufus King, Federalist, receiving 183 out of 217 votes cast in the electoral college. Daniel D. Tompkins was chosen Vice President. "Opposition to the War of 1812 proved fatal to the Federal party, which ceased to exist as a national party with the close of Mr. Madison's administration. Not only did the odium of opposing the war tend to annihilate that party, but the questions upon which the two parties differed were, in a great measure, settled or disposed of by the war; others, relating to the general interests of the country, such as a tariff, internal improvements, the chartering of a national bank, erecting fortifications, etc., taking their place, and finding advocates and opponents in both the old parties. Candidates for President and Vice-President were then selected by

the respective parties by what was termed a Congressional caucus. Mr. Monroe was placed in nomination for President by a caucus of the Republican members of Congress, Daniel D. Tompkins, of New York, being nominated by the same caucus for Vice-President. Mr. Crawford, of Georgia, was Mr. Monroe's competitor, and fell but few votes behind him in the caucus. Rufus King was the candidate of the Federal party, or what there was left of it, against Mr. Monroe. The latter received 183 electoral votes, the former 34. No President ever encountered less opposition during his four or eight years' service than Mr. Monroe. Parties and the country seemed to be tired of contention, and desirous to enjoy repose. A most able cabinet was selected, consisting of Mr. J. Q. Adams as Secretary of State; William H. Crawford, Secretary of the Treasury; John C. Calhoun, Secretary of War; Smith Thompson, Secretary of the Navy; and William Wirt, Attorney-General."— N. Sargent, *Public Men and Events*, 1817–1853, *v.* 1, *ch.* 1.—"Remembering only the almost unopposed election and second election of Mr. Monroe, we are apt to think of him as the natural and easy choice of the people. As a matter of fact he was not a great favorite with Republican politicians. He was first nominated by a narrow majority. . . . Numerous meetings were held in various parts of the country to protest against the caucus system, the most noteworthy of which, perhaps, was held in Baltimore, in which meeting Roger B. Taney, afterward Chief Justice, took a most prominent part. The nomination being made, the presidential election was practically decided. There was no canvass, worthy of the name."—E. Stanwood, *Hist. of Presidential Elections, ch.* 9.

A. D. 1816-1817.—The opening of the question of "Internal Improvements."—"The passage of the bank bill in 1816 was to give the United States a million and a half of dollars. Calhoun, therefore, came forward, Dec. 23, 1816, with a bill proposing that this sum be employed as a fund 'for constructing roads and canals and improving the navigation of watercourses.' 'We are,' said he, 'a rapidly — I was about to say a fearfully — growing country. . . . This is our pride and danger, our weakness and our strength.' The constitutional question he settled with a phrase: 'If we are restricted in the use of our money to the enumerated powers, on what principle can the purchase of Louisiana be justified?' The bill passed the House by 86 to 84; it was strongly supported by New York members, because it was expected that the general government would begin the construction of a canal from Albany to the Lakes; it had also large support in the South, especially in South Carolina. In the last hours of his administration Madison vetoed it. His message shows that he had selected this occasion to leave to the people a political testament; he was at last alarmed by the progress of his own party, and, like Jefferson, he insisted that internal improvements were desirable, but needed a constitutional amendment. The immediate effect of the veto was that New York, seeing no prospect of federal aid, at once herself began the construction of the Erie Canal, which was opened eight years later."—A. B. Hart, *Formation of the Union* (*Epochs of Am. Hist.*), *sect.* 121.—"Mr. Monroe came out, in his first message to Congress, coinciding, on this point, with Mr. Madison's veto. It is due to both of them, however, to say that they were the advocates of internal improvement, and recommended an amendment of the constitution with that view. Nevertheless, Mr. Madison, by his veto, had dashed the cup from the lips to the ground, as he went out of office; and Mr. Monroe coming in, at least for four years, probably for eight — it proved to be eight — broke the cup in advance, so that it could not be used during his term of office, without an amendment of the constitution. . . . Three presidents successively, Mr. Jefferson, Mr. Madison, and Mr. Monroe, had officially expressed their opinion adverse to a power vested in Congress by the constitution for projects of internal improvement, as contemplated by the measures proposed. Not satisfied with these decisions, Mr. Clay and his friends were instrumental in having a resolution brought forward, in the fifteenth Congress, declaring that Congress had power, under the constitution, to make appropriations for the construction of military roads, post-roads, and canals. . . . The resolution declaring the power to be vested in Congress by the constitution, to make appropriations for the construction of military roads, post-roads, and canals, was adopted by a vote of 90 to 75; and the principle involved has been practically applied by acts of Congress, from that time to the present."—C. Colton, *Life, Corr., and Speeches of Henry Clay*, *v.* 1, *ch.* 19.

A. D. 1818-1821.—The first bitter Conflict concerning Slavery.—The Missouri Compromise, on the admission of Missouri to the Union.—"On March 6, 1818, a petition was presented in the House of Representatives praying that Missouri be admitted as a state. A bill authorizing the people of Missouri to form a state government was taken up in the House on February 13, 1819, and Tallmadge of New York moved, as an amendment, that the further introduction of slavery should be prohibited, and that all children born within the said state should be free at the age of twenty-five years. Thus began the struggle on the slavery question in connection with the admission of Missouri, which lasted, intermittently, until March, 1821. No sooner had the debate on Tallmadge's proposition begun than it became clear that the philosophical anti-slavery sentiment of the revolutionary period [see Slavery, Negro: A. D. 1776–1808] had entirely ceased to have any influence upon current thought in the South. The abolition of the foreign slave-trade had not, as had been hoped, prepared the way for the abolition of slavery or weakened the slave interest in any sense. On the contrary, slavery had been immensely strengthened by an economic devel-

opment making it more profitable than it ever had been before. The invention of the cotton-gin by Eli Whitney, in 1793 [see above: A. D. 1793], had made the culture of cotton a very productive source of wealth. In 1800 the exportation of cotton from the United States was 19,000,000 pounds, valued at $5,700,000. In 1820 the value of the cotton export was nearly $20,000,000, almost all of it the product of slave labor. The value of slaves may be said to have at least trebled in twenty years. The breeding of slaves became a profitable industry. Under such circumstances the slave-holders arrived at the conclusion that slavery was by no means so wicked and hurtful an institution as their revolutionary fathers had thought it to be. . . . On the other hand, in the Northern States there was no such change of feeling. Slavery was still, in the nature of things, believed to be a wrong and a sore. . . . The amendment to the Missouri bill, providing for a restriction with regard to slavery, came therefore in a perfectly natural way from that Northern sentiment which remained still faithful to the traditions of the revolutionary period. And it was a great surprise to most Northern people that so natural a proposition should be so fiercely resisted on the part of the South. It was the sudden revelation of a change of feeling in the South which the North had not observed in its progress. 'The discussion of this Missouri question has betrayed the secret of their souls,' wrote John Quincy Adams. The slave-holders watched with apprehension the steady growth of the Free States in population, wealth, and power. In 1790 the population of the two sections had been nearly even. In 1820 there was a difference of over 600,000 in favor of the North in a total of less than ten millions. In 1790 the representation of the two sections in Congress had been about evenly balanced. In 1820 the census promised to give the North a preponderance of more than 30 votes in the House of Representatives. As the slave-holders had no longer the ultimate extinction, but now the perpetuation, of slavery in view, the question of sectional power became one of first importance to them, and with it the necessity of having more Slave States for the purpose of maintaining the political equilibrium at least in the Senate. A struggle for more Slave States was to them a struggle for life. This was the true significance of the Missouri question. The debate was the prototype of all the slavery debates which followed in the forty years to the breaking out of the civil war. . . . The dissolution of the Union, civil war, and streams of blood were freely threatened by Southern men, while some anti-slavery men declared themselves ready to accept all these calamities rather than the spread of slavery over the territories yet free from it. . . . On February 16, 1819, the House of Representatives adopted the amendment restricting slavery, and thus passed the Missouri bill. But the Senate, eleven days afterwards, struck out the anti-slavery provision and sent the bill back to the House. A bill was then passed organizing the Territory of Arkansas, an amendment moved by Taylor of New York prohibiting the further introduction of slavery there having been voted down. . . . Thus slavery was virtually fastened on Arkansas. But the Missouri bill failed in the fifteenth Congress. The popular excitement steadily increased. The sixteenth Congress met in December, 1819. In the Senate the admission of Missouri with slavery was coupled with the admission of Maine, on the balance-of-power principle that one free state and one slave state should always be admitted at the same time. An amendment was moved absolutely prohibiting slavery in Missouri, but it was voted down. Then Mr. Thomas, a Senator from Illinois, on January 18, 1820, proposed that no restriction as to slavery be imposed upon Missouri in framing a state constitution, but that in all the rest of the country ceded by France to the United States north of 36° 30′, this being the southern boundary line of Missouri, there should be neither slavery nor involuntary servitude. This was the essence of the famous Missouri Compromise, and, after long and acrimonious debates and several more votes in the House for restriction and in the Senate against it, this compromise was adopted. By it the slave power obtained the present tangible object it contended for; free labor won a contingent advantage in the future. . . . Clay has been widely credited with being the 'father' of the Missouri Compromise. As to the main features of the measure this credit he did not deserve. So far he had taken a prominent but not an originating part in the transaction." But, at the next session of Congress, when the Missouri question was unexpectedly reopened, and as threateningly as ever, Clay assumed a more important part in connection with the final settlement of it. "The bill passed at the last session had authorized the people of Missouri to make a state constitution without any restriction as to slavery. The formal admission of the state was now to follow. But the Constitution with which Missouri presented herself to Congress not only recognized slavery as existing there; it provided also that it should be the duty of the legislature to pass such laws as would be necessary to prevent free negroes or mulattoes from coming into or settling in the state." This provoked a new revolt on the part of the Northern opponents of slavery, and it was only through Clay's exertions as a pacificator that Missouri was conditionally admitted to the Union at length [March 3, 1820], the condition being that "the said state shall never pass any law preventing any description of persons from coming to or settling in the said state who now are, or hereafter may become, citizens of any of the states of this Union." The legislature of Missouri gave its assent, as required, to this "fundamental condition," and the "compromise" became complete. "The public mind turned at once to things of more hopeful interest, and the Union seemed safer than ever. The American people have since become painfully aware that this was a delusion."—C. Schurz, *Life of Henry Clay, ch.* 8 (*v.* 1).—"The immediate contest was not over the question of the prohibition of slavery in the Territories. The great struggle lasted for nearly three years, but the final proposition which closed the controversy and which prohibited slavery in almost all the then Federal territory was probably not debated more than three hours. It was accepted without discussion by the great bulk of the advocates of Missouri's free admission. Very few slavery extensionists questioned the right and power of Congress to prevent the spread of slavery to the Territories. That question, in the minds of those who opposed restriction in

Missouri, was incidental to the question of the right of Congress to impose conditions upon a State. Incidentally the question of slavery in the Territories came up in the case of Arkansas, a country south of Missouri, in which slavery was already a fact. The restrictionists themselves recognized the fact that the plain, simple issue of limiting the area of human slavery would be strengthened by bringing it before the country unincumbered with the question of imposing conditions on a State, though most of them never wavered in their belief that conditions might be imposed. On the one hand it was only Southern zealots who denied to Congress the power to prohibit slavery in the Territories; on the other hand many in the North who opposed slavery believed that Congress might not impose conditions upon a State. In the cabinet of Monroe, in which sat Wirt, Crawford, and Calhoun, it was unanimously agreed that Congress had power to prohibit slavery in the Territories. But John Quincy Adams, also a member of that cabinet, who hated slavery with all the strength of his soul, thought it was unconstitutional to bind a State by conditions. . . . The struggle indicated a notable change in the southern mind on the slavery question, and that a slave power was forming which would attempt to control all legislation of the federal Union affecting slavery. . . . The struggle and the compromise afford the first clear demarcation between the sections. From this time the equilibrium of political power was a matter of first concern to a section of States and to a powerful political interest. Mason and Dixon's line is extended toward the west, and now marks a political division. The slave States were now, and for the first time, clearly separated from the free. A geographical line dividing the sections was established."—J. A. Woodburn, *Historical Significance of the Missouri Compromise* (*Report of Am. Hist. Ass'n*, 1893), *pp.* 289–294.

A. D. 1820.—Ninth Presidential Election.—"Monroe like Washington was re-chosen President by a vote practically unanimous. One, however, of the 232 electoral votes cast was wanting to consummate this exceptional honor; for a New Hampshire elector, with a boldness of discretion which, in our days and especially upon a close canvass, would have condemned him to infamy, threw away upon John Quincy Adams the vote which belonged like those of his colleagues to Monroe, determined, so it is said, that no later mortal should stand in Washington's shoes. Of America s Presidents elected by virtual acclamation history furnishes but these two examples; and as between the men honored by so unapproachable a tribute of confidence, Monroe entered upon his second term of office with less of real political opposition than Washington."—J. Schouler, *Hist. of the U. S.*, *ch.* 10, *sect.* 2 (*v.* 3).—Daniel D. Tompkins was re-elected Vice President.

A. D. 1820. — The Fourth Census. — Total population, 9,638,191 (an increase exceeding 33 per cent. over the enumeration of 1810), classed and distributed as follows:

A. D. 1821.—Beginning of emigration to Texas. See Texas: A. D. 1819–1835.

A. D. 1821-1824.—The Era of Good Feeling.—With the closing of the war of 1812–14, and the disappearance of the party of the Federalists, there came a period of remarkable quietude in the political world. "Then followed the second administration of Monroe, to which was given, perhaps by the President himself, a name which has secured for the whole period a kind of peaceful eminence. It was probably fixed and made permanent by two lines in Halleck's once famous poem of 'Alnwick Castle,' evidently written during the poet's residence in England in 1822–23. Speaking of the change from the feudal to the commercial spirit, he says: "'Tis what our President, Monroe, Has called "the era of good feeling." '. . . It would seem from this verse that Monroe himself was credited with the authorship of the phrase; but I have been unable to find it in his published speeches or messages, and it is possible that it may be of newspaper origin, and that Halleck, writing in England, may have fathered it on the President himself."—T. W. Higginson, *Larger Hist. of the U. S.*, *p.* 394.

A. D. 1823.—The enunciation of the Monroe Doctrine.—One lasting mark of distinction was

given to the administration of President Monroe by the importance which came to be attached to his enunciation of the principle of policy since known as the "Monroe Doctrine." This was simply a formal and official statement of the national demand that foreign nations shall not interfere with the affairs of the two American continents. "There has been a good deal of dispute as to the real authorship of this announcement, Charles Francis Adams claiming it for his father, and Charles Sumner for the English statesman Canning. Mr. Gilman, however, in his late memoir of President Monroe, has shown with exhaustive research that this doctrine had grown up gradually into a national tradition before Monroe's time, and that he merely formulated it, and made it a matter of distinct record. The whole statement is contained in a few detached passages of his message of December 2, 1823. In this he announces that 'the American continents, by the free and independent condition which they have assumed and maintain, are not to be considered as subjects for colonization by European powers.' Further on he points out that the people of the United States have kept aloof from European dissensions, and ask only in return that North and South America should be equally let alone. 'We should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety;' and while no objection is made to any existing colony or dependency of theirs, yet any further intrusion or interference would be regarded as 'the manifestation of an unfriendly spirit towards the United States.' This in brief, is the 'Monroe doctrine' as originally stated; and it will always remain a singular fact that this President — the least original or commanding of those who early held that office — should yet be the only one whose name is identified with what amounts to a wholly new axiom of international law."—T. W. Higginson, *Larger Hist. of the U. S., ch.* 16.—"At a cabinet meeting May 13, 1818, President Monroe propounded several questions on the subject of foreign affairs, of which the fifth, as recorded by J. Q. Adams, was this: 'Whether the ministers of the United States in Europe shall be instructed that the United States will not join in any project of interposition between Spain and the South Americans, which should not be to promote the complete independence of those provinces; and whether measures shall be taken to ascertain if this be the policy of the British government, and if so to establish a concert with them for the support of this policy.' He adds that all these points were discussed, without much difference of opinion. On July 31, 1818, Rush had an important interview with Castelreagh in respect to a proposed mediation of Great Britain between Spain and her colonies. The coöperation of the United States was desired. Mr. Rush informed the British minister that 'the United States would decline taking part, if they took part at all, in any plan of pacification, except on the basis of the independence of the colonies.' 'This,' he added, 'was the determination to which his government had come on much deliberation.'. . . Gallatin writes to J. Q. Adams, June 24, 1823, that before leaving Paris he had said to M. Chateaubriand on May 13, 'The United States would undoubtedly preserve their neutrality provided it were respected, and avoid every interference with the politics of Europe. . . . On the other hand, they would not suffer others to interfere against the emancipation of America.'. . . After Canning had proposed to Rush (September 19, 1823) that the United States should coöperate with England in preventing European interference with the Spanish-American colonies, Monroe consulted Jefferson as well as the cabinet, on the course which it was advisable to take, and with their approbation prepared his message. . . . Enough has been quoted to show that Mr. Sumner is not justified in saying that the 'Monroe doctrine proceeded from Canning,' and that he was 'its inventor, promoter, and champion, at least so far as it bears against European intervention in American affairs.' Nevertheless, Canning is entitled to high praise for the part which he took in the recognition of the Spanish republics, a part which almost justified his proud utterance, 'I called the New World into existence to redress the balance of the Old.'"—D. C. Gilman, *James Monroe, ch.* 7.

A. D. 1824.— The Protective Tariff. See Tariff Legislation (United States): A. D. 1816-1824.

A. D. 1824.— Tenth Presidential Election. — No choice by the People.—Election of John Quincy Adams by the House of Representatives.—"In 1823, as the Presidential election approached, the influences to control and secure the interests predominating in the different sections of the country became more active. Crawford of Georgia, Calhoun of South Carolina, Adams of Massachusetts, and Clay of Kentucky, were the most prominent candidates. In December, Barbour of Virginia was superseded, as Speaker of the House of Representatives, by Clay of Kentucky; an event ominous to the hopes of Crawford, and to that resistance to the tariff and to internal improvements which was regarded as dependent on his success. The question whether a Congressional caucus, by the instrumentality of which Jefferson, Madison, and Monroe had obtained the Presidency, should be again held to nominate a candidate for that office, was the next cause of political excitement. The Southern party, whose hopes rested on the success of Crawford, were clamorous for a caucus. The friends of the other candidates were either lukewarm or hostile to that expedient. Pennsylvania, whose general policy favored a protective tariff and public improvements, hesitated. . . . But the Democracy of that state . . . held meetings at Philadelphia, and elsewhere, recommending a Congressional caucus. This motion would have been probably adopted, had not the Legislature of Alabama, about this time, nominated Andrew Jackson for the Presidency, and accompanied their resolutions in his favor with a recommendation to their representatives to use their best exertions to prevent a Congressional nomination of a President. The popularity of Jackson, and the obvious importance to his success of the policy recommended by Alabama, fixed the wavering counsels of Pennsylvania, so that only three representatives from that state attended the Congressional caucus, which was soon after called, and which consisted of only 60 members, out of

261, the whole number of the House of Representatives; of which Virginia and New York, under the lead of Mr. Van Buren, constituted nearly one half. Notwithstanding this meagre assemblage, Mr. Crawford was nominated for the Presidency. . . . But the days of Congressional caucuses were now numbered. The people took the nomination of President into their own hands [and John Quincy Adams and Henry Clay were brought into the field]. . . . The result of this electioneering conflict was that, by the returns of the electoral colleges of the several states, it appeared that none of the candidates had the requisite constitutional majority; the whole number of votes being 261 — of which Andrew Jackson had 99, John Quincy Adams 84, William H. Crawford 41, and Henry Clay 37. [The popular vote cast as nearly as can be determined, was: Jackson, 153,544; Adams, 108,740; Crawford, 46,618; Clay, 47,136.] For the office of Vice-President, John C. Calhoun had 180 votes, and was elected. . . . Of the 84 votes cast for Mr. Adams, not one was given by either of the three great Southern slaveholding states. Seventy-seven were given to him by New England and New York. The other seven were cast by the Middle or recently admitted states. The selection of President from the candidates now devolved on the House of Representatives, under the provisions of the constitution. But, again, Mr. Adams had the support of none of those slaveholding states, with the exception of Kentucky, and her delegates were equally divided between him and General Jackson. The decisive vote was, in effect, in the hands of Mr. Clay, then Speaker of the House, who cast it for Mr. Adams; a responsibility he did not hesitate to assume, notwithstanding the equal division of the Kentucky delegation, and in defiance of a resolution passed by the Legislature of that state, declaring their preference for General Jackson. On the final vote Andrew Jackson had 7 votes, William H. Crawford 4, and John Quincy Adams 13; who was, therefore, forthwith declared President of the United States for four years ensuing the 4th of March, 1825. . . . Immediately after his inauguration, Mr. Adams appointed Henry Clay, of Kentucky, Secretary of State. . . . General Jackson was deeply mortified and irritated by Mr. Clay's preference of Mr. Adams. . . . He immediately put into circulation among his friends and partisans an unqualified statement to the effect that Mr. Adams had obtained the Presidency by means of a corrupt bargain with Henry Clay, on the condition that he should be elevated to the office of Secretary of State. To this calumny Jackson gave his name and authority, asserting that he possessed evidence of its truth; and, although Mr. Clay and his friends publicly denied the charge, and challenged proof of it, two years elapsed before they could compel him to produce his evidence. This, when adduced, proved utterly groundless, and the charge false; the whole being but the creation of an irritated and disappointed mind. Though detected and exposed, the calumny had the effect for which it was calculated. Jackson's numerous partisans and friends made it the source of an uninterrupted stream of abuse upon Mr. Adams, through his whole administration."— J. Quincy, *Memoir of the Life of John Quincy Adams, ch.* 6–7.—The new administration "stood upon the same political basis as that of Mr. Monroe. It was but a continuance of the same party ascendency. It looked to no change of measures, and to no other change of men than became inevitably necessary to supply the vacancies which the accidents of political life had created. Mr. Clay was called to the State Department [and was maliciously accused of having bargained for it when he threw his influence at last in Mr. Adams' favor]. . . . The country . . . indulged the hope of a prosperous career in the track which had been opened by Mr. Madison, and so successfully pursued by Mr. Monroe. Less confidently, however, it indulged the hope of a continuance of that immunity from party contention and exasperation which had characterized the last eight years. The rising of an opposition was seen, at the very commencement of this administration, like a dark cloud upon the horizon, which gradually spread towards the zenith, not without much rumbling of distant thunder and angry flashes of fire. It was quite obvious to shrewd observers that the late election had disappointed many eager spirits, whose discontent was likely to make head against the predominant party, and, by uniting the scattered fragments of an opposition which had heretofore only slept, whilst the country had supposed it extinct, would present a very formidable antagonist to the new administration. The extraordinary popularity of General Jackson, the defeat of his friends by the vote of the House of Representatives, the neutrality of his political position, his avowed toleration towards political opponents, and what was thought to be his liberal views in regard to prominent political measures — for as yet nothing was developed in his opinions to set him in direct opposition to the policy or principles which governed the administration either of Madison or Monroe — all these considerations gave great strength to the position which he now occupied, and, in the same degree, emboldened the hopes of those who looked to him as the proper person to dispute the next election against the present incumbent. Many of those who had hoped to see the reign of good feeling and of abstinence from party strife prolonged, will remember with what surprise they saw this gathering of hostile elements, and heard it proclaimed by an authoritative political leader [Colonel Richard M. Johnson], in the first days of the new administration, that it should be and ought to be opposed, 'even if it were as pure as the angels at the right hand of the throne of God.' Such a declaration was not less ominous of what was to come than it was startling for its boldness and its novelty in the history of the government. . . . The opposition . . . took an organized form — became compact, eager, intolerant and even vindictive."— J. P. Kennedy, *Memoirs of the Life of William Wirt, v.* 2, *ch.* 10.—"Monroe was the last President of the Virginian line, John Quincy Adams the last from New England. The centre of power was passing from the east to the west. Adams was a genuine New Englander of the Puritan stock, austerely moral, from his boyhood laboriously self-trained, not only staid but solemn in his teens, intensely self-conscious, ever engaged in self-examination, the punctual keeper of a voluminous diary, an invariably early riser, a daily reader of the Bible even in the White House, scrupulously methodical and strictly upright in all his ways; but testy, unconciliatory, unsympathetic, absolutely destitute of all the

arts by which popularity is won. His election does the highest credit to the respect of the electors for public virtue unadorned. The peculiar features of his father's character were so intensified in him that he may be deemed the typical figure rather than his father. In opinions he was a Federalist who having broken with his party on the question of foreign relations and the embargo had been put out of its pale but had retained its general mould. As he was about the last President chosen for merit not for availability, so he was about the last whose only rule was not party but the public service. So strictly did he observe the principle of permanency and purity in the Civil Service, that he refused to dismiss from office a Postmaster-General whom he knew to be intriguing against him. The demagogic era had come but he would not recognize its coming. He absolutely refused to go on the stump, to conciliate the press, to do anything for the purpose of courting popularity and making himself a party. His obstinacy was fatal to his ambition but is not dishonourable to his memory."—Goldwin Smith, *The United States, ch.* 4.

A. D. 1824-1825.—The visit of Lafayette.—One of the most deeply interesting events of the year 1824 was the arrival in the country of the honored Lafayette, companion of Washington and friend of the American Republic in its struggle for independence. He came on the invitation of the national Government and was entertained as its guest. "He arrived at Staten Island on Sunday, 15th of August, 1824, accompanied by his son, George Washington Lafayette, and his son-in-law, M. Le Vasseur. Here he remained until Monday, and was then met and welcomed by a distinguished committee from New York, who escorted him to that city. . . . The arrival of Lafayette was an event which stirred the whole country; everybody was anxious to see him, and every State and city in the Union extended an invitation to him to visit such State or city; and he did so, being everywhere received with the most enthusiastic manifestations of love and respect. . . . He spent a little over a year in the United States, traveling most of the time. . . . Having visited every portion of the United States and received the affectionate homage of the people, General Lafayette returned to Washington, where he became in fact 'the Nation's Guest' at the Presidential mansion. Soon after the meeting of Congress, in December, 1824, a bill was reported by a joint committee of the two Houses granting to him a township of land and the sum of $200,000, which became a law."—N. Sargent, *Public Men and Events*, 1817–1853, *v.* 1, *pp.* 89–91.

Also in: A. Levasseur, *Lafayette in America, in* 1824–1825.—B. Tuckerman, *Life of General Lafayette, v.* 2, *ch.* 7.

A. D. 1824-1836.—Schemes of the Slave Power for acquiring Texas. See Texas: A. D. 1824–1836.

A. D. 1825-1828.—Opposition to the Administration.—The question of Internal Improvements.—Reconstruction of Parties.—Democrats and National Republicans.—The inaugural address of President Adams "furnished a topic" against him, and "went to the reconstruction of parties on the old line of strict, or latitudinous, construction of the constitution. It was the topic of internal national improvement by the federal government. The address extolled the value of such works, considered the constitutional objections as yielding to the force of argument, expressed the hope that every speculative (constitutional) scruple would be solved in a practical blessing; and declared the belief that, in the execution of such works, posterity would derive a fervent gratitude to the founders of our Union and most deeply feel and acknowledge the beneficent action of our government. The declaration of principles which would give so much power to the government . . . alarmed the old republicans, and gave a new ground of opposition to Mr. Adams's administration, in addition to the strong one growing out of the election in the House of Representatives. . . . This new ground of opposition was greatly strengthened at the delivery of the first annual message, in which the topic of internal improvement was again largely enforced, other subjects recommended which would require a liberal use of constructive powers, and Congress informed that the President had accepted an invitation from the American States of Spanish origin, to send ministers to their proposed Congress on the Isthmus of Panama [see Colombian States: A. D. 1826]. It was, therefore, clear from the beginning that the new administration was to have a settled and strong opposition. . . . There was opposition in the Senate to the confirmation of Mr. Clay's nomination to the State department, growing out of his support of Mr. Adams in the election of the House of Representatives, and acceptance of office from him; but overruled by a majority of two to one."—T. H. Benton, *Thirty Years' View, v.* 1, *ch.* 21.—"From the very beginning of this Administration both factions of the Strict Constructionists united in an opposition to the President which became stronger through his whole term of office, until it overcame him. His ill-advised nomination of Clay to a post in his Cabinet gave color to the charge of a corrupt bargain between him and Clay, by which Adams was to receive the Clay vote in the House, and Clay was to be rewarded by the position of Secretary of State, which was then usually considered a stepping stone to the Presidency. Clay angrily denied any such bargain, and the renewal of charges and denials, each with its appropriate arguments, gave abundant material for debate. The Clay and Adams factions soon united and took the distinctive party name of National Republicans. Some years afterward this name was changed to that of Whigs. They maintained the loose constructionist principles of the Federalists, and, in addition, desired a Protective Tariff and a system of public improvements at national expense. . . . In October, 1825, the Tennessee Legislature nominated Jackson for the Presidency in 1828, and Jackson accepted the nomination. Crawford's continued ill-health compelled his adherents to look elsewhere for a candidate, and they gradually united upon Jackson. At first the resulting coalition was known as 'Jackson Men,' but, as they began to take the character of a national party, they assumed the name of Democrats, by which they have since been known. They maintained the strict constructionist principles of the Republican party, though the Crawford faction in the South went further, and held the extreme

ground of the Kentucky Resolutions of 1799."—A. Johnston, *Hist. of Am. Politics, ch.* 11.

A. D. 1826.—Death of Adams and Jefferson.—By an impressive coincidence John Adams and Thomas Jefferson died on the 4th of July, 1826, — the 50th Anniversary of Independence.

A. D. 1828.—The Tariff "Bill of Abominations." See TARIFF LEGISLATION (UNITED STATES: A. D. 1828).

A. D. 1828.—Eleventh Presidential Election.— Triumph of Jackson and the new Democracy.—Andrew Jackson was again put in nomination for the Presidency, while President Adams was supported for re-election by the National Republicans. "The campaign was conducted, on both sides, on very ruthless methods. Niles said it was worse than the campaign of 1798. Campaign extras of the 'Telegraph' were issued weekly, containing partisan material, refutations of charges against Jackson, and slanders on Adams and Clay. The Adams party also published a monthly of a similar character. The country was deluged with pamphlets on both sides. These pamphlets were very poor stuff, and contain nothing important on any of the issues. They all appeal to low tastes and motives, prejudices and jealousies. . . . In September, 1827, the Tammany General Committee and the Albany 'Argus' came out for Jackson, as it had been determined, in the programme, that they should do. A law was passed for casting the vote of New York in 1828 by districts. The days of voting throughout the country ranged from October 31st to November 19th. The votes were cast by the Legislature in Delaware and South Carolina; by districts in Maine, New York, Maryland, Tennessee; elsewhere, by general ticket. Jackson got 178 votes to 83 for Adams. The popular vote was 648,273 for Jackson; 508,064 for Adams. Jackson got only one vote in New England. . . . For Vice-President, Richard Rush got all the Adams votes; Calhoun [who was elected] got all the Jackson votes except 7 of Georgia, which were given to William Smith, of South Carolina. General Jackson was therefore triumphantly elected President of the United States, in the name of reform, and as the standard-bearer of the people, rising in their might to overthrow an extravagant, corrupt, aristocratic, federalist administration, which had encroached on the liberties of the people, and had aimed to corrupt elections by an abuse of federal patronage. Many people believed this picture of Adams's administration to be true. Andrew Jackson no doubt believed it. Many people believe it yet. Perhaps no administration, except that of the elder Adams, is under such odium. There is not, however, in our history any administration which, upon a severe and impartial scrutiny, appears more worthy of respectful and honorable memory. Its chief fault was that it was too good for the wicked world in which it found itself. In 1836 Adams said, in the House, that he had never removed one person from office for political causes, and that he thought that was one of the principal reasons why he was not reëlected."—W. G. Sumner, *Andrew Jackson as a Public Man, ch.* 5.—"In this election there was a circumstance to be known and remembered. Mr. Adams and Mr. Rush were both from the non-slaveholding, General Jackson and Mr. Calhoun from the slaveholding States, and both large slave owners themselves, and both received a large vote (73 each) in the free States — and of which at least 40 were indispensable to their election. There was no jealousy, or hostile or aggressive spirit in the North at that time against the South!"—T. H. Benton, *Thirty Years' View, v.* 1, *ch.* 38.

A. D. 1828-1833.—The Nullification doctrine and ordinance of South Carolina.—The Hayne and Webster debate.—President Jackson's proclamation.—The Compromise Tariff.—"In May, 1828, a meeting of the South Carolina delegation in Congress was held in Washington, at the rooms of General Hayne, one of the Senators of that State, to concert measures against the tariff and the protective policy which it embodied. From the history of the times, and the disclosures subsequently made, it is apparent that some violent things were said at this meeting, but it broke up without any definite plan. In the course of the following summer, there were many popular meetings in South Carolina, largely attended, at which the tariff of 1824 was treated as an act of despotism and usurpation, which ought to be openly resisted. . . . They occasioned anxiety and regret among the friends of the Union throughout the country, though nothing more. But, in the autumn, the Legislature of South Carolina adopted an 'Exposition and Protest,' which gave form and substance to the doctrines which thenceforward became known as 'Nullification.' In order to understand them, however, as a theory of the Federal Constitution, it is necessary to state the theory to which they are opposed, and to overthrow which they were brought forward. The Government of the United States, under the Constitution, had hitherto been administered upon the principle that the extent of its powers is to be finally determined by its supreme judicial tribunal, not only when there is any conflict of authority between its several departments, but also when the authority of the whole Government is denied by one or more of the States. . . . Aside from the authority of [the Virginia and Kentucky resolutions of 1798]—an authority that was doubtful, because their interpretation was not clear — there had been no important assertion of the principle that a State can determine for its citizens whether they are to obey an act of Congress, by asserting its unconstitutional character, and that the right to do this is implied as a right inherent in a State, under the Constitution, and results from the nature of the Government. This, however, was what the advocates of nullification now undertook to establish. The remedy which they sought, against acts which they regarded as usurpations, was not revolution, and not the breaking up the Union, as they claimed; but it was a remedy which they held to exist within the Union, and to have been contemplated by the people of the States when they established the Constitution. How far they considered such a theory compatible with the continued existence of the Union, I am not aware that they undertook to explain. . . . Although the Legislature of South Carolina had thus propounded a theory of resistance, and held that there was then a case in the tariff which would justify a resort to it, no steps were yet taken toward the immediate exercise of the asserted power." In the great debate between General Hayne of South Carolina and Daniel Webster,

which occurred in the Senate, in January, 1830, the doctrine of nullification received for the first time a discussion which sank deep into the mind of the nation. The original subject-matter of the debate was a resolution relating to Western land-sales; but Hayne in his first speech made an attack on New England which drew out Webster in vindication, and then, when the South Carolinian replied, he boldly and broadly set forth the nullifying theory which his State had accepted from the sophistical brain of John C. Calhoun. It received its refutation then and there, in Webster's final speech. "The effect of this speech upon the country, that immediately followed its delivery, it is not easy for us at the present day to measure. . . . Vast numbers of Mr. Webster's speech were . . . published and circulated in pamphlet editions, after all the principal newspapers of the country had given it entire to their readers. The popular verdict, throughout the Northern and Western and many of the Southern States was decisive. A great majority of the people of the United States, of all parties, understood, appreciated, and accepted the view maintained by Mr. Webster of the nature of the Constitution, and the character of the government which it establishes."—G. T. Curtis, *Life of Daniel Webster, ch.* 16 (*v.* 1).—If Webster's speech had solidified the majority opinion of the country in resistance to nullification, it had not paralyzed the nullifying movement. In the summer of 1831, and again in August, 1832, Calhoun published addresses to the people of South Carolina, elaborating his doctrine, and "urging an immediate issue on account of the oppressive tariff legislation under which the South was then suffering. The Legislature of South Carolina was convened by the governor to meet on October 22, for the purpose of calling a convention 'to consider the character and extent of the usurpations of the general government.' The convention met on November 19, and adopted without delay an 'ordinance' declaring that the tariff act of 1828, and the amendments thereto passed in 1832, were null and void; that it should be held unlawful to enforce the payment of duties thereunder within the State of South Carolina; that it should be the duty of the legislature to make laws giving effect to the ordinance; . . . and that, if the general government should attempt to use force to maintain the authority of the federal law, the State of South Carolina would secede from the Union,—the ordinance to go into full effect on February 1, 1833. The legislature, which met again on November 19, passed the 'appropriate' laws. But these enactments were not very fierce; as Webster said, they 'limped far behind the ordinance.' Some preparation, although little, was made for a conflict of arms;" nor was there any certain show of readiness in other Southern States to stand by South Carolina in the position she had taken. "President Jackson's annual message, which went to Congress on December 4, 1832, was remarkably quiet in tone," and neither alarmed the nullifiers nor gave confidence to the friends of the Union; but "six days later, on December 10, came out Jackson's famous proclamation against the nullifiers, which spoke thus: 'The Constitution of the United States forms a government, not a league. . . . Our Constitution does not contain the absurdity of giving power to make laws, and another power to resist them. To say that any state may at pleasure secede from the Union is to say that the United States are not a nation.' He appealed to the people of South Carolina, in the tone of a father, to desist from their ruinous enterprise; but he gave them also clearly to understand that, if they resisted by force, the whole power of the Union would be exerted to maintain its authority. All over the North, even where Jackson had been least popular, the proclamation was hailed with unbounded enthusiasm. . . . The nullifiers in South Carolina received the presidential manifesto apparently with defiance. The governor of the state issued a counter-proclamation. Calhoun resigned the vice-presidency, and was immediately sent to the Senate to fight the battle for nullification there." The president, now thoroughly roused, called on Congress for extraordinary powers to meet the emergency, and a bill embodying his wishes—called the "Force Bill"—was introduced. But, at the same time, while they showed this bold front to the nullifiers, Congress and the executive began to prepare a retreat from the ground they had held on the tariff. Henry Clay took the field again, in the exercise of his peculiar talents for compromise, and the result was the nearly simultaneous passage (February 26 and 27, 1833) through Congress of the "Force bill" and of a compromise tariff bill, which latter provided for a graduated reduction of the duties year by year, until 1842, when they should stand at 20 per cent., as a horizontal rate, with a large free-list. "The first object of the measure was attained: South Carolina repealed her nullification ordinance. . . . But before long it became clear that, beyond the repeal of the nullification ordinance, the compromise had settled nothing. The nullifiers strenuously denied that they had in any sense given up their peculiar doctrine."—C. Schurz, *Life of Henry Clay, ch.* 14 (*v.* 2).—"The theory of nullification, as set forth by Calhoun, even now, after it has received the benefit of careful study and able expounding by historians, is not clear. He always avowed a loyalty to the Union, but the arguments by which he sought to demonstrate that nullification was compatible with the existence of the Union, and indeed a guarantee of its perpetuity, did not occasion much solicitude to the majority of his party. But no one at the North understood the fallacy of his reasoning or the real end and aim of his party more clearly than did the Union men of his state. They reasoned simply. Said the Camden, S. C. 'Gazette': 'We know of only two ways, under our government, to get rid of obnoxious legislation. We must convince a majority of the nation that a given enactment is wrong and have it repealed in the form prescribed by the constitution, or resist it extra-constitutionally by the sword. . . . But this everlasting cant of devotion to the Union, accompanied by a recommendation to do those acts that must necessarily destroy it, is beyond patient endurance from a people not absolutely confined in their own mad-houses.'. . . A fact . . . that historians have failed to lay any stress upon, and that nevertheless deserves some notice, is the holding of a state convention of the Union party of South Carolina immediately after the nullification convention had completed its work. It was the last important action of that party in the state. Randell Hunt, who

presented the first resolutions, epitomized the views of the convention and the question it should consider in three sentences: 'That the Union party acknowledges no allegiance to any government except that of the United States. That in referring this resolution to the general committee they be instructed to inquire whether it is not expedient to give a military organization to the Union party throughout the state. Whether it will not be necessary to call in the assistance of the general government for maintaining the laws of the United States against the arbitrary violence which is threatened by the late convention.' The resolutions which were adopted declared that the ordinance of nullification violated the constitution of the United States and had virtually destroyed the Union, since by preventing the general government from enforcing its laws within the boundaries of the state, it made the state a sovereignty paramount to the United States. They denounced the provisions of the ordinance as tyrannical and oppressive, and the test oath as especially incompatible with civil liberty, in that it disfranchised nearly half the citizens of the state. They pointed scornfully to the project of a standing army in the state. . . . They concluded by declaring the continued opposition of the signers to the tariff, and their determination to protect themselves against intolerable oppression. The resolutions were signed by all the members of the convention, about 180 in number. In point of fact, the Unionists were not disposed to favor any compromise measures, and looked rather with disfavor upon Mr. Clay's bill, as a measure which was being forced upon the country. Congress, they thought, ought not to modify the tariff until the nullification ordinance had been repealed. But the greater force was with the nullifiers, and the number of their opponents was dwindling. Caught by the enthusiasm and fighting spirit of their neighbors, some of the Unionists joined the nullification military companies that were being organized, and others, seeing the hopelessness of the struggle against a superior force, in sorrow and disgust shook the dust of South Carolina from their feet, preferring to begin life over again in other parts of the South, less charged with sentiments that they believed to be treasonable. . . . The Unionist party, crushed and helpless, was only too anxious to bury all feuds. It never was an active force in the state again, but the bold spirit which had actuated its members was manifested later, when the struggle for state sovereignty was more widespread; and some of the most intrepid Union men of the South in the civil war were those who had fled from South Carolina years before, when the nullification party had triumphed."—G. Hunt, *South Carolina during the Nullification Struggle* (*Pol. Sci. Quarterly, June*, 1891).

Elliott, *The Tariff Controversy in the U. S., ch.* 5.

The following is the text of the "Ordinance to nullify certain acts of the Congress of the United States, purporting to be laws laying duties and imposts on the importation of foreign commodities," adopted by the State Convention of South Carolina on the 24th of November, 1832:

"Whereas the Congress of the United States by various acts, purporting to be acts laying duties and imposts on foreign imports, but in reality intended for the protection of domestic manufactures, and the giving of bounties to classes and individuals engaged in particular employments, at the expense and to the injury and oppression of other classes and individuals, and by wholly exempting from taxation certain foreign commodities, such as are not produced or manufactured in the United States, to afford a pretext for imposing higher and excessive duties on articles similar to those intended to be protected, hath exceeded its just powers under the constitution, which confers on it no authority to afford such protection, and hath violated the true meaning and intent of the constitution, which provides for equality in imposing the burdens of taxation upon the several States and portions of the confederacy: And whereas the said Congress, exceeding its just power to impose taxes and collect revenue for the purpose of effecting and accomplishing the specific objects and purposes which the constitution of the United States authorizes it to effect and accomplish, hath raised and collected unnecessary revenue for objects unauthorized by the constitution. We, therefore, the people of the State of South Carolina, in convention assembled, do declare and ordain, and it is hereby declared and ordained, that the several acts and parts of acts of the Congress of the United States, purporting to be laws for the imposing of duties and imposts on the importation of foreign commodities, and now having actual operation and effect within the United States, and, more especially, an act entitled 'An act in alteration of the several acts imposing duties on imports,' approved on the nineteenth day of May, one thousand eight hundred and twenty-eight, and also an act entitled 'An act to alter and amend the several acts imposing duties on imports,' approved on the fourteenth day of July, one thousand eight hundred and thirty-two, are unauthorized by the constitution of the United States, and violate the true meaning and intent thereof and are null, void, and no law, nor binding upon this State, its officers or citizens; and all promises, contracts, and obligations, made or entered into, or to be made or entered into, with purpose to secure the duties imposed by said acts, and all judicial proceedings which shall be hereafter had in affirmance thereof, are and shall be held utterly null and void. And it is further ordained, that it shall not be lawful for any of the constituted authorities, whether of this State or of the United States, to enforce the payment of duties imposed by the said acts within the limits of this State; but it shall be the duty of the legislature to adopt such measures and pass such acts as may be necessary to give full effect to this ordinance, and to prevent the enforcement and arrest the operation of the said acts and parts of acts of the Congress of the United States within the limits of this State, from and after the 1st day of February next, and the duty of all other constituted authorities, and of all persons residing or being within the limits of this State, and they are hereby required and enjoined to obey and give effect to this ordinance,

and such acts and measures of the legislature as may be passed or adopted in obedience thereto. And it is further ordained, that in no case of law or equity, decided in the courts of this State, wherein shall be drawn in question the authority of this ordinance, or the validity of such act or acts of the legislature as may be passed for the purpose of giving effect thereto, or the validity of the aforesaid acts of Congress, imposing duties, shall any appeal be taken or allowed to the Supreme Court of the United States, nor shall any copy of the record be permitted or allowed for that purpose; and if any such appeal shall be attempted to be taken, the courts of this State shall proceed to execute and enforce their judgments according to the laws and usages of the State, without reference to such attempted appeal, and the person or persons attempting to take such appeal may be dealt with as for a contempt of the court. And it is further ordained, that all persons now holding any office of honor, profit, or trust, civil or military, under this State (members of the legislature excepted), shall, within such time, and in such manner as the legislature shall prescribe, take an oath well and truly to obey, execute, and enforce this ordinance, and such act or acts of the legislature as may be passed in pursuance thereof, according to the true intent and meaning of the same; and on the neglect or omission of any such person or persons so to do, his or their office or offices shall be forthwith vacated, and shall be filled up as if such person or persons were dead or had resigned; and no person hereafter elected to any office of honor, profit, or trust, civil or military (members of the legislature excepted), shall, until the legislature shall otherwise provide and direct, enter on the execution of his office, or be in any respect competent to discharge the duties thereof until he shall, in like manner, have taken a similar oath; and no juror shall be empanelled in any of the courts of this State, in any cause in which shall be in question this ordinance, or any act of the legislature passed in pursuance thereof, unless he shall first, in addition to the usual oath, have taken an oath that he will well and truly obey, execute, and enforce this ordinance, and such act or acts of the legislature as may be passed to carry the same into operation and effect, according to the true intent and meaning thereof. And we, the people of South Carolina, to the end that it may be fully understood by the government of the United States, and the people of the co-States, that we are determined to maintain this our ordinance and declaration, at every hazard, do further declare that we will not submit to the application of force on the part of the federal government, to reduce this State to obedience; but that we will consider the passage, by Congress, of any act authorizing the employment of a military or naval force against the State of South Carolina, her constitutional authorities or citizens; or any act abolishing or closing the ports of this State, or any of them, or otherwise obstructing the free ingress and egress of vessels to and from the said ports, or any other act on the part of the federal government, to coerce the State, shut up her ports, destroy or harass her commerce, or to enforce the acts hereby declared to be null and void, otherwise than through the civil tribunals of the country, as inconsistent with the longer continuance of South Carolina in the Union; and that the people of this State will henceforth hold themselves absolved from all further obligation to maintain or preserve their political connection with the people of the other States; and will forthwith proceed to organize a separate government, and do all other acts and things which sovereign and independent States may of right do. Done in convention at Columbia, the twenty-fourth day of November, in the year of our Lord one thousand eight hundred and thirty-two, and in the fifty-seventh year of the declaration of the independence of the United States of America."

A. D. 1829. — Introduction of the "Spoils System." See CIVIL-SERVICE REFORM IN THE UNITED STATES.

A. D. 1829.—The Kitchen Cabinet of President Jackson.—Major Lewis, one of the Tennessee friends of General Jackson, who accompanied him to Washington and was persuaded to remain, with his residence at the White House; General Duff Green, editor of the "United States Telegraph"; Isaac Hill, editor of the "New Hampshire Patriot," and Amos Kendall, late the editor of a Jackson paper in Kentucky, but a native of Massachusetts:—"these were the gentlemen . . . who, at the beginning of the new administration, were supposed to have most of the President's ear and confidence, and were stigmatized by the opposition as the Kitchen Cabinet."—J. Parton, *Life of Andrew Jackson, v.* 3, *ch.* 16.—After the breach between Jackson and Calhoun, Duff Green adhered to the latter. The "Globe" newspaper was then founded, to be the organ of the administration, and Francis P. Blair, called from Kentucky to undertake the editorship, acquired at the same time Duff Green's vacated seat in the Kitchen Cabinet.—J. Schouler, *Hist. of the U. S., v.* 3, *p.* 501.—"The establishment of the 'Globe,' the rupture with Calhoun, and the breaking up of the first cabinet had inaugurated a bitter war between the two rival papers, though really between the President and Mr. Calhoun, in consequence of which there were rich revelations made to the public."—N. Sargent, *Public Men and Events*, 1817–1853, *v.* 1, *p.* 186.

A. D. 1829-1832.—Rise of the Abolitionists.—"Between the years 1829 and 1832 took place a remarkable series of debates in Virginia on the subject of slavery, brought about by dissatisfaction with the State constitution and by the Nat Turner massacre, in which a number of slaves had risen against their masters. In these debates the evils of slavery were exposed as clearly as they were afterwards by the Abolitionists, and with an outspoken freedom which, when indulged in by Northern men, was soon to be denounced as treasonable and incendiary. These Southern speakers were silenced by the Slave Power. But there were men in the North who thought the same and who would not be silenced. Chief among these was William Lloyd Garrison. He had begun his memorable career by circulating petitions in Vermont in 1828 in favor of emancipation in the District of Columbia. Having joined Lundy in Baltimore in editing the 'Genius of Universal Emancipation,' he had suffered ignominy in the cause, in a Southern jail; drawing from persecution and hardship only new inspiration, he began the publication of the 'Liberator' at Boston in January, 1831. In the following year, under his leadership, was formed

the New England Anti-Slavery Society, which placed itself on the new ground that immediate, unconditional emancipation, without expatriation, was the right of every slave and could not be withheld by his master an hour without sin. In March, 1833, the 'Weekly Emancipator' was established in New York, with the assistance of Arthur and Lewis Tappan, and under the editorship of William Goodell. In the same year appeared at Haverhill, Mass., a vigorous pamphlet by John G. Whittier, entitled 'Justice and Expediency, or Slavery considered with a View to its Rightful and Effectual Remedy, Abolition.' Nearly simultaneously were published Mrs. Lydia Maria Child's 'Appeal in Behalf of that Class of Americans called Africans,' and a pamphlet by Elizur Wright, Jr., a professor in the Western Reserve College, on 'The Sin of Slavery and its Remedy.' These publications and the doctrines of the 'Liberator' produced great excitement throughout the country."—B. Tuckerman, *William Jay and the Constitutional Movement for the Abolition of Slavery, ch.* 3.—The "Liberator" "was a weekly journal, bearing the names of William Lloyd Garrison and Isaac Knapp as publishers. Its motto was, 'Our Country is the World, Our Countrymen are Mankind,' a direct challenge to those whose motto was the Jingo cry of those days, 'Our Country, right or wrong!' It was a modest folio, with a page of four columns, measuring fourteen inches by nine and a quarter. . . . The paper had not a dollar of capital. It was printed at first with borrowed type. Garrison and Knapp did all the work of every kind between them, Garrison of course doing the editorials. That he wrote them can hardly be said: his habit was often to set up without manuscript. . . . The publishers announced in their first issue their determination to go on as long as they had bread and water to live on. In fact, they lived on bread and milk, with a little fruit and a few cakes, which they bought in small shops below. Garrison apologizes for the meagreness of the editorials, which, he says, he has but six hours, and those at midnight, to compose, all the rest of his time and the whole of that of his companion being taken up by the mechanical work. . . . It was against nothing less than the world, or at least the world in which he lived, that this youth of twenty-six, with his humble partner, took up arms. Slavery was at the height of its power. . . . The salutatory of the 'Liberator' avowed that its editor meant to speak out without restraint. 'I will be as harsh as truth and as uncompromising as justice. On this subject I do not wish to think or speak or write with moderation. No! No! Tell a man whose house is on fire to give a moderate alarm; tell him to moderately rescue his wife from the hands of the ravisher; tell the mother to gradually extricate her babe from the fire into which it has fallen—but urge me not to use moderation in a cause like the present. I am in earnest—I will not equivocate—I will not excuse—I will not retreat a single inch—and I will be heard.' This promise was amply kept. . . . In private and in his family he was all gentleness and affection. Let it be said, too, that he set a noble example to controversial editors in his fair treatment of his opponents. Not only did he always give insertion to their replies, but he copied their criticisms from other journals into his own. Fighting for freedom of discussion, he was ever loyal to his own principle. What is certain is that the 'Liberator,' in spite of the smallness of its circulation, which was hardly enough to keep it alive, soon told. The South was moved to its centre. The editorials probably would not have caused much alarm, as the slaves could not read. What was likely to cause more alarm was the frontispiece, which spoke plainly enough to the slave's eye. It represented an auction at which 'slaves, horses and other cattle' were being offered for sale, and a whipping-post at which a slave was being flogged. In the background was the Capitol at Washington, with a flag inscribed 'Liberty' floating over the dome. . . . On seeing the 'Liberator' the realm of slavery bestirred itself. A Vigilance Association took the matter in hand. First came fiery and bloodthirsty editorials; then anonymous threats; then attempts by legal enactment to prevent the circulation of the 'Liberator' at the South. The Grand Jury of North Carolina found a true bill against Garrison for the circulation of a paper of seditious tendency, the penalty for which was whipping and imprisonment for the first offence, and death without benefit of clergy for the second. The General Assembly of Georgia offered a reward of five thousand dollars to any one who, under the laws of that State, should arrest the editor of the 'Liberator', bring him to trial, and prosecute him to conviction. The South reproached Boston with allowing a battery to be planted on her soil against the ramparts of Southern institutions. Boston felt the reproach, and showed that she would gladly have suppressed the incendiary print and perhaps have delivered up its editor; but the law was against her, and the mass of the people, though wavering in their allegiance to morality on the question of slavery, were still loyal to freedom of opinion. . . . It was just at this time that the South and its clientage at the North were thrown into a paroxysm of excitement by the Bloody Monday, as Nat Turner's rising at Southampton was called. The rising was easily suppressed, and Virginia saw, as Jamaica has since seen, how cruel is the panic of a dominant race. Not the slightest connection of the outbreak with Northern abolitionism was traced. That Garrison or any one connected with him ever incited the slaves to revolt, or said a word intentionally which could lead to servile war, seems to be utterly untrue. His preaching to the slaves, on the contrary, was always patience, submission, abstinence from violence, while in his own moral code he carried non-resistance to an extreme. Moreover, his championship held out hope, and what goads to insurrection is despair."—Goldwin Smith, *William Lloyd Garrison, pp.* 60-65.—"Mr. Emerson once said, 'Eloquence is dog-cheap in anti-slavery meetings.' . . . On the platform you would always see Garrison; with him was . . . Sam May. Stephen S. Foster was always there. . . . Parker Pilsbury, James Buffum, Arnold Buffum, Elizur Wright, Henry C. Wright, Abigail Kelley, Lucy Stone, Theo. D. Weld, the sisters Grimké, from South Carolina; John T. Sargent, Mrs. Chapman, Mrs. Lydia M. Child, Fred Douglas, Wm. W. Brown and Francis Jackson. The last was a stern Puritan, conscientious, upright, clear-minded, universally respected. Edmund Quincy also was there, and he never spoke without saying something that

had a touch of wit as well as of logic. Oliver Johnson . . . was one of the very first members of the Society. Theodore Parker, Samuel J. May, John Pierpont, Chas. L. Stearns, Chas. L. Redwood, Geo. Thompson (another wonderfully eloquent man), and, above all, Wendell Phillips." —J. F. Clarke, *Anti-Slavery Days, ch.* 3.—See, also, SLAVERY, NEGRO: A. D. 1828–1832.

A. D. 1830.—The Fifth Census.—Total population, 12,866,020 (being about 33½ per cent. more than in 1820), classed and distributed as follows:

North.	White.	Free black.	Slave.
Connecticut	289,603	8,047	25
Illinois	155,061	1,637	747
Indiana	339,399	3,629	3
Maine	398,263	1,190	2
Massachusetts	603,359	7,048	1
Michigan	31,346	261	32
New Hampshire	268,721	604	3
New Jersey	300,266	18,303	2,254
New York	1,873,663	44,870	75
Ohio	928,329	9,568	6
Pennsylvania	1,309,900	37,930	403
Rhode Island	93,621	3,561	17
Vermont	279,771	881	....
	6,871,302	137,529	3,568

South.	White.	Free black.	Slave.
Alabama	190,406	1,572	117,549
Arkansas	25,671	141	4,576
Delaware	57,601	15,855	3,292
District of Columbia	27,563	6,152	6,119
Florida	18,385	844	15,591
Georgia	296,806	2,486	217,531
Kentucky	517,787	4,917	165,213
Louisiana	89,441	16,710	109,588
Maryland	291,108	52,938	102,994
Mississippi	70,443	519	65,659
Missouri	114,795	569	25,091
North Carolina	472,843	19,543	245,601
South Carolina	257,863	7,921	315,401
Tennessee	535,746	4,555	141,603
Virginia	694,300	47,348	469,757
	3,660,758	182,070	2,005,475

In the decade between 1820 and 1830 the immigrant arrivals in the United States, as officially recorded, numbered 143,439, of which 75,803 were from the British Islands. Prior to 1821, there is no official record of immigration.

A. D. 1830-1831.—The first railroads. See STEAM LOCOMOTION ON LAND.

A. D. 1832.—The Black Hawk War. See ILLINOIS: A. D. 1832.

A. D. 1832.—The prospective surplus and necessary tariff reduction.—Clay's delusive measure. See TARIFF LEGISLATION (UNITED STATES): A. D. 1832.

A. D. 1832.—Twelfth Presidential Election.—Re-election of General Jackson.—General Jackson, renominated by his party almost without question, was re-elected over three competitors, the popular vote being as follows: Andrew Jackson, Democrat, 687,502; Henry Clay, National Republican, 530,189; William Wirt, Anti-Masonic, 33,108; John Floyd (voted for only in South Carolina, where electors were chosen by the legislature). The vote in the electoral college stood: Jackson 219, Clay 49, Floyd 11, Wirt 7. Martin Van Buren was elected Vice President.—"This election is notable for several reasons. It marks the beginning of the system of national nominating conventions; it gave Jackson a second term of office, in which he was to display his peculiar qualities more conspicuously than ever; it compacted and gave distinct character to the new Democratic party; and it practically settled directly the fate of the Bank of the United States, and indirectly the question of nullification. Jackson was easily re-elected, for he had established a great popularity, and the opposition was divided. A new party came into the field, and marked its advent by originating the national nominating convention. This was the Anti-Masonic party" (see NEW YORK: A. D. 1826–1832). Both the Democratic and the National Republican parties adopted the invention of the Anti-Masons, and made their nominations for the first time by the agency of great national conventions.—W. Wilson, *Division and Reunion*, 1829–1889, *p.* 62.

A. D. 1833-1836.—President Jackson's overthrow of the United States Bank.—The removal of the Deposits.—"The torrents of paper-money issued during the revolutionary war, which sunk in value to nothing, converted the old prejudice against paper promises-to-pay into an aversion that had the force of an instinct. To this instinctive aversion, as much as to the constitutional objections urged by Mr. Jefferson and his disciples, was owing the difficulty experienced by Alexander Hamilton in getting his first United States bank chartered. Hence, also, the refusal of Congress to recharter that bank in 1811. Hence the unwillingness of Mr. Madison to sanction the charter of the second bank of the United States in 1816. But the bank was chartered in 1816, and went into existence with the approval of all the great republican leaders, opposed only by the extreme Jeffersonians and by the few federalists who were in public life. . . . But, long before General Jackson came into power, the bank appeared to have lived down all opposition. In the presidential campaign of 1824 it was not so much as mentioned, nor was it mentioned in that of 1828. . . . At the beginning of the administration of General Jackson, the Bank of the United States was a truly imposing institution. Its capital was thirty-five millions. The public money deposited in its vaults averaged six or seven millions; its private deposits, six millions more; its circulation, twelve millions; its discounts, more than forty millions a year; its annual profits, more than three millions. Besides the parent bank at Philadelphia, with its marble palace and hundred clerks, there were 25 branches in the towns and cities of the Union. . . . Its bank-notes were as good as gold in every part of the country. . . . The bank and its branches received and disbursed the entire revenue of the nation. . . . There is a tradition in Washington to this day, that General Jackson came up from Tennessee to Washington, in 1829, resolved on the destruction of the Bank of the United States, and that he was only dissuaded from aiming a paragraph at it in his inaugural address by the prudence of Mr. Van Buren. . . . General Jackson had no thought of the bank until he had been President two months. He came to Washington expecting to serve but a single term, during

which the question of re-chartering the bank was not expected to come up. The bank was chartered in 1816 for twenty years, which would not expire until 1836." But, in 1829, the influence of Isaac Hill, one of the so-called "Kitchen Cabinet" at Washington, involved the irascible President in an endeavor to bring about the removal of Jeremiah Mason, a political opponent, who had been appointed to the presidency of the branch of the United States Bank at Portsmouth, New Hampshire. "The correspondence began in June and ended in October. I believe myself warranted in the positive assertion, that this correspondence relating to the desired removal of Jeremiah Mason was the direct and real cause of the destruction of the bank."—J. Parton, *Life of Andrew Jackson, v.* 3, *ch.* 20.—"As soon as the issue between him and the Bank of the United States was declared, Jackson resolved that the bank must be utterly destroyed. The method was suggested by Kendall and Blair, of the Kitchen Cabinet. It was to cripple the available means of the bank by withdrawing from it and its branches the deposits of public funds. In the message of December, 1832, Jackson had expressed his doubt as to the safety of the government deposits in the bank, and recommended an investigation. The House, after inquiry, resolved on March 2, by 109 to 46 votes, that the deposits were safe. The bank was at that period undoubtedly solvent, and there seemed to be no reason to fear for the safety of the public money in its custody. But Jackson had made up his mind that the bank was financially rotten; that it had been employing its means to defeat his reëlection; that it was using the public funds in buying up members of Congress for the purposes of securing a renewal of its charter, and of breaking down the administration; and that thus it had become a dangerous agency of corruption and a public enemy. Therefore the public funds must be withdrawn, without regard to consequences. But the law provided that the public funds should be deposited in the Bank of the United States or its branches, unless the Secretary of the Treasury should otherwise 'order and direct,' and in that case the Secretary should report his reasons for such direction to Congress. A willing Secretary of the Treasury was therefore needed. In May, 1833, Jackson reconstructed his Cabinet for the second time. . . . For the Treasury Department Jackson selected William J. Duane of Philadelphia, who was known as an opponent of the bank. Jackson, no doubt, expected him to be ready for any measure necessary to destroy it. In this he was mistaken. Duane earnestly disapproved of the removal of the deposits as unnecessary, and highly dangerous to the business interests of the country. . . . A majority of the members of the Cabinet thought the removal of the deposits unwise. . . . In the business community there seemed to be but one voice about it. The mere rumor that the removal of the deposits was in contemplation greatly disturbed the money market. But all this failed to stagger Jackson's resolution. . . . The Cabinet, with the exception of the Secretary of the Treasury, bowed to Jackson's will. But Duane would not shelter himself behind the President's assumed responsibility to do an act which, under the law, was to be his act. He also refused to resign. If he had to obey or go, he insisted upon being removed. Jackson then formally dismissed him, and transferred Roger B. Taney from the attorney generalship to the treasury. Benjamin F. Butler of New York, a friend of Van Buren, was made Attorney General. Taney forthwith ordered the removal of the deposits from the Bank of the United States; that is to say, the public funds then in the bank were to be drawn out as the government required them, and no new deposits to be made in that institution. The new deposits were to be distributed among a certain number of selected state banks, which became known as the 'pet banks.' . . . The money market became stringent. Many failures occurred. The general feeling in business circles approached a panic." But the very disturbance was charged upon the Bank, itself; the people rallied to the support of their favorite, "Old Hickory," and when the national charter of the Bank expired, in March, 1836, there was no hope of its renewal. It obtained a charter from the State of Pennsylvania, and continued business as a State institution until it went to pieces in the general commercial shipwreck of 1837-41.—C. Schurz, *Life of Henry Clay, ch.* 15 (*v.* 2).

Also in: W. G. Sumner, *Andrew Jackson as a Public Man, ch.* 11-14.—T. H. Benton, *Thirty Years' View, v.* 1, *ch.* 49, 56, 64-67, 77, *and* 92-111.—M. St. C. Clarke and D. A. Hall, *Hist. of the Bank of the U. S.*—See, also, Money and Banking: A. D. 1817-1833.

A. D. 1834.—Organization of the Whig Party.—The largest section of the opposition to the Jacksonian Democracy "was organized in 1834 as the Whig party. According to the 'Whig Almanac' for 1838, the party as then constituted comprised: '(1) Most of those who, under the name of National Republicans, had previously been known as supporters of Adams and Clay, and advocates of the American system [of tariff-protection]; (2) Most of those who, acting in defence of what they deemed the assailed or threatened rights of the States, had been stigmatized as Nullifiers, or the less virulent State Rights' men, who were thrown into a position of armed neutrality towards the administration by the doctrines of the proclamation of 1832 against South Carolina; (3) A majority of those before known as Anti-Masons; (4) Many who had up to that time been known as Jackson men, but who united in condemning the high-handed conduct of the Executive, the immolation of Duane, and the subserviency of Taney; (5) Numbers who had not before taken any part in politics, but who were now awakened from their apathy by the palpable usurpations of the Executive and the imminent peril of our whole fabric of constitutional liberty and national prosperity.' It was not to be expected that a party composed of such various elements would be able to unite on one candidate with heartiness; and, as the event proved, it was necessary that some time should elapse before anything like homogeneity could be given to the organization. Nullification was not popular among the Whigs of the North, nor did the State Rights' people of South Carolina and other States care about the war on the bank and the removal of the deposits."—E. Stanwood, *Hist. of Presidential Elections, ch.* 14.—"It was now felt instinctively that, in the existing struggle between the parties actually arrayed against each other, and in the principles and doctrines of those who

were in power, there was a peculiar fitness in the revival of a term which, on both sides of the Atlantic, had been historically associated with the side of liberty against the side of power. The revival of the name of Whigs was sudden, and it was a spontaneous popular movement. In progress of time, it enabled the public men who were leading the opposition to the party of the Administration to consolidate an organization of distinct political principles, and to strengthen it by accessions from those who had found reason to be dissatisfied with the opinions prevailing among the friends of the President." —G. T. Curtis, *Life of Daniel Webster*, *v.* 1, *p.* 499.

A. D. 1835.—First Petitions for the Abolition of Slavery in the District of Columbia.—Exclusion of Antislavery literature from the Mails.—"It was during the Twenty-third Congress, 1835, that the abolition of slavery, especially in the District of Columbia, may be said to have begun to move the public mind at the North. The first petitions presented to Congress for the abolition of slavery, at least the first to attract attention, were presented by Mr. Dickson, from the Canandaigua district, New York, who addressed the House in support of the prayer of the petitioners. Perhaps his speech, more than the petition he presented, served to stir up a feeling on the part of Southern men, and to cause other and numerous similar petitions to be gotten up at the North and sent to Congress. . . . The labors of the enemies of slavery, or 'Abolitionists,' had commenced, and by indefatigable men who believed they were serving God and the cause of humanity, and consequently it was with them a labor of conscience and duty, with which nothing should be allowed to interfere. Instead of petitions to Congress, they now sent large boxes of tracts, pamphlets, and various publications which the Southern people denominated 'incendiary,' to the post-office at Charleston, South Carolina, and other cities, to be distributed, as directed, to various persons. This increased the complaints and inflammatory articles in the Southern papers. The publications thus sent were stopped in the post-office, and the postmasters addressed the head of the department, Amos Kendall, on the subject, who replied that though the law authorized the transmission of newspapers and pamphlets through the mail, yet the law was intended to promote the general good of the public, and not to injure any section; and intimated that, such being the effect of these publications at the South, postmasters would be justified in withholding them."—N. Sargent, *Public Men and Events*, 1817–1853, *v.* 1, *pp.* 294–295.

A. D. 1835-1837.—The inflation of credits, and Speculation. — The great collapse. — "When the United States Bank lost the government deposits, late in 1833, they amounted to a little less than $10,000,000. On January 1, 1835, more than a year after the state banks took the deposits, they had increased to a little more than $10,000,000. But the public debt being then paid and the outgo of money thus checked, the deposits had by January 1, 1836, reached $25,000,000, and by June 1, 1836, $41,500,000. This enormous advance represented the sudden increase in the sales of public lands, which were paid for in bank paper, which in turn formed the bulk of the government deposits. . . . The increase in the sales of public lands was the result of all the organic causes and of all the long train of events which had seated the fever of speculation so profoundly in the American character of the day. . . . The increase of government deposits was only fuel added to the flames. The craze for banks and credits was unbounded before the removal of the deposits had taken place, and before their great increase could have had serious effect. . . . The insanity of speculation was in ample though unobserved control of the country while Nicholas Biddle [President of the United States Bank] still controlled the deposits, and was certain to reach a climax whether they stayed with him or went elsewhere. . . . The distribution of the surplus among the states by the law of 1836 was the last and in some respects the worst of the measures which aided and exaggerated the tendency to speculation. By this bill, all the money above $5,000,000 in the treasury on January 1, 1837, was to be 'deposited' with the states in four quarterly installments commencing on that day. . . . From the passage of the deposit bill in June, 1836, until the crash in 1837, this superb donation of thirty-seven millions was before the enraptured and deluded vision of the country. Over nine millions and a quarter to be poured into 'improvements' or loaned to the needy,—what a luscious prospect! The lesson is striking and wholesome, and ought not to be forgotten, that, when the land was in the very midst of these largesses, the universal bankruptcy set in. During 1835 and 1836 there were omens of the coming storm. Some perceived the rabid character of the speculative fever. William L. Marcy, governor of New York, in his message of January, 1836, answering the dipsomaniac cry for more banks, declared that an unregulated spirit of speculation had taken capital out of the state; but that the amount so transferred bore no comparison to the enormous speculations in stocks and in real property within the state. . . . The warning was treated contemptuously; but before the year was out the federal administration also became anxious, and the increase in land sales no longer signified to Jackson an increasing prosperity. . . . So Jackson proceeded with his sound defense of the famous specie circular, long and even still denounced as the 'causa causans' of the crisis of 1837. By this circular, issued on July 11, 1836, the secretary of the treasury had required payment for public lands to be made in specie, with an exception until December 15, 1836, in favor of actual settlers and actual residents of the state in which the lands were sold. . . . Jackson's specie circular toppled over the house of cards, which at best could have stood but little longer. . . . An insignificant part of the sales had been lately made to settlers. They were chiefly made to speculators. . . . Of the real money necessary to make good the paper bubble promises of the speculators not one tenth part really existed. Banks could neither make their debtors pay in gold and silver, nor pay their own notes in gold and silver. So they suspended. The great and long concealed devastation of physical wealth and of the accumulation of legitimate labor by premature improvements and costly personal living, became now quickly apparent. Fancied wealth sank out of sight."—E. M. Shepard, *Martin Van Buren*, *ch.* 8.

A. D. 1836.—The Atherton Gag.—"At this time [1835–36], the Northern abolitionists sent petitions to Congress for the abolition of slavery in the District of Columbia. They contended that as this territory was under the control of the United States' Government, the United States was responsible for slavery there; and that the Free States were bound to do what they could to have slavery brought to an end in that District. But the Slave States were not willing to have anything said on the subject, so they passed what was called a 'gag' law in the House of Representatives, and ruled that all petitions which had any relation to slavery should be laid on the table without being debated, printed or referred. John Quincy Adams opposed this rule resolutely, maintaining that it was wrong and unconstitutional. . . . He continued to present petitions, as before, for the abolition of slavery in the District. When the day came for petitions he was one of the first to be called upon; and he would sometimes occupy nearly the whole hour in presenting them, though each one was immediately laid on the table. One day he presented 511."—J. F. Clarke, *Anti-Slavery Days, p.* 45.—The gag-law has sometimes taken the name of the Atherton gag from its New Hampshire author.—W. C. Bryant and S. H. Gay, *Popular Hist. of the U. S., v.* 4, *p.* 338.

A. D. 1836.—Jackson's administration reviewed.—"What of the administration as a whole? Parton's view is as follows: 'I must avow explicitly the belief that, notwithstanding the good done by General Jackson during his presidency, his elevation to power was a mistake on the part of the people of the United States. The good which he effected has not continued, while the evil which he began remains.' Sumner, in commenting on 'Jackson's modes of action in his second term,' says: 'We must say of Jackson that he stumbled along through a magnificent career, now and then taking up a chance without really appreciating it; leaving behind him disturbed and discordant elements of good and ill just fit to produce turmoil and disaster in the future.' Later he adds: 'Representative institutions are degraded on the Jacksonian theory just as they are on the divine-right theory, or on the theory of the democratic empire. There is not a worse perversion of the American system of government conceivable than to regard the President as the tribune of the people.' The view of von Holst may be inferred from the following passages: 'In spite of the frightful influence, in the real sense of the expression, which he exercised during the eight years of his presidency, he neither pointed out nor opened new ways to his people by the superiority of his mind, but only dragged them more rapidly onward on the road they had long been travelling, by the demoniacal power of his will.' The meaning of the bank struggle is thus defined: 'Its significance lay in the elements which made Jackson able actually and successfully to assert his claims, in conflict both with the constitution and with the idea of republicanism, to a position between Congress and the people as patriarchal ruler of the republic.' Elsewhere he tells us that the 'curse of Jackson's administration' is that it weakened respect for law; that 'the first clear symptom' of 'the decline of a healthy political spirit' was the election and re-election of Jackson to the presidency; that his administration paved a 'broad path for the demoralizing transformation of the American democracy'; and that 'his "reign" receives the stamp which characterizes it precisely from the fact that the politicians knew how to make his character, with its texture of brass, the battering-ram with which to break down the last ramparts which opposed their will.' According to Parton, Sumner, and von Holst, as I understand them, the net result of Jackson's influence upon the American people was to hasten their progress toward political ruin. I think this conclusion erroneous. The gravest accusation against Jackson is, that his influence undermined respect for law. It is plausibly argued that, since he himself was impatient of authority, his example must have stimulated lawlessness in his followers. It may be urged, in reply, that the history of the country does not support the charge. The worst exhibitions of general lawlessness which have disgraced the United States were the anti-abolitionist mobs of Jackson's own day—for which he was not responsible. Since then, the American people, in spite of the demoralizations of the war and reconstruction periods, have steadily grown in obedience to law. . . . It is a curious circumstance that the relation of Jackson to sectionalism has received very little attention; and yet the growth of sectionalism, i. e., the tendency to divide the Union into two portions, politically separate and independent, is the fact which, from the Missouri Compromise of 1820 to the ordinances of secession in 1860, gives our political history its distinctive character. The one important question concerning Jackson, as indeed concerning every public man during the forty years which precede the Civil War, is: What did he do towards saving the Union from sectionalism? . . . Jackson came before the country as a disciple of Jefferson, and therefore as a believer in state rights. There was, it is true, much in his temper and situation which favored centralization; nevertheless, he was an honest, though moderate and somewhat inconsistent Jeffersonian, and he won and retained the confidence of the state-rights element in the democratic party. Moreover, he identified himself with the newly enfranchised and poorer citizens just rising to political self-consciousness. In these ways, his following came to include a large majority of his fellow-citizens, and, what was of the utmost importance, by far the larger proportion of those whose political character and opinions were as yet plastic. . . . Jackson became, to a degree never realized by any other man in our history, the trusted leader and teacher of the masses. . . . This intimate relation to the people, and this unparalleled power over the people, Jackson used to impress upon them his own love of the Union and his own hatred of sectionalism. . . . His character was altogether national. It is easy to think of Calhoun as a southerner and a South Carolinian; but it would not be easy

to think of Jackson as belonging to Tennessee or to the border states. The distribution of his support in the election of 1832 is instructive. New Hampshire, New York and Pennsylvania, as well as Tennessee, Georgia, Missouri, were Jackson's states. He was not looked upon as the representative of any particular section. His policy as President showed no trace of sectionalism. Its aim was the welfare of the masses irrespective of section. To him state lines had little meaning; sectional lines, absolutely none. There is another way in which he rendered great though unconscious service to the cause of national unity: he made the government, hitherto an unmeaning abstraction, intelligible and attractive to the people. . . . The chief value, then, of Jackson's political career, was its educational effect. His strong conviction of the national character of the Union, his brave words and acts in behalf of the rights of the Union, sank deep into the hearts of followers and opponents."—A. D. Morse, *Political Influence of Andrew Jackson* (*Pol. Sci. Quarterly, June*, 1886).

A. D. 1836.—Thirteenth Presidential Election.—Martin Van Buren chosen.—"As Vice-president, Van Buren was at the side of Jackson during his second term as President. It was the period of the first experiment in producing panics; of reckless expansions of the currency; of extravagant speculation; of an accumulating surplus revenue; of the last struggles of the Bank of the United States for the continuance of its powers. There was not a difficult question on which Jackson did not open his mind to the Vice-president with complete and affectionate confidence. He has often been heard to narrate incidents illustrating the prompt decision and bold judgment of his younger friend; and in those days of vehement conflicts between the power of the people and interests embodied against that power, the daring energy of the one was well united with the more tranquil intrepidity of the other. How fully this was recognized by the people appears from the action of the Democratic party of the Union. In May, 1835, it assembled in convention at Baltimore, and by a unanimous vote placed Van Buren in nomination as their candidate for the Presidency. . . . The Democracy of the Union supported Van Buren with entire unanimity. Out of two hundred and eighty-six electoral votes he received one hundred and seventy; and, for the first time, the Democracy of the North saw itself represented in the Presidential chair. Electoral votes were given for Van Buren without regard to geographical divisions: New York and Alabama, Missouri and Maine, Virginia and Connecticut, were found standing together. His election seemed friendly to the harmony and the perpetuity of the Union."—G. Bancroft, *Martin Van Buren, ch.* 5.—Mr. Van Buren received a clear majority of the popular vote cast at the election, namely, 762,678, against 735,651 cast in opposition, but divided between four Whig candidates, namely, William H. Harrison, who received 73 electoral votes, Hugh L. White, who received 26, Daniel Webster who received 14, and Willie P. Mangum, who received 11. Richard M. Johnson was chosen Vice President.

A. D. 1837.—Admission of Michigan into the Union. See MICHIGAN: A. D. 1837.

A. D. 1837.—The introduction of the Sub-treasury system.—"When the banks went down, they had the government deposits: this was in May, 1837. Van Buren's administration was only two months old. The President was a warm admirer of Jackson, and had formally announced that he would continue his predecessor's policy with respect to the management of the deposits. But the 'experiment' had suddenly culminated. The government deposits were not in its control, and could not be regained; their transfer from one part of the country to another had ceased. . . . Once more, therefore, the government was confronted with a grave question touching its deposits and the circulating medium. It now essayed a brand-new experiment. This was nothing less than keeping the deposits itself, and transferring and paying them as occasion required; while the people were left to regulate the currency themselves. This was a very wide departure from any former policy. The mode proposed of keeping the public deposits may be briefly described. The treasury building at Washington was to constitute the treasury of the United States, and the public money was to be kept within its vaults. The mint at Philadelphia, the branch at New Orleans, the new custom-houses in New York and Boston, were also to contain branch treasury vaults. Places were also to be prepared at Charleston, St. Louis, and elsewhere. The treasurer of the United States at Washington, and the treasurers of the mints at Philadelphia and New Orleans, were to be 'receivers-general,' to keep the public money. . . . At the extra session of Congress in 1837, the Executive recommended the sub-treasury experiment. Congress refused to try it, although a majority in both Houses belonged to the same political party as the President. Nevertheless, the system was continued, without legislative sanction, until 1840, when Congress finally passed a bill legalizing the measure. At the presidential election in 1840 a party revolution occurred, and the sub-treasury system, which had formed a prominent issue in the campaign, was unqualifiedly condemned by the people. Congress repealed the law, and passed a bill creating another national bank," which President Tyler vetoed — see below, A. D. 1841. "Thus the keeping of the public money remained in the hands of the government officials, without legislative regulation, until the passage of the sub-treasury bill, in 1846. The system established at that time has been maintained ever since."—A. S. Bolles, *Financial History of the U. S.*, 1789–1860, *bk.* 3, *ch.* 2.

A. D. 1837-1838.—Antislavery Petitions in the Senate.—Calhoun's Resolutions, forcing the issue.—"The movements for and against slavery in the session of 1837–'38 deserve to be noted, as of disturbing effect at the time; and as having acquired new importance from subsequent events. Early in the session a memorial was presented in the Senate from the General Assembly of Vermont, remonstrating against the annexation of Texas to the United States, and praying for the abolition of slavery in the District of Columbia—followed by many petitions from citizens and societies in the Northern States to the same effect; and, further, for the abolition of slavery in the Territories—for the abolition of the slave trade between the States—

and for the exclusion of future slave States from the Union. . . . The question which occupied the Senate was as to the most judicious mode of treating these memorials, with a view to prevent their evil effects: and that was entirely a question of policy, on which senators disagreed who concurred in the main object. Some deemed it most advisable to receive and consider the petitions—to refer them to a committee—and subject them to the adverse report which they would be sure to receive; as had been done with the Quakers' petitions at the beginning of the government. Others deemed it preferable to refuse to receive them. The objection raised to this latter course was, that it would mix up a new question with the slavery agitation which would enlist the sympathies of many who did not co-operate with the Abolitionists—the question of the right of petition. . . . Mr. Clay, and many others were of this opinion; Mr. Calhoun and his friends thought otherwise; and the result was, so far as it concerned the petitions of individuals and societies, what it had previously been—a half-way measure between reception and rejection—a motion to lay the question of reception on the table. This motion, precluding all discussion, got rid of the petitions quietly, and kept debate out of the Senate. In the case of the memorial from the State of Vermont, the proceeding was slightly different in form, but the same in substance. As the act of a State, the memorial was received; but after reception was laid on the table. Thus all the memorials and petitions were disposed of by the Senate in a way to accomplish the two-fold object, first, of avoiding discussion; and, next, condemning the object of the petitioners. It was accomplishing all that the South asked; and if the subject had rested at that point, there would have been nothing in the history of this session, on the slavery agitation, to distinguish it from other sessions about that period: but the subject was revived; and in a way to force discussion, and to constitute a point for the retrospect of history. Every memorial and petition had been disposed of according to the wishes of the senators from the slaveholding States; but Mr. Calhoun deemed it due to those States to go further, and to obtain from the Senate declarations which should cover all the questions of federal power over the institution of slavery: although he had just said that paper reports would do no good. For that purpose, he submitted a series of resolves—six in number—which derive their importance from their comparison, or rather contrast, with others on the same subject presented by him in the Senate ten years later; and which have given birth to doctrines and proceedings which have greatly disturbed the harmony of the Union, and palpably endangered its stability. The six resolutions of this period ('37—'38) undertook to define the whole extent of the power delegated by the States to the federal government on the subject of slavery; to specify the acts which would exceed that power; and to show the consequences of doing anything not authorized to be done—always ending in a dissolution of the Union. The first four of these related to the States; about which, there being no dispute, there was no debate. The sixth, without naming Texas, was prospective, and looked forward to a case which might include her annexation; and was laid upon the table to make way for an express resolution from Mr. Preston on the same subject. The fifth related to the territories, and to the District of Columbia, and was the only one which excited attention, or has left a surviving interest. It was in these words: 'Resolved that the intermeddling of any State, or States, or their citizens, to abolish slavery in this District, or any of the territories, on the ground or under the pretext that it is immoral or sinful, or the passage of any act or measure of Congress with that view, would be a direct and dangerous attack on the institutions of all the slaveholding States.' The dogma of 'no power in Congress to legislate upon the existence of slavery in territories' had not been invented at that time; and, of course, was not asserted in this resolve, intended by its author to define the extent of the federal legislative power on the subject. The resolve went upon the existence of the power, and deprecated its abuse." Mr. Clay offered an amendment, in the nature of a substitute, consisting of two resolutions, the first of which was in these words: "'That the interference by the citizens of any of the States, with the view to the abolition of slavery in this District, is endangering the rights and security of the people of the District; and that any act or measure of Congress, designed to abolish slavery in this District, would be a violation of the faith implied in the cessions by the States of Virginia and Maryland—a just cause of alarm to the people of the slaveholding States—and have a direct and inevitable tendency to disturb and endanger the Union.' The vote on the final adoption of the resolution was: [Yeas 37, Nays 8]. . . . The second resolution of Mr. Clay applied to slavery in a territory where it existed, and deprecated any attempt to abolish it in such territory, as alarming to the slave States, and as violation of faith towards its inhabitants, unless they asked it; and in derogation of its right to decide the question of slavery for itself when erected into a State. This resolution was intended to cover the case of Florida, and ran thus: 'Resolved that any attempt of Congress to abolish slavery in any territory of the United States in which it exists would create serious alarm and just apprehension in the States sustaining that domestic institution, and would be a violation of good faith towards the inhabitants of any such territory who have been permitted to settle with, and hold, slaves therein; because the people of any such territory have not asked for the abolition of slavery therein; and because, when any such territory shall be admitted into the Union as a State, the people thereof shall be entitled to decide that question exclusively for themselves.' And the vote upon it was—[Yeas 35, Nays 9]. . . . The general feeling of the Senate was that of entire repugnance to the whole movement—that of the petitions and memorials on the one hand, and Mr. Calhoun's resolutions on the other. The former were quietly got rid of, and in a way to rebuke, as well as to condemn their presentation; that is to say, by motions (sustained by the body) to lay them on the table. The resolutions could not so easily be disposed of, especially as their mover earnestly demanded discussion, spoke at large, and often himself; and 'desired to make the question, on their rejection or adoption, a test question.'"—T. H. Benton, *Thirty Years' View, v. 2, ch. 33.*

A. D. 1840.—The Sixth Census.—Total population, 17,069,453 (exceeding that of 1830 by nearly 33 per cent.), classed and distributed as follows:

North.	White.	Free black.	Slave.
Connecticut	301,856	8,105	17
Illinois	472,254	3,598	331
Indiana	678,698	7,165	3
Iowa	42,924	172	16
Maine	500,438	1,355	....
Massachusetts	729,030	8,669	....

The number of immigrants arriving in the United States between 1830 and 1840, according to official reports, was 599,125, of whom 283,191 were from the British Islands, and 212,497 from other parts of Europe.

A. D. 1840.—Fourteenth Presidential Election.—The Log-cabin and Hard-cider campaign.—William Henry Harrison, Whig, was elected President, over Martin Van Buren, Democrat, and James G. Birney, candidate of the "Liberty Party." The popular vote cast was: Harrison 1,275,016, Van Buren 1,129,102, Birney 7,069. The electoral vote stood: Harrison 234, Van Buren 60, Birney none. John Tyler was elected Vice President. In the early part of the campaign, a Baltimore newspaper, making a foolish attempt to cast ridicule on General Harrison, said that a pension of a few hundred dollars and a barrel of hard cider would content him in his log cabin for life. This fatuous remark gave the Whigs a popular cry which they used with immense effect, and "the log-cabin and hard-cider campaign," as it is known in American history, was memorable for its song-singing enthusiasm.—"If one could imagine a whole nation declaring a holiday or season of rollicking for a period of six or eight months, and giving themselves up during the whole time to the wildest freaks of fun and frolic, caring nothing for business, singing, dancing, and carousing night and day, he might have some faint notion of the extraordinary scenes of 1840. It would be difficult, if not impossible, otherwise to form even a faint idea of the universal excitement, enthusiasm, activity, turmoil, and restlessness which pervaded the country during the spring, summer, and fall of that memorable year. Log cabins large enough to hold crowds of people were built in many places. Small ones, decorated with 'coon-skins, were mounted on wheels and used in processions. The use of the 'coon-skins soon led to the adoption of the 'coon (raccoon) itself as an emblem and adjunct of the log cabin, and its 'counterfeit presentment' was hoisted in all the Whig papers. Meetings were everywhere, and every day, held in neighborhoods, school-houses, villages, towns, counties, cities, States, varying in number from ten to one hundred thousand; and wherever there was a gathering there were also speaking and singing. Ladies attended these meetings, or conventions, in great numbers, and joined in the singing. Farmers, with big teams and wagons, would leave their fields and travel ten, twenty, or thirty miles, accompanied by their families and neighbors, to attend a convention or a barbecue and listen to distinguished orators. Crowds on the road, multitudes in big wagons drawn by four, six, or eight horses, made the welkin ring with their log-cabin songs. Nobody slept, nobody worked, nobody rested; at least so it seemed, for all were on the 'qui vive' and in motion. The entire population seemed to be absorbed in the great duty of electing General Harrison and thus changing the government. . . .

'What has caused this great commotion, motion, motion.
Our country through?
It is the ball a rolling on
For Tippecanoe and Tyler too,
For Tippecanoe and Tyler too.'

The original or special friends of General Harrison very naturally claimed that it was his popularity which produced such an unprecedented 'commotion' 'our country through.' But in this they were mistaken. The popularity of no one man could have produced such a universal outpouring of the people from day to day for weeks and months unceasingly, abandoning everything else, and giving time and money unstintedly to carry the election. General Harrison was but the figure-head,—the representative of the Whig party for the time being. Few had ever heard of him. The people knew from history and the campaign papers that he had been a general in the then late war with England; that he had won a victory at the battle of Tippecanoe over the British and Indians, and also at the battle of the Thames, in Canada, where Tecumseh, the noted Indian warrior, was killed. This was enough to make a hero of him by those who had a purpose to serve in doing so. As to his fitness for the Presidency, the people knew nothing and cared nothing. A change in the government was what they desired and were determined to have."—N. Sargent, *Public Men and Events, v. 2, pp.* 107–110.

A. D. 1840-1841.—The McLeod case. See CANADA: A. D. 1840–1841.

A. D. 1841.—The Death of President Harrison.—Breach between President Tyler and the Whig Party which elected him.—President

Harrison died suddenly on the 4th of April, 1841, and Vice President John Tyler became President. Tyler was a Calhoun Democrat in politics, although nominated and elected by the Whigs, and the financial measures favored by the latter were especially obnoxious to him. "Congress met May 31st, 1841. . . . A bill to abolish the Sub-Treasury of the previous Administration was passed by both Houses and signed by the President. A bill to incorporate 'The Fiscal Bank of the United States' was passed by both Houses. It was weeded of many of the objectionable features of the old United States Bank, but was hardly less odious to the Democrats. It was vetoed by the President. . . . An effort to pass the bill over the veto did not receive a two-thirds majority. The Whig leaders, anxious to prevent a party disaster, asked from the President an outline of a bill which he would sign. After consultation with the Cabinet, it was given, and passed by both Houses. September 9th the President vetoed this bill also, and an attempt to pass it over the veto did not receive a two-thirds majority. The action of the President, in vetoing a bill drawn according to his own suggestions, and thus apparently provoking a contest with the party which had elected him, roused the unconcealed indignation of the Whigs. The Cabinet, with one exception [Daniel Webster, Secretary of State, who remained in President Tyler's cabinet until May, 1843], at once resigned. The Whig members of Congress issued Addresses to the People, in which they detailed the reforms designed by the Whigs and impeded by the President, and declared that 'all political connection between them and John Tyler was at an end from that day forth.'. . . The President filled the vacancies in the Cabinet by appointing Whigs and Conservatives. His position was one of much difficulty. His strict constructionist opinions, which had prevented him from supporting Van Buren, would not allow him to approve a National Bank, and yet he had accepted the Vice-Presidency from a party pledged to establish one. The over hasty declaration of war by the Whigs put a stop to his vacillations, and compelled him to rely upon support from the Democrats. But only a few members of Congress, commonly known as 'the corporal's guard,' recognized Tyler as a leader."—A. Johnston, *Hist. of Am. Politics, 2d ed., ch.* 15, *sect.* 2–4.

Also in: L. G. Tyler, *Letters and Times of the Tylers, v.* 2, *ch.* 1–4.—C. Colton, *Life and Times of Henry Clay, ch.* 14–15.—T. H. Benton, *Thirty Years' View, v.* 2, *ch.* 80–85.

A. D. 1842.—Victory of John Quincy Adams in defending the Right of Petition.—"Jan. 21, 1842, Mr. Adams presented a petition from 45 citizens of Haverhill, Mass., praying for the dissolution of the Union, and moved it be referred to a select committee, with instructions to report why the petition should not be granted. There was at once great excitement and members called out, 'Expel him,' 'Censure him.' After a good deal of fruitless endeavor to accomplish something, the House adjourned, and forty or fifty slaveholders met to decide what kind of resolutions should be presented to meet the case. Thomas F. Marshall of Kentucky was selected by this caucus from Congress to propose the resolutions, which were to the effect that for presenting such a petition to a body each of whom had taken an oath to maintain the Constitution, Mr. Adams was virtually inviting them to perjure themselves, and that therefore he deserved the severest censure. Marshall supported this with a very violent speech. Mr. Wise followed in another. Then Mr. Adams arose and asked the clerk to read the first paragraph of the Declaration of Independence, being the one which recognizes the right of every people to alter or abolish their form of Government when it ceases to accomplish its ends. He said that those who believed that the present Government was oppressive had the right (according to the Declaration of Independence, on which the whole of our national unity reposes), to petition Congress to do what they believed was desirable; and all that Congress could properly do would be to explain to them why such an act could not be performed. He replied with great severity to Mr. Wise and said that Mr. Wise had come into that Hall a few years before with his hands dripping with the blood of one of his fellow beings. In this he alluded to the part which Mr. Wise had taken in the duel between Mr. Graves of Kentucky, and Cilley of Maine, in which the latter had been killed. As for Mr. Marshall, who had accused him of treason, he spoke of him with great scorn. 'I thank God!' said he 'that the Constitution of my country has defined treason, and has not left it to the puny intellect of this young man from Kentucky to say what it is. If I were the father of this gentleman from Kentucky, I should take him from this House and put him to school where he might study his profession for some years until he became a little better qualified to appear in this place.' Mr. Adams had on his desk a great many books and references prepared for his use by some anti-slavery gentlemen then in Washington; after he had gone on for some time with his speech he was asked how much more time he would probably occupy. He replied 'I believe Mr. Burke took three months for his speech on Warren Hastings' indictment. I think I may probably get through in ninety days, perhaps in less time.' Thereupon they thought it just as well to have the whole thing come to an end and it was moved that the matter should be laid on the table. Mr. Adams consented, and it was done."—J. F. Clarke, *Anti-Slavery Days, pp.* 57–59.

A. D. 1842.—The Ashburton Treaty with England. — Settlement of Northeastern boundary questions.—"It was arranged in December by the Peel ministry that Lord Ashburton should be sent to Washington as a special minister from Great Britain, with full powers to settle the boundary, and all other pending disputes with the United States. . . . Ashburton, formerly Alexander Baring, of the eminent banking firm of Baring Brothers, and a son of its original founder, was now an old man, who had retired on a princely fortune, and being indifferent to fame, aspired only to bring these two countries to more friendly terms. Like his father before him, he had tact and plain good sense, and understood well the American character, having married here during his youth. Lord Ashburton arrived early the next April, and on the 13th of June entered upon the duties

of his mission. Maine and Massachusetts, the States most interested in the disputed boundary, sent commissioners of their own to yield an assent in this branch of the business. The whole business as conducted at our capital had an easy and informal character. Webster and Lord Ashburton represented alone their respective governments; no protocols were used, nor formal records; and the correspondence and official interviews went on after a friendly fashion in the heat of summer, and while Congress was holding its long regular session. . . . This Washington or Ashburton treaty, as it is called to this day, bore date of the day [August 9] when it was formally signed. It passed by the Oregon or north-western boundary, a point on which harmony was impossible, and this was the most pregnant omission of all; it passed by the 'Caroline' affair; it ignored, too, the 'Creole' case, for Great Britain would not consent to recognize the American claim of property in human beings. Nor, on the other side, were the debts of delinquent States assumed by the United States, as many British creditors had desired. Mutual extradition in crimes under the law of nations, and the delivery of fugitives from justice, were stipulated. But the two chief features of this treaty were: a settlement of the boundary between Great Britain and the United States on the north-east, extending westward beyond the great lakes, and a cruising convention for the mutual suppression of the slave-trade. As to the north-east territory in dispute, which embraced some 12,000 square miles, seven-twelfths, or about as much as the King of the Netherlands had awarded, were set off to the United States; Great Britain taking the residue and securing the highlands she desired which frown upon the Canadian Gibraltar, and a clear though circuitous route between Quebec and Halifax. Our government was permitted to carry timber down the St. John's River, and though becoming bound to pay Maine and Massachusetts $300,000 for the strip of territory relinquished to Great Britain, gained in return Rouse's Point, on Lake Champlain, of which an exact survey would have deprived us. By the cruising convention clause, which the President himself bore a conspicuous part in arranging, the delicate point of 'right of search' was avoided; for instead of trusting Great Britain as the police of other nations for suppressing the African slave-trade, each nation bound itself to do its full duty by keeping up a sufficient squadron on the African coast. It so happened that Great Britain, by softening the old phrase 'right of search' into 'right of visitation,' had been inducing other nations to guarantee this police inspection of suspected slave vessels. In December, 1841, ambassadors of the five great European powers arranged in London a quintuple league of this character. But France, hesitating to confirm such an arrangement, rejected that league when the Ashburton treaty was promulgated, and hastened to negotiate in its place a cruising convention similar to ours on the slave-trade suppression; nor was the right of search, against which America had fought in the war of 1812, ever again invoked, even as a mutual principle, until by 1862 the United States had grown as sincere as Great Britain herself in wishing to crush out the last remnant of the African traffic. This cruising convention, however, left the abstract question of search untouched, and in that light Sir Robert Peel defended himself in Parliament. The Ashburton treaty was honorable, on the whole, for each side; what it arranged was arranged fairly, and what it omitted was deferred without prejudice. . . . So satisfactory, in fine, was the treaty, despite all criticism, that the Senate ratified it by more than a three-fourths vote, and at a time, too, when the Whig Congress was strongly incensed against the administration, and Webster had made bitter enemies."—J. Schouler, *Hist. of the United States, v.* 4, *ch.* 17, *pp.* 400–403.

A. D. 1844.—Fifteenth Presidential Election.—Choice of James K. Polk.—The Texas treaty of annexation had been held in committee in the Senate "till the national conventions of the two parties should declare themselves. Both conventions met in Baltimore, in May, to name candidates and avow policies. The Whigs were unanimous as to who should be their candidate: it could be no one but Henry Clay. Among the Democrats there was a very strong feeling in favor of the renomination of Van Buren. But both Clay and Van Buren had been asked their opinion about the annexation of Texas, both had declared themselves opposed to any immediate step in that direction, and Van Buren's declaration cost him the Democratic nomination. He could have commanded a very considerable majority in the Democratic convention, but he did not command the two-third's majority required by its rules, and James K. Polk of Tennessee became the nominee of his party." Polk had been Speaker of the House of Representatives, and was honorably though slightly known to the country. The only new issue presented in the party "platforms" was offered by the Democrats in their resolution demanding "'the reoccupation of Oregon and the reannexation of Texas, at the earliest practicable period'; and this proved the makeweight in the campaign. . . . The 'Liberty Party,' the political organization of the Abolitionists, commanded now, as it turned out, more than 60,000 votes. . . . Had the 'Liberty' men in New York voted for Clay, he would have been elected."—W. Wilson, *Division and Reunion,* 1829–1889, *sect.* 73 (*ch.* 6).—Polk received of the popular votes, 1,337,243, against 1,299,062 cast for Henry Clay, Whig, and 62,300 cast for James G. Birney, candidate of the Liberty Party. Electoral vote: Polk, 170; Clay, 105; Birney, none. George M. Dallas was elected Vice President.

A. D. 1845.—Preserving the equilibrium between Free and Slave States.—Admission of Iowa and Florida.—"The slave-masters . . . had long pretended that the equilibrium between the free and slave States must be preserved at all hazards, and twice had they resorted to the violent device of arbitrarily linking two measures

that had nothing in common for that purpose,—in 1820 combining the bills for the admission of Missouri and Maine, and in 1836 those for the admission of Michigan and Arkansas. In pursuance of the same purpose and line of policy, they were now unwilling to receive without a consideration the free State of Iowa, which had framed a constitution in the autumn of 1844, and was asking for admission. Some makeweight must be found before this application could be complied with. This they managed to discover in an old constitution, framed by the Territory of Florida five years before. Though Florida was greatly deficient in numbers, and her constitution was very objectionable in some of its features, they seized this occasion to press its claims, and to make its admission a condition precedent to their consent that Iowa should be received. The House Committee on Territories reported in favor of the admission of the two in a single measure. In the closing hours of the XXVIIIth Congress the bill came up for consideration. . . . The constitution of Florida not only expressly denied to the legislature the power to emancipate slaves, but gave it the authority to prevent free colored persons from immigrating into the State, or from being discharged from vessels in her ports." All attempts to require an amendment of the Florida constitution in these particulars before recognizing that ill-populated territory as a State, were defeated, and the bill admitting Florida and Iowa became a law on the 3d of March, 1845.—H. Wilson, *Hist. of the Rise and Fall of the Slave Power in Am., v.* 2, *ch.* 1.

A. D. 1845-1846.—The Slavery question in the Democratic Party.—Hunkers and Barnburners.—The Wilmot Proviso.—"With Polk's accession and the Mexican war, the schism in the Democratic ranks over the extension of American slave territory became plainer. Even during the canvass of 1844 a circular had been issued by William Cullen Bryant, David Dudley Field, John W. Edmonds, and other Van Buren men, supporting Polk, but urging the choice of congressmen opposed to annexation. Early in the new administration the division of New York Democrats into 'Barnburners' and 'Old Hunkers' appeared. The former were the strong pro-Van Buren, anti-Texas men, or 'radical Democrats,' who were likened to the farmer who burned his barn to clear it of rats. The latter were the 'northern men with southern principles,' the supporters of annexation, and the respectable, dull men of easy consciences, who were said to hanker after the offices. The Barnburners were led by men of really eminent ability and exalted character: Silas Wright, then governor, Benjamin F. Butler, John A. Dix, chosen in 1845 to the United States senate, Azariah C. Flagg, the famous comptroller, and John Van Buren, the ex-president's son. . . . Daniel S. Dickinson and William L. Marcy were the chief figures in the Hunker ranks. Polk seemed inclined, at the beginning, to favor, or at least to placate, the Barnburners. . . . Jackson's death in June, 1845, deprived the Van Buren men of the tremendous moral weight which his name carried, and which might have daunted Polk. It perhaps also helped to loosen the weight of party ties on the Van Buren men. After this the schism rapidly grew. In the fall election of 1845 the Barnburners pretty thoroughly controlled the Democratic party of the state [of New York] in hostility to the Mexican war, which the annexation of Texas had now brought. Samuel J. Tilden of Columbia county, and a profound admirer of Van Buren, became one of their younger leaders. Now arose the strife over the 'Wilmot proviso,' in which was embodied the opposition to the extension of slavery into new territories. Upon this proviso the modern Republican party was formed eight years later; upon it, fourteen years later, Abraham Lincoln was chosen president; and upon it began the war for the Union, out of whose throes came the vastly grander and unsought beneficence of complete emancipation. David Wilmot was a Democratic member of Congress from Pennsylvania; in New York he would have been a Barnburner. In 1846 a bill was pending to appropriate $3,000,000 for use by the president in a purchase of territory from Mexico as part of a peace. Wilmot proposed an amendment that slavery should be excluded from any territory so acquired. All the Democratic members, as well as the Whigs from New York, and most strongly the Van Buren or Wright men, supported the proviso. The Democratic legislature [of New York] approved it by the votes of the Whigs with the Barnburners and the Soft Hunkers, the latter being Hunkers less friendly to slavery. It passed the house at Washington, but was rejected by the senate."—E. M. Shepard, *Martin Van Buren, ch.* 11.—In the slang nomenclature which New York politics have always produced with great fertility Hard-Shell and Soft-Shell were terms often used instead of Hunker and Barnburner.

A. D. 1847. — Calhoun's aggressive policy of agitation, forcing the Slavery issue upon the North.—His program of disunion.—"On Friday, the 19th of February [1847], Mr. Calhoun introduced into the Senate his new slavery resolutions, prefaced by an elaborate speech, and requiring an immediate vote upon them. They were in these words: 'Resolved, That the territories of the United States belong to the several States composing this Union, and are held by them as their joint and common property. Resolved, That Congress, as the joint agent and representative of the States of this Union, has no right to make any law, or do any act whatever, that shall directly, or by its effects, make any discrimination between the States of this Union, by which any of them shall be deprived of its full and equal right in any territory of the United States acquired or to be acquired. Resolved, That the enactment of any law which should directly, or by its effects, deprive the citizens of any of the States of this Union from emigrating, with their property, into any of the territories of the United States, will make such discrimination, and would, therefore, be a violation of the constitution, and the rights of the States from which such citizens emigrated, and in derogation of that perfect equality which belongs to them as members of this Union, and would tend directly to subvert the Union itself. Resolved,

That it is a fundamental principle in our political creed, that a people, in forming a constitution, have the unconditional right to form and adopt the government which they may think best calculated to secure their liberty, prosperity, and happiness; and that, in conformity thereto, no other condition is imposed by the federal constitution on a State, in order to be admitted into this Union, except that its constitution shall be republican; and that the imposition of any other by Congress would not only be in violation of the constitution, but in direct conflict with the principle on which our political system rests.' These resolutions, although the sense is involved in circumlocutory phrases, are intelligible to the point, that Congress has no power to prohibit slavery in a territory, and that the exercise of such a power would be a breach of the constitution, and leading to the subversion of the Union. . . . Mr. Calhoun demanded the prompt consideration of his resolutions, giving notice that he would call them up the next day and press them to a speedy and final vote. He did call them up, but never called for the vote, nor was any ever had. . . . In the course of this year, and some months after the submission of his resolutions in the Senate denying the right of Congress to abolish slavery in a territory, Mr. Calhoun wrote a letter to a member of the Alabama Legislature, which furnishes the key to unlock his whole system of policy in relation to the slavery agitation, and its designs, from his first taking up the business in Congress in the year 1835, down to the date of the letter; and thereafter. The letter was in reply to one asking his opinion 'as to the steps which should be taken' to guard the rights of the South. . . . It opens with this paragraph: 'I am much gratified with the tone and views of your letter, and concur entirely in the opinion you express, that instead of shunning, we ought to court the issue with the North on the slavery question. I would even go one step further, and add that it is our duty — due to ourselves, to the Union, and our political institutions, to force the issue on the North. We are now stronger relatively than we shall be hereafter, politically and morally. Unless we bring on the issue, delay to us will be dangerous indeed. It is the true policy of those enemies who seek our destruction. Its effects are, and have been, and will be to weaken us politically and morally, and to strengthen them. Such has been my opinion from the first. Had the South, or even my own State backed me, I would have forced the issue on the North in 1835, when the spirit of abolitionism first developed itself to any considerable extent. It is a true maxim, to meet danger on the frontier, in politics as well as war. Thus thinking, I am of the impression, that if the South act as it ought, the Wilmot Proviso, instead of proving to be the means of successfully assailing us and our peculiar institution, may be made the occasion of successfully asserting our equality and rights, by enabling us to force the issue on the North. Something of the kind was indispensable to rouse and unite the South. On the contrary, if we should not meet it as we ought, I fear, greatly fear, our doom will be fixed. It would prove that we either have not the sense or spirit to defend ourselves and our institutions.' The phrase 'forcing the issue' is here used too often, and for a purpose too obvious, to need remark. The reference to his movement in 1835 confirms all that was said of that movement at the time by senators from both sections of the Union. . . . At that time Mr. Calhoun characterized his movement as defensive — as done in a spirit of self-defence: it was then characterized by senators as aggressive and offensive: and it is now declared in this letter to have been so. He was then openly told that he was playing into the hands of the abolitionists, and giving them a champion to contend with, and the elevated theatre of the American Senate for the dissemination of their doctrines, and the production of agitation and sectional division. All that is now admitted, with a lamentation that the South, and not even his own State, would stand by him then in forcing the issue. So that chance was lost. Another was now presented. The Wilmot Proviso, so much deprecated in public, is privately saluted as a fortunate event, giving another chance for forcing the issue. The letter proceeds: 'But in making up the issue, we must look far beyond the proviso. It is but one of many acts of aggression, and, in my opinion, by no means the most dangerous or degrading, though more striking and palpable.' . . . So that, while this proviso was, publicly, the Pandora's box which filled the Union with evil, and while it was to Mr. Calhoun and his friends the theme of endless deprecation, it was secretly cherished as a means of keeping up discord, and forcing the issue between the North and the South. Mr. Calhoun then proceeds to the serious question of disunion, and of the manner in which the issue could be forced. 'This brings up the question, how can it be so met, without resorting to the dissolution of the Union? . . . There is, in my opinion, but one way in which it can be met; and that is . . . by retaliation.' . . . Then follows an argument to justify retaliation. . . . Retaliation by closing the ports of the State against the commerce of the offending State: and this called a constitutional remedy, and a remedy short of disunion. . . . The letter proceeds with further instructions upon the manner of executing the retaliation: 'My impression is, that it should be restricted to sea-going vessels, which would leave open the trade of the valley of the Mississippi to New Orleans by river, and to the other Southern cities by railroad; and tend thereby to detach the North-western from the North-eastern States.' . . . This confidential letter from Mr. Calhoun to a member of the Alabama legislature of 1847, has come to light, to furnish the key which unlocks his whole system of slavery agitation which he commenced in the year 1835. That system was to force issues upon the North under the pretext of self-defence, and to sectionalize the South, preparatory to disunion, through the instrumentality of sectional conventions, composed wholly of delegates from the slaveholding States."— T. H. Benton, *Thirty Years' View*, *v.* 2, *ch.* 167–168.

A. D. 1848.—The Free Soil Convention at Buffalo and its nominations.—The "Barnburner" Democrats of New York, or Free Soilers as they began to be called, met in convention at Utica, February 16, 1848, and chose delegates to the approaching national Democratic Convention at Baltimore. In April the Barnburner members of the Legislature issued an elaborate address, setting forth the Free Soil principles of the Democratic fathers. The authors of the address were afterwards known to be Samuel J. Tilden and Martin and John Van Buren. The national Democratic Convention assembled in May, 1848. "It offered to admit the Barnburner and Hunker delegations together to cast the vote of the State. The Barnburners rejected the compromise as a simple nullification of the vote of the State, and then withdrew. Lewis Cass was nominated for president, the Wilmot proviso being thus emphatically condemned. For Cass had declared in favor of letting the new territories themselves decide upon slavery. The Barnburners, returning to a great meeting in the City Hall Park at New York, cried 'The lash has resounded through the halls of the Capitol!' and condemned the cowardice of northern senators who had voted with the South. . . . The delegates issued an address written by Tilden, fearlessly calling Democrats to independent action. In June a Barnburner convention met at Utica," which named Van Buren for the Presidency and called a national convention of all Free Soilers to meet at Buffalo, August 9, 1848. "Charles Francis Adams, the son of John Quincy Adams, presided at the Buffalo convention; and in it Joshua R. Giddings, the famous abolitionist, and Salmon P. Chase, were conspicuous. To the unspeakable horror of every Hunker there participated in the deliberations a negro, the Rev. Mr. Ward. Butler [Benjamin F., of New York], reported the resolutions in words whose inspiration is still fresh and ringing. . . . At the close were the stirring and memorable words: 'We inscribe on our banner, Free Soil, Free Speech, Free Labor, and Free Men; and under it we will fight on and fight ever, until a triumphant victory shall reward our exertions.' Joshua Leavitt of Massachusetts, one of the 'blackest' of abolitionists, reported to the convention the name of Martin Van Buren for president." The nomination was acclaimed with enthusiasm, and Charles Francis Adams was nominated for vice-president. "In September, John A. Dix, then a Democratic senator, accepted the Free-soil nomination for governor of New York. The Democratic party was aghast. The schismatics had suddenly gained great dignity and importance. . . . The Whigs had in June nominated Taylor, one of the two heroes of the Mexican war. . . . The anti-slavery Whigs hesitated for a time; but Seward of New York and Horace Greeley in the New York Tribune finally led most of them to Taylor, rather than, as Seward said, engage in 'guerrilla warfare' under Van Buren. . . . This launching of the modern Republican party was, strangely enough, to include in New York few besides Democrats."—E. M. Shepard, *Martin Van Buren, ch.* 11.—"The Buffalo Convention was one of the more important upheavals in the process of political disintegration which went steadily on between the years 1844, when the 'Birneyites' deprived Henry Clay of the electoral vote of New York, and 1856, when the Whig party disappeared, and the pro-slavery Democracy found itself confronted by the anti-slavery Republican organization of the North. In 1848, though the Whig party was already doomed, its time had not yet come. The Free Soil movement of 1848 was, therefore, premature; and moreover, as the result afterwards showed, there was something almost ludicrous in a combination of 'Conscience Whigs' of Massachusetts, in revolt over the nomination of the slave-owning General Taylor, with the 'Barnburning' Democrats of New York, intent only upon avenging on Cass the defeat of Van Buren. None the less the Free Soil movement of 1848 clearly foreshadowed the Republican uprising of 1856, and of the men who took part in the Buffalo convention an unusually large proportion afterwards became prominent as political leaders."—C. F. Adams, *Richard Henry Dana, v.* 1, *ch.* 7.

Also in: H. Wilson, *Hist. of the Rise and Fall of the Slave Power in Am., v.* 2, *ch.* 13.—J. W. Schuckers, *Life of Salmon P. Chase, ch.* 11.—R. B. Warden, *Life of Salmon P. Chase, ch.* 21.

A. D. 1848-1849.—Sixteenth Presidential Election.—Inauguration and death of General Taylor.—In the Presidential election of 1848, the Democratic party put forward as its candidate Lewis Cass; the Whigs named General Zachary Taylor; and the Free Soil Party placed Martin Van Buren in nomination. That the Whig Party should again have set aside its distinguished leader, Henry Clay, caused great grief among his devoted followers and friends. "But there were those in it who had grown gray in waiting for office under the banner of Mr. Clay, and whose memories were refreshed with what was effected by the éclat of military glory under General Jackson. It was hard, and might seem ungrateful, to abandon a great and long-tried leader. But the military feather waved before their eyes, and they were tempted. . . . It needed a leader, or a few leaders to give the signal of defection; and they were not wanting. One after another of the great names of the party fell off from Mr. Clay and inclined to General Taylor; and when the national Whig Convention met at Philadelphia, in June, 1848, to nominate a candidate for the Presidency, the first ballot showed that seven out of twelve of the Kentucky delegation, against the expectations and wishes of their constituency, had deserted Mr. Clay, and gone over to General Taylor. The influence of this fact was great—perhaps decisive. For if Mr. Clay's own State was against him, what could be expected of the other States? On the fourth ballot General Taylor had 52 majority, and was declared the nominee. . . . In November following, General Taylor was elected President of the United States, and Millard Fillmore Vice-President. As in the case of General Harrison, who died in thirty days after his inauguration, so in the case of General Taylor . . . he, too, died in sixteen months after he had entered on the duties of his office."—C. Colton, *Life, Corr. and Speeches of Henry Clay, v.* 3, *ch.* 4.—The popular vote cast at the election was, for Taylor, 1,360,099; Cass, 1,220,544; for Van Buren, 291,263. The electoral vote was, for Taylor, 163; for Cass, 127; for Van Buren, none. Millard Fillmore, elected Vice President, succeeded to the Presidency on the death of General Taylor, July 9, 1850.—O. O. Howard, *General Taylor, ch.* 21-24.

A. D. 1850.—The Seventh Census.—Total population, 23,191,876, nearly 36 per cent. greater than in 1840. The remnant of slavery in the northern States which appears in this census, still lingering in New Jersey, was not quite extinguished in the succeeding decade. The classification and distribution of population was as follows:

North.	White.	Free black.	Slave.
California	91,635	962	....
Connecticut	363,099	7,693	....
Illinois	846,034	5,436	....
Indiana	977,154	11,262	....
Iowa	191,881	333	....
Maine	581,813	1,356	....
Massachusetts	985,450	9,064	....
Michigan	395,071	2,583	....
Minnesota	6,038	39	....
New Hampshire	317,456	520	....
New Jersey	465,509	23,810	236
New York	3,048,325	49,069	....
Ohio	1,955,050	25,279	....
Oregon	13,087	207	....
Pennsylvania	2,258,160	53,626	....
Rhode Island	143,875	3,670	....
Utah	11,354	....	26
Vermont	313,402	718	....
Wisconsin	304,756	635	....
	13,269,149	196,262	262

South.	White.	Free black.	Slave.
Alabama	426,514	2,265	342,844
Arkansas	162,189	608	47,100
Delaware	71,169	18,073	2,290
District of Columbia	37,941	10,059	3,687
Florida	47,203	932	39,310
Georgia	521,572	2,931	381,682
Kentucky	761,413	10,011	210,981
Louisiana	255,491	17,462	244,809
Maryland	417,943	74,723	90,368
Mississippi	295,718	930	309,878
Missouri	592,004	2,618	87,422
New Mexico	61,547	....	....
North Carolina	553,028	27,463	288,548
South Carolina	274,563	8,960	384,984
Tennessee	756,836	6,422	239,459
Texas	154,034	397	58,161
Virginia	894,800	54,333	472,528
	6,283,965	238,187	3,204,051

The immigration in the decade preceding this census had risen to 1,713,251 in number of persons, 1,047,763 coming from the British Islands (mostly from Ireland), and 549,739 from other parts of Europe.

A. D. 1850 (March).—Henry Clay's last "Compromise."—California, and the Fugitive Slave Law.—Webster's 7th of March Speech and Seward's Declaration of the "Higher Law."—"In 1848 gold was discovered in California. The tide of adventurers poured in. They had no slaves to take with them and no desire to acquire any. In less than a year the newly gathered people outnumbered the population of some of the smaller states. They organized a state government with an anti-slavery constitution, and demanded admission into the Union. True, the greater part of the proposed state lies north of 36° 30′ [the dividing line of the Missouri Compromise], but its climate, tempered by the Pacific Ocean, is of rare mildness. If any part of the newly acquired territory should be opened to slavery, it seemed that California was the part best suited for it. If California repelled slavery, there was small hope that the remainder of the new territory would embrace it. Congress debated for ten months over the admission of California. The threatened inequality in numbers of the free and slave states was the central subject of contention, and the Union seemed again in danger of disruption."—J. S. Landon, *Const. Hist. and Gov't of the U. S., lect.* 8.—"One day toward the close of January [January 29, 1850], Henry Clay rose from his chair in the Senate Chamber, and waving a roll of papers, with dramatic eloquence and deep feeling, announced to a hushed auditory that he held in his hand a series of resolutions proposing an amicable arrangement of all questions growing out of the subject of slavery. Read and explained by its author this plan of compromise was to admit California, and to establish territorial governments in New Mexico, and the other portions of the regions acquired from Mexico, without any provisions for or against slavery—to pay the debt of Texas and fix her western boundary—to declare that it was 'inexpedient' to abolish slavery in the District of Columbia, but 'expedient' to put some restrictions on the slave trade there, to pass a new and more stringent fugitive slave law, and to formally deny that Congress had any power to obstruct the slave trade between the States. Upon this plan of compromise and the modifications afterward made in it, began that long debate, since become historic, which engrossed the attention of Congress and the country for eight weary months. At the outset, many of those who had threatened 'Disunion,' opposed 'Clay's Compromise,' because it did not go far enough, while the 'Wilmot Proviso' men were equally resolute in opposing it, because it went too far. Seward with many other Northern Whigs, adhered to the 'President's Plan' [which simply favored the admission of California and New Mexico under constitutions which he had invited their people to frame], as being a much more just and speedy way of solving the problem. Avowing himself unterrified by the threats of 'Disunion,' he insisted that neither 'Compromise' nor the 'Fugitive Slave Law' was necessary, and that it was both the right and the duty of Congress to admit the Territories as free States, to abolish slavery in the District of Columbia, and the slave trade between the States. Southern feeling was predominant in the Senate Chamber, as it had been for many years. Neither of the two great parties was opposed to slavery, and the recognized leaders of both were men of Southern birth. . . . Mr. Clay's resolutions, unsatisfactory as they were, to anti-slavery men, at first met with objections from Southern members. One 'deeply regretted the admission that slavery did not exist in the territories.' Several would 'never assent to the doctrine that slaveholders could not go there, taking their property with them.' Some questioned the validity of the Mexican decree, abolishing slavery in New Spain, and doubted the constitutionality of any attempt on the part of Congress to exclude it. Prognostications and threats of 'disunion' were

freely made. On the other hand, there began to be signs of a growing disposition, on the part of many Northern men, to give up the 'Proviso' for the sake of peace; and to follow the lead of Mr. Clay. Conservative Southern Whigs were quite ready to meet these half way. Seward's position was regarded as 'ultra' by both classes; and it not unfrequently happened that, on questions in the Senate relating to slavery, only three Senators, Seward, Chase, and Hale, would be found voting together, on one side, while all the other Senators present were arrayed against them, on the other. Newspapers, received from all parts of the country, showed that elsewhere, as well as at the capital, the proposed compromise was an engrossing topic. Great meetings were held at the North in support of it. State Legislatures took ground, for and against it. Fresh fuel was added to the heated discussion by a new 'Fugitive Slave Law,' introduced by Senator Mason of Virginia, and by the talk of Southern Conventions, and 'Secret Southern Caucuses.' . . . March was an eventful month. Time enough had elapsed for each Senator to receive, from the press and people of his State, their response, in regard to Clay's proposed compromise. Resolutions pro and con had come from different Legislatures. . . . Each of the leaders in senatorial debate felt that the hour had come for him to declare whether he was for or against it. . . . Mr. Calhoun, though in failing health, obtained the floor for a speech. Everybody awaited it with great interest, regarding him as the acknowledged exponent of Southern opinion. . . . An expectant throng filled the Senate Chamber. His gaunt figure and attenuated features attested that he had risen from a sick bed; but his fiery eyes and unshaken voice showed he had no intention of abandoning the contest. In a few words he explained that his health would not permit him to deliver the speech he had prepared, but that 'his friend the Senator behind him (Mason) would read it for him.' Beginning by saying that he had 'believed from the first that the agitation of the subject of slavery would, if not prevented by some timely and effective measure, end in "disunion,"'—the speech opposed Clay's plan of adjustment; attacked the President's plan; adverted to the growing feeling that the South could not remain in Union 'with safety and honor'; pointed out the gradual snapping, one after another, of the links which held the Union together, and expressed the most gloomy forebodings for the future. Three days later a similar, or greater, throng gathered to listen to Webster's great '7th of March speech,' which has ever since been recorded as marking an era in his life. He rose from his seat near the middle of the chamber, wearing his customary blue coat with metal buttons, and with one hand thrust into the buff vest, stood during his opening remarks, as impassive as a statue; but growing slightly more animated as he proceeded. Calm, clear, and powerful, his sonorous utterances, while they disappointed thousands of his friends at the North, lent new vigor to the 'Compromisers,' with whom, it was seen, he would henceforth act."—F. W. Seward, *Seward at Washington*, 1846–1861, *ch.* 16.—The first and longer part of Mr. Webster's speech was an historical review of the slavery question, and an argument maintaining the proposition, as he afterwards stated it in a few words, that there is "not a square rod of territory belonging to the United States the character of which, for slavery, or no slavery is not already fixed by some irrepealable law." The concluding part of his speech contained the passages which caused most grief among and gave most offense to his friends and admirers at the North. They are substantially comprised in the quotations following,—together with his eloquent declamation against the thought of secession: "Mr. President, in the excited times in which we live, there is found to exist a state of crimination and recrimination between the North and South. There are lists of grievances produced by each; and those grievances, real or supposed, alienate the minds of one portion of the country from the other, exasperate the feelings, and subdue the sense of fraternal affection, patriotic love, and mutual regard. I shall bestow a little attention, Sir, upon these various grievances existing on the one side and on the other. I begin with complaints of the South. I will not answer, further than I have, the general statements of the honorable Senator from South Carolina, that the North has prospered at the expense of the South in consequence of the manner of administering this government, in the collecting of its revenues, and so forth. These are disputed topics, and I have no inclination to enter into them. But I will allude to other complaints of the South, and especially to one which has in my opinion just foundation; and that is, that there has been found at the North, among individuals and among legislators, a disinclination to perform fully their constitutional duties in regard to the return of persons bound to service who have escaped into the free States. In that respect, the South, in my judgment, is right, and the North is wrong. Every member of every Northern legislature is bound by oath, like every other officer in the country, to support the Constitution of the United States; and the article of the Constitution which says to these States that they shall deliver up fugitives from service is as binding in honor and conscience as any other article. No man fulfils his duty in any legislature who sets himself to find excuses, evasions, escapes from this constitutional obligation. I have always thought that the Constitution addressed itself to the legislatures of the States or to the States themselves. It says that those persons escaping to other States 'shall be delivered up,' and I confess I have always been of the opinion that it was an injunction upon the States themselves. When it is said that a person escaping into another State, and coming therefore within the jurisdiction of that State, shall be delivered up, it seems to me the import of the clause is, that the State itself, in obedience to the Constitution, shall cause him to be delivered up. That is my judgment. I have always entertained that opinion, and I entertain it now. But when the subject, some years ago, was before the Supreme Court of the United States, the majority of the judges held that the power to cause fugitives from service to be delivered up was a power to be exercised under the authority of this government. I do not know, on the whole, that it may not have been a fortunate decision. My habit is to respect the result of judicial deliberations and the solemnity of judicial decisions. As it now stands, the business of seeing

that these fugitives are delivered up resides in the power of Congress and the national judicature, and my friend at the head of the Judiciary Committee has a bill on the subject now before the Senate, which with some amendments to it, I propose to support, with all its provisions, to the fullest extent. And I desire to call the attention of all sober-minded men at the North, of all conscientious men, of all men who are not carried away by some fanatical idea or some false impression, to their constitutional obligations. I put it to all the sober and sound minds at the North as a question of morals and a question of conscience. What right have they, in their legislative capacity or any other capacity, to endeavor to get round this Constitution, or to embarrass the free exercise of the rights secured by the Constitution to the persons whose slaves escape from them? None at all; none at all. Neither in the forum of conscience, nor before the face of the Constitution, are they, in my opinion, justified in such an attempt. . . . I repeat, therefore, Sir, that here is a well-founded ground of complaint against the North, which ought to be removed, which it is now in the power of the different departments of this government to remove; which calls for the enactment of proper laws authorizing the judicature of this government, in the several States, to do all that is necessary for the recapture of fugitive slaves and for their restoration to those who claim them. . . . Complaint has been made against certain resolutions that emanate from legislatures at the North, and are sent here to us, not only on the subject of slavery in this District, but sometimes recommending Congress to consider the means of abolishing slavery in the States. I should be sorry to be called upon to present any resolutions here which could not be referable to any committee or any power in Congress; and therefore I should be unwilling to receive from the legislature of Massachusetts any instructions to present resolutions expressive of any opinion whatever on the subject of slavery, as it exists at the present moment in the States, for two reasons: first, because I do not consider that the legislature of Massachusetts has anything to do with it; and next, because I do not consider that I, as her representative here, have anything to do with it. It has become, in my opinion, quite too common; and if the legislatures of the States do not like that opinion, they have a great deal more power to put it down than I have to uphold it; it has become in my opinion quite too common a practice for the State legislatures to present resolutions here on all subjects and to instruct us on all subjects. There is no public man that requires instruction more than I do, or who requires information more than I do, or desires it more heartily; but I do not like to have it in too imperative a shape. . . . Then Sir, there are the Abolition societies, of which I am unwilling to speak, but in regard to which I have very clear notions and opinions. I do not think them useful. I think their operations for the last twenty years have produced nothing good or valuable. At the same time, I believe thousands of their members to be honest and good men, perfectly well-meaning men. They have excited feelings; they think they must do something for the cause of liberty; and, in their sphere of action, they do not see what else they can do than to contribute to an Abolition press, or an Abolition society, or to pay an Abolition lecturer. I do not mean to impute gross motives even to the leaders of these societies, but I am not blind to the consequences of their proceedings. I cannot but see what mischiefs their interference with the South has produced. And is it not plain to every man? Let any gentleman who entertains doubts on this point recur to the debates in the Virginia House of Delegates in 1832, and he will see with what freedom a proposition made by Mr. Jefferson Randolph for the gradual abolition of slavery was discussed in that body. Every one spoke of slavery as he thought; very ignominious and disparaging names and epithets were applied to it. The debates in the House of Delegates on that occasion, I believe, were all published. They were read by every colored man who could read, and to those who could not read, those debates were read by others. At that time Virginia was not unwilling or afraid to discuss this question, and to let that part of her population know as much of the discussion as they could learn. That was in 1832. As has been said by the honorable member from South Carolina, these Abolition societies commenced their course of action in 1835. It is said, I do not know how true it may be, that they sent incendiary publications into the slave States; at any rate, they attempted to arouse, and did arouse, a very strong feeling; in other words they created great agitation in the North against Southern slavery. Well, what was the result? The bonds of the slaves were bound more firmly than before, their rivets were more strongly fastened. Public opinion, which in Virginia had begun to be exhibited against slavery, and was opening out for the discussion of the question, drew back and shut itself up in its castle. I wish to know whether any body in Virginia can now talk openly as Mr. Randolph, Governor McDowell, and others talked in 1832, and sent their remarks to the press? We all know the fact, and we all know the cause; and everything that these agitating people have done has been, not to enlarge, but to restrain, not to set free, but to bind faster, the slave population of the South. Again, Sir, the violence of the Northern press is complained of. The press violent! Why, Sir, the press is violent everywhere. There are outrageous reproaches in the North against the South, and there are reproaches as vehement in the South against the North. Sir, the extremists of both parts of this country are violent; they mistake loud and violent talk for eloquence and for reason. They think that he who talks loudest reasons best. And this we must expect, when the press is free, as it is here, and I trust always will be. . . . Well, in all this I see no solid grievance, no grievance presented by the South, within the redress of the government, but the single one to which I have referred; and that is, the want of a proper regard to the injunction of the Constitution for the delivery of fugitive slaves. There are also complaints of the North against the South. I need not go over them particularly. The first and gravest is, that the North adopted the Constitution, recognizing the existence of slavery in the States, and recognizing the right, to a certain extent, of the representation of slaves in Congress, under a state of sentiment and expectation which does not now exist; and that, by events, by circumstances, by the eagerness of

the South to acquire territory and extend her slave population, the North finds itself, in regard to the relative influence of the South and the North, of the free States and the slave States, where it never did expect to find itself when they agreed to the compact of the Constitution. They complain, therefore, that, instead of slavery being regarded as an evil, as it was then, an evil which all hoped would be extinguished gradually, it is now regarded by the South as an institution to be cherished, and preserved, and extended; an institution which the South has already extended to the utmost of her power by the acquisition of new territory. Well, then, passing from that, every body in the North reads; and every body reads whatsoever the newspapers contain; and the newspapers, some of them, especially those presses to which I have alluded, are careful to spread about among the people every reproachful sentiment uttered by any Southern man bearing at all against the North; every thing that is calculated to exasperate and to alienate; and there are many such things, as every body will admit, from the South, or some portion of it, which are disseminated among the reading people; and they do exasperate, and alienate, and produce a most mischievous effect upon the public mind at the North. Sir, I would not notice things of this sort appearing in obscure quarters; but one thing has occurred in this debate which struck me very forcibly. An honorable member from Louisiana addressed us the other day on this subject. I suppose there is not a more amiable and worthy gentleman in this chamber, nor a gentleman who would be more slow to give offence to any body, and he did not mean in his remarks to give offence. But what did he say? Why, Sir, he took pains to run a contrast between the slaves of the South and the laboring people of the North, giving the preference, in all points of condition, and comfort, and happiness, to the slaves of the South. The honorable member, doubtless, did not suppose that he gave any offence, or did any injustice. He was merely expressing his opinion. But does he know how remarks of that sort will be received by the laboring people of the North? Why, who are the laboring people of the North? They are the whole North. They are the people who till their own farms with their own hands; freeholders, educated men, independent men. Let me say, Sir, that five sixths of the whole property of the North is in the hands of the laborers of the North; they cultivate their farms, they educate their children, they provide the means of independence. . . . There is a more tangible and irritating cause of grievance at the North. Free blacks are constantly employed in the vessels of the North, generally as cooks or stewards. When the vessel arrives at a Southern port, these free colored men are taken on shore, by the police or municipal authority, imprisoned, and kept in prison till the vessel is again ready to sail. This is not only irritating, but exceedingly unjustifiable and oppressive. Mr. Hoar's mission, some time ago, to South Carolina, was a well-intended effort to remove this cause of complaint. The North thinks such imprisonments illegal and unconstitutional; and as the cases occur constantly and frequently, they regard it as a great grievance. Now, Sir, so far as any of these grievances have their foundation in matters of law, they can be redressed, and ought to be redressed; and so far as they have their foundation in matters of opinion, in sentiment, in mutual crimination and recrimination, all that we can do is to endeavor to allay the agitation, and cultivate a better feeling and more fraternal sentiments between the South and the North. Mr. President, I should much prefer to have heard from every member on this floor declarations of opinion that this Union could never be dissolved, than the declaration of opinion by any body, that, in any case, under the pressure of any circumstances, such a dissolution was possible. I hear with distress and anguish the word 'secession,' especially when it falls from the lips of those who are patriotic, and known to the country, and known all over the world, for their political services. Secession! Peaceable secession! Sir, your eyes and mine are never destined to see that miracle. The dismemberment of this vast country without convulsion! The breaking up of the fountains of the great deep without ruffling the surface! Who is so foolish, I beg every body's pardon, as to expect to see any such thing? Sir, he who sees these States, now revolving in harmony around a common centre, and expects to see them quit their places and fly off without convulsion, may look the next hour to see the heavenly bodies rush from their spheres, and jostle against each other in the realms of space, without causing the wreck of the universe. There can be no such thing as a peaceable secession. Peaceable secession is an utter impossibility. Is the great Constitution under which we live, covering this whole country, is it to be thawed and melted away by secession, as the snows on the mountain melt under the influence of a vernal sun, disappear almost unobserved, and run off? No, Sir! No, Sir! I will not state what might produce the disruption of the Union; but, Sir, I see as plainly as I see the sun in heaven what that disruption itself must produce; I see that it must produce war, and such a war as I will not describe, in its twofold character. Peaceable secession! Peaceable secession! The concurrent agreement of all the members of this great republic to separate! A voluntary separation, with alimony on one side and on the other. Why, what would be the result? Where is the line to be drawn? What States are to secede? What is to remain American? What am I to be? An American no longer? Am I to become a sectional man, a local man, a separatist, with no country in common with the gentlemen who sit around me here, or who fill the other house of Congress? Heaven forbid! Where is the flag of the republic to remain? Where is the eagle still to tower? or is he to cower, and shrink, and fall to the ground? Why, Sir, our ancestors, our fathers, and our grandfathers, those of them that are yet living amongst us with prolonged lives, would rebuke and reproach us; and our children and our grandchildren would cry out shame upon us, if we of this generation should dishonor these ensigns of the power of the government and the harmony of that Union which is every day felt among us with so much joy and gratitude. . . . Sir, nobody can look over the face of this country at the present moment, nobody can see where its population is the most dense and growing, without being ready to admit, and compelled to admit, that ere long the strength of America

will be in the Valley of the Mississippi. Well, now, Sir, I beg to inquire what the wildest enthusiast has to say on the possibility of cutting that river in two, and leaving free States at its source and on it branches, and slave States down near its mouth, each forming a separate government? . . . To break up this great government! to dismember this glorious country! To astonish Europe with an act of folly such as Europe for two centuries has never beheld in any government or any people! No, Sir! no, Sir! There will be no secession! Gentlemen are not serious when they talk of secession."—Daniel Webster, *Works, v.* 5, *p.* 324.—"The speech, if exactly defined, is, in reality, a powerful effort, not for compromise or for the Fugitive Slave Law, or any other one thing, but to arrest the whole anti-slavery movement, and in that way put an end to the dangers which threatened the Union and restore lasting harmony between the jarring sections. It was a mad project. Mr. Webster might as well have attempted to stay the incoming tide at Marshfield with a rampart of sand as to seek to check the anti-slavery movement by a speech. Nevertheless, he produced a great effect. . . . The blow fell with terrible force, and here . . . we come to the real mischief which was wrought. The 7th of March speech demoralized New England and the whole North. The abolitionists showed by bitter anger the pain, disappointment, and dismay which this speech brought. The Free-Soil party quivered and sank for the moment beneath the shock. The whole anti-slavery movement recoiled. The conservative reaction which Mr. Webster endeavored to produce came and triumphed. Chiefly by his exertions the compromise policy was accepted and sustained by the country. The conservative elements everywhere rallied to his support, and by his ability and eloquence it seemed as if he had prevailed and brought the people over to his opinions. It was a wonderful tribute to his power and influence, but the triumph was hollow and short-lived. He had attempted to compass an impossibility. Nothing could kill the principles of human liberty, not even a speech by Daniel Webster, backed by all his intellect and knowledge, his eloquence and his renown. The anti-slavery movement was checked for the time, and pro-slavery democracy, the only other positive political force, reigned supreme. But amid the falling ruins of the Whig party, and the evanescent success of the Native Americans, the party of human rights revived; and when it rose again, taught by the trials and misfortunes of 1850, it rose with a strength which Mr. Webster had never dreamed of."—H. C. Lodge, *Daniel Webster, ch.* 9.—"A public meeting in Faneuil Hall condemned the action of Webster. Theodore Parker, who was one of the principal speakers, said: 'I know no deed in American history done by a son of New England to which I can compare this but the act of Benedict Arnold. . . . The only reasonable way in which we can estimate this speech is as a bid for the presidency.' In the main, the Northern Whig press condemned the salient points of the speech. . . . Whittier, in a song of plaintive vehemence called 'Ichabod,' mourned for the 'fallen' statesman whose faith was lost, and whose honor was dead. . . . This was the instant outburst of opinion; but friends for Webster and his cause came with more deliberate reflections. . . . When the first excitement had subsided, the friends of Webster bestirred themselves, and soon testimonials poured in, approving the position which he had taken. The most significant of them was the one from eight hundred solid men of Boston, who thanked him for 'recalling us to our duties under the Constitution,' and for his 'broad national and patriotic views.' The tone of many of the Whig papers changed, some to positive support, others to more qualified censure. The whole political literature of the time is full of the discussion of this speech and its relation to the compromise. It is frequently said that a speech in Congress does not alter opinions; that the minds of men are determined by set political bias or sectional considerations. This was certainly not the case in 1850. Webster's influence was of the greatest weight in the passage of the compromise measures, and he is as closely associated with them as is their author. Clay's adroit parliamentary management was necessary to carry them through the various and tedious steps of legislation. But it was Webster who raised up for them a powerful and much-needed support from Northern public sentiment. At the South the speech was cordially received; the larger portion of the press commended it with undisguised admiration. . . . On the 11th of March, Seward spoke. . . . When Seward came to the territorial question, his words created a sensation. 'We hold,' he said, 'no arbitrary authority over anything, whether acquired lawfully or seized by usurpation. The Constitution regulates our stewardship; the Constitution devotes the domain (i. e. the territories not formed into States) to union, to justice, to defence, to welfare, and to liberty. But there is a higher law than the Constitution, which regulates our authority over the domain, and devotes it to the same noble purposes. The territory is a part, no inconsiderable part, of the common heritage of mankind, bestowed upon them by the Creator of the Universe. We are his stewards, and must so discharge our trust as to secure in the highest attainable degree their happiness.' This remark about 'a higher law,' while far inferior in rhetorical force to Webster's 'I would not take pains uselessly to reaffirm an ordinance of Nature, nor to re-enact the will of God,' was destined to have transcendent moral influence. A speech which can be condensed into an aphorism is sure to shape convictions. These, then, are the two maxims of this debate; the application of them shows the essential points of the controversy."—J. F. Rhodes, *History of the United States from the Compromise of* 1850, *v.* 1, *ch.* 2.—In the political controversies which accompanied and followed the introduction of the Compromise measures, the Whigs who supported the Compromise were called "Silver-Grays," or "Snuff-Takers," and those who opposed it were called "Woolly-Heads," or "Seward-Whigs."

A. D. 1850 (April—September).—Mr. Clay's last compromise.—The Fugitive Slave Law as passed.—On the 17th of April, "a select committee of the Senate, headed by Mr. Clay, reported a bill consisting of 39 sections, embodying most of the resolutions which had been discussed. From its all-comprehensive nature it was called the Omnibus Bill. The points comprehended in the omnibus bill were as

follows: 1st. When new states formed out of Texas present themselves, it shall be the duty of Congress to admit them; 2d. The immediate admission of California, with the boundaries which she has proposed; 3d. The establishment of territorial governments for Utah and New Mexico, without the Wilmot proviso; 4th. The combination of points 2 and 3 in one bill; 5th. The excission from Texas of all New Mexico, rendering therefor a pecuniary equivalent; 6th. The enactment of a law for the effectual rendition of fugitive slaves escaping into the free states; 7th. No interference with slavery in the District of Columbia, but the slave trade therein should be abolished, under heavy penalties. This bill was discussed until the last of July, and then passed by the Senate, but it had been so pruned by successive amendments that it contained only a provision for the organization of a territorial government for Utah. In this condition it was sent to the House. There, as a whole, the bill was rejected, but its main heads were passed in August as separate bills, and were designated the compromise measures of 1850, and, in their accepted shape, required: (1) Utah and New Mexico to be organized into territories, without reference to slavery; (2) California to be admitted as a free state; (3) $10,000,000 to be paid to Texas for her claim to New Mexico; (4) fugitive slaves to be returned to their masters; and (5) the slave trade to be abolished in the District of Columbia. The compromises were received by the leaders of the two great parties as a final settlement of the vexed questions which had so long troubled Congress and agitated the country, but the storm was only temporarily allayed. In accordance with these measures California became a state of the Union September 9, 1850. The most important feature of this bill, in its bearing upon future struggles and conflicts, was the fugitive slave law. . . . In the midst of the discussion of these topics occurred the death of the President, July 9, 1850, one year and four months after his inauguration. . . . Mr. Fillmore was inaugurated on the 10th of July, 1850. He departed from the policy of his predecessor, organized a new cabinet, used his influence in favor of the compromise measures," and gave his signature to the Fugitive Slave Law.—W. R. Houghton, *Hist. of Am. Politics, ch.* 15.—"It was apparent to every one who knew anything of the sentiments of the North that this law could not be executed to any extent. Seward had truly said that if the South wished their runaway negroes returned they must alleviate, not increase, the rigors of the law of 1793; and to give the alleged fugitive a jury trial, as Webster proposed, was the only possible way to effect the desired purpose. If we look below the surface we shall find a strong impelling motive of the Southern clamor for this harsh enactment other than the natural desire to recover lost property. Early in the session it took air that a part of the game of the disunionists was to press a stringent fugitive slave law, for which no Northern man could vote; and when it was defeated, the North would be charged with refusing to carry out a stipulation of the Constitution. Douglas stated in the Senate that while there was some ground for complaint on the subject of surrender of fugitives from service, it had been greatly exaggerated. The excitement and virulence were not along the line bordering on the free and slave States, but between Vermont and South Carolina, New Hampshire and Alabama, Connecticut and Louisiana. Clay gave vent to his astonishment that Arkansas, Louisiana, Georgia, and South Carolina, States which very rarely lost a slave, demanded a stricter law than Kentucky, which lost many. After the act was passed Senator Butler, of South Carolina, said: 'I would just as soon have the law of 1793 as the present law, for any purpose, so far as regards the reclamation of fugitive slaves;' and another Southern ultra never thought it would be productive of much good to his section. Six months after the passage of the law, Seward expresses the matured opinion 'that political ends — merely political ends — and not real evils, resulting from the escape of slaves, constituted the prevailing motives to the enactment.'"—J. F. Rhodes, *History of the U. S. from the Compromise of* 1850, *ch.* 2 (*v.* 1).—"The fugitive-slave law was to make the citizens of the Free States do for the slave-holders what not a few of the slave-holders were too proud to do for themselves. Such a law could not but fail. But then it would increase the exasperation of the slave-holders by its failure, while exasperating the people of the Free States by the attempts at enforcement. Thus the compromise of 1850, instead of securing peace and harmony, contained in the most important of its provisions the seeds of new and greater conflicts. One effect it produced which Calhoun had clearly predicted when he warned the slave-holding states against compromises as an invention of the enemy: it adjourned the decisive conflict until the superiority of the North over the South in population and material resources was overwhelming."—C. Schurz, *Life of Henry Clay, ch.* 26 (*v.* 2).

The following is the complete text of the Fugitive Slave Law:

"An act to amend, and supplementary to, the Act entitled 'An Act respecting Fugitives from Justice, and Persons escaping from the Service of their Masters,' approved February twelfth, one thousand seven hundred and ninety-three.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the persons who have been, or may hereafter be, appointed commissioners, in virtue of any act of Congress, by the Circuit Courts of the United States, and who, in consequence of such appointment, are authorized to exercise the powers that any justice of the peace, or other magistrate of any of the United States, may exercise in respect to offenders for any crime or offence against the United States, by arresting, imprisoning, or bailing the same under and by virtue of the thirty-third section of the act of the twenty-fourth of September seventeen hundred and eighty-nine, entitled 'An Act to establish the judicial courts of the United States,' shall be, and are hereby, authorized and

required to exercise and discharge all the powers and duties conferred by this act.

SEC. 2. And be it further enacted, That the Superior Court of each organized Territory of the United States shall have the same power to appoint commissioners to take acknowledgments of bail and affidavits, and to take depositions of witnesses in civil causes, which is now possessed by the Circuit Court of the United States; and all commissioners who shall hereafter be appointed for such purposes by the Superior Court of any organized Territory of the United States, shall possess all the powers, and exercise all the duties, conferred by law upon the commissioners appointed by the Circuit Courts of the United States for similar purposes, and shall moreover exercise and discharge all the powers and duties conferred by this act.

SEC. 3. And be it further enacted, That the Circuit Courts of the United States, and the Superior Courts of each organized Territory of the United States, shall from time to time enlarge the number of commissioners, with a view to afford reasonable facilities to reclaim fugitives from labor, and to the prompt discharge of the duties imposed by this act.

SEC. 4. And be it further enacted, That the commissioners above named shall have concurrent jurisdiction with the judges of the Circuit and District Courts of the United States, in their respective circuits and districts within the several States, and the judges of the Superior Courts of the Territories, severally and collectively, in term-time and vacation; and shall grant certificates to such claimants, upon satisfactory proof being made, with authority to take and remove such fugitives from service or labor, under the restrictions herein contained, to the State or Territory from which such persons may have escaped or fled.

SEC. 5. And be it further enacted, That it shall be the duty of all marshals and deputy marshals to obey and execute all warrants and precepts issued under the provisions of this act, when to them directed; and should any marshal or deputy marshal refuse to receive such warrant, or other process, when tendered, or to use all proper means diligently to execute the same, he shall, on conviction thereof, be fined in the sum of one thousand dollars, to the use of such claimant, on the motion of such claimant by the Circuit or District Court for the district of such marshal; and after arrest of such fugitive, by such marshal or his deputy, or whilst at any time in his custody under the provisions of this act, should such fugitive escape, whether with or without the assent of such marshal or his deputy, such marshal shall be liable, on his official bond, to be prosecuted for the benefit of such claimant, for the full value of the service or labor of said fugitive in the State, Territory, or District whence he escaped: and the better to enable the said commissioners, when thus appointed, to execute their duties faithfully and efficiently, in conformity with the requirements of the Constitution of the United States and of this act, they are hereby authorized and empowered, within their counties respectively, to appoint, in writing under their hands, any one or more suitable persons, from time to time, to execute all such warrants and other process as may be issued by them in the lawful performance of their respective duties; with authority to such commissioners, or the persons to be appointed by them, to execute process as aforesaid, to summon and call to their aid the bystanders, or posse comitatus of the proper county, when necessary to insure a faithful observance of the clause of the Constitution referred to, in conformity with the provisions of this act; and all good citizens are hereby commanded to aid and assist in the prompt and efficient execution of this law, whenever their services may be required, as aforesaid, for that purpose; and said warrants shall run, and be executed by said officers, anywhere in the State within which they are issued.

SEC. 6. And be it further enacted, That when a person held to service or labor in any State or Territory of the United States, has heretofore or shall hereafter escape into another State or Territory of the United States, the person or persons to whom such service or labor may be due, or his, her, or their agent or attorney, duly authorized, by power of attorney, in writing, acknowledged and certified under the seal of some legal officer or court of the State or Territory in which the same may be executed, may pursue and reclaim such fugitive person, either by procuring a warrant from some one of the courts, judges, or commissioners aforesaid, of the proper circuit, district, or county, for the apprehension of such fugitive from service or labor, or by seizing and arresting such fugitive, where the same can be done without process, and by taking, or causing such person to be taken, forthwith before such court, judge, or commissioner, whose duty it shall be to hear and determine the case of such claimant in a summary manner; and upon satisfactory proof being made, by deposition or affidavit, in writing, to be taken and certified by such court, judge, or commissioner, or by other satisfactory testimony, duly taken and certified by some court, magistrate, justice of the peace, or other legal officer authorized to administer an oath and take depositions under the laws of the State or Territory from which such person owing service or labor may have escaped, with a certificate of such magistracy or other authority, as aforesaid, with the seal of the proper court or officer thereto attached, which seal shall be sufficient to establish the competency of the proof, and with proof, also by affidavit, of the identity of the person whose service or labor is claimed to be due as aforesaid, that the person so arrested does in fact owe service or labor to the person or persons claiming him or her, in the State or Territory from which such fugitive may have escaped as aforesaid, and that said person escaped, to make out and deliver to such claimant, his or her agent or attorney, a certificate setting forth the substantial facts as to the service or labor due from such fugitive to the claimant, and of his or her escape from the State or Territory in which such service or labor was due, to the State or Territory in which he or she was arrested, with authority to such claimant, or his or her agent or attorney, to use such reasonable force and restraint as may be necessary, under the circumstances of the case, to take and remove such fugitive person back to the State or Territory whence he or she may have escaped as aforesaid. In no trial or hearing under this act shall the testimony of such alleged fugitive be admitted in evidence; and the certificates in this and the first [fourth] section mentioned, shall be conclusive of the right of the person or persons in

whose favor granted, to remove such fugitive to the State or Territory from which he escaped, and shall prevent all molestation of such person or persons by any process issued by any court, judge, magistrate, or other person whomsoever.

SEC. 7. And be it further enacted, That any person who shall knowingly and willingly obstruct, hinder, or prevent such claimant, his agent or attorney, or any person or persons lawfully assisting him, her, or them, from arresting such a fugitive from service or labor, either with or without process as aforesaid, or shall rescue, or attempt to rescue, such fugitive from service or labor, from the custody of such claimant, his or her agent or attorney, or other person or persons lawfully assisting as aforesaid, when so arrested, pursuant to the authority herein given and declared; or shall aid, abet, or assist such person so owing service or labor as aforesaid, directly or indirectly, to escape from such claimant, his agent or attorney, or other person or persons legally authorized as aforesaid; or shall harbor or conceal such fugitive, so as to prevent the discovery and arrest of such person, after notice or knowledge of the fact that such person was a fugitive from service or labor as aforesaid, shall, for either of said offences, be subject to a fine not exceeding one thousand dollars, and imprisonment not exceeding six months, by indictment and conviction before the District Court of the United States for the district in which such offence may have been committed, or before the proper court of criminal jurisdiction, if committed within any one of the organized Territories of the United States; and shall moreover forfeit and pay, by way of civil damages to the party injured by such illegal conduct, the sum of one thousand dollars, for each fugitive so lost as aforesaid, to be recovered by action of debt, in any of the District or Territorial Courts aforesaid, within whose jurisdiction the said offence may have been committed.

SEC. 8. And be it further enacted, That the marshals, their deputies, and the clerks of the said District and Territorial Courts, shall be paid, for their services, the like fees as may be allowed to them for similar services in other cases; and where such services are rendered exclusively in the arrest, custody, and delivery of the fugitive to the claimant, his or her agent or attorney, or where such supposed fugitive may be discharged out of custody for the want of sufficient proof as aforesaid, then such fees are to be paid in the whole by such claimant, his agent or attorney; and in all cases where the proceedings are before a commissioner, he shall be entitled to a fee of ten dollars in full for his services in each case, upon the delivery of the said certificate to the claimant, his or her agent or attorney; or a fee of five dollars in cases where the proof shall not, in the opinion of such commissioner, warrant such certificate and delivery, inclusive of all services incident to such arrest and examination, to be paid, in either case, by the claimant, his or her agent or attorney. The person or persons authorized to execute the process to be issued by such commissioners for the arrest and detention of fugitives from service or labor as aforesaid, shall also be entitled to a fee of five dollars each for each person he or they may arrest and take before any such commissioner as aforesaid, at the instance and request of such claimant, with such other fees as may be deemed reasonable by such commissioner for such other additional services as may be necessarily performed by him or them; such as attending at the examination, keeping the fugitive in custody, and providing him with food and lodging during his detention, and until the final determination of such commissioner; and, in general, for performing such other duties as may be required by such claimant, his or her attorney or agent, or commissioner in the premises, such fees to be made up in conformity with the fees usually charged by the officers of the courts of justice within the proper district or county, as near as may be practicable, and paid by such claimants, their agents or attorneys, whether such supposed fugitives from service or labor be ordered to be delivered to such claimants by the final determination of such commissioners or not.

SEC. 9. And be it further enacted, That, upon affidavit made by the claimant of such fugitive, his agent or attorney, after such certificate has been issued, that he has reason to apprehend that such fugitive will be rescued by force from his or their possession before he can be taken beyond the limits of the State in which the arrest is made, it shall be the duty of the officer making the arrest to retain such fugitive in his custody, and to remove him to the State whence he fled, and there to deliver him to said claimant, his agent, or attorney. And to this end, the officer aforesaid is hereby authorized and required to employ so many persons as he may deem necessary to overcome such force, and to retain them in his service so long as circumstances may require. The said officer and his assistants, while so employed, to receive the same compensation, and to be allowed the same expenses, as are now allowed by law for transportation of criminals, to be certified by the judge of the district within which the arrest is made, and paid out of the treasury of the United States.

SEC. 10. And be it further enacted, That when any person held to service or labor in any State or Territory, or in the District of Columbia, shall escape therefrom, the party to whom such service or labor shall be due, his, her, or their agent or attorney, may apply to any court of record therein, or judge thereof in vacation, and make satisfactory proof to such court, or judge in vacation, of the escape aforesaid, and that the person escaping owed service or labor to such party. Whereupon the court shall cause a record to be made of the matters so proved, and also a general description of the person so escaping, with such convenient certainty as may be; and a transcript of such record, authenticated by the attestation of the clerk and of the seal of the said court, being produced in any other State, Territory, or district in which the person so escaping may be found, and being exhibited to any judge, commissioner, or other officer authorized by the law of the United States to cause persons escaping from service or labor to be delivered up, shall be held and taken to be full and conclusive evidence of the fact of escape, and that the service or labor of the person escaping is due to the party in such record mentioned. And upon the production by the said party of other and further evidence if necessary, either oral or by affidavit, in addition to what is contained in the said record of the identity of the person escaping, he or she shall be delivered up to the claimant.

And the said court, commissioner, judge, or other person authorized by this act to grant certificates to claimants of fugitives, shall, upon the production of the record and other evidences aforesaid, grant to such claimant a certificate of his right to take any such person identified and proved to be owing service or labor as aforesaid, which certificate shall authorize such claimant to seize or arrest and transport such person to the State or Territory from which he escaped: Provided, That nothing herein contained shall be construed as requiring the production of a transcript of such record as evidence as aforesaid. But in its absence the claim shall be heard and determined upon other satisfactory proofs, competent in law.

Approved, September 18, 1850."—*Statutes at Large*, ix. 462–465.

A. D. 1850-1851.—The Hülsemann Letter. —Kossuth in America.—In July, 1850, Daniel Webster became Secretary of State in the cabinet of President Fillmore and retained that post until his death, in October, 1852. "The best-known incident of this period was that which gave rise to the famous 'Hülsemann letter.' President Taylor had sent an agent to Hungary to report upon the condition of the revolutionary government, with the intention of recognizing it if there were sufficient grounds for doing so. When the agent arrived, the revolution was crushed, and he reported to the President against recognition. These papers were transmitted to the Senate in March, 1850. Mr. Hülsemann, the Austrian Chargé, thereupon complained of the action of our administration, and Mr. Clayton, then Secretary of State, replied that the mission of the agent had been simply to gather information. On receiving further instructions from his government, Mr. Hülsemann rejoined to Mr. Clayton, and it fell to Mr. Webster to reply, which he did on December 21, 1850. The note of the Austrian Chargé was in a hectoring and highly offensive tone, and Mr. Webster felt the necessity of administering a sharp rebuke. 'The Hülsemann letter,' as it was called, was, accordingly dispatched. It set forth strongly the right of the United States and their intention to recognize any de facto revolutionary government, and to seek information in all proper ways in order to guide their action. . . . Mr. Webster had two objects. One was to awaken the people of Europe to a sense of the greatness of this country, the other to touch the national pride at home. He did both. . . . The affair did not, however, end here. Mr. Hülsemann became very mild, but he soon lost his temper again. Kossuth and the refugees in Turkey were brought to this country in a United States frigate. The Hungarian hero was received with a burst of enthusiasm that induced him to hope for substantial aid, which was, of course, wholly visionary. The popular excitement made it difficult for Mr. Webster to steer a proper course, but he succeeded, by great tact, in showing his own sympathy, and, so far as possible, that of the government, for the cause of Hungarian independence and for its leader, without going too far. . . . Mr. Webster's course, . . . although carefully guarded, aroused the ire of Mr. Hülsemann, who left the country, after writing a letter of indignant farewell to the Secretary of State."—H. C. Lodge, *Daniel Webster, ch.* 10.

A. D. 1852.—Appearance of the Know Nothing or American Party.—"A new party had by this time risen to active importance in American politics. It appeared in 1852, in the form of a secret, oath-bound organization, of whose name, nature, and objects nothing was told even to its members until they had reached its higher degrees. Their consequent declaration that they knew nothing about it gave the society its popular name of Know Nothings. It accepted the name of the American Party. Its design was to oppose the easy naturalization of foreigners, and to aid the election of native-born citizens to office. Its nominations were made by secret conventions of delegates from the various lodges, and were voted for by all members under penalty of expulsion in case of refusal. At first, by endorsing the nominations of one or other of the two great parties, it decided many elections. After the passage of the Kansas-Nebraska Bill, the Know Nothing organization was adopted by many Southern Whigs who were unwilling to unite with the Democracy, and became, for a time, a national party. It carried nine of the State elections in 1855, and in 1856 nominated Presidential candidates. After that time its Southern members gradually united with the Democracy, and the Know Nothing party disappeared from politics."—A. Johnston, *Hist. of Am. Politics, 2d ed., ch.* 18, *sect.* 4.—The ritual, rules, etc., of the American, or Know Nothing party are given in the following work.—T. V. Cooper, *American Politics, pp.* 56–68.

ALSO IN: A. Holmes, *Parties and their Principles, pp.* 287–295.

A. D. 1852.—Seventeenth Presidential Election.—Franklin Pierce.—"The question of slavery, in its comprehensive bearings, formed the turning point in the presidential canvass of 1852. . . . The national democratic convention which nominated Mr. Pierce, unanimously adopted a platform approving the compromise of 1850 as the final decision of the slavery question. The whig party were widely divided on the question of acquiescence in the compromise measures, and still more at variance in regard to the claims of rival candidates for the presidency. Mr. Seward's friends in the free states united in the support of General Scott, who had, to a considerable extent, stood aloof from the agitations of the last few years. On the other hand, the exclusive supporters of the compromise, as a condition of party allegiance, were divided between Millard Fillmore, at that time acting president, and Daniel Webster, secretary of state. The whig convention met in Baltimore on the 17th of June, 1852, two weeks after the democratic convention, and nominated General Scott as their candidate for president. A large majority of the delegates from New York, and a considerable number from other states, maintained their opposition to the test resolutions which were proposed by the other branch of the party. These resolutions, however, were adopted, and a platform was thus established resembling, in its main features, that of the democrats. . . . Supported by several advocates

of this new platform on the ground of his personal popularity, General Scott received the nomination. He was, however, regarded with great suspicion by a large number of whigs in the slaveholding states. . . . Many ardent friends of the compromise . . . refused to rally around General Scott, distrusting his fidelity to the compromise platform; while a large number of the whigs of the free states, through aversion to the platform, assumed a neutral position or gave their support to a third candidate. Another portion of the whig party nominated Mr. Webster, who died [October 24, 1852], not only refusing to decline the nomination, but openly avowing his disgust with the action of the party."—G. E. Baker, *Memoir of Wm. H. Seward (Seward's Works, v.* 4).—"The Democratic convention was held, first, on June 1, 1852, at Baltimore. It was a protracted convention, for it did not adjourn until the 6th of the month, but it was not very interesting. . . . After a short contest, the two-thirds rule was adopted by an overwhelming majority. The struggle over the nomination was protracted. On the first ballot, General Cass had 116; James Buchanan, 93; William L. Marcy, 27; Stephen A. Douglas, 20; Joseph Lane, 13; Samuel Houston, 8; and there were 4 scattering. The number necessary to a choice was 188. . . . On the twenty-ninth trial, the votes were: for Cass, 27; for Buchanan, 93; for Douglas, 91; and no other candidate had more than 26. At this point Cass began to recover his strength, and reached his largest number on the thirty-fifth trial, namely, 131. On that same ballot, Virginia gave 15 votes to Franklin Pierce. Mr. Pierce gained 15 more votes on the thirty-sixth trial; but at that point his increase ceased, and was then slowly resumed, as the weary repetition of balloting without effect went on. The forty-eighth trial resulted as follows: for Cass, 73; for Buchanan, 28; for Douglas, 33; for Marcy, 90; for Pierce, 55; for all others, 8. The forty-ninth trial was the last. There was a 'stampede' for Pierce, and he received 282 votes to 6 for all others. Ten candidates were voted for as a candidate for the vice-presidency. . . . On the second ballot, William R. King of Alabama was unanimously nominated. . . . The anti-slavery organization, the Free Soil Democrats, though a much less important political factor than they had been four years earlier, held their convention in Pittsburg on August 11. Henry Wilson of Massachusetts presided. John P. Hale of New Hampshire was nominated for President, and George W. Julian of Indiana for Vice-President. . . . The canvass was not a very spirited one. All the early autumn elections were favorable to the Democrats, and the result in November was a crushing defeat of the Whigs in the popular vote and one still more decisive in the electoral vote. . . . The popular and electoral votes were as follows." Popular vote: Franklin Pierce, 1,601,274; Winfield Scott, 1,386,580; John P. Hale, 155,825. Electoral vote: Pierce, 254; Scott, 42.—E. Stanwood, *Hist. of Presidential Elections, ch.* 18.

A. D. 1852.—The appearance of Uncle Tom's Cabin, and its effect.—"Of the literary forces that aided in bringing about the immense revolution in public sentiment between 1852 and 1860, we may affirm with confidence that by far the most weighty was the influence spread by this book. This story, when published [1851–2] as a serial in the 'National Era,' an anti-slavery newspaper at Washington, attracted little attention, but after it was given to the world in book form in March, 1852, it proved the most successful novel ever written. The author felt deeply that the Fugitive Slave law was unjust, and that there was cruelty in its execution; this inspired her to pour out her soul in a protest against slavery. She thought that if she could only make the world see slavery as she saw it, her object would be accomplished; she would then have induced people to think right on the subject. The book was composed under the most disheartening circumstances. Worn out with the care of many young children; overstrained by the domestic trials of a large household, worried because her husband's small income did not meet their frugal needs; eking out the poor professor's salary by her literary work in a house too small to afford a study for the author — under such conditions there came the inspiration of her life. . . . The effect produced by the book was immense. Whittier offered up 'thanks for the Fugitive Slave law; for it gave occasion for Uncle Tom's Cabin.' Longfellow thought it was one of the greatest triumphs in literary history, but its moral effect was a higher triumph still. Lowell described the impression which the book made as a 'whirl of excitement.' Choate is reported to have said: 'That book will make two millions of abolitionists.' Garrison wrote the author: 'All the defenders of slavery have let me alone and are abusing you.'"—J. F. Rhodes, *Hist. of the U. S. from* 1850, *v.* 1, *pp.* 278–280.—Writing only nine months after the publication of "Uncle Tom's Cabin," C. F. Briggs, in Putnam's Monthly Magazine, said: "Never since books were first printed has the success of Uncle Tom been equalled; the history of literature contains nothing parallel to it, nor approaching it; it is, in fact, the first real success in bookmaking, for all other successes in literature were failures when compared with the success of Uncle Tom. . . . There have been a good many books which were considered popular on their first appearance, which were widely read and more widely talked about. But what were they all, compared with Uncle Tom, whose honest countenance now overshadows the reading world, like the dark cloud with a silver lining. Don Quixote was a popular book on its first coming out, and so was Gil Blas, and Richardson's Pamela, and Fielding's Tom Jones, and Hannah More's Cœlebs, and Gibbon's Decline and Fall; and so were the Vicar of Wakefield, and Rasselas, and the Tale of a Tub, and Evelina, the Lady of the Lake, Waverley, the Sorrows of Werter, Childe Harold, the Spy, Pelham, Vivian Grey, Pickwick, the Mysteries of Paris, and Macaulay's History. These are among the most famous books that rose suddenly in popular esteem on their first appearance, but the united sale of the whole of them, within the first nine months of their publication, would not equal the sale of Uncle Tom in the same time. . . . It is but nine months since this Iliad of the blacks, as an English reviewer calls Uncle Tom, made its appearance among books, and already its sale has exceeded a million of copies; author and publisher have made fortunes out of it, and Mrs. Stowe, who was before unknown, is as familiar a name in all parts of the civilized world as that of Homer or Shakspeare. Nearly 200,000 copies of the first edition of the

work have been sold in the United States, and the publishers say they are unable to meet the growing demand. The book was published on the 20th of last March, and on the 1st of December there had been sold 120,000 sets of the edition in two volumes, 50,000 copies of the cheaper edition in one, and 3,000 copies of the costly illustrated edition. . . . They [the publishers] have paid to the author $20,300 as her share of the profits on the actual cash sales of the first nine months. But it is in England where Uncle Tom has made his deepest mark. Such has been the sensation produced by the book there, and so numerous have been the editions published, that it is extremely difficult to collect the statistics of its circulation with a tolerable degree of exactness. But we know of twenty rival editions in England and Scotland, and that millions of copies have been produced. . . . We have seen it stated that there were thirty different editions published in London, within six months of the publication of the work here, and one firm keeps 400 men employed in printing and binding it. . . . Uncle Tom was not long in making his way across the British Channel, and four rival editions are claiming the attention of the Parisians, one under the title of 'le Père Tom,' and another of 'la Case de l' Oncle Tom.'"— *Uncle Tomitudes* (*Putnam's Monthly Mag., Jan.*, 1853). — "In May, 1852, Whittier wrote to Garrison: 'What a glorious work Harriet Beecher Stowe has wrought. Thanks for the Fugitive Slave Law. Better for slavery that that law had never been enacted, for it gave occasion for Uncle Tom's Cabin.' . . . Macaulay wrote, thanking her for the volume, assuring her of his high respect for the talents and for the benevolence of the writer. Four years later, the same illustrious author, essayist, and historian wrote to Mrs. Stowe: 'I have just returned from Italy, where your fame seems to throw that of all other writers into the shade. There is no place where Uncle Tom, transformed into Il Zio Tom, is not to be found.' From Lord Carlisle she received a long and earnest epistle, in which he says he felt that slavery was by far the 'topping' question of the world and age, and that he returned his 'deep and solemn thanks to Almighty God, who has led and enabled you to write such a book.' The Rev. Charles Kingsley, in the midst of illness and anxiety, sent his thanks, saying: 'Your book will do more to take away the reproach from your great and growing nation than many platform agitations and speechifyings.' Said Lord Palmerston, 'I have not read a novel for thirty years; but I have read that book three times, not only for the story, but for the statesmanship of it.' Lord Cockburn declared: 'She has done more for humanity than was ever before accomplished by any single book of fiction.' Within a year Uncle Tom's Cabin was scattered all over the world. Translations were made into all the principal languages, and into several obscure dialects, in number variously estimated from twenty to forty. The librarian of the British Museum, with an interest and enterprise which might well put our own countrymen to blush, has made a collection which is unique and very remarkable in the history of books. American visitors may see there thirty-five editions (Uncle Tom's Cabin) of the original English, and the complete text, and eight of abridgments and adaptations. Of translations into different languages there are nineteen, viz.: Armenian, one; Bohemian, one; Danish, two distinct versions; Dutch, one; Flemish, one; French, eight distinct versions, and two dramas; German, five distinct versions, and four abridgments; Hungarian, one complete version, one for children, and one versified abridgment; Illyrian, two distinct versions; Italian, one; Polish, two distinct versions; Portuguese, one; Roman, or modern Greek, one; Russian, two distinct versions; Spanish, six distinct versions; Swedish, one; Wallachian, two distinct versions; Welsh, three distinct versions."— Mrs. F. T. McCray, *Uncle Tom's Cabin* (*Mag. of Am. Hist., Jan.*, 1890).

A. D. 1854.—The Kansas-Nebraska Bill.—Repeal of the Missouri Compromise.—The doctrine of "Squatter Sovereignty."—"The slavery agitation apparently had died away both in congress and throughout the country. This calm, however, was doomed to a sudden interruption. The prospect of . . . beneficent legislation was destroyed by the introduction of a measure which at once supplanted all other subjects in congress and in the political interests of the people. This was the novel and astounding proposal of Mr. Douglas [Senator Stephen A. Douglas, of Illinois], in relation to the Kansas and Nebraska territories. . . . The measure . . . alluded to . . . was a provision in the bill for the organization of a territory in Nebraska, declaring that the states which might at any future time be formed in the new territory should leave the question of slavery to be decided by the inhabitants thereof on the adoption of their constitution,—[this being in accordance with the doctrine which its advocates styled 'Popular Sovereignty,' but which took the commoner name of 'Squatter Sovereignty' from its opponents]. This provision was, as explained by the bill itself, the application of the compromise policy of 1850 to Nebraska, and, as was evident, virtually repealed the Missouri Compromise of 1820, which guarantied that slavery should be forever excluded from the territory in question. But, in order to bring the supporters of the bill and its opponents to a more decided test, an amendment was moved expressly annulling that portion of the Missouri Compromise which related to the subject. Mr. Douglas, after some deliberation, accepted the amendment, and modified his plan so far as to introduce a new bill for the organization of Nebraska and Kansas within the same limits, instead of the territory of Nebraska alone, according to the original programme. The administration lost no time in adopting this policy as their own. It was at first proposed to hasten the passage of the bill through both houses so rapidly as to prevent any remonstrance on the part of the people. But the opponents of the measure, including Mr. Seward, Mr. Chase, Mr. Sumner, Mr. Truman Smith, Mr. Wade, Mr. Everett, Mr. Bell, Mr. Houston, and Mr. Fessenden, combined against it such an earnest and effective resistance that the attention of the country was aroused, and an indignant protest called forth from the people of the free states. The bill, however, passed the senate on the 4th day of March, 1854, after a discussion which had occu-

pied nearly every day of the session since the 23d of January. . . . On the 21st of March, Mr. Richardson of Illinois, in the house, moved to refer the bill, as it came from the senate, to the committee on territories, of which he was the chairman. Mr. Francis B. Cutting, of New York, moved that it be sent to the committee of the whole, where it could be freely discussed. His motion was carried, after a severe struggle, by a vote of 110 to 95. This was regarded as a triumph of the enemies of the bill and inspired hopes of its ultimate defeat in the house. On the 22d of May, after a most exciting contest, lasting nearly two months, in committee of the whole, Mr. Alex. H. Stephens of Georgia, by an extraordinary stratagem in parliamentary tactics, succeeded in closing the debate and bringing the bill to a vote in the house, where it finally passed, before adjournment, by a vote of 113 to 100." Returned to the senate, on account of amendments which had been made to it, it passed that body again "by vote of 35 to 13; and amid the firing of cannon and the shouting of its friends, it was sent to the president for his signature, at three o'clock in the morning of May 26, 1854. President Pierce promptly gave it his approval, and the odious measure became the law of the land. Thus was abrogated the Missouri Compromise—a law enacted thirty years before with all the solemnity of a compact between the free and the slave states—and a territory as large as the thirteen original states opened to slavery. The act was consummated by the coöperation of the north. Originating with a senator from a free state, it was passed by a congress containing in each branch a majority of members from the free states, and was sanctioned by the approval of a free state president. The friends of this legislation attempted to defend it on the pretence that it was not an original act, but only declaratory of the true intent and significance of the compromise measures of 1850."—G. E. Baker, *Memoir of William H. Seward* (*v.* 4 *of Seward's Works*), *pp.* 24–27.—Senator Douglas' explanation of the reasons on which he grounded his Kansas-Nebraska Bill is given in a report made by Lieutenant-Colonel Cutts, of conversations held by him with the Senator in 1859, and taken down in writing at the time, in the exact language of Mr. Douglas. "There was," said Senator Douglas, "a necessity for the organization of the Territory, which could no longer be denied or resisted. . . . Mr. Douglas, as early as the session of 1843, had introduced a bill to organize the Territory of Nebraska, for the purpose of opening the line of communication between the Mississippi Valley and our possessions on the Pacific Ocean, known as the Oregon country, and which was then under the operation of the treaty of joint occupation, or rather nonoccupation, with England, and was rapidly passing into the exclusive possession of the British Hudson's Bay Fur Company, who were establishing posts at every prominent and commanding point in the country. . . . Mr. Douglas renewed the introduction of his bill for the organization of Nebraska Territory, each session of Congress, from 1844 to 1854, a period of ten years, and while he had failed to secure the passage of the act, in consequence of the Mexican war intervening, and the slavery agitation which ensued, no one had objected to it upon the ground that there was no necessity for the organization of the Territory. During the discussions upon our Territorial questions during this period, Mr. Douglas often called attention to the fact that a line of policy had been adopted many years ago, and was being executed each year, which was entirely incompatible with the growth and development of our country. It had originated as early as the administration of Mr. Monroe, and had been continued by Mr. Adams, General Jackson, Mr. Van Buren, Harrison, and by Tyler, by which treaties had been made with the Indians to the east of the Mississippi River, for their removal to the country bordering upon the States west of the Mississippi or Missouri Rivers, with guaranties in said treaties that the country within which these Indians were located should never be embraced within any Territory or State, or subjected to the jurisdiction of either, so long as grass should grow and water should run. These Indian settlements, thus secured by treaty, commenced upon the northern borders of Texas, or Red River, and were continued from year to year westward, until when, in 1844, Mr. Douglas introduced his first Nebraska Bill, they had reached the Nebraska or Platte River, and the Secretary of War was then engaged in the very act of removing Indians from Iowa, and settling them in the valley of the Platte River, with similar guaranties of perpetuity, by which the road to Oregon was forever to be closed. It was the avowed object of this Indian policy to form an Indian barrier on the western borders of Arkansas, Missouri, and Iowa, by Indian settlements, secured in perpetuity by a compact that the white settlements should never extend westward of that line. This policy originated in the jealousy, on the part of the Atlantic States, of the growth and expansion of the Mississippi Valley, which threatened in a few years to become the controlling power of the nation. . . . This restrictive system received its first check in 1844, by the introduction of the Nebraska Bill, which was served on the Secretary of War, by its author, on the day of its introduction, with a notice that Congress was about to organize the Territory, and therefore he must not locate any more Indians there. In consequence of this notice, the Secretary (by courtesy) suspended his operations until Congress should have an opportunity of acting upon the bill; and inasmuch as Congress failed to act that session, Mr. Douglas renewed his bill and notice to the Secretary each year, and thus prevented action for ten years, and until he could procure action on the bill. . . . When Congress assembled at the session of 1853–'54, in view of this state of facts, Mr. Douglas renewed his Nebraska Act, which was modified, pending discussion, by dividing into two Territories, and became the Kansas-Nebraska Act. . . . The jealousies of the two great sections of the Union, North and South, had been fiercely excited by the slavery agitation. The Southern States would never consent to the opening of those Territories to settlement, so long as they were excluded by act of Congress from moving there and holding their slaves; and they had the power to prevent the opening of the country forever, inasmuch as it had been forever excluded by treaties with the Indians, which could not be changed or repealed except by a two-third vote in the Senate. But the South were willing to consent to remove the Indian restric-

tions, provided the North would at the same time remove the Missouri restriction, and thus throw the country open to settlement on equal terms by the people of the North and South, and leave the settlers at liberty to introduce or exclude slavery as they should think proper." The same report gives a distinction which Senator Douglas drew between "Popular Sovereignty" and "Squatter Sovereignty," as follows: "The name of Squatter Sovereignty was first applied by Mr. Calhoun, in a debate in the United States Senate in 1848, between himself and General Cass, in respect to the right of the people of California to institute a government for themselves after the Mexican jurisdiction had been withdrawn from them, and before the laws of the United States had been extended over them. General Cass contended that in such a case the people had a right, an inherent and inalienable right, to institute a government for themselves and for their own protection. Mr. Calhoun replied that, with the exception of the native Californians, the inhabitants of that country were mere squatters upon the public domain, who had gone there in vast crowds, without the authority of law, and were in fact trespassers as well as squatters upon the public lands, and to recognize their right to set up a government for themselves was to assert the doctrine of 'Squatter Sovereignty.' The term had no application to an organized Territory under the authority of Congress, or to the powers of such organized Territory, but was applied solely to an unorganized country whose existence was not recognized by law. On the other hand, what is called 'Popular Sovereignty' in the Territories, is a phrase used to designate the right of the people of an organized Territory, under the Constitution and laws of the United States, to govern themselves in respect to their own internal polity and domestic affairs."—S. A. Douglas, *Brief Treatise upon Const. and Party Questions (reported by J. M. Cutts), pp.* 86–92, *and* 123–124.—"The repeal of the Missouri Compromise was the beginning of the end, the fatal step of the South on its road to destruction. Throughout the North the conviction grew that Union and slavery could not exist much longer together. On the 4th of July, 1854, Garrison publicly burned a copy of the Constitution of the United States with the words, 'The Union must be dissolved!' He represented only an extreme sentiment. But the people at large began to calculate the value of this Union for which so many sacrifices had been made. Slavery became odious to many persons hitherto indifferent to the subject, on the ground that it persistently and selfishly placed the Union in peril."—B. Tuckerman, *William Jay and the Constitutional Movement for the Abolition of Slavery, ch.* 7.

A. D. 1854-1855. — Solidification of Anti-slavery sentiment in the North.—The birth of the new Republican Party.—"The determined purpose of the Slave Power to make slavery the predominating national interest was never more clearly revealed than by the proposed repeal of the Missouri compromise. This was a deliberate and direct assault upon freedom. Many, indeed, under the pleas of fraternity and loyalty to the Union, palliated and apologized for this breach of faith; but the numbers were increasing every hour, as the struggle progressed, who could no longer be deceived by these hollow pretences. . . . Pulpits and presses which had been dumb, or had spoken evasively and with slight fealty to truth, gave forth no uncertain sound. . . . To the utterances of the sacred desk were added the action of ecclesiastical bodies, contributions to the press, and petitions to State legislatures and to Congress . . . . These discussions from pulpit, platform, and press, all pointed to political action as the only adequate remedy. In the Northern States there were Abolitionists, Free-Soilers, anti-slavery Whigs, anti-Nebraska Democrats, and anti-slavery members of the American party, which had just come into existence. . . . As the conflict progressed, large and increasing numbers saw that no help could be reasonably hoped but through the formation of a new party that could act without the embarrassment of a Southern wing. But the formation of a national and successful party from materials afforded by the disintegration of hitherto hostile organizations was a work of great delicacy and difficulty. Such a party could not be made;—it must grow out of the elements already existing. It must be born of the nation's necessities and of its longings for relief from the weakness, or wickedness, of existing organizations. The mode of organizing this new party of freedom varied according to the varying circumstances of different localities and the convictions of different men. . . . One of the earliest, if not the earliest, of the movements that contemplated definite action and the formation of a new party, was made in Ripon, Fond du Lac County, Wisconsin, in the early months of 1854." A public meeting, held in one of the churches of the town, was followed by a second meeting, on the 20th of March, at which definite proceedings were taken. "By formal vote the town committees of the Whig and Free Soil parties were dissolved, and a committee of five, consisting of three Whigs, one Free-Soiler, and one Democrat, was chosen. 'The work done on that evening,' says Mr. Bovey [one of its originators], 'was fully accepted by the Whig and Free Soil parties of all this section immediately; and very soon — that is to say, in a few months — by those parties throughout the entire State.' A State convention was held in July, by which the organization of the party was perfected for the State, a majority of the delegation was secured for the next Congress, and a Free-Soiler, Charles Durkee, was elected to the Senate of the United States. At the meeting of the 20th of March, Mr. Bovey, though stating his belief that the party should and probably would take the name of 'Republican,' advised against such a christening at that time and by that small local body of men. He, however, wrote to the editor of the New York 'Tribune,' suggesting the name. . . . But that 'little eddy' on that far-off margin was only one of many similar demonstrations,—signs of a turn of the tide in the great sea of Ameri-

can politics. In Washington, on the morning after the passage of the Kansas-Nebraska bill, there was a meeting of some thirty members of the House at the rooms of Thomas D. Eliot and Edward Dickinson, of Massachusetts, called at the instance of Israel Washburn, Jr., of Maine, for consultation in regard to the course to be adopted in the exigencies of the case. The hopelessness of any further attempts through existing organizations was generally admitted; though a few still counselled adherence to the Whig party, in the expectation of securing its aid for freedom. But most present had become convinced that in a new party alone lay any reasonable hope of successful resistance to the continued aggressions of the arrogant and triumphant Slave Power. The name 'Republican' was suggested, discussed, and finally agreed upon as appropriate for the new organization. . . . But, whatever suggestions others may have made, or whatever action may have been taken elsewhere, to Michigan belongs the honor of being the first State to form and christen the Republican Party." A mass convention of Whigs and Free Soilers in that State was held on the 6th of July, at which the name was formally adopted, along with a "platform" of principles opposing the extension of slavery and demanding its abolition in the District of Columbia. "Though the Republican Party was not immediately organized in all the free States, its spirit inspired and its ideas largely pervaded the North. Within one year eleven Republican Senators were elected and fifteen States had secured anti-Nebraska majorities. Out of 142 Northern members of the House, 120 were opposed to the iniquitous measure. They were in sufficient numbers not only to control the election of Speaker, but they were able, by a majority of 15, to declare that 'in the opinion of this House, the repeal of the Missouri compromise of 1820, prohibiting slavery north of 36° 30′, was an example of useless and factious agitation of the slavery question, unwise and unjust to the American people.' Several States which had failed to organize a Republican Party in 1854 did so in 1855."—H. Wilson, *Rise and Fall of the Slave Power in Am., v.* 2, *ch.* 31.—"The refusal of the Whigs in many States to surrender their name and organization, and more especially the abrupt appearance of the Know-Nothings on the field of parties, retarded the general coalition between the Whigs and the Free-soilers which so many influences favored. As it turned out, a great variety of party names were retained or adopted in the Congressional and State campaigns of 1854, the designation of 'anti-Nebraska' being perhaps the most common, and certainly for the moment the most serviceable, since denunciation of the Nebraska bill was the one all-pervading bond of sympathy and agreement among men who differed very widely on almost all other political topics. This affiliation, however, was confined exclusively to the free States. In the slave States, the opposition to the Administration dared not raise the anti-Nebraska banner, nor could it have found followers; and it was not only inclined but forced to make its battle either under the old name of Whigs, or. as became more popular, under the new appellation of 'Americans,' which grew into a more dignified synonym for Know-Nothings. . . . While the measure was yet under discussion in the House in March, New Hampshire led off by an election completely obliterating the eighty-nine Democratic majority in her Legislature. Connecticut followed in her footsteps early in April. Long before November it was evident that the political revolution among the people of the North was thorough, and that election day was anxiously awaited merely to record the popular verdict already decided. The influence of this result upon parties, old and new, is perhaps best illustrated in the organization of the Thirty-fourth Congress, chosen at these elections during the year 1854, which witnessed the repeal of the Missouri Compromise. Each Congress, in ordinary course, meets for the first time about one year after its members are elected by the people, and the influence of politics during the interim needs always to be taken into account. In this particular instance this effect had, if anything, been slightly reactionary, and the great contest for the Speakership during the winter of 1855–6 may therefore be taken as a fair manifestation of the spirit of politics in 1854. The strength of the preceding House of Representatives, which met in December, 1853, had been: Whigs, 71; Free-soilers, 4; Democrats, 159—a clear Democratic majority of 84. In the new Congress there were in the House, as nearly as the classification could be made, about 108 anti-Nebraska members, nearly 40 Know-Nothings, and about 75 Democrats; the remaining members were undecided. The proud Democratic majority of the Pierce election was annihilated."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 1, *ch.* 20.

A. D. 1855-1856.—Long contest for the Speakership of the House.—Election of Mr. Banks, Republican.—Mr. Giddings' account.—"The free-soil party was now rapidly increasing in numbers and influence. The Whig organization had disbanded: Yet its leaders had too much pride of opinion to admit that the anti-slavery men were right in their policy or in their construction of the Constitution. Indeed, their prejudices were too strong to permit them to join any other existing organization. They therefore instituted a new party called the 'Know Nothings' or 'American party.' Their leading policy was the exclusion of foreigners from office. . . . It was a secret society, known to each other by signs, grips and passwords. It increased rapidly in numbers, and in the autumn of 1844 they elected a large majority of officers in all of the free States. . . . The effect of their success became apparent at the assembling of the thirty-fourth Congress. It had placed the democratic party in a very decided minority in the House of Representatives. . . . And the Free-soilers or Republicans were placed in a most critical position. Their difficulty arose from the determination of aspiring politicians to give all influence into the hands

of the organization which had recently sprung up. Members of this new party were at the city of Washington some weeks before the assembling of Congress, making such political arrangements as they regarded necessary to secure the success for the 'Know Nothings.' But all were conscious that neither they nor the Free-soilers could succeed except by uniting with each other." A partial combination of Know Nothings with the Republicans was effected at a meeting on Friday before the opening of the session of Congress. "Late in the day a resolution was introduced pledging the members to vote for any man on whom a majority of the members should unite, provided he stood pledged by his past life or present declarations so to arrange the committees of the House as to give respectful answers to petitions concerning slavery. This resolution was adopted by a unanimous vote of more than 70 members. But the leading members of the 'Know Nothings' did not appear at any of the caucuses. It was in this unorganized form that members opposed to the extension of slavery met their associates on Monday in the Hall of Representatives, to enter upon a contest unequalled in the previous history of our Government. The House consisted of 234 members — 225 of whom answered to their names at the first calling of the roll. The first business in order was the election of Speaker: And the ballots being counted, it was found that William A. Richardson, the democratic candidate, had 74 votes; Lewis D. Campbell, of Ohio, the 'Know Nothing' candidate, had 53 votes; Humphrey Marshall, of Kentucky, the southern Know Nothing candidate, 30 votes; Nathaniel P. Banks, of Massachusetts, was supported by those Free-soilers or Republicans who refused to support any man placed in nomination by the Know Nothings; and Hiram M. Fuller, of Pennsylvania, received the votes of 17 members of the Know Nothing party who refused to support any other candidate. There were several other ballots cast during the day, with little change. The voting continued on the second, third, fourth and fifth days, without material change, except that Mr. Campbell's vote rose on one occasion as high as 75. After the result of the twenty-third ballot was announced, Mr. Campbell withdrew his name from the list of candidates. On the withdrawal of Mr. Campbell, Mr. Banks' rose regularly until the 15th December, when it reached 107. . . . On the 19th December, the ballot showed Mr. Banks to have 106, and Mr. Richardson 75. Messrs. Marshall and Fuller, with their adherents, continuing to vote by themselves. During the debates the Republicans were constantly assailed, and as the writer [Joshua R. Giddings, of Ohio] was the oldest member of that party, he felt constrained to vindicate their cause. He assured the Democrats and 'Know Nothings' that the Republicans must soon come into power: And when once in power they would not permit southern members to dissolve the Union. This seemed to arouse much angry feeling. Mr. McMullen, of Virginia, replied with much spirit, declaring that whenever a northern President should be elected the South would dissolve the Union. This is believed to be the first distinct enunciation in Congress that the Union was to be dissolved upon the election of a northern President. Northern Democrats appeared mortified at the imprudence of Mr. McMullen. Mr. Banks, in a public speech made some two years previously in Maine, had said, that if we were to extend slavery or dissolve the Union, he would say, 'Let the Union slide.' This saying was now seized upon by southern men as an insuperable objection to Mr. Banks' election: While, at the same time, Mr. Brooks, of South Carolina, assured the House and the country that unless slavery were extended he desired to see the Union slide. Members appeared by common consent to enter upon a general debate, which was suspended on the 24th so long as to take a ballot, which showed no substantial change in the parties. On the 27th, four ballots were taken with a similar result. . . . On the 28th December the balloting was resumed, and continued through that and the following day without material change of parties, and debate was again renewed. . . . The President of the United States sent his annual message to the Senate on the 31st December, and his private secretary appeared at the entrance of the House of Representatives and announced that he had brought with him the annual message of the President, to be presented to that body. Aware that this was intended to exert an influence against the Republicans, the author at once objected to receiving it, as it was an attempt to introduce a new practice — for up to that time no President had ever presumed to thrust his message upon an unorganized body — and that it could not constitutionally be received by members until a Speaker were elected. But a majority voted to receive it. The next attempt was to read it to the House; but it was again objected that it was not addressed to members in their disorganized condition, but was addressed to the Senate and House of Representatives, which had not then been organized. This objection was sustained, and although they had received the message, they refused to read it. The new year found the House unorganized, with the President's message lying upon the Clerk's desk unopened and unread. One ballot was taken. A motion was next made to take up and read the President's message; but, after debate, the motion was laid on the table. Members now began to make arrangements for continuing the contest indefinitely. Most of them had expected to draw their mileage to defray their current expenses; but being unable to do that until the House were organized, found themselves out of funds. In many Republican districts the people met in public conventions and passed resolutions approving the action of their Representatives, made provisions for their members to draw on their local banks for such funds as they deemed necessary for defraying expenses at Washington. To meet these expenses, some State Legislatures made appropriations from their State funds. Soon as the republican party became consolidated, its members became more confident. Those of greatest experience assured their friends that as the President, officers of government, and the army and navy must go without pay until the House should be organized, the pressure would soon be so great upon the democratic party that they would be compelled to submit to the election of a republican Speaker. Some State Legislatures passed resolutions sustaining the action of their Representatives, declaring the issue involved to be the extension or non-extension of

slavery. . . . On the 29th January several propositions were made for an immediate organization. They were rejected, but by such small majorities as to indicate an organization at no very distant period; and the Republicans now felt one, and only one doubt in regard to success. The southern 'Know Nothings' had been Whigs, and bitterly hated the Democrats; and the question now presented was, whether they would unite with their old enemies rather than see a republican Speaker elected. On the 3d February a resolution was presented, declaring that three more ballots should be taken and if no election were had, the candidate having the highest number of votes on the 4th ballot should be declared Speaker. Soon after this vote was announced the House adjourned. Members now felt that the contest was drawing to a close. The next morning . . . Mr. Aiken, of South Carolina, was announced as the democratic candidate. And the first ballot, under the resolution, showed little change of parties. Banks received 102 votes; Aiken, 92; Fuller, 13; Campbell, 4; and Wells, 2. By this time the spacious galleries were filled with eager spectators, the lobbies and passages were crowded by men and ladies anxious for the result. The next ballot was taken without any change of parties. A motion was made to adjourn, but it was voted down by 159 to 52. Mr. Fuller announced that he was no longer a candidate. The result now appeared to be anticipated by all, and as the Clerk commenced calling the roll of members for the final vote, there appeared to be the most intense interest felt on all sides of the House. . . . When the roll had been called through there was so much confusion that it was difficult for any one to be heard. But the clerks and tellers proceeded in their duties, and when the count was completed, Mr. Benson, of Maine — one of the tellers — rose, and in a loud voice proclaimed that 'On the one hundred and thirty-third ballot Nathaniel P. Banks had received 103 votes; Mr. Aiken had received 100 votes; Mr. Fuller had received 6 votes; and Mr. Campbell had received 4 votes. That Mr. Banks having received the highest number of votes on this ballot, was declared duly elected Speaker of the thirty-fourth Congress.' At this announcement the spectators in the galleries broke forth in wild excitement. Cheer after cheer went up, amid the waving of handkerchiefs and demonstrations of unrestrained exultation, which were responded to by hisses from the Administration side of the House. . . . The effect of this victory was felt through the country. . . . Sixteen years before this occurrence Mr. Adams and the author of these sketches were the only representatives in Congress of the doctrines now supported by a majority of the House. The slaveholders and those who sympathized with them appeared to realize that political power was gradually escaping from their grasp, and that the day was rapidly approaching when the people would resume control of the Government."— J. R. Giddings, *Hist. of the Rebellion, ch.* 26.

A. D. 1856.—Senator Sumner's speech on "The Crime against Kansas," and the assault upon him by Brooks of South Carolina.—"The most startling speech made during the debate [on affairs in Kansas], and which, from the events succeeding, became the most celebrated, was that of Charles Sumner. It was delivered on the 19th and 20th days of May and was published under the title of 'The Crime against Kansas.' . . . If there had been no more to Sumner's speech than the invective against the slave power, he would not have been assaulted by Preston Brooks. Nor is it probable that the bitter attack which the senator made on South Carolina would have provoked the violence, had it not been coupled with personal allusions to Senator Butler, who was a kinsman of Brooks. . . . It was said that Seward, who read the speech before delivery, advised Sumner to tone down its offensive remarks, and he and Wade regretted the personal attack. But Sumner was not fully 'conscious of the stinging force of his language.' To that, and because he was terribly in earnest, must be attributed the imperfections of the speech. He would annihilate the slave power, and he selected South Carolina and her senator as vulnerable points of attack. . . . Two days after this exciting debate (May 22d) when the Senate at the close of a short session adjourned, Sumner remained in the Chamber, occupied in writing letters. Becoming deeply engaged, he drew his arm-chair close to his desk, bent over his writing, and while in this position was approached by Brooks, a representative from South Carolina and a kinsman of Senator Butler. Brooks, standing before and directly over him, said: 'I have read your speech twice over carefully. It is a libel on South Carolina and Mr. Butler, who is a relative of mine.' As he pronounced the last word, he hit Sumner on the head with his cane with the force that a dragoon would give to a sabre-blow. Sumner was more than six feet in height and of powerful frame, but penned under the desk he could offer no resistance, and Brooks continued the blows on his defenceless head. The cane broke, but the South Carolinian went on beating his victim with the butt. The first blows stunned and blinded Sumner, but instinctively and with powerful effort he wrenched the desk from its fastenings, stood up, and with spasmodic and wildly directed efforts attempted unavailingly to protect himself. Brooks took hold of him, and, while he was reeling and staggering about, struck him again and again. The assailant did not desist until his arm was seized by one who rushed to the spot to stop the assault. At that moment Sumner, reeling, staggering backwards and sideways, fell to the floor bleeding profusely and covered with his blood. The injury received by Sumner was much more severe than was at first thought by his physicians and friends. Four days after the assault, he was able to give at his lodgings his relation of the affair to the committee of the House of Representatives. But, in truth, the blows would have killed most men. Sumner's iron constitution and perfect health warded off a fatal result; but it soon appeared that the injury had affected the spinal column. The next three years and a half was a search for cure. . . . At last he went to Paris and put himself under the care of Dr. Brown-Séquard, whose treatment of actual cauterization of the back eventually restored him to a fair degree of health; but he never regained his former physical vigor. He

was not able to enter regularly again on his senatorial career until December, 1859. . . . The different manner in which the North and the South regarded this deed is one of the many evidences of the deep gulf between these two people caused by slavery. . . . When Brooks returned to South Carolina he received an enthusiastic welcome. He was honored as a glorious son of the Palmetto State, and making him the present of a cane was a favorite testimonial. . . . At the North the assault of Brooks was considered brutal and cowardly; at the South, his name was never mentioned without calling him gallant or courageous, spirited or noble. . . . A committee was appointed by the House which took a large amount of evidence, and the majority reported a resolution in favor of the expulsion of Brooks. On this resolution, the vote was 121 to 95; but as it required two thirds, it was not carried. Only three Southern representatives publicly condemned the assault; only one voted to expel Brooks. After the decision by the House, Brooks made a speech, which he ended by resigning his place as representative. His district re-elected him almost unanimously: there were only six votes against him."—J. F. Rhodes, *Hist. of the U. S. from* 1850, *ch.* 7 (*v.* 2).

A. D. 1856.—Eighteenth Presidential Election.—Buchanan made President.—"The presidential campaign of . . . 1856, showed a striking disintegration and re-formation of political groups. Nominally there were four parties in the field: Democrats, Whigs, Native Americans or Know-Nothings, and Republicans. The Know-Nothings had lately won some State elections, but were of little account as a national organization, for they stood upon an issue hopelessly insignificant in comparison with slavery. Already many had gone over to the Republican camp; those who remained nominated as their candidates Millard Fillmore and Andrew J. Donelson. The Whigs were the feeble remnant of a really dead party, held together by affection for the old name; too few to do anything by themselves, they took by adoption the Know-Nothing candidates. The Republican party had been born only in 1854. Its members, differing on other matters, united upon the one doctrine, which they accepted as a test: opposition to the extension of slavery. They nominated John C. Fremont and William L. Dayton, and made a platform whereby they declared it to be 'both the right and the duty of Congress to prohibit in the Territories those twin relics of barbarism, polygamy and slavery.' . . . In this Convention 110 votes were cast for Lincoln for the second place on the ticket. . . . In the Democratic party there were two factions. The favorite candidate of the South was Franklin Pierce, for reëlection, with Stephen A. Douglas as a substitute or second choice; the North more generally preferred James Buchanan, who was understood to be displeased with the repeal of the Missouri Compromise. The struggle was sharp, but was won by the friends of Buchanan, with whom John C. Breckenridge was coupled. The campaign was eager, for the Republicans soon developed a strength beyond what had been expected and which put the Democrats to their best exertions. The result was: popular vote, Democrats [Buchanan] 1,838,169, Republicans [Fremont] 1,341,264, Know-Nothings and Whigs [Fillmore] 874,534; electoral vote, Democrats 174, Republicans 114, Know-Nothings and Whigs, 8. Thus James Buchanan became President of the United States, March 4, 1857. . . . Yet, while the Democrats triumphed, the Republicans enjoyed the presage of the future; they had polled a total number of votes which surprised every one; on the other hand, the Democrats had lost ten States which they had carried in 1852 and had gained only two others, showing a net loss of eight States; and their electoral votes had dwindled from 254 to 174."—J. T. Morse, Jr., *Abraham Lincoln*, *v.* 1, *ch.* 4.

A. D. 1856-1859.—The continued struggle in Kansas.—The Topeka vs. the Lecompton Constitution. See KANSAS: A. D. 1854-1859.

A. D. 1857.—The Dred Scott decision.—"Dred Scott was a negro slave, the property of Dr. Emerson, a surgeon in the army. In 1834, Dred was carried by his master from the slave state of Missouri, first, to the military post at Rock Island in the free state of Illinois, where he remained till April or May, 1836; and, thence, to Fort Snelling, in the territory known as Upper Louisiana, and lying north of the line of the Missouri Compromise, in both of which places he was held as a slave. At Fort Snelling, in the year 1836, he was married to Harriet, a negro slave, who had also been brought to Fort Snelling by her master, Major Taliaferro, and there sold to Dr. Emerson. In 1838, Dred, with his wife and a child which had been born to him, was carried back by his master to the state of Missouri. Subsequently, Dred, with his wife, his daughter Eliza, and another daughter, Lizzie, who was born after the return of her family to Missouri, was sold to John F. A. Sandford — the defendant in the present case. Dred commenced his efforts for the establishment of the freedom of himself and family in the state courts of Missouri. The suit was brought in the Circuit Court of St. Louis county. Before this court, the judgment was in his favor, but, on appeal by writ of error to the Supreme Court of the state, this judgment was reversed, and the case remanded to the court below, — where it remained, awaiting the decision of the suit which, in the meanwhile, Dred had brought in the United States courts. This second suit was brought before the Circuit Court of the United States for the district of Missouri, and thence carried, by writ of error, to the Supreme Court at Washington. It may be added that the first suit was brought against Dr. Emerson, but the second against Mr. Sandford, to whom Dred had been sold. The action, though brought to assert the title of Dred Scott and his family to freedom, was, in form, an action of trespass 'vi et armis,' which is the usual form employed in that state to try questions of this kind. The plaintiff, Scott, in his writ both makes a declaration of the acts of trespass — which of course are the acts of restraint necessarily implied in holding himself and family as slaves — and avers, what was necessary to give the court jurisdiction, that he and the defendant are citizens of different states; that is, that he is a citizen of Missouri, and the defendant a citizen of New York. At the April term of the court, in 1854, the defendant Sandford pleads, that the court has not jurisdiction, because the plaintiff is not a citizen of Missouri, but a negro of African descent, whose ancestors,

of pure African blood, were brought into this country and sold as slaves. To this plea the plaintiff demurs as insufficient; the demurrer is argued at the same term, and is sustained by the court, that is, the court asserts its jurisdiction over the case." It was on this plea that the case went finally to the Supreme Court of the United States and was decided in 1857. "The question of negro citizenship came up in the consideration of the question of jurisdiction. For the question of jurisdiction was the question, whether the plaintiff was a citizen of Missouri, as he had averred in his declaration; and the only fact pleaded to disprove his citizenship was the fact that Scott was a negro of African descent, whose ancestors had been sold as slaves in the United States. The court, however, decided that this fact did not exclude the possibility of his being a citizen; in other words, it decided that a negro of this description can be a citizen of the United States. The first question before the Supreme Court was, whether it could rejudge this determination of the circuit court."—W. A. Larned, *Negro Citizenship* (*New Englander, Aug.*, 1857).—The decision of the Supreme Court, delivered by Chief Justice Taney, March 6, 1857, not only closed the door of freedom to Dred Scott, but shut the doors of the United States courts against him and all those of his race who were or had been slaves, or who sprang from an ancestry in the servile state. The opinion of Chief Justice Taney was concurred in by all the justices except Curtis and McLean—Justice Nelson dissenting on one point only. The arguments and the sentiments in the opinion which gave most offence to the conscience and the reason of the country were the following: "It becomes . . . our duty to decide whether the facts stated in the plea are or are not sufficient to show that the plaintiff is not entitled to sue as a citizen in a court of the United States. This is certainly a very serious question, and one that now for the first time has been brought for decision before this court. But it is brought here by those who have a right to bring it, and it is our duty to meet it and decide it. The question is simply this: Can a negro, whose ancestors were imported into this country, and sold as slaves, become a member of the political community formed and brought into existence by the Constitution of the United States, and as such become entitled to all the rights, and privileges, and immunities, guarantied by that instrument to the citizen? One of which rights is the privilege of suing in a court of the United States in the cases specified in the Constitution. It will be observed, that the plea applies to that class of persons only whose ancestors were negroes of the African race, and imported into this country, and sold and held as slaves. The only matter in issue before the court, therefore, is whether the descendants of such slaves, when they shall be emancipated, or who are born of parents who had become free before their birth, are citizens of a State, in the sense in which the word citizen is used in the Constitution of the United States. And this being the only matter in dispute on the pleadings, the court must be understood as speaking in this opinion of that class only, that is, of those persons who are the descendants of Africans who were imported into this country, and sold as slaves. . . . The words 'people of the United States' and 'citizens' are synonymous terms, and mean the same thing. They both describe the political body who, according to our republican institutions, form the sovereignty, and who hold the power and conduct the Government through their representatives. They are what we familiarly call the 'sovereign people,' and every citizen is one of this people, and a constituent member of this sovereignty. The question before us is, whether the class of persons described in the plea in abatement compose a portion of this people, and are constituent members of this sovereignty? We think they are not, and that they are not included, and were not intended to be included, under the word 'citizens' in the Constitution, and can therefore claim none of the rights and privileges which that instrument provides for and secures to citizens of the United States. On the contrary, they were at that time considered as a subordinate and inferior class of beings, who had been subjugated by the dominant race, and, whether emancipated or not, yet remained subject to their authority, and had no rights or privileges but such as those who held the power and the Government might choose to grant them. It is not the province of the court to decide upon the justice or injustice, the policy or impolicy, of these laws. The decision of that question belonged to the political or law-making power. . . . In discussing this question, we must not confound the rights of citizenship which a State may confer within its own limits, and the rights of citizenship as a member of the Union. It does not by any means follow, because he has all the rights and privileges of a citizen of a State, that he must be a citizen of the United States. He may have all of the rights and privileges of the citizen of a State, and yet not be entitled to the rights and privileges of a citizen in any other State. . . . The question then arises, whether the provisions of the Constitution, in relation to the personal rights and privileges to which the citizen of a State should be entitled, embraced the negro African race, at that time in this country, or who might afterwards be imported, who had then or should afterwards be made free in any State; and to put it in the power of a single State to make him a citizen of the United States, and endue him with the full rights of citizenship in every other State without their consent? . . . The court think the affirmative of these propositions cannot be maintained. And if it cannot, the plaintiff in error could not be a citizen of the State of Missouri, within the meaning of the Constitution of the United States, and, consequently, was not entitled to sue in its courts. It is true, every person, and every class and description of persons, who were at the time of the adoption of the Constitution recognised as citizens in the several States, became also citizens of this new political body; but none other. . . . It becomes necessary, therefore, to determine who were citizens of the several States when the Constitution was adopted. And in order to do this, we must recur to the Governments and institutions of the thirteen colonies, when they separated from Great Britain and formed new sovereignties, and took their places in the family of independent nations. We must inquire who, at that time, were recognised as the people or citizens of a State, whose rights and liberties had been outraged by the English

Government; and who declared their independence, and assumed the powers of Government to defend their rights by force of arms. In the opinion of the court, the legislation and histories of the times, and the language used in the Declaration of Independence, show that neither the class of persons who had been imported as slaves, nor their descendants, whether they had become free or not, were then acknowledged as a part of the people, nor intended to be included in the general words used in that memorable instrument. It is difficult at this day to realize the state of public opinion in relation to that unfortunate race, which prevailed in the civilized and enlightened portions of the world at the time of the Declaration of Independence, and when the Constitution was framed and adopted. But the public history of every European nation displays it in a manner too plain to be mistaken. They had for more than a century before been regarded as beings of an inferior order, and altogether unfit to associate with the white race, either in social or political relations; and so far inferior that they had no rights which the white man was bound to respect; and that the negro might justly and lawfully be reduced to slavery for his benefit. He was bought and sold, and treated as an ordinary article of merchandise and traffic, whenever a profit could be made by it. This opinion was at that time fixed and universal in the civilized portion of the white race." Finally, having, with great elaboration, decided the question of citizenship adversely to Dred Scott and all his kind, the Court proceeded to obliterate the antislavery provision of the Missouri Compromise, which constituted one of the grounds on which Dred Scott claimed his freedom. "It is the opinion of the court," wrote Chief Justice Taney, "that the act of Congress which prohibited a citizen from holding and owning property of this kind in the territory of the United States north of the line therein mentioned, is not warranted by the Constitution, and is therefore void; and that neither Dred Scott himself, nor any of his family, were made free by being carried into this territory; even if they had been carried there by the owner, with the intention of becoming a permanent resident. We have so far examined the case, as it stands under the Constitution of the United States, and the powers thereby delegated to the Federal Government. But there is another point in the case which depends on State power and State law. And it is contended, on the part of the plaintiff, that he is made free by being taken to Rock Island, in the State of Illinois, independently of his residence in the territory of the United States; and being so made free, he was not again reduced to a state of slavery by being brought back to Missouri. Our notice of this part of the case will be very brief; for the principle on which it depends was decided in this court, upon much consideration, in the case of Strader et al. v. Graham, reported in 10th Howard, 82. In that case, the slaves had been taken from Kentucky to Ohio, with the consent of the owner, and afterwards brought back to Kentucky. And this court held that their status or condition, as free or slave, depended upon the laws of Kentucky, when they were brought back into that State, and not of Ohio; and that this court had no jurisdiction to revise the judgment of a State court upon its own laws. This was the point directly before the court, and the decision that this court had not jurisdiction turned upon it, as will be seen by the report of the case. So in this case. As Scott was a slave when taken into the State of Illinois by his owner, and was there held as such, and brought back in that character, his status, as free or slave, depended on the laws of Missouri, and not of Illinois. . . . Upon the whole, therefore, it is the judgment of this court, that it appears by the record before us that the plaintiff in error is not a citizen of Missouri, in the sense in which that word is used in the Constitution; and that the Circuit Court of the United States, for that reason, had no jurisdiction in the case, and could give no judgment in it. Its judgment for the defendant must, consequently, be reversed, and a mandate issued, directing the suit to be dismissed for want of jurisdiction."— *Report of the Decision of the Supreme Court of the U. S. in the case of Dred Scott vs. John F. A. Sandford* (*Howard's Reports, v.* 19).—"By this presentation of the iniquity, naked and in its most repulsive form, Taney did no small harm to the party which he intended to aid. It has been said that slavery plucked ruin on its own head by its aggressive violence. It could not help showing its native temper, nor could it help feeding its hunger of land, insisting on the restoration of its runaways, or demanding a foreign policy such as would fend off the approach of emancipation. But Taney's judgment was a gratuitous aggression and an insult to humanity at the same time, for which, supposing that the Southern leaders inspired it, they paid dear. If the slave was mere property, his owner might be entitled to take him anywhere, and thus slavery might be made national. The boast of a daring partisan of slavery might be fulfilled, that the day would come when men might be bought and sold in Boston as freely as any other goods. The issue, which all the politicians had striven to keep out of sight, was presented in its most startling and shocking form." — Goldwin Smith, *The United States, p.* 235.

A. D. 1858.—The Lincoln and Douglas debate in Illinois.—The senatorial term of Mr. Stephen A. Douglas being about to expire, the choice of his successor became an issue which controlled the election of members of the Illinois Legislature, in the fall of 1858. Mr. Douglas received an endorsement at the hands of the Democratic State Convention, in April, which virtually nominated him for re-election. Abraham Lincoln, who had come markedly to the front in his state during the Kansas discussions, "was the man already chosen in the hearts of the Republicans of Illinois for the same office, and therefore with singular appropriateness they passed, with great unanimity, at their convention in Springfield on the 16th of June, the characteristic resolution: 'That Hon. Abraham Lincoln is our first and only choice for United

States Senator to fill the vacancy about to be created by the expiration of Mr. Douglas' term of office.' There was of course no surprise in this for Mr. Lincoln. He had been all along led to expect it, and with that in view had been earnestly and quietly at work preparing a speech in acknowledgment of the honor about to be conferred on him. This speech he wrote on stray envelopes and scraps of paper, as ideas suggested themselves, putting them into that miscellaneous and convenient receptacle, his hat. As the convention drew near he copied the whole on connected sheets, carefully revising every line and sentence, and fastened them together, for reference during the delivery of the speech, and for publication. The former precaution, however, was unnecessary, for he had studied and read over what he had written so long and carefully that he was able to deliver it without the least hesitation or difficulty. . . . Before delivering his speech he invited a dozen or so of his friends over to the library of the State House, where he read and submitted it to them. After the reading he asked each man for his opinion. Some condemned and not one endorsed it. One man, more forcible than elegant, characterized it as a 'd—d fool utterance;' another said the doctrine was 'ahead of its time;' and still another contended that it would drive away a good many voters fresh from the Democratic ranks. Each man attacked it in his criticism. I was the last to respond. Although the doctrine announced was rather rank, yet it suited my views, and I said, 'Lincoln, deliver that speech as read and it will make you President.' At the time I hardly realized the force of my prophecy. Having patiently listened to these various criticisms from his friends—all of which with a single exception were adverse—he rose from his chair, and after alluding to the careful study and intense thought he had given the question, he answered all their objections substantially as follows: 'Friends, this thing has been retarded long enough. The time has come when these sentiments should be uttered; and if it is decreed that I should go down because of this speech, then let me go down linked to the truth—let me die in the advocacy of what is just and right.' The next day, the 17th, the speech was delivered just as we had heard it read. [The part of this famous speech which made the profoundest impression and gave rise to the most discussion was the opening part, contained in the following sentences: 'If we could first know where we are, and whither we are tending, we could better judge what to do, and how to do it. We are now far into the fifth year since a policy was initiated with the avowed object and confident promise of putting an end to slavery agitation. Under the operation of that policy, that agitation has not only not ceased, but has constantly augmented. In my opinion, it will not cease until a crisis shall have been reached and passed. "A house divided against itself cannot stand." I believe this government cannot endure permanently half slave and half free. I do not expect the Union to be dissolved—I do not expect the house to fall—but I do expect it will cease to be divided. It will become all one thing, or all the other. Either the opponents of slavery will arrest the further spread of it, and place it where the public mind shall rest in the belief that it is in the course of ultimate extinction; or its advocates will push it forward till it shall become alike lawful in all the States, old as well as new, North as well as South. Have we no tendency to the latter condition? Let any one who doubts carefully contemplate that now almost complete legal combination—piece of machinery, so to speak—compounded of the Nebraska doctrine and the Dred Scott decision. Let him consider not only what work the machinery is adapted to do, and how well adapted; but also let him study the history of its construction, and trace, if he can, or rather fail, if he can, to trace the evidences of design and concert of action among its chief architects, from the beginning.'] . . . Lincoln had now created in reality a more profound impression than he or his friends anticipated. Many Republicans deprecated the advanced ground he had taken, the more so as the Democrats rejoiced that it afforded them an issue clear and well-defined. Numbers of his friends distant from Springfield, on reading his speech, wrote him censorious letters; and one well-informed co-worker predicted his defeat, charging it to the first ten lines of the speech. These complaints, coming apparently from every quarter, Lincoln bore with great patience. To one complainant who followed him into his office he said proudly, 'If I had to draw a pen across my record, and erase my whole life from sight, and I had one poor gift or choice left as to what I should save from the wreck, I should choose that speech and leave it to the world unerased.' Meanwhile Douglas had returned from Washington to his home in Chicago. Here he rested for a few days until his friends and co-workers had arranged the details of a public reception on the 9th of July, when he delivered from the balcony of the Tremont House a speech intended as an answer to the one made by Lincoln in Springfield. Lincoln was present at this reception, but took no part in it. The next day, however, he replied. Both speeches were delivered at the same place. Leaving Chicago, Douglas passed on down to Bloomington and Springfield, where he spoke on the 16th and 17th of July respectively. On the evening of the latter day Lincoln responded again in a most effective and convincing effort. The contest now took on a different phase. Lincoln's Republican friends urged him to draw Douglas into a joint debate, and he accordingly sent him a challenge on the 24th of July. . . . On the 30th Douglas finally accepted the proposition to 'divide time, and address the same audiences,' naming seven different places, one in each Congressional district, outside of Chicago and Springfield, for joint meetings. The places and dates were, Ottawa, August 21; Freeport, August 27; Jonesboro, September 15; Charleston, September 18; Galesburg, October 7; Quincy, October 13; and Alton, October 15. . . . During the canvass Mr. Lincoln, in addition to the seven meetings with Douglas, filled thirty-one appointments made by the State Central Committee, besides speaking at many other times and places not previously advertised. . . . The election took place on the second of November, and while Lincoln received of the popular vote a majority of over 4,000, yet the returns from the legislative districts foreshadowed his defeat. In fact, when the Senatorial election took place in the Legislature, Douglas received 54 and Lincoln 46 votes—one of the results of the lamentable apportionment law then in operation."—W. H.

Herndon and J. W. Weik, *Lincoln, the True Story of a Great Life, ch.* 13 (*v.* 2).

A. D. 1859.—Admission of Oregon into the Union, with a constitution excluding free colored People. See OREGON: A. D. 1859.

A. D. 1859.—John Brown's attack on Slavery in Virginia.—The tragedy at Harper's Ferry.—"On the 17th of October, 1859, this country was bewildered and astounded while the fifteen Slave States were convulsed with fear, rage, and hate, by telegraphic dispatches from Baltimore and Washington, announcing the outbreak, at Harper's Ferry, of a conspiracy of Abolitionists and negroes, having for its object the devastation and ruin of the South, and the massacre of her white inhabitants. . . . As time wore on, further advices, with particulars and circumstances, left no room to doubt the substantial truth of the original report. An attempt had actually been made to excite a slave insurrection in Northern Virginia, and the one man in America to whom such an enterprise would not seem utter insanity and suicide, was at the head of it." This was John Brown, of Osawatomie, who had been fighting slavery and the border ruffians in Kansas (see Kansas: A. D. 1854–1859) for five years, and had now changed his field. "A secret convention, called by Brown, and attended only by such whites and blacks as he believed in thorough sympathy with his views, had assembled in a negro church at Chatham, Canada West, May 8, 1858; at which Convention a 'Provisional Constitution and Ordinances for the People of the United States' had been adopted. It was, of course, drafted by Brown, and was essentially an embodiment of his political views. . . . John Brown was chosen Commander-in-Chief; J. H. Kagi, Secretary of War; Owen Brown (son of John), Treasurer; Richard Realf, Secretary of State. Brown returned to the States soon after his triumphal entry into Canada as a liberator. . . . He was in Hagerstown, Md., on the 30th [of June, 1859], where he registered his name as 'Smith, and two sons, from Western New York.' He told his landlord that they had been farming in Western New York, but had been discouraged by losing two or three years' crops by frost, and they were now looking for a milder climate, in a location adapted to wool-growing, etc. After looking about Harper's Ferry for several days, they found, five or six miles from that village, a large farm, with three unoccupied houses, the owner, Dr. Booth Kennedy, having died the last Spring. These houses they rented for a trifle until the next March, paying the rent in advance. . . . After they had lived there a few weeks, attracting no observation, others joined them from time to time, including two of Brown's young daughters; and one would go and another come, without exciting any particular remark. . . . Meantime, the greater number of the men kept out of sight during the day, so as not to attract attention, while their arms, munitions, etc., were being gradually brought from Chambersburg, in well-secured boxes. No meal was eaten on the farm, while old Brown was there, until a blessing had been asked upon it; and his Bible was in daily requisition. The night of the 24th of October was originally fixed upon by Brown for the first blow against Slavery in Virginia, by the capture of the Federal Arsenal at Harper's Ferry; and his biographer, Redpath, alleges that many were on their way to be with him on that occasion, when they were paralyzed by the intelligence that the blow had already been struck, and had failed. The reason given for this, by one who was in his confidence, is, that Brown, who had been absent on a secret journey to the North, suspected that one of his party was a traitor, and that he must strike prematurely, or not at all. But the women who had been with them at the Kennedy farm — the wives or daughters of one or another of the party — had already been quietly sent away; and the singular complexion of their household had undoubtedly begun to excite curiosity, if not alarm, among their neighbors. . . . Harper's Ferry was then a village of some 5,000 inhabitants, lying on the Virginia side of the Potomac, and on either side of its principal tributary, the Shenandoah, which here enters it from the South. Its site is a mere nest or cup among high, steep mountains. . . . Here the Baltimore and Ohio Railroad crosses the Potomac. . . . Washington is 57 miles distant by turnpike; Baltimore 80 miles by railroad. . . . One of its very few streets was entirely occupied by the work-shops and offices of the National Armory, and had an iron railing across its entrance. In the old Arsenal building, there were usually stored from 100,000 to 200,000 stand of arms. The knowledge of this had doubtless determined the point at which the first blow of the liberators was to be struck. The forces with which Brown made his attack consisted of seventeen white and five colored men, though it is said that others who escaped assisted outside, by cutting the telegraph wires and tearing up the railroad track. The entrance of this petty army into Harper's Ferry on Sunday evening . . . seems to have been effected without creating alarm. They first rapidly extinguished the lights of the town; then took possession of the Armory buildings, which were only guarded by three watchmen, whom, without meeting resistance or exciting alarm, they seized and locked up in the guard-house. It is probable that they were aided, or, at least, guided, by friendly negroes belonging in the village. . . . At a quarter-past one, the western train arrived, and its conductor found the bridge guarded by armed men. . . . A little after midnight, the house of Col. Washington was visited by six of Brown's men under Capt. Stevens, who captured the Colonel, seized his arms, horses, etc., and liberated his slaves. On their return, Stevens and party visited the house of Mr. Alstadtt and his son, whom they captured, and freed their slaves. These, with each male citizen as he appeared in the street, were confined in the Armory until they numbered between forty and fifty. Brown informed his prisoners that they could be liberated on condition of writing to their friends to send a negro apiece as ransom. At daylight, the train proceeded, Brown walking over the bridge with the conductor. Whenever any one asked the object of their captors, the uniform answer was, 'To free the slaves;' and when one of the workmen, seeing an armed guard at the Arsenal gate, asked by what authority they had taken possession of the public property, he was answered, 'By the authority of God Almighty!' The passenger train that sped eastward from Harper's Ferry, by Brown's permission, in the early morning of Monday, October 17th, left that place

completely in the military possession of the insurrectionists. . . . But it was no longer entirely one-sided. The white Virginians, who had arms, and who remained unmolested in their houses, prepared to use them. . . . Several Virginians soon obtained possession of a room overlooking the Armory gates, and fired thence at the sentinels who guarded them, one of whom fell dead, and another — Brown's son Watson — was mortally wounded. Still, throughout the forenoon, the liberators remained masters of the town. . . . Had Brown chosen to fly to the mountains with his few followers, he might still have done so, though with a much slenderer chance of impunity than if he had, according to his original plan, decamped at midnight, with such arms and ammunition as he could bear away. Why he lingered, to brave inevitable destruction, is not certain; but it may fairly be presumed that he had private assurances that the negroes of the surrounding country would rise. . . . At all events, if his doom was already sealed, his delay at least hastened it. Half an hour after noon, a militia force, 100 strong, arrived from Charlestown, the county seat, and were rapidly disposed so as to command every available exit from the place. . . . Militia continued to pour in; the telegraph and railroad having been completely repaired, so that the Government at Washington, Gov. Wise at Richmond, and the authorities at Baltimore, were in immediate communication with Harper's Ferry, and hurrying forward troops from all quarters. . . . Night found Brown's forces reduced to three unwounded whites beside himself, with perhaps half a dozen negroes from the vicinity. Eight of the insurgents were already dead; another lay dying beside the survivors; two were captives mortally wounded, and one other unhurt. Around the few survivors were 1,500 armed, infuriated foes. . . . During that night, Col. Lee, with 90 United States marines and two pieces of artillery, arrived, and took possession of the Armory guard, very close to the engine-house. . . . At seven in the morning, after a parley which resulted in nothing, the marines advanced to the assault, broke in the door of the engine-house by using a ladder as a battering-ram, and rushed into the building. One of the defenders was shot and two marines wounded; but the odds were too great; in an instant, all resistance was over. Brown was struck in the face with a saber and knocked down, after which the blow was several times repeated, while a soldier ran a bayonet twice into the old man's body."—H. Greeley, *The American Conflict, v.* 1, *ch.* 20.—"The Virginians demonstrated amply during the Civil War that they were not cowards. What made them shake in their shoes was not John Brown and his handful of men, but the shadows which their excited imagination saw standing behind them. . . . The best evidence of the frightful genuineness of the panic is the brazen impudence with which it was brought forward as the justifying motive for the many atrocities which marked the trial. The brutalizing influences of slavery came to light with terrible vividness. Kapp's statement that Brown 'enjoyed very careful treatment' is not mistaken, but it is true only of the later period of his imprisonment. Watson Brown, whose life was prolonged until the early morning of the 19th of October, complained of the hard bench he was forced to lie on. His fellow-prisoner, Coppoc, begged for a mattress, or at least a blanket, for the dying man, but could obtain neither. Both Brown himself and Stevens, who was even more seriously wounded, had nothing furnished them but wretched straw. Redpath (p. 373) assures us that 'from October 19 till November 7 no clean clothing was given to Brown, but that he lay in his soiled and blood-stained garments just as he had fallen at Harper's Ferry.' On the 25th of October he was brought before the court; he was not at first carried there on a camp-bed, as was the case afterward, but compelled to walk, leaning on two men. Virginia could not wait till he could stand. . . . There was no such haste to carry out the sentence as there had been to bring the trial to a close. On the 2d of November, Brown was sentenced to suffer death by hanging on the 2d of December."—H. von Holst, *John Brown, pp.* 139–155. "Brown actually expected that the raid on Harper's Ferry would be the stroke with which Moses called forth water from the rock. The spring was to turn southward, and in its swift course to swell to a mighty river. He declared expressly to Governor Wise, and later still in his letters, that he had not intended simply to break the chains of a few dozen or a few hundred slaves, and to take them again to Canada. Emancipation was to be spread farther and farther, and the freedmen were to remain in the Southern States. Heaven itself could not have brought this about, unless it had sent the angel of judgment to cast down into the dust the whole white population from Florida to Maine." At the last, when John Brown, wounded and a prisoner, lay waiting his death, "he did not perceive that his undertaking could not have succeeded under any circumstances; but he did see that his failure and its consequences achieved much greater results than its most complete success could have done. . . . 'I can leave to God,' he writes, 'the time and manner of my death, for I believe now that the sealing of my testimony before God and man with my blood will do far more to further the cause to which I have earnestly devoted myself, than anything else I have done in my life.' And a few days later, 'My health improves slowly, and I am quite cheerful concerning my approaching end, since I am convinced that I am worth infinitely more on the gallows than I could be anywhere else.'. . . One year after the execution of Brown, on the 20th of December, 1860, South Carolina declared its secession from the Union, and on May 11, 1861, the Second Massachusetts Regiment of infantry was raised, which was first to sing on its march South,—'John Brown's body lies mouldering in the grave, His soul goes marching on.'"—H. von Holst, *John Brown, pp.* 139–155, 125–126, 167–175.—"Editors persevered for a good while in saying that Brown was crazy; but at last they said only that it was 'a crazy scheme,' and the only evidence brought to prove it was that it cost him his life. I have no doubt that if he had gone with 5,000 men, liberated 1,000 slaves, killed a hundred or two slaveholders, and had as many more killed on his own side, but not lost his own life, these same editors would have called it by a more respectable name. Yet he has been far more successful than that."—H. D. Thoreau, *The Last Days of John Brown* (*Anti-Slavery and Reform Papers*).

Immigration in the preceding decade added 2,598,214 to the population, being 1,338,093 from the British Islands, and 1,114,564 from other parts of Europe.

A. D. 1860.—The Southern view of Slavery.—The state of opinion and feeling on the subject of slavery to which the people of the southern states had arrived in 1860 is set forth with brevity and distinctness in Claiborne's Life of General Quitman, which was published that year: "In the early stages of African slavery in the South," says the writer, "it was by many considered an evil, that had been inflicted upon the country by British and New England cupidity. The Africans were regarded as barbarians, and were governed by the lash. The very hatred of the 'evil' forced upon us was, in a measure, transferred to the unhappy victims. They were treated with severity, and no social relations subsisted between them and the whites. By degrees slavery began to be considered 'a necessary evil,' to be got rid of by gradual emancipation, or perhaps not at all, and the condition of the slave sensibly improved. The natural sense of justice in the human heart suggested that they had been brought here by compulsion, and that they should be regarded not as savages, but as captives, who were to be kindly treated while laboring for their ultimate redemption. The progress of anti-slavery sentiment in the Northern States (once regarded by the South as a harmless fanaticism), the excesses it has occasioned, and the unconstitutional power it claims, at length prompted a general and searching inquiry into the true status of the negro. The moment that the Southern mind became convinced, that slavery, as it exists among us, instead of being a moral, social, and political evil, is a moral, social, and political good, and is the natural condition of the negro, as ordained by Providence, and the only condition in which he can be civilized and instructed, the condition of the Southern slave underwent a thorough change. As a permanent fixture, as a hereditary heirloom, as a human being with an immortal soul, intrusted to us by God for his own wise purposes, his value increased, and his relation to his owner approximated to the relation of guardian and ward. Interest taught us that it would be wise to cherish what was to be the permanent means of production and profit, and religion exacted the humane and judicious employment of the 'talent' committed to our care. Thus the most powerful influences that sway the heart and the judgment are in operation for the benefit of the slave, and hence his present comfortable and constantly ameliorating condition. It is due, almost solely, to the moral convictions of the slaveholder. Our laws protect the slave in life and limb, and against cruel and inordinate punishment. Those laws are rigorously applied, though rarely necessary, for public opinion, more formidable than law, would condemn to execration and infamy the unjust and cruel master. Since these convictions in regard to slavery have been adopted almost unanimously in the South, the value of negroes has quadrupled. This, however, is in some measure an evil, because the tendency is to concentrate the slaves in the hands of the few, who are able to pay the extraordinary rates now demanded. It would be better for the commonwealth, and give additional solidity to our system of domestic servitude, if every family had an interest in it, secured, to a limited extent, against liability for debt. It should constitute in the South, if practicable, a part of every homestead, and then interest, and household tradition, and the friendly, confidential, and even affectionate relations that in the present state of public feeling prevail between master and slave, would unite all men in its defense. Neither land, nor slaves, which are here more valuable than land, should, by either direct or indirect legislation, be concentrated in few hands. Every citizen should have, if possible, that immediate interest in them

which would make him feel that, in defending the commonwealth and its institutions, he is defending his own inheritance."—J. F. H. Claiborne, *Life and Corr. of John A. Quitman, v.* 1, *ch.* 4.

A. D. 1860 (April—November).—Nineteenth Presidential Election.—Division of the Democratic Party.—Four candidates in the field.—A victory for freedom in the choice of Abraham Lincoln.—"Mr. J. W. Fell, a politician of Pennsylvania, says that after the debates of 1858 [with Douglas] he urged Lincoln to seek the Republican nomination for the presidency in 1860. Lincoln, however, replied curtly that men like Seward and Chase were entitled to take precedence, and that no such 'good luck' was in store for him. . . . In the winter of 1859–60 sundry 'intimate friends,' active politicians of Illinois, pressed him to consent to be mentioned as a candidate. He considered the matter over night and then gave them the desired permission, at the same time saying that he would not accept the vice-presidency. . . . With the opening of the spring of 1860 the several parties began the campaign in earnest. The Democratic Convention met first, at Charleston, April 23; and immediately the line of disruption opened. Upon the one side stood Douglas, with the moderate men and nearly all the Northern delegates, while against him were the advocates of extreme Southern doctrines, supported by the administration and by most of the delegates from the 'Cotton States.' The majority of the committee appointed to draft the platform were anti-Douglas men; but their report was rejected, and that offered by the pro-Douglas minority was substituted, 165 yeas to 138 nays. Thereupon the delegations of Alabama, Mississippi, Florida, and Texas, and sundry delegates from other States, withdrew from the Convention, taking away 45 votes out of a total of 303. Those who remained declared the vote of two thirds of a full Convention, i. e., 202 votes, to be necessary for a choice. Then during three days 57 ballots were cast, Douglas being always far in the lead, but never polling more than 152½ votes. At last, on May 3, an adjournment was had until June 18, at Baltimore. At this second meeting contesting delegations appeared, and the decisions were uniformly in favor of the Douglas men, which provoked another secession of the extremist Southern men. A ballot showed 173½ votes for Douglas out of a total of 191½; the total was less than two thirds of the full number of the original Convention, and therefore it was decided that any person receiving two thirds of the votes cast by the delegates present should be deemed the nominee. The next ballot gave Douglas 181½. Herschel V. Johnson of Georgia was nominated for vice-president. On June 28, also at Baltimore [after a meeting and adjournment from Richmond, June 11], there came together a collection composed of original seceders at Charleston, and of some who had been rejected and others who had seceded at Baltimore. Very few Northern men were present, and the body in fact represented the Southern wing of the Democracy. Having, like its competitor, the merit of knowing its own mind, it promptly nominated John C. Breckenridge of Kentucky and Joseph Lane of Oregon, and adopted the radical platform which had been reported at Charleston. These doings opened, so that it could never be closed, that seam of which the thread had long been visible athwart the surface of the old Democratic party. . . . In May the Convention of the Constitutional Union party met, also at Baltimore. This organization was a sudden outgrowth designed only to meet the present emergency. . . . The party died, of necessity, upon the day when Lincoln was elected, and its members were then distributed between the Republicans, the Secessionists, and the Copperheads. John Bell, of Tennessee, the candidate for the presidency, joined the Confederacy; Edward Everett, of Massachusetts, the candidate for the vice-presidency, became a Republican. The party never had a hope of electing its men; but its existence increased the chance of throwing the election into Congress; and this hope inspired exertions far beyond what its own prospects warranted. On May 16 the Republican Convention came together at Chicago, where the great 'Wigwam' had been built to hold 10,000 persons. . . . Many candidates were named, chiefly Seward, Lincoln, Chase, Cameron, Edward Bates of Missouri, and William L. Dayton of New Jersey. Thurlow Weed was Seward's lieutenant. Horace Greeley, chiefly bent upon the defeat of Seward, would have liked to achieve it by the success of Bates. David Davis, aided by Judge Logan and a band of personal friends from Illinois, was manager for Lincoln. Primarily the contest lay between Seward and Lincoln. . . . Upon the third ballot . . . those who were keeping the tally saw that it stood:—Seward, 180; Lincoln, 231½; Chase, 24½; Bates, 22; Dayton, 1; McLean, 5; Scattering, 1. . . . Before the count could be announced, a delegate from Ohio transferred four votes to Lincoln. This settled the matter; and then other delegations followed, till Lincoln's score rose to 354. . . . Later in the day the convention nominated Hannibal Hamlin of Maine, on the second ballot, by 367 votes, for the vice-presidency. . . . Almost from the beginning it was highly probable that the Republicans would win, and it was substantially certain that none of their competitors could do so. The only contrary chance was that no election might be made by the people, and that it might be thrown into Congress."—J. T. Morse, Jr., *Abraham Lincoln, v.* 1, *ch.* 6.—At the popular election, the votes were: Lincoln, 1,866,452 (Free-States vote, 1,840,022, Slave States vote, 26,430); Douglas, 1,375,157 (Free States vote, 1,211,632, Slave States vote, 163,525); Breckenridge, 847,953 (Free States vote, 277,082, Slave States vote, 570,871); Bell, 590,631 (Free States vote, 74,658, Slave States vote, 515,973). In the Electoral College, the four candidates were voted for as follows: Lincoln, 180; Breckenridge, 72; Bell, 39; Douglas, 12.—E. Stanwood, *Hist. of Presidential Elections, ch.* 20.

Also in: H. W. Raymond, *Life of Lincoln, ch.* 4.—E. McPherson, *Pol. Hist. of the U. S. during the Great Rebellion, p.* 1.—J. G. Holland, *Life of Lincoln, ch.* 15–16.—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 2, *ch.* 13–16.—J. F. Rhodes, *Hist. of the U. S. from* 1850, *ch.* 11 (*v.* 2).

A. D. 1860 (November—December). — The plotting of the rebellion.—Secession of South Carolina.—"The long-hoped-for opportunity of trying the experiment of secession was now at last presented. Abraham Lincoln had been

elevated to the presidency by a strictly sectional vote; and though the fact could not be denied that he had been elected in a perfectly constitutional manner, . . . yet, no sooner was it ascertained that it was almost certain that he would receive a majority of the electoral votes of the whole Union, than steps began to be taken for carrying into effect a revolutionary project which had engrossed the thoughts and sensibilities of a small class of extreme Southern politicians, mainly confined to the State of South Carolina, for some thirty years preceding. . . . So thoroughly matured was the project of secession in the minds of Southern extremists in South Carolina, that they are known actually to have commenced movements looking to this desired end before even the presidential election had taken place, and when the result which soon ensued was yet but a strong probability. Accordingly we find Governor Gist, as early as the 5th of November, 1860, addressing a message to the South Carolina Legislature, embodying the following bold and explicit declarations. . . . 'That an exposition of the will of the people may be obtained on a question involving such momentous consequences, I would earnestly recommend that, in the event of Abraham Lincoln's election to the presidency, a Convention of the people of this state be immediately called, to consider and determine for themselves the mode and measure of redress. My own opinions of what the Convention should do are of little moment; but, believing that the time has arrived when every one, however humble he may be, should express his opinions in unmistakable language, I am constrained to say that the only alternative left, in my judgment, is the secession of South Carolina from the Federal Union. The indications from many of the Southern States justify the conclusion that the secession of South Carolina will be immediately followed, if not adopted simultaneously by them, and ultimately by the entire South. . . . I would also respectfully recommend a thorough reorganization of the militia, so as to place the whole military force of the state in a position to be used at the shortest notice and with the greatest efficiency. . . . In addition to this general preparation, I would recommend that the services of 10,000 volunteers be immediately accepted.'. . . I desire not to particularize on this painful subject to an extent which might now prove annoying, and therefore proceed briefly to state that the Legislature of South Carolina provided for the assemblage of a state Convention, the members of which were to be elected on the 6th of December, while the conventional body itself was to come together on the 19th of the same month; that the Convention did assemble on the last-mentioned day, and, after an excited debate of several days' continuance, adopted an Ordinance of Secession on the 20th of December. Commissioners were sent with a copy of the ordinance to each of the slave states, in order to quicken co-operative action, and notification was duly made as to these events to the Federal government in Washington City. The next secession movement it was expected would come off in the State of Georgia. A Convention for this purpose had been already called. It was known that Alexander H. Stephens, Herschel V. Johnson, and other public men, of elevated standing and of extended influence, would be members of the Convention, and it was expected that they would exert themselves to the utmost to prevent the imitation by the State of Georgia of the rash example which had just been set by South Carolina; and it was likewise known that eminent personages from the State of South Carolina would attend the Convention of Georgia, in order to urge immediate co-operation. Under these circumstances, I took it upon myself to persuade the public men of most influence in the city of Nashville, where I was then residing, to send ten or fifteen delegates forthwith to Milledgeville, respectfully and earnestly to protest against extreme action on the part of Georgia. . . . I urged these views for several days most zealously, but, I regret to say, without success; some supposing that there was no serious danger of the Convention of Georgia adopting an Ordinance of Secession, and others that there was reason to fear, if we should send delegates to Milledgeville, it might result in fatally compromising our own attitude. The manly opposition made by Mr. Stephens to the attempt to draw Georgia into the Secession maelstrom is well known. This want of success is a circumstance which I shall ever deplore as the most unfortunate event of a public nature which has occurred within my recollection. Alabama, Florida, Mississippi, Louisiana, and Texas were now soon enrolled among the seceded States. Tennessee, North Carolina, Virginia, Arkansas, Kentucky, Maryland, Missouri, and Delaware still stood firm, despite all the efforts essayed to shake their constancy. It is indeed true, as Mr. Greeley has deliberately recorded, that after the secession 'conspiracy had held complete possession of the Southern mind for three months, with the Southern members of the cabinet, nearly all the Federal officers, most of the governors and other state functionaries, and seven eighths of the prominent and active politicians pushing it on, and no force exerted against nor in any manner threatening to resist it, a majority of the slave states, with two thirds of the free population of the entire slaveholding region, was openly and positively adverse to it, either because they regarded the alleged grievances of the South as exaggerated if not unreal, or because they believed that those wrongs would rather be aggravated than cured by disunion.'"—H. S. Foote, *War of the Rebellion, ch.* 15.

ALSO IN: J. G. Nicolay, *The Outbreak of Rebellion, ch.* 1.—S. W. Crawford, *The Genesis of the Civil War, ch.* 2–5.—F. Moore, ed., *Rebellion Record, v.* 1.

The following is the South Carolina Ordinance of Secession, adopted December 20, together with the Declaration of Causes which was promulgated by the Convention four days later:

"An Ordinance to dissolve the Union between the State of South Carolina and other States united with her under the compact entitled 'The Constitution of the United States of America.'

We, the People of the State of South Carolina, in Convention assembled, do declare and ordain, and it is hereby declared and ordained. That the Ordinance adopted by us in Convention, on the twenty-third day of May, in the year of our Lord one thousand seven hundred and eighty-eight, whereby the Constitution of the United States of America was ratified, and also, all Acts and parts of Acts of the General Assembly of this State, ratifying amendments of the said Con-

stitution, are hereby repealed; and that the union now subsisting between South Carolina and other States, under the name of 'The United States of America,' is hereby dissolved."

"Declaration of the immediate causes which induce and justify the secession of South Carolina from the Federal Union:

The People of the State of South Carolina, in Convention assembled, on the 26th day of April, A. D., 1852, declared that the frequent violations of the Constitution of the United States, by the Federal Government, and its encroachments upon the reserved rights of the States, fully justified this State in then withdrawing from the Federal Union; but in deference to the opinions and wishes of the other slaveholding States, she forbore at that time to exercise this right. Since that time, these encroachments have continued to increase, and further forbearance ceases to be a virtue. And now the State of South Carolina having resumed her separate and equal place among nations, deems it due to herself, to the remaining United States of America, and to the nations of the world, that she should declare the immediate causes which have led to this act. In the year 1765, that portion of the British Empire embracing Great Britain, undertook to make laws for the government of that portion composed of the thirteen American Colonies. A struggle for the right of self-government ensued, which resulted, on the 4th July, 1776, in a Declaration, by the Colonies, 'that they are, and of right ought to be, free and independent States; and that, as free and independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent States may of right do.' They further solemnly declared that whenever any 'form of government becomes destructive of the ends for which it was established, it is the right of the people to alter or abolish it, and to institute a new government.' Deeming the Government of Great Britain to have become destructive of these ends, they declared that the Colonies 'are absolved from all allegiance to the British Crown, and that all political connection between them and the State of Great Britain is, and ought to be, totally dissolved.' In pursuance of this Declaration of Independence, each of the thirteen States proceeded to exercise its separate sovereignty; adopted for itself a Constitution, and appointed officers for the administration of government in all its departments — Legislative, Executive and Judicial. For purposes of defence, they united their arms and their counsels; and, in 1778, they entered into a League known as the Articles of Confederation, whereby they agreed to entrust the administration of their external relations to a common agent, known as the Congress of the United States, expressly declaring, in the first article, 'that each State retains its sovereignty, freedom and independence, and every power, jurisdiction and right which is not, by this Confederation, expressly delegated to the United States in Congress assembled. Under this Confederation the War of the Revolution was carried on, and on the 3d September, 1783, the contest ended, and a definitive Treaty was signed by Great Britain, in which she acknowledged the Independence of the Colonies in the following terms: 'Article 1.— His Britannic Majesty acknowledges the said United States, viz: New Hampshire, Massachusetts Bay, Rhode Island and Providence Plantations, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina and Georgia, to be free, sovereign and independent States; that he treats with them as such; and for himself, his heirs and successors, relinquishes all claims to the government, propriety and territorial rights of the same and every part thereof.' Thus were established the two great principles asserted by the Colonies, namely: the right of a State to govern itself; and the right of a people to abolish a Government when it becomes destructive of the ends for which it was instituted. And concurrent with the establishment of these principles, was the fact, that each Colony became and was recognized by the mother Country as a free, sovereign and independent State. In 1787, Deputies were appointed by the States to revise the Articles of Confederation, and on 17th September, 1787, these Deputies recommended, for the adoption of the States, the Articles of Union, known as the Constitution of the United States. The parties to whom this Constitution was submitted, were the several sovereign States; they were to agree or disagree, and when nine of them agreed, the compact was to take effect among those concurring; and the General Government, as the common agent, was then to be invested with their authority. If only nine of the thirteen States had concurred, the other four would have remained as they were—separate sovereign States, independent of any of the provisions of the Constitution. In fact, two of the States did not accede to the Constitution until long after it had gone into operation among the other eleven; and during that interval, they each exercised the functions of an independent nation. By this Constitution, certain duties were imposed upon the several States, and the exercise of certain of their powers was restrained, which necessarily implied their continued existence as sovereign States. But, to remove all doubt, an amendment was added, which declared that the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people. On 23d May, 1788, South Carolina, by a Convention of her people, passed an Ordinance assenting to this Constitution, and afterwards altered her own Constitution, to conform herself to the obligations she had undertaken. Thus was established, by compact between the States, a Government, with defined objects and powers, limited to the express words of the grant. This limitation left the whole remaining mass of power subject to the clause reserving it to the States or to the people, and rendered unnecessary any specification of reserved rights. We hold that the Government thus established is subject to the two great principles asserted in the Declaration of Independence; and we hold further, that the mode of its formation subjects it to a third fundamental principle, namely: the law of compact. We maintain that in every compact between two or more parties, the obligation is mutual; that the failure of one of the contracting parties to perform a material part of the agreement, entirely releases the obligation of the other; and that where no arbiter is provided, each party is remitted to his own judgment to determine the fact of failure, with all its consequences.

In the present case, that fact is established with certainty. We assert, that fourteen of the States have deliberately refused for years past to fulfil their constitutional obligations, and we refer to their own Statutes for the proof. The Constitution of the United States, in its 4th Article, provides as follows: 'No person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up, on claim of the party to whom such service or labor may be due.' This stipulation was so material to the compact, that without it that compact would not have been made. The greater number of the contracting parties held slaves, and they had previously evinced their estimate of the value of such a stipulation by making it a condition in the Ordinance for the government of the territory ceded by Virginia, which now composes the States north of the Ohio river. The same article of the Constitution stipulates also for rendition by the several States of fugitives from justice from the other States. The General Government, as the common agent, passed laws to carry into effect these stipulations of the States. For many years these laws were executed. But an increasing hostility on the part of the non-slaveholding States to the Institution of Slavery has led to a disregard of their obligations, and the laws of the General Government have ceased to effect the objects of the Constitution. The States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Illinois, Indiana, Michigan, Wisconsin and Iowa, have enacted laws which either nullify the Acts of Congress or render useless any attempt to execute them. In many of these States the fugitive is discharged from the service or labor claimed, and in none of them has the State Government complied with the stipulation made in the Constitution. The State of New Jersey, at an early day, passed a law in conformity with her constitutional obligation; but the current of anti-slavery feeling has led her more recently to enact laws which render inoperative the remedies provided by her own law and by the laws of Congress. In the State of New York even the right of transit for a slave has been denied by her tribunals; and the States of Ohio and Iowa have refused to surrender to justice fugitives charged with murder, and with inciting servile insurrection in the State of Virginia. Thus the constitutional compact has been deliberately broken and disregarded by the non-slaveholding States, and the consequence follows that South Carolina is released from her obligation. The ends for which this Constitution was framed are declared by itself to be 'to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity.' These ends it endeavored to accomplish by a Federal Government, in which each State was recognized as an equal, and had separate control over its own institutions. The right of property in slaves was recognized by giving to free persons distinct political rights, by giving them the right to represent, and burthening them with direct taxes for three-fifths of their slaves; by authorizing the importation of slaves for twenty years; and by stipulating for the rendition of fugitives from labor. We affirm that these ends for which this Government was instituted have been defeated, and the Government itself has been made destructive of them by the action of the non-slaveholding States. Those States have assumed the right of deciding upon the propriety of our domestic institutions; and have denied the rights of property established in fifteen other States and recognized by the Constitution; they have denounced as sinful the institution of Slavery; they have permitted the open establishment among them of societies, whose avowed object is to disturb the peace and to claim the property of the citizens of other States. They have encouraged and assisted thousands of our slaves to leave their homes; and those who remain, have been incited by emissaries, books and pictures to servile insurrection. For twenty-five years this agitation has been steadily increasing, until it has now secured to its aid the power of the Common Government. Observing the forms of the Constitution, a sectional party has found within that article establishing the Executive Department, the means of subverting the Constitution itself. A geographical line has been drawn across the Union, and all the States north of that line have united in the election of a man to the high office of President of the United States whose opinions and purposes are hostile to slavery. He is to be entrusted with the administration of the Common Government, because he has declared that that 'Government cannot endure permanently half slave, half free,' and that the public mind must rest in the belief that Slavery is in the course of ultimate extinction. This sectional combination for the subversion of the Constitution, has been aided in some of the States by elevating to citizenship, persons, who, by the Supreme Law of the land, are incapable of becoming citizens; and their votes have been used to inaugurate a new policy, hostile to the South, and destructive of its peace and safety. On the 4th March next, this party will take possession of the Government. It has announced, that the South shall be excluded from the common Territory; that the Judicial Tribunals shall be made sectional, and that a war must be waged against slavery until it shall cease throughout the United States. The Guaranties of the Constitution will then no longer exist; the equal rights of the States will be lost. The slaveholding States will no longer have the power of self-government, or self-protection, and the Federal Government will have become their enemy. Sectional interest and animosity will deepen the irritation, and all hope of remedy is rendered vain, by the fact that public opinion at the North has invested a great political error with the sanctions of a more erroneous religious belief. We, therefore, the people of South Carolina, by our delegates, in Convention assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, have solemnly declared that the Union heretofore existing between this State and the other States of North America, is dissolved, and that the State of South Carolina has resumed her position among the nations of the world, as a separate and independent State; with full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent States may of right do."

A. D. 1860 (December).—President Buchanan's surrender.—His disunion message and its evil effects.—Congress met on the first Monday of December and received from President Buchanan "his mischievous and deplorable message . . . —a message whose evil effect can never be estimated, and whose evil character can hardly be exaggerated. The President informed Congress that 'the long-continued and intemperate interference of the Northern people with the question of slavery in the Southern States has at last produced its natural effect.' . . . The President found that the chief grievance of the South was in the enactments of the Free States known as 'personal liberty laws' [designed to protect free citizens, black or white, in their right to trial by jury, which the fugitive slave law denied to a black man claimed as a slave]. . . . Very likely these enactments, inspired by an earnest spirit of liberty, went in many cases too far, and tended to produce conflicts between National and State authority. That was a question to be determined finally and exclusively by the Federal Judiciary. Unfortunately Mr. Buchanan carried his argument beyond that point. . . . After reciting the statutes which he regarded as objectionable and hostile to the constitutional rights of the South, and after urging their unconditional repeal upon the North, the President said: 'The Southern States, standing on the basis of the Constitution, have a right to demand this act of justice from the States of the North. Should it be refused, then the Constitution, to which all the States are parties, will have been willfully violated. . . . In that event, the injured States, after having used all peaceful and constitutional means to obtain redress, would be justified in revolutionary resistance to the government of the Union.' By this declaration the President justified, and in effect advised, an appeal from the constitutional tribunals of the country to a popular judgment in the aggrieved States, and recognized the right of those States, upon such popular judgment, to destroy the Constitution and the Union. . . . Mr. Buchanan proceeded to argue ably and earnestly against the assumption by any State of an inherent right to secede from the government at its own will and pleasure. But he utterly destroyed the force of his reasoning by declaring that, 'after much serious reflection' he had arrived at 'the conclusion that no power has been delegated to Congress, or to any other department of the Federal Government, to coerce a State into submission which is attempting to withdraw, or has actually withdrawn,' from the Union. . . . Under these doctrines the Government of the United States was shorn of all power to preserve its own existence, and the Union might crumble and fall while its constituted authorities stood paralyzed and impotent. This construction was all that the extremists of the South desired. With so much conceded, they had every thing in their own hands. . . . Men who, under the wholesome restraint of executive power, would have refrained from taking aggressive steps against the National Government, were by Mr. Buchanan's action forced into a position of hostility. Men in the South, who were disposed to avoid extreme measures, were by taunt and reproach driven into the ranks of Secession. . . . The evil effects of Mr. Buchanan's message were not confined to the slave States. It did incalculable harm in the free States. It fixed in the minds of tens of thousands of Northern men who were opposed to the Republican party, the belief that the South was justified in taking steps to break up the government, if what they termed a war on Southern institutions should be continued. This feeling had in turn a most injurious influence in the South."—J. G. Blaine, *Twenty Years in Congress, v.* 1, *ch.* 10.

A. D. 1860 (December).—Vain concessions and humiliations of the North proposed.—The Crittenden compromise.—"When, in the House of Representatives, Mr. Boteler, of Virginia, proposed to refer so much of the President's Message as related to the perilous condition of the country to a committee of thirty-three —one from each state—not less than 52 members from the Slave States refused to vote. 'I pay no attention to any action taken in this body,' said one. 'I am not sent here to patch up difficulties,' said another. The Democratic members from the Free States did their utmost to compose the dissension—some of them who subsequently became conspicuous in the war—suggesting concessions which doubtless they looked back upon with regret. It was proposed that persons of African blood should never be considered as citizens of the United States; that there should never be any interference with slavery in the Territories, nor with the interstate slave-trade; that the doctrine of state-rights should be admitted, and power of coercion denied to the government. Among the dissatisfied members, one would allow any state at pleasure to secede, and allot it a fair share of the public property and territory. Another would divide the Union into four republics; another would abolish the office of President, and have in its stead a council of three, each of whom should have a veto on every public act. Propositions such as these show to what length the allies of the slave power would have gone to preserve it and give it perpetuity. At this stage, Mr. Crittenden [Senator John J. Crittenden of Kentucky], proposed in the Senate certain amendments of the Constitution, and resolutions known subsequently as the Crittenden Compromise. The essential features of his plan were the re-establishing of the Missouri Compromise: that in all territory of the United States north of 36° 30′ slavery should be prohibited; in all south of that line, not only permitted, but protected; that from such territory north or south states might be admitted with or without slavery, as the Constitution of each might determine; that Congress should have no power to abolish slavery in places under its jurisdiction in a slave state, nor in the District of Columbia, without the consent of the adjoining states, nor without compensation to the slaveholders, nor to prevent persons connected with the government bringing their slaves into the District; that Congress should have no power to hinder the interstate or territorial transport of slaves; that the national government should pay a full value to the owner of a fugitive slave who might have been rescued from the officers; that no amendments of the Constitution should ever be made which might affect these amendments, or other slave compromises already existing in the Constitution. He also recommended to the states that had enacted

laws in conflict with the existing fugitive slave acts, their repeal; and in four resolutions made provision for the more perfect execution of those acts. But the dissension was too deep to be closed by such a measure as Mr. Crittenden's, which contained nothing that could satisfy the North. The South was resolved not to be satisfied with any thing. It had taken what was plainly an irreversible step. Accordingly, Mr. Crittenden's proposition was eventually lost."— J. W. Draper, *Hist. of the Am. Civil War, ch.* 31 (*sect.* 6, *v.* 1).

A. D. 1860 (December).—Major Anderson at Fort Sumter.—Floyd's treachery in the War Department.—Cabinet rupture.—Loyalty reinstated in the national government.—"In November, 1860, the fortifications of Charleston Harbor consisted of three works — Castle Pinckney, an old-fashioned, circular brick fort, on Shute's Folly Island, and about one mile east of the city; Fort Moultrie, on Sullivan's Island, still farther to the east, and famous as being on the site of the old fort of palmetto logs, where, during the long bombardment by the British fleet in Revolutionary days, the gallant William Jasper leaped from the low rampart upon the beach below, and seizing the flag that had been shot down, rehoisted it above the fort; and lastly, Fort Sumter, an unfinished fortification, named after General Thomas Sumter, the famous partisan leader of the Revolution, and who was familiarly known as the 'gamecock of the Carolinas.' The armament of Castle Pinckney consisted of 22 cannon, 2 mortars, and 4 light pieces; that of Moultrie of 45 cannon and 7 light pieces; while Sumter mounted 78 heavy guns of various calibre. The entire force of United States troops in these fortifications was composed of two weak companies of artillery under command of Major Robert Anderson, and a few engineer employees under Captain John G. Foster. Of these a sergeant and squad of men were stationed at Castle Pinckney for the care of the quarters and the guns; a similar handful were at Sumter; while most of the little force were at Moultrie, where Anderson had his headquarters. Such was the military situation when South Carolina began to proclaim, without disguise, her purpose to secede and to possess herself of the fortifications on her coast. . . . Our Government paid no apparent heed, and yet the authorities at Washington were fully and betimes forewarned. . . . On the files of the Engineer Department I found a letter, which still remains there, dated as early as November 24, 1860, from Captain Foster to Colonel De Russy, then the chief of the engineer corps, in which the captain states that, at the request of Major Anderson, he has, in company with that officer, made a thorough inspection of the forts in the harbor; that, in the opinion of Anderson, one additional company of artillery should at once be sent to garrison Castle Pinckney, which in the terse language of the letter, 'commands the city of Charleston.' Upon the back of the letter is the simple but significant indorsement, in his own hand-writing, 'Return to Governor Floyd.' You may recall him as Mr. Buchanan's Secretary of War. On November 30, Captain Foster again writes to Colonel De Russy, saying: 'I think that more troops should have been sent here to guard the forts, and I believe that no serious demonstration on the part of the populace would have met such a course.' On this is indorsed: 'Colonel Cooper says this has been shown to the Secretary of War. H. G. W.' The initials, placed there by himself, are those of the gallant Horatio G. Wright, who succeeded to the command of the Sixth Army Corps after the loved Sedgwick fell. On December 2, application was made by Captain Foster for the small supply of four boxes of muskets and sixty rounds of cartridge per man, to arm the few civilians or hired laborers who constituted the engineer corps. These arms and ammunition were in the United States arsenal at Charleston, a building which still had a Federal keeper, and over which still floated the Federal flag. On this application is the following indorsement, also in General Wright's handwriting: 'Handed to adjutant-general, and by him laid before the Secretary of War on the sixth of December. Returned by adjutant-general on the seventh. Action deferred for the present. See Captain Foster's letter of December 4.' . . . On December 17, Captain Foster, acting on his own patriotic judgment, but without orders, went to Charleston and took from the Federal arsenal forty muskets, with which to arm his laborers. Early on the morning of the 19th, he received a telegram from Secretary Floyd, directing him instantly to return the arms to the arsenal. On the next day, the 20th, the South Carolinians decided, in State convention, to secede, and proclaimed their State an independent sovereignty. . . . All alike were delirious with the epidemic madness of the hour, were hopeful, resolute, enthusiastic. Bells pealed and cannon boomed. . . . But few ventured to breast the storm. There was one, whose name should live honored in a nation's memory, a wise, true man, the greatest lawyer of his State, James L. Pettigrew, who, when his minister first dropped from the service the prayer for the President of the United States, rose in his pew in the middle aisle of Charleston's most fashionable church, and slowly and with distinct voice repeated: 'Most humbly and heartily we beseech Thee with Thy favor to behold and bless Thy servant, the President of these United States.' Then, placing his prayer-book in the rack, and drawing his wife's arm within his own, he left the church, nor entered it again until his body was borne there for burial. To their honor be it said, that even the Carolinians respected his sincerity and candor, and never molested him. . . . On the night of December 26, Major Anderson evacuated Fort Moultrie, which was untenable by his small force, spiked his guns, burned the gun-carriages, and transferred his small command in two schooners to Fort Sumter. This act was without orders and against the do-nothing and helpless policy which had thus far controlled the Government. But it showed the wisdom and prompt decision of the trained soldier and the spirit of the loyal citizen. . . . Let us recall the appearance of Sumter when Anderson transferred his feeble garrison to its protection. The fort was built on an artificial island, which had been constructed by dumping stone upon a shoal that lay on the south side of the principal ship channel to Charleston Harbor. Sumter was pentagonal in form, and its five sides of brick, made solid by

concrete, rose 60 feet above the water. It was pierced for an armament of 135 guns, which were to be placed in three tiers. Two tiers were to be in casemates, and one 'en barbette,' or on the top of the wall. The embrasures of the upper tier of casemates were never completed. They were filled up with brick during Major Anderson's occupation of the fort, and so remained during all the succeeding operations and siege. Seventy-eight guns of various calibre composed its then armament, the most efficient of which were placed 'en barbette.' On the east and west sides of the parade were barracks for the privates, and on the south side were the officers' quarters. These were all wooden structures. The wharf by which access was had to the fort was on the southern side against the gorge wall. Looking from the sea front, Sumter lay nearly midway between Sullivan's Island on the north and the low, sandy ridges of Morris on the south, and about 1,400 yards from either. The main ship channel was between Sumter and Sullivan's Island. The water between the fort and Morris Island was for the most part comparatively shallow. James Island lay to the west and southwest, while to the northwest, and at a distance of three and one-third miles, rose the steeples of Charleston. The city could have been barely reached by the heaviest guns of the barbette battery. Castle Pinckney lay in the direction of the city, and was distant about two and one-third miles. Sullivan's, Morris, and James Islands thus formed a segment of three-fourths of a circle around Sumter. They were so close under the guns of the fort that, with the then limited experience in the construction of earthworks, no batteries could have been erected under fire from Sumter sufficiently strong to prevent the re-enforcement and supplying of the fort, had Anderson been allowed to open fire at the first upon the rebel working parties. . . . At noon of December 27, the flag of the nation was raised over the defenders of the fort. Major Anderson knelt, holding the halliards, while Rev. Matthew Harris, an army chaplain, offered fervent prayer for that dear flag and for the loyal few who stood beneath its folds. . . . And then all wearily the days and weeks dragged on. New fortifications rose day by day on each sand-hill about the harbor; vessels of war, bearing the Confederate flag, steamed insultingly near, and the islands were white as harvest fields, with the tents of the fast-gathering rebel soldiery; and still, by positive orders, Anderson was bidden to stand in idle helplessness beside his silent indignant cannon."—Gen. Stewart L. Woodford, *The Story of Fort Sumter (Personal Recollections of the War of the Rebellion, pp.* 259-266).—On the 29th of December, three days after Anderson had transferred his command to Fort Sumter, Floyd gave up his work of treachery in the War Department, and resigned. Howell Cobb had resigned the Treasury Department previously, on the 10th. A few days later, January 8, Jacob Thompson withdrew from the Interior Department. Loyal men now replaced these secessionists in the Cabinet. Joseph Holt of Kentucky took the place of Floyd in the War Department; John A. Dix of New York succeeded Cobb in the Treasury, and the place of Thompson was not filled. Edwin M. Stanton entered the Cabinet as Attorney-General, taking the place of Jeremiah S. Black who became Secretary of State. General Cass had held the State Department until December 12, when he, too, resigned, but for reasons opposite to those of Floyd and Cobb. He left the Government because it would not reinforce the Charleston forts.—E. McPherson, *Political Hist. of the U. S. during the Great Rebellion, p.* 28.

A. D. 1860-1861 (December—February).—Seizure of arms, arsenals, forts, and other public property by the Southern insurgents.—Base surrender of an army by Twiggs.—"Directly after Major Anderson's removal to Fort Sumter, the Federal arsenal in Charleston, containing many thousand stand of arms and a considerable quantity of military stores, was seized by the volunteers, now flocking to that city by direction of the State authorities; Castle Pinckney, Fort Moultrie, and Sullivan's Island were likewise occupied by them, and their defenses vigorously enlarged and improved. The Custom-House, Post-Office, etc., were likewise appropriated, without resistance or commotion. . . . Georgia having given [January 2, 1861] a large popular majority for Secession, her authorities immediately took military possession of the Federal arsenal at Augusta, as also of Forts Pulaski and Jackson, commanding the approaches by sea to Savannah. North Carolina had not voted to secede, yet Gov. Ellis simultaneously seized the U. S. Arsenal at Fayetteville, with Fort Macon, and other fortifications commanding the approaches to Beaufort and Wilmington. Having done so, Gov. E. coolly wrote to the War Department that he had taken the step to preserve the forts from seizure by mobs! In Alabama, the Federal arsenal at Mobile was seized on the 4th, by order of Gov. Moore. It contained large quantities of arms and munitions. Fort Morgan, commanding the approaches to Mobile, was likewise seized, and garrisoned by State troops. . . . In Louisiana, the Federal arsenal at Baton Rouge was seized by order of Gov. Moore on the 11th. Forts Jackson and St. Philip, commanding the passage up the Mississippi to New Orleans, and Fort Pike, at the entrance of Lake Pontchartrain, were likewise seized and garrisoned by State troops. The Federal Mint and Custom-House at New Orleans were left untouched until February 1st, when they, too, were taken possession of by the State authorities. . . . In Florida, Fort Barrancas and the Navy Yard at Pensacola were seized by Florida and Alabama forces on the 13th; Commander Armstrong surrendering them without a struggle. He ordered Lieut. Slemmer, likewise, to surrender Forts Pickens and McRae; but the intrepid subordinate defied the order, and, withdrawing his small force from Fort McRae to the stronger and less accessible Fort Pickens, announced his determination to hold out to the last. He was soon after besieged therein by a formidable volunteer force; and a dispatch from Pensacola announced that 'Fort McRae is being occupied and the guns manned by the allied forces of Florida, Alabama, and Mississippi.'. . . The revenue cutter Cass, stationed at Mobile, was turned over by Capt. J. J. Morrison to the authorities of Alabama at the end of January. The McClellan, Capt. Bresh-

wood, stationed on the Mississippi below New Orleans, was, in like manner, handed over to those of Louisiana. Gen. Dix had sent down a special agent to secure them, but he was too late. The telegraph dispatch whereby Gen. Dix directed him, 'If any person attempts to haul down the American flag, shoot him on the spot,' sent an electric thrill through the loyal heart of the country. Finally, tidings reached Washington, about the end of February, that Brig.-Gen. Twiggs, commanding the department of Texas, had disgracefully betrayed his trust, and turned over his entire army, with all the posts and fortifications, arms, munitions, horses, equipments, etc., to Gen. Ben. M'Culloch, representing the authorities of Texas, now fully launched upon the rushing tide of treason. The Union lost by that single act at least half its military force, with the State of Texas, and the control of our Mexican frontier. . . . The defensive fortifications located within the seceding States were some 30 in number, mounting over 3,000 guns, and having cost at least $20,000,000. Nearly all these had been seized and appropriated by the Confederates before Mr. Lincoln's inauguration, with the exception of Fortress Monroe (Virginia), Fort Sumter (South Carolina), Fort Pickens (Florida), and the fortresses on Key West and the Tortugas, off the Florida coast."—H. Greeley, *The American Conflict, v.* 1, *ch.* 26.

Also in: *Official Records of the War of the Rebellion, series* 1, *v.* 1.

A. D. 1861 (January—February).—Secession of Georgia, Mississippi, Florida, Louisiana, Alabama, and Texas.—Opposition of Alexander H. Stephens, in Georgia.—"On the 9th day of January, 1861, the State of Mississippi seceded from the Union. Alabama and Florida followed on the 11th day of the same month; Georgia on the 20th; Louisiana on the 26th; and Texas on the 1st of February. Thus, in less than three months after the announcement of Lincoln's election, all the Cotton States . . . had seceded from the Union, and had, besides, secured every Federal fort within their limits, except the forts in Charleston harbor, and Fort Pickens, below Pensacola, which were retained by United States troops."—E. A. Pollard, *The First Year of the War, ch.* 1.—The secession of Georgia was powerfully but vainly opposed by the foremost citizen of that state, Alexander H. Stephens, whose speech before the Legislature of Georgia, in protest against the disruption of the Union, had been one of the notable utterances of the time. "Shall the people of the South," asked Mr. Stephens, "secede from the Union in consequence of the election of Mr. Lincoln to the Presidency of the United States? My countrymen, I tell you frankly, candidly, and earnestly, that I do not think that they ought. In my judgment, the election of no man, constitutionally chosen to that high office, is sufficient cause for any State to separate from the Union. It ought to stand by and aid still in maintaining the constitution of the country. To make a point of resistance to the government, to withdraw from it because a man has been constitutionally elected, puts us in the wrong. We are pledged to maintain the constitution. Many of us have sworn to support it. Can we, therefore, for the mere election of a man to the presidency, and that, too, in accordance with the prescribed forms of the constitution, make a point of resistance to the government, without becoming the breakers of that sacred instrument ourselves, by withdrawing ourselves from it? Would we not be in the wrong? Whatever fate is to befall this country, let it never be laid to the charge of the people of the South, and especially to the people of Georgia, that we were untrue to our national engagements. Let the fault and the wrong rest upon others. . . . Let the fanatics of the North break the constitution, if such is their fell purpose. Let the responsibility be upon them. . . . We went into the election with this people. The result was different from what we wished; but the election has been constitutionally held. Were we to make a point of resistance to the government and go out of the Union on that account, the record would be made up hereafter against us. But it is said Mr. Lincoln's policy and principles are against the constitution, and that, if he carries them out, it will be destructive of our rights. Let us not anticipate a threatened evil. If he violates the constitution, then will come our time to act. Do not let us break it because, forsooth, he may. If he does, that is the time for us to strike. I think it would be injudicious and unwise to do this sooner. I do not anticipate that Mr. Lincoln will do anything to jeopard our safety or security, whatever may be his spirit to do it; for he is bound by the constitutional checks which are thrown around him, which at this time render him powerless to do any great mischief. This shows the wisdom of our system. The President of the United States is no emperor, no dictator — he is clothed with no absolute power. He can do nothing unless he is backed by power in Congress. The House of Representatives is largely in a majority against him. In the very face and teeth of the heavy majority which he has obtained in the northern States, there have been large gains in the House of Representatives to the conservative constitutional party of the country, which here I will call the national democratic party, because that is the cognomen it has at the North. . . . Is this the time, then, to apprehend that Mr. Lincoln, with this large majority in the House of Representatives against him, can carry out any of his unconstitutional principles in that body? In the Senate he will also be powerless. There will be a majority of four against him. . . . Mr. Lincoln cannot appoint an officer without the consent of the Senate — he cannot form a cabinet without the same consent. He will be in the condition of George the Third (the embodiment of toryism), who had to ask the whigs to appoint his ministers, and was compelled to receive a cabinet utterly opposed to his views; and so Mr. Lincoln will be compelled to ask of the Senate to choose for him a cabinet, if the democracy of that party chose to put him on such terms. He will be compelled to do this, or let the government stop, if the national democratic men (for that is their name at the North), the conservative men in the Senate, should so determine. Then how can Mr. Lincoln obtain a cabinet which would aid him, or allow him to violate the constitution? Why then, I say, should we disrupt the ties of this Union when his hands are tied — when he can do nothing against us?" — A. H. Stephens, *Speech against Secession, Nov* 14, 1860 (*in "Alexander H. Stephens in Public and Private; by H. Cleveland"*).—But when

Georgia, despite his exertions, was drawn into the movement of rebellion, Mr. Stephens surrendered to it, and lent his voice to the undertaking which he had proved to be without excuse. See below: A. D. 1861 (MARCH).

A. D. 1861 (February).—The Peace Convention.—"The General Assembly of Virginia, on the 19th of January, adopted resolutions inviting representatives of the several States to assemble in a Peace Convention at Washington, which met on the 4th of February. It was composed of 133 Commissioners, many from the border States, and the object of these was to prevail upon their associates from the North to unite with them in such recommendations to Congress as would prevent their own States from seceding and enable them to bring back six of the cotton States which had already seceded." On the 15th of February a committee of the Convention reported certain proposed amendments to the Constitution which "were substantially the same with the Crittenden Compromise [see above: A. D. 1860 (DECEMBER) VAIN CONCESSIONS]; but on motion of Mr. Johnson, of Maryland, the general terms of the first and by far the most important section were restricted to the present Territories of the United States. On motion of Mr. Franklin, of Pennsylvania, this section was further amended, but not materially changed, by the adoption of the substitute offered by him. Nearly in this form it was afterwards adopted by the Convention. The following is a copy: 'In all the present territory of the United States north of the parallel of thirty-six degrees and thirty minutes of north latitude, involuntary servitude, except in punishment of crime, is prohibited. In all the present territory south of that line, the status of persons held to involuntary service or labor, as it now exists, shall not be changed; nor shall any law be passed by Congress or the Territorial Legislature to prevent the taking of such persons from any of the States of this Union to said territory, nor to impair the rights arising from said relation; but the same shall be subject to judicial cognizance in the Federal courts, according to the course of the common law. When any Territory north or south of said line, within such boundary as Congress may prescribe, shall contain a population equal to that required for a member of Congress, it shall, if its form of government be republican, be admitted into the Union on an equal footing with the original States, with or without involuntary servitude, as the Constitution of such State may provide.'. . . More than ten days were consumed in discussion and in voting upon various propositions offered by individual commissioners. The final vote was not reached until Tuesday, the 26th February, when it was taken on the first vitally important section, as amended. This section, on which all the rest depended, was negatived by a vote of eight States to eleven. Those which voted in its favor were Delaware, Kentucky, Maryland, New Jersey, Ohio, Pennsylvania, Rhode Island, and Tennessee. And those in the negative were Connecticut, Illinois, Iowa, Maine, Massachusetts, Missouri, New York, North Carolina, New Hampshire, Vermont, and Virginia." A reconsideration of the vote was moved, however, and on the day following (February 27), "the first section was adopted, but only by a majority of nine to eight States, nine being less than a majority of the States represented. . . . From the nature of this vote, it was manifestly impossible that two-thirds of both Houses of Congress should act favorably on the amendment, even if the delay had not already rendered such action impracticable before the close of the session. The remaining sections of the amendment were carried by small majorities," and the proposed amendment of the Constitution was reported to Congress, with a request that it be submitted to the Legislatures of the States, but no action upon it was taken.—T. V. Cooper, *American Politics, pp.* 106–108. — "Most of the Southerners thought these propositions worse than nothing. Hunter preferred the present position under the constitution, with the Dred Scott decision as its exposition. Mason, the other Senator from the state that had issued the call for the Peace Convention, said that he would consider himself a traitor if he should recommend such propositions. Wigfall of Texas, however, bore off the palm by saying: 'If those resolutions were adopted, and ratified by three-fourths of the states of this Union, and no other cause ever existed, I make the assertion that the seven states now out of the Union would go out upon that.' Many of the Republicans were equally strong in their opposition to them. Chandler of Michigan spoke the substance of the opinions of several on his side of the Senate when he expressed himself in the language of the 'stump' by saying: 'No concession, no compromise,—ay, give us strife, even to blood,—before a yielding to the demands of traitorous insolence.'. . . John Tyler, the president of the convention that passed them, and Seddon returned to their state and denounced the recommendations of the Peace Convention as a delusion, a sham and an insult to the South. . . . Hawkins of Florida told the House, when the question was first touched upon, that the day of compromise was past and that he and his state were opposed to all and every compromise. Pugh and Clopton of Alabama both spoke boldly for secession and against any temporizing policy. Congress had been in session but ten days, and neither of the committees on compromise had had time to report, when a large number of the members of Congress from the extreme Southern States issued a manifesto declaring that 'argument was exhausted' and that 'the sole and primary aim of each slaveholding state ought to be its speedy and absolute separation from an unnatural and hostile Union.'. . . The boldness of these facts is startling, even when viewed at this distance. They make it perfectly evident that it was not the constitution which the South was desirous of saving, but the institution of slavery which she was determined to preserve. Likewise on the Northern side we find that those who were courageous, logical, and intellectually vigorous in political speculation considered the constitution of less importance than the development of their ideas of freedom. These people were called Abolitionists. Although their political strength was not great, some one of their many ideas found sympathy in the mind of almost every Northerner of education or of clear moral intentions. This explains how John A. Andrew could be elected governor of Massachusetts, although known to have presided over a John Brown meeting. The purpose of the Abolitionists was 'the utter extermination of

slavery wheresoever it may exist.' Wendell Phillips surprised very few Abolitionists when, knowing that the Confederacy was forming, he rejoiced that 'the covenant with death' was annulled and 'the agreement with hell' was broken in pieces, and exclaimed: 'Union or no Union, constitution or no constitution, freedom for every man between the oceans, and from the hot Gulf to the frozen pole! You may as well dam up Niagara with bulrushes as bind our anti-slavery purpose with Congressional compromise.' Congress had to consider such facts as these, as well as the compromises which were proposed. Stephen A. Douglas felt compelled to say, as early as January, 1861, that there were Democrats in the Senate who did not want a settlement. And it was plain to all that most of the Republicans discouraged further concessions. Nor would a constitutional amendment have been possible unless the Northern members had first recognized the seven states as being out of the Union, for it would otherwise have required the support of all but one of the states that were still active. That the 'personal liberty' laws were a violation of the constitution, and that the execution of the fugitive slave law of 1850 had been unconstitutionally obstructed, were unquestioned facts, directly or indirectly recognized by many of the Republican leaders. Nevertheless, the North was much more inclined to continue in this unconstitutional position than to yield to the demands of the South."—F. Bancroft, *The Final Efforts at Compromise* (*Pol. Sci. Quarterly, Sept.*, 1891).

A. D. 1861 (February). — Adoption of a Constitution for "The Confederate States of America." — Election of a President and Vice President. — "Early in February, 1861, a convention of six seceding states, South Carolina, Georgia, Alabama, Mississippi, Louisiana, Florida, was held at Montgomery, Alabama. They were represented by 42 persons. Measures were taken for the formation of a provisional government. After the vote on the provisional Constitution was taken, Jefferson Davis was elected President, and Alexander H. Stephens Vice-President of the Confederacy for the current year. The inauguration of Mr. Davis took place on February 18th. Both were shortly after re-elected permanently for six years. . . . The permanent Constitution adopted for 'The Confederate States of America,' the title now assumed, was modeled substantially on that of the United States. It was remarked that, after all, the old Constitution was the most suitable basis for the new Confederacy. Among points of difference must be noticed that the new instrument broadly recognized, even in its preamble, the contested doctrine of state-rights. . . . Inducements and threats were applied to draw Virginia and the other Border States into the Confederacy. . . . With an ominous monition, the second article reads, 'Congress shall . . . have power to prohibit the introduction of slaves from any state not a member of this Confederacy.' At this time Virginia was receiving an annual income of $12,000,000 from the sale of slaves. In 1860 12,000 slaves were sent over her railroads to the South and Southwest. One thousand dollars for each was considered a low estimate. Notwithstanding this, the Ordinance of Secession did not pass the Virginia Convention until some weeks subsquently (April 17)."—J. W. Draper, *Hist. of the Am. Civil War, ch.* 32 (*v.* 1).—The preamble of the Constitution declared that "the people of the Confederate States, each State acting in its sovereign and independent character, invoking the favor and guidance of Almighty God, ordained a Constitution to form a permanent Federal Government and for other purposes. The change in phraseology was obviously to assert the derivative character of the Federal Government and to exclude the conclusion which Webster and others had sought to draw from the phrase, 'We, the people of the United States.' In the Executive department, the Constitution provided, in accordance with the early agreement of the Convention of 1787, that the President should be elected for six years and be ineligible. A seat upon the floor of either House of Congress might be granted to the principal officer in each of the Executive departments with the privilege of discussing any measures appertaining to his department. The President was empowered to remove at pleasure the principal officer in each of the Executive departments and all persons connected with the diplomatic service. To give entire control of Cabinet officers and of foreign ministers was considered to be necessary for the proper discharge of the President's duties and for the independence of his department. All other civil officers could be removed when their services were unnecessary, or for dishonesty, inefficiency, misconduct, or neglect of duty, but the removals in such cases, with the reasons therefor, were to be reported to the Senate, and no person rejected by the Senate could be reappointed to the same office during the recess of the Senate. The President was empowered, while approving portions of an appropriation bill, to disapprove particular items, as in other like cases of veto, the object being to defeat log-rolling combinations against the Treasury. Admitting members of the Cabinet to seats upon the floor of Congress with right of discussion (which worked well during the brief life of the Confederacy), was intended to secure greater facility of communication betwixt the Executive and the Legislative departments and enforce upon the heads of the departments more direct personal responsibility. By ineligibility of the President and restriction of the power of removal, the Congress, acting as a convention, sought to secure greater devotion to public interests, freedom from the corrupting influences of Executive patronage, and to break up the iniquitous spoils system which is such a peril to the purity and perpetuity of our Government. The Judicial department was permitted to remain substantially as it was in the old Government. The only changes were to authorize a tribunal for the investigation of claims against the Government, the withholding from the Federal Courts jurisdiction of suits between citizens of different States, and the enactment of a wise provision that any judicial or other Federal officer, resident and acting solely within the limits of any State, might be impeached by a vote of two thirds of both branches of the Legislature thereof.

The provisions in reference to the election of Senators and Representatives and the powers and duties of each House were unaltered except that the electors of each State were required to be citizens, and the Senators were to be chosen by the Legislatures of the State at the session next immediately preceding the beginning of the term of service. In reference to the general powers of Congress, some of the changes were more vital. The general welfare clause was omitted from the taxing grant. Bounties from the Treasury and extra compensation to contractors, officers, and agents were prohibited. 'A Protective Tariff' was so far forbidden that no duties or taxes on importations could be laid to promote or foster any branch of industry. Export duties were allowed with the concurrence of two thirds of both Houses. Congress was forbidden to make internal improvements except to furnish lights, beacons, buoys, to improve harbors, and to remove obstructions in river navigation, and the cost of these was to be paid by duties levied on the navigation facilitated. That the objects might be better attained, States, with the consent of Congress and under certain other restrictions, were allowed to lay a duty on the sea-going tonnage participating in the trades of the river or harbor improved. States, divided by rivers, or through which rivers flowed, could enter into compacts for improving their navigation. Uniform laws of naturalization and bankruptcy were authorized, but bankruptcy could not affect debts contracted prior to the passage of the law. A two-thirds vote was made requisite to appropriate money unless asked and estimated for by some one of the heads of the departments. Every law must relate but to one subject, and that was to be expressed in the title. To admit new States required a vote of two thirds of each House, the Senate voting by States. Upon the demand of any three States, legally assembled in their several conventions, Congress could summon a convention to consider amendments to the Constitution, but the convention was confined in its action to propositions suggested by the States making the call. . . . 'The importation of negroes of the African race was forbidden, and Congress was required to pass laws effectually to prevent it.' The right of transit or sojourn with slaves in any State was secured and fugitive slaves — called 'slaves' without the euphemism of the old instrument — were to be delivered up on the claim of the party to whom they belonged. Congress could prohibit the introduction of slaves from States and Territories not included in the Confederacy, and laws impairing the right of property in negro slaves were prohibited. Slaves could be carried into any Territory of the Confederacy by citizens of the Confederate States and be protected as property. This clause was intended to forbid 'squatter sovereignty,' and to prevent adverse action against property in slaves, until the Territory should emerge from a condition of pupilage and dependence into the dignity, equality, and sovereignty of a State, when its right to define 'property' would be beyond the interference or control of Congress."—J. L. M. Curry, *The Southern States of the American Union, ch.* 13.—Alexander H. Stephens, in his "Constitutional view of the late War between the States," expresses the opinion that the selection of Jefferson Davis for the Presidency of the Confederacy was due to a misunderstanding. He says that a majority of the states were looking to Georgia for the President, and the Georgia delegation had unanimously agreed to present Mr. Toombs, who would have been acceptable. But a rumor got currency that Georgia would put forward Howell Cobb, whereupon the other states took up Davis, and united upon him. It was generally understood, says Mr. Stephens, that Davis "did not desire the office of President. He preferred a military position, and the one he desired above all others was the chief command of the army."—A. H. Stephens, *Constitutional View of the War between the States, v.* 2, *pp.* 328–333.

Davis, *Rise and Fall of the Confederate Gov't, pt.* 3, *ch.* 5, *and app. K* (*v.* 1). The text of both the Provisional and the Permanent Constitution of the Confederate States is given in the appendix referred to.

A. D. 1861 (February).— Urgency of South Carolina for the reduction of Fort Sumter before the inauguration of President Lincoln. —"I am perfectly satisfied," wrote Governor Pickens of South Carolina to Howell Cobb, "President of the Provisional Congress" of the Confederacy, in a letter dated February 13, 1861,—"I am perfectly satisfied that the welfare of the new confederation and the necessities of the State require that Fort Sumter should be reduced before the close of the present administration at Washington. If an attack is delayed until after the inauguration of the incoming President of the United States, the troops now gathered in the capital may then be employed in attempting that which, previous to that time, they could not be spared to do. They dare not leave Washington now and do that which then will be a measure too inviting to be resisted. Mr. Lincoln cannot do more for this State than Mr. Buchanan has done. Mr. Lincoln will not concede what Mr. Buchanan has refused. Mr. Buchanan has placed his refusal upon grounds which determine his reply to six States, as completely as to the same demand if made by a single State. If peace can be secured, it will be by the prompt use of the occasion, when the forces of the United States are withheld from our harbor. If war can be averted, it will be by making the capture of Fort Sumter a fact accomplished during the continuance of the present administration, and leaving to the incoming administration the question of an open declaration of war. Such a declaration, separated, as it will be, from any present act of hostilities during Mr. Lincoln's administration, may become to him a matter requiring consideration. That consideration will not be expected of him, if the attack on the fort is made during his administration, and becomes, therefore, as to him, an act of present hostility. Mr. Buchanan cannot resist, because he has not the power. Mr. Lincoln may not attack, because the cause of the quarrel will have been, or may be, considered by him as past. Upon this line of policy I have acted, and upon the adherence to it may be found, I think, the most rational expectation of seeing that fort, which is even now a source of danger to the State, restored to the possession of the State without those consequences which I should most deeply deplore."—*Official Records, v.* 1, *p.* 256.

A. D. 1861 (February—March).—The inauguration and the inaugural address of President Lincoln.—"On the 11th of February, with his family and some personal friends, Lincoln left his home at Springfield for Washington. . . . On his way to Washington, he passed through the great states of Indiana, Ohio, New York, New Jersey, and Pennsylvania, and was everywhere received with demonstrations of loyalty, as the representative of the national government. He addressed the people at the capitals of these states, and at many of their chief towns and cities. The city of Washington was surrounded by slave territory, and was really within the lines of the insurgents. Baltimore was not only a slaveholding city, but nowhere was the spirit of rebellion more hot and ferocious than among a large class of its people. The lower classes, the material of which mobs are made, were reckless, and ready for any outrage. From the date of his election to the time of his start for Washington, there had often appeared in the press and elsewhere, vulgar threats and menaces that he should never be inaugurated, nor reach the capital alive. Little attention was paid to these threats, yet some of the President's personal friends, without his knowledge, employed a detective, who sent agents to Baltimore and Washington to investigate. . . . The detectives ascertained the existence of a plot to assassinate the President elect, as he passed through Baltimore. The first intelligence of this conspiracy was communicated to Lincoln at Philadelphia. On the facts being laid before him, he was urged to take the train that night (the 21st of February), by which he would reach Washington the next morning, passing through Baltimore earlier than the conspirators expected, and thus avoid the danger. Having already made appointments to meet the citizens of Philadelphia at, and raise the United States flag over, Independence Hall, on Washington's birthday, the 22nd, and also to meet the Legislature of Pennsylvania at Harrisburgh, he declined starting for Washington that night. Finally his friends persuaded him to allow the detectives and the officers of the railways to arrange for him to return from Harrisburgh, and, by special train, to go to Washington the night following the ceremonies at Harrisburgh. . . . He went to Harrisburgh according to arrangement, met the Legislature, and retired to his room. In the meanwhile, General Scott and Mr. Seward had learned, through other sources, of the existence of the plot to assassinate him, and had despatched Mr. F. W. Seward, a son of Senator Seward, to apprise him of the danger. Information coming to him from both of these sources, each independent of the other, induced him to yield to the wishes of his friends, and anticipate his journey to Washington. Besides, there had reached him from Baltimore no committee, either of the municipal authorities or of citizens, to tender him the hospitalities, and to extend to him the courtesies of that city, as had been done by every other city through which he had passed. He was persuaded to permit the detective to arrange for his going to Washington that night. The telegraph wires to Baltimore were cut, Harrisburgh was isolated, and, taking a special train, he reached Philadelphia, and driving to the Baltimore depot, found the Washington train waiting his arrival, stepped on board, and passed on without interruption through Baltimore to the national capital. . . . He afterwards declared: 'I did not then, nor do I now believe I should have been assassinated, had I gone through Baltimore as first contemplated, but I thought it wise to run no risk where no risk was necessary.' . . . On the 4th of March, 1861, he was inaugurated President of the United States. . . . In the open air, and with a voice so clear and distinct that he could be heard by thrice ten thousand men, he read his inaugural address, and on the very verge of civil war, he made a most earnest appeal for peace."—I. N. Arnold, *Life of Abraham Lincoln, ch.* 11–12.

Also in: J. G. Blaine, *Twenty Years of Congress, v.* 1, *ch.* 13.—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 3, *ch.* 19–21.—H. J. Raymond, *Life of Abraham Lincoln, ch.* 5–6.

The following is the full text of the inaugural address, from Lincoln's "Complete Works."

"Fellow-Citizens of the United States: In compliance with a custom as old as the government itself, I appear before you to address you briefly, and to take, in your presence, the oath prescribed by the Constitution of the United States to be taken by the President 'before he enters on the execution of his office.' I do not consider it necessary, at present, for me to discuss those matters of administration about which there is no special anxiety or excitement. Apprehension seems to exist among the people of the southern states, that, by the accession of a republican administration, their property and their peace and personal security are to be endangered. There has never been any reasonable cause for such apprehension. Indeed, the most ample evidence to the contrary has all the while existed and been open to their inspection. It is found in nearly all the published speeches of him who now addresses you. I do but quote from one of those speeches, when I declare that 'I have no purpose, directly or indirectly, to interfere with the institution of slavery in the states where it exists. I believe I have no lawful right to do so, and I have no inclination to do so.' Those who nominated and elected me did so with full knowledge that I had made this and many similar declarations, and had never recanted them. And, more than this, they placed in the platform, for my acceptance, and as a law to themselves and to me, the clear and emphatic resolution which I now read: 'Resolved, That the maintenance inviolate of the rights of the states, and especially the right of each state to order and control its own domestic institutions according to its own judgment exclusively, is essential to that balance of power on which the perfection and endurance of our political fabric depend, and we denounce the lawless invasion by armed force of the soil of any state or territory, no matter under what pretext, as among the gravest of crimes.' I now reiterate these sentiments; and in doing so I only press upon the public attention the most conclusive evidence of which the case is susceptible, that the property, peace, and security of no section are to be in any wise endangered by the now incoming administration. I add, too, that all the protection which, consistently with the Constitution and the laws, can be given, will be cheerfully given to all the states when lawfully demanded, for whatever cause—as cheerfully to one section as to another. There is much

controversy about the delivering up of fugitives from service or labor. The clause I now read is as plainly written in the Constitution as any other of its provisions: 'No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.' It is scarcely questioned that this provision was intended by those who made it for the reclaiming of what we call fugitive slaves; and the intention of the law-giver is the law. All members of Congress swear their support to the whole Constitution — to this provision as much as to any other. To the proposition, then, that slaves whose cases come within the terms of this clause 'shall be delivered up,' their oaths are unanimous. Now, if they would make the effort in good temper, could they not, with nearly equal unanimity, frame and pass a law by means of which to keep good that unanimous oath? There is some difference of opinion whether this clause should be enforced by national or by state authority; but surely that difference is not a very material one. If the slave is to be surrendered, it can be of but little consequence to him or to others by which authority it is done. And should any one, in any case, be content that this oath shall go unkept on a merely unsubstantial controversy as to how it shall be kept? Again, in any law upon this subject, ought not all the safeguards of liberty known in civilized and humane jurisprudence to be introduced, so that a free man be not, in any case, surrendered as a slave? And might it not be well at the same time to provide by law for the enforcement of that clause in the Constitution which guarantees that 'the citizens of each state shall be entitled to all privileges and immunities of citizens in the several states'? I take the official oath today with no mental reservations, and with no purpose to construe the Constitution or laws by any hypercritical rules. And while I do not choose now to specify particular acts of Congress as proper to be enforced, I do suggest that it will be much safer for all, both in official and private stations, to conform to and abide by all those acts which stand unrepealed, than to violate any of them, trusting to find impunity in having them held to be unconstitutional. It is seventy-two years since the first inauguration of a President under our National Constitution. During that period, fifteen different and greatly distinguished citizens have in succession administered the executive branch of the Government. They have conducted it through many perils, and generally with great success. Yet, with all this scope of precedent, I now enter upon the same task, for the brief constitutional term of four years, under great and peculiar difficulty. A disruption of the Federal Union, heretofore only menaced, is now formidably attempted. I hold that in the contemplation of universal law and of the Constitution, the union of these states is perpetual. Perpetuity is implied, if not expressed, in the fundamental law of all national governments. It is safe to assert that no government proper ever had a provision in its organic law for its own termination. Continue to execute all the express provisions of our National Constitution, and the Union will endure forever, it being impossible to destroy it except by some action not provided for in the instrument itself. Again, if the United States be not a government proper, but an association of states in the nature of a contract merely, can it, as a contract, be peaceably unmade by less than all the parties who made it? One party to a contract may violate it — break it, so to speak; but does it not require all to lawfully rescind it? Descending from these general principles, we find the proposition that in legal contemplation the Union is perpetual, confirmed by the history of the Union itself. The Union is much older than the Constitution. It was formed, in fact, by the Articles of Association in 1774. It was matured and continued by the Declaration of Independence in 1776. It was further matured, and the faith of all the then thirteen states expressly plighted and engaged that it should be perpetual, by the Articles of Confederation, in 1778. And finally, in 1787, one of the declared objects for ordaining and establishing the Constitution was 'to form a more perfect Union.' But if the destruction of the Union by one or by a part only of the states be lawfully possible, the Union is less perfect than before the Constitution, having lost the vital element of perpetuity. It follows from these views that no state, upon its own mere motion, can lawfully get out of the Union; that resolves and ordinances to that effect are legally void; and that acts of violence within any state or states against the authority of the United States are insurrectionary or revolutionary, according to circumstances. I therefore consider that, in view of the Constitution and the laws, the Union is unbroken; and, to the extent of my ability, I shall take care, as the Constitution itself expressly enjoins upon me, that the laws of the Union be faithfully executed in all the states. Doing this I deem to be only a simple duty on my part; and I shall perform it so far as practicable, unless my rightful masters, the American people, shall withhold the requisite means, or in some authoritative manner direct the contrary. I trust this will not be regarded as a menace, but only as the declared purpose of the Union that it will constitutionally defend and maintain itself. In doing this there needs to be no bloodshed or violence, and there shall be none unless it be forced upon the national authority. The power confided to me will be used to hold, occupy, and possess the property and places belonging to the Government, and to collect the duties and imposts; but beyond what may be necessary for these objects there will be no invasion, no using of force against or among the people anywhere. Where hostility to the United States in any interior locality shall be so great and universal as to prevent competent resident citizens from holding the federal offices, there will be no attempt to force obnoxious strangers among the people for that object. While the strict legal right may exist in the Government to enforce the exercise of these offices, the attempt to do so would be so irritating, and so nearly impracticable withal, that I deem it better to forego, for the time, the uses of such offices. The mails, unless repelled, will continue to be furnished in all parts of the Union. So far as possible, the people everywhere shall have that sense of perfect security which is most favorable to calm thought and reflection. The course here indicated will be followed, unless current events

and experience shall show a modification or change to be proper; and in every case and exigency my best discretion will be exercised according to circumstances actually existing, and with a view and a hope of a peaceful solution of the national troubles, and the restoration of fraternal sympathies and affections. That there are persons, in one section or another, who seek to destroy the Union at all events, and are glad of any pretext to do it, I will neither affirm nor deny; but if there be such, I need address no word to them. To those, however, who really love the Union, may I not speak? Before entering upon so grave a matter as the destruction of our national fabric, with all its benefits, its memories, and its hopes, would it not be wise to ascertain precisely why we do it? Will you hazard so desperate a step, while there is any possibility that any portion of the ills you fly from have no real existence? Will you, while the certain ills you fly to are greater than all the real ones you fly from — will you risk the commission of so fearful a mistake? All profess to be content in the Union if all constitutional rights can be maintained. Is it true, then, that any right, plainly written in the Constitution, has been denied? I think not. Happily the human mind is so constituted that no party can reach to the audacity of doing this. Think, if you can, of a single instance in which a plainly written provision of the Constitution has ever been denied. If, by the mere force of numbers, a majority should deprive a minority of any clearly written constitutional right, it might, in a moral point of view, justify revolution — certainly would if such a right were a vital one. But such is not our case. All the vital rights of minorities and of individuals are so plainly assured to them by affirmations and negations, guarantees and prohibitions in the Constitution, that controversies never arise concerning them. But no organic law can ever be framed with a provision specifically applicable to every question which may occur in practical administration. No foresight can anticipate, nor any document of reasonable length contain, express provisions for all possible questions. Shall fugitives from labor be surrendered by national or by state authority? The Constitution does not expressly say. May Congress prohibit slavery in the Territories? The Constitution does not expressly say. Must Congress protect slavery in the Territories? The Constitution does not expressly say. From questions of this class spring all our constitutional controversies, and we divide upon them into majorities and minorities. If the minority will not acquiesce, the majority must, or the Government must cease. There is no other alternative; for continuing the Government is acquiescence on one side or the other. If a minority in such case will secede rather than acquiesce, they make a precedent which, in turn, will divide and ruin them; for a minority of their own will secede from them whenever a majority refuses to be controlled by such minority. For instance, why may not any portion of a new Confederacy, a year or two hence, arbitrarily secede again, precisely as portions of the present Union now claim to secede from it? All who cherish disunion sentiments are now being educated to the exact temper of doing this. Is there such perfect identity of interests among the states to compose a new Union as to produce harmony only, and prevent renewed secession? Plainly, the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it, does, of necessity, fly to anarchy or to despotism. Unanimity is impossible; the rule of a minority, as a permanent arrangement, is wholly inadmissible; so that, rejecting the majority principle, anarchy or despotism, in some form, is all that is left. I do not forget the position assumed by some that constitutional questions are to be decided by the Supreme Court; nor do I deny that such decisions must be binding in any case upon the parties to a suit, as to the object of that suit, while they are also entitled to very high respect and consideration in all parallel cases by all other departments of the Government; and while it is obviously possible that such decision may be erroneous in any given case, still the evil effect following it, being limited to that particular case, with the chance that it may be overruled and never become a precedent for other cases, can better be borne than could the evils of a different practice. At the same time the candid citizen must confess that if the policy of the Government upon vital questions affecting the whole people is to be irrevocably fixed by decisions of the Supreme Court, the instant they are made, in ordinary litigation between parties in personal actions, the people will have ceased to be their own rulers, having to that extent practically resigned their Government into the hands of that eminent tribunal. Nor is there in this view any assault upon the Court or the Judges. It is a duty from which they may not shrink, to decide cases properly brought before them, and it is no fault of theirs if others seek to turn their decisions to political purposes. One section of our country believes slavery is right and ought to be extended, while the other believes it is wrong and ought not to be extended. This is the only substantial dispute. The fugitive-slave clause of the Constitution, and the law for the suppression of the foreign slave-trade, are each as well enforced, perhaps, as any law can ever be in a community where the moral sense of the people imperfectly supports the law itself. The great body of the people abide by the dry legal obligation in both cases, and a few break over in each. This, I think, cannot be perfectly cured; and it would be worse in both cases after the separation of the sections than before. The foreign slave-trade, now imperfectly suppressed, would be ultimately revived, without restriction, in one section; while fugitive slaves, now only partially surrendered, would not be surrendered at all by the other. Physically speaking, we cannot separate; we cannot remove our respective sections from each other, nor build an impassable wall between them. A husband and wife may be divorced, and go out of the presence and beyond the reach of each other; but the different parts of our country cannot do this. They cannot but remain face to face; and intercourse, either amicable or hostile, must continue between them. Is it possible, then, to make that intercourse more advantageous or more satisfactory after separation than before? Can aliens make treaties easier than friends can

make laws? Can treaties be more faithfully enforced between aliens than laws can among friends? Suppose you go to war, you cannot fight always; and when, after much loss on both sides and no gain on either, you cease fighting, the identical old questions as to terms of intercourse are again upon you. This country, with its institutions, belongs to the people who inhabit it. Whenever they shall grow weary of the existing government, they can exercise their constitutional right of amending it, or their revolutionary right to dismember or overthrow it. I cannot be ignorant of the fact that many worthy and patriotic citizens are desirous of having the National Constitution amended. While I make no recommendation of amendments, I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should, under existing circumstances, favor, rather than oppose, a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated by others not especially chosen for the purpose, and which might not be precisely such as they would wish to either accept or refuse. I understand a proposed amendment to the Constitution — which amendment, however, I have not seen — has passed Congress, to the effect that the Federal Government shall never interfere with the domestic institutions of the states, including that of persons held to service. To avoid misconstruction of what I have said, I depart from my purpose not to speak of particular amendments, so far as to say that, holding such a provision to now be implied constitutional law, I have no objection to its being made express and irrevocable. The Chief Magistrate derives all his authority from the people, and they have conferred none upon him to fix terms for the separation of the states. The people themselves can do this also if they choose, but the Executive, as such, has nothing to do with it. His duty is to administer the present government as it came to his hands, and to transmit it unimpaired by him to his successor. Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world? In our present differences is either party without faith of being in the right? If the Almighty Ruler of Nations, with his eternal truth and justice, be on your side of the North, or on yours of the South, that truth and that justice will surely prevail by the judgment of this great tribunal, the American people. By the frame of the Government under which we live, this same people have wisely given their public servants but little power for mischief; and have with equal wisdom provided for the return of that little to their own hands at very short intervals. While the people retain their virtue and vigilance, no administration, by any extreme of wickedness or folly, can very seriously injure the Government in the short space of four years. My countrymen, one and all, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be an object to hurry any of you, in hot haste, to a step which you would never take deliberately, that object will be frustrated by taking time; but no good object can be frustrated by it. Such of you as are now dissatisfied still have the old Constitution unimpaired, and on the sensitive point, the laws of your own framing under it; while the new administration will have no immediate power, if it would, to change either. If it were admitted that you who are dissatisfied hold the right side in the dispute, there still is no single good reason for precipitate action. Intelligence, patriotism, Christianity, and a firm reliance on Him who has never yet forsaken this favored land, are still competent to adjust, in the best way, all our present difficulty. In your hands, my dissatisfied fellow-countrymen, and not in mine, is the momentous issue of civil war. The Government will not assail you. You can have no conflict without being yourselves the aggressors. You have no oath registered in heaven to destroy the Government, while I shall have the most solemn one to 'preserve, protect, and defend it.' I am loth to close. We are not enemies, but friends. We must not be enemies. Though passion may have strained, it must not break, our bonds of affection. The mystic cords of memory, stretching from every battle-field and patriot grave to every living heart and hearthstone all over this broad land, will yet swell the chorus of the Union, when again touched, as surely they will be, by the better angels of our nature."

A. D. 1861 (March).— President Lincoln and his Cabinet.—Secretary Seward.— President Lincoln, "in selecting his cabinet, which he did substantially before he left Springfield for Washington, . . . thought it wise to call to his assistance the strong men of his party, especially those who had given evidence of the support they commanded as his competitors in the Chicago convention. . . . This was sound policy under the circumstances. It might indeed have been foreseen that among the members of a cabinet so composed, troublesome disagreements and rivalries would break out. But it was better for the President to have these strong and ambitious men near him as his coöperators than to have them as his critics in Congress, where their differences might have been composed in a common opposition to him. As members of his cabinet he could hope to control them, and to keep them busily employed in the service of a common purpose, if he had the strength to do so. Whether he did possess this strength was soon tested by a singularly rude trial. There can be no doubt that the foremost members of his cabinet, Seward and Chase, the most eminent Republican statesmen, had felt themselves wronged by their party when in its national convention it preferred to them for the presidency a man whom, not unnaturally, they thought greatly their inferior in ability and experience as well as in service. . . . Seward, who, as Secretary of State, considered himself next to the Chief Executive, and who quickly accustomed himself to giving orders and making arrangements upon his own motion, thought it necessary that he should rescue the direction of public affairs from hands so unskilled, and take full charge of them himself. At the end of the first month of the administration he submitted a 'memorandum' to President Lincoln, which has been first brought to light by Nicolay and Hay, and is one of their most valuable contributions to the history of those days.

In that paper Seward actually told the President that, at the end of a month's administration, the government was still without a policy, either domestic or foreign; that the slavery question should be eliminated from the struggle about the Union; that the matter of the maintenance of the forts and other possessions in the South should be decided with that view; that explanations should be demanded categorically from the governments of Spain and France, which were then preparing, one for the annexation of San Domingo, and both for the invasion of Mexico; that if no satisfactory explanations were received war should be declared against Spain and France by the United States; that explanations should also be sought from Russia and Great Britain, and a vigorous continental spirit of independence against European intervention be aroused all over the American continent; that this policy should be incessantly pursued and directed by somebody; that either the President should devote himself entirely to it, or devolve the direction on some member of his cabinet, whereupon all debate on this policy must end. This could be understood only as a formal demand that the President should acknowledge his own incompetency to perform his duties, content himself with the amusement of distributing post offices, and resign his power as to all important affairs into the hands of his Secretary of State. . . . Had Lincoln, as most Presidents would have done, instantly dismissed Seward, and published the true reason for that dismissal, it would inevitably have been the end of Seward's career. But Lincoln did what not many of the noblest and greatest men in history would have been noble and great enough to do. He considered that Seward was still capable of rendering great service to his country in the place in which he was, if rightly controlled. He ignored the insult, but firmly established his superiority. In his reply, which he forthwith dispatched, he told Seward that the administration had a domestic policy as laid down in the inaugural address with Seward's approval; that it had a foreign policy as traced in Seward's dispatches with the President's approval; that if any policy was to be maintained or changed, he, the President, was to direct that on his responsibility; and that in performing that duty the President had a right to the advice of his secretaries. Seward's fantastic schemes of foreign war and continental policies Lincoln brushed aside by passing them over in silence. Nothing more was said. Seward must have felt that he was at the mercy of a superior man."—Carl Schurz, *Abraham Lincoln, pp.* 67–73.

A. D. 1861 (March).—Surrender of Alexander H. Stephens to Secession.—His "Corner-stone" speech at Savannah.—The following is from a speech made by Alexander H. Stephens at Savannah, on the evening after the secession of Georgia, which he had opposed, but to which he now yielded himself without reserve. It is a speech that became famous on account of its bold declaration that Slavery formed the "corner-stone" of the New Confederacy. "The new constitution," said Mr. Stephens, "has put at rest, forever, all the agitating questions relating to our peculiar institution—African slavery as it exists amongst us—the proper status of the negro in our form of civilization. This was the immediate cause of the late rupture and present revolution. Jefferson, in his forecast, had anticipated this, as the 'rock upon which the old Union would split.' He was right. What was conjecture with him, is now a realized fact. But whether he fully comprehended the great truth upon which that rock stood and stands may be doubted. The prevailing ideas entertained by him and most of the leading statesmen at the time of the formation of the old constitution, were that the enslavement of the African was in violation of the laws of nature; that it was wrong in principle, socially, morally, and politically. It was an evil they knew not well how to deal with, but the general opinion of the men of that day was that, somehow or other in the order of Providence, the institution would be evanescent and pass away. This idea, though not incorporated in the constitution, was the prevailing idea at that time. The constitution, it is true, secured every essential guarantee to the institution while it should last, and hence no argument can be justly urged against the constitutional guarantees thus secured, because of the common sentiment of the day. Those ideas, however, were fundamentally wrong. They rested upon the assumption of the equality of races. This was an error. It was a sandy foundation, and the government built upon it fell when the 'storm came and the wind blew.' Our new government is founded upon exactly the opposite idea; its foundations are laid, its corner-stone rests upon the great truth, that the negro is not equal to the white man; that slavery—subordination to the superior race—is his natural and normal condition. This, our new government, is the first, in the history of the world, based upon this great physical, philosophical, and moral truth. This truth has been slow in the process of its development, like all other truths in the various departments of science. It has been so even amongst us."—A. H. Stephens, *Speech in Savannah, March* 21, 1861 (*in "Alexander H. Stephens in Public and Private; by H. Cleveland"*).

A. D. 1861 (March—April).—The breaking of rebellion into open war by the attack on Fort Sumter.—President Lincoln's statement of the circumstances.—His first difficulties.—Attitude of the Border States.—The circumstances under which the first blow of the civil war was struck by the rebels at Charleston were recited by President Lincoln, in his Message to Congress, at the special session convened July 4, 1861: "On the 5th of March (the present incumbent's first full day in office), a letter of Major Anderson, commanding at Fort Sumter, written on the 28th of February and received at the War Department on the 4th of March, was by that department placed in his hands. This letter expressed the professional opinion of the writer that reinforcements could not be thrown into that fort within the time for his relief, rendered necessary by the limited supply of provisions, and with a view of holding possession of the same, with a force of less than 20,000 good and well-disciplined men. This opinion was concurred in by all the officers of his command, and their memoranda on the subject were made inclosures of Major Anderson's letter. The whole was immediately laid before Lieutenant-General Scott, who at once concurred

with Major Anderson in opinion. On reflection, however, he took full time, consulting with other officers, both of the army and the navy, and at the end of four days came reluctantly but decidedly to the same conclusion as before. He also stated at the same time that no such sufficient force was then at the control of the government, or could be raised and brought to the ground within the time when the provisions in the fort would be exhausted. In a purely military point of view, this reduced the duty of the administration in the case to the mere matter of getting the garrison safely out of the fort. It was believed, however, that to so abandon that position, under the circumstances, would be utterly ruinous; that the necessity under which it was to be done would not be fully understood; that by many it would be construed as a part of a voluntary policy; that at home it would discourage the friends of the Union, embolden its adversaries, and go far to insure to the latter a recognition abroad; that, in fact, it would be our national destruction consummated. This could not be allowed. Starvation was not yet upon the garrison, and ere it would be reached Fort Pickens might be reinforced. This last would be a clear indication of policy, and would better enable the country to accept the evacuation of Fort Sumter as a military necessity. An order was at once directed to be sent for the landing of the troops from the steamship 'Brooklyn' into Fort Pickens. This order could not go by land, but must take the longer and slower route by sea. The first return news from the order was received just one week before the fall of Fort Sumter. The news itself was that the officer commanding the 'Sabine,' to which vessel the troops had been transferred from the 'Brooklyn,' acting upon some quasi armistice of the late administration (and of the existence of which the present administration, up to the time the order was despatched, had only too vague and uncertain rumors to fix attention), had refused to land the troops. To now reinforce Fort Pickens before a crisis would be reached at Fort Sumter was impossible—rendered so by the near exhaustion of provisions in the latter-named fort. In precaution against such a conjuncture, the government had, a few days before, commenced preparing an expedition as well adapted as might be to relieve Fort Sumter, which expedition was intended to be ultimately used, or not, according to circumstances. The strongest anticipated case for using it was now presented, and it was resolved to send it forward. As had been intended in this contingency, it was also resolved to notify the governor of South Carolina that he might expect an attempt would be made to provision the fort; and that, if the attempt should not be resisted, there would be no effort to throw in men, arms, or ammunition, without further notice, or in case of an attack upon the fort. This notice was accordingly given; whereupon the fort was attacked and bombarded to its fall, without even awaiting the arrival of the provisioning expedition. It is thus seen that the assault upon and reduction of Fort Sumter was in no sense a matter of self-defense on the part of the assailants."—Abraham Lincoln, *Complete Works, v.* 2, *pp.* 56–57.—The President's delay of action in the case of Fort Sumter was mainly due, on the political side of the question, to the state of things in the border states—especially in Virginia. "There were fifteen slave states, which those engaged in the rebellion hoped to lead or to force into secession. At the time of the inauguration, only seven of these fifteen—less than a majority—had revolted. The cotton states alone had followed the lead of South Carolina out of the Union. Several weeks had passed since a state had seceded; and unless other states could be dragooned into the movement, the rebellion would be practically a failure from the start. Such a confederacy could not hope to live a year, and would be obliged to find its way back into the Union upon some terms. In the meantime, two or three conventions in the border states [Virginia, April 4, and Missouri, March], delegated freshly from the people, had voted distinctly and decidedly not to secede. [Kentucky and Tennessee had refused even the call of conventions; while North Carolina, Feb. 28, and Arkansas, March 18, of the states farther south, had voted secession down.] The affairs of the confederacy were really in a very precarious condition when Mr. Lincoln came into power. The rebel government was making very much more bluster than progress. It became Mr. Lincoln's policy so to conduct affairs as to strengthen the Union feeling in the border states, and to give utterance to no sentiment and to do no deed which should drive these states toward the confederacy. . . . The confederacy found that it must make progress or die. The rebel Congress passed a measure for the organization of an army, on the 9th of March, and on the 12th two confederate commissioners—Mr. Forsyth of Alabama and Mr. Crawford of Georgia—presented themselves at the State Department at Washington for the purpose of making a treaty with the United States. They knew, of course, that they could not be received officially, and that they ought to be arrested for treason. The President would not recognize them, but sent to them a copy of his Inaugural, as the embodiment of the views of the government. . . . In the meantime, Lieutenant Talbot, on behalf of Mr. Lincoln, was having interviews with Governor Pickens of South Carolina and with General Beauregard, in command of the confederate forces there, in which he informed them that provisions would be sent to Fort Sumter, peaceably if possible,—otherwise by force. This was communicated to L. P. Walker, then rebel Secretary of War. Before Talbot had made his communication, Beauregard had informed Major Anderson, in command of Fort Sumter, that he must have no further intercourse with Charleston; and Talbot himself was refused permission to visit that gallant and faithful officer. . . . The wisdom of Mr. Lincoln's waiting became evident at a day not too long delayed. Fort Pickens, which the rebels had not taken, was quietly reinforced [April 12], and when the vessels which carried the relief [to Sumter] were dispatched, Mr. Lincoln gave official information to General Beauregard that provisions were to be sent to Major Anderson in Fort Sumter, by an unarmed vessel. He was determined that no hostile act on the part of the government should commence the war, for which both sides were preparing; although an act of open war had already transpired in Charleston harbor"—the rebel batteries having

fired upon and driven off the unarmed steamer Star of the West, which had been sent to convey troops and provisions to Fort Sumter on the 9th of January, two months before Lincoln's inauguration. "Beauregard laid this last intelligence before his Secretary of War, and, under special instructions, on the 12th of April, he demanded the surrender of Fort Sumter. He was ready to make the demand, and to back it by force. The city of Charleston was full of troops, and, for months, batteries had been in course of construction, with the special purpose of compelling the surrender of the fort. Major Anderson had seen these batteries going up, day after day, without the liberty to fire a gun. He declined to surrender. He was called upon to state when he would evacuate the fort. He replied that on the 15th he would do so, should he not meantime receive controlling instructions from the government, or additional supplies. The response which he received was that the confederate batteries would open on Fort Sumter in one hour from the date of the message. The date of the message was 'April 12, 1861, 3:30 A. M.' Beauregard was true to his word. At half past four the batteries opened upon the Fort, which, after a long and terrible bombardment, and a gallant though comparatively feeble defense by a small and half-starved garrison, was surrendered the following day. . . . The fall of Sumter was the resurrection of patriotism. The North needed just this. Such a universal burst of patriotic indignation as ran over the North under the influence of this insult to the national flag has never been witnessed. It swept away all party lines as if it had been flame and they had been flax."—J. G. Holland, *Life of Lincoln, ch.* 18.

A. D. 1861 (April).—President Lincoln's call to arms.—The mighty uprising of the North.—The response of disloyal Governors.—"By the next morning (Sunday April 14) the news of the close of the bombardment and capitulation of Sumter was in Washington. In the forenoon, at the time Anderson and his garrison were evacuating the fort, Lincoln and his Cabinet, together with sundry military officers, were at the Executive Mansion, giving final shape to the details of the action the Government had decided to take. A proclamation, drafted by himself, copied on the spot by his secretary, was concurred in by his Cabinet, signed, and sent to the State Department to be sealed, filed, and copied for publication in the next morning's newspapers. The document bears date April 15 (Monday), but was made and signed on Sunday." It was as follows:

"Whereas the laws of the United States have been for some time past and now are opposed, and the execution thereof obstructed, in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or by the powers vested in the marshals by law: Now, therefore, I, Abraham Lincoln, President of the United States, in virtue of the power in me vested by the Constitution and the laws, have thought fit to call forth, and hereby do call forth, the militia of the several States of the Union, to the aggregate number of seventy-five thousand, in order to suppress said combinations, and to cause the laws to be duly executed. The details for this object will be immediately communicated to the State authorities through the War Department. I appeal to all loyal citizens to favor, facilitate, and aid this effort to maintain the honor, the integrity, and the existence of our National Union, and the perpetuity of popular government; and to redress wrongs already long enough endured. I deem it proper to say that the first service assigned to the forces hereby called forth will probably be to repossess the forts, places, and property which have been seized from the Union; and in every event the utmost care will be observed, consistently with the objects aforesaid, to avoid any devastation, any destruction of or interference with property, or any disturbance of peaceful citizens in any part of the country. And I hereby command the persons composing the combination aforesaid to disperse and retire peacefully to their respective abodes within twenty days from date. Deeming that the present condition of public affairs presents an extraordinary occasion, I do hereby, in virtue of the power in me vested by the Constitution, convene both Houses of Congress. Senators and Representatives are therefore summoned to assemble at their respective chambers, at twelve o'clock noon, on Thursday the fourth day of July next, then and there to consider and determine such measures as, in their wisdom, the public safety and interest may seem to demand. In witness whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed. Done at the city of Washington, this 15th day of April, in the year of our Lord one thousand eight hundred and sixty-one, and of the Independence of the United States the eighty-fifth. Abraham Lincoln. By the President: William H. Seward, Secretary of State."—Abraham Lincoln, *Complete Works, v.* 2, *p.* 34.

"In view of the subsequent gigantic expansion of the civil war, eleventh-hour critics continue to insist that a larger force should have been called at once. They forget that this was nearly five times the then existing regular army; that only very limited quantities of arms, equipments, and supplies were in the Northern arsenals; that the treasury was bankrupt; and that an insignificant eight million loan had not two weeks before been discounted nearly six per cent. by the New York bankers, some bids ranging as low as eighty-five. They forget that the shameful events of the past four months had elicited scarcely a spark of war feeling; that the loyal States had suffered the siege of Sumter and firing on the 'Star of the West' with a dangerous indifference. They forget the doubt and dismay, the panic of commerce, the division of counsels, the attacks from within, the sneers from without—that faith seemed gone and patriotism dead. Twenty-four hours later all this was measurably changed. . . . The guns of the Sumter bombardment woke the country

from the political nightmare which had so long tormented and paralyzed it. The lion of the North was fully roused. Betrayed, insulted, outraged, the free States arose as with a cry of pain and vengeance. War sermons from pulpits; war speeches in every assemblage; tenders of troops; offers of money; military proclamations and orders in every newspaper; every city radiant with bunting; every village-green a mustering ground; war appropriations in every legislature and in every city or town council; war preparations in every public or private workshop; gun-casting in the great foundries; cartridge-making in the principal towns; camps and drills in the fields; parades, drums, flags, and bayonets in the streets; knitting, bandage-rolling, and lint-scraping in nearly every household. Before the lapse of forty-eight hours a Massachusetts regiment, armed and equipped, was on its way to Washington; within the space of a month the energy and intelligence of the country were almost completely turned from the industries of peace to the activities of war."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 4, *ch.* 4–5.—"In intelligence no army, except perhaps the Athenian, can have ever equalled or approached that of the North. Most of the soldiers carried books and writing materials in their knapsacks, and mail bags heavily weighted with letters were sent from every cantonment. Such privates would sometimes reason instead of obeying, and they would see errors of their commanders to which they had better have been blind. But on the whole, in a war in which much was thrown upon the individual soldier, intelligence was likely to prevail. In wealth, in the means of providing the weapons and ammunitions of war, the North had an immense advantage, which, combined with that of numbers, could not fail, if, to use Lincoln's homely phrase, it 'pegged away,' to tell in the end. It was also vastly superior in mechanical invention; which was destined to play a great part, and in mechanical skill; almost every Yankee regiment was full of mechanics, some of whom could devise as well as execute. In artillery and engineering the North took the lead from the first, having many civil engineers, whose conversion into military civil engineers was easy. The South, to begin with, had the contents of Federal arsenals and armouries, which had been well stocked by the provident treason of Buchanan's Minister of War. . . . But when these resources were exhausted, replacement was difficult, the blockade having been established, though extraordinary efforts in the way of military manufacture were made. To the wealthy North, besides its own factories, were opened the markets of England and the world. Of the small regular army the Confederacy had carried off a share, with nearly half the regular officers. The South had the advantage of the defensive, which, with long-range muskets and in a difficult country, was reckoned in battle as five to two. The South had the superiority of the unity, force, and secrecy which autocracy lends to the operations of war. On the side of the North these were comparatively wanting."—Goldwin Smith, *The United States, ch.* 5.—In six of the eight Slave-labor States included in the call, the President's Proclamation and the requisition of the Secretary of War "were treated by the authorities with words of scorn and defiance. The exceptions were Maryland and Delaware. In the other States, disloyal Governors held the reins of power. 'I have only to say,' replied Governor Letcher of Virginia, 'that the militia of this State will not be furnished to the powers at Washington for any such purpose as they have in view. Your object is to subjugate the Southern States, and a requisition made upon me for such an object — an object, in my judgment, not within the province of the Constitution or the Act of 1795 — will not be complied with. You have chosen to inaugurate civil war, and, having done so, we will meet it in a spirit as determined as the Administration has exhibited toward the South.' Governor Ellis, of North Carolina, answered: — 'Your dispatch is received, and if genuine, which its extraordinary character leads me to doubt, I have to say in reply, that I regard the levy of troops, made by the Administration for the purpose of subjugating the States of the South, as in violation of the Constitution, and a usurpation of power. I can be no party to this wicked violation of the laws of the country, and to this war upon the liberties of a free people. You can get no troops from North Carolina.' Governor Magoffin, of Kentucky, replied: — 'Your dispatch is received. I say emphatically that Kentucky will furnish no troops for the wicked purpose of subduing her sister Southern States.' Governor Harris, of Tennessee, said: — 'Tennessee will not furnish a single man for coercion, but 50,000, if necessary, for the defense of our rights, or those of our Southern brethren.' Governor Rector, of Arkansas, replied: — 'In answer to your requisition for troops from Arkansas to subjugate the Southern States, I have to say that none will be furnished. The demand is only adding insult to injury.' . . . Governor Jackson, of Missouri, responded: — 'There can be, I apprehend, no doubt that these men are intended to make war upon the seceded States. Your requisition, in my judgment, is illegal, unconstitutional, and revolutionary in its objects, inhuman and diabolical, and cannot be complied with. Not one man will the State of Missouri furnish to carry on such an unholy crusade.' . . . Governor Hicks, of Maryland, appalled by the presence of great dangers, and sorely pressed by the secessionists on every side, hastened, in a proclamation, to assure the people of his State that no troops would be sent from Maryland unless it might be for the defense of the National Capital, and that they (the people) would, in a short time, 'have the opportunity afforded them, in a special election for members of the Congress of the United States, to express their devotion to the Union, or their desire to see it broken up.' Governor Burton, of Delaware, made no response until the 26th, when he informed the President that he had no authority to comply with his requisition. At the same time he recommended the formation of volunteer companies for the protection of the citizens and property of Delaware, and not for the preservation of the Union. . . . In the seven excepted Slave-labor States in which insurrection prevailed, the proclamation and the requisition produced hot indignation, and were assailed with the bitterest scorn. . . . Even in the Free-labor States, there were vehement opposers of the war policy of the Government from its inception." But, speaking generally, "the uprising of the people of the Free-labor States in defense

of Nationality was a sublime spectacle. Nothing like it had been seen on the earth since the preaching of Peter the Hermit and of Pope Urban the Second filled all Christian Europe with religious zeal, and sent armed hosts, with the cry of 'God wills it! God wills it!' to rescue the sepulcher of Jesus from the hands of the infidel."—B. J. Lossing, *Field Book of the Civil War, v.* 1, *ch.* 14.

A. D. 1861 (April).—The Morrill Tariff Act. See TARIFF LEGISLATION: A. D. 1861–1864 (UNITED STATES).

A. D. 1861 (April).—Secession of Virginia. See VIRGINIA: A. D. 1861 (JANUARY—JUNE).

A. D. 1861 (April).—Activity of Rebellion in Virginia and Maryland.—Peril of the national capital.—Attack on Massachusetts volunteers in Baltimore.—"Massachusetts, always the most zealous, was the first in the field [with troops in response to the President's call], and on the 17th [April] she forwarded a regiment of volunteers from Boston to Washington. Pennsylvania, although nearly one-half of her votes had been given for Mr. Breckinridge, followed this example; and, owing to her geographical position, her volunteers reached the shores of the Potomac in advance of all the others. After passing through the great city of Baltimore in the midst of an incipient insurrection, they encamped around the Capitol, on the 18th of April. The seceders, on their side, had not lost a moment in Virginia. They were in possession of Richmond, where the convention was in session. . . . The workshops and arsenal of Harper's Ferry, situated at the confluence of the Potomac and the Shenandoah, on a spot which was destined to play an important part during the war, were only guarded by a detachment of 64 dismounted dragoons; and the Virginia volunteers, assembled in the valleys of the Blue Ridge, were ready to take possession of them as soon as the ordinance for the secession of Virginia should furnish them a pretext. They were then to cross the Potomac and join the insurgents of Maryland, for the purpose of attempting the capture of Washington, where their accomplices were expecting them. On the morning of the 18th [April], a portion of them were on their march, in the hope of seizing the prey which was to be of so much value to the future armies of the Confederacy. But Lieutenant Jones, who was in command at Harper's Ferry, had been informed of the approach of the Confederate troops under the lead of Ashby—a chief well known since; notwithstanding their despatch, they only arrived in sight of Harper's Ferry in time to see from a distance a large conflagration that was consuming the workshops, store-houses, and the enormous piles of muskets heaped in the yards, while the Federal soldiers who had just kindled it were crossing the Potomac on their way to Washington. The Confederates found nothing but smoking ruins, and some machinery, which they sent to Richmond; their allies from Maryland had not made their appearance, and they did not feel strong enough to venture alone to the other side of the Potomac. During the last few days the authorities of Virginia had been making preparations for capturing the Norfolk [or Gosport] arsenal (navy-yard). That establishment possessed a magnificent granite basin, construction docks, and a dépôt of artillery with more than 2,000 guns; a two-decked vessel was on the stocks, two others, with a three-decker, three frigates, a steam sloop, and a brig, lay dismantled in the port; the steam frigate Merrimac was there undergoing repairs; the steam sloop Germantown was in the harbor ready to go to sea, while the sailing sloop Cumberland was lying to at the entrance of the port. . . . Commodore McCauley, the Federal commandant, was surrounded by traitors," and, being deficient in energy and capability, he allowed himself to be put in a position where he thought it necessary to sink all the vessels in the harbor except the Cumberland. As they were sinking, reinforcements arrived from Washington, under Captain Paulding, who superseded McCauley in command. But they came too late. Captain Paulding could do nothing except hastily destroy as far as possible the sinking ships and the arsenal buildings, and then retreat. "The Confederates found abundant resources in artillery and 'matériel' of every description in Norfolk; the fire was soon extinguished, the docks repaired, and they succeeded in raising the Merrimac, which we shall see at work the following year. Fort Monroe had just been occupied by a small Federal garrison. Its loss would have been even more disastrous to the Federal cause than that of the Norfolk navy-yard and arsenal, because the Confederates, instead of having to cover Richmond, would have been able to blockade Washington by sea and besiege it by land. . . . The example of Virginia fired the enthusiasm of the secessionists everywhere, and they applied themselves to the task of drawing into the conflict those slave States which were still hesitating. . . . The sight of the Pennsylvania volunteers had caused a great irritation in Baltimore. That city, the largest in the slave States, . . . warmly sympathized with the South. Her location on the railway line which connects Washington with the great cities of the North imparted to her a peculiar importance. Consequently, the accomplices of the South, who were numerous in Baltimore, determined to seize the first opportunity that might offer to drag that city into the rebellion. . . . The looked-for opportunity occurred . . . April 19. When the Sixth Massachusetts Regiment, with a few battalions of Pennsylvania volunteers, arrived at the northern station, an immense crowd bore down upon them. A line of rails, laid in the centre of the streets, connected this with the southern station, and enabled the cars, drawn by horses, to pass through the city. The crowd surround the soldiers of the Sixth Massachusetts, who occupy these cars. The last cars are stopped, and the occupants, being obliged to get out, endeavor to make their way through the crowd. But, being hemmed in on all sides, they are soon attacked by a shower of stones, which wound many of them, and injure a few mortally. The soldiers have to defend themselves, and the first discharge of musketry, which has considerable effect, opens them a passage. But the aggressors, being armed, rally, and a regular battle ensues. . . . The ground is strewn with the wounded of both parties. At last, the Massachusetts soldiers rejoin their comrades at the southern station," and are conveyed to Washington. "Baltimore was thenceforth in possession of the secessionists,

who were fully determined to take advantage of the situation of that city to intercept all communications between Washington and the North. Accordingly, they hastened to burn the railroad bridges which had been constructed over large estuaries north of Baltimore, and to cut the telegraph wires. Deprived of all sources of information from the North, the capital of the Union was soon wrapped in mournful silence. For some days the occupant of the White House was unable to forward any instructions to the people who had remained faithful to the Union; but their zeal did not abate on that account. Patriotism extinguished all party animosities in the hearts of most of the Democrats who had opposed the election of Mr. Lincoln. In the presence of the national peril they loyally tendered their assistance to the President; and breaking loose from their former accomplices of the South, they assumed the name of War Democrats in opposition to that of Peace Democrats."—Comte de Paris, *Hist. of the Civil War in Am., v.* 1, *bk.* 2, *ch.* 4.

A. D. 1861 (April: South Carolina).—Monarchical cravings.—Intensity of the Carolinian hatred of New England and the North.—Mr. Russell, who was famous in his day as a correspondent of "The Times" (London), spent some time in South Carolina at the beginning of the war, and described the state of feeling there in a letter from Charleston, written at the end of April: "Nothing I could say," he wrote, "can be worth one fact which has forced itself upon my mind in reference to the sentiments which prevail among the gentlemen of this State. I have been among them for several days. I have visited their plantations, I have conversed with them freely and fully, and I have enjoyed that frank, courteous and graceful intercourse which constitutes an irresistible charm of their society. From all quarters have come to my ears the echoes of the same voice. . . . That voice says, 'If we could only get one of the royal race of England to rule over us, we should be content.' Let there be no misconception on this point. That sentiment, varied in a hundred ways, has been repeated to me over and over again. There is a general admission that the means to such an end are wanting, and that the desire cannot be gratified. But the admiration for monarchical institutions on the English model, for privileged classes, and for a landed aristocracy and gentry, is undisguised and apparently genuine. With the pride of having achieved their independence is mingled in the South Carolinians' hearts a strange regret at the result and consequences, and many are they who 'would go back tomorrow if we could.' An intense affection for the British connection, a love of British habits and customs, a respect for British sentiment, law, authority, order, civilization, and literature, preëminently distinguish the inhabitants of this State, who, glorying in their descent from ancient families on the three islands, whose fortunes they still follow, and with whose members they maintain not unfrequently familiar relations, regard with an aversion of which it is impossible to give an idea to one who has not seen its manifestations, the people of New England and the populations of the Northern States, whom they regard as tainted beyond cure by the venom of 'Puritanism.' Whatever may be the cause, this is the fact and the effect. 'The State of South Carolina was,' I am told, 'founded by gentlemen.' It was not established by witch-burning Puritans, by cruel persecuting fanatics, who implanted in the North the standard of Torquemada, and breathed into the nostrils of their newly-born colonies all the ferocity, bloodthirstiness, and rabid intolerance of the Inquisition. . . . 'We could have got on with these fanatics if they had been either Christians or gentlemen,' says [one], 'for in the first case they would have acted with common charity, and in the second they would have fought when they insulted us; but there are neither Christians nor gentlemen among them!' 'Any thing on earth!' exclaims [another], 'any form of government, any tyranny or despotism you will; but'—and here is an appeal more terrible than the adjuration of all the Gods—'nothing on earth shall ever induce us to submit to any union with the brutal, bigoted blackguards of the New England States, who neither comprehend nor regard the feelings of gentlemen! Man, woman and child, we'll die first.' . . . The hatred of the Italian for the Tedesco, of the Greek for the Turk, of the Turk for the Russ, is warm and fierce enough to satisfy the prince of darkness, not to speak of a few little pet aversions among allied powers and the atoms of composite empires; but they are all mere indifference and neutrality of feeling compared to the animosity evinced by the 'gentry' of South Carolina for the 'rabble of the North.' The contests of Cavalier and Roundhead, of Vendean and Republican, even of Orangeman and Croppy, have been elegant joustings, regulated by the finest rules of chivalry, compared with those which North and South will carry on if their deeds support their words. 'Immortal hate, the study of revenge' will actuate every blow, and never in the history of the world, perhaps, will go forth such a 'væ victis' as that which may be heard before the fight has begun. There is nothing in all the dark caves of human passion so cruel and deadly as the hatred the South Carolinians profess for the Yankees. That hatred has been swelling for years, till it is the very life-blood of the state. . . . Believe a southern man as he believes himself, and you must regard New England and the kindred States as the birthplace of impurity of mind among men and of unchastity in women—the home of free love, of Fourrierism, of infidelity, of abolitionism, of false teachings in political economy and in social life; a land saturated with the drippings of rotten philosophy, with the poisonous infections of a fanatic press; without honor or modesty; whose wisdom is paltry cunning, whose valor and manhood have been swallowed up in a corrupt, howling demagogy, and in the marts of a dishonest commerce."—W. H. Russell, *Letter to the Times* (*London*), *April* 30, 1861.

A. D. 1861 (April—May).—Proclamation by the Confederate President.—President Lincoln's proclamation of a Blockade of Southern ports.—The Queen's proclamation of British neutrality.—On the 17th of April, two days after President Lincoln's call for troops, Jefferson Davis, the chief of the rebellious Con-

federacy, published a counter-proclamation, giving notice of the intention of the government at Montgomery to issue letters of marque to privateers, for the destruction of American commerce. It was as follows:

"Whereas, Abraham Lincoln, the President of the United States has, by proclamation announced the intention of invading this Confederacy with an armed force, for the purpose of capturing its fortresses, and thereby subverting its independence, and subjecting the free people thereof to the dominion of a foreign power; and whereas it has thus become the duty of this Government to repel the threatened invasion, and to defend the rights and liberties of the people by all the means which the laws of nations and the usages of civilized warfare place at its disposal; Now, therefore, I, Jefferson Davis, President of the Confederate States of America, do issue this my Proclamation, inviting all those who may desire, by service in private armed vessels on the high seas, to aid this Government in resisting so wanton and wicked an aggression, to make application for commissions or Letters of Marque and Reprisal, to be issued under the Seal of these Confederate States. And I do further notify all persons applying for Letters of Marque, to make a statement in writing, giving the name and a suitable description of the character, tonnage, and force of the vessel, and the name and place of residence of each owner concerned therein, and the intended number of the crew, and to sign said statement and deliver the same to the Secretary of State, or to the Collector of any port of entry of these Confederate States, to be by him transmitted to the Secretary of State. And I do further notify all applicants aforesaid that before any commission or Letter of Marque is issued to any vessel, the owner or owners thereof, and the commander for the time being, will be required to give bond to the Confederate States, with at least two responsible sureties, not interested in such vessel, in the penal sum of five thousand dollars; or if such vessel be provided with more than one hundred and fifty men, then in the penal sum of ten thousand dollars, with condition that the owners, officers, and crew who shall be employed on board such commissioned vessel, shall observe the laws of these Confederate States and the instructions given to them for the regulation of their conduct. That they shall satisfy all damages done contrary to the tenor thereof by such vessel during her commission, and deliver up the same when revoked by the President of the Confederate States. And I do further specially enjoin on all persons holding offices, civil and military, under the authority of the Confederate States, that they be vigilant and zealous in discharging the duties incident thereto; and I do, moreover, solemnly exhort the good people of these Confederate States as they love their country, as they prize the blessings of free government, as they feel the wrongs of the past and these now threatened in aggravated form by those whose enmity is more implacable because unprovoked, that they exert themselves in preserving order, in promoting concord, in maintaining the authority and efficacy of the laws, and in supporting and invigorating all the measures which may be adopted for the common defence, and by which, under the blessing of Divine Providence, we may hope for a speedy, just, and honorable peace. In testimony whereof, I have hereunto set my hand, and caused the Seal of the Confederate States to be affixed, this seventeenth day of April 1861. By the President, (Signed) Jefferson Davis. R. Toombs, Secretary of State."

The response to this menace was a second proclamation by President Lincoln, announcing a blockade of the ports of the Confederacy, and warning all persons who should accept and act under the proposed letters of marque that they would be held amenable to the laws against piracy. This proclamation was in the following language:

"Whereas an insurrection against the government of the United States has broken out in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, and the laws of the United States for the collection of the revenue cannot be effectually executed therein conformably to that provision of the Constitution which requires duties to be uniform throughout the United States: And whereas a combination of persons engaged in such insurrection have threatened to grant pretended letters of marque to authorize the bearers thereof to commit assaults on the lives, vessels, and property of good citizens of the country lawfully engaged in commerce on the high seas, and in waters of the United States: And whereas an executive proclamation has been already issued requiring the persons engaged in these disorderly proceedings to desist therefrom, calling out a militia force for the purpose of repressing the same, and convening Congress in extraordinary session to deliberate and determine thereon: Now, therefore, I, Abraham Lincoln, President of the United States, with a view to the same purposes before mentioned, and to the protection of the public peace, and the lives and property of quiet and orderly citizens pursuing their lawful occupations, until Congress shall have assembled and deliberated on the said unlawful proceedings, or until the same shall have ceased, have further deemed it advisable to set on foot a blockade of the ports within the States aforesaid, in pursuance of the laws of the United States, and of the law of nations in such case provided. For this purpose a competent force will be posted so as to prevent entrance and exit of vessels from the ports aforesaid. If, therefore, with a view to violate such blockade, a vessel shall approach or shall attempt to leave either of the said ports, she will be duly warned by the commander of one of the blockading vessels, who will indorse on her register the fact and date of such warning, and if the same vessel shall again attempt to enter or leave the blockaded port, she will be captured and sent to the nearest convenient port, for such proceedings against her and her cargo, as prize, as may be deemed advisable. And I hereby proclaim and declare that if any person, under the pretended authority of the said States, or under any other pretense, shall molest a vessel of the United States, or the persons or cargo on board of her, such person will be held amenable to the laws of the United States for the prevention and punishment of piracy. In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed. Done at the city of Washington, this nineteenth day of April, in the year of our Lord one thousand eight hundred and

sixty-one, and of the independence of the United States the eighty-fifth. Abraham Lincoln. By the President: William H. Seward, Secretary of State."—Abraham Lincoln, *Complete Works*, *v.* 2, *pp.* 35-36.

Apparently on unofficial information of these announcements, indicating a state of civil war in the United States, the Government of Great Britain made haste — unfriendly haste, as the United States complained — to declare neutrality between the belligerents, thus placing the insurgent Confederacy on an exactly equal footing with the United States so far as a foreign recognition might do so. The Queen's Proclamation was as follows:

"Whereas, We are happily at peace with all Sovereigns, Powers, and States; And whereas hostilities have unhappily commenced between the Government of the United States of America and certain States styling themselves 'the Confederate States of America'; And whereas we, being at peace with the Government of the United States, have declared our Royal determination to maintain a strict and impartial neutrality in the contest between the said contending parties; We, therefore, have thought fit, by and with the advice of our Privy Council, to issue this our Royal Proclamation: And we do hereby strictly charge and command all our loving subjects to observe a strict neutrality in and during the aforesaid hostilities, and to abstain from violating or contravening either the laws and statutes of the realm in this behalf, or the law of nations in relation thereto, as they will answer to the contrary at their peril." After reciting the language of certain statutes which forbid the subjects of Her Majesty to engage, without leave and license from the Crown, in any foreign military or naval service, or to furnish or equip any ship or vessel for service against any state with which Her Majesty is not at war, the Proclamation proceeds as follows: "Now, in order that none of our subjects may unwarily render themselves liable to the penalties imposed by said statute, we do hereby strictly command, that no person or persons whatsoever do commit any act, matter or thing whatsoever, contrary to the provisions of the said statute, upon pain of the several penalties by the said statute imposed, and of our high displeasure. And we do hereby further warn all our loving subjects, and all persons whatsoever entitled to our protection, that if any of them shall presume, in contempt of this Royal Proclamation, and of our high displeasure, to do any acts in derogation of their duty as subjects of a neutral sovereign, in the said contest, or in violation or contravention of the law of nations in that behalf — as, for example and more especially, by entering into the military service of either of the said contending parties as commissioned or non-commissioned officers or soldiers; or by serving as officers, sailors, or marines on board any ship or vessel of war or transport of or in the service of either of the said contending parties; or by serving as officers, sailors, or marines on board any privateer bearing letters of marque of or from either of the said contending parties; or by engaging to go or going to any place beyond the seas with intent to enlist or engage in any such service, or by procuring or attempting to procure, within Her Majesty's dominions, at home or abroad, others to do so; or by fitting out, arming, or equipping, any ship or vessel to be employed as a ship-of-war, or privateer, or transport, by either of the said contending parties; or by breaking, or endeavoring to break, any blockade lawfully and actually established by or on behalf of either of the said contending parties; or by carrying officers, soldiers, despatches, arms, military stores or materials, or any article or articles considered and deemed to be contraband of war according to the law of modern usage of nations, for the use or service of either of the said contending parties, all persons so offending will incur and be liable to the several penalties and penal consequences by the said statute, or by the law of nations, in that behalf imposed or denounced. And we do hereby declare that all our subjects and persons entitled to our protection who may misconduct themselves in the premises will do so at their peril and of their own wrong, and that they will in no wise obtain any protection from us against any liability or penal consequences, but will, on the contrary, incur our high displeasure by such misconduct. Given at our Court at the White Lodge, Richmond Park, this 13th day of May, in the year of our Lord 1861, and in the 24th year of our reign. God save the Queen."

In the complaint of the United States subsequently submitted to the Tribunal of Arbitration at Geneva, the facts attending this remarkably hastened Proclamation of Neutrality were set forth as follows: "Before any armed collision had taken place, there existed an understanding between Her Majesty's Government and the Government of the Emperor of the French, with a view to securing a simultaneous and identical course of action of the two Governments on American questions. . . . The fact that it had been agreed to by the two Governments was communicated to Mr. Dallas, by Lord John Russell, on the first day of May, 1861. There was nothing in the previous relations between Great Britain and the United States which made it necessary for Her Majesty's Government to seek the advice or to invite the support of the Emperor of the French in the crisis which was threatened. . . . When the news of the bloodless attack upon Fort Sumter became known in Europe, Her Majesty's Government apparently assumed that the time had come for the joint action which had been previously agreed upon; and, without waiting to learn the purposes of the United States, it announced its intention to take the first step by recognizing the insurgents as belligerents. The President's Proclamation, which has since been made the ostensible reason for this determination, was issued on the 19th of April, and was made public in the Washington newspapers of the morning of the 20th. An imperfect copy of it was also telegraphed to New York, and from thence to Boston, in each of which cities it appeared in the newspapers of the morning of the 20th. The New York papers of the 20th gave the substance of the Proclamation, without the official commencement and close, and with several errors of more or less importance. The Boston papers of the same date, in addition to the errors in the New York copy, omitted the very important statement in regard to the collection of the revenue, which appears in the Proclamation as the main cause of its issue. During the morning of the 19th of April,

a riot took place in Baltimore, which ended in severing direct communication, by rail or telegraph, between Washington and New York. Telegraphic communication was not restored until the 30th of the month. The regular passage of the mails and trains was resumed about the same time. . . . It is absolutely certain that no full copy of the text of the Proclamation could have left Washington by the mails of the 19th, and equally certain that no copy could have reached New York from Washington after the 19th for several days. On the 20th the steamer Canadian sailed from Portland, taking the Boston papers of that day, with the imperfect copy of the Proclamation, in which the clause in regard to the collection of the revenue was suppressed. This steamer arrived at Londonderry on the 1st of May, and the 'Daily News' of London, of the 2d of May, published the following telegraphic items of news: 'President Lincoln has issued a Proclamation, declaring a blockade of all the ports in the seceded States. The Federal Government will condemn as pirates all privateer-vessels which may be seized by Federal ships.' The Canadian arrived at Liverpool on the 2d of May, and the 'Daily News,' of the 3d, and the 'Times,' of the 4th of May, published the imperfect Boston copy of the Proclamation. . . . No other than the Boston copy of the Proclamation appears to have been published in the London newspapers. It is not likely that a copy was received in London before the 10th, by the Fulton from New York. It was on this meager and incorrect information that the advice of the British Law Officers was based, upon which that Government acted. . . . On the 5th of May the steamship Persia arrived at Liverpool with advices from New York to the 25th of April. Lord John Russell stated on Monday, the 6th of May, in a communication to Lord Cowley, 'that Her Majesty's Government received no dispatches from Lord Lyons by the mail which has just arrived, [the Persia,] the communication between Washington and New York being interrupted.' In the same dispatch Lord Cowley is informed 'that Her Majesty's Government cannot hesitate to admit that such Confederacy is entitled to be considered as a belligerent, and as such invested with all the rights and prerogatives of a belligerent,' and he is instructed to invite the French Government to a joint action, and a line of joint policy with the British Government, toward the United States."—*The Case of the United States before the Tribunal of Arbitration at Geneva* [*42d cong., 2d sess., Senate ex. doc.* 31], *pp.* 24–27.—"The British government is accustomed to preserve an attitude of neutrality towards contending nations; but it would seem that neutrality does not so far interfere with the sympathies and freedom of its subjects as to compel it to issue proclamations against Irishmen enlisting with Francis Joseph, or Englishmen fighting for Victor Emanuel and Garibaldi. . . . In the case of the United States, the laws of England and its treaty stipulations with our Government already forbade its subjects from engaging in a conspiracy to overthrow our institutions. The proclamation, therefore, in forbidding English subjects to fight in the service of the rebels against the United States, simply declared the law as it was already understood; while in forbidding Englishmen to fight for the United States against the rebels, it intervened to change the existing practice, to revive the almost obsolete act of Geo. III. forbidding English subjects from engaging in foreign service without the royal consent, which had slumbered in regard to Austria and Italy, for the purpose of forbidding Englishmen from assisting to maintain in the United States constitutional order against conspiracy and rebellion, and the cause of freedom against chattel slavery. The first effect of the proclamation, therefore, was to change the position in which England and Englishmen stood to the United States, to the disadvantage of the latter. Before the proclamation, for an Englishman to serve the United States Government in maintaining its integrity was regarded honorable; after the proclamation such service became a crime. The proclamatian makes it an offence now for an Englishman to fight for the Government at Washington as great as it was for Englishmen before the proclamation to fight for the rebels of Montgomery. It thus, in a moral view, lowered the American Government to the level of the rebel confederacy, and in the next place, it proceeded, in an international view, to place the rebel confederacy on a par with the American Government. . . . No ingenuity can blind us to these facts:—Before the proclamation, to support our Government was an honorable office for the subjects of Great Britain, and the rebels were insurgents, with no rights save under the American Constitution. After the proclamation, for an Englishman to serve the United States is a crime, and the rebels are elevated into a belligerent power—and this intervention of England, depriving us of a support which her practice permitted, and giving the rebels a status and right they did not possess, we are coolly told is neutrality. . . . What would England have said to such a proclamation of neutrality from us in her domestic troubles in Canada, in Ireland, or in India? What would the English people have thought of a state paper from Washington, declaring it the sovereign will of the people of the United States to remain perfectly neutral in the contest being waged in Hindostan between the British government on the one side and the Mogul dynasty on the other, and forbidding American citizens to enter the services of either of the said belligerents? What would they have thought of the American President intimating with cold etiquette that it was a matter of profound indifference to this Government which of the belligerents should be victorious, the King of Oude and Nana Sahib, or Lord Canning and the immortal Havelock?"—John Jay, *The Great Conspiracy: Address at Mount Kisco, July* 4, 1861.

Bernard, *Historical Account of the Neutrality of Great Britain during the Am. Civil War, ch.* 4–10.—See, also, Alabama Claims.

A. D. 1861 (April—May: Maryland).—The ending of rebellious trouble in Baltimore and the state.—General Butler in the field.—The Eighth Massachusetts Regiment, Colonel Monroe, arrived at Philadelphia on the 20th of April, the day following the passage of the Sixth Massachusetts Regiment through Baltimore, and its battle with the rebel mob of that city. The Eighth was accompanied by General Benjamin

F. Butler, who had been appointed by the Governor of Massachusetts to command the first brigade from that state. At Philadelphia General Butler "first heard of the attack on the Sixth, in Baltimore. His orders commanded him to march through that city. It was now impossible to do so with less than 10,000 armed men. He counselled with Major-General Robert Patterson, who had just been appointed commander of the 'Department of Washington,' which embraced the States of Pennsylvania, Delaware, and Maryland, and the District of Columbia, and whose head-quarters were at Philadelphia. Commodore Dupont, commandant of the Navy Yard there, was also consulted, and it was agreed that the troops should go by water from Perryville, at the mouth of the Susquehanna River, to Annapolis, and thence across Maryland to Washington." This route was accordingly taken by General Butler. Colonel Lefferts, who had reached Philadelphia with the New York Seventh Regiment, preferred to attempt going direct to Washington by a steamer which he secured for the purpose; but a report of rebel batteries on the Potomac turned him back, and his regiment, likewise, proceeded to Annapolis, arriving there some hours after the Eighth Massachusetts. Despite the protests and remonstrances of the Governor of Maryland — who was strong hard to put his state in an attitude of "neutrality" and to persuade the national government to respect it by passing no armed troops and as Maryland soil — both regiments were landed, and took possession of the town where the secessionists were making ready to capture the Naval Academy and the training ship Constitution. The track of the railroad from Annapolis had been torn up and the locomotives disabled. The mechanics of the Massachusetts Eighth proceeded quickly to repair both, and the two regiments moved forward. The troops reached Annapolis Junction on the morning of the 25th, when the co-operation of the two regiments caused the Seventh New York going on to Washington, and the Eighth Massachusetts remaining to hold the road they had just opened. Before their departure from Annapolis, the Baltic, a large steamship transport, had arrived there with troops, and others speedily followed. General Scott ordered General Butler to remain there, hold the town and the road, and superintend the forwarding of troops to the Capital. The Department of Annapolis, which embraced the country twenty miles on each side of the railway as far as Baltimore, was created, and General Butler was placed in command of it, with ample discretionary powers to make him a sort of military dictator. At the time of April, General Butler had full 10,000 men under his command at Annapolis and an equal number were guarding the way to Washington. Meanwhile Baltimore had been given up to the control of the secessionists, though the Maryland Unionists made numerous and strong appeals and were gathering courage to assert themselves. But the rebellion and treason there were brought to its senses. On the 13th of May General Butler sent two regiments to occupy the Relay House, within a few miles of Baltimore, on the Pat. A force of 1,200 Pennsylvania troops and regulars joined him at Annapolis. Patterson, from Philadelphia, was ordered near Fort McHenry, under the guns of a United States vessel, and marched through the city. On the night of the 13th, General Butler, in person, with about 1,000 men, including the Massachusetts Sixth, entered the place and took a commanding position on Federal Hill, which was afterwards permanently fortified. From that day the disloyalty in Baltimore gave no trouble to the Government.— B. J. Lossing, *Field Book of the Civil War, v.* 1, *ch.* 18.

A. D. 1861 (May).— Call for additional volunteers.—On the 3d of May the President issued a call for forty additional regiments of volunteers; directed an increase of the regular army by ten regiments, and ordered the enlistment of 18,000 seamen — acts subsequently legalized by Congress.

A. D. 1861 (May). — Exportation of cotton from the Confederacy, excepting through its seaports, prohibited.— On the 21st of May, 1861, the Congress of the Confederate States passed an act declaring that "from and after the 1st day of June next, and during the existence of the blockade of any of the ports of the Confederate States of America by the Government of the United States, it shall not be lawful for any person to export any raw cotton or cotton yarn from the Confederate States of America except through the seaports of the said Confederate States."

A. D. 1861 (May).—Secession of North Carolina. See North Carolina: A. D. 1861 (January—May).

A. D. 1861 (May).—General Butler at Fortress Monroe and his "Contrabands."—The first military thrust at Slavery.— General Butler was commissioned as Major-General of Volunteers on the 16th of May, and on the 20th he was ordered to the command at Fortress Monroe. He arrived at the Fortress on the 22d and assumed the command. "On the evening of the second day after his arrival at the post, the event occurred which will for ever connect the name of General Butler with the history of the abolition of slavery in America. Colonel Phelps's visit to Hampton [the previous day] had thrown the white inhabitants into such alarm that most of them prepared for flight, and many left their homes that night, never to see them again. In the confusion three negroes escaped, and, making their way across the bridges, gave themselves up to a Union picket, saying that their master, Colonel Mallory, was about to remove them to North Carolina to work upon rebel fortifications there, far away from their wives and children, who were to be left in Hampton. They were brought to the fortress, and the circumstance was reported to the general in the morning. . . . He needed laborers. He was aware that the rebel batteries that were rising around him were the work chiefly of slaves, without whose assistance they could not have been erected in time to give him trouble. He wished to keep these men. The garrison wished them kept. The country would have deplored or resented the sending of them away. If they had been Colonel Mallory's horses, or Colonel Mallory's spades, or Colonel Mallory's percussion caps, he would have seized them and

used them without hesitation. Why not property more valuable for the purposes of the rebellion than any other? He pronounced the electric words, 'These men are Contraband of War; set them at work.' 'An epigram,' as Winthrop remarks, 'abolished slavery in the United States.' The word took; for it gave the country an excuse for doing what it was longing to do. . . . By the time the three negroes were comfortably at work upon the new bake-house, General Butler received the following brief epistle, signed 'J. B. Carey, major-acting, Virginia volunteers': 'Be pleased to designate some time and place when it will be agreeable to you to accord to me a personal interview.' The general complied with the request." The interview occurred that afternoon, and was not between strangers; for General Butler and Major Carey were old political allies — hard-shell democrats both. The essential part of the conversation which ensued was as follows: "Major Carey: 'I am informed that three negroes, belonging to Colonel Mallory, have escaped within your lines. I am Colonel Mallory's agent and have charge of his property. What do you intend to do with regard to those negroes?' General Butler: 'I propose to retain them.' Major Carey: 'Do you mean, then, to set aside your constitutional obligations?' General Butler: 'I mean to abide by the decision of Virginia, as expressed in her ordinance of secession, passed the day before yesterday. I am under no constitutional obligations to a foreign country, which Virginia now claims to be.' Major Carey: 'But you say, we can't secede, and so you cannot consistently detain the negroes.' General Butler: 'But you say, you have seceded, and so you cannot consistently claim them. I shall detain the negroes as contraband of war. You are using them upon your batteries. It is merely a question whether they shall be used for or against the government. Nevertheless, though I greatly need the labor which has providentially fallen into my hands, if Colonel Mallory will come into the fort, and take the oath of allegiance to the United States, he shall have his negroes, and I will endeavor to hire them from him.' Major Carey: 'Colonel Mallory is absent.' The interview here terminated, and each party, with polite farewell, went its way. This was on Friday, May 24. On Sunday morning, eight more negroes came in. . . . They continued to come in daily, in tens, twenties, thirties, till the number of contrabands in the various camps numbered more than 900. A commissioner of negro affairs was appointed, who taught, fed and governed them." General Butler reported his action to the Government, and on the 30th of May the Secretary of War wrote to him: "Your action in respect to the negroes who came within your lines, from the service of the rebels, is approved. . . . While . . . you will permit no interference, by persons under your command, with the relations of persons held to service under the laws of any state, you will, on the other hand, so long as any state within which your military operations are conducted remain under the control of . . . armed combinations, refrain from surrendering to alleged masters any persons who come within your lines." "So the matter rested for two months, at the expiration of which events revived the question."—J. Parton, *General Butler in New Orleans, ch.* 6.

A. D. 1861 (May: Virginia).—First Advance of Union Troops across the Potomac.—Death of Ellsworth at Alexandria.— "Already 'Confederate' pickets were occupying Arlington Hights and the Virginia shore of the Long Bridge, which spans the Potomac at Washington City; and engineers had been seen on those hights selecting eligible positions for batteries. A crisis was evidently at hand, and the General-in-chief was now persuaded to allow an immediate invasion of Virginia. Orders were at once issued [May 23] for the occupation of the shores of the Potomac opposite, and also the city of Alexandria, nine miles below, by National troops. General Mansfield was in command of about 13,000 men at the Capital. Toward midnight, these forces in and around Washington were put in motion for the passage of the river, at three different points. One column was to cross at the Aqueduct Bridge, at Georgetown; another at the Long Bridge, at Washington; and a third was to proceed in vessels, and seize the city of Alexandria. The three invading columns moved almost simultaneously. . . . The troops moving by land and water reached Alexandria at about the same time. The National frigate Pawnee was lying off the town, and her commander had already been in negotiation for the evacuation of Alexandria by the insurgents. A detachment of her crew, bearing a flag of truce, now hastened to the shore in boats, and leaped eagerly upon the wharf just before the zouaves [the New York Fire Zouave Regiment, under Colonel Ellsworth] reached it. They were fired upon by some Virginia sentries, who instantly fled from the town. Ellsworth, ignorant of any negotiations, advanced to the center of the city, and took possession of it in the name of his Government, while the column under Wilcox marched through different streets to the Station of the Orange and Alexandria Railway, and seized it, with much rolling stock. They there captured a small company (thirty-five men) of Virginia cavalry, under Captain Ball. Other Virginians, who had heard the firing of the insurgent pickets, escaped by way of the railroad. Alexandria was now in quiet possession of the National troops, but there were many violent secessionists there who would not submit. Among them was a man named Jackson, the proprietor of an inn called the Marshall House. The Confederate flag had been flying over his premises for many days, and had been plainly seen from the President's house in Washington. It was still there, and Ellsworth went in person to take it down. When descending an upper staircase with it, he was shot by Jackson, who was waiting for him in a dark passage, with a double-barreled gun, loaded with buckshot. Ellsworth fell dead, and his murderer met the same fate an instant afterward, at the hands of Francis E. Brownell, of Troy, who, with six others, had accompanied his commander to the roof of the house. He shot Jackson through the head with a bullet, and pierced his body several times with his saber-bayonet. . . . Ellsworth was a very young and extremely handsome man, and was greatly beloved for his generosity, and admired for his bravery and patriotism. His death produced great excitement throughout the country. It was the first of note that had occurred in consequence of the National troubles, and the very first since the campaign had actually begun, a few hours before. It

intensified the hatred of rebellion and its abettors; and a regiment was raised in his native State (New York) called the Ellsworth Avengers. Intrenching tools were sent over the Potomac early on the morning of the 24th, and the troops immediately commenced casting up intrenchments and redoubts, extending from Roach's Spring, on the Washington and Alexandria Road, across Arlington Hights, almost to the Chain Bridge." —B. J. Lossing, *Field Book of the Civil War, v.* 1, *ch.* 20.

A. D. 1861 (June: Virginia).—The fight at Big Bethel.—"Major-General Butler and staff arrived at Fortress Monroe Wednesday afternoon, May 22d. . . . Colonel Magruder — late Colonel in the U. S. service, and an officer of much distinction as an obstinate combatant — was placed in command (rebel) of the Peninsula. . . . Troops rapidly poured into Butler's department, and he soon found himself in a condition to act on the offensive. Magruder's scouts and cavalry greatly annoyed the two camps mentioned. They had, also, seized several Union men. These raids became so frequent and annoying that a night attack was concerted upon their positions at Little Bethel and Big Bethel — the latter, near the north branch of Back River, where it was understood Magruder's outposts were throwing up strong works. Brigadier-General Pierce, of the Massachusetts troops, was detailed to command the expedition. . . . Approaching the enemy's position at Big Bethel, it was found that their guns commanded all points of approach. The road leading up to the bridge over the creek was swept by their artillery. A thick woods to the left of the road afforded some protection to the Federal left. An open field on the right of the approach only offered a house and out-buildings as a cover. The enemy occupied a hill, beyond the creek, which almost completely secured their front. At their rear was a dense wood. This gave them the advantage of ground, greatly. A reconnoissance would have demonstrated the futility of a front attack except by artillery. The only hope for the Federals was in a flank movement, higher up the creek, by which, the stream being passed, the enemy could be assaulted in their works, at the point of the bayonet, if necessary. This movement was only attempted partially at a late hour in the day. The rebels were well prepared, and only awaited the appearance of the head of the Federal advance to open a sharp fire. . . . The fight was, from the first, extremely unequal. A front attack was sheer folly. But, the flank movement was not ordered. . . . The fortunes of the day needed but a master-hand to direct them, to have turned in favor of the Union troops. . . . Lieutenant-Colonel Washburne had . . . arranged for a flank movement which, with a combined attack from the front, must have ended the struggle; but the order for retreat was given before the movement could be executed. . . . The Federal loss was 14 killed, 49 wounded and five missing. Among the killed were two of the most gallant and noble men in the service — Major Theodore Winthrop, Secretary and Aid to General Butler, and first-Lieutenant John T. Greble, of the United States regular artillery, Second regiment. The rebels pronounced their loss to have been but one killed and four wounded. The retreat was accomplished in good order — the enemy not pursuing."—O. J. Victor, *Hist. of the Southern Rebellion, v.* 2, *div.* 4, *ch.* 18.

A. D. 1861 (June — July: West Virginia).— General McClellan's campaign in the mountains.—Rich Mountain and Carrick's Ford.— "Although some thousands of West Virginians had volunteered to fight for the Union, none of them were encamped on the soil of their State until after the election held [May 23] to ratify or reject the Ordinance of Secession [see Virginia: A. D. 1861 (January—June)] . . . The Virginians who volunteered were mustered in and organized at Camp Carlile, in Ohio, opposite Wheeling, under the command of Col. Kelly, himself a Virginian. George B. McClellan, who had been appointed a Major-General and assigned to the command of the Department of the Ohio, remained at Cincinnati, his home. Three days after the election aforesaid, he issued from that city a spirited address 'To the Union men of Western Virginia.' . . . A brief and stirring address to his soldiers was issued simultaneously with the above; and, both being read to those in Camp Carlile that evening, the 1st Virginia, 1,100 strong, Col. Kelly, crossed to Wheeling early next morning, closely followed by the 16th Ohio, Col. Irvine. The 14th Ohio, Col. Steedman, crossed simultaneously, and quietly occupied Parkersburg, the terminus of the Northwestern branch of the Baltimore and Ohio road. A Rebel force, then holding Grafton, which connected the branch aforesaid with the main or Wheeling division of the railroad, had meditated a descent on Wheeling; but, finding themselves anticipated and outnumbered, they obstructed and destroyed the railroad west of them," and fell back to Philippi, some fifteen miles southward. "General McClellan having ordered that Philippi be captured by surprise, the attempt was made on the night of June 2d. Two brigades of two regiments each approached the Rebel camp by different roads" and dispersed it completely, with some loss on both sides, capturing the tents, provisions and munitions. The Rebel commander, Colonel Porterfield, "gathering up such portion of his forces as he could find, retreated hastily to Beverly, and thence to Huttonsville; where the Rebel array was rapidly increased by conscription, and Gov. Wise placed in command. Gen. McClellan arrived at Grafton on the 23d. . . . His forces were rapidly augmented, till they amounted, by the 4th of July, to over 30,000 men; while the

Rebels in his front could hardly muster 10,000 in all. He therefore resolved to advance. The Rebel main force, several thousand strong, under Gen. Robert S. Garnett, was strongly intrenched on Laurel Hill, a few miles north of Beverly, . . . while a smaller detachment, under Col. John Pegram was intrenched upon the summit and at either base of Rich Mountain . . . three or four miles distant from the Rebel main body." General Rosecrans, sent by a detour of eight miles through the mountains to Pegram's rear, drove the rebels (July 11) from their position, at the point of the bayonet; and the following day their commander, with about 600 men, was forced to surrender. "Gen. McClellan pushed on to Beverly, which he entered early next morning, flanking Gen. Garnett's position at Laurel Hill and compelling him to a precipitate flight northward. Six cannon, 200 tents, 60 wagons and over 100 prisoners, were the trophies of this success. The Rebel loss in killed and wounded was about 150; the Union about 50. Gen. Garnett, completely flanked, thoroughly worsted, and fearfully outnumbered, abandoned his camp at Laurel Hill without a struggle, crossing the Laurel Mountains eastward, by a by-road, into the narrow valley of Cheat river. . . . At length, having crossed the Cheat at a point known as Carrick's Ford, which proffered an admirable position for defense, Garnett turned [July 14] to fight." But the Union force which pursued him was overpowering; Garnett himself was killed in the battle at the Ford and his command fled in confusion. Gen. McClellan telegraphed to Washington, next day, from Huttonsville: "We have completely annihilated the enemy in Western Virginia. Our loss is about 13 killed and not more than 40 wounded; while the enemy's loss is not far from 200 killed; and the number of prisoners we have taken will amount to at least 1,000. We have captured seven of the enemy's guns in all. A portion of Garnett's forces retreated; but I look for their capture by Gen. Hill, who is in hot pursuit." "This expectation was not realized. The pursuit was only continued two miles beyond the ford; when our weary soldiers halted, and the residue of the Rebels, under Col. Ramsey, turning sharply to the right, made their way across the mountains, and joined Gen. Jackson at Monterey." Meantime, simultaneously with General McClellan's advance on Beverly, another strong Union force, under General Cox, had moved from Guyandotte to the Kanawha, and up that river to Charleston, which it reached on the 25th of July. Governor Wise, who commanded the rebels in the Kanawha Valley, retreated, General Cox pursuing, until the pursuit was checked on the 29th by Wise's destruction of Gauley bridge. The rebels then made good their flight to Lewisburg, in Greenbrier county, where Wise was reinforced and superseded by General John B. Floyd. — H. Greeley, *The American Conflict, v.* 1, *ch.* 32.— "The war in Western Virginia seemed to have ended with the dispersion of Garnett's forces, and there was much rejoicing over the result. It was premature. The 'Confederates' were not disposed to surrender to their enemy the granaries that would be needed to supply the troops in Eastern Virginia, without a severer struggle. General Robert E. Lee succeeded Garnett, and more important men than Wise and Floyd took the places of these incompetents. Rosecrans succeeded McClellan, who was called to the command of the Army of the Potomac, and the war in the mountain region of Virginia was soon renewed."—B. J. Lossing, *Field Book of the Civil War, v.* 1, *ch.* 22.

A. D. 1861 (July: Virginia).—The seat of the rebel government transferred to Richmond. See VIRGINIA: A. D. 1861 (JULY).

A. D. 1861 (July: Virginia).—On to Richmond.—The First Battle of Bull Run, or Manassas.—"The Southern Government having inclined to the defensive policy as that upon which they should act, their first object was to prevent an advance of any Federal force into Virginia. Early in the month of May troops were assembled in Richmond, and pushed forward toward the northeastern boundary of the State, to a position known as Manassas Junction. . . . It is here that a railroad from Alexandria, another from Staunton up the valley and through Manassas Gap, and another from Gordonsville unite. At Gordonsville the railroad from Richmond and the line from East Tennessee unite. As a point for concentration none more eligible exists in northeastern Virginia. The advantages for fortification are naturally such that the place can be rendered impregnable. Here the centre of the northern force of the Southern army was posted, with the left wing pushed forward to Winchester [under the command of General Joseph E. Johnston, with the Union General Patterson opposed to him] and the right extended to the Potomac, and sustained by heavy batteries which served to blockade the river. The Federal force, the advance of which was assembled at Washington for the defence of that city against any attack by the Southern troops, was posted on the Virginia side of the Potomac, on Arlington Heights, which were strongly fortified. Their right was pushed some distance up the Potomac, and chiefly on the Maryland side, while their left occupied Alexandria. The armies of both sides consisted of raw militia hastily brought together, and of volunteers who for the first time had put on the uniform, and taken up the weapons of the soldier. On both sides the forces were constantly accumulating. On the morning of June 27th, the consolidated report of Gen. Mansfield, commanding the Department of Washington, gives the number of troops in that city and vicinity. The privates, including regulars and volunteers present for duty, numbered 22,846 men. The grand aggregate of the force, including officers, etc., present and absent, was 34,160 men. The force of Gen. Patterson, commanding in Maryland above Washington, and also on the Virginia side of the Potomac, on the 28th of June, was returned, embracing officers and men enlisted and present for duty, 15,923. Of these about 550 were reported as sick."—W. J. Tenney, *Military and Naval History of the Rebellion, p.* 67.—"The return of Johnston's [Confederate] army for June 30th showed his total force present for duty to have

been 10,654; but this includes some troops which, though assigned to his army, did not join him till after July 3d. . . . A prime object of Johnston in taking post at Winchester was, that he might be enabled to join the army at Manassas in case of need. On June 2d, only a week after Johnston's arrival at Harper's Ferry, Beauregard had reached Manassas and assumed command. He and Johnston at once communicated with each other, and agreed in their views of the importance of mutual support. . . . As soon as Johnston ascertained . . . that McClellan [from West Virginia] was not moving on Romney and Winchester, the feasibility of this movement to Manassas at the right time became greater. The only problem then remaining was to so time it as to arrive just long enough before the impending battle to take part in it, and not so long as to cause, by the news of his arrival, a corresponding transfer of Patterson. . . . It was for the purpose of gaining as much start as possible on Patterson that Johnston had retired to Winchester, instead of remaining opposite the Northern force at Martinsburg. He kept his cavalry well out, in order to be informed as promptly as possible of the slightest change in Patterson's position. Meanwhile the grand Federal advance upon Manassas had commenced."—R. M. Hughes, *General Johnston, pp.* 47–51.—The advance from Washington, which began on the 16th of July, and which resulted in the grievous defeat of the Union forces at Bull Run, or Manassas, on Sunday, the 21st, was undertaken to appease the impatient, ignorant clamor of Northern newspapers, and in opposition to the judgment and the plans of General Scott, who was then at the head of the National army. The cry "On to Richmond" was taken up by Congressmen and Senators, and the pressure on the government became too strong to be resisted. Instead of keeping the raw troops, hurriedly gathered at Washington, in camps of instruction, until they were properly drilled and until their officers had acquired some experience in handling them, they were hurriedly pushed into a serious campaign movement, against an enemy likewise untrained, to be sure, but who was far better prepared to receive an attack than the assailants were to make one. General Irwin McDowell had been recently placed in command of the army intended for the field, with General Mansfield commanding the troops in Washington. The former had "entered on his new and responsible duties with great alacrity, working night and day to prepare his command for the approaching conflict. . . . McDowell was laboring at a great disadvantage — drilling and preparing his troops as best he could — under the heavy pressure from the North to deliver battle to the enemy in his front. Secretary Chase was the champion, in the Cabinet, of the intense feeling in the North that the war should be pushed at once, with a vigor that would end it soon. . . . There is no doubt that General Scott was weakened with the administration, for the reason that he did not believe in the prevailing opinion that a few days would crush the rebellion; and the more the old hero insisted, or faithfully stood by his views, the more it antagonized the opinion of those who hoped and said it would end speedily. At the Cabinet meeting a week before, General Hamilton says: 'General Montgomery Blair said he would march to Richmond with 10,000 men, armed with lathes.' 'Yes,' said General Scott, 'as prisoners of war.' Continuing General Hamilton's statement of the events which occurred prior to the battle and during its progress, he says: 'On the Sunday preceding the battle of Bull Run, Scott directed me, his military secretary, to say to McDowell that he wished him to dine with him without fail At the dinner, at which General McDowell appeared, General Scott used every possible argument to dissuade General McDowell from fighting the first battle of Bull Run under the then existing condition of public affairs. . . . He then begged General McDowell to go to Secretary Chase, his kinsman, and aid him (General Scott) in preventing a forward movement at that moment; one of the arguments used by General Scott being that the Union sentiment of the South had been surprised by the suddenness and promptitude of the movement in favor of secession; that he (General Scott) was well advised that the Union sentiment was recovering itself, and gaining head in the South; that from the moment blood was shed the South would be made a unit. General McDowell regretted that he could not agree with General Scott in his views, and arose and retired. . . . In the course of the succeeding week General McDowell reported to General Scott his proposed plan of battle. It was hung upon the wall, and I followed with a pointer the positions indicated by General McDowell as those he intended the forces under his command should occupy. After General McDowell had gone through a detailed statement of his plan, and had finished, General Scott remarked, "General McDowell, that is as good a plan of battle as I ever saw upon paper." General McDowell said in reply: "General Scott, the success of this whole plan depends upon General Patterson holding General Johnston in check at Winchester." General Scott remarked that General Johnston was a very able soldier, that he had a railroad at his command with which to move his troops, and if General McDowell's plan of battle, which had just been presented to him, depended upon General Patterson holding General Johnston in check, his plan was not worth the paper it was drawn upon.' That ended that interview."—J. H. Stine, *Hist. of the Army of the Potomac, pp.* 7–10.—Says General McDowell, in his subsequent report of the movement and the disastrous battle: "When I submitted to the General-in-Chief, in compliance with his verbal instructions, the plan of operations and estimate of force required, the time I was to proceed to carry it into effect was fixed for the 8th of July (Monday). Every facility possible was given me by the General-in-Chief and heads of the administrative departments in making the necessary preparations. But the regiments, owing, I was told, to want of transportation, came over slowly. Many of them did not come across until eight or nine days after the time fixed upon, and went forward without my ever seeing them and without having been together before in a brigade. The sending re-enforcements to General Patterson by drawing off the wagons was a further and unavoidable cause of delay. Notwithstanding the herculean efforts of the Quartermaster-General, and his favoring me in every possible way, the wagons for ammunition, subsistence, &c., and the horses for the trains and for the artillery, did not all arrive for more than

a week after the time appointed to move. I was not even prepared as late as the 15th ultimo, and the desire I should move became great, and it was wished I should not, if possible, delay longer than Tuesday, the 16th ultimo. When I did set out on the 16th I was still deficient in wagons for subsistence, but I went forward, trusting to their being procured in time to follow me. The trains thus hurriedly gotten together, with horses, wagons, drivers, and wagon-masters all new and unused to each other, moved with difficulty and disorder, and was the cause of a day's delay in getting the provisions forward, making it necessary to make on Sunday the attack we should have made on Saturday. I could not, with every exertion, get forward with the troops earlier than we did. I wished them to go to Centreville the second day, which would have taken us there on the 17th, and enabled us, so far as they were concerned, to go into action on the 19th instead of the 21st; but when I went forward from Fairfax Court-House beyond Germantown to urge them forward, I was told it was impossible for the men to march farther. They had only come from Vienna, about 6 miles, and it was not more than 6½ miles farther to Centreville, in all a march of 12½ miles; but the men were foot-weary, not so much, I was told, by the distance marched, as by the time they had been on foot, caused by the obstructions in the road and the slow pace we had to move to avoid ambuscades. The men were, moreover, unaccustomed to marching, their bodies not in condition for that kind of work, and not used to carrying even the load of 'light marching order.'"—Brig. Gen. I. McDowell, *Report* (*Official Records, series* 1, *v.* 2, *pp.* 323–324).—The advance of the Union Army was made "in five divisions, commanded by Generals Tyler, Hunter, Heintzelman, Runyon, and Miles. Among the brigade commanders that afterward rose to eminence were William T. Sherman, Ambrose E. Burnside, Erastus D. Keyes, and Oliver O. Howard. The total force was somewhat over 34,000 men; but Runyon's division was left to guard the line of communication with Washington, and the number that actually moved against the enemy was about 28,000 with 49 guns and a battalion of cavalry. So little did strict military discipline as yet enter into the policy of the Government that a large number of civilians, including several members of Congress, obtained passes enabling them to ride out in carriages, close in the rear of the army, to witness the expected battle. . . . The troops marched by the Warrenton turnpike, and found themselves in the presence of the enemy on the banks of Bull Run on the 18th. . . . The enemy's outposts had fallen back as the army advanced, and the first serious opposition was met at Blackburn's Ford," where some sharp fighting occurred between Tyler's division and the Confederate troops under Longstreet. "McDowell, finding that Beauregard was very strongly intrenched on his right, and that the roads in that direction were not good, changed his plan and determined to attack on the north or left wing. Another reason for doing this lay in the fact that McDowell had distrusted Patterson from the first, having no faith that he would hold Johnston. . . . The action at Blackburn's Ford had been fought on Thursday. Friday and Saturday were consumed in reconnoissances and searching for a suitable ford on the upper part of the stream, where a column could cross and, marching down on the right bank, uncover the fords held by the enemy and enable the remainder of the army to cross. Such a ford was found at length, and on Sunday morning, the 21st, the army was put in motion. McDowell did not know that Johnston had easily eluded Patterson and with two fifths of his forces joined Beauregard on Saturday. . . . The Confederate commanders had actually ordered a forward movement of their own right wing; but as they saw the development of McDowell's plan they recalled that, and gradually strengthened their left to meet the onset. . . . The battle-ground was a plateau, wooded and broken."—R. Johnson, *Short Hist. of the War of Rebellion, ch.* 4.—In the Report of the Confederate General Beauregard, the plateau which now became the principal battle ground of the conflict is described as follows: "It is inclosed on three sides by small water-courses, which empty into Bull Run within a few yards of each other a half a mile to the south of the stone bridge. Rising to an elevation of quite 100 feet above the level of Bull Run at the bridge, it falls off on three sides to the level of the enclosing streams in gentle slopes, but which are furrowed by ravines of irregular direction and length, and studded with clumps and patches of young pines and oaks. The general direction of the crest of the plateau is oblique to the course of Bull Run in that quarter and to the Brentsville and turnpike roads, which intersect each other at right angles. Immediately surrounding the two houses . . . [mentioned below] are small open fields of irregular outline, not exceeding 150 acres in extent. The houses, occupied at the time, the one by the Widow Henry and the other by the free negro Robinson, are small wooden buildings, the latter densely embowered in trees and environed by a double row of fences on two sides. Around the eastern and southern brow of the plateau an almost unbroken fringe of second-growth pines gave excellent shelter for our marksmen, who availed themselves of it with the most satisfactory skill. To the west, adjoining the fields, a broad belt of oaks extends directly across the crest on both sides of the Sudley road, in which during the battle regiments of both armies met and contended for the mastery. From the open ground of this plateau the view embraces a wide expanse of woods and gently undulating open country of broad grass and grain fields in all directions."—Gen. G. T. Beauregard, *Report* (*Official Records, series* 1, *v.* 2, *pp.* 493–494).—At an early hour in the afternoon, the Union forces had driven the enemy from this plateau and seemed to be in a position which promised victory to them. Says General McDowell in his official report: "The enemy was evidently disheartened and broken. But we had then been fighting since 10.30 o'clock in the morning, and it was after 3 o'clock in the afternoon. The men had been up since 2 o'clock in the morning, and had made what to those unused to such things seemed a long march before coming into action, though the longest distance gone over was not more that 9½ miles; and though they had three days' provisions served out to them the day before, many, no doubt, either did not get them, or threw them away on the march or during the battle, and were therefore without food. They had done much severe fighting. Some of the

regiments which had been driven from the hill in the first two attempts of the enemy to keep possession of it had become shaken, were unsteady, and had many men out of the ranks. It was at this time that the enemy's re-enforcements came to his aid from the railroad train (understood to have just arrrived from the valley with the residue of Johnston's army). They threw themselves in the woods on our right, and opened a fire of musketry on our men, which caused them to break and retire down the hillside. This soon degenerated into disorder, for which there was no remedy. Every effort was made to rally them, even beyond the reach of the enemy's fire, but in vain. The battalion of regular infantry alone moved up the hill opposite to the one with the house, and there maintained itself until our men could get down to and across the Warrenton turnpike on the way back to the position we occupied in the morning. The plain was covered with the retreating groups, and they seemed to infect those with whom they came in contact. The retreat soon became a rout, and this soon degenerated still further into a panic. Finding this state of affairs was beyond the efforts of all those who had assisted so faithfully during the long and hard day's work in gaining almost the object of our wishes, and that nothing remained on that field but to recognize what we could no longer prevent, I gave the necessary orders to protect their withdrawal, begging the men to form a line, and offer the appearance, at least, of organization and force. They returned by the fords to the Warrenton road, protected, by my order, by Colonel Porter's force of regulars. Once on the road, and the different corps coming together in small parties, many without officers, they became intermingled, and all organization was lost."—Brig. Gen. I. McDowell, *Report* (*Official Records, series* 1, *v.* 2, *p.* 320).—"The battle of Bull Run was a misfortune, and not a disgrace, to the Federal arms; but the reports of losses on both sides prove that it was bravely disputed. . . . The rout—or, in other words, the panic— . . . was one of those accidents to which even victorious armies are sometimes liable, and against which old troops are not always able to guard. The importance of the battle of Bull Run cannot be measured by the amount of losses sustained by the two contending parties. . . . Its immediate effect upon military operations was to produce a sudden change in the attitude of the belligerents. The possession of Virginia, with the exception of that portion which had been recaptured by McClellan, was secured to the Confederates. Richmond was beyond danger of any attack, and Washington was threatened anew. . . . But it was chiefly through its moral effect that this first encounter was to exercise a powerful influence upon the war of which it was only the prelude. The South saw in this victory a kind of ratification of her claims. It was not only the Federal soldiers who were vanquished on that day, but with them all who had remained more or less openly loyal to the Union in the Southern States. . . . This disaster, which might have discouraged the North, proved, on the contrary, a salutary lesson."—Comte de Paris, *Hist. of the Civil War in Am.*, *v.* 1, *bk.* 3, *ch.* 2.—"Those only can realize the condition of our Army, at that time, who can recall the incidents of this memorable campaign and the battle with which it closed. The crowds of curious and impertinent spectators who accompanied and often rode through our ranks; the long and fatal delay of Hunter's column, on the morning of the battle—a delay occasioned by a few baggage-waggons, which should have been miles in rear—the many ludicrous, yet sad, scenes on the field; the heroic, but fruitless, gallantry of separate regiments, each attempting, in detail, the accomplishment of a work which required the combined effort of all; the dread, on the part of our men, of those terrible 'masked batteries' and 'the fierce Black-horse Cavalry,' neither of which ever had an existence except in the imaginative brains of our newspaper reporters, all help to fill up the picture. . . . I believe the plan of this battle to have been well-conceived, notwithstanding its disastrous result. We were compelled to take the offensive against troops in position, and upon a field, the topography of which was unknown to nearly all our officers. Notwithstanding these facts, successes would have been achieved but for the impatient spirit which hurried us on, without the slightest preparation. Of the march, the battle, the rout, and the disorderly retreat to Washington, the description given by William H. Russell was not greatly exaggerated. It was far more truthful than many of the descriptions given by the reporters of our own papers. Who has forgotten the newspaper accounts of the conduct of the celebrated Fire Zouaves—of the prodigies of valor performed by them—of their bayonet charges—of their heroic assaults—of the fearful destruction inflicted by them upon the enemy—and, finally, when the order to retreat came, of the great difficulty experienced by the officers in forcing 'these gallant, but bloodthirsty lambs,' as they were called, to cease fighting and commence retreating? We all remember these accounts, and many others of a similar character; and yet, every intelligent officer who was on the field knows that this regiment dispersed at the first fire, and so thoroughly was it dispersed that it was from that day never again known as a military organization. This campaign, and every subsequent one, of the War, taught us that the rough element of our cities—the prize-fighter, the veteran of a score of street-fights—does not necessarily make the most valuable soldier. On the contrary, many a pale-faced boy, who, from a sense of duty, has left school or counting-room to join our Army, has exhibited a degree of endurance on the march and of bravery on the field, seldom equalled by the rough element of our cities."—Gen. H. W. Slocum, *Military Lessons taught by the War* (*Historical Mag., Feb.* 1871).—"The failure of the Confederate army to pursue after the battle of Manassas has been much criticised, and has caused much acrimonious discussion. General Johnston, however, never hesitated to assume his share of the responsibility for the action taken, though insisting that the course pursued was proper, and the only practicable one under the circumstances. . . . The troops who had been actually engaged all day, in the hot summer season, were in no condition to follow up the enemy. But the great obstacle to any effective pursuit was the weakness of the cavalry arm in the Southern army. Its entire strength was considerably under 2,000 men, and a large proportion of these were not in call. Many of those

within reach had been fighting for hours, and were in little better condition than the infantry. All who were available were sent off in immediate pursuit, with the result of greatly swelling the number of prisoners and captured guns. But by the time the captors turned their prizes over to proper guards, the Northern army had covered a sufficient distance to be out of danger, being protected in their retreat by large bodies of troops that had not been engaged. This was all that could be accomplished. . . . The fact that the condition of the Confederate troops put any active pursuit out of the question is established by the official reports. General Johnston's report says: 'Our victory was as complete as one gained by infantry and artillery can be.'. . . The same reasons apply with equal force to any attempted advance during the few days succeeding the battle. The army was not in a condition to make the movement, being itself much demoralized by the engagement. Many thought the war over and went home; many accompanied wounded comrades to their homes; for the ties of discipline were not as strong then as in a veteran army. But a yet stronger obstacle to an advance was the lack of necessary transportation. . . . Even if the Confederates had advanced and captured the intrenchments opposite Washington, they could have accomplished nothing. They could not have crossed the river on the bridge under the fire of the Federal vessels of war. They had no artillery of sufficient range to bombard Washington from the southern side, even if they had been disposed to wage war in that manner. They had no sufficient supply of ammunition."—R. M. Hughes, *General Johnston, ch.* 6.

A. D. 1861 (July).—Enlistment of volunteers authorized by Congress.—The enlistment of 500,000 volunteers was authorized by Acts of Congress passed July 22 and 25.

A. D. 1861 (July—September: Missouri).—Sigel's well-conducted retreat from Carthage. —Death of Lyon at Wilson's Creek.—Siege of Lexington.—Fremont in command.—The flight of Governor Jackson and his followers from Booneville—see MISSOURI: A. D. 1861 (FEBRUARY–JULY)—was westward, to Warsaw, on the Osage, first, and thence into Vernon County, where they were joined, July 3, by General Sterling Price. "Their united force is stated by Pollard, at 3,600. Being pursued by Lyon, they continued their retreat next day, halting at 9 P. M., in Jasper County, 23 miles distant. Ten miles hence, at 10 A. M. next morning, they were confronted by a Union force 1,500 strong, under Col. Franz Sigel, who had been dispatched from St. Louis by the Southwestern Pacific road, to Rolla, had marched thence to Springfield, and had pushed on to Mount Vernon, Lawrence County, hoping to prevent a junction between Jackson and some forces which his Brigadiers were hurrying to his support. Each army appears to have started that morning with intent to find and fight the other; and such mutual intentions are seldom frustrated. Sigel found the Rebels, halted after their morning march, well posted, vastly superior in numbers and in cavalry, but inferior in artillery, which he accordingly resolved should play a principal part in the battle. In the cannonade which ensued, he inflicted great damage on the Rebels and received very little, until, after a desultory combat of three or four hours, the enemy resolved to profit by their vast superiority in cavalry by outflanking him, both right and left. This compelled Sigel to fall back. . . . The retreat was made in perfect order . . . to Carthage, and through that town to Sarcoxie, some fifteen miles eastward. It was well, indeed, that he did so; for Jackson's force was augmented, during that night and next morning, by the arrival of Price from the southward, bringing to his aid several thousand Arkansas and Texas troops, under Gens. Ben McCulloch and Pearce. Our loss in the affair of Carthage was 13 killed and 31 wounded—not one of them abandoned to the enemy; while the Rebels reported their loss at 40 to 50 killed and 125 to 150 wounded. Sigel, now outnumbered three or four to one, was constrained to continue his retreat, by Mount Vernon, to Springfield; where Gen. Lyon, who had been delayed by lack of transportation, joined and outranked him on the 10th." —H. Greeley, *The American Conflict, v.* 1, *ch.* 35. —"The month of August came, and found General Lyon at Springfield, hoping to receive reenforcements; but the battle of Bull Run had occurred, and rendered it impossible to send him aid. Major General Fremont had been appointed [July 9] to the command of the Western Department, and had reached St. Louis (July 25). Meantime Confederate troops were pouring over the southern frontier of Missouri, and Lyon, finding that they were advancing upon him in two columns, determined to strike before he should be overwhelmed by the combined Louisiana, Missouri, Arkansas, and Texas troops. His force did not exceed 5,500, his antagonist had more than 12,000. A skirmish occurred at Dug Spring (August 1st), in which he had the advantage; but he could not prevent the junction of the two columns. Hereupon he fell back to Springfield. His position had now become one of great difficulty. Political as well as military considerations rendered it almost impossible for him to retreat farther. He therefore determined to resume the offensive, and compensate for his weakness by audacity. Moving out of Springfield on a very dark night (August 9–10), and having ordered Sigel, with 1,200 men and six guns, to gain the enemy's rear by their right, he was ready, as soon as day broke, to make an attack on their front [on Wilson's Creek]. But the disparity of force was too great. Sigel was overwhelmed. He lost five out of his six guns, and more than half his men. The attack in front was conducted by Lyon in person with very great energy. His horse was shot under him; he was twice wounded, the second time in the head. In a final charge he called to the Second Kansas Regiment, whose colonel was at that moment severely wounded, 'Come on, I will lead you,' and in so doing was shot through the heart. After the death of Lyon the battle was still continued, their artillery preserving the national troops from total defeat. News then coming of Sigel's disaster, a retreat to Springfield, distant about nine miles, was resolved on. It was

executed without difficulty. In this battle of Wilson's Creek there were 223 killed, 721 wounded, 292 missing, on the national side; and, as may be inferred from the determined character of the assault, the loss of the Confederates was very great. They had been so severely handled that they made no attempt at pursuit, and the retreat was continued by the national troops, who, on the 19th, had fallen back to Rolla. After this action, the Confederate commanders, McCulloch and Price, quarreling with each other, and unable to agree upon a plan for their campaign, the former returned to Arkansas, the latter advanced from Springfield toward Lexington. Here he found a national force of about three thousand (2,780) under Colonel Mulligan. Attempts were made by General Fremont to re-enforce Mulligan, but they did not succeed. Meantime the assailing forces were steadily increasing in number, until they eventually reached 28,000, with 13 pieces of artillery. They surrounded the position and cut off the beleaguered troops from water. They made repeated assaults without success until [September] 20th, when they contrived a movable breastwork of hempbales, which they rolled before them as they advanced, and compelled Mulligan, who had been twice wounded, to surrender unconditionally. On receiving news of this disaster, Fremont at once left St. Louis with the intention of attacking Price, but that general instantly retreated, making his way back to the southwest corner of the state, where he rejoined McCulloch and his Confederate troops."—J. W. Draper, *Hist. of the Am. Civil War, ch.* 47 (*v.* 2).

A. D. 1861 (July—November).—McClellan's rise to the chief command.—Creation of the Army of the Potomac.—Reorganization of the western armies.—"Immediately after the battle of Bull Run, Major General McClellan was assigned to the command of the Military Department of Washington and Northeastern Virginia. Lieutenant General Scott retained his command as general in chief of the American army, until the end of October. 'I found,' says General McClellan in his report, 'no army to command —a mere collection of regiments cowering on the banks of the Potomac, some perfectly raw, others dispirited by the recent defeat. Nothing of any consequence had been done to secure the southern approaches to the capital by means of defensive works; nothing whatever had been undertaken to defend the avenues to the city on the northern side of the Potomac. The number of troops in and around the city was about 50,000 infantry, less than 1,000 cavalry, 650 artillerymen, with nine imperfect field batteries of 30 pieces.' . . . General McClellan at once commenced the organization of the great army authorized by Congress. His views of the military position and appropriate military conduct were, for the most part, accepted, and such was the patriotism of the people, the resolution of Congress, the energy of the executive, that the Army of the Potomac had reached, on October 27th, a strength of . . . 168,318. It was the general's opinion that the advance upon the enemy at Manassas should not be postponed beyond the 25th of November. It was his desire that all the other armies should be stripped of their superfluous strength, and, as far as possible, every thing concentrated in the force under his command. On the 31st of October, General Scott, having found his bodily infirmities increasing, addressed a letter to the Secretary of War requesting to be placed on the retired list. . . . His desire was granted. An order was simultaneously issued appointing General McClellan commander-in-chief under the President. This change in his position at once produced a change in General McClellan's views. Hitherto he had undervalued the importance of what was to be done in the West. He had desired the Western armies to act on the defensive. Now he wished to institute an advance on East Tennessee, and capture Nashville contemporaneously with Richmond. . . . In preparation for this, the Department of the West was reorganized. On the day following that of McClellan's promotion, Fremont was removed from his command. His department was subdivided into three: (1.) New Mexico, which was assigned to Colonel Canby; (2.) Kansas, to General Hunter; (3.) Missouri, to General Halleck. To General Buell was assigned the Department of the Ohio, and to General Rosecrans that of West Virginia. The end of November approached, and still the Army of the Potomac had not moved. The weather was magnificent, the roads excellent. . . . Winter at last came, and nothing had been done. . . . Considering the military condition of the nation when General McClellan undertook the formation and organization of the great Army of the Potomac, the time consumed in bringing that force into a satisfactory condition was far from being too long. . . . From the resources furnished without stint by Congress McClellan created that army. Events showed that his mental constitution was such that he could not use it on the battlefield. . . . There probably never was an army in the world so lavishly supplied as that of the Potomac before the Peninsular expedition. General McDowell, who knew the state of things well, declared, in his testimony before the Congressional Committee on the Conduct of the War, 'There never was an army in the world supplied as well as ours. I believe a French army of half the size could be supplied with what we waste.'"—J. W. Draper, *Hist. of the Am. Civil War, ch.* 44 *and* 49 (*v.* 2).—"Some persons, who ought to have known better, have supposed that in organizing the Army of the Potomac I set too high a model before me and consumed unnecessary time in striving to form an army of regulars. This was an unjustifiable error on their part. I should, of course, have been glad to bring that army to the condition of regulars, but no one knew better than myself that, with the means at my command, that would have been impossible within any reasonable or permissible time. What I strove for and accomplished was to bring about such a condition of discipline and instruction that the army could be handled on the march and on the field of battle, and that orders could be reasonably well carried out. . . . In spite of all the clamor to the contrary, the time spent in the camps of instruction in front of Washington was well bestowed, and produced the most important and valuable results. Not a day of it was wasted. The fortifications then erected, both directly and

indirectly, saved the capital more than once in the course of the war, and enabled the army to manœuvre freely and independently. . . . No other army we possessed could have met and defeated the Confederate Army of Northern Virginia. And, with all the courage, energy, and intelligence of the Army of the Potomac, it probably would not have been equal to that most difficult task without the advantage it enjoyed during its sojourn in the camps around Washington."—G. B. McClellan, *McClellan's Own Story, ch.* 6.

A. D. 1861 (August).— Act of Congress freeing Slaves employed in the service of the Rebellion.—In August, Congress passed an "Act to confiscate property used for insurrectionary purposes." As originally framed, it only confiscated "any property used or employed in aiding, abetting or promoting insurrection, or resistance to the laws," which would not include slaves. A new section was added, declaring that "whenever hereafter during the present insurrection against the Government of the United States, any person held to labor or service under the law of any State shall be required or permitted by the person to whom such labor or service is due to take up arms against the United States, or to work in or upon any fort, dock, navy-yard, armory, intrenchment or in any military or naval service whatever against the Government of the United States, the person to whom such service or labor is due shall forfeit his claim thereto." The law further provided that, "whenever any person shall seek to enforce his claim to a slave, it shall be a sufficient answer to such claim, that the slave had been employed in the military or naval service against the United States contrary to the provisions of this Act."—J. G. Blaine, *Twenty Years of Congress, v.* 1, *p.* 342.

A. D. 1861 (August: North Carolina).—The Hatteras expedition.—"General Wool relieved General Butler Aug. 16th, 1861, of the command at Fortress Monroe. Butler was detailed to active duty. The War and Navy Departments having arranged the first of a series of expeditions against the Southern coast, the command of the land forces was conferred upon Butler—Commodore S. H. Stringham directing the naval arm. Materials for the adventure were rapidly gathered at Fortress Monroe from the date of August 16th to the 26th, on which day the fleet took its departure. . . . Not until the vessels were at sea were any but the directors of the enterprize aware of the point of attack. Forts Hatteras and Clark commanded the entrance to the Sounds of Pamlico and Albemarle, whose waters were a great rendezvous for traders running the blockade. . . . Fort Hatteras was an exceedingly formidable battery. It was nearly surrounded by water, and was only approached by a circuitous and narrow neck of land. . . . The secresy and rapidity of preparation by the Federals caught the rebels somewhat unprepared for the attack. . . . The bombardment opened Wednesday morning, at ten o'clock, preparatory to the landing of the land forces on the beach above Fort Hatteras. . . . A heavy surf rolled in upon the treacherous sands. After infinite labor, and the beaching of three small boats, the landing was suspended for the day. Those already on shore—315 in number—were safe under the guns of the fleet. . . . The bombardment continued during the entire first day. No land assault was attempted. Fort Hatteras replied with great vigor, but with little avail. . . . On the morning of the 29th, the cannonade opened early. A cloudless sky and a clear sea blessed the cause of the assailants. During the night a transport heavily laden with troops reenforced the fort, running down the Sound which was yet open. Fort Clark was occupied by the Federal forces, and refused its aid to assist its late confederate. The conflict soon raged with extreme vigor on both sides. At eleven o'clock the Confederate flag fluttered uneasily a moment—then ran down the halyards and a white flag was slowly run to the peak. . . . Articles of capitulation were signed on board the flag-ship Minnesota. Butler then landed and took formal possession of the largest fortification. The number of prisoners surrendered was 615, who were all placed on the Minnesota. In four days time they were in New York harbor. . . . The first design, it would appear, was to destroy the forts, stop up the channel with old hulks, and to return, temporarily at least, to Fortress Monroe with the entire force; but the place proved to be so strong that Butler left Weber and Hawkins' commands in possession."—O. J. Victor, *Hist. of the Southern Rebellion, v.* 2, *div.* 5, *ch.* 11.

A. D. 1861 (August—October: Missouri).—Fremont's premature proclamation of freedom to slaves of rebels and Lincoln's modification of it.—The change of command.—"On the 31st of August, General Fremont [commanding in the West] issued a proclamation declaring martial law, defining the lines of the army of occupation, and threatening with death by the bullet all who should be found within those lines with arms in their hands. Furthermore, the real and personal property of all persons in the state [Missouri] who should take up arms against the United States was declared confiscated to the public use, and their slaves, if they had any, were declared free men. This proclamation produced a strong effect upon the public mind. The proclaiming of freedom to the slaves of rebels struck the popular chord, particularly among thoroughly loyal men in the free states. Of course, it maddened all the sympathizers with the rebellion, infuriated the rebels themselves, and perplexed those loyal men who had upon their hands the task of so conducting affairs as to hold to their allegiance the border slave states which had not seceded. Mr. Lincoln did not approve some features of General Fremont's proclamation. As soon as he read it, he wrote, under date of September 2d, to the General, that there were two points in it which gave him anxiety. The first was, that, if he should shoot a man according to his proclamation, 'the confederates would certainly shoot our best men in their hands in retaliation, and so,

man for man, indefinitely.' He therefore ordered him to allow no man to be shot under the proclamation without first having his (the President's) approbation or consent. The second cause of anxiety was that the paragraph relating to the confiscation of property and the liberation of slaves of traitorous owners would alarm Unionists at the South, and perhaps ruin the fair prospect of saving Kentucky to the Union. He, therefore, wished General Fremont, as of his own motion, so to modify his proclamation as to make it conformable to the confiscation act just passed by the extra session of Congress, which only freed such slaves as were engaged in the rebel service. . . . General Fremont received the President's letter respectfully, and replied to it September 8th, stating the difficulties under which he labored, with communication with the government so difficult, and the development of perplexing events so rapid in the department under his command. As to the part of his proclamation concerning the slaves, he wished the President openly to order the change desired, as, if he should do it of his own motion, it would imply that he thought himself wrong, and that he had acted without the reflection which the gravity of the point demanded. This the President did, in a dispatch under date of September 11th, in the words: 'It is therefore ordered that the said clause of said proclamation be so modified, held, and constructed, as to conform to, and not to transcend, the provisions on the same subject contained in the act of Congress entitled, An act to confiscate property used for insurrectionary purposes, approved August 6, 1861; and that such act be published at length with this order.' Before this order had been received, or on the day following its date, General Fremont, though acquainted with the President's wishes, manumitted two slaves of Thomas L. Snead of St. Louis, in accordance with the terms of his proclamation. Although Mr. Lincoln desired General Fremont so to modify his proclamation as to make it accordant with the act of Congress approved August 6th, it is hardly to be supposed that he did it solely out of respect to that act. . . . If he had believed that the time had come for the measure of liberating the slaves of rebels by proclamation, the act of Congress would not have stood in his way. This act was an embodiment of his policy at that time, and he used it for his immediate purpose. . . . Complications in the personal relations of General Fremont and Colonel F. P. Blair, under whose personal and family influence General Fremont had received his position, occurred at an early day. Colonel Blair doubtless thought that he had not sufficient weight in the General's counsels, and the General, doubtless, exercised his right in choosing his own counselors. . . . It was a very unhappy quarrel, and it is quite likely that there was blame upon both sides, though it occurred between men equally devoted to the sacred cause of saving the country to freedom and justice. . . . Mr. Lincoln always gave to each the credit due to his motives, and so far refused to mingle in the general quarrel that grew out of the difficulty, that he kept the good-will of both sides, and compelled them to settle their own differences. . . . General Fremont at length took the field in person. On the 8th of October he left Jefferson City for Sedalia. As he advanced with his forces, Price retreated, until it was widely reported that he would give battle to the national forces at Springfield. Just as Fremont was making ready to engage the enemy, he was overtaken by an order relieving him of his command. He was succeeded by General Hunter; but Hunter's command was brief, and was transferred at an early day to General Halleck. General Fremont was relieved of his command by the President not because of his proclamation, not because he hated slavery, and not because he believed him corrupt or vindictive or disloyal. He relieved him simply because he believed that the interests of the country, all things considered, would be subserved by relieving him and putting another man in his place. The matter was the cause of great excitement in Missouri, and of much complaint among the radical anti-slavery men of the country: but the imputations sought to be cast upon the President were not fastened to him; and did not, four years later, when Fremont himself became a candidate for the presidency, prevent the warmest anti-slavery men from giving Mr. Lincoln their support. The federal army under General Hunter retreated without a battle; and thus the campaign, inaugurated with great show and immense expense, was a flat failure."—J. G. Holland, *Life of Abraham Lincoln, ch.* 20.

A. D. 1861 (August—December: West Virginia).—Rosecrans against Lee.—Battles of Carnifex Ferry and Cheat Summit.—"When General McClellan was called [July 22] to take General McDowell's place at the head of the Army of the Potomac, Brigadier-General William S. Rosecrans was left in command of the troops in West Virginia. General Robert E. Lee, the Confederate commander, who had gathered together the forces which had been defeated under Garnett and Pegram, and some others, found himself in August at the head of about 16,000 men. Lee made his headquarters at Huntersville, while General John B. Floyd . . . took up a position on the Gauley River for the purpose of cutting off General Cox of Ohio, who, with a brigade of Rosecrans's army, had just driven a Confederate force under ex-Governor Henry A. Wise of Virginia out of the Kanawha Valley. Floyd surprised and routed the Seventh Ohio under Colonel Tyler, and then moved to a place on the Gauley River called Carnifex Ferry, hoping to cut off Cox from Rosecrans. But early in September Rosecrans, leaving part of his army under General Joseph J. Reynolds to watch Lee, marched southward with about 10,000 men and [September 10] attacked Floyd, who had strongly fortified himself with about 2,000 men on the banks of the river. After a severe fight of three or four hours, in which the Union troops lost heavily, Rosecrans, finding the position much stronger than he expected, gave orders at twilight to stop the assault until morning; but when morning came no enemy was to be seen; Floyd, finding his enemy much superior in numbers, had crossed the river in the night over a bridge hastily built of logs, and retreated to the mountains 30 miles away. Rosecrans followed, but finally fell back again to

the Gauley. When Rosecrans marched against Floyd, Reynolds took up a strong position on Cheat Mountain."—J. D. Champlin, *Young Folks' Hist. of the War for the Union, ch.* 10. —"General Lee proposed first to win a victory, if possible, over Reynolds. He was combative, anxious to strike, but many difficulties confronted him. He fully realized he had been sent to West Virginia to retrieve Confederate disasters, and that he had a most difficult task to perform. The Federal commander [his main force at Elk Water] held the center summit of Cheat Mountain pass, the mountain having three well-defined summits. . . . It was necessary first to carry this well-selected position of the Federal troops. A citizen surveyor, in sympathy with the South and familiar with the mountain paths, had made a trip to an elevated point where he could clearly see the Federal position, and reported his observations to General Lee. Afterward he made a second reconnoissance, accompanied by Colonel Albert Rust, of the Third Arkansas Regiment, who was anxious to see the nature of the ground and the strength of the position for himself. They reported to General Lee that in their opinion the enemy's position could be assailed with success with troops which could be guided to the point they had reached. General Lee decided to make the attack, and gave to Rust a column of 1,200 infantry. . . . The movement was to begin at night, which happened to be a very rainy one. All the troops, however, got in the positions assigned to them without the knowledge of the enemy, where they waited, every moment expecting to hear the rattle of Rust's muskets, who had been charged with the capture of the pass on Cheat Mountain; but hour after hour passed, and no sounds were heard. After a delay of many hours, and the enemy had divined the nature of the attack, the troops were ordered back to their former position. There had been only a small conflict between cavalry, in which Colonel John A. Washington, General Lee's aid-de-camp, who had been sent with Major W. H. F. Lee to reconnoiter the enemy, was killed from an ambuscade. . . . Rust claims in his reports that spies had communicated the movements of the Confederate troops to the enemy. This officer evidently did not attack, because he found, on getting close to the Federal position, that it was much stronger than he had thought it was from the preliminary reconnoissances he had made. As the attack of the whole depended on the assault of this force, the failure to attack caused a corresponding failure of the whole movement. . . . This movement having failed, and knowing that the enemy would be prepared for any second attempt which, from the nature of the country, would have to be similar to the one already tried, General Lee decided to turn his attention to the commands of Wise and Floyd in front of Rosecrans, leaving General H. R. Jackson in Reynolds's front. He proceeded at once to Floyd's command, which he reached on September 20th, and then to Wise's camp, closely inspecting both. He at once perceived that Wise's position was the strongest and offered the best means for successful defense, and promptly concentrated his forces at that point. . . . Rosecrans had advanced to the top of Big Sewell Mountain and had placed his army in a strong position. General Lee, with the troops of Wise, Floyd, and Loring — about 8,000 men — occupied a position on a parallel range. The two armies were now in close proximity to each other, both occupying strong defensive positions. Lee and Rosecrans, having been officers of the engineers, were fully aware of the great disadvantage an attacking army would have, and each waited, hoping the other would attack. After occupying these positions for twelve days, Rosecrans, on the night of October 6th, retreated. The condition of the roads, the mud, the swollen streams, the large numbers of men with typhoid fever and measles, the condition of the horses, of the artillery, and transportation, were such that Lee decided not to pursue. . . . The rapid approach of winter and the rainy season terminated the campaign in this section. . . . At the termination of this campaign of General Lee's the Confederate Government did not bestow much attention upon this section. The majority of the people seemed inclined to support the Federal side. . . . It must be admitted that General Lee retired from West Virginia with diminished military reputation. Great results had been expected from his presence there. Garnett's defeat and death were to be avenged, and the whole of that portion of Virginia speedily wrested from the Federal arms. The public did not understand the difficulties of the situation, or comprehend why he did not defeat Reynolds, or the failure to attack Rosecrans."—F. Lee, *General Lee, ch.* 6.—After Lee left General H. R. Jackson in front of Reynolds' position, the former established himself in a fortified camp on Buffalo Hill, and was unsuccessfully attacked there by Reynolds, October 3. Two months later, on the 13th of December, the attack was repeated by Reynolds' successor in command, General Milroy, and again without success. Meantime, Floyd had been driven into the mountains, with little fighting, by Rosecrans, and military operations, for the time, were at an end.—Comte de Paris, *Hist. of the Civil War in America, v.* 1, *bk.* 4, *ch.* 2.

A. D. 1861 (September—November: On the Mississippi).—General Grant's first battle, at Belmont.—In August, General Ulysses S. Grant, who had been serving for a few weeks in Missouri, first as Colonel of the 21st Illinois Regiment, and later as a brigadier-general, was assigned by General Fremont to "the command of the district of south-east Missouri, embracing all the territory south of St. Louis, in Missouri, as well as all southern Illinois." On the 4th of September he established his headquarters at Cairo, Illinois, and the next day, having learned from a scout that the rebels were preparing to seize Paducah, at the mouth of the Tennessee River, he placed a couple of regiments of troops and a light battery on board of steamers: and occupied the place on the 6th,—telegraphing meanwhile for orders, but not waiting for them. His movement anticipated the enemy by a few hours, only, and secured a command of the Tennessee, the importance of which was afterward demonstrated by Grant, himself, when he moved on Forts Henry and Donelson. In his "Memoirs" General Grant says: "From the occupation of Paducah up to the early part of November, nothing important occurred with the troops under my command. I was reinforced

from time to time and the men were drilled and disciplined preparatory for the service which was sure to come. By the 1st of November I had not fewer than 20,000 men. . . . About the 1st of November I was directed from department headquarters to make a demonstration on both sides of the Mississippi River with the view of detaining the rebels within their lines. Before my troops could be got off, I was notified from the same quarter that there were some 3,000 of the enemy on the St. Francis River about 50 miles west, or south-west, from Cairo, and was ordered to send another force against them. I dispatched Colonel Oglesby at once with troops sufficient to compete with the reported number of the enemy. On the 5th word came from the same source that the rebels were about to detach a large force from Columbus to be moved by boats down the Mississippi and up the White River, in Arkansas, in order to reinforce Price, and I was directed to prevent this movement if possible." To carry out these orders, General Grant directed a demonstration to be made from Paducah towards Columbus, while, at the same time, he conveyed some 3,000 troops down the river, in steamers, and attacked a camp of rebels at Belmont, immediately opposite Columbus. The battle was a severe one. "The officers and men engaged at Belmont were then under fire for the first time. Veterans," says General Grant, "could not have behaved better than they did up to the moment of reaching the rebel camp. At this point they became demoralized from their victory and failed to reap its full reward. . . . The moment the camp was reached our men laid down their arms and commenced rummaging the tents to pick up trophies. Some of the higher officers were little better than the privates. They galloped about from one cluster of men to another and at every halt delivered a short eulogy upon the Union cause and the achievements of the command." The result was a rallying of the defeated rebels and a reinforcement from Columbus which forced the Unionists to retire with haste. "Our loss at Belmont was 485 in killed, wounded and missing. About 125 of our wounded fell into the hands of the enemy. We returned with 175 prisoners and two guns, and spiked four other pieces. The loss of the enemy, as officially reported, was 642 men, killed, wounded and missing. We had engaged about 2,500 men, exclusive of the guard left with the transports. The enemy had about 7,000; but this includes the troops brought over from Columbus who were not engaged in the first defence of Belmont. The two objects for which the battle of Belmont was fought were fully accomplished. The enemy gave up all idea of detaching troops from Columbus. . . . If it had not been fought, Colonel Oglesby would probably have been captured or destroyed with his 3,000 men. Then I should have been culpable indeed."—U. S. Grant, *Personal Memoirs, ch.* 19-20 (*v.* 1).

A. D. 1861 (October: Virginia).—Confederate project for the invasion of the North vetoed by Jefferson Davis.—"Between the 4th of August and the 15th of October more than 110 regiments and thirty batteries, comprising at least 100,000 men, were added to the forces in Washington and its neighborhood, and there appeared to be no limit to the resources and patriotism of the North. Moreover, the Northern troops were so well provided for in all respects, owing to the immense resources at the disposal of the United States Government, that there was every reason to expect in the spring of 1862 a decidedly improved condition in health and vigor, in self-confidence, and in all soldierly qualities, on the part of the soldiers. The army at Manassas, on the other hand, owing to the straitened means of the Confederate Government, was barely kept comfortable in the matter of clothing and shelter, and its chief officers looked forward with undisguised apprehension to the coming winter. . . . It was easy for any one instructed in military matters to see that if the Federal authorities would only be content to defer active operations until the patriotic levies of the North should have learned 'the trade of the soldier,'—should have acquired familiarity with the use of arms, habits of obedience, trust in their officers and superiors, discipline,—the Federal general would enter on the next campaign with all those chances of success which attend largely superior numbers, better arms and equipment, and a sound and thorough organization of his army. Such in fact was the view of the situation taken by the sagacious officer who commanded the lately victorious army at Manassas Junction, Joseph E. Johnston. In his opinion his two corps commanders, Beauregard . . . and G. W. Smith, . . . entirely concurred. They saw that something must be done to break up this constantly increasing Federal army while it was yet in the process of formation. The Confederate generals determined to urge their views upon the President of the Southern Confederacy. Mr. Davis responded at once to their expressed wish for a conference upon the military situation, and he reached Manassas on September 30, 1861. The conference was held the next day. The generals strongly advised Mr. Davis to reinforce the army at Manassas so that they might cross the Potomac, cut the communications of Washington with the North, and carry the war into the enemy's country. Johnston and Beauregard fixed the strength of an army adequate to these tasks at 60,000 men. Smith was content with a force of 50,000. Additional transportation and supplies of ammunition were also demanded. The army then at Manassas numbered about 40,000 men. With the quality of the soldiers the generals seemed to be perfectly content. They only asked that the additional troops sent should be of an equal degree of efficiency,—'seasoned soldiers' as distinguished from 'fresh volunteers.' But President Davis decided that he could not furnish the required reinforcement without 'a total disregard of the safety of other threatened positions.' The project was therefore dropped, and no further attempt was made during the ensuing autumn and winter to interfere with the uninterrupted development of the Federal army at and near Washington in organization and efficiency. . . . It is altogether probable that the Confederate army was at that time decidedly the superior of its antagonist in many important respects. It had the prestige of victory. . . . We may fairly say therefore, that an invasion of the North, undertaken in October, 1861, held out a very fair

promise of a successful result for the Confederate arms."—J. C. Ropes, *The Story of the Civil War, ch.* 10.

A. D. 1861 (October: Virginia).—The affair at Ball's Bluff, or Leesburg.—"The true story of the affair of Ball's Bluff, is, in brief, as follows: One of Gen. Stone's officers, Capt. Philbrick, of the 15th Mass., thought that he had discovered a camp of the enemy about one mile beyond Harrison's island in the direction of Leesburg. Having completed the feint of crossing made in the course of the 20th, Gen. Stone at 10.30 P. M. of the same day issued his orders for the surprise of the supposed camp at daybreak of the 21st. Col. Devens, of the 15th Mass., was entrusted with the duty, with four companies of his regiment. Col. Lee, of the 20th Mass., was directed to replace Col. Devens in Harrison's island with four companies of his own regiment, one of which was to pass over to the Virginia shore and hold the heights there to cover Col. Devens's return. Colonel Devens was directed to 'attack the camp at daybreak, and, having routed, to pursue them as far as he deems prudent, and to destroy the camp, if practicable, before returning.' . . . 'Having accomplished this duty, Col. Devens will return to his present position, unless he shall see one on the Virginia side near the river which he can undoubtedly hold until reinforced, and one which can be successfully held against largely superior numbers. In which case he will hold on and report.' In obedience to these orders Col. Devens crossed about midnight with five companies (instead of four), numbering about 300 men, and halted until daybreak in an open field near the bluffs bordering the shore. While there he was joined by Col. Lee with 100 men of the 20th Mass., who halted here to cover his return. At daybreak he advanced about a mile towards Leesburg, and then discovered that the supposed camp did not exist. After examining the vicinity and discovering no traces of the enemy, he determined not to return at once, but at about half-past six A. M. sent a non-commissioned officer to report to Gen. Stone that he thought he could remain where he was until reinforced. At about seven o'clock a company of hostile riflemen were observed on the right, and a slight skirmish ensued. A company of cavalry being soon observed on the left, the skirmishers were drawn back to the woods, and, after waiting half an hour for attack, the command was withdrawn to the position held by Col. Lee; but, after again scouting the woods, Col. Devens returned to his advanced position. About eight o'clock the messenger returned from Gen. Stone with orders for Col. Devens to remain where he was, and that he would be reinforced. The messenger was again sent back to report the skirmish that had taken place. Col. Devens then threw out skirmishers and awaited reinforcements. At about ten o'clock the messenger again returned with the information that Col. Baker [Senator Edward D. Baker, of California] would soon arrive with his brigade and take command. Between nine and eleven Col. Devens was joined by Lieut.-Col. Learned with the remainder of the 15th, bringing up his command to 28 officers and 625 men. About midday Col. Devens learned that the enemy were gathering on his left, and about half-past twelve or one he was strongly attacked; and as he was in great danger of being outflanked, and no reinforcements had arrived, at about a quarter-past two he fell back to the bluff, where he found Col. Baker, who directed him to take the right of the position he proposed to occupy. . . . At about three o'clock the enemy attacked in force, the weight of his attack being on our centre and left. At about four our artillery was silenced, and Col. Devens was ordered to send two of his companies to support the left of our line; shortly after he learned that Col. Baker had been killed. Col. Coggswell then assumed command, and, after a vain attempt to cut his way through to Edward's Ferry, was obliged to give the order to retreat to the river-bank and direct the men to save themselves as best they could. I have gone thus much into detail because at the time I was much criticised and blamed for this unfortunate affair, while I was in no sense responsible for it."—G. B. McClellan, *McClellan's Own Story, ch.* 11.—In connection with the disaster at Ball's Bluff (called the battle of Leesburg by the Confederates) a great wrong seems to have been done to General Stone. Accused of disloyalty, he was arrested, but on no specific charge, imprisoned for six months, denied a trial, and set free without explanation. He went abroad and for many years was Chief of the General Staff to the Khedive of Egypt.—J. G. Blaine, *Twenty Years of Congress, v.* 1, *ch.* 17.

Also in: R. B. Irwin, *Ball's Bluff and the arrest of General Stone* (*Battles and Leaders of the Civil War, v.* 2, *pp.* 123–134).—*Report of Joint Com. on the Conduct of the War, 37th Cong., 3d sess., H. R., pt.* 2.

A. D. 1861 (October—December: South Carolina—Georgia).—The Port Royal Expedition.—Capture of Hilton Head.—Extensive occupation of the coast.—Savannah threatened.—"On the the 29th of October, another and far stronger naval and military expedition [than that against the Hatteras forts] set forth from Hampton Roads, and, clearing the capes of Virginia, moved majestically southward. General T. W. Sherman [not to be confused with General William T. Sherman of the Western armies] commanded the land forces, consisting of 13 volunteer regiments, forming three brigades, and numbering not less than 10,000 men; while the fleet—commanded by Com. Samuel F. Du Pont—embraced the steam-frigate Wabash, 14 gunboats, 22 first-class and 12 smaller steamers, with 26 sailing vessels. After a stormy passage, in which several transports were disabled and four absolutely lost, Com. Du Pont, in his flag-ship, came to off Port Royal, S. C., during the night of November 3d and 4th; and, after proper soundings and reconnoissances, which developed the existence of a new fort on either side of the entrance, the commodore brought his most effective vessels into action at 9 A. M., on Thursday, November 7th, taking the lead in his flag-ship, the Wabash—the gunboats to follow at intervals in due order. Thus the fighting portion of the fleet steamed slowly up the bay by the forts, receiving and returning the fire of the batteries on Bay Point as they passed up, and exchanging like compliments with the stronger fort on Hilton Head as they came down. Thus no vessel remained stationary under fire; so that the enemy were at no time enabled to gain, by experiment and observation, a perfect aim. The day was lovely; the spectacle magnificent; the

fight spirited, but most unequal. Despite the general presumption that batteries, well manned and served, are superior to ships when not iron-clad, the terrible rain of shot and shell upon the gunners in the Rebel forts soon proved beyond human endurance. . . . The battle . . . raged nearly five hours, with fearful carnage and devastation on the part of the Rebels, and very little on ours, when the overmatched Confederates, finding themselves slaughtered to no purpose, suddenly and unanimously took to flight. . . . The Rebel forts were fully manned by 1,700 South Carolinians, with a field battery of 500 more stationed not far distant. The negroes, save those who had been driven off by their masters, or shot while attempting to evade them, had stubbornly remained on the isles."—H. Greeley, *The American Conflict, ch.* 36.—"The effect of the battle of Port Royal was as largely felt in the North, where it revived the hopes of her people, as in the South, to whose people it revealed the presence of a new and pressing danger. The Federals had conquered a strong base of operations on the enemy's coast; they had carried the war into South Carolina. . . . Sherman might, perhaps, at the first moment of his adversary's disorder, have been able to push his success farther, and to lead his army upon Charleston, or Savannah. But he was afraid of risking such a venture. . . . The occupation of most of the islands in the vicinity of the St. Helena group was the natural consequence of the victory of Hilton Head. It was effected gradually before the end of the year. Among all the points of the coast which the Federals had thus seized without striking a blow, thanks to the prestige of their success, the most important was Tybee Island, at the entrance of the Savannah River. Situated on the right bank of the mouth of that river, and being the spot where the lighthouse stands, Tybee Island enabled the Federals, as soon as they became masters of it, to obstruct the passage of the blockade-runners on their way to the great mart of Savannah. At a distance of about 600 feet from its borders, on an islet in the middle of the river, stood Fort Pulaski. . . . A few days after, the navy extended its conquests still farther south," occupying the channel between the Tybee Island group and the Warsaw Islands, "and thus opening a passage for future operations, which would enable them to reach Savannah by turning Fort Pulaski. . . . At the end of the year, Dupont's fleet, supported by detachments from Sherman's army, was in possession of the five large bays of North Edisto, St. Helena, Port Royal, Tybee, Warsaw, and the whole chain of islands which forms the coast of Carolina and Georgia between those bays."—Comte de Paris, *Hist. of the Civil War in Am., bk.* 4, *ch.* 3 (*v.* 1).

A. D. 1861 (November).—The Trent affair.—Arrest of Mason and Slidell.—"On the 8th of November, 1861, Captain Charles Wilkes, of the U. S. Steamer San Jacinto, intercepted on the ocean H. B. M. mail packet boat Trent, having on board four rebel emissaries bound for England. Having boarded the Trent, an officer of the San Jacinto, with an armed guard, arrested the rebels Mason, Slidell, McFarland and Eustis, and transferred them to the San Jacinto. The Trent then proceeded on her voyage. Captain Wilkes conveyed his captives to Boston, where they were consigned to Fort Warren, then a receptacle for political prisoners. When this transaction became known to the British government, immediate preparations were made for war. In the United States, the act was hailed as a victory. The Secretary of the Navy publicly applauded Captain Wilkes, and the House of Representatives did the same. The Secretary of State, upon whom the chief responsibility in the matter rested, saw, more clearly than others, that a breach of international law had been committed by the commander of the San Jacinto. The President coincided with Mr. Seward, and it was at once resolved to restore the rebel captives to the protection of the British flag."—G. E. Baker, *Biographical Memoir of William H. Seward* (*v.* 5 *of Seward's Works, pp.* 10–11).—In his diplomatic correspondence as quoted in the volume cited above, under the caption "Diary or Notes on the War," Secretary Seward wrote: "November 30, 1861.—Captain Wilkes, in the Steamer San Jacinto, has boarded a British colonial steamer, and taken from her deck two insurgents who were proceeding to Europe on an errand of treason against their own country. Lord Lyons has prudently refrained from opening the subject to me, as, I presume, waiting instructions from home. We have done nothing on the subject to anticipate the discussion, and we have not furnished you with any explanations. We adhere to that course now, because we think it more prudent that the ground taken by the British government should be first made to us here, and that the discussion, if there must be one, shall be had here. In the capture of Messrs. Mason and Slidell on board a British vessel, Captain Wilkes having acted without any instructions from the government, the subject is therefore free from the embarrassment which might have resulted if the act had been specially directed by us. . . . January 20, 1862.—We have reason to be satisfied with our course in the Trent affair. The American people could not have been united in a war which, being waged to maintain Captain Wilkes's act of force, would have practically been a voluntary war against Great Britain. At the same time it would have been a war in 1861 against Great Britain for a cause directly the opposite of the cause for which we waged war against the same power in 1812." In a despatch to Lord Lyons, British Minister, Mr. Seward had written: "If I decide this case in favor of my own government, I must disavow its most cherished principles, and reverse and forever abandon its essential policy. The country cannot afford the sacrifice. If I maintain those principles, and adhere to that policy, I must surrender the case itself. It will be seen, therefore, that this government could not deny the justice of the claim presented to us in this respect upon its merits. We are asked to do to the British nation just what we have always insisted all nations ought to do to us. . . . By the adjustment of the present case upon principles confessedly American, and yet, as I trust, mutually satisfactory to both of the nations concerned, a question is finally and rightly settled between them, which, heretofore exhausting not only all forms of peaceful discussion, but also the arbitrament of war itself, for more than half a century alienated the two

countries from each other."—W. H. Seward, *To Lord Lyons, Dec.* 26, 1861 (*Works, v.* 5, *Diplomatic Hist. of the War, pp.* 308–309).

ALSO IN: M. Bernard, *Hist. Acc't of the Neutrality of Great Britain, ch.* 9.—D. M. Fairfax, *Capt. Wilkes's Seizure of Mason and Slidell* (*Battles and Leaders, v.* 2, *pp.* 135–142).

A. D. 1861-1862 (December — March: Virginia).—Protracted inaction of McClellan.—His Plan of Campaign and its frustration by the rebel evacuation of Centreville.—"When Congress assembled . . . in the beginning of December, 1861, so successful had been the exertions of the authorities, and so zealously had the people responded to their country's call, that the consolidated morning reports, furnished your committee by the adjutant general of the army, showed that, exclusive of the command of General Dix, at Baltimore, the army of the Potomac consisted of about 185,000 men. During the time this large army had been collecting and organizing, nothing of importance had transpired in connexion with it, except the closing of the navigation of the Potomac by the rebels, which your committee treat of more at length in another part of this report, and the melancholy disaster of Ball's Bluff, which is made the subject of a separate report. The weather during the fall season, and for some weeks after the convening of Congress, continued unusually favorable for active military operations. As month after month passed without anything being done by the army of the Potomac, the people became more and more anxious for the announcement that the work of preparation had been completed and active operations would soon be commenced. From the testimony before your committee it appeared that the army of the Potomac was well armed and equipped, and had reached a high state of discipline by the last of September or the first of October. The men were ready and eager to commence active operations. The generals in command of the various divisions were opposed to going into winter quarters, and the most of them declared they had no expectation of doing so. . . . Your committee endeavored to obtain as accurate information as possible in relation to the strength and position of the enemy in front of Washington. The testimony of the officers in our army here upon that point, however, was far from satisfactory. Early in December an order had been issued from headquarters prohibiting the commanders in the front from examining any persons who should come into our lines from the direction of the enemy; but all such persons were to be sent, without examination, to the headquarters of the army. Restrictions were also placed upon the movements of scouts. The result was, that the generals examined appeared to be almost entirely ignorant of the force of the enemy opposed to them, having only such information as they were allowed to obtain at headquarters. The strength of the enemy was variously estimated at from 70,000 to 210,000 men. Those who formed the highest estimate based their opinion upon information received at headquarters. . . . Subsequent events have proved that the force of the enemy was below even the lowest of these estimates, and the strength of their fortifications very greatly overestimated. Your committee also sought to ascertain what number of men could be spared from this army for offensive operations elsewhere, assuming that the works of the enemy in front were of such a character that it would not be advisable to move directly upon them. The estimate of the force necessary to be left in and around Washington to act entirely on the defensive, to render the capital secure against any attack of the enemy, as stated by the witnesses examined upon that point, was from 50,000 to 80,000 men, leaving 100,000 or upwards that could be used for expeditions at other points. . . . The subject of the obstruction of the navigation of the Potomac naturally demanded the consideration of your committee. . . . As was well urged by the Navy Department, the whole question amounted simply to this: Would the army co-operate with the navy in securing the unobstructed navigation of the Potomac, or, by withholding that co-operation at that time, permit so important a channel of communication to be closed. After repeated efforts, General McClellan promised that 4,000 men should be ready at a time named to proceed down the river. . . . The troops did not arrive, and the Navy Department was informed of the fact by Captain Craven. Assistant Secretary Fox, upon inquiring of General McClellan why the troops had not been sent according to agreement, was informed by him that his engineers were of the opinion that so large a body of troops could not be landed, and therefore he had concluded not to send them. Captain Fox replied that the landing of the troops was a matter of which the Navy Department had charge. . . . It was then agreed that the troops should be sent the next night. Captain Craven was again notified, and again had his flotilla in readiness for the arrival of the troops. But no troops were sent down at that time, nor were any ever sent down for that purpose. Captain Fox, in answer to the inquiry of the committee as to what reason was assigned for not sending the troops according to the second agreement, replied that the only reason, so far as he could ascertain, was, that General McClellan feared it might bring on a general engagement. . . . Upon the failure of this plan of the Navy Department, the effective vessels of the Potomac flotilla left upon the Port Royal expedition. The navigation of the river was almost immediately thereafter closed, and remained closed until the rebels voluntarily evacuated their batteries in the March following, no steps having been taken, in the meantime, for reopening communication by that route. On the 19th of January, 1862, the President of the United States, as commander-in-chief of the army and navy, issued orders for a general movement of all the armies of the United States, one result of which was the series of victories at Fort Henry, Fort Donelson, &c., which so electrified the country and revived the hopes of every loyal man in the land. After this long period of inaction of the army of the Potomac, the President of the United States, on the 31st of January, 1862, issued the following order: . . . 'Ordered, That all the disposable force of the army of the Potomac, after providing safely for the defence of Washington, be formed into an expedition for the immediate object of seizing and occupying a point upon the railroad southwestward of what is known as Manassas Junction; all details to be in the discretion of the general-in-chief, and the expedition to move before or on the 22d day of February next. Abraham Lin-

coln.' To this order General McClellan wrote an elaborate reply of the same date, objecting to the plan therein indicated as involving 'the error of dividing our army by a very difficult obstacle, (the Occoquan,) and by a distance too great to enable the two portions to support each other, should either be attacked by the masses of the enemy, while the other is held in check.' He then proceeded to argue in favor of a movement by way of the Rappahannock or Fortress Monroe, giving the preference to the Rappahannock route. He stated that 30 days would be required to provide the necessary means of transportation. He stated that he regarded 'success as certain, by all the chances of war,' by the route he proposed, while it was 'by no means certain that we can beat them (the enemy) at Manassas.' . . . Your committee have no evidence, either oral or documentary, of the discussions that ensued or the arguments that were submitted to the consideration of the President that led him to relinquish his own line of operations and consent to the one proposed by General McClellan, except the result of a council of war, held in February, 1862. That council, the first, so far as your committee have been able to ascertain, ever called by General McClellan, and then by direction of the President, was composed of twelve generals. . . . To them was submitted the question whether they would indorse the line of operations which General McClellan desired to adopt. The result of the deliberation was a vote of eight to four in favor of the movement by way of Annapolis, and thence down the Chesapeake bay, up the Rappahannock, landing at Urbana, and across the country to Richmond. The four generals who voted against the proposed movement were Generals McDowell, Sumner, Heintzelman, and Barnard. General Keyes voted for it with the qualification that no change should be made until the enemy were driven from their batteries on the Potomac. . . . Before the movement by way of Annapolis could be executed, the enemy abandoned their batteries upon the Potomac, and evacuated their position at Centreville and Manassas, retiring to the line of the Rappahannock. When General McClellan, then in the city of Washington, heard that the enemy had evacuated Manassas, he proceeded across the river and ordered a general movement of the whole army in the direction of the position lately occupied by the enemy. The enemy moved on the morning of the 10th of March, the greater part of it proceeding no further than Fairfax Court-House. A small force of the army proceeded to Manassas and beyond to the line of the Rappahannock, ascertaining that the enemy had retired beyond that river and destroyed the railroad bridge across it. . . . On the 13th of March General McClellan convened at Fairfax Court-House a council of war, consisting of four of the five commanders of army corps, (General Banks being absent,) and informed them that he proposed to abandon his plan of movement by way of the Rappahannock, and submitted to them instead a plan of movement by way of the York and James rivers."—*Rep't of Joint Committee on the Conduct of the War, 37th Cong., 3d sess., H. R. Rep., pt.* 1, *pp.* 6–12.—The Joint Committee on the Conduct of the War, consisting of Senators Wade, Chandler, and Andrew Johnson, and of Representatives Gooch, Covode, Julian, and Odell, was appointed in December, 1861. This Committee "was for four years one of the most important agencies in the country. It assumed, and was sustained by Congress in assuming, a great range of prerogative. It became a stern and zealous censor of both the army and the Government; it called soldiers and statesmen before it, and questioned them like refractory schoolboys. . . . It was often hasty and unjust in its judgments, but always, earnest, patriotic, and honest. . . . General McClellan and his immediate following treated the committee with something like contempt. But the President, with his larger comprehension of popular forces, knew that he must take into account an agency of such importance; and though he steadily defended General McClellan and his deliberateness of preparation before the committee, he constantly assured him in private that not a moment ought to be lost in getting himself in readiness for a forward movement. . . . December was the fifth month that General McClellan had been in command of the greatest army ever brought together on this continent. It was impossible to convince the country that a longer period of preparation was necessary before this army could be led against one inferior in numbers, and not superior in discipline or equipment. . . . McClellan reported to the Secretary of War, that Johnston's army, at the end of October, numbered 150,000, and that he would therefore require, to make an advance movement with the Army of the Potomac, a force of 240,000. Johnston's report of that date shows an effective total of 41,000 men. . . . Aware that his army was less than one-third as strong as the Union forces, Johnston contented himself with neutralizing the army at Washington, passing the time in drilling and disciplining his troops, who, according to his own account, were seriously in need of it. He could not account for the inactivity of the Union army. Military operations, he says, were practicable until the end of December; but he was never molested."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 5, *ch.* 9.—McClellan says, "It certainly was not till late in Nov., 1861, that the Army of the Potomac was in any condition to move, nor even then were they capable of assaulting entrenched positions. By that time the roads had ceased to be practicable for the movement of armies, and the experience of subsequent years proved that no large operations could be advantageously conducted in that region during the winter season. Any success gained at that time in front of Washington could not have been followed up and a victory would have given us the barren possession of the field of battle, with a longer and more difficult line of supply during the rest of the winter. If the Army of the Potomac had been in condition to move before winter, such an operation would not have accorded with the general plan I had determined upon after succeeding General Scott as general in command of the armies."—G. B. McClellan, *McClellan's Own Story, pp.* 199–200.

A. D. 1861-1862 (December—April: Virginia).—Jackson's first campaign in the Shenandoah Valley.—Battle of Kernstown.—"Soon after the battle of Bull Run Stonewall Jackson was promoted to major-general, and the Confederate Government having on the 21st of October, 1861, organized the Department of Northern Virginia, under command of General Joseph E. Johnston, it was divided into the Valley District, the Potomac District, and Aquia District, to be commanded respectively by Major-Generals Jackson, Beauregard, and Holmes." In November, Jackson's force was about 10,000 men. "His only movement of note in the winter of 1861–62 was an expedition at the end of December to Bath and Romney, to destroy the Baltimore and Ohio railroad and a dam or two near Hancock, on the Chesapeake and Ohio canal. . . . In March Johnston withdrew from Manassas, and General McClellan collected his army of more than 100,000 men on the Peninsula. . . . Jackson's little army in the Valley had been greatly reduced during the winter from various causes, so that at the beginning of March he did not have over 5,000 men of all arms available for the defense of his district, which began to swarm with enemies all around its borders, aggregating more than ten times his own strength. Having retired up the Valley, he learned that the enemy had begun to withdraw and send troops to the east of the mountains to coöperate with McClellan. This he resolved to stop by an aggressive demonstration against Winchester, occupied by General Shields, of the Federal army, with a division of 8,000 to 10,000 men. A little after the middle of March, Jackson concentrated what troops he could, and on the 23d he occupied a ridge at the hamlet of Kernstown, four miles south of Winchester. Shields promptly attacked him, and a severe engagement of several hours ensued, ending in Jackson's repulse about dark, followed by an orderly retreat up the Valley to near Swift Run Gap in Rockingham county. The pursuit was not vigorous nor persistent. Although Jackson retired before superior numbers, he had given a taste of his fighting qualities that stopped the withdrawal of the enemy's troops from the Valley. The result was so pleasing to the Richmond government and General Johnston that it was decided to reënforce Jackson by sending General Ewell's division to him at Swift Run Gap, which reached him about the 1st of May."—J. D. Imboden, *Stonewall Jackson in the Shenandoah* (*Battles and Leaders, v.* 2, *pp.* 282–285).—"The losses at Kernstown were: Union, 118 killed, 450 wounded, 22 missing = 590; Confederate, 80 killed, 375 wounded, 263 missing = 718."—N. Kimball, *Fighting Jackson at Kernstown* (*Battles and Leaders, v.* 2, *p.* 307, *footnote*).

A. D. 1861-1863.—President Lincoln's suspension of the writ of Habeas Corpus.—On the 27th of April, 1861, President Lincoln issued the following order "To the Commanding General, Army of the United States"—at that time, General Scott: "You are engaged in suppressing an insurrection against the laws of the United States. If at any point on or in the vicinity of any military line which is now or which shall be used between the city of Philadelphia and the city of Washington you find resistance which renders it necessary to suspend the writ of habeas corpus for the public safety, you personally, or through the officer in command at the point at which resistance occurs, are authorized to suspend that writ." On the 2d of July, another order was issued in exactly the same language, except that it gave authority to suspend the writ at "any point on or in the vicinity of any military line . . . between the city of New York and the city of Washington." On the 14th of October, a third order to General Scott declared: "The military line of the United States for the suppression of the insurrection may be extended so far as Bangor, Maine. You and any officer acting under your authority are hereby authorized to suspend the writ of habeas corpus in any place between that place and the city of Washington." On the 2d of December a specific order to General Halleck, commanding in the Department of Missouri, authorized the suspension of the writ within the limits of his command; and a similar order, long previously, had specially empowered the commander of the forces of the United States on the coast of Florida to do the same. On the 24th of September, 1862, a general proclamation by the President subjected to martial law "all rebels and insurgents, their aiders and abettors within the United States, and all persons discouraging volunteer enlistments, resisting militia drafts, or guilty of any disloyal practice affording aid and comfort to rebels against the authority of the United States"; and suspending the writ of habeas corpus "in respect to all persons arrested, or who are now, or hereafter during the rebellion shall be, imprisoned in any fort, camp, arsenal, military prison, or other place of confinement, by any military authority, or by the sentence of any court martial or military commission." On the 3d of March, 1863, the authority of the President to suspend habeas corpus (which some thought questionable) was confirmed by act of Congress; and on the 15th of September in that year another general proclamation was issued, referring to the act and declaring a suspension of the writ "throughout the United States, in the cases where, by the authority of the President of the United States, military, naval, and civil officers of the United States, or any of them, hold persons under their command, or in their custody, either as prisoners of war, spies, or aiders or abettors of the enemy, or officers, soldiers, or seamen enrolled or drafted or mustered or enlisted in, or belonging to, the land or naval forces of the United States, or as deserters therefrom, or otherwise amenable to military law, or the rules and articles of war, or the rules or regulations prescribed for the military or naval service by authority of the President of the United States; or for resisting a draft, or for any other offense against the military or naval service."—Abraham Lincoln, *Complete Works, v.* 2, *pp.* 38, 45, 54, 85, 93, 239, 406.—"Whether it is the President or Congress that has power under the constitution to suspend the privilege of the writ of habeas corpus was a burning question during the civil war. . . . The case of John Merryman . . . was the first to come up for judicial interpretation. Merryman lived near Baltimore, and appears to have

been suspected of being captain of a secession troop, of having assisted in destroying railroads and bridges for the purpose of preventing troops from reaching Washington, and of obstructing the United States mail. By order of General Keim of Pennsylvania he was arrested at night in his own house, and taken to Fort McHenry at that time in command of General George Cadwallader. Taney, who was then chief justice of the United States, granted a habeas corpus, but Cadwallader refused to obey it, saying that the privilege had been suspended by the President. On the return of the writ, the Chief Justice filed an opinion denying that the President had any power to suspend habeas corpus and affirming that such power rested with Congress alone. Lincoln continued to arrest and imprison without any regard to this opinion, and indeed was advised by his Attorney-General that he was not bound to notice it. . . . The writ of habeas corpus was . . . not suspended by Congress until the rebellion was half over. In other words, Lincoln suspended it for two years of his own accord and without authority from any one; for two years he made arrests without warrants and held men in prison as long as he pleased. . . . There are few things in American history more worthy of discussion than the power exercised by Lincoln in those two years. It was absolute and arbitrary and, if unauthorized, its exercise was a tremendous violation of the constitution. Whether it was justifiable and necessary is another matter. If it was unconstitutional and yet necessary in order to save the Union, it shows that the constitution is defective in not allowing the government the proper means of protecting itself. That Lincoln used this power with discretion and forbearance there is no doubt. He was the most humane man that ever wielded such authority. He had no taste for tyranny, and he knew the temper of the American people. But, nevertheless, injustice was sometimes done. His subordinates had not always their master's nature."—S. G. Fisher, *The Suspension of Habeas Corpus during the War of the Rebellion* (*Pol. Sci. Quarterly, Sept.*, 1888).—The view which President Lincoln himself entertained, and under which he assumed and exercised authority to suspend the writ of habeas corpus, was submitted to Congress in his first Message, when it convened in special session, July 4, 1861. He said: "Soon after the first call for militia, it was considered a duty to authorize the commanding general in proper cases, according to his discretion, to suspend the privilege of the writ of habeas corpus, or, in other words, to arrest and detain, without resort to the ordinary processes and forms of law, such individuals as he might deem dangerous to the public safety. This authority has purposely been exercised but very sparingly. Nevertheless, the legality and propriety of what has been done under it are questioned, and the attention of the country has been called to the proposition that one who has sworn to 'take care that the laws be faithfully executed' should not himself violate them. Of course some consideration was given to the questions of power and propriety before this matter was acted upon. The whole of the laws which were required to be faithfully executed were being resisted and failing of execution in nearly one third of the States. Must they be allowed to finally fail of execution, even had it been perfectly clear that by the use of the means necessary to their execution some single law, made in such extreme tenderness of the citizen's liberty that, practically, it relieves more of the guilty than of the innocent, should to a very limited extent be violated? To state the question more directly, are all the laws but one to go unexecuted, and the government itself go to pieces lest that one be violated? Even in such a case, would not the official oath be broken if the government should be overthrown, when it was believed that disregarding the single law would tend to preserve it? But it was not believed that this question was presented. It was not believed that any law was violated. The provision of the Constitution that 'the privilege of the writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it,' is equivalent to a provision—is a provision—that such privilege may be suspended when, in case of rebellion or invasion, the public safety does require it. It was decided that we have a case of rebellion, and that the public safety does require the qualified suspension of the privilege of the writ which was authorized to be made. Now it is insisted that Congress, and not the executive, is vested with this power. But the Constitution itself is silent as to which or who is to exercise the power; and as the provision was plainly made for a dangerous emergency, it cannot be believed the framers of the instrument intended that in every case the danger should run its course until Congress could be called together, the very assembling of which might be prevented, as was intended in this case, by the rebellion. . . . Whether there shall be any legislation upon the subject, and if any, what, is submitted entirely to the better judgment of Congress."—Abraham Lincoln, *Complete Works*, *v.* 2, *pp.* 59–60.—Congress gave tacit approval to this view of the President's powers by passing no act on the subject until nearly two years afterwards, as shown above.

A. D. 1862 (January—February: Kentucky—Tennessee).—The first breaking of the Confederate line.—Grant's capture of Fort Henry and Fort Donelson.—"At the beginning of the new year the Union armies were over 660,000 strong, backed by a fleet of 212 vessels. McClellan lay quiet upon the Potomac all winter, drilling, organizing, disciplining the Army of the Potomac. In his front was Joe Johnston, with a much smaller force, pushing forward with equal energy the schooling of his soldiers. The Western generals were more active. Albert Sidney Johnston, perhaps the most promising Southern officer, was in command in the West, with headquarters at Bowling Green. Buell lay in Johnston's front, having superseded Sherman, whose 'crazy' suggestion that 250,000 men would be required for operations on the Western field had lost him the confidence of his superiors. There was abundant method in his madness, as time all too fully showed. In [Eastern] Kentucky the Confederate Humphrey Marshall had been creating more or less political trouble, and General Garfield was sent against him with some 2,000 men. Marshall somewhat outnumbered Garfield; but in a vigorous January campaign [beginning at Paintsville, January 7, and] culminating at Prestonburg [January 10], Garfield quite dispersed his forces, and drove him into the moun-

tains. About the same time, Zollicoffer, with some 12,000 men, had retreated from his post in advance of Cumberland Gap, where he held the extreme right of the Southern line, to Mill Spring, in Central Kentucky. General George H. Thomas was charged with the duty of disposing of him. With about an equal force Thomas promptly moved upon his enemy, and in a sharp action at Mill Spring [January 19] utterly broke up his army. He thus early showed the rare vigor he afterwards so fully developed. Zollicoffer was killed. This first of our substantial western victories (called 'Fishing Creek' by the enemy) [and also called the battle of Logan Cross Roads by some Union writers] was a great encouragement to our arms. Crittenden, who succeeded to the command, withdrew his troops across the Cumberland, abandoning his artillery and trains. Eastern Kentucky was thus freed from the Confederates. Halleck's first task as commander of the Western armies was to penetrate the Confederate line of defense. This could be done by breaking its centre or by turning one of its flanks. The former appeared most feasible to Grant, and Commodore Foote, who commanded the naval forces. Under instructions from Halleck, seven of the gun-boat flotilla, with Grant's 17,000 men in reserve, moved up the Tennessee river to attack Fort Henry and essay the value of gun-boats in amphibious warfare. Grant landed below the fort, and Foote then opened fire upon it. Tilghman, in command, foreseeing its capture, was shrewd enough to send off the bulk of his force to Fort Donelson. He himself made a mock defense with a handful of men, surrendering the fort after the garrison was well on its way. Without the twin citadel of Donelson [distant about eleven miles, southeastwardly, on the Cumberland River], however, Fort Henry was but a barren triumph, for no column could advance up the Tennessee river while this garrison threatened its flank. It was here that Grant earned his first laurels as a stanch soldier, by compelling, after a stubborn fight, the surrender of this second fortress with its entire garrison. Every effort had been made by Johnston to hold the place. He must here fight for the possession of Nashville. Fort Donelson was strongly fortified and garrisoned. Grant moved against it from Fort Henry with 15,000 men, 5,000 less than the enemy. The ground is difficult; the troops are green. But reinforcements and the fleet come to Grant's assistance. The fort is fully invested, under great difficulties from severity of weather and the inexperience of the men. Happily there is not much abilty in the defense. Floyd, the senior officer, determines to cut his way out. He falls heavily upon Grant's right, held by McClernand and backed by Wallace, thinking to thrust them aside from the river and to escape over the road so won. A stubborn resistance defeats this sortie, though but narrowly. A general assault is ordered, which effects a lodgment in the works. Divided responsibilities between Floyd, Buckner, and Pillow weaken the defense so as to operate a surrender. Our loss was 2,300. The Confederates captured were over 15,000 men. These successes broke through the centre of the Confederate line, established with so much pains, and compromised its flanks. Johnston found that he must retire to a new line. This lay naturally along the Memphis and Charleston Railroad. He had retreated from Bowling Green on receipt of the news of the fall of Fort Henry, and was forced thereby to cede to Buell possession of Nashville, and practically of Kentucky. The advanced flank on the Mississippi at Columbus was likewise compromised, and with the bulk of the armament was withdrawn to Island No. 10, some forty miles below Cairo. We could congratulate ourselves upon a very substantial gain."— T. A. Dodge, *Bird's-Eye View of Our Civil War, ch.* 6.

A. D. 1862 (January — March: Missouri—Arkansas).— Expulsion of the Confederates from Missouri.— Battle of Pea Ridge.—"Late in December General Samuel R. Curtis took command of 12,000 National troops at Rolla, and advanced against Price, who retreated before him to the northwestern corner of Arkansas, where his force was joined by that of General McCulloch, and together they took up a position in the Boston Mountains. Curtis crossed the line into Arkansas, chose a strong place on Pea Ridge, in the Ozark Mountains, intrenched, and awaited attack. Because of serious disagreements between Price and McCulloch, General Earl Van Dorn, who ranked them both, was sent to take command of the Confederate force, arriving late in January. There is no authentic statement as to the size of his army. He himself declared that he had but 14,000 men, while no other estimate gave fewer than twice that number. Among them was a large body of Cherokee Indians, recruited for the Confederate service by Albert Pike, who thirty years before had won reputation as a poet. On March 5, 1862, Van Dorn moved to attack Curtis, who knew of his coming and formed his line on the bluffs along Sugar Creek, facing southward. His divisions were commanded by Generals Franz Sigel and Alexander S. Asboth and Colonels Jefferson C. Davis and Eugene A. Carr, and he had somewhat more than 10,000 men in line, with 48 guns. The Confederates, finding the position too strong in front, made a night march to the west, with the intention of striking the Nationals on the right flank. But Curtis discovered their movement at dawn, promply faced his line to the right about, and executed a grand left wheel. His army was looking westward toward the approaching foe, Carr's division being on the right, then Davis, then Asboth, and Sigel on the left. But they were not fairly in position when the blow fell. Carr was struck most heavily, and, though reenforced from time to time, was driven back a mile in the course of the day. Davis, opposed to the corps of McCulloch, was more successful; that General was killed and his troops were driven from the field. In the night Curtis reformed and strengthened his lines, and in the morning the battle was renewed. This day Sigel executed some brilliant and characteristic manœuvres. To bring his division into its place on the left wing, he pushed a battery forward, and while it was firing rapidly its infantry supports were brought up to it by a right wheel; this movement was repeated with another battery and its supports to the left of the first, and again, till

the whole division had come into line, pressing back the enemy's right. Sigel was now so far advanced that Curtis's whole line made a curve, enclosing the enemy, and by a heavy concentrated artillery fire the Confederates were soon driven to the shelter of the ravines, and finally put to rout. The National loss in this action [called the battle of Elk Horn by the Confederates] — killed, wounded, and missing — was over 1,300, Carr and Asboth being among the wounded. The Confederate loss is unknown. Generals McCulloch and McIntosh were killed, and Generals Price and Slack wounded. Owing to the nature of the ground, any effective pursuit of Van Dorn's broken forces was impracticable."— R. Johnson, *Short Hist. of the War of Secession, ch.* 6.

Also in: W. Baxter, *Pea Ridge and Prairie Grove.*— O. J. Victor, *Hist. of the Southern Rebellion, v.* 3, *pp.* 56–71.— *Official Records, series* 1, *v.* 8, *pp.* 189–330.

A. D. 1862 (January—April: North Carolina).—Burnside's expedition to Roanoke and capture of Newbern and Beaufort.—"Roanoke Island, lying behind Bodie's Island, the sand-bar that shuts off Upper North Carolina from the Atlantic Ocean, offers some of the most interesting souvenirs of early American history. . . . As stated by General Wise, to whom its defense was intrusted by the Confederate government, it was the key to all the rear defenses of Norfolk. It unlocked two sounds, eight rivers, four canals, two railroads. It guarded more than four fifths of the supplies of Norfolk. The seizure of it endangered the subsistence of the Confederate army there, threatened the navy yard, interrupted the communication between Norfolk and Richmond, and intervened between both and the South. . . . After the capture of Hatteras Inlet in August, 1861, light-draught steamers, armed with a rifle gun, often stealthily came out of these waters to prey upon commerce. . . . An expedition for operating on this part of the North Carolina coast was placed under command of General Burnside, who was ordered (January 7th, 1862) to unite with Flag-officer Goldsborough, in command of the fleet, at Fortress Monroe, capture Newbern, seize the Weldon Railroad, and reduce Fort Macon. The force consisted of 31 steam gun-boats, some of them carrying heavy guns; 11,500 troops, conveyed in 47 transports; a fleet of small vessels for the transportation of sixty days' supplies. It left Hampton Roads on the night of January 11th, and arrived off Hatteras in two days, as a storm was coming on. The commander found with dismay that the draught of several of his ships was too great to permit them to enter. . . . Some dishonest ship-sellers in New York had, by misrepresentation, palmed off on the government unsuitable transport vessels, of which several were lost in that tempestuous sea. . . . It was only by the greatest exertion and perseverance, and not until a whole fortnight had elapsed, that the entrance to Pamlico Sound was completed. The villainy that led to this delay gave the Confederates ample time for preparation. Not until the end of another week (February 7th) had the reorganized expedition gained the entrance to Croatan Sound, and worked through its shallow, marshy passes. The weather was beautiful by day; there was a bright moonshine at night. The gun-boats found a Confederate fleet drawn up behind the obstructions, across the channel, near Pork Point. They opened fire on the fort at that point. It was returned both from the works and the shipping. Meantime troops were being landed at Ashby's, a small force, which was attempting to resist them, being driven off by the fire of the ships. The debarkation went on, though it was raining heavily and night had set in. It was continued until 10,000 men had been landed on the marsh. Before dark, however, the work at Pork Point had been silenced, and the Confederate fleet had retired to Weir's Point. . . . When day broke, Burnside commenced forcing his way up the island. He moved in three columns, the central one, preceded by a howitzer battery, upon the only road, the right and left through the woods. The battery that obstructed this road was soon carried, though not without resistance. The men had to wade waist-deep in the water of the pond that protected it. . . . Toward Nag's Head the Confederate force, expelled from the captured work, attempted to retreat. They were, however, overtaken, and the rest of the command on the north of the island, 2,500 strong, was compelled to surrender. The Confederate fleet was pursued to Elizabeth City, whither it had fled, and there destroyed. A large part of the town was burned. A portion of the national fleet went into the harbor of Edenton and captured that town. Winton, on the Chowan River, shared the same fate. Burnside next made an attack (March 14th) on Newbern, one of the most important sea-ports of North Carolina. As the troops advanced from the place of landing, the gun-boats shelled the woods in front of them, and thereby cleared the way. A march of 18 miles in a rain-storm, and over execrable roads, did not damp the energy of the soldiers. . . . Newbern was captured, and with it 46 heavy guns, 3 batteries of light artillery, and a large amount of stores. Burnside's losses were 90 killed and 466 wounded. Preparations were next made for the reduction of Fort Macon, which commands the entrance of Beaufort Harbor. On April 25th it was bombarded by three steamers and three shore batteries; the former, however, in the course of an hour and a half, were compelled to withdraw. But the shore batteries, continuing their attack, silenced the guns of the garrison, and, in the course of the afternoon, compelled the surrender of the fort. In connection with this expedition some operations of minor importance occurred. . . . The chief result, however, was the closure of the ports and suppression of commerce. General Burnside's forces were eventually, for the most part, withdrawn. They were taken to Alexandria, and joined the army of General Pope."— J. W. Draper, *Hist. of the Am. Civil War, ch.* 59 (*v.* 2).

Also in: D. Ammen, *The Navy in the Civil War: The Atlantic Coast, ch.* 8–9.—A. Woodbury, *Burnside and the 9th Army Corps, pt.* 1, *ch.* 3–5.—B. P. Poore, *Life of Burnside, ch.* 12–14.

A. D. 1862 (February — April: Georgia — Florida).—Siege and capture of Fort Pulaski. — Temporary occupation of Florida. — Discouragement of Unionists.— The blockade of Fort Pulaski may be dated from the 22d of February. Preparations were then made on Tybee

Island to bombard it. The most of the work had to be done in the night. The work was carried on under the supervision of General Gillmore, who was in chief command, and on the 9th of April eleven batteries, containing an aggregate of 36 guns, were in readiness to open fire. General David Hunter, who had just succeeded General Sherman in command of the Department, arrived at Tybee on the evening of the 8th. At sunrise, on the morning of the 10th, Hunter sent Lieutenant J. H. Wilson to the fort, with a summons to the commander of the garrison to surrender. The latter refused, saying: "I am here to defend this fort, not to surrender it." At a few minutes after eight o'clock the batteries opened fire, and at the end of thirty hours the garrison surrendered. In reporting the capture, General Hunter wrote: "At the end of eighteen hours' firing the fort was breached in the southeast angle, and at the moment of surrender, 2 p. m. on the 11th instant, we had commenced preparations for storming. The whole armament of the fort—47 guns, a great supply of fixed ammunition, 40,000 pounds of powder, and large quantities of commissary stores, have fallen into our hands; also 360 prisoners, of whom the officers will be sent North by the first opportunity that offers. The result of this bombardment must cause, I am convinced, a change in the construction of fortifications as radical as that foreshadowed in naval architecture by the conflict between the Monitor and Merrimac. No works of stone or brick can resist the impact of rifled artillery of heavy caliber." General Benham, immediately commanding the operations, remarked in his report: "This siege is . . . the first trial, at least on our side of the Atlantic, of the modern heavy and rifled projectiles against forts erected and supposed to be sufficiently strong prior to these inventions, almost equaling, as it would appear, the revolution accomplished in naval warfare by the iron-clad vessels recently constructed." Captain (acting Brigadier-General) Q. A. Gillmore, the officer immediately in charge of the works on Tybee Island, has given, in a report made in 1865 to the Adjutant-General of the U. S. A., an account of the difficulties under which the batteries which performed the chief part in the siege were erected: "Tybee Island is mostly a mud marsh, like other marsh islands on this coast. Several ridges and hummocks of firm ground, however, exist upon it, and the shore of Tybee Roads, where the batteries were located, is partially skirted by low sand banks, formed by the gradual and protracted action of the wind and tides. The distance along this shore from the landing place to the advanced batteries is about 2½ miles. The last mile of this route, on which the seven most advanced batteries were placed, is low and marshy, lies in full view of Fort Pulaski, and is within effective range of its guns. The construction of a causeway resting on fascines and brush-wood over this swampy portion of the line; the erection of the several batteries, with the magazines, gun platforms, and splinter-proof shelters; the transportation of the heaviest ordnance in our service by the labor of men alone; the hauling of ordnance stores and engineer supplies, and the mounting of the guns and mortars on their carriages and beds had to be done almost exclusively at night, alike regardless of the inclemency of the weather and of the miasma from the swamps. No one except an eye-witness can form any but a faint conception of the herculean labor by which mortars of 8½ tons' weight and columbiads but a trifle lighter were moved in the dead of night over a narrow causeway, bordered by swamps on either side, and liable at any moment to be overturned and buried in the mud beyond reach. The stratum of mud is about 12 feet deep, and on several occasions the heaviest pieces, particularly the mortars, became detached from the sling-carts, and were with great difficulty, by the use of planks and skids, kept from sinking to the bottom. Two hundred and fifty men were barely sufficient to move a single piece on sling-carts. The men were not allowed to speak above a whisper, and were guided by the notes of a whistle. The positions selected for the five most advanced batteries were artificially screened from view from the fort by a gradual and almost imperceptible change, made little by little every night, in the condition and appearance of the brush-wood and bushes in front of them. No sudden alteration of the outline of the landscape was permitted. After the concealment was once perfected to such a degree as to afford a good and safe parapet behind it less care was taken, and some of the work in the batteries requiring mechanical skill was done in the daytime, the fatigue parties going to their labor before break of day and returning in the evening after dark. . . . The three breaching batteries—Sigel, Scott, and McClellan—were established at a mean distance of 1,700 yards from the scarp walls of Fort Pulaski. The circumstance, altogether new in the annals of sieges, that a practicable breach, which compelled the surrender of the work, was made at that distance in a wall 7½ feet thick, standing obliquely to the line of fire and backed by heavy casemate piers and arches, cannot be ignored by a simple reference to the time-honored military maxims that 'Forts cannot sustain a vigorous land attack,' and that 'All masonry should be covered from land batteries.'" —*Official Records, series* 1, *v.* 6, *pp.* 134–135, 155, 161.—"By this victory, won on the first anniversary of the fall of Fort Sumter [April 12], the port of Savannah was sealed against blockade-runners. The capture of Fort Jackson above, and of the city, would have been of little advantage to the Nationals then, for the forces necessary to hold them were needed in more important work farther down the coast. While Gillmore and Viele were besieging Fort Pulaski, Commodore Dupont and General Wright were making easy conquests on the coast of Florida." Fort Clinch, on Amelia Island, Fernandina, Jacksonville, St. Augustine, and other places, were abandoned by the Rebels on the approach of the National forces. But these conquests proved rather unfortunate than otherwise. "At first, the hopes they inspired in the breasts of the Union people developed quite a widespread loyalty. A Union convention was called to assemble at Jacksonville on the 10th of April, to organize a loyal State Government, when, to the dismay of those engaged in the matter, General Wright prepared to withdraw his forces, two days before the time when the convention was to meet. . . . In consequence, . . . very little Union feeling was manifested in Florida during the remainder of the war."—B. J. Lossing. *Field Book of the Civil War, v.* 2, *ch.* 12.

A. D. 1862 (February—April: Tennessee). —The advance up River.—Battle of Shiloh, or Pittsburg Landing.—"By the end of February, 1862, Major-General Halleck commanded all the armies in the valley of the Mississippi, from his headquarters in St. Louis. These were, the Army of the Ohio, Major-General Buell, in Kentucky; the Army of the Tennessee, Major-General Grant, at Forts Henry and Donelson; the Army of the Mississippi, Major-General Pope; and that of General S. R. Curtis, in Southwest Missouri. He posted his chief of staff, General Cullum, at Cairo, and me [General Sherman] at Paducah, chiefly to expedite and facilitate the important operations then in progress up the Tennessee and Cumberland Rivers. . . . General Buell had also followed up the rebel army, which had retreated hastily from Bowling Green to and through Nashville, a city of so much importance to the South that it was at one time proposed as its capital. Both Generals Grant and Buell looked to its capture as an event of great importance. On the 21st General Grant sent General Smith with his division to Clarksville, 50 miles above Donelson, toward Nashville, and on the 27th went himself to Nashville to meet and confer with General Buell, but returned to Donelson the next day." Orders sent by General Halleck to Grant did not reach the latter, and a supposed disobedience occurred which caused him to be hastily relieved from his command, which was transferred to General C. F. Smith, on the 4th of March. Halleck's purpose "was evidently to operate up the Tennessee River, to break up Bear Creek Bridge and the railroad communications between the Mississippi and Tennessee Rivers, and no doubt he was provoked that Generals Grant and Smith had turned aside to Nashville. In the mean time several of the gunboats, under Captain Phelps, United States Navy, had gone up the Tennessee as far as Florence, and on their return had reported a strong Union feeling among the people along the river. On the 10th of March, having received the necessary orders from General Halleck, I embarked my division at Paducah. . . . I . . . steamed up the Tennessee River, following the two gunboats, and, in passing Pittsburg Landing, was told by Captain Gwin that, on his former trip up the river, he had found a rebel regiment of cavalry posted there, and that it was the usual landing-place for the people about Corinth, distant 30 miles. I sent word back to General Smith that, if we were detained up the river, he ought to post some troops at Pittsburg Landing. We went on up the river cautiously, till we saw Eastport and Chickasaw, both of which were occupied by rebel batteries and a small rebel force of infantry. We then dropped back quietly to the mouth of Yellow River, a few miles below," where the troops were landed and an attempt made to push out and destroy the Memphis and Charleston railroad; but heavy rains had so swollen all the streams that the expedition was foiled and returned. "Once more embarked, I concluded to drop down to Pittsburg Landing, and to make the attempt from there. During the night of the 14th, we dropped down to Pittsburg Landing, where I found Hurlbut's division in boats. Leaving my command there, I steamed down to Savannah, and reported to General Smith in person, who saw in the flooded Tennessee the full truth of my report; and he then instructed me to disembark my own division, and that of General Hurlbut, at Pittsburg Landing; to take positions well back, and to leave room for his whole army; telling me that he would soon come up in person, and move out in force to make the lodgment on the railroad, contemplated by General Halleck's orders. . . . Within a few days, Prentiss's division arrived and camped on my left, and afterward McClernand's and W. H. L. Wallace's divisions, which formed a line to our rear. Lew Wallace's division remained on the north side of Snake Creek, on a road leading from Savannah or Crump's Landing to Purdy. General C. F. Smith remained back at Savannah, in chief command, and I was only responsible for my own division. I kept pickets well out on the roads, and made myself familiar with all the ground inside and outside my lines. . . . We were all conscious that the enemy was collecting at Corinth, but in what force we could not know, nor did we know what was going on behind us. On the 17th of March, General U. S. Grant was restored to the command of all the troops up the Tennessee River, by reason of General Smith's extreme illness, and because he had explained to General Halleck satisfactorily his conduct after Donelson; and he too made his headquarters at Savannah, but frequently visited our camps. . . . From about the 1st of April we were conscious that the rebel cavalry in our front was getting bolder and more saucy. . . . On Sunday morning, the 6th, early, there was a good deal of picket-firing, and I got breakfast, rode out along my lines, . . . and saw the rebel lines of battle in front coming down on us as far as the eye could reach. All my troops were in line of battle, ready, and the ground was favorable to us. . . . In a few minutes the battle of 'Shiloh' began with extreme fury, and lasted two days. . . . Probably no single battle of the war gave rise to such wild and damaging reports. It was publicly asserted at the North that our army was taken completely by surprise; that the rebels caught us in our tents; bayoneted the men in their beds; that General Grant was drunk; that Buell's opportune arrival saved the Army of the Tennessee from utter annihilation, etc. These reports were in a measure sustained by the published opinions of Generals Buell, Nelson, and others, who had reached the steamboat-landing from the east, just before nightfall of the 6th, when there was a large crowd of frightened, stampeded men, who clamored and declared that our army was all destroyed and beaten. Personally I saw General Grant, who with his staff visited me about 10 A. M. of the 6th, when we were desperately engaged. But we had checked the headlong assault of our enemy, and then held our ground. This gave him great satisfaction, and he told me that things did not look as well over on the left. . . . He came again just before dark, and described the last assault made by the rebels at the ravine, near the steamboat-landing, which he had repelled by a heavy battery collected under Colonel J. D. Webster and other officers, and he was convinced that the battle was over for that day. He ordered me to be ready to assume the offensive in the morning, saying that, as he had observed at Fort Donelson at the crisis of the battle, both sides seemed defeated, and whoever assumed the offensive was sure to win. General

Grant also explained to me that General Buell had reached the bank of the Tennessee River opposite Pittsburg Landing, and was in the act of ferrying his troops across at the time he was speaking to me. About half an hour afterward General Buell himself rode up to where I was. . . . Buell said that Nelson's, McCook's, and Crittenden's divisions of his army, containing 18,000 men, had arrived and could cross over in the night, and be ready for the next day's battle. I argued that with these reënforcements we could sweep the field. Buell seemed to mistrust us, and repeatedly said that he did not like the looks of things, especially about the boat-landing, and I really feared he would not cross over his army that night, lest he should become involved in our general disaster. . . . Buell did cross over that night, and the next day we assumed the offensive and swept the field, thus gaining the battle decisively. Nevertheless, the controversy was started and kept up, mostly to the personal prejudice of General Grant, who as usual maintained an imperturbable silence. . . . Beauregard [who took the rebel command after General Albert Sidney Johnston fell in the first day's battle] afterward reported his entire loss as 10,699. Our aggregate loss, made up from official statements, shows 1,700 killed, 7,495 wounded, 3,022 prisoners; aggregate, 12,217, of which 2,167 were in Buell's army, leaving for that of Grant 10,050. This result is a fair measure of the amount of fighting done by each army. . . . The battle of Shiloh, or Pittsburg Landing, was one of the most fiercely contested of the war. On the morning of April 6, 1862, the five divisions of McClernand, Prentiss, Hurlbut, W. H. L. Wallace, and Sherman, aggregated about 32,000 men. We had no intrenchments of any sort, on the theory that as soon as Buell arrived we would march to Corinth to attack the enemy. The rebel army, commanded by General Albert Sidney Johnston, was, according to their own reports and admissions, 45,000 strong."—W. T. Sherman, *Memoirs, 4th ed., ch.* 10 (*v.* 1); *or* 1*st ed., ch.* 9 (*v.* 1).

A. D. 1862 (March).—President Lincoln's proposal of Compensated Emancipation approved by Congress.—On the 6th of March President Lincoln addressed to Congress the following Special Message: "Fellow-citizens of the Senate and House of Representatives: I recommend the adoption of a joint resolution by your honorable bodies, which shall be substantially as follows: Resolved, That the United States ought to coöperate with any State which may adopt gradual abolishment of slavery, giving to such State pecuniary aid, to be used by such State, in its discretion, to compensate for the inconveniences, public and private, produced by such change of system. If the proposition contained in the resolution does not meet the approval of Congress and the country, there is the end; but if it does command such approval, I deem it of importance that the States and people immediately interested should be at once distinctly notified of the fact, so that they may begin to consider whether to accept or reject it. The Federal Government would find its highest interest in such a measure, as one of the most efficient means of self-preservation. The leaders of the existing insurrection entertain the hope that this government will ultimately be forced to acknowledge the independence of some part of the disaffected region, and that all the slave States north of such part will then say, 'The Union for which we have struggled being already gone, we now choose to go with the Southern section.' To deprive them of this hope substantially ends the rebellion; and the initiation of emancipation completely deprives them of it as to all the States initiating it. The point is not that all the States tolerating slavery would very soon, if at all, initiate emancipation; but that while the offer is equally made to all, the more Northern shall, by such initiation, make it certain to the more Southern that in no event will the former ever join the latter in their proposed confederacy. I say 'initiation' because, in my judgment, gradual and not sudden emancipation is better for all. In the mere financial or pecuniary view, any member of Congress, with the census tables and treasury reports before him, can readily see for himself how very soon the current expenditures of this war would purchase, at fair valuation, all the slaves in any named State. Such a proposition on the part of the General Government sets up no claim of a right by Federal authority to interfere with slavery within State limits, referring, as it does, the absolute control of the subject in each case to the State and its people immediately interested. It is proposed as a matter of perfectly free choice with them. In the annual message, last December, I thought fit to say, 'The Union must be preserved, and hence all indispensable means must be employed.' I said this not hastily, but deliberately. War has been made, and continues to be, an indispensable means to this end. A practical reacknowledgment of the national authority would render the war unnecessary, and it would at once cease. If, however, resistance continues, the war must also continue; and it is impossible to foresee all the incidents which may attend and all the ruin which may follow it. Such as may seem indispensable, or may obviously promise great efficiency, toward ending the struggle, must and will come. The proposition now made, though an offer only, I hope it may be esteemed no offense to ask whether the pecuniary consideration tendered would not be of more value to the States and private persons concerned than are the institution and property in it, in the present aspect of affairs? While it is true that the adoption of the proposed resolution would be merely initiatory, and not within itself a practical measure, it is recommended in the hope that it would soon lead to important practical results. In full view of my great responsibility to my God and to my country, I earnestly beg the attention of Congress and the people to the subject. Abraham Lincoln, Washington, March 6, 1862."—*Abraham Lincoln, Complete Works, v.* 2, *pp.* 129–130.—"Mr. Stevens, of Pa., having moved and carried a reference of this Message by the House to a Committee of the Whole on the State of the Union, and Mr. R. Conkling, of N. Y., having moved the resolve above recommended, a debate sprung up thereon; which is notable only as developing the repugnance of

the Unionists of the Border Slave States, with that of the Democrats of all the States, to compensated or any other Emancipation. . . . It passed the House by 89 Yeas (Republicans, West Virginians, and a few others not strictly partisans) to 31 Nays." On the 2d of April, the resolution passed the Senate, by 32 Yeas to 10 Nays. "The President of course approved the measure; but no single Slave State ever claimed its benefits; and its only use inhered in its demonstration of the willingness of the Unionists to increase their already heavy burdens to pay for the slaves of the Border States — a willingness which the infatuation of the ruling class in those States rendered abortive."—H. Greeley, *The American Conflict, v. 2, ch. 12.*

A. D. 1862 (March).—The Battle of the Monitor and the Merrimac.—"In August 1861 the Northern States had determined to obtain ironclad steam vessels, and at the end of that month Ericsson offered to construct in a few months a vessel which would destroy the rebel squadron. A board of officers was appointed to consider plans proposed, and in September it recommended that a vessel on Ericsson's design should be built. She was commenced in October, launched on January 30th, 1862, and completed on February 15th, 1862. The design provided for a hull not more than 2 ft. above the water, and with a flat bottom, that the draught might not exceed 10 ft. The sides, to a short distance below the water line, were protected with 4-in. plates. In the centre of the deck was built a circular turret, revolving on a central spindle, and protected with 8 in. of iron. Inside the turret were mounted two 11-in. smooth bore guns, pointing through port holes. They could thus fire in any direction without turning the vessel, an obvious advantage not only on the open sea but especially in narrow waters, for which she was more intended. Such was the famous 'Monitor,' a name given by Ericsson to his creation to admonish the leaders of the Southern Rebellion, and to be also a monitor to the Lords of the Admiralty in England, suggesting to them doubts as to the propriety of their building four broadside ironclads at three and a half million dollars each."—S. Eardley-Wilmot, *The Development of Navies, ch. 4.*—"While the Secretary of the Navy was urging forward the construction of the first iron-clads, it was known that the rebel government was making great exertions in the same direction. Ironclad vessels were under way at New Orleans, Charleston, and at some other points, while at Norfolk the Merrimack [the old frigate of that name, roofed slopingly with railroad iron, — see above: 1861 (April) Activity of Rebellion] was very near completion in the winter of 1861-62. The formidable character of this mailed frigate constrained the Government to make every effort to complete the Monitor [the first of the turreted iron-clads, invented by John C. Ericsson] in season to meet her whenever she should come out; and it is stated that information obtained by a rebel spy of the state of forwardness in which the Monitor was, induced the rebels to put a double force upon their frigate, so that she might be able to attack our fleet in Hampton Roads before the Monitor's arrival, and, if possible, also to make a raid upon Washington or the Northern cities. This extra labor, it is said, gained the one day in which the Merrimack destroyed the Cumberland and Congress. . . . The Monitor, commanded by Lieutenant John L. Worden, reached the scene of late disaster to our cause, and of her coming triumph, on the 8th of March, at 9 o'clock P. M., and Lieutenant Worden reported for orders to Captain Marston, the commander of the Roanoke. The Minnesota, one of our noblest frigates, the Roanoke of the same class, but partially disabled, the frigate Congress, and the sloop Cumberland, had been stationed at the mouth of the James River to watch for, to engage, and, if possible, destroy, capture, or stop the expected rebel iron-clad frigate then ready for sea at Norfolk. These vessels carried very heavy batteries, and it was hoped that they would be able to cope with the Merrimack. How vain such an expectation was, her first day's operations fully and sadly demonstrated. It is probably no exaggeration to say that she would have destroyed easily, and without any material damage to herself, every wooden ship then in our Navy, had they been within her reach, and with none but themselves to oppose her."—C. B. Boynton, *Hist. of the Navy during the Rebellion, ch. 21.*—"Such was the state of affairs when the Monitor arrived at Hampton Roads, that the sturdy commanders trembled in face of the coming day, and all was silence and gloom. The sloop-of-war Cumberland, having a crew of 300 men, and mounting 24 guns, now lay on the bottom with only her top-gallant masts and pennant above the water, marking the spot where 117 mangled bodies lay buried beneath the waves. The Congress, a 50-gun frigate, had also met her destruction, and now lay on shore with the flames kindled by hot shot of the Merrimac sweeping out her hull. The Roanoke and Minnesota, steam frigates of 40 guns each, the pride of the navy and the most perfect of any men-of-war of the period, laid hard and fast on shore, with broken machinery and as powerless as if they had been unarmed. The capture or entire destruction of the Federal fleet at Hampton Roads and the escape of the Merrimac and the rebel cruisers seemed inevitable." Arriving in the evening of the 8th, the Monitor anchored near the frigate Minnesota at Newport News. "At half-past five in the morning all hands were called, and the ship was immediately cleared of her sea-rig and got ready for battle. . . . At half-past seven o'clock a long line of black smoke was seen, preceded by the steamers Jamestown, Patrick Henry and Teazer. It was the signal for battle. The crews of the different vessels stood by their guns, fuzes in hands. The Monitor steamed slowly from beneath the bows of the Minnesota, where she had been partly concealed, to meet the challenger in an open field. It was alike an astonishment to the rebels and our own people; neither had seen her when she arrived, and many were the conjectures of what it could be. Some said a huge water tank; others an infernal machine; none that she had guns, and not till they saw steam rise from her deck did they think she had power to move herself. . . . The Merrimac stopped her engines, as if to survey and wonder at the audacity of the nondescript. The Monitor was approaching on her starboard bow. Then, as if seized with impulsive rage, and as if a huge breath would waft

her enemy away, the Merrimac poured a broadside of solid shot at her. For an instant she was enveloped in smoke, and people who were looking on held their breath in doubt of seeing the Monitor again. It was a moment of great suspense. Then as a gentle breeze swept over the scene the Monitor appeared. At this instant the flash of her own guns was seen, and then their report, louder than any cannon that had ever been heard, thundered across the sea. It seemed to jar the very earth, and the iron scales of the invincible crumbled and cracked from their fastenings. One on board the Merrimac at this time has told me that, though at first entirely confident of victory, consternation took hold of them all. 'D—n it!' said one, 'the thing is full of guns!' The enthusiasm at this moment among the thousand of civilians and soldiers, who lined the shore to witness the fight, was beyond description and their own control. Such a spontaneous burst of cheers was never before heard. Men were frantic with joy. The Monitor continued her approach, reserving fire that every shot might take effect, until she came parallel with the Merrimac, but heading in the opposite direction. In this way they passed slowly within a few yards of each other, both delivering and receiving the other's fire. . . . Captain Worden headed again towards the Merrimac with renewed confidence and engaged her at close quarters. Again they joined in close combat, the Monitor lying bow on, at times touching, both delivering their fire as rapidly as possible. At the same time the marines on the Merrimac poured an incessant fire of musketry at the peek-holes about the pilot-house and turret. The speed of the two vessels was about equal, but the light draught of the Monitor gave her an advantage. The rebels finding that they could make nothing of the invulnerable cheese-box, as they called her, and foiled and maddened at the loss of their coveted prize, turned towards the Minnesota, determined, if possible, to destroy her. The Merrimac went head on and received a full broadside of the Minnesota. Fifty solid nine-inch shot struck square. Any wooden vessel that ever floated would have gone to pieces under such a fire. The Merrimac was unharmed. She returned the fire with her forward rifle guns. One shell passed through four rooms, tearing away partitions and setting the ship on fire. Another passed through the boiler of the steamer Dragon which lay alongside, blowing her up and killing and wounding 17 men. Before a third was fired the Monitor interposed, compelling the Merrimac to change her position. The two combatants then made a complete circle in their endeavors to get a favorable position, each seeking to discharge a broadside into some vital part. The Merrimac then turned sharp and made a plunge towards the Minnesota, but Worden was vigilant, and crossed the stern of the Merrimac, sending two solid shot into her. To get back again between her and the Minnesota, the Monitor had almost to cross her bow. The Merrimac steamed up quickly, and finding that the Monitor would be struck with her prow Worden sheered towards the enemy's stern, avoiding a direct blow, and, as they came into collision, each vessel delivered a broadside into the other. At this point a shell from the Merrimac struck the pilot-house exactly over the peek-hole through which Captain Worden was looking. The shell exploding, filled his face and eyes with powder and fragments of iron, utterly blinding and for a time rendering him unconscious. Lieutenant Greene, who had been in charge of the turret division, immediately left the guns and spent full thirty minutes nursing the wounded commander, during which time the gunners shotted the guns, and, as the Merrimac was turning away, discharged them at close range into her stern, a blow that made her whole frame shudder and seemed at once to be fatal. There was no officer to direct the movements of the vessel except the pilot Howard. As the two combatants parted from the struggle they were headed in opposite directions, both away from their goal. Presuming that the fight would be continued, Pilot Howard ran the vessel a short distance down the channel and turning brought her again close to the protection of the Minnesota, when Lieutenant Greene stepped into the pilot-house and assumed command. It was then observed that the Merrimac had taken the channel and was heading towards Norfolk. She was soon joined by her consorts, and taken up to their refuge under the batteries of Craney Island, the Merrimac apparently sagging down astern. Thus ended the greatest naval battle of the world. . . . The only perceptible danger to those on board the Monitor, after the first round from the Merrimac, was to those in the turret, who were in great danger from the flying of bolt-heads driven with great force across the turret, and from the concussion, which would for a time paralyze a man if he should in any way be in contact with the turret when struck by a shot."—F. B. Butts, *The Monitor and the Merrimac* (*Soldiers' and Sailors' Hist. Soc. of R. I., Fourth series, No.* 6).—"The engagement in Hampton Roads on the 8th of March, 1862, between the Confederate iron-clad Virginia, or the Merrimac, as she is known at the North, and the United States wooden fleet, and that on the 9th, between the Virginia and the Monitor, was, in its results, in some respects the most momentous naval conflict ever witnessed. No battle was ever more widely discussed or produced a greater sensation. It revolutionized the navies of the world. . . . Rams and iron-clads were in future to decide all naval warfare. In this battle old things passed away, and the experience of a thousand years of battle and breeze was forgotten. The naval supremacy of England vanished in the smoke of this fight, only to reappear some years later more commanding than ever. The effect of the news was best described by the London 'Times,' which said: 'Whereas we had available for immediate purposes 149 first-class war-ships: we have now two, these two being the Warrior and her sister Ironside. There is not now a ship in the English navy apart from these two that it would not be madness to trust to an engagement with that little Monitor.' The Admiralty at once proceeded to reconstruct the navy. . . . The same results were produced in France, which had but one sea-going iron-clad, La Gloire, and this one, like the Warrior, was only protected amidships. . . . And so with all the maritime powers. In this race the United States took the lead, and at the close of the war led all the others in the numbers and efficiency of its iron-clad fleet. . . . Our loss [that is, the Confederate loss on the Virginia, or Merrimac, in the first day's battle, with the wooden ships] in killed and wounded was 21. The armor was hardly damaged, though at one

time our ship was the focus on which were directed at least 100 heavy guns afloat and ashore. But nothing outside escaped. . . . We slept at our guns, dreaming of other victories in the morning. But at daybreak we discovered, lying between us and the Minnesota, a strange-looking craft, which we knew at once to be Ericsson's Monitor, which had long been expected in Hampton Roads, and of which, from different sources, we had a good idea. She could not possibly have made her appearance at a more inopportune time for us, changing our plans, which were to destroy the Minnesota, and then the remainder of the fleet below Fortress Monroe. She appeared but a pigmy compared with the lofty frigate which she guarded. But in her size was one great element of her success. . . . After an early breakfast, we got under way and steamed out toward the enemy, opening fire from our bow pivot, and closing in to deliver our starboard broadside at short range, which was returned promptly from her 11-inch guns. Both vessels then turned and passed again still closer. The Monitor was firing every seven or eight minutes, and nearly every shot struck. Our ship was working worse and worse, and after the loss of the smoke-stack, Mr. Ramsay, chief engineer, reported that the draught was so poor that it was with great difficulty he could keep up steam. Once or twice the ship was on the bottom. Drawing 22 feet of water, we were confined to a narrow channel, while the Monitor, with only 12 feet immersion, could take any position, and always have us in range of her guns. . . . Several times the Monitor ceased firing, and we were in hopes she was disabled, but the revolution again of her turret and the heavy blows of her 11-inch shot on our sides soon undeceived us. . . . Lieutenant Jones now determined to run her down or board her. For nearly an hour we manœuvred for a position. . . . The ship was as unwieldy as Noah's Ark. . . . And so, for six or more hours, the struggle was kept up. At length, the Monitor withdrew over the middle ground where we could not follow. . . . The battle was a drawn one, so far as the two vessels engaged were concerned. But in its general results the advantage was with the Monitor." —J. T. Wood, *The First Fight of Iron Clads* (*Battles and Leaders of the Civil War, v.* 1, *pp.* 692–711).

Church, *Life of John Ericsson, ch.* 15–18 (*v.* 1).—Gideon Welles, *The First Iron-Clad Monitor* (*Annals of the War by leading Participants*), *p.* 17.—C. B. Boynton, *Hist. of the Navy during the Rebellion, ch.* 21.— On the evacuation of Norfolk by the Confederates, in May, 1862, the Merrimac was destroyed. The following December the Monitor went down in a storm at sea, while on her way to Charleston, and only a few of her crew were saved.

A. D. 1862 (March).—Amendment of the Military Code.—Officers forbidden to surrender fugitive Slaves.—"As the formal orders of the government regarding the treatment of slaves who sought refuge near the armies were not always executed, Congress determined to give them a legal sanction; and on the 25th of February and the 13th of March both the Senate and the House of Representatives introduced a new article in the military code, prohibiting officers, at the risk of dismissal, from interfering to restore fugitive slaves to their masters. Notwithstanding the powers with which the government was thus armed, great difficulty was experienced in applying this law in those regiments whose commanders openly professed their sympathies in favor of slavery."— Comte de Paris, *Hist. of the Civil War in Am., v.* 2, *p.* 733.

A. D. 1862 (March—April: On the Mississippi).—New Madrid and Island No. 10.— On the surrender of Fort Donelson to General Grant, Columbus, on the Mississippi, was hastily abandoned by the rebels, who fell back to Island Number Ten, thirty miles below, where strong works had been erected. These it was hoped would command the passage of the river. "Following the course of the Mississippi, this island is about ten miles above New Madrid, Missouri, which is 79 miles below Cairo; but on account of a long bend in the river . . . the island is really further south than New Madrid. New Madrid is at the most northerly part of the bend, and its guns were so placed as to be able to fire at vessels coming either way. Besides Fort Thompson, named after Jeff Thompson, it was defended by several batteries and by six gunboats, mounting heavy guns, which had come up the river from New Orleans and were under the command of Commodore Hollins. . . . As the land around New Madrid is very flat, these gunboats could fire upon troops approaching the place by land. On the same day when the flag of the Union was hoisted over the deserted works of the Confederates at Columbus [March 4], a Union army under General John Pope, who had been commanding in eastern Missouri, appeared before New Madrid. Seeing that he could do but little with his field artillery, he sent to Cairo for heavy guns; and while waiting for these he built a battery at Point Pleasant, about ten miles below New Madrid, so as to blockade the river at that place and prevent supplies from being sent up to the town. Meanwhile the Confederates strengthened their works and reinforced the garrison with men from Island Number Ten, while their fleet of gunboats was increased to nine. Four heavy guns were sent from Bird's Point to General Pope by the Cairo and Fulton Railway, which brought them within 20 miles of where they were wanted. . . . On the night of March 12 a thousand spades were at work within half a mile of Fort Thompson, and at daylight the guns were in position ready for action. Pope opened a cannonade at once on the gunboats and on Fort Thompson, both of which replied vigorously. The fight raged all day long; several of the gunboats were disabled and the Union army was gradually shutting in the Confederates on the land side, when their commander, General McCown, seeing the danger of capture, left the place in the night, during a heavy thunder-storm, and removed all his troops to Island Number Ten. . . . General Pope lost 51 men in killed and wounded during the day's bombardment; the loss of the Confederates is not known, but is thought to have been more than a hundred. About the time of the capture of New Madrid, Commodore Foote sailed from Cairo with a fleet of seven iron-clad gunboats, one wooden gunboat, and ten mortar-boats, for the purpose of aiding General Pope in the attack on Island Number Ten. He came in sight of the island on Saturday, March 15, and on the next morning opened the bombardment with the

rifled guns of the Benton, his flag-ship. The mortar-boats, moored at convenient places along the shore, soon took part in the firing, and rained bombs into the Confederate works. . . . Commodore Foote kept up the bombardment for many days, without doing much damage to the Confederate works. But while he kept the enemy busy, General Pope had been engaged in digging a canal across the swampy peninsula formed by the bend of the river, so that vessels could go through to New Madrid without having to pass Island Number Ten. . . . A large number of men were employed, and after nineteen days of hard labor a channel deep enough for light-draught vessels was cut through. In the night of April 1 a few men from the gunboats, aided by some of Pope's soldiers, landed on the Kentucky shore, opposite Island Number Ten, took one of the batteries by surprise and spiked its six guns. . . . A few nights afterward the Carondelet [gunboat] ran safely by all the batteries at midnight, during a heavy thunderstorm. . . . Two nights afterward the Pittsburgh, another gunboat, performed the same feat, with the same good fortune; and a few days later the Confederates were astonished to see a fleet of transports laden with troops and several floating batteries join the gunboats at New Madrid. . . . The gunboats soon silenced the one-gun batteries on the opposite side of the river below New Madrid," and the Confederates, attempting to escape, were intercepted and captured (April 7), both those on the mainland and those on the Island.—J. D. Champlin, Jr., *Young Folks' Hist. of the War for the Union, ch.* 16.—Said General Pope in his report: "It is almost impossible to give a correct account of the immense quantity of artillery, ammunition, and supplies of every description which fell into our hands. Three generals, 273 field and company officers, 6,700 privates, 123 pieces of heavy artillery, 35 pieces of field artillery (all of the very best character and latest patterns), 7,000 stand of small-arms, tents for 12,000 men, several wharf-boat loads of provisions, an immense quantity of ammunition of all kinds, many hundred horses and mules, with wagons and harness, &c., are among the spoils. Very few, if any, of the enemy escaped, and only by wading and swimming through the swamps. The conduct of the troops was splendid throughout, as the results of this operation and its whole progress very plainly indicate. We have crossed this great river, the banks of which were lined with batteries and defended by 7,000 men. We have pursued and captured the whole force of the enemy and all his supplies and material of war, and have again recrossed and reoccupied the camps at New Madrid, without losing a man or meeting with any accident. Such results bespeak efficiency, good conduct, high discipline, and soldierly deportment of the best character far more conclusively than they can be exhibited in pitched battle or the storming of fortified places."—*Official Records, series* 1, *v.* 8.—"In the years since 1862, Island No. 10 . . . has disappeared. The river, constantly wearing at its upper end, has little by little swept away the whole. . . . On the other shore a new No. 10 has risen."—A. T. Mahan, *The Navy in the Civil War: The Gulf and Inland Waters, ch.* 2.

A. D. 1862 (March—May: Virginia).—The Peninsular Campaign.—McClellan before Yorktown.—"When Manassas had been abandoned by the enemy [see above: A. D. 1861–1862 (December—March: Virginia)] and he had withdrawn behind the Rapidan, the Urbana movement lost much of its promise, as the enemy was now in position to reach Richmond before we could do so. The alternative remained of making Fort Monroe and its vicinity the base of operations. The plan first adopted was to commence the movement with the First Corps as a unit, to land north of Gloucester and move thence on West Point; or, should circumstances render it advisable, to land a little below Yorktown to turn the defenses between that place and Fort Monroe. The Navy Department were confident that we could rely upon their vessels to neutralize the Merrimac and aid materially in reducing the batteries on the York River. . . . As transports arrived very slowly, especially those for horses, and the great impatience of the Government grew apace, it became necessary to embark divisions as fast as vessels arrived, and I decided to land them at Fort Monroe, holding the First Corps to the last, still intending to move it in mass to turn Gloucester. On the 17th of March the leading division embarked at Alexandria. The campaign was undertaken with the intention of taking some 145,000 troops, to be increased by a division of 10,000 drawn from the troops in the vicinity of Fort Monroe. . . . On the 12th of March I learned that there had appeared in the daily papers the order relieving me from the general command of all the armies and confining my authority to the Department of the Potomac. I had received no previous intimation of the intention of the Government in this respect. . . . On my arrival at Fort Monroe on the 2d of April, I found five divisions of infantry, Sykes's brigade of regulars, two regiments of cavalry, and a portion of the reserve artillery disembarked. Another cavalry regiment and a part of a fourth had arrived, but were still on shipboard; comparatively few wagons had come. . . . The best information obtainable represented the Confederate troops around Yorktown as numbering at least 15,000, with about an equal force at Norfolk; and it was clear that the army lately at Manassas, now mostly near Gordonsville, was in position to be thrown promptly to the Peninsula. . . . On my arrival at Fort Monroe I learned, in an interview with Flag-Officer Goldsborough, that he could not protect the James as a line of supply, and that he could furnish no vessels to take an active part in the reduction of the batteries at York and Gloucester or to run by and gain their rear. He could only aid in the final attack after our land batteries had essentially silenced their fire. I thus found myself with 53,000 men in condition to move, faced by the conditions of the problem just stated. Information was received that Yorktown was already being reënforced from Norfolk, and it was apprehended that the main Confederate army would promptly follow the same course. I therefore determined to move at once with the force in hand, and endeavor to seize a point—near the Halfway House—between Yorktown and Williamsburg, where the Peninsula is reduced to a narrow neck, and thus cut off the retreat of the Yorktown garrison and prevent the arrival of reënforcements. The advance commenced on the morning of the 4th of April, and was arranged to turn successively the intrench-

ments on the two roads; the result being that, on the afternoon of the 5th, the Third Corps was engaged with the enemy's outposts in front of Yorktown and under the artillery fire of the place. The Fourth Corps came upon Lee's Mills and found it covered by the unfordable line of the Warwick, and reported the position so strong as to render it impossible to execute its orders to assault. Thus all things were brought to a stand-still, and the intended movement on the Halfway House could not be carried out. Just at this moment came a telegram, dated the 4th, informing me that the First Corps [McDowell's] was withdrawn from my command. Thus, when too deeply committed to recede, I found that another reduction of about 43,000 . . . diminished my paper force to 92,000, instead of the 155,000 on which the plans of the campaign had been founded, . . . which reduced the numbers actually available for battle to some 67,000 or 68,000. The order withdrawing the First Corps also broke up the Department of the Potomac, forming out of it the Department of the Shenandoah, under General Banks, and the Department of the Rappahannock, under General McDowell, the latter including Washington. . . . In our front was an intrenched line, apparently too strong for assault, and which I had now no means of turning, either by land or water. . . . Whatever may have been said afterward, no one at the time — so far as my knowledge extended — thought an assault practicable without certain preliminary siege operations. . . . We were thus obliged to resort to siege operations in order to silence the enemy's artillery fire, and open the way to an assault. All the batteries would have been ready to open fire on the 5th, or, at latest, on the morning of the 6th of May; . . . but during the night of the 3d and 4th of May the enemy evacuated his positions. . . . Meanwhile, on the 22d of April, Franklin's division of McDowell's corps had joined me by water, in consequence of my urgent calls for reënforcements . . . [and, May 7th] disembarked near West Point and took up a suitable position to hold its own and cover the landing of reënforcements."—G. B. McClellan, *The Peninsular Campaign* (*Battles and Leaders, v.* 2, *pp.* 160–187). —General Joseph E. Johnston, who assumed command of the Confederate forces on the Peninsula, April 17, says in his "Narrative": "I went to the Peninsula as soon as possible, reaching General Magruder's headquarters early in the morning. . . . That officer had estimated the importance of at least delaying the invaders until an army capable of coping with them could be formed; and opposed them with about a tenth of their number, on a line of which Yorktown, intrenched, made the left flank. This boldness imposed upon the Federal general, and made him halt to besiege instead of assailing the Confederate position. This resolute and judicious course on the part of General Magruder was of incalculable value. It saved Richmond, and gave the Confederate Government time to swell that officer's handful to an army. . . . The arrival of Smith's and Longstreet's divisions increased the army on the Peninsula to about 53,000 men, including 3,000 sick. . . . I could see no other object in holding the position than that of delaying the enemy's progress, to gain time."— J. E. Johnston, *Narrative of Military Operations, ch.* 4–5.

A. D. 1862 (March—June).— Appointment of Military Governors in Tennessee, North Carolina, and Louisiana.— "By the Union victories in the spring of 1862 very considerable areas of territory in States in rebellion came under the control and occupation of the Union armies. . . . The sudden change from Confederate to Federal authority involved everywhere either a serious derangement or total cessation of the ordinary administration of local civil law, and the displacement from the occupied territory of State governments and State officials who claimed to be exercising functions under ordinances of secession, and yielding obedience to the self-styled Confederate States. A similar displacement had occurred in Virginia and in Missouri during the year 1861, but in those States prompt remedies were available," by means of popular movements, through delegated conventions, which abrogated the rebellious and reinstated loyal State governments in operation. The courses pursued in Virginia and Missouri were not practicable, however, in other cases, and "a substitute was found in the appointment of military governors to represent and exert such State and local authority as the anomalous conditions made practicable, and as the supreme military necessities might allow. The first of these appointments occurred in Tennessee. Nashville, the capital, having been evacuated about February 23, 1862, President Lincoln nominated, and the Senate confirmed, Andrew Johnson (March 4, 1862) as military governor with the rank of brigadier-general. . . . Conforming to this precedent, Mr. Lincoln, through the Secretary of War, appointed Edward Stanley military governor of North Carolina, 'with authority to exercise and perform, within the limits of that State, all and singular the powers, duties, and functions pertaining to the office of military governor (including the power to establish all necessary offices and tribunals, and suspend the writ of habeas corpus) during the pleasure of the President, or until the loyal inhabitants of that State shall organize a civil government in conformity with the Constitution of the United States.' . . . In like manner, soon after news was received of the successes in the Gulf, Colonel G. F. Shepley (of the 12th Maine Infantry) of Butler's army was appointed military governor of Louisiana, this selection being made because General Butler had already designated him to act as mayor of the city of New Orleans, and it was thought best to combine both functions in the same individual."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 6, *ch.* 16.

A. D. 1862 (April: On the Mississippi).— Farragut's passage of the lower forts and capture of New Orleans.—"About the close of the gloomy and disastrous year 1861, the Government of the United States determined to regain control of the Mississippi. . . . After long consideration, Farragut was chosen as the naval officer to command in the Gulf. The story of his southern birth, and of his steadfast loyalty to his flag, is too well known to be here repeated. His formal orders put him in command of the 'Western Gulf Blockading Squadron,' and these were issued in January, 1862. But confidential

instructions were also given him, by which he was especially charged with the 'reduction of the defences guarding the approaches to New Orleans, and the taking possession of that city.' He was to be assisted by a mortar-fleet of schooners, under commander D. D. Porter. . . . On February 2d, 1862, Farragut sailed for the Gulf, in the sloop-of-war Hartford, which was so long to bear his flag, successfully, through manifold dangers. The Hartford was a wooden screw-steamer, full ship-rigged, and of 1,900 tons burthen. She was of comparatively light draught, and, therefore, well suited to the service she was called upon to perform. . . . The Hartford arrived at her rendezvous, Ship Island, 100 miles north-northeast of the mouths of the Mississippi, on February 20th. A military force, to co-operate with Farragut's fleet, was sent out, under General B. F. Butler, and arrived at Ship Island on March 25th."—E. Shippen, *Naval Battles, ch.* 41.—"At a point about 30 miles above the head of the passes, where the river makes its last great bend—the lowest favorable locality for defense before reaching the Gulf—the United States Government had erected two forts, St. Philip on the left or north bank, and Jackson a little farther down stream on the right. . . . The Confederate Government had early taken possession of these forts, and put them in complete order. When Farragut's fleet appeared before them, Fort Jackson, with its water battery, mounted 75 guns, and St. Philip about 40. . . . Just above the forts lay a rebel fleet of 15 vessels, under Commodore J. K. Mitchell, including the iron-clad ram Manassas and an immense floating battery covered with railroad iron, called the Louisiana. Just below Fort Jackson the Confederates had obstructed the river with a heavy chain, brought from Pensacola. . . . The task that lay before Farragut was, to break through the obstructions, pass between the forts, conquer the rebel fleet, and then steam up to New Orleans, lay the city under his guns, and demand its surrender. For its accomplishment he had 6 sloops-of-war, 16 gunboats, 21 schooners, each carrying a 13-inch mortar, and 5 other vessels. The fleet carried over 200 guns. . . . The schooners sailed up partly, or were towed by steamers, and on the morning of the 18th of April they had all reached their positions, ready to open fire. . . . For six days and nights the mortars kept up an unremitting fire, mainly on Fort Jackson, throwing nearly 6,000 shells. The Confederates acknowledged a loss of 14 killed and 39 wounded by the bombardment. . . . Farragut's patience was sorely tried by this delay. He had never had much faith in the mortars, and now it was evident, as he had anticipated, that almost the only practical effect of the bombardment was, to give the enemy long warning of the attack by the ships. . . . Having decided to run by the forts, he confided to his trusted Fleet Captain, Bell, the dangerous mission of proceeding with the gunboats Pinola and Itasca to make a passage for his fleet through the chain obstructions. . . . A sufficient opening was made for the fleet to pass through, in spite of the heavy fire to which the party were subjected. . . . Farragut had made up his mind to run by the forts at the close of the fifth day's bombardment; but the necessity of repairing damages to two of his vessels delayed him twenty-four hours longer. He had intended to lead the column in his flag-ship Hartford; but in the final disposition he gave that post to Captain Theodorus Bailey, at his own earnest request, who hoisted his red flag on the gunboat Cayuga. . . . The attempt to pass was to be made in the night, April 23-24; and, as the moon would rise about half past 3 o'clock in the morning, the fleet were warned to expect the signal for sailing at about 2 o'clock. . . . Lieutenant Commanding Caldwell sent up in the Itasca to examine the obstructions and find whether the passage was still open. At 11 o'clock he gave the signal that it was, and about the same time the enemy opened fire on him, sent down burning rafts, and lighted the immense piles of wood which they had prepared on the shore near the ends of the chain. . . . It was half past 3, the hour of moonrise, before all was ready. In the light of the blazing rafts and bonfires, moon or no moon made little difference now. . . . Captain Bailey led off with his division of 8 vessels, whose objective was Fort St. Philip, and all of them passed through the opening in the cable. Both forts opened fire upon his flag-ship, the Cayuga, soon after she had passed the hulks. Five minutes later she was pouring grape and canister into St. Philip, and in ten minutes more she had passed beyond range of that work, to find herself surrounded by 11 rebel gun-boats. Three of them attempted to board her at once. An 11-inch shot was sent through one of them at the close range of 30 yards, and she immediately ran aground and burned up. The Parrott gun on the forecastle drove off another; and Bailey was preparing to close with the third, when the Oneida and Varuna, which had run in close to St. Philip, thus avoiding the elevated guns of the fort, while they swept its bastions with grape and scrapnel, came up to the assistance of the Cayuga. The Oneida ran under full steam into one of the rebel ships, cut her nearly in two, and left her to float down stream a helpless wreck. She fired right and left into the others, and then went to the assistance of the Varuna, which was ashore on the left bank, hard pressed by the Governor Moore and another, said to be the Manassas. The Varuna was rammed by them both, and sank at the end of 15 minutes; but in that time it is claimed that she put three 8-inch shells into the Governor Moore, and so crippled her with solid shot that she surrendered to the Oneida, and drove five 8-inch shells into another, which sent her ashore, Still another of her shells exploded the boiler of a rebel steamer. The Pensacola steamed steadily but slowly by, firing with great deliberation and regularity. . . . The Mississippi was fought regularly in line, like the Pensacola, but escaped with light losses. She encountered the ram Manassas, which gave her a severe cut on the port quarter below the water-line, and disabled her machinery. But she riddled the ram with shot, boarded her, and set her on fire, so that she drifted below the forts and blew up. The Katahdin ran close to the forts, steamed by rapidly, and got near the head of the line, where she put a few good shots into the iron-clad Louisiana. The Kineo ran by close under St. Philip, and then assisted the Mississippi in handling the ram Manassas; but she was afterward attacked by three rebel gunboats at once, and, her pivot-gun carriage becoming injured, she withdrew and continued on up stream. The Wissahickon ran ashore before

she reached the forts, got off, passed them, and above ran ashore again. Most of these operations were carried on in the darkness occasioned by the thick smoke, lighted, however, by the lurid flashes of more than 200 guns. The Hartford, bearing Flag-Officer Farragut, led the second division of the fleet. . . . In attempting to avoid a fire-raft, she grounded on a shoal near St. Philip. At the same time the ram Manassas pushed a raft upon her port quarter, and in an instant she was on fire. A part of the crew went to 'fire quarters' and soon subdued the flames, while the working of her guns was steadily continued, and she was then backed off into deep water. This movement turned the ship's head down stream, and it was with some difficulty that she was turned around against the current; but this was finally accomplished, and she continued to steam up the river, firing into several of the enemy's vessels as she passed. Among these was a steamer full of men, apparently a boarding-party. She was making straight for the Hartford when Captain Broome's gun, manned by marines, planted a shell in her, which exploded, and she disappeared. . . . The Brooklyn got out of her course, ran over one of the hulks, and became entangled in the raft, where she suffered a raking fire from Fort Jackson, and a pretty severe one from St. Philip. Scarcely was she disentangled and on her way up stream when she was butted by the Manassas, which, however, had not headway enough to damage her much, and slid off in the darkness. Then she was attacked by a large rebel steamer, but gave her the port broadside at fifty yards and set her on fire. Groping along through a black cloud of smoke from a fire-raft, she came close abreast of St. Philip, into which she poured such tremendous broadsides that by the flashes the gunners were seen running to shelter, and for the time the fort was silenced. The Brooklyn then passed on, and engaged several of the enemy's gunboats at short range. One of these, the Warrior, came under the port broadside, when eleven 5-second shells were instantly planted in her, all of which exploded, setting her on fire, and she was run ashore. The Brooklyn was under fire an hour and a half, and her losses were almost as severe as those of the Pensacola. The Richmond, a slow ship, brought up the rear of the second division, steaming steadily and working her guns with great regularity. . . . The Sciota, carrying Fleet-Captain Bell, led the third division. She steamed by the forts, firing as she passed, and above them burned two steamboats. . . . The Iroquois passed within 50 yards of Fort Jackson without injury, but was subjected to a terrible raking cross-fire from St. Philip, and was also raked by the McCrea. . . . Her losses were heavy. The Pinola passed up in line, firing her 11-inch pivot-gun and Parrott rifles at the flashes of Fort Jackson's guns, which at first were all that could be seen; then she emerged from the cloud of smoke, stood over toward St. Philip, and in the light of the blazing rafts received the discharges of its 40 guns. She was the last vessel that passed the forts, and got up in time to put one or two shells into the gunboats of the enemy. The Kennebec got out of her course, became entangled in the rafts, and did not get free till it was broad daylight and too late to attempt a passage. The Itasca, arriving in front of Fort Jackson, received a shot in her boiler, which made it impossible for her to proceed, and was turned down stream. The Winona got astray among the hulks, and lost so much time that when she came within range of Fort Jackson it was daylight, and the fleet had passed on. The first three or four shots from the fort swept away the entire crew of her rifled gun, save one man. Still she kept on, until the lower battery of St. Philip opened on her at less than point-blank range; this was too much for her, and she prudently headed down stream and ran out of the fire. Thus was accomplished a feat in naval warfare which had no precedent, and which is still without a parallel except the one furnished by Farragut himself, two years later, at Mobile. Starting with 17 wooden vessels, he had passed with all but 3 of them, against the swift current of a river but half a mile wide, between two powerful earthworks which had long been prepared for him, his course impeded by blazing rafts, and immediately thereafter had met the enemy's fleet of 15 vessels, two of them iron-clad, and either captured or destroyed every one of them. And all this with a loss of but one ship from his own squadron."—L. Farragut, *Life of Farragut, ch.* 18–19.—Commander Porter, who kept up the mortar fire while Farragut was forcing his way, says of the battle: "No grander or more beautiful sight could have been realized than the scenes of that night. From silence, disturbed now and then only by the slow fire of the mortars,—the phantom-like movements of the vessels giving no sound—an increased roar of heavy guns began, while the mortars burst forth into rapid bombardment, as the fleet drew near the enemy's works. Vessel after vessel added her guns to those already at work, until the very earth seemed to shake from their reverberations. A burning raft added its lurid glare to the scene, and the fiery tracks of the mortar-shells, as they passed through the darkness aloft, and sometimes burst in mid-air, gave the impression that heaven itself had joined in the general strife. The succeeding silence was almost as sudden. From the weighing of the anchors, one hour and ten minutes saw the vessels by the forts, and Farragut on his way to New Orleans, the prize staked upon the fierce game of war just ended."—D. D. Porter, *Naval Hist. of the Civil War, p.* 185."—"General Lovell, who was in command at New Orleans, had come down the river in a steamboat to observe the operations and was very nearly captured; he hastened back to the city to withdraw his forces. When the news spread through the streets that the Federal fleet had passed the forts and had destroyed the Confederate flotilla, a strange scene followed; a scene impossible, perhaps, in any other American city under parallel circumstances. The brave, active, fighting men of New Orleans were far away in the armies of the South; but they had left behind a slinking swarm of human vermin. . . . These, when they saw a hopeless panic seize the good people of the city, poured forth from their dens and began an indiscriminate pillaging of houses, shops, and storage-sheds. Thus while the better class of citizens were frantically setting fire to the cotton (some 12,000 bales) the cut-throats and ruffians, the hardened women and even the lawless children, were raging from place to place, back and forth, here and there, wildly plundering and aimlessly destroying. . . . All the pub-

lic materials, consisting of army supplies, were heaped up in the middle of the streets and burned. General Lovell withdrew his soldiers on the evening of the 24th, leaving the city at the mercy of the Federal fleet, which at 1 o'clock on the following day steamed up the river and anchored in the middle of the stream not far from the foot of Canal Street. . . . The mob which lately had been committing such foul deeds, now swayed back and forth in the streets, hooting, yelling and cursing, urging the people to resist the landing of the Federals. Commodore Farragut demanded the formal surrender of the city, but the mayor was powerless. He could not surrender the city while the people were controlled by an unreasoning mob. Consequently, on the 29th, a detachment under command of Fleet Captain H. H. Bell was sent ashore to take possession of the public buildings."—M. Thompson, *The Story of Louisiana, ch.* 11.—"The success was almost beyond price to the Union Government from its moral importance on both sides of the Atlantic. As to the material advantage won, it may be best judged of by the statement of the well-known Confederate writer, Mr. Pollard: . . . 'It was a heavy blow to the Confederacy. It annihilated us in Louisiana; separated us from Texas and Arkansas; diminished our resources and supplies by the loss of one of the greatest grain and cattle countries within the limits of the Confederacy; gave to the enemy the Mississippi River, with all its means of navigation, for a base of operations.' . . . In calling the capture of New Orleans 'one of the most remarkable triumphs in the whole history of naval operations' he [Mr. Welles, Secretary of the Navy] is fully justified."—C. C. Chesney, *Essays in Military Biog., pp.* 167–168.

A. D. 1862 (April—May: Alabama).—General Mitchell's expedition.—The division of Buell's army commanded by General Ormsby M. Mitchell left Nashville with the other divisions of that army, late in March, but took the road to Murfreesboro, while the latter marched toward Pittsburg Landing. On the 4th of April General Mitchell marched from Murfreesboro to Shelbyville, 26 miles distant. "On the 7th he advanced to Fayetteville, 27 miles farther, and the next forenoon, the 8th, 15 miles beyond, he crossed the State line of Alabama. Continuing his march six miles farther, and being within ten miles of Huntsville, Ala., he halted for the artillery and infantry to come up." At an early hour the next morning he entered the town, taking it completely by surprise. "Before the close of the day 100 miles of the Memphis and Charleston railroad were in his possession, stretching in one direction as far as Stevenson, and in the other as far as Decatur. . . . From Decatur he pushed on at once to Tuscumbia. Thus, without the loss of a single life, Gen. Mitchell placed his army midway between Corinth and Chattanooga, prevented the destruction of a fine bridge at Decatur, opened communication with Gen. Buell, and also the navigation of the Tennessee. The occupation of Huntsville also cut off all communication between the east and west by the Memphis and Charleston railroad. . . . This extension of Gen. Mitchell's lines to hold the railroad rendered his situation precarious. Soon the enemy began to gather in force and threaten him. . . . He was raised to the rank of a major-general, and ordered to report directly to the [war] department, and his force was constituted an independent corps. But he got no reënforcements. He was left in such a condition that he at first hardly had anything to report but that he had been gradually driven from those positions, the gaining of which had made him a major-general." Subsequently he advanced upon Chattanooga; but that important position was not secured. A little later General Mitchell was transferred to Port Royal, South Carolina.—W. J. Tenney, *Military and Naval Hist. of the Rebellion, ch.* 15.—It was in connection with General Mitchell's expedition that the thrilling episode of the railroad raid in Georgia occurred, narratives of which have been published by one of the participants, Rev. William Pittenger, first under the title of "Capturing a Locomotive," and afterwards with the title "Daring and Suffering," and also as "The Great Locomotive Chase." Volume Two of "Battles and Leaders of the Civil War" also contains the story, entitled "The Locomotive Chase in Georgia," preceded by General Buell's critical account of Mitchell's entire operations.

A. D. 1862 (April—May: Tennessee—Mississippi).—The bloodless and bootless conquest of Corinth.—"General Halleck arrived at Pittsburg landing on the 11th of April and immediately assumed command in the field. On the 21st General Pope arrived with an army 30,000 strong, fresh from the capture of Island Number Ten in the Mississippi River. He went into camp at Hamburg landing five miles above Pittsburg. Halleck had now three armies: the Army of the Ohio, Buell commanding; the Army of the Mississippi, Pope commanding; and the Army of the Tennessee. His orders divided the combined force into the right wing, reserve, centre, and left wing. . . . I [General Grant] was named second in command of the whole, and was also supposed to be in command of the right wing and reserve. . . . Preparations were at once made upon the arrival of the new commander for an advance on Corinth. . . . Corinth, Mississippi, lies in a south-westerly direction from Pittsburg landing and about 19 miles away as the bird would fly, but probably 22 by the nearest wagon-road. It is about four miles south of the line dividing the States of Tennessee and Mississippi, and at the junction of the Mississippi and Chattanooga Railroad with the Mobile and Ohio road which runs from Columbus to Mobile. . . . Corinth was a valuable strategic point for the enemy to hold, and consequently a valuable one for us to possess ourselves of. We ought to have seized it immediately after the fall of Donelson and Nashville, when it could have been taken without a battle, but failing then it should have been taken, without delay, on the concentration of troops at Pittsburg landing after the battle of Shiloh. In fact, the arrival of Pope should not have been awaited. There was no time from the battle of Shiloh up to the evacuation of Corinth when the enemy would not have left if pushed. . . . On the 30th of April the grand army commenced its advance from Shiloh upon Corinth. The movement was a siege from the start to the close.

The National troops were always behind intrenchments, except of course the small reconnoitring parties sent to the front to clear the way for an advance. Even the commanders of these parties were cautioned, 'not to bring on an engagement.' . . . For myself, I was little more than an observer. Orders were sent direct to the right wing or reserve, ignoring me, and advances were made from one line of intrenchments to another without notifying me. My position was so embarrassing in fact that I made several applications during the siege to be relieved. . . . On the 28th of May, General Logan, whose command was then on the Mobile and Ohio railroad, said to me that the enemy had been evacuating for several days, and that if allowed he could go into Corinth with his brigade. . . . Beauregard published his orders for the evacuation of Corinth on the 26th of May and fixed the 29th for the departure of his troops, and on the 30th of May General Halleck had his whole army drawn up prepared for battle and announced in orders that there was every indication that our left was to be attacked that morning. Corinth had already been evacuated and the National troops marched on and took possession without opposition. Everything had been destroyed or carried away. The Confederate commander had instructed his soldiers to cheer on the arrival of every train, to create the impression among the Yankees that reinforcements were arriving. There was not a sick or wounded man left by the Confederates, nor stores of any kind. Some ammunition had been blown up — not removed — but the trophies of war were a few Quaker guns, logs of about the diameter of ordinary cannon, mounted on wheels of wagons and pointed in the most threatening manner towards us. The possession of Corinth by the National troops was of strategic importance, but the victory was barren in every other particular. . . . General Halleck at once commenced erecting fortifications around Corinth on a scale to indicate that this one point must be held if it took the whole National army to do it. . . . They were laid out on a scale that would have required 100,000 men to fully man them. . . . These fortifications were never used. . . . After the capture of Corinth a movable force of 80,000 men, besides enough to hold all the territory acquired, could have been set in motion for the accomplishment of any great campaign for the suppression of the rebellion. In addition to this fresh troops were being raised to swell the effective force. But the work of depletion commenced."—U. S. Grant, *Personal Memoirs, ch.* 26 (*v.* 1).

Also in: M. F. Force, *From Fort Henry to Corinth* (*Campaigns of the Civil War, v.* 2), *ch.* 8. —A. Roman, *Military operations of Gen. Beauregard, ch.* 24 (*v.* 1).—*Official Records, series* 1, *v.* 10.

A. D. 1862 (April—June).—Abolition of Slavery in the District of Columbia and in the Territories.— On the 16th of December, 1861, Mr Wilson, of Massachusetts, introduced in the Senate of the United States a bill for the immediate emancipation of the slaves in the District of Columbia; "for the payment to their loyal owners of an average sum of $300; for the appointment of a commission to assess the sum to be paid; and the appropriation of $1,000,000. This bill was reported back on the 13th of February, 1862, with amendments. On the 24th he introduced a bill which, he said, was supplementary to that already before the Senate, to repeal the act extending the laws of Maryland over the District, and to annul all those statutes which gave the cities of Washington and Georgetown authority to pass ordinances discriminating against persons on account of color. On the 12th of March it came up for debate in committee of the whole. The debate on these resolutions, the bill, and other cognate measures exhibit elements of interest hardly found in any other session of the American Congress on record. It was emphatically a new departure. . . . No important change was made, and on the 3d of April, 1862, the bill introduced by Mr. Wilson more than three months before was passed by a vote of 29 to 14. The bill was taken up in the House the next week, and gave rise to a brief but brilliant debate. . . . The bill . . . passed the House by a vote of 92 to 38, and received the approval of the President on the 16th day of April, 1862. The President, in his message accompanying his approval of the bill, had stated some objections to it. These objections were that certain classes, such as married women, minors, and persons absent from the District, were not sufficiently protected and provided for; and he suggested that these defects should be remedied by additional legislation"—which was done. "On the 24th of March, 1862, Mr. Arnold, of Illinois, introduced a bill into the House of Representatives to render freedom national and slavery sectional. It was referred to the Committee on Territories, was reported on the 1st of May, with an amendment, and made the order of the day for the 8th. It provided that freedom should be the fundamental law of the land, and that slavery should no longer exist in all places under the direct and exclusive control of the Federal government. It prohibited slavery in all Territories, then or thereafter existing; in all places purchased by the government, with the consent of the legislatures of the several States, for forts, magazines, arsenals, dock-yards, and other needful buildings; in all vessels on the high seas, and on all national highways, beyond the territory and jurisdiction of the several States. . . . The difficulties, . . . real or seeming, constitutional or other, were too great to secure the united action of the friends of the underlying principle of the bill as reported by the committee. Mr. Lovejoy, therefore, moved a substitute restricting its action entirely to the Territories. The substitute was accepted, and the bill as thus amended was carried by a vote of 85 to 50. The preamble was so amended as to read, 'An act to secure freedom to all persons within the Territories of the United States.' In the Senate, on the 15th of May, Mr. Browning, reported the bill from the Committee on Territories with an amendment that, from and after the passage of the act, there should be neither slavery nor involuntary servitude in any existing Territory, or in any Territory thereafter formed or acquired. It was, substantially, the application of the principle of the ordinance of 1787 to all the territory then possessed or thereafter to be acquired. On the 9th of June the Senate proceeded to its consideration, adopted the amendment, and passed the bill by a vote of 28 to 10. The House agreed to the Senate amendment, and the bill thus amended was passed on the 17th, and approved by the President on the 19th of

June."—H. Wilson, *Hist. of the Rise and Fall of the Slave Power in Am., v. 3, ch. 21 and 24.*

A. D. 1862 (May).—Passage of the Homestead Act.—"The homestead bill, or the granting of free homes from and on the public domain, became a national question in 1852. The Free Soil Democracy, at Pittsburg, Pa., August 11, 1852, in National Convention, nominated John P. Hale, of New Hampshire, and George W. Julian, of Indiana, for President and Vice-President, and adopted the following as the 12th plank or resolution in their platform: 'That the public lands of the United States belong to the people, and should not be sold to individuals, nor granted to corporations, but should be held as a sacred trust for the benefit of the people, and should be granted in limited quantities, free of cost, to landless settlers.' Thereafter it became a national question until its passage in 1862, and was in the platforms of political parties. It was petitioned for and against. Public sentiment was aroused. It was a serious innovation and would cause an almost entire change in the settlement laws. Instead of the public lands being sold for cash, for profit, or being taken, first, under the pre-emption system, which eventuated in cash purchases, they were to be given to actual settlers who would occupy, improve, and cultivate them for a term of years, and then receive a patent free of acreage charges, with fees paid by the homesteader sufficient to cover cost of survey and transfer of title. . . . The rich and fertile lands of the Mississippi Valley were fast filling up with settlers. Agricultural lands in the Middle States, which, after the year 1824, were bought for $1.25 per acre, now sold at from $50 to $80 per acre. Former purchasers of these Government lands in the Middle, Western, and Southern States, were selling their early purchases for this great advance, and moving west, to Iowa, Wisconsin, Minnesota, and Missouri, and there again taking cheap Government lands under the pre-emption laws. The western emigration caused a rush—a migration of neighborhoods in many localities of the older Western States. Following the sun, their pillar of fire, these State founders moved westward, a resistless army of agents of American civilization, and there was a demand for homes on the public lands, and a strong pressure for the enactment of a law which should confine locators to small tracts, and require actual occupation, improvement, and cultivation. A fierce political battle now ensued, beginning in 1854, and continuing until 1862, the year of the passage of the law. The demand of the settlers was incessant and constant." Mr. Galusha A. Grow, of Pennsylvania, made himself the special champion of the measure in Congress. On the 1st of February, 1859, a bill embodying its principles was carried in the House, but was not permitted to reach a vote in the Senate. The slaveholding interest was almost solidly against it. In March, 1860, a similar bill was again passed by the House. The Senate substituted a bill granting homesteads to actual settlers at twenty-five cents per acre, instead of free of cost. After protracted conferences, the House was forced to accept the Senate bill, with slight amendments. But if the enemies of the measure had so nearly lost their control of Congress, they still owned the President—Buchanan—and he killed it by a veto. Then came the rebellion and civil war, absorbing all minor questions, and nearly two years went by before the law which opened the public lands freely to all actual settlers was adopted. It became a law by the signature of President Lincoln on the 20th of May, 1862. The following are the essential provisions of the Act: "That any person who is the head of a family, or who has arrived at the age of twenty-one years, and is a citizen of the United States, or who shall have filed his declaration of intention to become such, as required by the naturalization laws of the United States, and who has never borne arms against the United States Government or given aid and comfort to its enemies, shall, from and after the first January, eighteen hundred and sixty-three, be entitled to enter one quarter-section or a less quantity of unappropriated public lands, upon which said person may have filed a pre-emption claim, or which may, at the time the application is made, be subject to pre-emption at one dollar and twenty-five cents, or less, per acre; or eighty acres or less of such unappropriated lands, at two dollars and fifty cents per acre, to be located in a body, in conformity to the legal subdivisions of the public lands, and after the same shall have been surveyed: Provided, That any person owning or residing on land may, under the provisions of this act, enter other land lying contiguous to his or her said land, which shall not, with the land so already owned and occupied, exceed in the aggregate one hundred and sixty acres. . . . That the person applying for the benefit of this act shall, upon application to the register of the land office in which he or she is about to make such entry, make affidavit before the said register or receiver that he or she is the head of a family, or is twenty-one or more years of age, or shall have performed service in the Army or Navy of the United States, and that he has never borne arms against the Government of the United States or given aid and comfort to its enemies, and that such application is made for his or her exclusive use and benefit, and that said entry is made for the purpose of actual settlement and cultivation, and not, either directly or indirectly, for the use or benefit of any other person or persons whomsoever; and upon filing the said affidavit with the said register or receiver, and on payment of ten dollars, he or she shall thereupon be permitted to enter the quantity of land specified: Provided, however, That no certificate shall be given or patent issued therefor until the expiration of five years from the date of such entry; and if, at the expiration of such time, or at any time within two years thereafter, the person making such entry—or if he be dead, his widow; or in case of her death, his heirs or devisee; or in case of a widow making such entry, her heirs or devisee, in case of her death—shall prove by two credible witnesses that he, or she, or they have resided upon or cultivated the same for the term of five years immediately succeeding the time of filing the affidavit aforesaid, and shall make affidavit that no part of said land has been alienated, and that he has borne true allegiance to the Government of the United States; then, in such case, he, she, or they, if at that time a citizen of the United States, shall be entitled to a patent, as in other

cases provided for by law: And provided, further, That in case of the death of both father and mother, leaving an infant child or children under twenty-one years of age, the right and fee shall inure to the benefit of said infant child or children; and the executor, administrator, or guardian may, at any time within two years after the death of the surviving parent, and in accordance with the laws of the State in which such children for the time being have their domicil, sell said land for the benefit of said infants, but for no other purpose; and the purchaser shall acquire the absolute title by the purchase, and be entitled to a patent from the United States, on payment of the office fees and sum of money herein specified. . . . That if, at any time after the filing of the affidavit, . . . and before the expiration of the five years aforesaid, it shall be proven, after due notice to the settler, to the satisfaction of the register of the land office, that the person having filed such affidavit shall have actually changed his or her residence, or abandoned the said land for more than six months at any time, then and in that event the land so entered shall revert to the Government.' . . . This original homestead act has been amended several times. . . . The principal amendments were in the nature of extension of its privileges, and the limit of 80 acres of land of the double minimum class, $2.50 per acre, within certain road limits, has since been done away with by acts of March 3, 1879, July 1, 1879, and June 15, 1880; there now being but one class of agricultural lands, so for as regards the minimum quantity in homestead entries. The act of June 8, 1872, was known as the soldiers' and sailors' homestead act. It gave honorably discharged soldiers and sailors from the Army and Navy of the United States lands under the homestead act in any locality, and deducted from the five years' residence which was required to make title their term of service in the Army and Navy during the war of the Rebellion. One year's residence and cultivation, however, were necessary. . . . The soldiers' additional homestead provision was to give those soldiers who had had the benefit of the homestead act, to the extent of a quantity under 160 acres, an additional amount, so as to make their allowance 160 acres."—T. Donaldson, *The Public Domain, ch.* 27.

A. D. 1862 (May).—General Hunter's Emancipation Order, rescinded by President Lincoln.—Major General David Hunter, having lately succeeded to the command at Hilton Head, South Carolina, issued, on the 9th of May, 1862, a General Order (No. 11), declaring martial law in Georgia, Florida and South Carolina, and adding: "Slavery and martial law in a free country are altogether incompatible; the persons in these States . . . heretofore held as slaves are therefore declared forever free." This order was rescinded by President Lincoln in a Proclamation, dated May 19, in which he used the following language: "Whether it be competent for me, as Commander-in-Chief of the Army and Navy, to declare the slaves of any State or States free; and whether at any time, or in any case, it shall have become a necessity indispensable to the maintenance of the Government, to exercise such supposed power, are questions which, under my responsibility, I reserve to myself, and which I cannot feel justified in leaving to the decision of commanders in the field."—E. McPherson, *Pol. Hist. of the U. S. during the Great Rebellion, pp.* 250–251.

Also in: J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 6, *ch.* 5.

A. D. 1862 (May: South Carolina).—Employment of the freed Negroes as armed soldiers.—The negroes within the Union lines in South Carolina, at Hilton Head and elsewhere, were placed under the charge, at first, of agents appointed by the Treasury Department; but disagreements arose between these agents and the military authorities, and the former were recalled. "These several agents had been replaced by a superior officer of the staff, General Saxton, who was himself placed under the orders of General Hunter with the rank of a military commander. By this action the government at Washington sustained Hunter in his conflict with the agents of the Treasury Department — a conflict originating in very serious causes, for it affected the question of slavery in its most vital points. . . . Mr. Cameron [Secretary of the Treasury] had authorized General Sherman to organize the negroes into squads and companies. The latter had at first only been employed in manual labor, such as the construction of forts, roads and wharves; but Hunter, on taking Sherman's place, saw that he could give a much wider interpretation to the Secretary's instructions. He substituted muskets for the pick-axes used by the detachments of negro laborers organized by his predecessor; and, instead of making them dig the earth, he had them taught military exercises. Nor did he stop here; but wishing to increase the number of these new soldiers, he gathered all the adult negroes residing on the adjoining islands at Hilton Head on the 12th of May, in order to induce them to enter the military service. . . . The civil agents complained bitterly of the trouble this measure had created among the people entrusted to their charge, and thence sprung the quarrel which Mr. Lincoln cut short by deciding in favor of Hunter. The protection granted to fugitive slaves was the first logical consequence of the war, their enrolment in the Federal armies was the second. As untimely and impolitic as was the proclamation by which Hunter had taken upon himself to free the slaves outside of his jurisdiction, the creation of the first negro regiment was an act skilfully conceived. It was essentially a military act; it raised and ennobled the freedman by entrusting him with arms; its legality was unquestionable from the moment that the President approved of it, for there was no law to prevent him from enlisting colored volunteers. In short, it showed to the Confederates that the Washington government was determined not to allow itself to be any longer paralyzed by the vain hope of reconciliation. . . . But notwithstanding the success of this first experiment, considerable time elapsed before the Federal government concluded to follow Hunter in this direction."—Comte de Paris, *Hist. of the Civil War in Am., v.* 2, *bk.* 7, *ch.* 3.

A. D. 1862 (May: Virginia).— The Peninsular Campaign: The Battle of Williamsburg and the slow advance to the Chickahominy.— On the evacuation of the rebel works at Yorktown, "our columns followed on in pursuit, McClellan remaining in Yorktown, busy with

questions of transportation. The enemy under Longstreet had awaited our approach at Williamsburg. Hooker first attacked, having been brought to a stand by a work known as Fort Magruder, and kept up a heavy pounding all the forenoon [May 5]. Kearny came to his rescue when Hooker's men were all but spent. Hancock moved around the enemy's left, seized some abandoned redoubts, and made a brilliant diversion. But there was no coöperation in our attack; no one on the field was in supreme command, and the day was fruitlessly spent in partial blows. The enemy retreated at night. Our loss was 2,200; theirs in all probability less."—T. A. Dodge, *Bird's-eye View of our Civil War, ch.* 11. — "Gen. Johnston says ['Narrative,' p. 124]: 'We fought for no other purpose than to hold the ground long enough to enable our baggage-trains to get out of the way of the troops. This object was accomplished without difficulty. There was no time during the day when the slightest uncertainty appeared.' He also says that Longstreet's and Hill's divisions slept on the field; that what deserves to be called fighting ceased two hours before dark, yet the Confederates held the field until the next morning, when they resumed their march. . . . There may be a little rose-color about these statements, but the substantial facts seem to be accurately stated. . . . Gen. McClellan made no pursuit after Williamsburg, for reasons which he who will may find stated in his Report; and we may pass on with the single additional remark that the battle of Williamsburg was unnecessary, for the position might have been turned by a movement by our right. This was actually accomplished by Hancock, after Hooker had met with all his heavy loss; and it might as well have been done before as after. . . . The three weeks which followed the battle of Williamsburg were so devoid of incident that it seems to be sufficient to say that the Confederates moved up the Peninsula in two columns. The right column, composed of the divisions of Smith and Magruder, followed the road by New Kent Court House, and in three marches reached the Baltimore Cross Roads, 19 miles from Barhamsville. The left column, composed of the divisions of Longstreet and D. H. Hill, reached in the same number of marches the Long Bridges. The army remained five days in this position, facing to the east. . . . The iron-clad Virginia [better known as the Merrimac] was destroyed on, or just before, the 14th of May. This event opened the James River to our navy; and, to be ready to meet an advance up that river as well as from the direction of West Point, the Confederate forces were ordered to cross the Chickahominy on the 15th May. On the 17th their army encamped about three miles from Richmond, in front of the line of redoubts constructed in 1861. . . . During this period the weather was generally fine, cool and breezy, but gradually tending towards heat. . . . McClellan sent out cavalry reconnoissances from Williamsburg on the 5th and 7th May. . . . The advance of the main body began on the 8th; and on the 10th headquarters were at Roper's Church, 19 miles from Williamsburg, with all the troops which had arrived by land, except Hooker's, in the vicinity of that place. . . . By the 15th, headquarters, and the divisions of Franklin, Porter, Sykes, and Smith, reached Cumberland on the Pamunkey. . . . On the 19th of May, headquarters and the corps of Porter and Franklin moved to Tunstall's Station on the railroad, five miles from White House. On the 20th, Casey's division forded the Chickahominy, where Bottom's Bridge had been, and occupied the opposite heights. Bottom's Bridge was immediately rebuilt. . . . On the 22d, headquarters moved to Cold Harbor. On the 24th, we carried the village of Mechanicsville, but the enemy destroyed the bridge on which the Mechanicsville Turnpike crossed the river. On the same day our left advance secured a position at Seven Pines, the point of junction of the Nine-Mile Road with the Williamsburg road, which last road crosses the Chickahominy at Bottom's Bridge. . . . It is difficult to account for, or justify, the slowness of McClellan's march. The distance from Williamsburg to the middle of a line drawn from Bottom's Bridge to Cold Harbor, measuring by the road, is about 40 miles. That from West Point to the same point, measuring in the same way, is considerably less. One might almost say that, in the three weeks which McClellan took to accomplish this distance, he might have marched his army all the way in order of battle, bridging streams, felling trees, making roads, and supplying his army as he advanced. 'I had hoped,' he says, 'by rapid movements to drive before me, or capture, the enemy on the Peninsula, open the James River, and press on to Richmond, before he should be materially re-enforced.' What was there to hinder his making the attempt? Instead of that he followed him at the average rate of rather less than two miles a day."—F. W. Palfrey, *After the fall of Yorktown* (*Mass. Military Hist. Soc. Papers, v.* 1, *pp.* 95–114).

Also in: J. E. Johnston, *Narrative of Military Operations, ch.* 5.—*Report of Joint Com. on the Conduct of the War,* 38*th Cong.* 2*d sess., v.* 1.—*Official Records, series* 1, *v.* 11, *pt.* 1.

A. D. 1862 (May: Virginia).—Evacuation of Norfolk by the Rebels.—Destruction of the Merrimac.—"The movement of our grand army up the Peninsula, in connection with Burnside's successes and captures in North Carolina, had rendered the possession of Norfolk by the Rebels no longer tenable. . . . Gen. Wool, commanding at Fortress Monroe, having organized an expedition designed to reduce that important city, led it thither on the 10th; finding the bridge over Tanner's Creek on fire, but no enemy to dispute possession of Norfolk, which was quietly surrendered by its Mayor. The Navy Yard and Portsmouth were in like manner repossessed; the Rebels, ere they left, destroying every thing that would burn, partially blowing up the Dry Dock, and completely destroying their famous iron-clad known to us as the Merrimac. They left about 200 cannon. . . . Two unfinished iron-clads were among the vessels fired by the Rebels ere they left."—H. Greeley, *The Am. Conflict, v.* 2, *p.* 127.

A. D. 1862 (May: Virginia).—The Peninsular Campaign: Fair Oaks, or Seven Pines.—"On the 25th of May Gen. McClellan issued a general order, which was read throughout the camps, directing the troops, as they advanced beyond the Chickahominy, to be prepared for battle at a moment's notice, and to be entirely unencumbered, with the exception of ambulances; to carry three days rations in their haver-

sacks, leaving their knapsacks with their wagons, which were on the eastern side of the river, carefully parked. . . . The divisions from the corps of Gens. Heintzelman and Keyes were among the first to cross the Chickahominy. They took a position on the right bank somewhat advanced therefrom. The right wing rested near New Bridge, the centre at Seven Pines, and the left flank on the White Oak Swamp. Gen. Sumner's corps remained on the east side of the river. On the 30th the Confederate Gen. Johnston made arrangements for an attack upon the Federal army, for the purpose of cutting off, if possible, the corps of Gens. Heintzelman and Keyes before they could be joined by Gen. Sumner. He selected the divisions of Gens. Longstreet, Huger, G. W. Smith, D. H. Hill, and Whiting. His plan was that Gens. Hill and Longstreet should advance by the road to Williamsburg and make the attack in front, and that Gen. Huger should move on the road to Charles City and attack in flank the troops assailed by Gens. Hill and Longstreet. Gen. Smith was ordered to the junction of the New Bridge Road and the Nine Mile Road, and to be in readiness to fall on the right flank of Gen. Keyes and to cover the left of Gen. Longstreet. The forces of Gens. Hill, Longstreet, and Smith were in position early on the morning of Saturday, May 31, and waited until afternoon for Gen. Huger to get into position. Prince de Joinville, who was a competent spectator, thus describes ['Campagne de l' Armèe du Potomac, Mars-Juillet, 1862'] the scenes which followed this attack: 'At the moment it was thus attacked the Federal army occupied a position having the form of a V. The base of the V is at Bottom's Bridge, where the railroad crosses the Chickahominy. The left arm stretches toward Richmond, with this railroad and the road from that city to Williamsburg. There stood the left wing, composed of four divisions echeloned, one behind the other, between Fair Oaks and Savage stations, and encamped in the woods on both sides of the road. The other arm of the V, the right, follows the left bank of the river; that is the right wing. There are these five divisions and the reserve. Should one desire to communicate from one extremity to the other of those two wings, going by Bottom's Bridge, the way is very long, not less than 12 or 15 miles. In an air line the distance, on the contrary, is very trifling, but between the two arms of the V flows the Chickahominy. It was to connect both arms, in the space between them, that the construction of 3 or 4 bridges had been undertaken, only one of which was serviceable on the 31st of May. It had been built by Gen. Sumner, nearly half way between Bottom's Bridge and the most advanced point of the Federal lines. It saved the army that day from a disaster.' The other bridges were not ready. They were structures of logs, and time was required to build them. The approaches were always bad, and the tedious labor of corduroying long distances was necessary. 'It was against the left wing of the army that every effort of the enemy was directed. That wing had its outposts at Fair Oaks station, on the York river railroad, and at a place called Seven Pines, on the Williamsburg road. There the Federals had thrown up a redoubt in a clearing, where a few houses were to be seen, and constructed abatis, to increase the field for sharpshooting of the troops posted there. The rest of the country was completely covered with woods. The previous day there had been a frightful storm, with torrents of rain, and the roads were frightful. All at once, about one o'clock in the afternoon, the weather being dark and gloomy, a very spirited fusilade is heard. The pickets and sentries are violently driven in; the woods which surround Fair Oaks and Seven Pines are filled with clouds of the enemy's sharpshooters. The troops rush to arms and fight in desperation; but their adversaries' forces constantly increase, and their losses do not stop them. The redoubt of the Seven Pines is surrounded, and its defenders die bravely. . . . Meanwhile Heintzelman rushes to the rescue with his two divisions. As at Williamsburg, Kearney arrives in good time to reëstablish the fight. Berry's brigade, of this division, composed of Michigan regiments and an Irish battalion, advances firm as a wall into the midst of the disordered mass which wanders over the battle field, and does more by its example than the most powerful reënforcements. About a mile of ground has been lost, 15 pieces of cannon, the camp of the division of the advance guard, that of Gen. Casey; but now we hold our own. A sort of line of battle is formed across the woods, perpendicularly to the road and the railroad, and there the repeated assaults of the enemy's masses are resisted. The left cannot be turned, where is the White Oak Swamp, an impassable morass; but the right may be surrounded. At this very moment, in fact, a strong column of Confederates has been directed against that side. If it succeeds in interposing between Bottom's Bridge and the Federal troops, which hold beyond Savage's Station, the entire left wing is lost. It will have no retreat, and is doomed to yield to numbers; but precisely at this moment — that is to say, at 6 o'clock in the evening — new actors appear on the scene. Gen. Sumner, who has succeeded in passing the Chickahominy, with Sedgwick's division, over the bridge constructed by his troops, and who, like a brave soldier, has marched straight through the woods to the sound of the cannon, arrived suddenly on the left flank of the column with which the enemy is endeavoring to cut off Heintzelman and Keyes. He plants in the clearing a battery which he has succeeded in bringing with him. . . . In vain Johnston sends against this battery his best troops, those of South Carolina — the Hampton Legion among others. In vain he rushes on it himself; nothing can shake the Federals, who, at nightfall, valiantly led by Gen. Sumner in person, throw themselves upon the enemy at the point of the bayonet, and drive him furiously, with frightful slaughter and fear, back as far as Fair Oaks Station. Night put an end to the combat. On both sides nothing was known of the result of the battle but what each one had seen with his own eyes. . . . Evidently Johnston had flattered himself, in throwing all his forces on the four divisions of the left wing, that he could annihilate them before any aid could come to them from the main body of the army on the left bank of the Chickahominy. For the moment he had recoiled before the energetic resistance of those four divisions, and also before the furious and unforeseen attack of Sumner's troops. No doubt he had counted on the terrible storm of the previous day to have swelled the Chickahominy

so as to render the establishment of a bridge impossible, or to sweep away in its overflowing waters those already established; but the capricious river baffled his plans, as it did some hours later those of his adversaries. The effect of the deluge was not immediate; the rise in the water delayed its appearance 24 hours. Was this unhoped-for delay turned to account with all desirable activity on the part of the Federals? That is a question which will remain always in dispute. . . . It was not until 7 o'clock in the evening that the idea of securing all the bridges without delay, and causing the whole army to cross at daybreak to the right bank of the Chickahominy, was entertained. It was now too late. Four hours had been lost, and the opportunity — that moment so fleeting, in war as in other circumstances — had gone. The rise, on which Johnston had vainly counted, and which had not hindered Sumner from crossing, came on during the night. The river rose suddenly from two feet, and continued to swell with rapidity, carrying away the new bridges, tearing up and sweeping off the trees which formed the planking of Sumner's bridges, and covering the entire valley with its overflowing waters. Nothing could cross. At the earliest dawn of day the combat was resumed with great fury on the left bank. The enemy came on in a body, but without order or method, and rushed upon the Federals, who, knowing that they were inferior in numbers and without hope of being supported, did not attempt to do more than resist and hold their ground. They fought with fierce determination on both sides, without any noise, without any cries, and whenever they were too hardly pressed they made a charge with the bayonet. . . . Toward midday the fire gradually diminished, then ceased. The enemy retreated; but the Federals were not in a position to pursue them. No one then knew what a loss the Southerners had just suffered in the person of their commander, Gen. Johnston, who was severely wounded. It was to his absence that was owing, in a great measure, the unskilful attacks against the Federal army in the morning. . . . Who can say what would have been the result if at this moment the 35,000 fresh troops left on the other side of the Chickahominy had appeared on the flank of this disordered mass after having successfully crossed the bridges?'" —W. J. Tenney, *Military and Naval Hist. of the Rebellion, ch.* 19 (*quoting and translating from Prince de Joinville's "Campagne de l'Armée du Potomac"*).—"After this battle of Seven Pines — or Fair Oaks, as the Northern people prefer to call it — General McClellan made no step forward, but employed his troops industriously in intrenching themselves."— J. E. Johnston, *Narrative of Military Operations, p.* 142.

A. D. 1862 (May—June: Virginia).—Stonewall Jackson's second campaign in the Shenandoah Valley.—Winchester.—Cross Keys.—Port Republic.—"At the time the Army of the Potomac was toiling painfully up the Peninsula towards Richmond, the remaining forces in Northern Virginia presented the extraordinary spectacle of three distinct armies, planted on three separate lines of operations, under three independent commanders. The highland region of West Virginia had been formed into the 'Mountain Department' under command of General Fremont; the Valley of the Shenandoah constituted the 'Department of the Shenandoah' under General Banks; and the region covered by the direct lines of approach to Washington had been erected into the 'Department of the Rappahannock,' and assigned to General McDowell. . . . The Administration, growing more easy touching the safety of the capital, determined, in response to General McClellan's oft-repeated appeals for re-enforcements, to send forward McDowell's corps,— not, indeed, as he desired, to re-enforce him by water, but to advance overland to attack Richmond in co-operation with the Army of the Potomac. . . . After numerous delays, the time of advance of this column was at length fixed for the 26th of May, a date closely coincident with the arrival of the Army of the Potomac on the Chickahominy. The head of McDowell's column had already been pushed eight miles south of Fredericksburg; and McClellan, to clear all opposition from his path, sent forward Porter's corps to Hanover Junction, where he had a sharp encounter with a force of the enemy under General Branch, whom he repulsed with a loss of 200 killed and 700 prisoners, and established the right of the Army of the Potomac within fifteen miles, or one march, of McDowell's van. McDowell was eager to advance, and McClellan was equally anxious for his arrival, when there happened an event which frustrated this plan and all the hopes that had been based thereon. This event was the irruption of Stonewall Jackson in the Shenandoah Valley. The keen-eyed soldier at the head of the main Confederate army, discerning the intended junction between McDowell and McClellan, quickly seized his opportunity, and intrusted the execution of a bold 'coup' to that vigorous lieutenant who had already made the Valley ring with his exploits." Jackson, who had been resting for a time in a position between the south fork of the Shenandoah and Swift Run Gap, was joined, on the 30th of April, by Ewell's division from Gordonsville, and by other re-enforcements, which "raised his force to about 15,000 men. Banks' force, reduced by the detachment of Shields' division, sent to General McDowell, to about 5,000 men, was posted at Harrisonburg. Fremont was at Franklin, across the mountains; but one of his brigades, under Milroy, had burst beyond the limits of the Mountain Department, and seemed to be moving to make a junction with Banks, with the design, as Jackson thought, of advancing on Staunton. Jackson determined to attack these forces in detail. Accordingly, he posted Ewell so as to hold Banks in check, whilst he himself moved to Staunton. From here he threw forward five brigades, under General Edward Johnson (May 7), to attack Milroy. The latter retreated to his mountain fastness, and took position at a point named McDowell, where, re-enforced by the brigade of Schenck, he engaged Johnson, but was forced to retire on Fremont's main body at Franklin. Having thus thrown off Milroy eccentrically from communication with Banks, Jackson returned (May 14) to destroy the force under that officer." Banks retreated down the Valley, followed by Jackson, who diverged a little to capture a garrison of 700 men at Front Royal. On the 24th, Banks

made a stand on the heights of Winchester and gave fight, "till, being assailed on both flanks, he retired hastily to the north bank of the Potomac (May 25), making a march of 53 miles in 48 hours. Jackson continued the pursuit as far as Halltown, within two miles of Harper's Ferry, where he remained till the 30th, when, finding heavy forces converging on his rear, he began a retrograde movement up the Valley. The tidings of Jackson's apparition at Winchester on the 24th, and his subsequent advance to Harper's Ferry, fell like a thunderbolt on the war-council at Washington. The order for McDowell's advance from Fredericksburg, to unite with McClellan, was instantly countermanded; and he was directed to put 20,000 men in motion at once for the Shenandoah Valley, by the line of the Manassas Gap Railroad. . . . In vain he pointed out that it was impossible for him either to succor Banks or co-operate with Fremont; . . . that it would take him a week or ten days to reach the Valley, and that by this time the occasion for his services would have passed by. In vain General McClellan urged the real motive of the raid — to prevent re-enforcements from reaching him." McDowell moved from the east and Fremont from the west, converging on Strasburg. "The two columns moved rapidly; they had almost effected a junction on the 31st; but that very day Jackson, falling back from Harper's Ferry, slipped between the two, and made good his retreat up the Valley. . . . The pursuers did their best: they pushed on, Fremont following in the path of Jackson up the Valley of the Shenandoah; while McDowell sent forward Shields' division by the lateral Luray Valley, with a view to head him off when he should attempt to break through the gaps of the Blue Ridge." On the 8th of June Ewell's division of Jackson's army "repulsed Fremont, while Jackson held Shields in check. Early next morning, drawing in Ewell and concentrating his forces, Jackson threw himself across the river, burned the bridge to prevent Fremont from following; fell upon Shields' advance, consisting of two brigades under General Tyler, and repulsed him, capturing his artillery. The former of these affairs figures in history as the battle of Cross Keys, and the latter as the battle of Port Republic. In this exciting month's campaign, Jackson made great captures of stores and prisoners; but this was not its chief result. Without gaining a single tactical victory he had yet achieved a great strategic victory; for by skilfully manœuvring 15,000 men he succeeded in neutralizing a force of 60,000. It is perhaps not too much to say that he saved Richmond."—W. Swinton, *Campaigns of the Army of the Potomac, pp.* 122–128.

A. D. 1862 (May—July: On the Mississippi). —The first undertakings against Vicksburg. —"New Orleans once secured and handed over to General Butler, Farragut pushed up the Mississippi, and in the course of the next two months the Union flag was hoisted at Baton Rouge, Natchez, and every town of importance as high as Vicksburg. This city, strong by its natural position on high bluffs sloping gently landward, and already partly converted into a fortress by intrenchments heavily armed, was now (since the surrender of Memphis on the 6th of June) the only point of importance held by the Confederates on the banks of the great river. It at once, therefore, assumed an importance well warranted by its later history. Summoned on the 18th of May to evacuate the place, General M. L. Smith, who held it, gave a decided refusal; and Farragut found it necessary to await once more the arrival of Porter's flotilla, which was not brought up and reported ready until the 27th of June. On the 28th a general attack took place, Farragut succeeding in taking two of his three frigates and six gun-boats above the batteries, but producing no effect on the defences. 'The enemy leave their guns for the moment,' says his hasty report, 'but return to them as soon as we have passed, and rake us.' About 50 men were killed and wounded on board, and the Brooklyn frigate, with two gun-boats, forced to retreat below the place. The bombardment continued at intervals, pending an application to General Halleck at Corinth for a corps of his army to aid the fleet, and the result of an experiment (the first of three) made to cut a ship canal through the isthmus opposite Vicksburg, and leave the Federal ships an independent passage. On the 15th of July their possession of the river was suddenly challenged by a large ram, the Arkansas, which the Confederates had been fitting on the Yazoo, a considerable stream entering the Mississippi just above Vicksburg. . . . Her plating, however, proved to be weak, and her machinery very defective." The career of the Arkansas was brief and harmless. In August she was knocked to pieces by the shells of the Essex, "whose commander had taken charge of the Lower Mississippi on the departure of Farragut. The latter officer, in compliance with orders from Mr. Welles, had abandoned his contest with the Vicksburg works on the 20th of July, and made down stream for New Orleans, whence he proceeded with his squadron to carry on operations along the coast of Texas, where the chief posts were (for the time) recovered to the Union by his detachments in the course of a few weeks. 'All we want,' he wrote on the 15th of October, 'is a few soldiers to hold the places, and we will soon have the whole coast. It is a more effectual blockade to have the vessels inside instead of outside.'"—C. C. Chesney, *Essays in Military Biog., pp.* 169–171.

A. D. 1862 (May—December: Louisiana).— New Orleans under General Butler.— The army which accompanied Farragut's naval expedition against New Orleans, to assist its operations and to occupy the city and the lower Mississippi region when taken, was placed under the command of General Benjamin F. Butler. It consisted nominally of 18,000 men, but is said to have actually mustered less than 14,000. It was composed of regiments which had been raised by Butler in New England especially for the enterprise, his preparations having commenced as early as September, 1861. These troops were partly gathered at Ship Island, in the Gulf, some time before Farragut made ready his fleet; the remainder were at the rendezvous in good time, and the whole were in waiting, on board

transports, at the passes, when Farragut carried his fleet past Forts Jackson and St. Philip. "General Butler . . . now proceeded to execute his part of the duty. He brought his forces into the rear of St. Philip, Porter keeping up a bombardment. On the 27th of April the garrison had become so demoralized as to refuse to fight any longer. The forts were therefore surrendered on the next day. . . . On the 1st of May New Orleans was formally occupied by United States troops. The loss on the national side in achieving this great victory was 40 killed and 177 wounded. . . . General Butler now entered on the difficult task of governing New Orleans. Its population, though greatly diminished to strengthen the Confederate armies in the Border States — a cause of bitter complaint to the inhabitants — still numbered about 140,000. Almost one half of it was of foreign birth. Perhaps no city in the world had in its lower classes a more dangerous and desperate population. There was a wide-spread hope that a French force would soon come to their help. By firmness, strict yet considerate, he controlled the municipal authorities; by severity he put down the mob. He was a terror to tricky tradesmen, a benefactor to the starving poor. He cleaned the streets, enforced sanitary regulations, and kept out yellow fever. He put an effectual stop to the operations of Confederate agents, who were illicitly obtaining supplies for their cause. . . . He arrested Mumford, the person who had hauled down the national flag at the Mint [where it had been raised by one of Farragut's officers before the arrival of the troops], brought him before a military commission, convicted and executed him." This execution of Mumford (by hanging) drew from the Confederate President, Davis, a proclamation denouncing Butler as "an outlaw and common enemy of mankind"; directing that, if captured, he should be immediately hung; declaring the commissioned officers of his command "not entitled to be considered as soldiers engaged in honorable warfare, but as robbers and criminals"; and ordering that "no commissioned officer of the United States taken captive shall be released on parole before exchange until the said Butler shall have met with due punishment for his crimes." "Some women of New Orleans, relying on the immunity of their sex, gratified their animosity by insulting national officers in public places. One of them ventured so far as to spit in the face of an officer who was quietly walking in the street. Hereupon was issued 'General Order No. 28' [known as 'the Woman Order,' which gave notice that] . . . 'hereafter, when any female shall, by word, gesture, or movement, insult or show contempt for any officer or soldier of the United States, she shall be regarded and held liable to be treated as a woman of the town plying her vocation.' . . . The feeling of personal hatred to Butler grew daily more and more intense. He was accused of improper tampering with the banks, speculating in sequestrated property, and, through the agency of his brother, carrying on illegal but profitable transactions in sugar and cotton. In South Carolina a reward of $10,000 had been offered for his assassination. Throughout the Confederacy he received an ignominious surname, and was known as 'Butler the Beast.' The government felt constrained to send a commission to New Orleans to investigate his transactions. Its conclusion was that he had evidently acted 'under a misapprehension, to be referred to the patriotic zeal which governs him.'" In December General Butler was recalled and General Banks was sent to take his place. — J. W. Draper, *Hist. of the Am. Civil War, ch.* 52 (*v.* 2).

A. D. 1862 (June: On the Mississippi). — The capture of Memphis. — The naval fight before the city. — After the evacuation of Corinth by Beauregard, "Fort Pillow, 40 miles above Memphis, was no longer of any account, for the Union army could take it from the rear. The Confederates, therefore, spiked the guns, burned their barracks and what supplies they could not take away; and the Confederate gunboats went down the river to Memphis, where several of the boats had been built. Commodore Montgomery commanded the fleet. He had eight vessels. . . . Fort Pillow evacuated! It was astounding news to the people of Memphis. They learned it at noon, June 5th. The merchants closed their stores. Some of them began to pack their goods. Some of the citizens jumped on board the cars and fled from the city. The Confederate fleet made its appearance. 'I shall retreat no farther,' said Commodore Montgomery; 'I shall fight a battle in front of the city, and to-morrow morning you will see Lincoln's gunboats sent to the bottom.' The dawn is breaking when I step from the Benton, the flag-ship of Commodore Davis [commanding the Union river fleet], to the tugboat Jessie Benton. . . . The Union fleet is at anchor three miles above the city. 'Drop down below the city and see if you can discover the Confederate fleet,' is the order to the captain of the Jessie Benton. We sweep around the majestic bend of the river and behold the city. The first rays of the sun are gilding the spires of the churches. A crowd of people is upon the levee — men, women, and children — who have come out to see the Union fleet sent to the bottom. . . . Suddenly a vessel with a black cloud of smoke rolling from the chimneys shoots into the stream. It is the Little Rebel, Commodore Montgomery's flag-ship. One by one the other vessels follow, forming in two lines of battle. In the front line, nearest the city, is the Beauregard, next the Little Rebel, then the Price and Sumter. In the second line, behind the Beauregard, is the Lovell, then the Thompson, Bragg, and Van Dorn. . . . There are five gunboats in the Union fleet. The Benton is nearest the Tennessee shore, then the Carondelet, Louisville, St. Louis, and Cairo. There are also two rams — the Queen City and Monarch. The rams are river steamers, with thick oak sides; they carry no cannon, but on each boat are 100 riflemen. 'Round to; head down stream; keep in line with the flag-ship,' was the order which we on board the Jessie Benton carried to each boat of the line." In the fight which followed, and which is graphically described by the eye-witness here quoted, the Price and the Beauregard were run down by the rams; the Little Rebel, the Lovell, the Thompson and the Bragg were destroyed by shot and shell; the Sumter driven ashore, and the Van Dorn alone escaped. On the Union side, only the ram Queen City was disabled. "In an hour's time the Confederate

fleet was annihilated. . . . It is not known how many men were lost on the Confederate side, but probably from 80 to 100. Colonel Ellet was the only one injured on board the Union fleet. . . . The victory opens the Upper Mississippi from Cairo to Vicksburg."—C. C. Coffin, *Drumbeat of the Nation, ch.* 10.

A. D. 1862 (June: Virginia).—The Peninsular Campaign: McClellan fortifying and Lee preparing for a bold attack.—"When McClellan crossed the Chickahominy it was thought he would advance immediately upon Richmond. This expectation was disappointed, however, for instead of advancing he began to fortify his position. The right wing rested on the Chickahominy a little below New Bridge, and the left extended to the White Oak Swamp, embracing a front of about four miles, nearly parallel with that of the Confederates. The opposing lines were separated by an interval but little exceeding a mile, but each was obscured from the other's view by the intervening forest. The picket-lines were often within close musket-range of each other. . . . The strength of the Confederate force was always greatly overestimated by McClellan, and his frequent and urgent calls for reinforcements exposed his want of confidence in his own strength. General Lee [who took command of the Confederate army June 1, General Johnston being disabled], knowing this uneasy, insecure feeling of his antagonist, and McDowell's force, which had always been a thorn in his side, being about this time withdrawn from Fredericksburg for the support of Banks and Shields in the Valley, prepared . . . to assume the offensive. He conceived the bold plan of crossing the Chickahominy, and, attacking the Federal right wing, to force it back and seize McClellan's line of communication with his base of operations. This plan being successfully executed, the Federal general would be compelled to save his army as best he could by retreat. Preparatory to the execution of this plan General J. E. B. Stuart was ordered to make a reconnoissance in the rear of the Federal position. This officer, with a force of about 1,000 cavalry, executed his instructions with great boldness and success. He made the entire circuit of the Federal army and gained much important information, . . . captured many prisoners and destroyed Federal stores to the value of $7,000,000. . . . His design being confirmed by Stuart's successful reconnoissance, Lee proceeded to organize a force requisite for the accomplishment of his proposed enterprise. The troops that could be conveniently spared from North Carolina, South Carolina, and Georgia were ordered to Richmond. . . . At the same time General Jackson was ordered to withdraw secretly from the Valley and proceed with such expedition as would enable him to reach Hanover Junction by the afternoon of the 25th of June. In order to mask his designs from the Federals, Lee directed Whiting's division and Lawton's brigade to proceed to Staunton, apparently with the view of reinforcing Jackson, but really under orders to return immediately and join that general on the 25th at Hanover Junction. This movement further strengthened McClellan in his opinion of Lee's vastly superior force, and completely blinded him in regard to the real intentions of that general. General Lee determined to attack the Federal right wing on the morning of the 26th of June."—A. L. Long, *Memoirs of Robert E. Lee, p.* 169.

A. D. 1862 (June—July: Virginia).—The Peninsular Campaign: The Seven Days Battle and Retreat.—Mechanicsville.—Gaines' Mill.—Savage Station.—Glendale.—Malvern Hill.—"Since the battle of Fair Oaks the Second Corps (Sumner) had remained on the right bank of the Chickahominy, where it had been followed in the month of June by the Sixth Corps (Franklin). So that only the Fifth Corps (Porter) remained on the left bank, recently reënforced by McCall's division. All the efforts of the enemy were made there, and there the great seven days' contest commenced. On the 26th of June, A. P. Hill, preceding Jackson by twenty-four hours, endeavored to force the passage of Beaver Dam Creek, defended by the Pennsylvanians under McCall. He was repulsed with considerable loss on the Mechanicsville road. But, during the night, Porter was compelled to fall back to a position more tenable against a force become much superior to his own, Jackson and Longstreet having united against his lines. On the 27th, then, the Fifth Corps, with about 25,000 men, was assailed by 70,000 Confederates on Gaines' Mill Heights, and defended itself there obstinately, until our own cavalry came fatally to the enemy's aid. Unskilfully handled and roughly repulsed, it fell back in disorder on our lines, where it put everything into confusion, artillery and infantry. The Confederates, coming on at the charge, finished the overthrow, and the Fifth Corps would have been destroyed if the coming of the night had not enabled our decimated troops to cross to the right bank of the Chickahominy, destroying the bridges behind them. [This battle, called Gaines' Mill by the Federals, was named Cold Harbor, or Chickahominy, by the Rebels.] . . . As soon as Porter had crossed safely on the 28th, the general retreat commenced. Keyes crossed White Oak swamp first, and took position to protect the passage of the immense army trains and the great herds of cattle. Then, on the 29th, after having repulsed a cavalry attack, he continued his way towards the James, where he arrived on the 30th, at the same time that Porter reached Haxall's Landing. Much less favored, the three other corps suspended their march only to fight and ceased to fight only to march. But all this was done without any general system, in the absence of superior supervision, and of orders in accordance with circumstances. On the 29th the enemy crossed the Chickahominy to unite all his force on the right bank; Franklin advised Sumner, and the two, acting together, fell back on Savage Station, where they took up position, with the intention, aided by Heintzelman, of repelling the dangerous attack which menaced them. But Heintzelman, adhering to his general instructions, after destroying the material of the railroad, the provisions, munitions of war, arms and baggage that there was neither time nor means of carrying away, hastened to cross White Oak swamp, uncovering Sumner's left. The latter learned of the retreat of the Third Corps only from a furious attack by the enemy on the very side which he believed protected by Heintzelman. He did not the less sustain the shock with an unshakable solidity, and fought all the afternoon with four divisions without being broken at any point. The enemy, worn out by

the useless attacks, retired at nightfall. Then only did he receive any news from McClellan, under the form of an order to Sumner to fall back, along with Franklin, to the other side of White Oak swamp, abandoning our general hospitals at Savage Station, and the 2,500 sick and wounded in them. On the morning of the 30th, Jackson presented himself, to cross the swamp after us. He found the bridge destroyed, and endeavored to force a passage at several points. He was everywhere repulsed and kept in check the whole day by the obstinate resistance of Franklin, while farther on, towards the James, Longstreet was held by Heintzelman and McCall, who prevented him from cutting our army in two at Glendale. This was not done without hard fighting. The Confederates, arriving by the New Market road at a right angle to the Quaker road, which was our line of march, struck, in the first place, the Pennsylvania reserves, broke their line, outflanking it on the right and on the left, captured a battery of artillery, and pushed resolutely on through that dangerous breach. They then struck Hooker's division, which threw them obliquely on Sumner's Corps. Soon afterward, Kearney occupied the vacant space, and, as on the evening before, the sun set with the rebels unsuccessful. [This day's battle is variously named after Glendale, New Market, Frazier's Farm, and Nelson's Farm.] But, the same evening, Franklin, left without orders, and seeing his position was becoming more and more dangerous, abandoned White Oak swamp and fell back towards the James. At that news, which was promptly sent to him from several directions, Heintzelman sent in vain to headquarters to ask for instructions. Left to his own devices, he concluded that the wisest course was to follow the retrograde movement, and retreated with his corps. Sumner still remained, and, seeing himself left alone and without support, he decided, in his turn, to do as the others had done. On the morning of the 31st, he arrived on the Malvern Heights, where the three corps, the Second, Third, and Sixth, found themselves united, not, as has been benevolently said, by the wise combinations of General McClellan, but by the fortunate inspiration of the commanders, who had received no orders to that effect. 'At daylight,' said General Sumner, in his testimony before the Congressional committee, 'I called on General McClellan, on the banks of the James. He told me that he had intended that the army should hold the position it had the night before, and that no order for retreat had been sent; but that, since the rest of the army had fallen back, he was glad that I had done the same.' It was found that the plateau of Malvern Hill was admirably formed for a defensive position. General Humphreys, of the corps of topographical engineers, was ordered to examine the position, and he traced a formidable line with the left resting at Haxall's Landing on the James, where it was protected by the gunboats, while the right was thrown back on some fields covered with thick woods, and cut up by marshy streams. The summits and slopes of the plateau were bristling with cannon, sweeping the plain over the heads of our infantry deployed in front of them. In that position, the army awaited a last attack. The enemy played there his last card, and lost the game. . . . He tried his fortune and gave battle July 1. On every point his columns were thrown back in disorder, crushed in every attack by the double fire of artillery and infantry. Dash was not enough now. On this occasion, the enemy was compelled to acknowledge himself beaten and incapable of pursuing us any further. But our men were slow to believe in success. On receiving the order, a few hours later, after night had put an end to the contest, to retire to Harrison's Landing, they naturally concluded that we were not strong enough to hold out long against the enemy. . . . Worn out by fatigue and fighting, exhausted by privations and by vigils, discouraged, and suspecting that it was not fortune alone that had betrayed them, they dragged themselves along without order . . . during that last night march, which had all the character of a rout."—R. de Trobriand, *Four Years with the Army of the Potomac, ch.* 13.—"If McClellan deserves sharp criticism for not having sooner made up his mind, and still more for his failure to discover and use the absence of the Confederates in his front, where his advance in mass, according to General Magruder's officially expressed opinion, 'would have insured his success, and the occupation of the works about Richmond, and consequently the city,' his character as a commander never shone so brightly as in the hour of disaster and danger, when Porter's wing was driven in upon his centre. The ill-success of his campaign as a whole has caused his conduct at this crisis to be done scant justice to. But there is no military reputation in the world which would not be increased by the manner in which that retreat to the James was conducted from the moment it began."—C. C. Chesney, *Essays in Military Biog., p.* 114.

A. D. 1862 (June—October: Tennessee—Kentucky).—Ineffective dispersion of Western armies.—Failure to secure Chattanooga and Vicksburg.—Bragg's invasion of Kentucky.—The race for Louisville.—Battle of Perryville.—End of Buell's campaign.—"We left the Federals in possession of Corinth and Memphis, the army of Beauregard disappearing in the depths of semi-tropical forests where the Tombigbee takes its source, and Montgomery's ships lying at the bottom of the Mississippi [see, above, A. D. 1862 (April—May: Tennessee—Mississippi) and (June: On the Mississippi)]. The part to be played by the Federal fleets was fully laid out; Farragut, by ascending the river, and Davis, by descending it, were to endeavor to join hands and destroy all the obstacles which still obstructed its course. What, in the mean time, was the large army encamped at Corinth going to do? It had allowed Beauregard to escape at the very moment when it felt sure of crushing him; but it could yet strike some decisive blows either to eastward or westward, the Confederates being nowhere sufficiently numerous to make any strong opposition. Eastward, Mitchell had forced open the way to Chattanooga and approached the gap which opens south-east

of that town, before which, at a subsequent period, so much blood was shed at the battles of Chickamauga and Missionary Ridge. He was master of the passes of the Tennessee, and the Federals, stationed at Corinth, could reach Chattanooga much more speedily than their adversary encamped at Tupelo. They might probably conquer by the same stroke the whole upper course of the river which waters this town. Westward, the Federals could sweep both sides of the Mississippi, cause all the Confederate works which defended them to fall, and perhaps prevent the enemy from erecting the formidable citadels of Vicksburg and Port Hudson, the capture of which, at a later period, cost so dear. . . . Everything . . . was in favor of prompt and vigorous action. But Halleck divided his army, and, notwithstanding the resources he had at his disposal, allowed his adversaries to forestall him everywhere. . . . The army of the Ohio left Corinth on the 10th of June, and Buell was ordered to proceed with it in the direction of Chattanooga, where Mitchell was beginning to be sorely pressed; but this movement was slowly executed. Sherman, at the head of his own division and that of Hurlbut, proceeded toward Memphis, dropping detachments of troops as far as Holly Springs to cover his left flank. The rebuilding of the Mobile Railway, which had been completely destroyed by the enemy, was a considerable undertaking. Begun on the 9th of June, it was only finished on the 26th. The Confederates had profited by this delay. The new general-in-chief, Braxton Bragg [who had superseded Beauregard], had boldly divided his army and abandoned the position of Tupelo, which Halleck still believed him to occupy. He had determined to cover at once the two points we have already indicated as being of the greatest importance for the future of the war, Chattanooga and Vicksburg. He proceeded toward the first with all the old army of Johnston, consisting of the corps of Hardee and Polk, as rapidly as the difficulties of communication in that portion of the Southern States allowed. He had the merit and good fortune to reach Chattanooga before Buell. It was not too soon, for a few days previous, the 7th of June, the Federal General Negley, with his single brigade and some cannon, had nearly taken possession of this city by surprise. Bragg found it of great advantage to transfer the war to the vicinity of Chattanooga. Master of this position, indeed, he could menace either Tennessee or Kentucky, Nashville or Louisville and wrest from the Federals all the conquests they had achieved during the last few months by taking them in rear. He was also drawing near Virginia."—Comte de Paris, *Hist. of the Civil War in Am.*, *v.* 2, *bk.* 2, *ch.* 3.—"Halleck soon leaves for Washington to assume supreme control of the Union forces from the War Department. Grant is left in command of the Army of the Tennessee, Buell of the Army of the Ohio, Pope of the Army of the Mississippi. Every one is without definite instructions; there is no one head; and the Western armies are practically put upon the defensive. Rosecrans succeeds Pope, who is transferred to Virginia, and to Grant's lot now fall the armies of the Mississippi and Tennessee, 42,000 effectives, with which to keep open his communications with Buell and guard the railroad from Memphis to Decatur. While Grant and Sherman devote their energies to the line of the Mississippi, Buell is ordered to regain East Tennessee, where the loyal population is in extreme suffering. Mitchell's [General O. M. Mitchell] capture of Huntsville [in Alabama, which he surprised, by a remarkable forced march, from Nashville, in April], and some hundred miles of the Memphis and Charleston Railroad, which he had held, together with all territory north of the Tennessee river, had been full of possibilities. Had he but received the authority, he might readily have anticipated Bragg in taking possession of Chattanooga, and have saved much subsequent blood and treasure. For this town is the key to that entire strategic field. . . . Buell supposed that Bragg would attempt to turn his right in order to obtain possession of Nashville. He therefore concentrated the bulk of his force at Murfreesboro'. Thomas, then commanding a wing of the Army of the Ohio, whose military intuitions were as keen as his judgment was reliable, . . . was shrewd enough to recognize Bragg's crossing of the Tennessee river as a threat to invade Kentucky. Not so Buell, to his sorrow. By a sudden movement, Bragg steals a march around Buell's left, through the Sequatchie Valley [August 28], and marches straight toward Louisville, while Kirby Smith turns Cumberland Gap, defeats Nelson at Richmond, and makes for Cincinnati. . . . Thoroughly alarmed, as is also the country, Buell at once swings his left in pursuit of Bragg, while he endeavors to retain his grasp on Nashville with his right. Bragg has the shorter line and the start. But he is delayed a day or two [September 16–17] by the capture of Mumfordsville, and by scattering his forces instead of pushing home. This is a serious fault on Bragg's part. He fairly holds success in his hand, but forfeits it by this delay. After some rapid marching and manœuvring, Buell enters Louisville just ahead of his opponent. The authorities in Washington have lost all confidence in Buell. He is summarily relieved from command and Thomas appointed to succeed him. But this magnanimous soldier, though far from always agreeing with the methods of his chief, declines the proffered honor, and, at his earnest solicitation, Buell is reinstated. The Army of the Ohio marches out to meet Bragg, with Thomas second in command. Bragg expects to defend the line of the Kentucky and Duck rivers, but divides his forces, leaving Kirby Smith near Frankfort. Buell makes a demonstration upon Bragg's communications. After some cautious feeling, Buell comes upon Hardee with only 15,000 men, at Perryville, where, had he at once attacked, he could have punished Bragg severely for this division. But, owing to lack of water, one-half of Buell's army is distant from the field, and he in turn pays the penalty of lack of concentration. Polk joins Hardee, and the latter [October 8] falls heavily upon McCook, who holds Buell's left, and bears him back. But he cannot break the Union centre; and after a stubborn conflict Bragg retires, leaving to our forces the field. Our left has not been engaged. The loss is nearly 5,000 men on either side, a quarter of the numbers actually engaged. On being followed up, Bragg retreats through Cumberland Gap, and leaves Kentucky and Tennessee once more in our possession. His retreat ends only at Chattanooga. What Bragg expected to obtain

in Kentucky was a vast accession of recruits and horses, as did Lee in Maryland. Both fell short of their calculations, though Bragg carried off a goodly train of supplies. Forgetful of what he had really done, the South was bitter in its criticism of Bragg's failure to hold Eastern Tennessee and Kentucky. . . . Halleck now insists that Buell shall undertake a campaign in East Tennessee, still occupied by the enemy. But Buell alleges the utter impossibility of subsisting his troops so far from the railroad; and again concentrates at Nashville. Here he is relieved [October 30] and Gen. Rosecrans is appointed to the command."—T. A. Dodge, *Bird's-Eye View of our Civil War, ch.* 15.

A. D. 1862 (July).—Confiscation of the property of rebels, giving freedom to their slaves.—Immediately on the assembling of Congress at its regular session in December, 1861, "Mr. Trumbull of Illinois introduced a bill, providing that the slaves of all who had taken up arms against the United States should 'become forever thereafter free, any law to the contrary notwithstanding.' . . . On the 25th of February it came up for general debate, which was very extended. . . . Divergences of views, even among those who had been most prominent and pronounced in their antislavery action, and the general drift of the discussion, seemed to preclude any reasonable hope of agreement upon any motion or measure then before the Senate. It was therefore moved by Mr. Clark of New Hampshire to refer the whole matter, the original bill, and all motions, amendments, and substitutes, to a select committee. This, too, gave rise to a sharp debate. . . . The motion was carried by a vote of 24 to 14; and the committee, consisting of Clark, Collamer, Trumbull, Cowan, Wilson, Harris, Sherman, Henderson, and Willey, was appointed. Mr. Trumbull declining, Mr. Harlan was appointed in his place. The committee reported 'a bill to suppress insurrection, and punish treason and rebellion'; and on the 16th of May it came up for consideration. Its main provision was that at any time after the passage of the act, the President might issue his proclamation that the slaves of persons found, 30 days after the issuing of the proclamation, in arms against the government, will be free, any law or custom to the contrary; that no slave escaping from his master shall be given up, unless the claimant proves he has not given aid or comfort to the Rebellion; and that the President shall be authorized to employ persons of African descent for the suppression of the Rebellion. . . . The bill was further debated, but did not reach a vote. In the House a substantially similar course was pursued. On the first day of the regular session Mr. Eliot of Massachusetts introduced a resolution confiscating the property and freeing the slaves of those engaged in the Rebellion. It did not, however, come up for consideration till the close of the following week. . . . A motion was finally made and carried to refer the whole subject to a select committee of seven, consisting of Olin, Eliot, Noell, Hutchins, Mallory, Beaman, and Cobb. Mr. Olin was excused, and Mr. Sedgwick of New York was appointed in his place. On the 14th of May Mr. Eliot from the committee reported two bills,—the one confiscating Rebel property, and the other freeing the slaves of Rebels,—and opened the debate on 'the twin measures of confiscation and emancipation.' . . . On the 26th of May Mr. Eliot closed the debate, and the two bills he had reported from the special committee were brought to a vote. The first, or that providing for the confiscation of Rebel property, was passed by a strong majority. The second, or that freeing the slaves of Rebels, coming up for action, the first business was the disposal of the several amendments that had been offered. The amendments having all been voted down, the original bill was lost by a vote of 74 to 78. That vote was, however, reconsidered and the bill was recommitted. On the 18th of June Mr. Eliot moved a substitute for the bill reported by the committee, which was accepted by the House, and the bill, as thus amended, was passed by a vote of 82 to 54. The gist of this bill consisted in the provision, that all slaves of persons found in rebellion 60 days after the President shall issue his proclamation should be free; and the President should appoint commissioners to carry its provisions into effect. The House confiscation bill was taken up in the Senate on the 23d of June. An amendment was moved by Mr. Clark combining confiscation and emancipation. The amendment was sharply debated, but was adopted on the 28th. The bill as amended was adopted by a vote of 28 to 13. The bill as thus amended was taken up in the House on the 3d of July, and the House nonconcurred in the Senate's amendment. . . . A committee of conference was appointed, which reported, on the 11th, in substance the Senate amendment. The report was accepted by both bodies, . . . and the President gave it his approval on the 17th. It provided that all slaves of Rebels coming into the possession or under the protection of the government should be deemed captives of war, and made free; that fugitive slaves should not be surrendered; that no person engaged in the military or naval service should render fugitives on pain of being dismissed from the service; and that the President might employ persons of the African race for the suppression of the Rebellion in such manner as he might deem best."—H. Wilson, *Hist. of the Rise and Fall of the Slave Power in America, v.* 3, *ch.* 25.

A. D. 1862 (July—August: Virginia).—The end of the Peninsular Campaign.—The army at Harrison's Landing.—Results of the Seven Days fighting.—Withdrawal from the Peninsula.—"On reaching Harrison's Landing there were scarcely 50,000 men in the ranks, but on the

4th of July, when the corps commanders made their reports, it was found that the net losses of the army since the 20th of June amounted to 15,249 men, of whom 1,582 had been killed, 7,700 wounded, and 5,958 missing. This last figure comprised, besides prisoners, all the soldiers who had been left on the field of battle, whose fate, whether killed or wounded, could not be ascertained; to this number may be added, without exaggeration, 6,000 sick or lame who had gone to the hospital in consequence of the excessive fatigues of the preceding days. McClellan therefore found himself with about 84,000 men under arms, not counting those who had just joined him. The losses of Lee's army during the seven days amounted to 20,000 men, to which number must also be added at least 5,000 rendered unfit for active service by the same causes which had operated with his adversaries; this army, therefore, had undergone a diminution of 25,000 men. This was more than one-fourth of its effective force on the 26th of June. An interlude was to follow this great struggle. While McClellan was fortifying himself at Harrison's Landing, Lee, hampered like himself by the difficulty of subsisting his army, was obliged to fall back as far as the environs of Richmond. . . . In the estimation of those who did not allow themselves to be troubled by foolish alarms and were not blinded by party prejudices, McClellan's situation was far from bad. . . . Planted on the James, McClellan could, either by ascending this river or by seizing upon Petersburg, strike much deadlier blows at Richmond than when his army lay across the Chickahominy, far from any water communication. Such was the position of the two armies about the 7th of July. On this day the steamer coming from Fortress Monroe landed a passenger at Harrison's Landing, whose dress, as simple as his manners, did not at first attract any attention, but in whom people soon recognized President Lincoln. He had come to consult with the commander of the army of the Potomac about the measures to be adopted under those grave circumstances. . . . On the occasion of his interview with McClellan at Harrison's Landing, the latter had so thoroughly demonstrated the importance of that position that [the President] went back fully determined to allow the chief of the army of the Potomac full freedom of action. But General Halleck . . . claimed for himself, as commander-in-chief [lately so appointed], the exclusive direction of all the armies in the field, and Mr. Lincoln, conscious of his own incompetency, submitted to this new authority." Measures taken during July for placing the army of the Potomac again upon the offensive were altered on the 3d of August, when Halleck gave orders to McClellan to transfer his army with all possible expedition to Aquia Creek, on the Potomac, for the support of General Pope and the Army of Virginia. — Comte de Paris, *Hist. of the Civil War in Am., v. 2, bk. 1, ch. 4 and bk. 3, ch. 1.*

A. D. 1862 (July—August: Virginia).—The beginning of Pope's campaign: Cedar Mountain, or Cedar Run.—"While Lee and McClellan were resting, important events were taking place at Washington and in Northern Virginia. The Federal administration, satisfied of the impolicy of the separate departments and independent commands which they had organized in that region, had determined to unite under one leader the three armies of Banks, Fremont, and McDowell, which Jackson had beaten or baffled in succession. . . . Their united armies were henceforth to be styled the Army of Virginia, while McClellan's forces continued to be known as the Army of the Potomac. General John Pope, whose deeds and still more his dispatches in the West, had given him some reputation, was called to Washington and placed at the head of the new army. General Pope was assigned to command on the 26th of June. . . . The unification of these commands under Pope was followed by another and still more important change of the same kind. The dissatisfaction of the Federal administration with General McClellan had been steadily growing for many months. This officer's caution often exposed him, and sometimes not unjustly, to the charge of timidity. . . . No doubt other causes, such as his moderation and his conservative political views, rendered him distasteful to the progressive radicals who at this time predominated in Mr. Lincoln's cabinet; but it must be confessed that McClellan's military conduct was not such as to inspire confidence or diminish antagonisms, and it, alone, is sufficient to account for the manner in which he was treated by his government. . . . After the Seven Days' Battles, the Federal government called General Halleck from the West . . . and placed him in chief command of the armies of the United States, the position from which McClellan had been deposed in March. The order assigning General Halleck was dated July 11, but the latter did not arrive in Washington and enter upon his duties until July 23. By this appointment it was designed to give a common head to the two armies in Virginia, and insure the coöperation of McClellan and Pope. The first great question that presented itself to Halleck was, what to do with McClellan's forces, and on the day after assuming command he left Washington to visit this army. The visit seems to have satisfied him of the propriety of withdrawing the Army of the Potomac at once from the Peninsula, and of placing it on the line of the Rappahannock. . . . During the month of July, while McClellan was resting at Westover, General Pope, though in Washington, was not idle. Having devoted some days to the reorganization and equipment of his command, he directed the concentration of the mass of his forces at the eastern base of the Blue Ridge Mountains in Rappahannock County, from which position he could cover the approach to Washington, or threaten the flank of any columns going toward the Shenandoah Valley, while he prepared for an aggressive campaign. . . . General Lee on July 13 ordered Jackson with the veteran troops of his own and Ewell's division to Gordonsville to oppose Pope's advance. The force thus sent numbered about 11,000 men. Robertson's brigade of cavalry, which was already in Pope's front, added 1,000 or 1,200 more. General Lee remained with some 65,000 men between McClellan and Richmond. General Jackson reached the vicinity of Gordonsville on July 19. His arrival was opportune. The Federal reconnoitring parties had already advanced through Culpeper to the Rapidan, and on July 14 Banks had been ordered to send

forward all his cavalry under Hatch to seize Gordonsville."—Wm. Allan, *The Army of Northern Virginia in* 1862, *ch.* 20.—"After ascertaining that the enemy were in large force under General Pope . . . Jackson applied to General Lee for reinforcements. The division of A. P. Hill was immediately sent to him, and, with this accession to his small army, Jackson had no intention of remaining idle or of awaiting an attack from so powerful a foe, but determined to strike a blow himself before the enemy had time to concentrate all their forces. He therefore advanced towards them on the 7th of August. Before taking this step, it was observed that he was much in prayer, but this was his custom previous to every battle. . . . Pope's army was gathering in all its strength at Culpepper Court-House, and on the 9th of August Jackson's little army came in contact with his advance-guard about six miles from the Court-House, on the borders of a little stream called Cedar Run. Here hostilities began by a furious cannonade on both sides, lasting two hours, when, about five o'clock in the afternoon, the infantry of both armies became hotly engaged. The conflict was fierce and stubborn, but the overwhelming numbers of the enemy swept down with such impetuosity that the weaker party were forced to yield, and it looked as if it were doomed to destruction. Ewell, Early, A. P. Hill, Winder, and other commanders all fought their bravest and best — the gallant Winder receiving a mortal wound — and still they were pressed back. 'It was at this fearful moment,' says his late chief-of-staff, Dr. Dabney, 'that the genius of the storm reared his head, and in an instant the tide was turned. Jackson appeared in the mid-torrent of the highway, . . . he drew his own sword (the first time in the war), and shouted to the broken troops with a voice which pealed higher than the roar of battle: "Rally, brave men, and press forward! Your general will lead you! Jackson will lead you! Follow me!" This appeal was not in vain, and the Federals, startled by this unexpected rally, were driven from the field. They afterwards made an attempt to retrieve the fortunes of the day, which they had so nearly won, by an assault from a magnificent body of cavalry, but even this was repelled, and the troopers driven in full retreat.'. . . This battle of Cedar Run [called Cedar Mountain by the Unionists] Jackson himself pronounced the most successful of his exploits. . . . In this battle the Confederates had between eighteen and twenty thousand men engaged, while the Federals, according to their own returns, had thirty-two thousand. Jackson, however, had one incalculable advantage over the enemy, which he gained by his promptitude in seizing and holding Slaughter's Mountain — an elevation which commanded all the surrounding plains, and enabled him to overlook the whole scene of action. . . . It was to the advantage of this position as well as the bravery of his troops that he was indebted for his complete success. By this victory Pope received such a blow that he was deterred from making another advance until he could gather reinforcements. Burnside's corps was withdrawn from North Carolina and sent on to Culpepper Court-House, and it was believed that McClellan's remaining forces would be recalled from James River and sent also to swell the ranks of the grand 'Army of Virginia,' as the command of Pope was called. At all events, General Lee was convinced that McClellan was incapable of further aggression, and that the most effective way to dislodge him from the Peninsula was to threaten Washington! He therefore determined to move his army from Richmond to Gordonsville. He began his march on the 13th, and four days after, on the 17th, McClellan evacuated the Peninsula and removed his troops to the Potomac." Pope's army was withdrawn behind the Rappahannock. "General Lee now ordered Jackson to cross the Rappahannock high up, and by a forced march go to Manassas and get in Pope's rear. Other divisions were sent to Pope's front, and the two hostile armies marched along on either side of the stream, opening fire upon each other whenever the opportunity offered. Jackson continued his march up stream until he reached Warrenton Springs, on the 22d, where he found the bridge destroyed, but he passed Early's brigade over on a mill-dam, and took possession of the Springs. Before other troops could be crossed to his support, a sudden and heavy rainfall swelled the river so as to render it impassable, and Early was thus cut off from his friends and surrounded by the enemy. His situation was one of extreme peril, but he managed to conceal his troops in the woods, and hold his foes at bay with artillery, until Jackson had constructed a temporary bridge, and by the dawn of the morning of the 24th the gallant Early, with his command, had recrossed the river without the loss of a man. While a fierce artillery duel was going on across the river between A. P. Hill and the enemy, Jackson left the river-bank a few miles, and marched to the village of Jeffersonton. He was thus lost sight of by the Federals, and to Longstreet was given the task of amusing Pope by the appearance of a crossing at Warrenton Springs. Jackson was now preparing to obey Lee's order to separate himself from the rest of the army, pass around Pope to the westward, and place his corps between him and Washington at Manassas Junction."—Mrs. M. A. Jackson, *Life and letters of General Thomas J. Jackson, ch.* 17.

A. D. 1862 (July—September: Missouri—Arkansas).—Warfare with the Rebel Guerrillas.—"Since the autumn of 1861, General J. M. Schofield, Lyon's second at the battle of Wilson's Creek, had been in command of the militia of Missouri, and in June, 1862, that State was erected into a separate military district, with Schofield at its head. He was vigilant and active; but when Curtis withdrew to the Mississippi, and left Arkansas and Southern Missouri open to the operations of guerrilla bands, then numerous in the western part of the former State, he found his forces inadequate to keep down the secessionists in his district. When Price crossed the Mississippi, early in May, he sent back large numbers of Missourians to recruit guerrilla bands for active service during the summer, and these, at the middle of July, were very numerous in the interior, and were preparing to seize important points in the State. To meet the danger, Schofield obtained authority from the Governor to organize all the militia of the State. This drew a sharp dividing line

between the loyal and disloyal inhabitants. He soon had 50,000 names on his rolls, of whom nearly 20,000 were ready for effective service at the close of July, when the failure of the campaign against Richmond so encouraged the secessionists in Missouri that it was very difficult to keep them in check. Schofield's army of volunteers and militia was scattered over Missouri in six divisions, and for two months a desperate and sanguinary guerrilla warfare was carried on in the bosom of that Commonwealth, the chief theater being northward of the Missouri River, in McNeill's division, where insurgent bands under leaders like Poindexter, Porter, Cobb, and others, about 5,000 strong, were very active." They were also aided by incursions from Arkansas, under Hughes, Coffey and other leaders. The encounters were many and fierce. At Kirksville, August 6, and Chariton River, four days later, the loyal forces achieved considerable victories; at Independence (which was captured) August 11, and at Lone Jack, about the same time, they suffered defeat. These were the principal engagements of the month. With the cooperation of General Blunt, commanding in Kansas, the Arkansas invasion was driven back. "Missouri was now somewhat relieved, but the Confederates were gathering in force in Arkansas, where they were joined by conscripts from Southern Missouri and a large number of troops from Texas. Their entire number was estimated to be 50,000 at the middle of September, with General T. C. Hindman in chief command. . . . So threatening was this gathering that Schofield took the field in person, and General Curtis succeeded him in command of the District of Missouri." Schofield's vanguard, under General Salomon, encountered the enemy at Newtonia, September 30, and was defeated; but the Confederates retreated before the united forces of Schofield and Blunt and "were chased about 30 miles into Arkansas."—B. J. Lossing, *Field Book of the Civil War, v. 2, ch. 20.*

Also in: Comte de Paris, *Hist. of the Civil War in Am., v. 2, bk. 4, ch. 3.*

A. D. 1862 (August).—Draft of Militia for nine months.— By proclamation, August 4, the President ordered a draft of 300,000 militia, for nine months service unless sooner discharged.

A. D. 1862 (August).—President Lincoln's "policy" explained to Horace Greeley.—"Executive Mansion, Washington, August 22, 1862. Hon. Horace Greeley. Dear Sir: I have just read yours of the 19th, addressed to myself through the New York 'Tribune.' If there be in it any statements or assumptions of fact which I may know to be erroneous, I do not, now and here, controvert them. If there be in it any inferences which I may believe to be falsely drawn, I do not, now and here, argue against them. If there be perceptible in it an impatient and dictatorial tone, I waive it in deference to an old friend whose heart I have always supposed to be right. As to the policy I 'seem to be pursuing,' as you say, I have not meant to leave any one in doubt. I would save the Union. I would save it the shortest way under the Constitution. The sooner the national authority can be restored, the nearer the Union will be 'the Union as it was.' If there be those who would not save the Union unless they could at the same time save slavery, I do not agree with them. If there be those who would not save the Union unless they could at the same time destroy slavery, I do not agree with them. My paramount object in this struggle is to save the Union, and is not either to save or to destroy slavery. If I could save the Union without freeing any slave, I would do it; and if I could save it by freeing all the slaves, I would do it; and if I could save it by freeing some and leaving others alone, I would also do that. What I do about slavery and the colored race, I do because I believe it helps to save the Union; and what I forbear, I forbear because I do not believe it would help to save the Union. I shall do less whenever I shall believe what I am doing hurts the cause, and I shall do more whenever I shall believe doing more will help the cause. I shall try to correct errors when shown to be errors, and I shall adopt new views so fast as they shall appear to be true views. I have here stated my purpose according to my view of official duty; and I intend no modification of my oft-expressed personal wish that all men everywhere could be free. Yours, A. Lincoln."—Abraham Lincoln, *Complete Works, v. 2, pp. 227–228.*

A. D. 1862 (August: Virginia.)—General Pope's campaign: Stonewall Jackson's movement into the rear of the Federal Army.—"By the capture of Pope's papers [effected in a raid of Stuart's cavalry to the Federal rear] Lee gained an accurate knowledge of the situation of the Federal army. Acting on it, he ordered Jackson to advance his corps to Jeffersonton and secure the bridge over the Rappahannock at Warrenton Springs. . . . Jackson, on arriving at Jeffersonton in the afternoon of the 22d, found that the bridge on the Warrenton turnpike had been destroyed by the Federals. . . . On the 23d Lee ordered Longstreet's corps to follow Jackson and mass in the vicinity of Jeffersonton. The headquarters of the army was also moved to that place. . . . General Longstreet made a feint on the position of Warrenton on the morning of the 24th, under cover of which Jackson's corps was withdrawn from the front to the vicinity of the road from Jeffersonton to the upper fords of the Rappahannock. Jackson was then directed to make preparations to turn the Federal position and seize their communications about Manassas Junction. Longstreet continued his cannonade at intervals throughout the day, to which the Federals replied with increasing vigor, showing that Pope was massing his army in Lee's front. It was the object of Lee to hold Pope in his present position by deluding him with the belief that it was his intention to force a passage of the river at that point, until Jackson by a flank movement could gain his rear. Longstreet, on the morning of the 25th, resumed his cannonade with increased energy, and at the same time made a display of infantry above and below the bridge. Jackson then moved up the river to a ford eight miles above; crossing at that point and turning eastward, by a rapid march he reached the vicinity of Salem. Having made a march of 25 miles, he bivouacked for the night. Stuart's cavalry covered his right flank, the movement being masked by the natural features of the country. The next morning at dawn the march was resumed by the route through Thoroughfare Gap. The cavalry, moving well to the right, passed around the west end of Bull Run Mountain and joined the infantry at the village of Gainesville, a few miles from

the Orange and Alexandria Railroad. Pressing forward, still keeping the cavalry well to the right, Jackson struck the railroad at Bristoe Station late in the afternoon, where he captured two empty trains going east. After dark he sent a detachment under Stuart to secure Manassas Junction, the main dépôt of supplies of the Federal army. The cavalry moved upon the flanks of this position, while the infantry, commanded by Trimble, assaulted the works in front and carried them with insignificant loss, capturing two batteries of light artillery with their horses and a detachment of 300 men, besides an immense amount of army supplies. The next morning, after effectually destroying the railroad at Bristoe, Jackson . . . moved his main body to Manassas, where he allowed his troops a few hours to refresh themselves upon the abundant stores that had been captured. About 12 o'clock the sound of artillery in the direction of Bristoe announced the Federal advance. Not having transportation to remove the captured supplies, Jackson directed his men to take what they could carry off, and ordered the rest to be destroyed. General Ewell, having repulsed the advance of two Federal columns [at Bristoe Station], rejoined Jackson at Manassas. The destruction of the captured stores having been completed, Jackson retired with his whole force to Bull Run, and took a position for the night, a part of his troops resting on the battle-field of the previous year. Pope, . . . upon learning that Jackson was in his rear, . . . immediately abandoned his position on the Rappahannock and proceeded with all despatch to intercept him before he could be reinforced by Lee. His advance having been arrested on the 27th by Ewell, he did not proceed beyond Bristoe that day. Lee on the 26th withdrew Longstreet's corps from its position in front of Warrenton Springs, covering the withdrawal by a small rear-guard and artillery, and directed it to follow Jackson by the route he had taken the day before. . . . The corps bivouacked for the night in the vicinity of Salem. On the morning of the succeeding day, the 27th, a messenger appeared bringing the important and cheering news of the success of Jackson at Bristoe and Manassas. . . . Thoroughfare Gap was reached about noon of the 28th. It was quickly found to be occupied by a Federal force. Some slight attempt was made to dislodge the enemy, but without success, as their position proved too strong, and it seemed as if the movement of the Confederate army in that direction was destined to be seriously interfered with. Meanwhile, nothing further had been heard from Jackson, and there was a natural anxiety in regard to his position and possible peril. . . . Under these critical circumstances General Lee made every effort to find some available route over the mountains," and had already succeeded in doing so when his adversary saved him further trouble. "Pope . . . had ordered McDowell to retire from the Gap and join him to aid in the anticipated crushing of Jackson. McDowell did so, leaving Rickett's division to hold the Gap. In evident ignorance of the vicinity of Longstreet's corps, this force was also withdrawn during the night, and on the morning of the 29th Lee found the Gap unoccupied, and at once marched through at the head of Longstreet's column. . . . Pope had unknowingly favored the advance of the Confederate commander. His removal of McDowell from his position had been a tactical error of such magnitude that it could not well be retrieved. . . . The cannonade at the Gap on the 28th had informed Jackson of Lee's proximity. He at once took a position north of the Warrenton turnpike, his left resting on Bull Run. . . . About three o'clock the Federals bore down in heavy force upon Ewell and Taliaferro, who maintained their positions with admirable firmness, repelling attack after attack until night. The loss on both sides was considerable. . . . Jackson, with barely 20,000 men, now found himself confronted by the greater part of the Federal army. Any commander with less firmness would have sought safety in retreat. But having heard the Confederate guns at Thoroughfare Gap, he knew that Lee would join him the next day. Therefore he determined to hold his position at all hazards. By the morning of the 29th . . . Hood's division had reached the south side of the mountain, and early in the day was joined by the remainder of Longstreet's corps, by way of the open Gap. While these important movements were in progress, Pope had resumed his attack upon Jackson. . . . On the arrival of Lee, Pope discontinued his attack, and retired to the position which the year before had been the scene of the famous battle of Bull Run, or Manassas."—A. L. Long, *Memoirs of Robert E. Lee, ch.* 11.

A. D. 1862 (August—September: Virginia).—The end of General Pope's campaign: Groveton.—Second Bull Run.—Chantilly.—"By contradictory orders and the useless marches and counter-marches they involved, Pope's opportunity was thrown away, and instead of fighting Jackson's corps alone, it was the entire army of Lee with which he had to deal,—this, too, with his forces very much out of position, and he himself ignorant both of his own situation and that of the enemy. When, towards noon [August 29], Pope, coming from Centreville, reached the field near Groveton, he found the situation as follows: Heintzelman's two divisions, under Hooker and Kearney, on the right, in front and west of the Sudley Springs road; Reno and Sigel holding the centre,—Sigel's line being extended a short distance south of the Warrenton turnpike; Reynolds with his division on the left. But the commander was ignorant of the whereabouts of both Porter and McDowell, and he knew not that Longstreet had joined Jackson! The troops had been considerably cut up by the brisk skirmishing that had been going on all morning. An artillery contest had also been waged all forenoon between the opposing lines; but it was at long range and of no effect. The position of the troops in front of Jackson's intrenched line was one that promised very little success for a direct attack, and especially for a partial attack. Nevertheless, at three o'clock, Pope ordered Hooker to assault. The attempt was so unpromising that that officer remonstrated against it; but the order being imperative, he made a very determined attack with his division," and was driven back. "Too late for united action, Kearney was sent to Hooker's

assistance, and he also suffered repulse. Meanwhile, Pope had learnt the position of Porter's command, and, at half-past four in the afternoon, sent orders to that officer to assail the enemy's right flank and rear,—Pope erroneously believing the right flank of Jackson, near Groveton, to be the right of the Confederate line. Towards six, when he thought Porter should be coming into action, he directed Heintzelman and Reno to assault the enemy's left. The attack was made with vigor, especially by Kearney," but the enemy brought up heavy reserves and repelled the assault. "Turning now to the left, where Porter was to have assailed the Confederate left [right], it appears that the order which Pope sent at half-past four did not reach Porter till about dusk. He then made dispositions for attack, but it was too late. It is, however, more than doubtful that, even had the order been received in time, any thing but repulse would have resulted from its execution. . . . Contrary to Pope's opinion, he [Porter] had then, and had had since noon, Longstreet's entire corps before him. So, as firing now died away in the darkling woods on the right, a pause was put for the day to the chaos and confusion of this mismanaged battle [known as the battle of Groveton], in which many thousand men had fallen on the Union side. It would have been judicious for General Pope, in the then condition of his army, to have that night withdrawn across Bull Run and taken position at Centreville, or even within the fortifications of Washington. By doing so he would have united with the corps of Franklin and Sumner, then between Washington and Centreville. . . . With untimely obstinacy, Pope determined to remain and again try the issue of battle. To utilize Porter's corps, he drew it over from the isolated position it had held the previous day to the Warrenton road. . . . Now, by one of those curious conjunctures which sometimes occur in battle, it so was that the opposing commanders had that day formed each the same resolution: Pope had determined to attack Lee's left flank, and Lee had determined to attack Pope's left flank. And thus it came about that when Heintzelman pushed forward to feel the enemy's left, the refusal of that flank by Lee, and his withdrawal of troops to his right for the purpose of making his contemplated attack on Pope's left, gave the impression that the Confederates were retreating up the Warrenton turnpike towards Gainesville. . . . Pope . . . telegraphed to Washington that the enemy was 'retreating to the mountains,'—a dispatch which, flashed throughout the land, gave the people a few hours, at least, of unmixed pleasure. To take advantage of the supposed 'retreat' of Lee, Pope ordered McDowell with three corps—Porter's in the advance—to follow up rapidly on the Warrenton turnpike, and 'press the enemy vigorously during the whole day.' But no sooner were the troops put in motion to make this pursuit of a supposed flying foe, than the Confederates, hitherto concealed in the forest in front of Porter, uncovered themselves." The result of this misdirected movement was a fatal check, Porter's troops being fearfully cut up and driven back. "Jackson immediately took up the pursuit, and was joined by a general advance of the whole Confederate line—Longstreet extending his right so as, if possible, to cut off the retreat of the Union forces." In this attempt, however, he was foiled, and "under cover of the darkness the wearied troops retired across Bull Run, by the stone bridge, and took position on the heights of Centreville. Owing to the obscurity of the night, and the uncertainty of the fords of Bull Run, Lee attempted no pursuit." The engagement of this day is called the Second Battle of Bull Run, or the Second Battle of Manassas, as it was named by the Confederate victors. "At Centreville, Pope united with the corps of Franklin and Sumner, and he remained there during the whole of the 31st. But Lee had not yet given up the pursuit. Leaving Longstreet on the battle-field, he sent Jackson by a detour on Pope's right, to strike the Little River turnpike, and by that route to Fairfax Courthouse, to intercept, if possible, Pope's retreat to Washington. Jackson's march was much retarded by a heavy storm that commenced the day before and still continued. Pope, meantime, fell back to positions covering Fairfax Courthouse and Germantown; and on the evening of the 1st of September, Jackson struck his right, posted at Ox Hill." The short but severe action which then occurred (called the battle of Chantilly) was indecisive. Jackson's attack was repelled, but the repulse cost the lives of two excellent officers of high rank and reputation, Generals Kearney and Stevens, besides many men. "On the following day, September 2d, the army was, by order of General Halleck, drawn back within the lines of Washington."—W. Swinton, *Campaigns of the Army of the Potomac, pp.* 184–193.—"The Second Battle of Bull Run . . . was a severe defeat for General Pope; but it was nothing else. It was not a rout, nor anything like a rout. . . . Lee claims to have captured in these engagements 30 pieces of artillery and 7,000 unwounded prisoners."—J. C. Ropes, *The Army under Pope* (*Campaigns of the Civil War, v.* 4), *ch.* 8–11.

A. D. 1862 (September: Maryland).—Lee's first invasion: His cold reception and disappointment.—"The defeat of General Pope opened the way for movements not contemplated, probably, by General Lee, when he marched from Richmond. . . . He accordingly determined to advance into Maryland—the fortifications in front of Washington, and the interposition of the Potomac, a broad stream easily defended, rendering a movement in that direction unpromising. On the 3d of September, therefore, and without waiting to rest his army, which was greatly fatigued with the nearly continuous marching and fighting since it had left the Rapidan, General Lee moved toward Leesburg, crossed his forces near that place, and to the music of the bands playing the popular air, 'Maryland, my Maryland,' advanced to Frederick City, which he occupied on the 7th of September. Lee's object in invading Maryland has been the subject of much discussion. . . . It can only be said that General Lee, doubtless, left the future to decide his ultimate movements; meanwhile he had a distinct and clearly-defined aim, which he states in plain words. His object was

to draw the Federal forces out of Virginia. . . . The condition of affairs in Maryland, General Lee says, 'encouraged the belief that the presence of our army, however inferior to that of the enemy, would induce the Washington Government to retain all its available force to provide for contingencies which its course toward the people of that State gave it reason to apprehend,' and to cross the Potomac 'might afford us an opportunity to aid the citizens of Maryland in any efforts they might be disposed to make to recover their liberty.' It may be said, in summing up on this point, that Lee expected volunteers to enroll themselves under his standard, tempted to do so by the hope of throwing off the yoke of the Federal Government, and the army certainly shared this expectation. The identity of sentiment generally between the people of the States of Maryland and Virginia, and their strong social ties in the past, rendered this anticipation reasonable, and the feeling of the country at the result afterward was extremely bitter. Such were the first designs of Lee; his ultimate aim seems as clear. By advancing into Maryland and threatening Baltimore and Washington, he knew that he would force the enemy to withdraw all their troops from the south bank of the Potomac, where they menaced the Confederate communications with Richmond; when this was accomplished, as it clearly would be, his design was, to cross the Maryland extension of the Blue Ridge, called there the South Mountain, advance by way of Hagerstown into the Cumberland Valley, and, by thus forcing the enemy to follow him, draw them to a distance from their base of supplies, while his own communications would remain open by way of the Shenandoah Valley. . . . The Southern army was concentrated in the neighborhood of Frederick City by the 7th of September, and on the next day General Lee issued an address to the people of Maryland. . . . This address, couched in terms of such dignity, had little effect upon the people. Either their sentiment in favor of the Union was too strong, or they found nothing in the condition of affairs to encourage their Southern feelings. A large Federal force was known to be advancing; Lee's army, in tatters, and almost without supplies, presented a very uninviting appearance to recruits, and few joined his standard, the population in general remaining hostile or neutral. . . . Lee soon discovered that he must look solely to his own men for success in his future movements. He faced that conviction courageously; and, without uttering a word of comment, or indulging in any species of crimination against the people of Maryland, resolutely commenced his movements looking to the capture of Harper's Ferry and the invasion of Pennsylvania."—J. E. Cooke, *Life of Robert E. Lee, pt. 5, ch. 1–2.*

ALSO IN: A. L. Long, *Memoirs of Robert E. Lee, ch. 12.*

A. D. 1862 (September: Maryland).—Lee's first invasion: Harper's Ferry.—South Mountain.—Antietam.—"On the 2d of September the President went to General McClellan's house in Washington, asked him to take command again of the Army of the Potomac, in which Pope's army had now been merged, and verbally authorized him to do so at once. The first thing that McClellan wanted was the withdrawal of Miles's force, 11,000 men, from Harper's Ferry—where, he said, it was useless and helpless—and its addition to his own force. All authorities agree that in this he was obviously and unquestionably right; but the marplot hand of Halleck intervened, and Miles was ordered to hold the place. Halleck's principal reason appeared to be a reluctance to abandon a place where so much expense had been laid out. Miles, a worthy subordinate for such a chief, interpreted Halleck's orders with absolute literalness, and remained in the town, instead of holding it by placing his force on the heights that command it. As soon as it was known that Lee was in Maryland, McClellan set his army in motion northward, to cover Washington and Baltimore and find an opportunity for a decisive battle. He arrived with his advance in Frederick on the 12th, and met with a reception in striking contrast to that accorded to the army that had left the town two days before. . . . But this flattering reception was not the best fortune that befell the Union army in Frederick. On his arrival in the town General McClellan came into possession of a copy of General Lee's order, dated three days before, in which the whole campaign was laid out. . . . General Lee had taken it for granted that Martinsburg and Harper's Ferry would be evacuated at his approach (as they should have been); and when he found they were not, he had so far changed or suspended the plan with which he set out as to send back a large part of his army to capture those places and not leave a hostile force in his rear." This was easily accomplished by Jackson and McLaws, the latter of whom took possession of the heights commanding the town, where Miles waited to be trapped. "A bombardment the next day compelled a surrender when Jackson was about to attack. General Miles was mortally wounded by one of the last shots. About 11,000 men were included in the capitulation, with 73 guns. . . . Jackson, leaving the arrangements for the surrender to A. P. Hill, hurried with the greater part of his force to rejoin Lee, and reached Sharpsburg on the morning of the 16th. The range known as the South Mountain, which is a continuation of the Blue Ridge north of the Potomac, is about 1,000 feet high. The two principal gaps are Turner's and Crampton's, each about 400 feet high, with the hills towering 600 feet above it. When McClellan learned the plans of the Confederate commander, he set his army in motion to thwart them. He ordered Franklin's corps to pass through Crampton's Gap and press on to relieve Harper's Ferry; the corps of Reno and Hooker, under command of Burnside, he moved to Turner's Gap. The movement was quick for McClellan, but not quite quick enough for the emergency. He might have passed through the Gaps on the 13th with little or no opposition, and would then have had his whole army between Lee's divided forces, and could hardly have failed to defeat them disastrously and perhaps conclusively. But he did not arrive at the passes till the morning of the 14th; and by that time Lee had learned of his movement and recalled Hill and Longstreet, from Boonsboro and beyond, to defend Turner's Gap, while he ordered McLaws to look out for Crampton's. . . . There was stubborn and bloody fighting all day, with the Union forces slowly but constantly gaining ground, and at dark the field was won," at both the passes. The two engagements were called the battle of South

Mountain by the Federals, the Battle of Boonsboro by the Confederates. At Turner's Gap there was a loss of about 1,500 on each side, and 1,500 Confederates were made prisoners; at Crampton's Gap, the loss in killed and wounded was some 500 on each side, with 400 Confederate prisoners taken. The Union army had forced the passage of the mountains, but Lee had gained time to unite his scattered forces. "He withdrew across the Antietam, and took up a position on high ground between that stream and the village of Sharpsburg. . . . Lee now had his army together and strongly posted. But it had been so reduced by losses in battle and straggling that it numbered but little over 40,000 combatants. . . . McClellan had somewhat over 70,000 men. . . . The ground occupied by the Confederate army, with both flanks resting on the Potomac, and the Antietam flowing in front, was advantageous. The creek was crossed by four stone bridges and a ford, and all except the northernmost bridge were strongly guarded. The land was occupied by meadows, cornfields, and patches of forest, and was much broken by outcropping ledges. McClellan only reconnoitered the position on the 15th. On the 16th he developed his plan of attack, which was simply to throw his right wing across the Antietam by the upper and unguarded bridge, assail the Confederate left, and when this had sufficiently engaged the enemy's attention and drawn his strength to that flank, to force the bridges and cross with his left and centre. . . . All day long an artillery duel was kept up. . . . It was late in the afternoon when Hooker's corps crossed by the upper bridge, advanced through the woods, and struck the left flank, which was held by two brigades of Hood's men. Scarcely more than a skirmish ensued, when darkness came on, and the lines rested for the night where they were." At sunrise, next morning, Hooker assaulted Jackson and was seriously wounded in the fighting which followed. Sumner's corps finally joined in the attack, and all the forenoon the battle was desperate in that part of the field. "But while this great struggle was in progress on McClellan's right, his centre and left, under Porter and Burnside, did not make any movement to assist. At noon Franklin arrived from Crampton's Gap, and was sent over to help Hooker and Sumner, being just in time to check a new advance by more troops brought over from the Confederate right. At eight o'clock in the morning Burnside had been ordered to carry the bridge in his front, cross the stream, and attack the Confederate right. But, though commanded and urged repeatedly, it was one o'clock before he succeeded in doing this, and two more precious hours passed away before he had carried the ridge commanding Sharpsburg and captured the Confederate battery there. Then came up the last division of Lee's forces (A. P. Hill's) from Harper's Ferry, 2,000 strong, united with the other forces on his left, and drove Burnside from the crest and re-took the battery. Here ended the battle; not because the day was closed, or any apparent victory had been achieved, but because both sides had been so severely punished that neither was inclined to resume the fight. Every man of Lee's force had been actively engaged, but not more than two thirds of McClellan's. The reason why the Confederate army was not annihilated or captured must be plain to any intelligent reader. . . . General McClellan reported his entire loss at 12,469, of whom 2,010 were killed. General Lee reported his total loss in the Maryland battles as 1,567 killed and 8,724 wounded, saying nothing of the missing; but the figures given by his division commanders foot up 1,842 killed, 9,399 wounded, and 2,292 missing — total 13,533. . . . Nothing was done on the 18th, and when McClellan determined to renew the attack on the 19th, he found that his enemy had withdrawn from the field and crossed to Virginia by the ford at Shepherdstown. The National commander reported the capture of more than 6,000 prisoners, 13 guns, and 39 battle-flags, and that he had not lost a gun or a color. As he was also in possession of the field . . . and had rendered Lee's invasion fruitless of anything but the prisoners carried off from Harper's Ferry, the victory was his."—R. Johnson, *Short Hist. of the War of Secession, ch.* 12.

A. D. 1862 (September). — President Lincoln's Preliminary Proclamation of Emancipation, and the attitude of Northern parties on the Slavery question.— Abraham Lincoln "believed that without the Union permanent liberty for either race on this continent would be impossible. And because of this belief, he was reluctant, perhaps more reluctant than most of his associates, to strike slavery with the sword. For many months, the passionate appeals of millions of his associates seemed not to move him. He listened to all the phases of the discussion, and stated in language clearer and stronger than any opponent had used, the dangers, the difficulties, and the possible futility of the act. In reference to its practical wisdom, Congress, the Cabinet, and the country were divided. Several of his generals had proclaimed the freedom of slaves within the limits of their commands. The President revoked their proclamations. His first Secretary of War had inserted a paragraph in his annual report advocating a similar policy. The President suppressed it. On the 19th of August, 1862, Horace Greeley published a letter addressed to the President, entitled 'The Prayer of Twenty Millions,' in which he said, 'On the face of this wide earth, Mr. President, there is not one disinterested, determined, intelligent champion of the Union cause who does not feel that all attempts to put down the rebellion and at the same time uphold its inciting cause are preposterous and futile.' To this the President responded in that ever-memorable reply of August 22, in which he said: —'If there be those who would not save the Union unless they could at the same time save slavery, I do not agree with them. If there be those who would not save the Union unless they could at the same time destroy slavery, I do not agree with them. My paramount object is to save the Union, and not either to save or to

destroy slavery. If I could save the Union without freeing any slave, I would do it. If I could save it by freeing all the slaves, I would do it,—and if I could do it by freeing some and leaving others alone, I would also do that. What I do about slavery and the colored race, I do because I believe it helps to save the Union; and what I forbear, I forbear because I do not believe it would help to save the Union. I shall do less whenever I shall believe that what I am doing hurts the cause, and I shall do more whenever I believe doing more will help the cause.' Thus, against all importunities on the one hand and remonstrances on the other, he took the mighty question to his own heart, and, during the long months of that terrible battle-summer, wrestled with it alone. But at length he realized the saving truth, that great unsettled questions have no pity for the repose of nations. On the 22d of September, he summoned his Cabinet to announce his conclusion. It was my good fortune, on that same day, and a few hours after the meeting, to hear, from the lips of one who participated, the story of the scene. As the chiefs of the Executive Departments came in, one by one, they found the President reading a favorite chapter from a popular humorist. He was lightening the weight of the great burden which rested upon his spirit. He finished the chapter, reading it aloud. And here I quote, from the published Journal of the late Chief Justice, an entry, written immediately after the meeting, and bearing unmistakable evidence that it is almost a literal transcript of Lincoln's words: 'The President then took a graver tone and said: "Gentlemen I have, as you are aware, thought a great deal about the relation of this war to slavery; and you all remember that, several weeks ago, I read to you an order I had prepared upon the subject, which, on account of objections made by some of you, was not issued. Ever since then my mind has been much occupied with this subject, and I have thought all along that the time for acting on it might probably come. I think the time has come now. I wish it was a better time. I wish that we were in a better condition. The action of the army against the rebels has not been quite what I should have best liked. But they have been driven out of Maryland, and Pennsylvania is no longer in danger of invasion. When the rebel army was at Frederick, I determined as soon as it should be driven out of Maryland to issue a proclamation of emancipation, such as I thought most likely to be useful. I said nothing to any one, but I made a promise to myself and (hesitating a little) to my Maker. The rebel army is now driven out, and I am going to fulfil that promise. I have got you together to hear what I have written down. I do not wish your advice about the main matter, for that I have determined for myself. This I say without intending anything but respect for any one of you. But I already know the views of each on this question. They have been heretofore expressed, and I have considered them as thoroughly and carefully as I can. What I have written is that which my reflections have determined me to say. If there is anything in the expressions I use, or in any minor matter which any of you thinks had best be changed, I shall be glad to receive your suggestions. One other observation I will make I know very well that many others might, in this matter as in others, do better than I can; and if I was satisfied that the public confidence was more fully possessed by any one of them than by me, and knew of any constitutional way in which he could be put in my place, he should have it. I would gladly yield it to him. But though I believe I have not so much of the confidence of the people as I had some time since, I do not know that, all things considered, any other person has more; and, however this may be, there is no way in which I can have any other man put where I am. I am here. I must do the best I can and bear the responsibility of taking the course which I feel I ought to take." The President then proceeded to read his Emancipation Proclamation, making remarks on the several parts as he went on, and showing that he had fully considered the subject in all the lights under which it had been presented to him.' The Proclamation was amended in a few matters of detail. It was signed and published that day."—J. A. Garfield, *Works, v.* 2, *pp.* 538–540.—"I was alone with Mr. Lincoln more than two hours of the Sunday next after Pope's defeat in August, 1862. That was the darkest day of the sad years of the war. . . . When the business to which I had been summoned by the President was over—strange business for the time: the appointment of assessors and collectors of internal revenue—he was kind enough to ask my opinion as to the command of the army. The way was thus opened for conversation, and for me to say at the end that I thought our success depended upon the emancipation of the slaves. To this he said: 'You would not have it done now, would you? Must we not wait for something like a victory?' This was the second and most explicit intimation to me of his purpose in regard to slavery. In the preceding July or early in August, at an interview upon business connected with my official duties, he said, 'Let me read two letters,' and taking them from a pigeon-hole over his table he proceeded at once to do what he had proposed. I have not seen the letters in print. His correspondent was a gentleman in Louisiana, who claimed to be a Union man. He tendered his advice to the President in regard to the reorganization of that State, and he labored zealously to impress upon him the dangers and evils of emancipation. The reply of the President is only important from the fact that when he came to that part of his correspondent's letter he used this expression: 'You must not expect me to give up this government without playing my last card.' Emancipation was his last card. He waited for the time when two facts or events should coincide. Mr. Lincoln was as devoted to the Constitution as was ever Mr. Webster. In his view, a military necessity was the only ground on which the overthrow of slavery in the States could be justified. Next, he waited for a public sentiment in the loyal States not only demanding emancipation but giving full assurance that the act would be sustained to the end. As for himself, I cannot doubt that he had contemplated the policy of emancipation for many months, and anticipated the time when he should adopt it."—G. S. Boutwell, *Reminiscences of Abraham Lincoln by Distinguished Men of his Time, pp.* 123–125.—"It was after all efforts for voluntary emancipation by the states interested, with pecuniary aid from the national treasury,

had failed [that the President determined to decree emancipation in the rebellious states by a military order]. To Mr. Seward and myself the President communicated his purpose, and asked our views, on the 13th of July 1862. It was the day succeeding his last unsuccessful and hopeless conference with the representatives in Congress from the border slave states, at a gloomy period of our affairs, just after the reverses of our armies under McClellan before Richmond. The time, he said, had arrived when we must determine whether the slave element should be for or against us. Mr. Seward . . . was appalled and not prepared for this decisive step, when Mr. Lincoln made known to us that he contemplated, by an executive order, to emancipate the slaves. Startled with so broad and radical a proposition, he informed the President that the consequences of such an act were so momentous that he was not prepared to advise on the subject without further reflection. . . . While Mr. Seward hesitated and had the subject under consideration, the President deliberately prepared his preliminary proclamation, which met the approval, or at least the acquiescence, of the whole Cabinet, though there were phases of opinion not entirely in accord with the proceedings. Mr. Blair, an original emancipationist, and committed to the principle, thought the time to issue the order inopportune, and Mr. Bates desired that the deportation of the colored race should be coincident with emancipation. Aware that there were shades of difference among his counsellors, and hesitation and doubt with some, in view of the vast responsibility and its consequences, the President devised his own scheme, held himself alone accountable for the act, and, unaided and unassisted, prepared each of the proclamations of freedom."—G. Welles, *Lincoln and Seward, pp.* 210–212.—The preliminary or monitory Proclamation of Emancipation, issued on the 22d of September, 1862, was as follows:

"'I, Abraham Lincoln, President of the United States of America, and Commander-in-Chief of the Army and Navy thereof, do hereby proclaim and declare that hereafter, as heretofore, the war will be prosecuted for the object of practically restoring the constitutional relations between the United States and each of the States and the people thereof, in which States that relation is or may be suspended or disturbed. That it is my purpose, upon the next meeting of Congress, to again recommend the adoption of a practical measure, tendering pecuniary aid to the free acceptance or rejection of all the slave States, so-called, the people whereof may not then be in rebellion against the United States, and which States may then have voluntarily adopted, or thereafter may voluntarily adopt, the immediate or gradual abolishment of slavery within their respective limits; and that the effort to colonize persons of African descent, with their consent, upon this continent or elsewhere, with the previously obtained consent of the governments existing there, will be continued. That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any State, or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom. That the Executive will, on the first day of January aforesaid, by proclamation, designate the States, or parts of States if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State, or the people thereof, shall, on that day, be in good faith represented in the Congress of the United States by members chosen thereto at elections, wherein a majority of the qualified voters of such State shall have participated, shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such State, and the people thereof, are not then in rebellion against the United States.' Then, after reciting the language of 'An act to make an additional article of war,' approved March 13, 1862, and also sections 9 and 10 of the Confiscation Act, approved July 17, 1862, and enjoining their enforcement upon all persons in the military and naval service, the proclamation concludes: 'And I do hereby enjoin upon and order all persons engaged in the military and naval service of the United States to observe, obey, and enforce, within their respective spheres of service, the acts and sections above recited. And the Executive will, in due time, recommend that all citizens of the United States, who shall have remained loyal thereto throughout the rebellion, shall, upon the restoration of the constitutional relations between the United States and the people, if that relation shall have been suspended or disturbed, be compensated for all losses by acts of the United States, including the loss of slaves.'"—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 6, *ch.* 6 *and* 8.

A. D. 1862 (September—October: Mississippi).—Union successes under Grant.—Iuka and Corinth.—"In July, Pope was ordered to Virginia, and on the 17th of that month Halleck was assigned to the command of all the armies, superseding McClellan. He repaired at once to Washington, and Grant was directed to establish his headquarters at Corinth. Grant's jurisdiction was not, however, enlarged by the promotion of Halleck: on the contrary, the new general-in-chief first offered the command of the Army of the Tennessee to Colonel Robert Allen, a quarter-master, who declined it, whereupon it was allowed to remain under Grant. He was, however, left somewhat more independent than while Halleck had been immediately present in the field. Four divisions of his army (including Thomas's command), were within the next two months ordered to Buell, who was stretching out slowly, like a huge, unwieldy snake, from Eastport to Decatur, and from Decatur towards Chattanooga. This subtraction put Grant entirely on the defensive. He had possession of Corinth, the strategic point, but was obliged to hold the railroads from that place and Bolivar, north to Columbus, which last, on account of the low water in the Tennessee, he had made his base of supplies. . . . He remained himself eight weeks at Corinth, narrowly watching the enemy, who, commanded by Van Dorn and Price, harassed and threatened him continually.

During this time, he directed the strengthening and remodelling of the fortifications of Corinth. . . . New works, closer to the town, were . . . erected. . . . Van Dorn at last determined to move part of his force (under Price), east of Grant, apparently with a view to crossing the Tennessee and reënforcing Bragg in the Kentucky campaign. Grant notified Halleck of the probability of such a movement, and of his intention to prevent it. . . . On the 13th [of September], Price advanced from the south and seized Iuka, 21 miles east of Corinth. . . . Grant had called in his forces some days before to the vicinity of Corinth, had repeatedly cautioned all his commanders to hold their troops in readiness, and when the enemy's cavalry moved towards Iuka, and cut the railroad and telegraph wires between that place and Burnsville, seven miles to the westward, Grant began his operations. Price was at Iuka, and Van Dorn four days off, to the southwest, threatening Corinth. Grant's object was to destroy Price, before the two could concentrate, and then to get back to Corinth and protect it against Van Dorn. He accordingly ordered Brigadier-General Rosecrans, whose troops were posted south of Corinth, to move by way of Rienzi, along the south side of the Memphis and Charleston Railroad, and attack Iuka from that direction; while Major-General Ord, with a force brought hurriedly from Bolivar and Jackson, was to push towards Burnsville, and from there take roads on the north side of the railroad, attacking Iuka from that quarter. Ord had 8,000 men, and Rosecrans reported 9,000, a greater force combined than Price had, according to Grant's estimate." Rosecrans's movement was delayed, and he was attacked (September 19) in heavy force as he neared Iuka, Ord's advance having been held back waiting for him. He kept his ground, but lost in the action a battery of artillery, besides 736 men, killed and wounded. That night the enemy retreated from Iuka, over a road which Rosecrans was expected to occupy, but did not "By the battle of Iuka, the enemy was simply checked in his plans, not seriously crippled in his force. Price moved around by a circuitous route and joined Van Dorn, and the same state of affairs continued which had annoyed Grant for so many weeks. He put Rosecrans in command at Corinth, and Ord at Bolivar, and on the 23d of September removed his own headquarters to Jackson, from which point he could communicate more readily with all points of his district, including Memphis and Cairo. The rebels were in force at La Grange and Ripley. . . . At last it was rendered certain . . . that Corinth was to be the place of attack. Grant thereupon directed Rosecrans to call in his forces, and sent Brigadier-General McPherson to his support from Jackson, with a brigade of troops." He also "hurried Ord and Hurlbut by way of Pocahontas from Bolivar, 44 miles away, to be ready to strike Van Dorn in flank or rear, as he advanced, and at least to create a diversion, if they could not get into the town. On the 2d of October the rebel array, under Van Dorn, Price, Lovell, Villepigue, and Rust, appeared in front of Corinth. . . . On the 3d the fighting began in earnest. Rosecrans had about 19,000 men, and the enemy had collected 38,000 for this important movement, which was to determine the possession of northern Mississippi and West Tennessee. Rosecrans pushed out about five miles, towards Chewalla, Grant having ordered him to attack, if opportunity offered; but the enemy began the fight, and, on the afternoon of the 3d, the battle turned in favor of Van Dorn. Rosecrans was driven back to his defences on the north side of Corinth, and it was now found how important was the labor bestowed on these fortifications, by Grant's order, a month previous. The enemy was checked until morning; but, early on the 4th, the whole rebel army, flushed with the success of the day before, assaulted the works. The fighting was fierce; the rebels charging almost into the town, when an unexpected fire from the forts drove them back in confusion. Again and again, they advanced to the works, but each time were received with a determination equal to their own. Once, the national troops came near giving way entirely, but Rosecrans rallied them in person, and the rebels were finally repulsed before noon, with a loss admitted by themselves to be double that of Rosecrans. The national loss was 315 killed, 1,812 wounded, and 232 prisoners and missing. Rosecrans reported the rebel dead at 1,423, and took 2,225 prisoners. . . . The repulse was complete, by 11 o'clock in the morning, but unfortunately was not followed up by Rosecrans, till the next day. The rebels, however, started off in haste and disorder immediately after the fight; and on the 5th, while in full retreat, were struck in flank, as Grant had planned, by Hurlbut and Ord, and the disaster was rendered final. This occurred early on the morning of the 5th, at the crossing of the Hatchie river, about ten miles from Corinth. . . . A battery of artillery and several hundred men were captured, and the advance was dispersed or drowned. . . . Had Rosecrans moved promptly the day before, he would have come up in the rear of Van Dorn, either as he was fighting Ord, or while attempting to pass this defile [six miles up the stream, where Van Dorn finally made his crossing]. In either event, the destruction of the rebels must have been complete. . . . These two fights relieved the command of West Tennessee from all immediate danger."—A. Badeau, *Military Hist. of Ulysses S. Grant, v.* 1, *ch.* 4.—"Satisfied that the enemy was retreating [on the 4th], I ordered Sullivan's command to push him with a heavy skirmish line, and to keep constantly feeling them. I rode along the lines of the commands, told them that, having been moving and fighting for three days and two nights, I knew they required rest, but that they could not rest longer than was absolutely necessary. I directed them to proceed to their camps, provide five days' rations, take some needed rest, and be ready early next morning for the pursuit."—W. S. Rosecrans, *The Battle of Corinth* (*Battles and Leaders, v.* 2), *p.* 753.

A. D. 1862 (September — December: Missouri—Arkansas). — Social demoralizations of the Civil War. — Battle of Prairie Grove. — "The dispersion and suppression of the guerrilla bands [in Missouri] did not serve wholly to terminate local disturbances and offenses. The restraints of a common public opinion no longer existed. Neighborhood good-will had become changed to neighborhood hatred and feud. Men took advantage of the license of war to settle personal grudges by all the violations of law, varying from petty theft to assassination; and

parallel with this thirst for private revenge was the cupidity which turned crime into a source of private gain. . . . A rearrangement of military command appears in an order of the President under date of September 19, 1862, directing that Missouri, Arkansas, Kansas, and the bordering Indian Territory should constitute a new department to be called the Department of the Missouri, to be commanded by Major-General Samuel R. Curtis. . . . This new arrangement served to change the relative positions of Schofield and Curtis. The former, gathering what troops he could, took the field in a campaign towards Southwest Missouri to meet the expected invasion from Arkansas, while the latter, recalled from a short leave of absence, came to St. Louis (September 24, 1862) to take up his headquarters and assume the general administration of the new Department of the Missouri. . . . The difficulties in the military situation had grown primarily out of the error of Halleck . . . in postponing the opening of the Mississippi River. When, in the spring and summer of 1862, Halleck abandoned all thought of pursuing that prime and comprehensive object, and left Vicksburg to grow up into an almost impregnable Confederate citadel, he blighted the possibility of successful Union campaigns on both sides of the great river. . . . From the midsummer of 1862, therefore, until the fall of Vicksburg in midsummer of 1863, military campaigning in the trans-Mississippi country ceases to have any general significance. . . . The only action of importance which marks the military administration of Curtis was the battle of Prairie Grove in the northwest corner of Arkansas, where on the 7th of December the detachments respectively commanded by the Union generals James G. Blunt (who had been hovering all summer along the border of Kansas) and Francis J. Herron, who, finding Blunt pressed by the enemy coming northward with a view of entering Missouri, advanced by forced marches from near Springfield and formed a junction with Blunt just in the nick of time to defeat the Confederates under General Hindman. The losses on each side were about equal, and on the day following the engagement the Confederates retreated southward across the protecting barrier of the Boston Mountains. It was in a diminished degree a repetition of the battle of Pea Ridge, fought in the preceding March within 20 or 30 miles of the same place. . . . So effectually did this engagement serve to scatter the rebel forces that Schofield reported January 31, 1863, 'There is no considerable force of the enemy north of the Arkansas River; indeed I believe they have all gone or are going, as rapidly as possible, to Vicksburg. Ten thousand infantry and artillery can be spared from Southern Missouri and Northern Arkansas.'"—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 6, *ch.* 18.

Also in: W. Baxter, *Pea Ridge and Prairie Grove.*—O. J. Victor, *Hist. of the Southern Rebellion, div.* 10, *ch.* 4 (*v.* 3).—W. Britton, *Memoirs of the Rebellion on the Border, ch.* 1.

A. D. 1862 (October—December: Virginia). —The final removal of McClellan.—Burnside at Fredericksburg.—"Both armies . . . felt the need of some repose; and, glad to be freed from each other's presence, they rested on their arms—the Confederates in the Shenandoah Valley, in the vicinity of Winchester, and the army of the Potomac near the scene of its late exploits, amid the picturesque hills and vales of Southwestern Maryland. The movement from Washington into Maryland to meet Lee's invasion was defensive in its purpose, though it assumed the character of a defensive-offensive campaign. Now that this had been accomplished and Lee driven across the frontier, it remained to organize on an adequate scale the means of a renewal of grand offensive operations directed at the Confederate army and towards Richmond. The completion of this work, including the furnishing of transportation, clothing, supplies, etc., required upwards of a month, and during this period no military movement occurred, with the exception of a raid into Pennsylvania by Stuart. About the middle of October, that enterprising officer, with twelve or fifteen hundred troopers, crossed the Potomac above Williamsport, passed through Maryland, penetrated Pennsylvania, occupied Chambersburg, where he burnt considerable government stores, and after making the entire circuit of the Union army, recrossed the Potomac below the mouth of the Monocacy. He was all the way closely pursued by Pleasonton with 800 cavalry. . . On the recrossing of the Potomac by Lee after Antietam, McClellan hastened to seize the débouché of the Shenandoah Valley, by the possession of Harper's Ferry. . . . At first McClellan contemplated pushing his advance against Lee directly down the Shenandoah Valley, as he found that, by the adoption of the line east of the Blue Ridge, his antagonist, finding the door open, would again cross to Maryland. But this danger being removed by the oncoming of the season of high-water in the Potomac, McClellan determined to operate by the east side of the Blue Ridge, and on the 26th his advance crossed the Potomac by a ponton-bridge at Berlin, five miles below Harper's Ferry. By the 2d November the entire army had crossed at that point. Advancing due southward towards Warrenton, he masked the movement by guarding the passes of the Blue Ridge, and by threatening to issue through these, he compelled Lee to retain Jackson in the Valley. With such success was this movement managed, that on reaching Warrenton on the 9th, while Lee had sent half of his army forward to Culpepper to oppose McClellan's advance in that direction, the other half was still west of the Blue Ridge, scattered up and down the Valley, and separated from the other moiety by at least two days' march. McClellan's next projected move was to strike across obliquely westward and interpose between the severed divisions of the Confederate force; but this step he was prevented from taking by his sudden removal from the command of the Army of the Potomac, while on the march to Warrenton. Late on the night of November 7th, amidst a heavy snow-storm, General Buckingham, arriving post-haste from Washington, reached the tent of General McClellan at Rectortown. He was the bearer of the following dispatch, which he handed to General McClellan: . . . 'By direction of the President of the United States, it is ordered that Major-General McClellan be relieved from the command of the Army of the Potomac, and that Major-General Burnside take the command of that army.' . . . It chanced that General Burnside was at the moment with him in his tent. Opening the dispatch and reading it, without a change of countenance or of voice,

McClellan passed over the paper to his successor, saying, as he did so: 'Well, Burnside, you are to command the army.' Thus ended the career of McClellan as head of the Army of the Potomac. . . . The moment chosen was an inopportune and an ungracious one; for never had McClellan acted with such vigor and rapidity — never had he shown so much confidence in himself or the army in him. And it is a notable fact that not only was the whole body of the army — rank and file as well as officers — enthusiastic in their affection for his person, but that the very general appointed as his successor was the strongest opponent of his removal."—W. Swinton, *Campaigns of the Army of the Potomac, ch.* 6, *sect.* 2–3. —"It is dangerous to shift commanders on the eve of battle, and our cavalry had already engaged the Confederates'; it is more dangerous to change the plans of troops moving in the vicinity of the enemy. But as if impelled to do some new thing . . . the new commander of the Army of the Potomac determined upon a flank movement by his left on the north of the river towards Fredericksburg. . . . Only by movements equally wary and rapid, as well as by sure means of crossing the river, could Burnside's manœuvre possibly succeed. In this last element he counted on Halleck, and, of course, failed. The promised pontoons did not, and could scarcely have been expected to come. Arrived at Fredericksburg Burnside still might have crossed by the fords, for the water was low. And once in possession of the heights beyond the city he could afford to wait. But, slower than even his predecessor, Burnside sat down at Falmouth, on the north side of the river, while Lee, having learned of his movement, by forced marches concentrated his army on the opposite bank, and prepared to erect impregnable defences in his front. . . . Before Burnside got ready to take any active steps, Marye's Heights, back of Fredericksburg, had been crowned by a triple line of works, and Lee had brought together nearly 90,000 troops to man them. Two canals and a stone wall in front of the left, as well as open, sloping ground on both flanks, served to retain an attacking party for a long period under fire. To assault these works in front was simple madness. To turn them below necessitated the crossing of a wide and now swollen river, in the face of a powerful enemy in his immediate front. . . . To turn them above was practicable, but it was a confessed return to McClellan's plan. Burnside chose the first. Preparations for crossing were begun. The better part of three days [December 11–13] was consumed in throwing the bridges and putting over the two Grand Divisions of Franklin and Sumner, all of which was accomplished under fire. But Lee was by no means unwilling to meet the Army of the Potomac after this fashion. Such another happy prospect for him was not apt soon again to occur. He did not dispute the crossing in force. Burnside's one chance in a hundred lay in a concentrated assault sharply pushed home before the enemy could oppose an equal force. But in lieu of one well-sustained attack, or of two quite simultaneous, Burnside frittered away this single chance by putting in Franklin on the left and Sumner on the right, without concerted action." Both assaults were bloodily repulsed. "Hooker is ordered across. Under protest, and yet Hooker lacked not stomach for a fight, he obeys the useless order, and leads his men into the slaughter pen. . . . All is in vain. Even the Army of the Potomac cannot do the impossible. The defeated troops are huddled into Fredericksburg, and gradually withdrawn across the river. Burnside was insane enough to wish to repeat the assault next day. But the counsels of his officers prevailed on him to desist. No such useless slaughter, with the exception, perhaps, of Cold Harbor, occurred during our war, and 13,000 men paid the penalty. The enemy's loss was but one in three of ours."—T. A. Dodge, *Bird's-Eye View of Our Civil War, ch.* 21.

A. D. 1862 (December: On the Mississippi). —The second attempt against Vicksburg.—General Sherman and Admiral Porter.—Miscarriage of Grant's plans.—"Rear-Admiral Porter took command of the Mississippi squadron in October, 1862. . . . Up to this time the gun-boats had, strictly speaking, been under the control of the Army, but now all this was changed, and the Mississippi Squadron, like all the other naval forces, was brought directly under the supervision of the Secretary of the Navy. . . . The new arrangement left the commander of the squadron at liberty to undertake any expedition he thought proper, and he was not in the least hampered by any instructions from the Navy Department. . . . Before Admiral Porter left Washington he was informed by the President that General McClernand had been ordered to raise an Army at Springfield, Ill., to prosecute the siege of Vicksburg. The President expressed the hope that the rear-admiral would co-operate heartily with General McClernand in the operations to be carried on. But as Vicksburg never would have been taken if it had depended on General McClernand's raising an Army sufficient for the purpose, the Admiral, immediately on his arrival at Cairo, sent a message to General Grant, at Holly Springs, Miss., informing him of McClernand's intention; that he, Porter, had assumed command of the Mississippi Squadron, and was ready to cooperate with the Army on every occasion where the services of the Navy could be useful. A few days afterwards General Grant arrived at Cairo and proposed an expedition against Vicksburg, and asking the rear-admiral, if he could furnish a sufficient force of gun-boats, to accompany it. Grant's plan was to embark Sherman from Memphis, where he then was, with 30,000 soldiers, to be joined at Helena, Arkansas, by 10,000 more. Grant himself would march from Holly Springs with some 60,000 men upon Granada. General Pemberton would naturally march from Vicksburg to stop Grant at Granada, until reinforcements could be thrown into Vicksburg from the south, and while Pemberton was thus absent with the greater part of his Army, Sherman and Porter could get possession of the defences of Vicksburg. General Grant having been informed that the gun-boats would be ready to move at short

notice, and having sent orders to Sherman to put his troops aboard the transports as soon as the gun-boats arrived in Memphis, returned immediately to Holly Springs to carry out his part of the programme. . . . The expedition from Memphis got away early in December, 1862, Commander Walke, in the 'Carondelet,' being sent ahead with [three iron-clads and two so-called 'tin-clads'] . . . to clear the Yazoo River of torpedoes and cover the landing of Sherman's Army when it should arrive. This arduous and perilous service was well performed," but one of the iron-clads engaged in it, the Cairo, was sunk by a torpedo. "General Sherman moved his transports to a point on the river called Chickasaw Bayou without the loss of a man from torpedoes or sharpshooters, his landing [December 27] being covered in every direction by the gunboats. Sherman first made a feint on Haines' Bluff, as if to attack the works, and then landed at Chickasaw Bayou. Owing to the late heavy rains he found the roads to Vicksburg heights almost impassable, and when he attempted to advance with his Army he was headed off by innumerable bayous, which had to be bridged, or corduroy roads built around them. It was killing work. Even at this time Vicksburg had been fortified at every point, and its only approaches by land led through dense swamps or over boggy open ground, where heavy guns were placed, so as to mow down an advancing Army. A general has seldom had so difficult a task assigned him, and there was little chance of Sherman's succeeding unless Pemberton had drawn off nearly all his forces to oppose Grant's advance on Granada. . . . Sherman and his Army overcame everything and at last reached terra firma. In the meanwhile the Navy was doing what it could to help the Army. . . . Grant had left Holly Springs with a large Army at the time he had appointed, merely with the design of drawing Pemberton from Vicksburg and thus helping Sherman in his attack on that place. . . . Grant moved towards Granada, and everything looked well; but the Confederate General, Earl Van Dorn, dashed into Holly Springs, 28 miles in the rear of the Union Army, capturing the garrison and all their stores. At the same time General Forrest pushed his cavalry into West Tennessee, cutting the railroad to Columbus at several points between that place and Jackson. . . . Due precautions had been taken to prevent this mishap by leaving a strong force behind at Holly Springs, but the commanding officer was not on the alert and his capture was a complete surprise. In this raid of the Confederates a million dollars' worth of stores were destroyed. Under the circumstances it was impossible for Grant to continue his march on Granada, which Pemberton perceiving, the latter returned to Vicksburg in time to assist in Sherman's repulse. . . . Sherman made all his arrangements to attack the enemy's works on the 29th of December, 1862, and the assault took place early on that day. One division succeeded in occupying the batteries on the heights, and hoped shortly to reach those commanding the city of Vicksburg, but the division that was to follow the advance was behind time and the opportunity was lost. A portion of Pemberton's Army had returned from Granada just in time to overwhelm and drive back the small force that had gained the hills. . . . The enemy did not follow, being satisfied with driving our troops from the heights, and there was nothing left for Sherman to do but to get his Army safely back to the transports."—D. D. Porter, *Naval Hist. of the Civil War, ch.* 24.

Also in: S. M. Bowman and R. B. Irwin, *Sherman and his Campaigns, ch.* 7.—W. T. Sherman, *Memoirs, v.* 1, *ch.* 11.

A. D. 1862-1863 (December—January: Tennessee).—Bragg and Rosecrans.—The Battle of Stone River, or Murfreesborough.—"The Confederate government was greatly disappointed with the issue of Bragg's campaign. Scarcely had he reached Chattanooga when he was ordered to move northward again. Rosecrans, on assuming command of Buell's army, . . . concentrated his forces at Nashville, and there accumulated large supplies. . . . Bragg had already reached Murfreesborough on his second northward march from Chattanooga. Rosecrans had given out that it was his intention to take up his winter quarters at Nashville, and Bragg, supposing that this would be the case, sent out strong detachments of cavalry under Morgan and Forrest, the former being ordered to break Rosecrans's communications. As it was about the season of Christmas, Murfreesborough was the scene of much gayety . . . and the giddy Confederates danced on floors carpeted with the American flag. Suddenly, on the 26th of December, Rosecrans moved. His march commenced in a heavy rain. The Confederate outposts retired before his advance, the pressure upon them being so vigorous that they had not time to destroy the bridges on the Jefferson and Murfreesborough turnpikes. On the 30th, Bragg, finding he was about to be assailed, had concentrated his army a couple of miles in front of Murfreesborough. The position of the national army, which was 43,000 strong on the evening of that day, was on the west side of Stone River, a sluggish stream fringed with cedar brakes, and here flowing in a north-northwesterly course. The line ranged nearly north and south, and was three or four miles in length. Crittenden was on its left, with three divisions, Wood, Vancleve, Palmer; Thomas in the centre, with two divisions, Negley and Rousseau, the latter in reserve; McCook on the right with three, Sheridan, Davis, Johnson. The left wing touched the river. . . . Bragg's army, 62,000, stood between Rosecrans and Murfreesborough. . . . Breckinridge's division formed his right, in his centre, under Polk, were two divisions, those of Withers and Cheatham; on his left, under Hardee, two divisions, Cleburne and McCown. The river separated Breckinridge from the rest of the Confederate army. Rosecrans had concentrated two thirds of his force on his left. His intention was that his right wing, standing on the defensive, should simply hold its ground; but his extreme left, the divisions of Wood and Vancleve, crossing Stone River, should assail Breckinridge's division, exposed there, and seize the heights. . . . On his part, also, Bragg had determined to take the offensive. . . . Both intended to strike with the left, and therefore both massed their force on that wing. . . . In the dawn of the last day of the year (1862), while Rosecrans's left was rapidly crossing Stone River to make its expected attack, Bragg, with his left, had already anticipated him. Coming out of a fog which had settled on the battle-field, he fell

furiously upon Johnson's division, and so unexpectedly that two of its batteries were taken before a gun could be fired. The Confederate success was decisive. Johnson's division, which was on the extreme national right, was instantly swept away. Davis, who stood next, was assailed in front and on his uncovered flank. He made a stout resistance, but the shock was too great; he was compelled to give way, with the loss of many guns. And now the triumphant Confederate left, the centre also coming into play, rushed upon the next division — but that was commanded by Sheridan. Rosecrans's aggressive movement was already paralyzed; nay, more, it had to be abandoned. He had to withdraw his left for the purpose of saving his right and defending his communications. He must establish a new line. The possibility of doing this — the fate of the battle — rested on Sheridan." He held his ground for an hour, until "the cartridge-boxes of his men were empty. The time had come when even Sheridan must fall back. But, if he had not powder, he had steel. The fixed bayonets of his reserve brigade covered him, and he retired, unconquered and unshaken, out of the cedar thicket toward the Nashville road. In this memorable and most glorious resistance he had lost 1,630 men. 'Here's all that are left,' he said to Rosecrans, whom he had saved and now met. After Sheridan had been pushed back, there was nothing for Negley but to follow. . . . Meantime, on a knoll in the plain to which these divisions had receded, Rosecrans had massed his artillery. He was forming a new line, in which the army would face southwestwardly, with the Nashville turnpike on its rear." Against this new line the Confederates dashed themselves, desperately but vainly, four times that day, and were repelled with horrible slaughter. "Bragg, unwilling to be foiled, now brought Breckinridge, who had hitherto been untouched, across the river to make a final attempt on Rosecrans's left flank with 7,000 fresh men. His first attack was repulsed; he made a second; it shared the same fate. So stood affairs when night came, . . . the closing night of 1862. On New Year's Day nothing was done; the two armies, breathless with their death-struggle, stood looking at each other. On January 2d Rosecrans was found, not retreating, but busily engaged in trying to carry out his original plan. He had made his position impregnable; he had thrown a force across Stone River, and, as he at first intended, was getting ready to crown with artillery the heights beyond the east bank. Hereupon Bragg brought Breckinridge back to his old position, ordering him to drive the enemy across the river — a task which that officer bravely tried, but only imperfectly accomplished, for the artillery on the opposite bank tore his division to pieces. In twenty minutes he lost 2,000 men. A violent storm prevented the renewal of the battle on the 3d. On that night Bragg, despairing of success, withdrew from Murfreesborough, retreating to Tullahoma. . . . In these dreadful battles the Confederates lost 14,700 men. On the national side there were killed 1,553, wounded more than 7,000, prisoners more than 3,000; more than one third of its artillery and a large portion of its train were taken. The losses were about one fourth of each army. Henceforth the Confederates abandoned all thought of crossing the Ohio River."—J. W. Draper, *Hist. of the Am. Civil War, ch.* 53 (*v.* 2).—"The enemy in retiring did not fall back very far — only behind Duck River to Shelbyville and Tullahoma — and but little endeavor was made to follow him. Indeed, we were not in condition to pursue, even if it had been the intention at the outset of the campaign. . . . The victory quieted the fears of the West and Northwest, destroyed the hopes of the secession element in Kentucky, renewed the drooping spirits of the East Tennesseans, and demoralized the disunionists in Middle Tennessee; yet it was a negative victory so far as concerned the result on the battle-field. Rosecrans seems to have planned the battle with the idea that the enemy would continue passive, remain entirely on the defensive, and that it was necessary only to push forward our left in order to force the evacuation of Murfreesboro'. . . . Had Bragg followed up with the spirit which characterized its beginning the successful attack by Hardee on our right wing — and there seems no reason why he should not have done so — the army of Rosecrans still might have got back to Nashville, but it would have been depleted and demoralized."—P. H. Sheridan, *Personal Memoirs, v.* 1, *ch.* 12-14.

A. D. 1863 (January).—The final Proclamation of Emancipation.—The immediate practical effect of the warning Proclamation of Emancipation issued by President Lincoln on the 22d of September, 1862, "did, perhaps, more nearly answer the apprehensions of the President than the expectations of those most clamorous for it. It did, as charged, very much 'unite the South and divide the North.' The cry of 'the perversion of the war for the Union into a war for the negro' became the Democratic watchword, and was sounded everywhere with only too disastrous effect, as was plainly revealed by the fall elections with their large Democratic gains and Republican losses. Indeed, it was the opinion of Mr. Greeley that, could there have been a vote taken at that time on the naked issue, a large majority would have pronounced against emancipation. But Mr. Lincoln did not falter. Notwithstanding these discouraging votes at the North, and the refusal of any Southern State to avail itself of the proffered immunity and aid of his Proclamation of September, he proceeded, at the close of the hundred days of grace allowed by it, to issue his second and absolute Proclamation, making all the slaves of the Rebel States and parts of States forever and irreversibly free." It was in the following words:

"Whereas, on the twenty-second day of September, in the year of our Lord one thousand eight hundred and sixty-two, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit: 'That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any state, or designated part of a state, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authority thereof, will recognize and main-

tain the freedom of such persons, and will do no act or acts to repress such persons or any of them, in any efforts they may make for their actual freedom. That the Executive will, on the first day of January aforesaid, by proclamation, designate the states and parts of states, if any, in which the people thereof respectively shall then be in rebellion against the United States; and the fact that any state, or the people thereof, shall on that day be in good faith represented in the Congress of the United States, by members chosen thereto at elections wherein a majority of the qualified voters of such state shall have participated, shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such state, and the people thereof, are not then in rebellion against the United States.' Now, therefore, I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander-in-Chief of the army and navy of the United States, in time of actual armed rebellion against the authority and government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this first day of January, in the year of our Lord one thousand eight hundred and sixty-three, and in accordance with my purpose so to do, publicly proclaimed for the full period of one hundred days from the day first above mentioned, order and designate, as the states and parts of states wherein the people thereof respectively are this day in rebellion against the United States, the following, to wit: Arkansas, Texas, Louisiana (except the parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James, Ascension, Assumption, Terre Bonne, Lafourche, St. Mary, St. Martin, and Orleans, including the city of New Orleans), Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia (except the forty-eight counties designated as West Virginia, and also the counties of Berkeley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth), and which excepted parts are for the present left precisely as if this proclamation were not issued. And, by virtue of the power and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated states and parts of states are and henceforward shall be free; and that the Executive Government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of said persons. And I hereby enjoin upon the people so declared to be free, to abstain from all violence, unless in necessary self-defense; and I recommend to them that, in all cases when allowed, they labor faithfully for reasonable wages. And I further declare and make known that such persons of suitable condition will be received into the armed service of the United States, to garrison forts, positions, stations, and other places, and to man vessels of all sorts in said service. And upon this act, sincerely believed to be an act of justice, warranted by the Constitution, upon military necessity, I invoke the considerate judgment of mankind and the gracious favor of Almighty God. In witness whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed. Done at the city of Washington, this first day of January, in the year of our Lord one thousand eight hundred and sixty-three, and of the Independence of the United States of America the eighty-seventh. Abraham Lincoln. By the President: William H. Seward, Secretary of State."

"Though the immediate effects of the Proclamation might not have answered all that was expected of it, it was not many months before its happy influences became manifest. Its tendency from the first was to unify and consolidate the antislavery and Christian sentiment of the land, to give dignity and consistency to the conflict. . . . It strengthened, too, the cause immensely with other nations, secured the sympathy and moral support of Christendom, and diminished, if it did not entirely remove, the danger of foreign intervention."—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v. 3, ch. 28.*—"Fame is due Mr. Lincoln, not alone because he decreed emancipation, but because events so shaped themselves under his guidance as to render the conception practical and the decree successful. Among the agencies he employed none proved more admirable or more powerful than this two-edged sword of the final proclamation, blending sentiment with force, leaguing liberty with Union, filling the voting armies at home and the fighting armies in the field. In the light of history we can see that by this edict Mr. Lincoln gave slavery its vital thrust, its mortal wound. It was the word of decision, the judgment without appeal, the sentence of doom."—J. G. Nicolay and J. Hay, *Abraham Lincoln. v. 6, ch. 19.*

A. D. 1863 (January: Arkansas).—The capture of Arkansas Post, or Fort Hindman.—Sherman withdrew his troops from the attempt against Vicksburg on the 2d of January, and on the 4th he relinquished the command to General McClernand, who had come down the river with orders to assume it. On that same day "the expedition sailed on the same transports that had brought them from Vicksburg, convoyed by Admiral Porter's fleet of gunboats, to attack Fort Hindman, commonly known as Arkansas Post, an old French settlement situated on the left or north bank of the Arkansas River, 50 miles from its mouth and 117 below Little Rock. . . . The expedition moved up the White River through the cut-off which unites its waters with those of the Arkansas, up the latter stream to Notrib's farm, three miles below Fort Hindman. . . . By noon on the 10th the landing was completed, and the troops were on the march to invest the post. . . . The gunboats opened a terrific fire upon the enemy during the afternoon, to distract his attention. By nightfall the troops were in position." Next morning a combined attack began, which the garrison endured until 4 o'clock P. M. when the white flag was raised. "Our entire loss in killed was 129; in wounded, 831; and in missing, 17; total, 977. . . . By the surrender there fell into our hands 5,000 men. . . . After sending the prisoners to St. Louis, having destroyed the defences and all buildings used for military purposes, on the 15th of January the troops re-embarked on the transports and proceeded to Napoleon, Arkansas, whence on the 17th . . . they returned to Milliken's Bend."—S. M. Bowman and R. B. Irwin, *Sherman and his Campaigns, ch. 7-8.*

A. D. 1863 (January—April: Virginia).—Command given to Hooker.—President Lincoln's Letter to him.—Demoralized state of the Army of the Potomac, and its improvement.—"General Burnside retired from a position he had never sought, to the satisfaction, and, be it said to his credit, with the warm personal regard of all. Sumner, whom the weight of years had robbed of strength, but not of gallantry, was relieved at his own request; Franklin was shelved. Hooker thus became senior general officer, and succeeded to the command. No man enjoyed a more enviable reputation in the Army of the Potomac. . . . His commands so far had been limited; and he had a frank, manly way of winning the hearts of his soldiers. He was in constant motion about the army while it lay in camp; his appearance always attracted attention; and he was as well known to almost every regiment as its own commander. He was a representative man. . . . Nothing shows more curiously a weak spot in Hooker's character than the odd pride he took in Mr. Lincoln's somewhat equivocal letter to him at the time of his appointment: . . . 'I have placed you [wrote the President] at the head of the Army of the Potomac. Of course, I have done this upon what appears to me to be sufficient reasons, and yet I think it best for you to know that there are some things in regard to which I am not quite satisfied with you. I believe you to be a brave and skilful soldier, which of course I like. I also believe you do not mix politics with your profession, in which you are right. You have confidence in yourself; which is a valuable, if not an indispensable quality. You are ambitious, which, within reasonable bounds, does good rather than harm; but I think that, during General Burnside's command of the army, you have taken counsel of your ambition and thwarted him as much as you could, in which you did a great wrong to the country and to a most meritorious and honorable brother-officer. I have heard, in such a way as to believe it, of your recently saying that both the army and the Government needed a dictator. Of course, it was not for this, but in spite of it, that I have given you the command. Only those generals who gain success can set up dictators. What I now ask of you is military success, and I will risk the dictatorship. The Government will support you to the utmost of its ability, which is neither more nor less than it has done or will do for all commanders. I much fear that the spirit you have aided to infuse into the army, of criticising their commander and withholding confidence from him, will now turn upon you. I shall assist you as far as I can to put it down. Neither you nor Napoleon, if he were alive again, could get any good out of an army while such a spirit prevails in it. And now, beware of rashness! Beware of rashness, but with energy and sleepless vigilance go forward, and give us victories!' . . . Hooker was appointed Jan. 26, 1863; and Burnside, with a few earnest words, took leave of the army. The troops received their new chief with a heartiness and confidence which, since McClellan's re-instatement, had not been equalled. Hooker was to all the soul and embodiment of the growth and history of this weather-beaten Army of the Potomac. And the salutary changes he at once began to make,—for Hooker never lacked the power of organization—were accepted with alacrity; and a spirit of cheerful willingness succeeded speedily to what had been almost a defiant obedience. The army was in a lamentably low state of efficiency. Politics mingled with camp duties; and the disaffection of officers and men, coupled with an entire lack of confidence in the ability of the Army of the Potomac to accomplish anything, were pronounced. Desertions occurred at the rate of 200 a day. . . . Hooker states that he found 2,922 officers, and 81,964 enlisted men, entered as absent on the rolls of the army, a large proportion from causes unknown. Sharp and efficient measures were at once adopted, which speedily checked this alarming depletion of the ranks. . . . The testimony of all general officers of the Army of the Potomac concurs in awarding the highest praise to Hooker for the manner in which he improved the condition of the troops during the three months he was in command prior to Chancellorsville. . . . On the 30th of April the Army of the Potomac, exclusive of provost-guard, consisted of about 130,000 men under the colors,—'for duty equipped,' according to the morning report. . . . While the Army of the Potomac lay about Falmouth [opposite Fredericksburg], awaiting orders to move, Lee occupied the heights south of the Rappahannock, from Banks's Ford above to Port Royal (or Skenker's Neck), below Fredericksburg, a line some 15 miles in length as the crow flies. . . . Lee's forces numbered about 60,000 men, for duty."—T. A. Dodge, *The Campaign of Chancellorsville, ch.* 3-4.

A. D. 1863 (January—April: On the Mississippi).—Grant's Campaign against Vicksburg.—Futile operations of the first four months.—"General Grant took personal command of the movement against Vicksburg on the 30th of January, 1863. . . . The first plan made was to dig a canal across the neck of land, or peninsula in front of Vicksburg,—below the city,—at a point where the isthmus was only a mile and a fifth in width. This had been begun before General Grant's arrival. If a canal could have been made large enough for large steamboats, then no matter how strong were the fortifications of Vicksburg, the boats would pass through, far away from their fire. So a canal ten feet wide and six deep was made here, in the hope that the freshets of the river would widen it, and so make it large enough for large steamers. But very little came of the canal. When the river did rise, it would not flow where it was meant to do. It flooded the camps of the workmen. Meanwhile the Rebels had made new batteries below it. Thus ended plan number one. Another similar plan, to open a route by Lake Providence and Bayou Baxter, Bayou Macon, and the Washita and Red River, did not succeed better. The canals attempted here were both on the west of the river. A very bold attempt was made on the east side, by what was known as the Yazoo Pass, into the Tallahatchee and Yazoo River. The expeditions sent out by this route would come out above Vicksburg; but it was hoped that thus the Rebel gunboats on the Yazoo River might be destroyed. If a practicable route were made here, the whole army could be moved to Haine's Bluff,—above Vicksburg,

—an upland region very desirable for occupation. But nothing came of this movement, though some hard work and some hard fighting were done in it. What resulted of importance was, that the troops found their way into the granary from which Vicksburg had been fed; and in the resistance, many of the Rebels were destroyed. In such attempts February and March passed away. Meanwhile Admiral Farragut, of the navy, ran by the Rebel batteries at Port Hudson, so that he communicated with Grant below Vicksburg,—and Grant could communicate with General Banks, who was trying to do at Port Hudson what Grant was trying to do above. The distance from Vicksburg to Port Hudson is about 120 miles in a straight line, and more than twice that by the crooked river. Grant now determined to pass the city of Vicksburg on the west side of the river by marching his army by land—with the help of boats on some bayous if possible—from Milliken's Bend, which is twenty miles above Vicksburg, to New Carthage, which is about as far below. At his request Admiral Porter sent seven of his iron-clads, with three steamers and ten barges, down the river, past the Rebel batteries. They were well laden with forage and supplies. The crews of all but one refused to go. But volunteers from the army offered, enough to man a hundred vessels had they been needed. On a dark night of the 16th of April, led by Admiral Porter, they steamed down, with the barges in tow. They turned the bend without being noticed. Then the first batteries opened on them. The Rebels set fire to houses so as to light up the scene; and from the ships the crews could see the men at the batteries and in the streets of Vicksburg. Though every vessel was hit, all got by, except the Henry Clay steamer. Finding she was sinking, her commander cut off the barge he was towing, which drifted safely down, and, soon after, the vessel herself took fire. The crew escaped in their boats,—the vessel blazed up and lighted up all around. At last, however, after the boats had been under fire two hours and forty minutes, the whole fleet except the Henry Clay arrived safely below the batteries. Grant had thus secured, not only forage and stores, but the means of transportation. On the 26th of April five more vessels passed successfully, one being lost as before. Grant was now strong enough to cross the Mississippi River. His army had to march seventy miles on the west side by muddy roads, scarcely above the river line. He feared he might have to go as far down as a little town called Rodney for a good landing-place on the east side. But a friendly negro man, who knew the country, brought in information that there was a good road inland from Bruinsburg,—and so it proved. Grand Gulf, on the river, where the Rebels had a post, was still between Grant and Bruinsburg. Porter attacked it with his gunboats, and Grant was ready to land 10,000 troops to storm the place if the batteries were silenced. But Porter did not succeed. Grant therefore marched his troops down on the west side of the river. Porter ran by Grand Gulf with transports in the night, and, on the morning of the 30th of April, Grant crossed the river with 10,000 men. They did not carry a tent nor a wagon. General Grant and his staff went without their horses. It was said afterwards that his whole baggage was a toothbrush! Other divisions followed, and on the 3d of May he left the river, and marched, not directly on Vicksburg, but more inland, to cut off all communication with that city. His army took three days' rations with them, and relied principally for provisions on the stores in the rich country through which they marched."—E. E. Hale, *Stories of War told by Soldiers, ch.* 7.

Also in: F. V Greene, *The Mississippi* (*Campaigns of the Civil War, v.* 8), *ch.* 4.—U. S. Grant, *Personal Memoirs, v.* 1, *ch.* 31–32.—G. W. Brown, *The Mississippi Squadron and the Siege of Vicksburg* (*Personal Recollections of the War: N. Y. Com. L. L. of the U. S.*).

A. D. 1863 (February—April: Tennessee).—Engagements at Dover and Franklin.—"In February [on the 3d], General Wheeler, Bragg's chief of Cavalry, tried to capture Fort Donaldson, so as to stop the navigation of the Cumberland River, by which some of Rosecrans's supplies came in steamboats to Nashville. The fort had not been repaired after its capture by Grant, but the Village of Dover near it had been fortified, and it was then held by Colonel A. C. Harding with about 600 men. The Union men fought bravely, and in the evening the gunboat Fair Play came up and opened a fire on the Confederates which drove them away in confusion, with a loss of more than 500 men. Harding's loss was 126. Early in March, General Van Dorn appeared near Franklin [a little below Nashville] with a large force of mounted men. Colonel Colburn, of the 33d Indiana, moved Southward from Franklin with 2,700 men. Van Dorn and Forrest met him, and after a fight of several hours [March 5] Colburn had to surrender with 1,300 of his men."—J. D. Champlin, Jr., *Young Folks' Hist. of the War for the Union, ch.* 31.—"Sheridan, with his division, and about 1,800 cavalry, under Colonel Minty, first swept down toward Shelbyville, and then around toward Franklin, skirmishing in several places with detachments of Van Dorn's and Forrest's men. In a sharp fight at Thompson's Station, he captured some of the force which encountered Colburn. He finally drove Van Dorn beyond the Duck River, and then returned to Murfreesboro', with a loss during his ten days' ride and skirmishing of only five men killed and five wounded. His gain was nearly 100 prisoners. On the 18th of March, Col. A. S. Hall, with a little over 1,400 men, moved eastward from Murfreesboro' to surprise a Confederate camp at Gainesville. He was unexpectedly met by some of Morgan's cavalry, when he fell back to Milton, twelve miles northeast of Murfreesboro' and took a strong position on Vaught's Hill. There he was attacked by 2,000 men, led by Morgan in person. With the aid of Harris's Battery skilfully worked, Hall repulsed the foe after a struggle of about three hours. Morgan lost between 300 and 400 men killed and wounded. Among the latter was himself. Hall's loss was 55 men, of whom only 6 were killed. Early in April, General Granger, then in command at Franklin, with nearly 5,000 troops, was satisfied that a heavy force under Van Dorn was about to attack him. He was then constructing a fort (which afterwards bore his name), but only two siege-guns and two rifled cannon, belonging to an Ohio battery, were mounted upon it. The fort . . . completely commanded

the approaches to Franklin. . .'. On the 10th, Van Dorn, with an estimated force of 9,000 mounted men and two regiments of foot, pressed rapidly forward along the Columbia and Lewisburg turnpikes, and fell upon Granger's front. The guns from the fort opened destructively upon the assailants, and their attack was manfully met by Granger's troops. Van Dorn soon found himself in a perilous situation, for Stanley [commanding cavalry] came up and struck him a heavy blow on the flank. Smith [with cavalry] was ordered forward to support Stanley, and Baird's troops were thrown across the river to engage in the fight. The Confederates were routed at all points on Granger's front, with a heavy loss in killed and wounded, and about 500 prisoners. Van Dorn then turned his whole force upon Stanley before Smith reached him, and with his overwhelming numbers pushed him back and recovered most of the captured men. By this means Van Dorn extricated himself from his perilous position, and, abandoning his attempt to capture Franklin, he retired to Spring Hill, with a loss of about three hundred men in killed, wounded and prisoners. The Union loss was about 37 killed, wounded and missing."—B. J. Lossing, *Field Book of the Civil War, v.* 3, *ch.* 4.

A. D. 1863 (March).—The Conscription Act.—"The Rebel Congress having long since passed [April 16, 1862] a conscription act whereby all the White males in the Confederacy between the ages of 18 and 35 were placed at the disposal of their Executive, while all those already in the service, though they had enlisted and been accepted for specific terms of one or two years, were held to serve through the war, our Congress was constrained to follow afar off in the footsteps of the enemy; since our ranks, [after] our heavy losses in the bloody struggles of 1862, were filled by volunteers too slowly for the exigencies of the service. The act providing 'for the enrollment of the National forces' was among the last passed [March 3, 1863] by the XXXVIIth Congress prior to its dissolution. It provided for the enrollment, by Federal provost-marshals and enrolling officers, of all able-bodied male citizens (not Whites only), including aliens who had declared their intention to become naturalized, between the ages of 18 and 45—those between 20 and 35 to constitute the first class; all others the second class—from which the President was authorized, from and after July 1, to make drafts at his discretion of persons to serve in the National armies for not more than three years; any one drafted and not reporting for service to be considered and treated as a deserter. A commutation of $300 was to be received in lieu of such service: and there were exemptions provided of certain heads of Executive Departments; Federal judges; Governors of States; the only son of a widow, or of an aged and infirm father, dependent on that son's labor for support; the father of dependent motherless children under 12 years of age, or the only adult brother of such children, being orphans; or the residue of a family which has already two members in the service, &c., &c. The passage and execution of this act inevitably intensified and made active the spirit of opposition to the War. Those who detested every form of 'coercion' save the coercion of the Republic by the Rebels, with those who especially detested the National effort under its present aspects as 'a war not for the Union, but for the Negro,' were aroused by it to a more determined and active opposition. The bill passed the House by Yeas 115, Nays 49—the division being so nearly as might be, a party one—while in the Senate a motion by Mr. Bayard that it be indefinitely postponed was supported by 11 Yeas (all Democrats) to 35 Nays: consisting of every Republican present, with Messrs. McDougall, of California, Harding and Nesmith of Oregon. The bill then passed without a call of the Yeas and Nays."—H. Greeley, *The American Conflict, v.* 2, *ch.* 21.

A. D. 1863 (April: South Carolina).—The naval attack on Charleston.—Repulse of the Monitors.—"The engagements in which turret iron-clads had been concerned had given to the government and the public a high opinion of their offensive and defensive qualities. It seemed as if nothing could withstand the blow of their heavy shot, and no projectile penetrate their invulnerable turrets. It was supposed that a fleet of such ships could without difficulty force a passage through Charleston Harbor, in spite of its numerous defenses, and, appearing before the city, compel its surrender. . . . On the 7th of April [1863] Admiral Dupont made the experiment. He had seven Ericsson Monitors, the frigate Ironsides, partially iron-clad, and a frailer iron-clad, the Keokuk, constructed on a plan differing from that of the Monitors. His intention was to disregard the batteries on Morris's Island, attack the northwest face of Sumter, and force his way up to the city. His fleet had 32 guns; the opposing forts, in the aggregate, 300. At noon on that day the signal was given to weigh anchor. The Weehawken, a Monitor, took the lead. She had a raft-like contrivance attached to her bows, for the purpose of removing obstructions and exploding torpedoes. This occasioned some delay at the outset, through its interference with her movements. On her way up she exploded a torpedo, which, though it lifted her a little, did no damage. At 2.10 P. M. she encountered obstructions extending across the harbor from Fort Moultrie to Fort Sumter; beyond these, piles were seen extending from James's Island to the Middle Ground. At 2.50 P. M. the guns of Fort Moultrie opened upon her, followed shortly after by all the batteries on Sullivan's Island, Morris's Island, and Fort Sumter. Not being able to pass the obstructions, the Weehawken, and subsequently other Monitors, the Passaic, Nahant, etc., were obliged to turn, which threw the line into confusion, as the other vessels, advancing, approached. This was particularly the case with the flag-ship Ironsides, which became entangled with the Monitors, and could not bring her batteries to bear upon Fort Sumter without risk of firing into them; she was obliged, on her way up, to anchor twice to avoid going ashore, on one of these occasions in consequence of having come into collision with two of the Monitors. The plan of the Confederates was, by means of obstructions, to detain the ships, while a concentrated fire was poured upon them in this the 'first circle,' as it was termed. Two other still more powerful

circles of fire must be passed before the city could be reached. While in the centre of the first circle, it was apparent that the Monitors were at a fearful disadvantage. The forts and earth-works were armed with heavy guns of the best construction. No ship was exposed to the severest fire of the enemy for more than forty minutes, yet in that brief period five of the iron-clads were wholly or partially disabled. In these forty minutes the battle was substantially over, the question settled. The Keokuk was struck 99 times, of which 19 were under her water-line. She was in a sinking condition. She had been able to return only three shots. The Passaic was struck 27 times; her turret was jammed, and could not for some time be turned. The Nahant was most seriously damaged; her turret was jammed, her captain wounded, her quarter-master killed by a bolt which flew off and struck him on the head. Many of the bolts of both turret and pilot-house were thus broken; the latter became nearly untenable in consequence of the nuts and ends flying across it. All the other Monitors had received damages more or less severe. The mailed frigate Ironsides had lost one port shutter, her bow was penetrated by a red-hot shot. The damage inflicted on Fort Sumter was comparatively insignificant. It was Dupont's belief that, had the iron-clads been in action half an hour longer, they would all have been disabled. 'To my regret,' he says, 'I soon became convinced of the utter impracticability of taking the city of Charleston by the force under my command.' . . . The iron-clad fleet had therefore been unable to pass the first line of obstructions, or to get out of 'the first circle of fire.' The slowness of its fire was no match for the rapidity and weight of that of the forts. The iron-clads were able to fire only 139 times from the 14 guns they could bring into action; the forts, from 76 guns, fired 2,209 times. The projectiles they used were wrought-iron bolts, some of them tipped with steel, solid shot, shells, of which 40 were filled with melted cast-iron, others with incendiary composition. The total amount of cannon-powder used by the forts was 21,093 pounds. The government, thus satisfied that its iron-clad fleet was insufficient for the forcing of Charleston Harbor and the capture of the city, now changed its purposes, restricting its attempts to a more complete blockade, the detention of a large confederate force in the vicinity by continually threatening military operations, and the destruction of Fort Sumter for the sake of a moral effect." — J. W. Draper, *Hist. of the Am. Civil War, ch.* 72 (*v.* 3).

A. D. 1863 (April — May: Virginia).—Hooker's disastrous movement.—Chancellorsville.— Stonewall Jackson's last flank movement.—"Being now [April 28] fully prepared for active operations, Hooker determined to take the initiative by moving on the left of his opponent's position. By careful study of Lee's position he correctly concluded that his left was his most vulnerable point. In order to mask his real design he sent forward a force of 10,000 cavalry under General Stoneman to operate upon Lee's lines of communication with Richmond, and sent Sedgwick with a force of 30,000 men still further to mask his movement. Stoneman crossed the Rappahannock at Kelly's Ford on the 29th, and Sedgwick appeared on the 28th on the heights below Fredericksburg. These preparatory measures having been taken, Hooker proceeded to the execution of his plan. Swinton, after a picturesque description of the passage of the Rappahannock and the Rapidan, tells us 'that on the afternoon of the 30th of April four corps of the Federal army had gained the position of Chancellorsville, where Hooker at the same time established his headquarters.' Chancellorsville is situated ten miles southwest of Fredericksburg. It is not, as its name implies, a town or village, but simply a farm-house with its usual appendages, situated at the edge of a small field surrounded by a dense thicket of second growth, which sprang up after the primeval forest had been cut to furnish fuel to a neighboring furnace. This thicket extends for miles in every direction, and its wild aspect very properly suggests its name, The Wilderness. The intersection of several important roads gives it the semblance of strategic importance, while in reality a more unfavorable place for military operations could not well be found. Hooker, however, seemed well pleased with his acquisition, for on reaching Chancellorsville on Thursday night he issued an order to the troops in which he announced that 'the enemy must either ingloriously fly or come out from behind his defences and give us battle on our own ground, where certain destruction awaits him.' . . . General Lee was fully aware of the preparations that were being made by his adversary, but calmly awaited the complete development of his plans before exerting his strength to oppose him. . . . On the 28th . . . Lee ordered Jackson to concentrate his whole corps in the immediate vicinity of Fredericksburg. Early on the morning of the 29th Sedgwick crossed the Rappahannock below the mouth of Deep Run, but made no other aggressive movement on that day or the day following. On the night of the 30th, Lee was informed of Hooker's arrival at Chancellorsville. He had been previously informed of Stoneman's movements against his line of operations by General Stuart, and was now satisfied that the main attack of the enemy would come from the direction of Chancellorsville. Therefore on the morning of the 1st of May he made the necessary preparations to meet it. Accompanied by his staff, he took a position on a height where one of his batteries overlooked the Rappahannock. He there observed carefully the position of Sedgwick, while waiting for information from the direction of Chancellorsville. . . . Very soon the sound of cannon indicated that the work had begun. At the same time couriers arrived from Stuart and Anderson informing the general that the enemy were advancing on the old turnpike, the plank road, and on the river roads, and asking for reinforcements. McLaws was immediately ordered to the support of Anderson, and shortly after Jackson was ordered to follow with three of his divisions, leaving . . . a force of about 9,000 men and 45 pieces of artillery in observation of Sedgwick. When Jackson joined McLaws and Anderson a lively skirmish was in progress, in which he im-

mediately participated. When General Lee arrived he found the Federals were being driven back to Chancellorsville. At the close of the afternoon they had retired within their lines. General Lee occupied the ridge about three-quarters of a mile south-east and south of Chancellorsville. The opposing armies were hidden from each other by the intervening thicket of brushwood. . . . It was obvious that the Federal position was too formidable to be attacked in front with any hope of success; therefore Lee proceeded to devise a plan by which the position of Hooker might be turned and a point of attack gained from which no danger was apprehended by the Federal commander. . . . The execution of a movement so much in accordance with his genius and inclination was assigned to General Jackson. . . . At dawn on the morning of the 2d, Jackson's corps, 22,000 strong, was in motion, and while it was making one of the most famous flank movements on record, General Lee, with the divisions of Anderson and McLaws, with 20 pieces of artillery, a force not exceeding 12,000 men, occupied the position he had assumed the previous evening, and General Hooker, with 90,000 men, lay behind his breastworks awaiting the Confederate attack. . . . After making a circuitous march of 15 miles, Jackson reached a point on the Orange Court-house road three miles in the rear of Chancellorsville. Had Hooker possessed a handful of cavalry equal in spirit to the 'Virginia horsemen' under W. H. F. Lee that neutralized Stoneman's ten thousand, he might have escaped the peril that now awaited him. On the arrival of Jackson on the plank road, Fitz Lee, who had covered his movement with his brigade of cavalry, conducted him to a position from which he obtained a view of the enemy, which disclosed the following scene: 'Below and but a few hundred yards distant ran the Federal line of battle. There was the line of defence, with abatis in front, and long lines of stacked arms in rear. . . . The soldiers were in groups in the rear, laughing, chatting, and smoking, probably engaged here and there in games of cards and other amusements indulged in while feeling safe and comfortable, awaiting orders. In the rear of them were other parties driving up and butchering beeves.' Returning from this point of observation, Jackson proceeded to make his dispositions of attack, which by six o'clock were completed. . . . Howard's corps was first assailed. This corps, being surprised, was panic-stricken and fled precipitately, and in its flight communicated the panic to the troops through which it passed. Jackson's forces followed, routing line after line, until arrested by the close of day. The rout of the Federal army was fast becoming general, and it was only saved from entire defeat by the interposition of night. When compelled to halt Jackson remarked that with one more hour of daylight he could have completed the destruction of the Federal army. This, the most famous of all Jackson's brilliant achievements, closed his military career. After his troops had halted, and while the lines were being adjusted, he rode forward with several of his staff to reconnoitre the Federal position." The party were mistaken by some of their own men for Federal horsemen and received a volley which struck down Stonewall Jackson. He was wounded in both arms by three bullets, and died from the effects eight days afterward. "Early on the morning of the 3d the attack was resumed by the Confederates with great vigor. Hooker, taking advantage of the night, had restored order in his army and strengthened his position; his troops regained courage and contested the field with great stubbornness until ten o'clock when they yielded at every point and rapidly retreated . . . within the strong line of defences which had been previously constructed to cover the road to the United States Ford. . . . While the operations above described were in progress at Chancellorsville, General Early, by skilful manœuvring, had detained Sedgwick at Fredericksburg until the 3d, when that general, by a determined advance, forced back Early, carried Marye's Heights, and proceeded toward Chancellorsville. The condition of affairs was communicated to General Lee during the forenoon. Wilcox's brigade, then at Banks's Ford, was ordered to intercept Sedgwick and retard his advance, while McLaws's division was ordered to support him. Wilcox on reaching Salem Church, six miles from Chancellorsville, encountered the Federal advance, and after a sharp conflict he repulsed it with loss. The success of Wilcox delayed Sedgwick until Anderson and McLaws could come up. The premeditated attack on Hooker being thus interrupted, Lee, on the forenoon of the 4th, repaired to the neighborhood of Fredericksburg. A combined attack was then directed to be made by Early on the rear, while McLaws and Anderson bore down upon the front. The battle was hotly contested during the afternoon, in which the forces of Sedgwick were defeated, and were only saved from destruction by a night-passage across the Rappahannock at Banks's Ford. On the 5th Lee collected his forces at Chancellorsville to give the 'coup de grâce' to Hooker, but that general, under cover of a dark and stormy night, effected his retreat beyond the Rappahannock at the United States Ford."— A. L. Long, *Memoirs of Robert E. Lee, ch.* 14.— The Federal loss at Chancellorsville, in killed and wounded, was 12,197; missing 5,000; total, 17,197. Confederate loss, killed and wounded, 10,266; missing 2,753; total, 13,019.— A. Doubleday, *Chancellorsville and Gettysburg* (*Campaigns of the Civil War, v.* 6), *ch.* 8.

A. D. 1863 (April—May: Mississippi).— Grierson's Raid.—Reporting to headquarters at Washington, on the 5th of May, 1863, General Hurlbut, commanding at Memphis, Tennessee, said: "As the spring opened, I was daily more and more impressed with the feasibility of a plan, long entertained, of pushing a flying column of cavalry through the length of Mississippi, cutting the Southern Railroad. By consent and approval of General Grant, I prepared a system of movements along my entire line from Memphis to Corinth for the purpose of covering this cavalry dash. At the same time General Rosecrans proposed to me to cover a movement of 1,800 cavalry from Tuscumbia down into Alabama and Georgia. This did not interfere

with my plan, but simply required extra force to be developed from Corinth. Delays incident to combined movements, especially from separate commands, kept his expeditionary column back for six days. I commenced the movement from Corinth on the 15th [April]. . . . On the 17th, Col. B. H. Grierson, Sixth Illinois Cavalry, with his own regiment, the Seventh Illinois, and Second Iowa, moved from La Grange, by way of Pontotoc, with orders, after passing Pontotoc, to proceed straight down, throwing one regiment to the left toward Okolona, and to push for and destroy the Chunkey River Bridge and any others they could reach, and either return, or proceed to Baton Rouge, as might be found advisable. On the same day, April 17, a column of infantry 1,500 strong, and one battery, moved by railroad from La Grange to Coldwater, with orders to push rapidly between Coldwater and the Tallahatchee, and take Chalmers in flank and rear while attacked in front by three regiments, a battery, and 200 cavalry from Memphis, which left here on the 18th. I considered that the effect of these movements would be to puzzle the enemy and withdraw his force from the central line, which has proven to be correct. . . . Grierson, on the 19th, detached the Second Iowa below Pontotoc, which fought its way gallantly back to La Grange and came home well mounted. The main cavalry column (Sixth and Seventh Illinois) proceeded, without loss or engagement, to Newton, on the Southern Mississippi Railroad, and there destroyed bridges." Col. Grierson, in his own full report of the remarkable expedition thus set on foot, after narrating the proceedings of his command until it struck Newton Station, on the 24th of April, continues: "From captured mails and information obtained by my scouts, I knew that large forces had been sent out to intercept our return, and having instructions from Major-General Hurlbut and Brigadier-General Smith to move in any direction from this point which, in my judgment, would be best for the safety of my command and the success of the expedition, I at once decided to move south, in order to secure the necessary rest and food for men and horses, and then return to La Grange through Alabama, or make for Baton Rouge, as I might hereafter deem best. . . . After resting about three hours, we moved south to Garlandville. At this point we found the citizens, many of them venerable with age, armed with shot-guns and organized to resist our approach. As the advance entered the town, these citizens fired upon them and wounded one of our men. We charged upon them and captured several. After disarming them, we showed them the folly of their actions, and released them. Without an exception they acknowledged their mistake, and declared that they had been grossly deceived as to our real character. One volunteered his services as guide, and upon leaving us declared that hereafter his prayers should be for the Union Army. I mention this as a sample of the feeling which exists, and the good effect which our presence produced among the people in the country through which we passed. Hundreds who are skulking and hiding out to avoid conscription, only await the presence of our arms to sustain them, when they will rise up and declare their principles; and thousands who have been deceived, upon the vindication of our cause would immediately return to loyalty." It was not until the 2d of May that Grierson and his small force reached the Union lines at Baton Rouge. The total accomplishments of the expedition—aside from the important revelation it made of the condition of things in that region of the Confederacy—are summed up in the Colonel's report as follows: "During the expedition we killed and wounded about 100 of the enemy, captured and paroled over 500 prisoners, many of them officers, destroyed between 50 and 60 miles of railroad and telegraph, captured and destroyed over 3,000 stand of arms, and other army stores and Government property to an immense amount; we also captured 1,000 horses and mules. Our loss during the entire journey was 3 killed, 7 wounded, 5 left on the route sick; the sergeant-major and surgeon of the Seventh Illinois left with Lieutenant-Colonel Blackburn, and 9 men missing, supposed to have straggled. We marched over 600 miles in less than sixteen days. The last twenty-eight hours we marched 76 miles, had four engagements with the enemy, and forded the Comite River, which was deep enough to swim many of the horses. During this time the men and horses were without food or rest. Much of the country through which we passed was almost entirely destitute of forage and provisions, and it was but seldom that we obtained over one meal per day. Many of the inhabitants must undoubtedly suffer for want of the necessaries of life, which have reached most fabulous prices."—*Official Records, series* 1, *v.* 24, *pt.* 1, *pp.* 520–529.

A. D. 1863 (April—July: On the Mississippi).—Grant's Campaign against Vicksburg.—The final operations.—His personal account of the siege and capture.—"April 30th was spent in transporting troops across the river [to Bruinsburg]. The troops were moved out towards Port Gibson as fast as they were landed. On the 1st of May the advance met the enemy under Bowen about four miles west of Port Gibson, where quite a severe battle was fought, resulting in the defeat of the enemy, who were driven from the field. On May 2d our troops moved into Port Gibson, and, finding that the bridges over Bayou Pierre were destroyed, spent the balance of the day in rebuilding and crossing them, and marching to the North Fork, where we encamped for the night. During the night we rebuilt the bridge across the North Fork, which had also been destroyed, and the next day (the 3d) pushed on, and, after considerable skirmishing, reached the Big Black, near Hankinson's Ferry, and the Mississippi at Grand Gulf. . . . Here I [General Grant] . . . received a letter from Banks stating that he could not be at Port Hudson [which Grant had intended to join Banks in attacking, before he turned against Vicksburg] for some days, and then, with an army of only 15,000 men. As I did not regard this force of as much value as the time which would be lost in waiting for it, I determined to move on to Vicksburg. The 4th, 5th, and 6th of May were spent in reconnoitering towards Vicksburg, and also in crossing Sherman's troops over to Grand Gulf. On the 7th, Sherman having joined the main body of the army, the troops across the Big Black were withdrawn, and the movement was commenced to get in position on the Vicksburg and Jackson railroad so as to attack Vicksburg from the rear. This occupied the army from the 7th to the 12th, when our

position was near Fourteen Mile creek, Raymond being our right flank, our left resting on the Big Black. To obtain this position we fought the battle of Raymond, where Logan's and Crocker's divisions of McPherson's corps defeated the Confederates under General Gregg, driving him back on Jackson; Sherman and McClernand both having some skirmishing where they crossed Fourteen Mile creek. As the army under Pemberton was on my left flank, and that under General Joseph E. Johnston on my right at Jackson, I determined to move the army rapidly on Jackson, capturing and destroying that place as a military depot; then turn west and destroy the army under Pemberton, or drive it back into Vicksburg. The 13th was spent in making the first of these moves. On the 14th Jackson was attacked with Sherman's and McPherson's corps. The place was taken, and all supplies that could be of service to the enemy were destroyed, as well as the railroad bridge. On the 15th the troops were faced to the west and marched towards Pemberton, who was near Edwards's Station. The next day, the 16th, we met the enemy at Champion's Hill, and, after a hard-fought battle, defeated and drove him back towards Vicksburg, capturing 18 guns and nearly 3,000 men. This was the hardest-fought battle of the campaign. On the 17th we reached the Big Black, where we found the enemy intrenched. After a battle of two or three hours' duration we succeeded in carrying their works by storm, capturing much artillery and about 1,200 men. . . . We crossed on the morning of the 18th, and the outworks of Vicksburg were reached before night, the army taking position in their front. On the 19th there was continuous skirmishing with the enemy while we were getting into better positions. . . . At two o'clock I ordered an assault. It resulted in securing more advanced positions for all our troops, where they were fully covered from the fire of the enemy, and the siege of Vicksburg began. . . . Most of the army had now been for three weeks with only five days' rations issued by the commissary. They had had an abundance of food, however, but had begun to feel the want of bread. . . . By the night of the 21st full rations were issued to all the troops. . . . I now determined on a second assault. . . . The attack was ordered to commence on all parts of the line at ten o'clock A. M. on the 22d with a furious cannonade from every battery in position. All the corps commanders set their time by mine, so that all might open the engagement at the same minute. The attack was gallant, and portions of each of the three corps succeeded in getting up to the very parapets of the enemy . . . but at no place were we able to enter. . . . As soon as it was dark our troops that had reached the enemy's line and had been obliged to remain there for security all day were withdrawn, and thus ended the last assault on Vicksburg. A regular siege was now determined upon. . . . The Union force that had crossed the Mississippi river up to this time was less than 43,000 men. . . . The enemy had at Vicksburg, Grand Gulf, Jackson, and on the roads between these places, quite 60,000 men. . . . My line was more than 15 miles long, extending from Haines's Bluff to Vicksburg, thence to Warrenton. The line of the enemy was about seven. In addition to this, having an enemy at Canton and Jackson in our rear, who was being constantly reënforced, we required a second line of defense, facing the other way. I had not troops enough under my command to man this. General Halleck appreciated the situation and, without being asked for reinforcements, forwarded them with all possible dispatch. . . . Johnston . . . abstained from making an assault on us, because it would simply have inflicted loss on both sides without accomplishing any result. We were strong enough to have taken the offensive against him; but I did not feel disposed to take any risk of loosing our hold upon Pemberton's army, while I would have rejoiced at the opportunity of defending ourselves against an attack by Johnston." The siege was of six weeks' duration, ending on the memorable 4th of July with the surrender of Pemberton and 31,000 men, who were released on parole. "Our men were no sooner inside the lines than the two armies began to fraternize. We had had full rations from the time the siege commenced to the close. The enemy had been suffering, particularly towards the last. I myself saw our men taking bread from their haversacks and giving it to those whom they had so recently been engaged in starving out."—U. S. Grant, *The Siege of Vicksburg* (*Century Magazine, Sept.*, 1885).

A. D. 1863 (May—June).—The arrest of Vallandigham.—President Lincoln to the Copperheads.—"The man whose name became unfortunately pre-eminent for disloyalty at this time was Clement L. Vallandigham, a Democrat, of Ohio. General Burnside was placed in command of the Department of the Ohio, March 25, 1863, and having for the moment no Confederates to deal with, he turned his attention to the Copperheads, whom he regarded with even greater animosity. His Order No. 38, issued on April 13, . . . warned persons with treasonable tongues that, unless they should keep that little member in order, they might expect either to suffer death as traitors, or to be sent southward within the lines of 'their friends.' Now Mr. Vallandigham had been a member of Congress since 1856; . . . he was the popular and rising leader of the Copperhead wing of the Democracy. Such was his position that it would have been ignominious for him to allow any Union general to put a military gag in his mouth. Nor did he. On the contrary he made speeches which at that time might well have made Unionists mad with rage, and which still seem to have gone far beyond the limit of disloyalty which any government could safely tolerate. Therefore on May 4 he was arrested by a company of soldiers, brought to Cincinnati, and thrown into jail. His friends gathered in anger, and a riot was narrowly avoided. At once, by order of General Burnside, he was tried by a military commission. He was charged with 'publicly expressing sympathy for those in arms against the government of the United States, and declaring disloyal sentiments and opinions, with the object and purpose of weakening the power of the Gov-

ernment in its efforts to suppress an unlawful rebellion.' . . . The evidence conclusively sustained the indictment, and the officers promptly pronounced him guilty, whereupon he was sentenced by Burnside to confinement in Fort Warren. . . . The Democrats throughout the North, rapidly surveying the situation, seized the opportunity which perhaps had been too inconsiderately given them. The country rang with plausible outcries and high sounding oratory concerning military usurpation, violation of the Constitution, and stifling freedom of speech. . . . Mr. Lincoln only showed that he felt the pressure of the criticism and denunciation by commuting the sentence, and directing that Vallandigham should be released from confinement and sent within the Confederate lines,—which was, indeed, a very shrewd and clever move, and much better than the imprisonment. Accordingly the quasi rebel was tendered to and accepted by a Confederate picket, on May 25. He protested vehemently, declared his loyalty, and insisted that his character was that of a prisoner of war. But the Confederates, who had no objection whatsoever to his peculiar methods of demonstrating 'loyalty' to their opponents, insisted upon treating him as a friend, the victim of an enemy common to themselves and him; and instead of exchanging him as a prisoner, they facilitated his passage through the blockade on his way to Canada. There he arrived in safety, and thence issued sundry manifestoes to the Democracy. On June 11 the Democratic Convention of Ohio nominated him as their candidate for governor, and it seems that for a while they really expected to elect him. . . . On May 16 a monster meeting of 'the Democrats of New York' was told by Governor Seymour that the question was: 'whether this war is waged to put down rebellion at the South, or to destroy free institutions at the North.' Excited by such instigation, the audience passed sundry damnatory resolutions and sent them to the President. Upon receiving these Mr. Lincoln felt that he must come down into the arena, without regard to official conventionality. On June 12 he replied by a full presentation of the case, from his point of view. He had once more to do the same thing in response to another address of like character which was sent to him on June 11 by the Democratic State Convention of Ohio."—J. T. Morse, *Abraham Lincoln, v. 2, ch. 6.*—To the New York Democrats, Mr. Lincoln said: "It is asserted in substance, that Mr. Vallandigham was, by a military commander, seized and tried 'for no other reason than words addressed to a public meeting in criticism of the course of the administration, and in condemnation of the military orders of the general.' Now, if there be no mistake about this, if this assertion is the truth and the whole truth, if there was no other reason for the arrest, then I concede that the arrest was wrong. But the arrest, as I understand, was made for a very different reason. Mr. Vallandigham avows his hostility to the war on the part of the Union; and his arrest was made because he was laboring, with some effect, to prevent the raising of troops, to encourage desertions from the army, and to leave the rebellion without an adequate military force to suppress it. He was not arrested because he was damaging the political prospects of the administration or the personal interests of the commanding general, but because he was damaging the army, upon the existence of which the life of the nation depends. He was warring upon the military, and this gave the military constitutional jurisdiction to lay hands upon him. If Mr. Vallandigham was not damaging the military power of the country, then his arrest was made on mistake of fact, which I would be glad to correct on reasonably satisfactory evidence. I understand the meeting whose resolutions I am considering to be in favor of suppressing the rebellion by military force—by armies. Long experience has shown that armies cannot be maintained unless desertion shall be punished by the severe penalty of death. The case requires, and the law and the Constitution sanction, this punishment. Must I shoot a simple-minded soldier boy who deserts, while I must not touch a hair of a wily agitator who induces him to desert? This is none the less injurious when effected by getting a father, or brother, or friend into a public meeting, and there working upon his feelings till he is persuaded to write the soldier boy that he is fighting in a bad cause, for a wicked administration of a contemptible government, too weak to arrest and punish him if he shall desert. I think that, in such a case, to silence the agitator and save the boy is not only constitutional, but withal a great mercy. If I be wrong on this question of constitutional power, my error lies in believing that certain proceedings are constitutional when, in cases of rebellion or invasion, the public safety requires them, which would not be constitutional when, in absence of rebellion or invasion, the public safety does not require them: in other words, that the Constitution is not in its application in all respects the same in cases of rebellion or invasion involving the public safety, as it is in times of profound peace and public security. The Constitution itself makes the distinction, and I can no more be persuaded that the government can constitutionally take no strong measures in time of rebellion, because it can be shown that the same could not be lawfully taken in time of peace, than I can be persuaded that a particular drug is not good medicine for a sick man because it can be shown to not be good food for a well one. Nor am I able to appreciate the danger apprehended by the meeting, that the American people will by means of military arrests during the rebellion lose the right of public discussion, the liberty of speech and the press, the law of evidence, trial by jury, and habeas corpus throughout the indefinite peaceful future which I trust lies before them, any more than I am able to believe that a man could contract so strong an appetite for emetics during temporary illness as to persist in feeding upon them during the remainder of his healthful life. In giving the resolutions that earnest consideration which you request of me, I cannot overlook the fact that the meeting speak as 'Democrats.' Nor can I, with full respect for their known intelligence, and the fairly presumed deliberation with which they prepared their resolutions, be permitted to suppose that this occurred by accident, or in any way other than that they preferred to designate themselves 'Democrats' rather than 'American citizens.' In this time of national peril I would have preferred to meet you upon a level one step higher than any party platform, because I am sure that from such more elevated position

we could do better battle for the country we all love than we possibly can from those lower ones where, from the force of habit, the prejudices of the past, and selfish hopes of the future, we are sure to expend much of our ingenuity and strength in finding fault with and aiming blows at each other. But since you have denied me this, I will yet be thankful for the country's sake that not all Democrats have done so. He on whose discretionary judgment Mr. Vallandigham was arrested and tried is a Democrat, having no old party affinity with me, and the judge who rejected the constitutional view expressed in these resolutions, by refusing to discharge Mr. Vallandigham on habeas corpus is a Democrat of better days than these, having received his judicial mantle at the hands of President Jackson. And still more, of all those Democrats who are nobly exposing their lives and shedding their blood on the battle-field, I have learned that many approve the course taken with Mr. Vallandigham, while I have not heard of a single one condemning it. I cannot assert that there are none such."—Abraham Lincoln, *Complete Works, v. 2, pp.* 349–350.—To the Ohio Democrats, the President wrote as follows: "You claim, as I understand, that according to my own position in the Albany response, Mr. Vallandigham should be released; and this because, as you claim, he has not damaged the military service by discouraging enlistments, encouraging desertions or otherwise; and that if he had he should have been turned over to the civil authorities under the recent acts of Congress. I certainly do not know that Mr. Vallandigham has specifically and by direct language advised against enlistments and in favor of desertion and resistance to drafting. We all know that combinations, armed in some instances, to resist the arrest of deserters began several months ago; that more recently the like has appeared in resistance to the enrolment preparatory to a draft; and that quite a number of assassinations have occurred from the same animus. These had to be met by military force, and this again has led to bloodshed and death. And now, under a sense of responsibility more weighty and enduring than any which is merely official, I solemnly declare my belief that this hindrance of the military, including maiming and murder, is due to the course in which Mr. Vallandigham has been engaged in a greater degree than to any other cause; and it is due to him personally in a greater degree than to any other one man. These things have been notorious, known to all, and of course known to Mr. Vallandigham. Perhaps I would not be wrong to say they originated with his special friends and adherents. With perfect knowledge of them, he has frequently if not constantly made speeches in Congress and before popular assemblies; and if it can be shown that, with these things staring him in the face, he has ever uttered a word of rebuke or counsel against them, it will be a fact greatly in his favor with me, and one of which as yet I am totally ignorant. When it is known that the whole burden of his speeches has been to stir up men against the prosecution of the war, and that in the midst of resistance to it he has not been known in any instance to counsel against such resistance, it is next to impossible to repel the inference that he has counseled directly in favor of it. With all this before their eyes, the convention you represent have nominated Mr. Vallandigham for governor of Ohio, and both they and you have declared the purpose to sustain the National Union by all constitutional means. But of course they and you in common reserve to yourselves to decide what are constitutional means; and, unlike the Albany meeting, you omit to state or intimate that in your opinion an army is a constitutional means of saving the Union against a rebellion, or even to intimate that you are conscious of an existing rebellion being in progress with the avowed object of destroying that very Union. At the same time your nominee for governor, in whose behalf you appeal, is known to you and to the world to declare against the use of an army to suppress the rebellion. Your own attitude, therefore, encourages desertion, resistance to the draft, and the like, because it teaches those who incline to desert and to escape the draft to believe it is your purpose to protect them, and to hope that you will become strong enough to do so. After a short personal intercourse with you, gentlemen of the committee, I cannot say I think you desire this effect to follow your attitude; but I assure you that both friends and enemies of the Union look upon it in this light. It is a substantial hope, and by consequence a real strength to the enemy. If it is a false hope and one which you would willingly dispel, I will make the way exceedingly easy. I send you duplicates of this letter in order that you, or a majority of you, may, if you choose, indorse your names upon one of them and return it thus indorsed to me with the understanding that those signing are thereby committed to the following propositions and to nothing else: 1. That there is now a rebellion in the United States, the object and tendency of which is to destroy the National Union; and that, in your opinion, an army and navy are constitutional means for suppressing that rebellion; 2. That no one of you will do anything which, in his own judgment, will tend to hinder the increase, or favor the decrease, or lessen the efficiency of the army or navy while engaged in the effort to suppress that rebellion; and 3. That each of you will, in his sphere, do all he can to have the officers, soldiers, and seamen of the army and navy, while engaged in the effort to suppress the rebellion, paid, fed, clad, and otherwise well provided for and supported. And with the further understanding that upon receiving the letter and names thus indorsed, I will cause them to be published, which publication shall be, within itself, a revocation of the order in relation to Mr. Vallandigham. It will not escape observation that I consent to the release of Mr. Vallandigham upon terms not embracing any pledge from him or from others as to what he will or will not do. I do this because he is not present to speak for himself, or to authorize others to speak for him; and because I should expect that on his returning he would not put himself practically in antagonism with the position of his friends. But I do it chiefly because I thereby prevail on other influential gentlemen of Ohio to so define their position as to be of immense value to the army—thus more than compensating for the consequences of any mistake in allowing Mr. Vallandigham to return; so that, on the whole, the public safety will not have suffered by it. Still, in regard to Mr. Vallandigham and all others, I must hereafter, as hereto-

fore, do so much as the public safety may seem to require. I have the honor to be respectfully yours."—Abraham Lincoln, *Complete Works, v.* 2, *pp.* 362–363.

A. D. 1863 (May—July: On the Mississippi). —Siege and Capture of Port Hudson.—The clear opening of the great River.—"About the middle of May all the available force near the river was concentrated at Baton Rouge, to assist in the attack on Port Hudson. Thence Gens. Augur and Sherman moved to the south and east of that position, to coöperate with Gen. Banks. From Simmesport Gen. Banks moved his army to invest Port Hudson. . . . It was on the 21st of May that Gen. Banks landed, and on the next day a junction was effected with the advance of Maj.-Gen. Augur and Brig.-Gen. Sherman. . . . On the 25th, the enemy was compelled to abandon his first line of works. On the next day Gen. Weitzel's brigade, which had covered the rear in the march from Alexandria, arrived, and on the morning of the 27th a general assault was made on the fortifications. Port Hudson, or Hickey's Landing, as it was called some years ago, is situated on a bend in the Mississippi river, about 22 miles above Baton Rouge, and 147 above New Orleans." It was strongly fortified and well defended by Colonel Frank Gardner. The artillery of General Banks opened fire on the 27th, and at ten o'clock the same day an assault was made, in which the colored soldiers showed much firmness and bravery. The assault failed and the losses in it were heavy. "A bombardment of the position had been made by the fleet under Admiral Farragut, for a week previous to this assault. Reconnoissances had discovered that the defences were very strong, consisting of several lines of intrenchments and rifle pits, with abatis of heavy trees felled in every direction. The upper batteries on the river were attacked by the Hartford and Albatross, which had run the blockade, and the lower by the Monongahela, Richmond, Genesee, and Essex. On the 14th of June, after a bombardment of several days, another assault on Port Hudson was made. . . . All the assaulting columns were compelled to fall back under the deadly fire of the enemy, and the fighting finally ceased about 11 o'clock in the morning. The loss of Gen. Banks was nearly 700 in killed and wounded. . . . After these two attempts to reduce Port Hudson by a land assault, on the 27th of May and 14th of June, the purpose to make another was given up by Gen. Banks, until he had fully invested the place by a series of irresistible approaches. He was thus engaged in pushing forward his works when Vicksburg was surrendered. Information of this surrender was sent to Gen. Banks, and it was made the occasion for firing salutes and a general excitement in his camp, which attracted the attention of the enemy, to whom the surrender was communicated. Gen. Gardner, upon receiving the information, sent by flag of truce, about midnight of the 7th, the following note to Gen. Banks: . . . 'Having received information from your troops that Vicksburg has been surrendered, I make this communication to request you to give me the official assurance whether this is true or not, and if true, I ask for a cessation of hostilities, with a view to the consideration of terms for surrendering this position.'"—W. J. Tenney, *Military and Naval Hist. of the Rebellion, ch.* 29.

A. D. 1863 (June).—Call for Six-Months Men.—A call for 100,000 men to serve six months, for the repulse of the invasion of Pennsylvania, Maryland, West Virginia, and Ohio, was issued June 15.

A. D. 1863 (June: Virginia).—Lee's second movement of invasion and the inducements to it.—Northern invitation and Southern clamor.—The Southern view.—"The defeat of General Hooker at Chancellorsville was the turning-point of the war, and for the first time there was apparently a possibility of inducing the Federal Government to relinquish its opposition to the establishment of a separate authority in the South. The idea of the formation of a Southern Confederacy, distinct from the old Union, had, up to this time, been repudiated by the authorities at Washington as a thing utterly out of the question; but the defeat of the Federal arms in the two great battles of the Rappahannock had caused the most determined opponents of separation to doubt whether the South could be coerced to return to the Union; and, what was equally or more important, the proclamations of President Lincoln, declaring the slaves of the South free, and placing the United States virtually under martial law, aroused a violent clamor from the great Democratic party of the North, who loudly asserted that all constitutional liberty was disappearing. This combination of non-success in military affairs and usurpation by the Government emboldened the advocates of peace to speak out plainly, and utter their protest against the continuance of the struggle, which they declared had only resulted in the prostration of all the liberties of the country. Journals and periodicals, violently denunciatory of the course pursued by the Government, all at once made their appearance in New York and elsewhere. A peace convention was called to meet in Philadelphia. . . . On all sides the advocates of peace on the basis of separation were heard raising their importunate voices. . . . The plan of moving the Southern army northward, with the view of invading the Federal territory, seems to have been the result of many circumstances. The country [Southern] was elated with the two great victories of Fredericksburg and Chancellorsville, and the people were clamorous for active operations against an enemy who seemed powerless to stand the pressure of Southern steel. The army, which had been largely augmented by the return of absentees to its ranks, new levies, and the recall of Longstreet's two divisions from Suffolk, shared the general enthusiasm; and thus a very heavy pressure was brought to bear upon the authorities and on General Lee, in favor of a forward movement, which, it was supposed, would terminate in a signal victory and a treaty of peace. Lee yielded to this view of things rather than urged it. . . . Another important consideration was the question of supplies. . . . More than ever before, these supplies were now needed; and when Gen-

eral Lee sent, in May or June, a requisition for rations to Richmond, the commissary-general is said to have endorsed upon the paper, 'If General Lee wishes rations, let him seek them in Pennsylvania.' The considerations here stated were the main inducements for that great movement northward which followed the battle of Chancellorsville. . . . Throughout the month of May, Lee was busily engaged in organizing and equipping his forces for the decisive advance. Experience had now dictated many alterations and improvements in the army. It was divided into three 'corps d'armée,' each consisting of three divisions, and commanded by an officer with the rank of lieutenant-general. Longstreet remained at the head of his former corps, Ewell succeeded Jackson in command of 'Jackson's old corps', and A. P. Hill was assigned to a third corps made up of portions of the two others. . . . On the last day of May, General Lee had the satisfaction of finding himself in command of a well-equipped and admirably-officered army of 68,352 bayonets, and nearly 10,000 cavalry and artillery — in all, about 80,000 men. . . . Lee began his movement northward on the 3d day of June, just one month after the battle of Chancellorsville. . . . Pursuing his design of manœuvring the Federal army out of Virginia, without coming to action, Lee first sent forward one division of Longstreet's corps in the direction of Culpepper, another then followed, and, on the 4th and 5th of June, Ewell's entire corps was sent in the same direction—A. P. Hill remaining behind on the south bank of the Rappahannock, near Fredericksburg, to watch the enemy there, and bar the road to Richmond. These movements became speedily known to General Hooker, whose army lay north of the river near that point, and on the 5th he laid a pontoon just below Fredericksburg, and crossed about a corps to the south bank, opposite Hill. This threatening demonstration, however, was not suffered by Lee to arrest his own movements. . . . He continued the withdrawal of his troops, by way of Culpepper, in the direction of the Shenandoah Valley." On the morning of the 9th of June, "two divisions of Federal cavalry, supported by two brigades of 'picked infantry,' were sent across the river at Kelly's and Beverley's Fords, east of the court-house, to beat up the quarters of Stuart and find what was going on in the Southern camps. The most extensive cavalry fight [known as the battle of Brandy Station, or the battle of Fleetwood], probably, of the whole war, followed. . . . This reconnoisance in force . . . had no other result than the discovery of the fact that Lee had infantry in Culpepper. . . . This attempt of the enemy to penetrate his designs had not induced General Lee to interrupt the movement of his infantry toward the Shenandoah Valley. The Federal corps sent across the Rappahannock at Fredericksburg, still remained facing General Hill, and, two days after the Fleetwood fight, General Hooker moved up the river with his main body, advancing the Third Corps to a point near Beverley's Ford. But these movements were disregarded by Lee. On the same day Ewell's corps moved rapidly toward Chester Gap, passed through that defile in the mountain, pushed on by way of Front Royal, and reached Winchester on the evening of the 13th, having in three days marched 70 miles. The position of the Southern army now exposed it to very serious danger, and at first sight seemed to indicate a deficiency of soldiership in the general commanding it. In face of an enemy whose force was at least equal to his own, Lee had extended his line until it stretched over a distance of about 100 miles. . . . When intelligence now reached Washington that the head of Lee's column was approaching the Upper Potomac, while the rear was south of the Rappahannock, the President wrote to General Hooker: 'If the head of Lee's army is at Martinsburg, and the tail of it on the plank road, between Fredericksburg and Chancellorsville, the animal must be very slim somewhere — could you not break him?' . . . It would seem that nothing could have been plainer than the good policy of an attack upon Hill at Fredericksburg, which would certainly have checked Lee's movement by recalling Longstreet from Culpepper, and Ewell from the Valley. But . . . instead of reënforcing the corps sent across at Fredericksburg and attacking Hill, General Hooker withdrew the corps, on the 13th, to the north bank of the river, got his forces together, and began to fall back toward Manassas."—J. E. Cooke, *Life of Gen. Robert E. Lee, pt. 6, ch. 9–12.*

Also in: H. Greeley, *The American Conflict, v. 2, ch. 21.*— W. Swinton, *Campaigns of the Army of the Potomac, ch. 9.*

A. D. 1863 (June—July: Pennsylvania).— Lee's Invasion.— The Battle of Gettysburg. — "Hooker started toward Washington. Ewell gained possession of Winchester and Martinsburg, but not of Harper's Ferry. There is a rocky and thickly wooded range of heights called the Bull Run Mountains, running from Leesburg south. As Hooker had not occupied them but was farther to the East, Lee desired to do so, for it would give him a strong position on Hooker's flank and bring him (Lee) very near to Washington. He therefore directed his cavalry to reconnoiter in that direction. Stuart's reconnoitering party met the Union cavalry at Aldie, and after a hard battle retreated. A series of cavalry combats ensued, ending in the retreat of Stuart's cavalry behind the Blue Ridge. Hooker was strongly posted east of the Bull Run range and could not be attacked with much chance of success. As Lee could not well remain inactive or retreat, he resolved to invade Pennsylvania. This was a hazardous enterprise, for Hooker might intervene between him and Richmond. Stuart's cavalry was left to prevent this catastrophe by guarding the passes in the Blue Ridge. Stuart was also directed to harass Hooker and attack his rear should he attempt to cross the Potomac in pursuit of Lee. Lee reached Chambersburg with Longstreet's and Hill's corps. Ewell's corps was in advance at Carlisle [June 27] and York," and advance bodies of cavalry were threatening Harrisburg. The militia of Pennsylvania, New York and Maryland were called out in force, but arms and ammunition for them were inadequate. "On June 28th, Hooker determined to send Slocum's corps and the garrison of Harper's Ferry—the latter about 10,000 strong — to operate against Lee's rear. This was an excellent plan, but Hooker's superior, General Halleck, refused to allow him to remove the troops from Harper's Ferry; and Hooker said if he could not manage the campaign in his own way, he preferred to give up the command of the army." He was accordingly

relieved and the command was given to Major-General George G. Meade, of the Fifth Corps. Meantime (June 25–27) the Union army had crossed the Potomac and advanced to Frederick, Md. "On June 28th, Lee learned from a scout that the Union army was in his rear and that his communication with Richmond was seriously endangered. . . . In this emergency he concluded to threaten Baltimore. As a preliminary measure, he directed his entire army to move on Gettysburg. This he hoped would induce Meade to concentrate in his front and leave his rear free; which was precisely what Meade did do. . . . Under the impression that Lee's army was spread out along the Susquehanna from Carlisle to York, Meade threw out his own forces fan-shaped to march in that direction. . . . The Union corps were marching on and getting farther apart, while the enemy were concentrating. The advance of Hill's corps, on the morning of July 1st, struck Buford's division of Union cavalry a short distance to the west of Gettysburg, and in spite of a stout resistance forced it slowly back towards the town. The First Corps at this time was five miles south of Gettysburg. General Reynolds went to the support of Buford with the nearest division of the First Corps — Wadsworth's — and directed that the others follow. While forming his line of battle he was killed. General Howard succeeded to the command of the field, but did not issue any orders to the First Corps until the afternoon. In the meantime General Doubleday continued the contest, captured a great part of the forces that had assailed him, and cleared his immediate front of all enemies. Before the Eleventh Corps came up the enemy could have walked right over the small force opposed to them, but owing to the absence of Stuart's cavalry [which, not crossing the Potomac to follow Lee until the 27th, had undertaken a long raid around the Union forces, and did not succeed in joining the main body of the Confederates until July 2d] they had not been kept informed as to the movements Meade was making, and fearing that the whole Union army was concentrated in their front they were overcautious. There was now a lull in the battle for about an hour. The remainder of the First Corps came up and was followed soon after by the Eleventh Corps under General Schurz. About the same time the Confederate corps of General Ewell arrived and made a junction with that of Hill. General Howard assumed command of the Union forces. Repeated attacks were now made against the First Corps by Ewell from the north and Hill from the west; but the Confederate charges were successfully repulsed. . . . Ewell's attack also struck the Eleventh Corps on the right and front with great force. . . . General Meade, when he heard of Reynold's death, was 14 miles from Gettysburg at Taneytown, preparing to form line of battle along Pipe Creek. He at once sent General Hancock forward with orders to assume command of the field. Hancock, perceiving that Cemetery Ridge [about half a mile south of Gettysburg] was an admirable position for a defensive battle, determined to hold it if possible. This was not an easy thing to do, for the enemy were in overwhelming force, and the feeble remnants of the First and Eleventh Corps were not in a condition to make a prolonged resistance. . . . Hancock directed Doubleday to send a force to Culp's Hill on the right, while he instructed Buford to parade up and down on the extreme left with his cavalry. The enemy were thus led to suppose that the Union line was a long one and had been heavily reënforced. As the losses on both sides had been tremendous, probably not exceeded for the same number of troops during the war, the enemy hesitated to advance, particularly as some movements of Kilpatrick's cavalry seemed to threaten their rear. They therefore deferred action until Meade concentrated the next day. On General Hancock's recommendation General Meade ordered his entire army to Gettysburg. By dusk part of the Third Corps had arrived, and soon after the Twelfth Corps and the Second Corps were close at hand. . . . Most of the troops, though worn out with hard marching, arrived by midday of July 2d. The Sixth Corps had 34 miles to march and came later in the afternoon. . . . The attack as ordered by General Lee was to begin with Longstreet on the right and be made 'en échelon.' That is, as soon as Longstreet was fairly engaged, Hill's corps was to take up the fight and go in, and as soon as Hill was fairly engaged, Ewell's corps on the right was to attack. The object was to keep the whole Union line in a turmoil at once, and prevent reënforcements going from any corps not engaged to another that was fighting; but Hill did not act until Longstreet's fight was over, and Ewell did not act until Hill had been repulsed. . . . The enemy. . . failed in every attack against Meade's main line, with the exception of that portion south of Culp's Hill. Elated by the fact that he had made a lodgement there, Ewell determined to hold on at all hazards and sent heavy reënforcements during the night to aid Johnson to make an attack in the morning. . . . So ended the battle of the second day. At day dawn [July 3] General Warren, acting for General Meade, established a cordon of troops and batteries which drove Johnson out of his position on the right. . . . Lee having failed in his attacks both on Meade's left and right had to decide at once whether he would give up the contest and retreat, or make another attempt to force the Union line. As he had been reënforced by Stuart's cavalry, and as a fresh division under Pickett was available, he determined to try to pierce the left center of the Union army and disperse the force opposed to him. To this end he directed Longstreet to form a strong column of attack to be composed of Pickett's division and Pettigrew's division and two brigades of Pender's division, under Trimble, of Hill's corps. To create confusion and prevent General Meade from sending reënforcements to the menaced point, Stuart was ordered to ride around the right of the Union army and make an attack in rear. And still more to facilitate the attack 135 guns were to concentrate their fire against the Union center and disperse the forces assembled there. About 1 P. M. the terrific cannonade began and lasted for two hours, by which time the Confederate ammunition was nearly exhausted. . . . Stuart's cavalry attack proved abortive, for it was met and frustrated by two brigades of Gregg's cavalry aided by Custer's brigade, after a severe battle, which was hotly contested on both sides. Stuart's further progress was checked and he was forced to retreat. . . . Pickett formed his great column of attack and came for-

ward as soon as the fire from the Union batteries slackened." Fresh guns had, however, been brought into position and swept the ground over which Pickett moved. His charge, one of the most desperately determined of the whole war, was heroically met by Gibbon's division of the Second Corps and by part of the First Corps, under the personal direction of General Hancock, who was severely wounded in the terrible conflict. Pickett was forced to retreat with the survivors of his onslaught, and "the whole plain was soon covered with fugitives; but, as no pursuit was ordered, General Lee in person succeeded in rallying them and in re-forming the line of battle. The next day, July 4th, General Lee drew back his flanks and at evening began his retreat by two routes — the main body on the direct road to Williamsport through the mountains, the other via Chambersburg, the latter including the immense train of the wounded. Gregg's division (except Huey's brigade) was sent in pursuit by way of Chambersburg, but the enemy had too much the start to render the chase effective. Kilpatrick, however, got in front of the main body on the direct route and, after a midnight battle at Monterey, fought during a terrific thunder storm, succeeded in making sad havoc of Ewell's trains. . . . Lee concentrated his army in the vicinity of Williamsport, but as French had destroyed his pontoon bridge, and as the Potomac had risen, he was unable to cross. He therefore fortified his position. Meade did not follow Lee directly, but went around by way of Frederick. After considerable delay the Union army again confronted that of Lee and were about — under orders from President Lincoln — to make an attack, when Lee slipped away on the night of July 14th to the Virginia side of the Potomac. This ended the campaign of Gettysburg. The Union loss was 3,072 killed, 14,497 wounded, 5,434 missing=Total, 23,003. The Confederate loss was 2,592 killed, 12,709 wounded, 5,150 missing=Total, 20,451."—A. Doubleday, *Gettysburg made plain (with 29 maps).*

A. D. 1863 (June—July: Tennessee).—The Tullahoma campaign.—"During the first six months of the year 1863 the Army of the Cumberland remained at Murfreesboro' and was comparatively inactive. The troops were employed in the construction of elaborate fortifications and in divers minor operations with defensive or tentative objects. . . . Late in June the Army of the Cumberland advanced against its old enemy, the Confederate Army of the Tennessee, then holding the line of Duck River. In this movement the Fourteenth Corps [General Thomas] was in the centre, its appropriate place, and drove the enemy from Hoover's Gap and from several positions in front of that gap. General McCook [Twentieth Corps] on the right had a severe combat at Liberty Gap, but finally pressed the enemy from the hills. General Crittenden [Twenty-first Corps] on the left did not meet much opposition. When Bragg's army had been driven from its defensive line on Duck River, Gen. Rosecrans moved his army towards Manchester, and regarding this movement as indicating either an attack upon his position at Tullahoma, or the interruption of his communications, Bragg fell back from that place. He did not consider himself strong enough to meet Rosecrans in battle, and he consequently retreated first to the Cumberland Mountains, and, soon after, across the Tennessee River to Chattanooga. The Tullahoma campaign was begun on the 23d of June and terminated on the 4th of July. The enemy fought at the gaps of the mountains, but the defense on the whole was feeble. The result was the possession by the Army of the Cumberland of the region from Murfreesboro' to Bridgeport, Alabama. At the close of the campaign the army advanced to the northern base of the Cumberland Mountains, and there halted to make preparations for a campaign south of the Tennessee River."—T. B. Van Horne, *Life of General Geo. H. Thomas, ch. 5.*

A. D. 1863 (July: On the Mississippi).—The Defence of Helena.—"One of the most brilliant of the minor victories of the war was gained at Helena, Arkansas, on the west bank of the Mississippi, on the 4th of July. General Holmes [Confederate] had asked and received permission to take that place, in the middle of June, and had mustered for that purpose an army of nearly 10,000 men. The garrison of Helena consisted of a division of the Thirteenth Corps and a brigade of cavalry numbering in all 4000 men, commanded by Major-General B. M. Prentiss. Holmes felt so sure of victory that he doubtless selected the 4th of July for his attack in a mere spirit of bravado. He assaulted at daylight with converging columns, two of which made considerable impression upon the outworks, but never reached the town. The defense of the Union troops was singularly skilful and energetic, and, after a few hours of fighting, Holmes, finding himself utterly defeated, retired at half-past ten. The little army of Prentiss was, of course, too small to pursue. The last Confederate attempt to hold the Mississippi River thus ended in a complete and most humiliating repulse."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v. 7, ch. 11.*

A. D. 1863 (July: Mississippi).—The capture and destruction of Jackson.—When Vicksburg surrendered, Johnston was hovering in the rear of Grant's army, and Sherman was watching his movements. On the very day the surrender was completed the latter marched rapidly upon Jackson, with 50,000 men, Johnston retreating before him. The city was invested on the 10th, and defended by the Confederates until the night of the 16th when they evacuated with haste. General Sherman, writing to Admiral Porter on the 19th of July, said: "We . . . have 500 prisoners, are still pursuing and breaking railroads, so that the good folks

of Jackson will not soon again hear the favorite locomotive whistle. The enemy burned nearly all the handsome dwellings round about the town because they gave us shelter or to light up the ground to prevent night attacks. He also set fire to a chief block of stores in which were commissary supplies, and our men, in spite of guards, have widened the circle of fire, so that Jackson, once the pride and boast of Mississippi, is now a ruined town. State-house, Governor's mansion, and some fine dwellings, well within the lines of intrenchments, remain untouched. I have been and am yet employed in breaking up the railroad 40 miles north and 60 south; also 10 miles east. My 10-miles break west, of last May, is still untouched, so that Jackson ceases to be a place for the enemy to collect stores and men."—*Official Records, series* 1, *v.* 24, *pt.* 3, *p.* 531.

A. D. 1863 (July: Kentucky).— John Morgan's Raid into Ohio and Indiana.—"The most famous raid of this time was that made in July by John Morgan across the Ohio River. General Buckner was then in East Tennessee, near the borders of Kentucky, getting ready to make another dash toward Louisville, and Morgan went ahead to prepare the way. He crossed the Cumberland River into Kentucky with about 3,000 mounted men, sacked Columbia, captured Lebanon with 400 prisoners, and rode on through Bardstown to Brandenburg on the Ohio River, plundering and destroying as he went. Many Kentuckians had joined him on the way, and he then had 4,000 men and ten pieces of artillery. The advance of Rosecrans's army just at that time prevented Buckner from joining him, and Morgan determined to cross into Indiana. There were two gunboats in the river, but he kept them off with his artillery while his men crossed on two captured steamboats. Morgan then rode through Indiana toward Cincinnati fighting home guards, tearing up railroads, burning bridges and mills and capturing much property. The whole State was aroused by the danger, and thousands of armed men started after the bold riders. Morgan became alarmed, and after passing around Cincinnati, almost within sight of its steeples, turned toward the Ohio to cross again into Kentucky. A large Union force was following, others were advancing on his flanks, and gunboats and steamboats filled with armed men were moving up the river to cut him off. The people aided the pursuers all they could by cutting down trees and barricading the roads to stop Morgan's march. He was so delayed by these and other things that he did not reach the Ohio until July 19th. He hoped to cross at a place called Buffington Ford, but the Union men were upon him and he had to turn and fight. After a severe battle, in which the Union troops were helped by gunboats which cut off the raiders from crossing the ford, about 800 of Morgan's men surrendered, and the rest, with Morgan himself, fled up the river fourteen miles to Bellville, where they tried to cross by swimming their horses. About 300 men had succeeded in getting over when the gunboats came up and opened fire on them. A fearful scene ensued, for it was a struggle of life and death. . . . Some got across, some were shot and some drowned. Morgan was not among the fortunate ones who escaped. With about 200 men he fled further up the river to New Lisbon, where he was surrounded and forced to surrender. This was a wonderful raid, but it did not do the Confederate cause any good. A large part of the property destroyed was private property, and this roused the anger of all the people of the Border States. . . . Morgan and some of his officers were sent to Columbus and confined in the penitentiary, from which he and six others escaped in the following November by making a hole through the bottom of their cell and digging a tunnel under the foundations of the building."—J. D. Champlin Jr., *Young Folk's Hist. of the War for the Union, ch.* 31.

A. D. 1863 (July: New York).— The Draft Riots. See NEW YORK (CITY): A. D. 1863.

A. D. 1863 (July: South Carolina).—The lodgement on Morris Island, and the assault on Fort Wagner.—After Du Pont's attack upon the forts in Charleston harbor—see above: A. D. 1863 (APRIL: S. CAROLINA)—"the Confederates enjoyed two months of undisturbed leisure for the construction and strengthening of their works, though all this time the matter of a new essay at the reduction of Sumter occupied more than its proper share of the attention of the Government. The forces in the Department of the South were not sufficient to undertake a siege of Charleston by land, and the exigencies of the more important campaigns going forward in Virginia, Tennessee and Mississippi prevented their being reenforced. It was resolved, therefore, to restrict operations to the harbor and the islands immediately adjoining, and Admiral John A. Dahlgren—after the death of Admiral Foote, who had been designated for the purpose—and General Q. A. Gillmore were charged with the command of the military and naval forces engaged. . . . Admiral Dahlgren . . . assumed command on the 6th of July. Gillmore had already been on the ground some three weeks, and had nearly completed his preparations for a descent upon Morris Island, when Dahlgren arrived. The admiral, without a moment's delay, entered into the plans of the general, and within forty-eight hours collected his scattered monitors and steamed away to the harbor of Charleston. Morris Island is a low strip of sandy beach, which lies to the south of Charleston and, with Sullivan's Island to the north, guards the entrance to the harbor, the two stretching out to sea like the open jaws of an alligator. They are each about three and a half miles long, separated from the mainland on the north, and from the high ground of James Island on the south, by miry and impracticable marshes stretching a distance of two or three miles. Their inner ends are a little less than four miles from the Charleston wharves, with Fort Sumter lying midway. Gillmore resolved to make his attack from Folly Island, which lies on the coast directly south of Morris, which it greatly resembles in conformation, and from which it is separated by Light House Inlet. It was occupied by a brigade under General Israel Vogdes, who had fortified the southern end of it, controlling the waters of Stono harbor and the approaches of James Island. There was a heavy growth of underbrush at both ends of the island; taking advantage of this, Vogdes, under

Gillmore's direction, constructed ten powerful batteries near its southern extremity, completely masked from the enemy's view; their purpose being to operate against the enemy's guns near the landing place, to protect the debarkation of the troops, and to cover their retreat in case of necessity. Most of this work was done at night, and all of it as silently as possible. . . . Alfred H. Terry's division of 4,000 and George C. Strong's brigade of 2,500 were quietly brought together on Folly Island, and on the afternoon of the 8th of July the former force was sent up the Stono to make a demonstration against James Island, while Strong's brigade was ordered to descend upon Morris Island at daybreak of the 9th. Colonel T. W. Higginson of the First South Carolina Volunteers, colored, was ordered at the same time to cut the railroad between Charleston and Savannah; a duty in which General Gillmore says he 'signally failed.' The others punctually performed the tasks assigned them. Terry's feint against Stono was so imposing as to be taken for the real attack, by Beauregard, who hastily gathered together a considerable force to resist him, and paid little attention to the serious movement on the beach." The Confederate troops on Morris Island, taken by surprise, were "speedily driven out of all their batteries south of Wagner, and abandoned to Gillmore three-fourths of the island, with 11 pieces of heavy ordnance. The next day he ordered Strong's brigade to assault Fort Wagner, an attempt which failed, with slight loss on each side. On the 16th Terry was attacked by a superior force on James Island, and although he repulsed the enemy with the assistance of the gunboats which accompanied him, he was recalled to Folly Island, the purpose of his demonstration having been accomplished. Although General Gillmore had as yet no conception of the enormous strength of Fort Wagner, the assault and repulse of the 11th of July convinced him that it could not be carried offhand. He therefore determined, on consultation with Admiral Dahlgren, to establish counter-batteries against it, hoping with the combined fire of these and the gunboats to dismount the guns of the work and so shake its defense as to carry it by a determined assault. The preparations were made with great energy, and by the morning of the 18th, exactly one week after the first assault, General Gillmore was ready for the second." The batteries and the fleet opened fire on the fort at noon of July 18th; its defenders were soon driven from the parapets, and "in the course of the afternoon the whole work seemed to be beaten out of shape"; but, being constructed of fine quartz sand, it had suffered damage only in appearance. At twilight, the storming party, headed by Colonel Robert G. Shaw and his Fifty-fourth Massachusetts Regiment of colored troops, made a most brave and resolute assault, actually climbing the parapet of the fort, but only to leave 1500 dead, dying and wounded upon its treacherous sands. The heroic young Colonel Shaw fell dead among the foremost men; General Strong, Colonel Chatfield and Colonel Putnam were killed or mortally wounded; General Truman Seymour was wounded severely, and many other excellent officers were in the lists of the slain or the sadly disabled. "The death of Colonel Shaw was widely lamented, not only because of his personal worth, but because he had become in a certain sense the representative of the best strain of New England anti-slavery sentiment. The Confederates recognized this representative character by their treatment of his corpse, replying to a request of his friends for his remains, that they 'had buried him under a layer of his niggers.'"—J. G. Nicolay and J. Hay, *Abraham Lincoln, v. 7, ch. 15.*

A. D. 1863 (July — November: Virginia).— Meade and Lee on the Rapidan.—Bristoe Station.— Rappahannock Station.— Kelly's Ford.— Mine Run.—The 18th of July found the whole army of General Meade once more on the Virginia side of the Potomac. "His plan for the pursuit of Lee was not unlike that of McClellan a year before, but although he displayed much greater expedition and energy in the execution of it than were shown by his predecessor, the results, through no fault of his own, were unimportant. General French, who had taken no part in the battle of Gettysburg, had been placed in command of the Third Corps; he was an old officer of the regular army, excellent in drill, in routine, and all the every-day details of the service, but utterly unfit for an enterprise requiring great audacity and celerity. He was assigned upon this expedition to the duty of throwing his corps through Manassas Gap and attacking the flank of the enemy as he moved southward by Front Royal. Meade succeeded in getting French into the Gap in time to have broken the rebel army in two; but when he attacked, it was in so inefficient a manner, and with so small a portion of his force, that the day was wasted and the enemy made their way down the Valley to the lower gaps. This failure was a source of deep mortification to General Meade. . . . The pursuit of the enemy was not continued further. . . . The months of August and September were a period of repose for the Army of the Potomac. It was in fact in no condition to undertake active operations; a considerable body of troops had been taken from Meade for service in South Carolina, and a strong detachment had been sent to the City of New York for the purpose of enforcing the draft there. General Lee had retired behind the Rapidan for several weeks of rest; neither army was ready at that time to attack the other." Early in September Longstreet's Corps was detached from Lee's army and sent west to strengthen Bragg at Chattanooga, and in the latter part of the same month about 13,000 men (Eleventh and Twelfth Corps) were taken from Meade and sent, under Hooker's command, to the same scene of pending conflict. "But, even with this reduction of his command, after the return of the troops detached to the North, Meade found himself with an army of about 68,000 men; and, knowing this force to be somewhat superior to that of the enemy, he resolved to cross the Rapidan and attack him; but again, as so often happened in the history of the contending armies in Virginia, Lee had formed

the project of a similar enterprise, and began its execution a day or two in advance. He had learned of the departure of two corps for the West." On the 9th of October "he began a flanking movement to the right of the Union line."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 8, *ch.* 9.—"Conceiving that the Confederates would move by the Warrenton pike, in order to cross Bull Run and get possession of Centreville — thus to interpose between the Federal army and Washington — Meade retired as speedily as possible. He had, in reality, the start in the race, notwithstanding the day's loss in the return movement. . . . On the morning of the 14th, Lee advanced from Warrenton in two columns, but not by the 'pike.' The left, under Hill, moving by the turnpike to New Baltimore, was ordered to strike the railroad at Bristoe Station; the right column, under Ewell, taking a more easterly route, was directed to effect a junction at the same point. When Hill approached Bristoe, Meade's army, with the exception of Warren's corps, had passed that point. As the head of this column came up, the 5th Corps, under General Sykes, had just crossed Broad Run. Hill at once formed a line of battle to attack the rear of that corps, when Warren came up, and, by a bold onset, drove the enemy back, securing 450 prisoners and 5 guns. The National army, having won the race for position, and obtained possession of the heights of Centreville, Lee's movement was at an end, and he had but to retire to his old line again . . . and, on the 18th, began his retrograde movement. The following day Meade commenced pursuit, with the intention of attacking the enemy on his retreat, but did not overtake him, being detained by a heavy rain storm, which so raised Bull Run as to render it unfordable. . . . On the 7th of November the whole army was put in motion toward the Rappahannock, along which river the enemy was in position at Rappahannock Station and Kelly's Ford. In two columns Meade advanced toward these points. Gen'l French, commanding the left wing — composed of the 1st, 2d and 3d Corps — was directed to cross at Kelly's Ford, while the right wing — comprising the 5th and 6th Corps, under General Sedgwick — marched upon Rappahannock Station. The 3d Corps, under Birney, led the advance on Kelly's Ford. Reaching that point, without waiting for pontoons, Birney crossed his own division by wading, carried the rifle-pits, captured 500 prisoners and prevented the enemy re-enforcing their troops at the Ford, by means of batteries which he planted on the hills that commanded the crossing. At the same time the right wing was contending against more formidable obstacles at Rappahannock Station. Early's division of Ewell's corps occupied a series of works on the north side of the river. . . . Gaining a good position, commanding the fort from the rear, Sedgwick planted his guns and opened a fierce cannonade upon the enemy's several batteries. Under cover of this fire, the temporary works were assaulted and carried at the bayonet's point. Over 1,500 prisoners, 4 guns and 8 standards were captured. Sedgwick's loss was about 300 in killed and wounded. The right column now crossed the river without opposition, and, uniting with French's forces, advanced to Brandy Station. November 8th was lost in getting forward the trains, and in reconnoitering. Under cover of that night Lee withdrew across the Rapidan. Taking position between the Rappahannock and the Rapidan, Meade remained quietly and undisturbed for two weeks. Finding Lee indisposed for action, the Federal leader resolved once more to try and bring on a general engagement. . . . The Confederate army having gone into winter quarters, was located over a wide extent of country. . . . This separation of the enemy's corps, led Meade to hope, that, by crossing the lower fords of the Rapidan, and advancing rapidly on the plank and turnpike roads to Orange, C. H., he could concentrate his army against Ewell's corps, cripple or destroy it, and then be able to turn upon Hill, and in this way break Lee's army in detail." But delays occurred which "frustrated the object of the movement; . . . disclosed Meade's intention to the enemy, who at once concentrated his entire force behind Mine Run, having also time given for additional entrenchments along the menaced points. The enemy's position was found to be exceedingly strong by nature, and further perfected by the skill of busy hands. . . . In front was Mine Run, a shallow stream, but difficult to cross on account of its steep banks, the marshy nature of the ground, and the dense undergrowth with which it was flanked. . . . 'In view of the season of the year [said General Meade in his subsequent report], the impossibility of moving from that place if there came on even a couple of days of rain; having failed in my first plan, which was to attack the enemy before they could concentrate; and then having failed in my plan to attack them after they had concentrated, in the manner which I have related, I concluded that, under the circumstances, it was impossible for me to do anything more.' And this was the end of a movement, which, like Hooker's advance to flank Fredericksburg, opened with fair promise of success, and, like that advance, was a failure from incidents which the situation permitted rather than asserted."—O. J. Victor, *Hist. of the Southern Rebellion, div.* 12, *ch.* 1 (*v.* 4).

A. D. 1863 (August: Missouri — Kansas).— Quantrell's guerrilla raid.— The sacking and burning of Lawrence.— "Since the fall of Vicksburg many rebel soldiers had returned from Arkansas to their homes in Western Missouri, and under the secret orders so frequently sent from commanders in the South into that State, the guerrilla bands along the Kansas border suddenly grew in numbers and audacity. Though the whole region was patrolled almost day and night by Union detachments and scouts, a daring leader named Quantrell, who had been for some weeks threatening various Kansas towns, assembled a band of 300 picked and well-mounted followers at a place of rendezvous near the line, about sunset of August 20. His object being divined, half a dozen Union detachments from different points started in chase of him; but skilfully eluding all of them by an eccentric march, Quantrell crossed the State line, and, reaching the open prairie country, where roads were unnecessary, pushed directly for Lawrence, Kansas. . . . This town was 40 miles in the interior,

and had no reason to apprehend an attack, and though it could have assembled several hundred men under arms in half an hour, its inhabitants had no dream of danger when the marauders entered the place at sunrise of August 21. Quantrell stationed detachments to prevent any assembling or concentration of the citizens, and then began a scene of pillage, arson and massacre too horrible to relate. Stores and banks were robbed, 185 buildings burned, and from 150 to 200 inhabitants murdered with a cold-blooded fiendishness which seems impossible to believe of Americans. The direful work occupied but three or four hours, when the perpetrators remounted their horses and departed. Though they managed their retreat with such skill as to avoid a general encounter, the pursuit was so hot that in several skirmishes, and by cutting off stragglers and laggards, 100 or more of the band were killed. The sudden calamity raised excitement on the Kansas border to almost a frenzy." —J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 8, *p.* 211.

A. D. 1863 (August — September: Tennessee).— Burnside's deliverance of East Tennessee.— The Union Army in Knoxville.— "Ever since the Federals had become masters of Kentucky they had projected an expedition into East Tennessee. . . . Early in the year 1862 the Federals had taken the defile of Cumberland Gap, the principal door to East Tennessee; but drawn into the pursuit of their adversaries in other directions, they had very wisely renounced proceeding beyond the gap, and shortly thereafter the Confederates had retaken the defile. In 1863 the rôle of liberator of East Tennessee was reserved for General Burnside: it was an honorable compensation accorded to the unfortunate but gallant soldier vanquished at Fredericksburg. Two divisions of the Ninth Corps designated to undertake this campaign having been, on June 4th, sent to the aid of Grant, it became necessary to commence new preparations. The scattered troops in Kentucky, several regiments recruited in that State or composed of refugees from East Tennessee, and a part of the fresh levies made in Ohio and Indiana, formed the Twenty-third Corps, under the orders of General Hartsuff. At the end of June . . . this little army was in readiness to move, when Morgan started on his raid [and Burnside's troops were sent in the pursuit]. Six weeks were lost. It was the beginning of August. The Ninth Corps was coming back from Vicksburg. But the men, worn out by the climate, had need of rest. Burnside could not wait for them." He set out upon his movement into East Tennessee with about 20,000 men, leaving Camp Nelson, near Lexington, on the 16th of August. The Confederate General Buckner opposed him with an equal number, including 3000 under General Fraser at Cumberland Gap. Instead of attempting to force the passage of the gap, Burnside "determined to make a flank movement around the defile, by traversing more to the south, in the State of Tennessee, the high table-land which on that side bears the designation of Cumberland plateau. The roads which Burnside would have to cross were long and difficult to travel, and that portion of the country was little known, besides being bare of resources; but the very difficult character of the roads warranted the belief that the Confederates would be illy prepared for defence in that region. No precaution was neglected to ensure the success of this laborious and perilous march," and the success achieved was perfect. "One can understand with what joy the Federals, after eleven days of toilsome march, entered the rich valley, a kind of promised land, which stretched out before them. Public rumor had greatly exaggerated their numbers. . . . Bragg, fearing with reason lest by its flanking movements it [the division which Burnside led in person] should separate him from Buckner and then fall upon Chattanooga, had sent his lieutenant an order to evacuate Knoxville." Buckner withdrew and Burnside made a triumphal entry into Knoxville on the 3d of September. "According to the testimony of eye-witnesses, the joy of the people was beyond description. Innumerable Federal flags which had been preserved in secret were displayed at the windows." Frazer, who had not been withdrawn from Cumberland Gap, found himself entrapped, when, on the 9th of September, Burnside appeared before his works, and he surrendered without a shot.—Comte de Paris, *Hist. of the Civil War in Am., v.* 4, *bk.* 1, *ch.* 2.

Also in: A. Woodbury, *Burnside and the 9th Army Corps, pt.* 3, *ch.* 4–5.— T. W. Humes, *The Loyal Mountaineers of East Tennessee, ch.* 13.— *Official Records, Series* 1, *v.* 30, *pt.* 2.

A. D. 1863 (August— September: Tennessee).—Rosecrans's advance to Chattanooga. — Evacuation of the place by the Confederates.— Battle of Chickamauga.— "The seizure and occupation of the strategic point Chattanooga was an essential part of the campaign by the national forces against the Confederates. The Atlantic portion of the Southern States is separated from the Mississippi Valley by majestic folds of the earth's surface, constituting the Appalachian Ranges. These folds run, in a general manner, parallel to each other, and at intervals are crossed by transverse depressions or gaps. Such passages or gateways are therefore of great commercial, political and military importance. Chattanooga, which in the Cherokee language means 'The Hawk's Nest,' is a little town seated in one of these transverse depressions, through which the Tennessee River and a system of railroads pass. . . . From the region of Chattanooga the earth-folds range in a southwesterly direction. Enumerating such of them as are of interest on the present occasion, they are from west to east as follows: Raccoon or Sand Mountain, Lookout Mountain, Missionary Ridge, Pigeon Mountain, Chickamauga Hills. . . . Chattanooga Valley . . . through which runs a stream of the same name, is formed on the west by Lookout Mountain, here about 2,400 feet high, and on the east by Missionary Ridge, so called because Catholic Missionaries had established, many years ago, churches and schools upon it among the Cherokee Indians. From the summit of Lookout Mountain portions of not fewer than six States may be seen." In his Tullahoma campaign—See above: 1863 (June—July: Tennessee)—Rosecrans, in July, had compelled Bragg and the Confederate army, by skilful flanking movements, to fall back to Chattanooga. He had ever since been urged from Washington to pursue his attack and dislodge the enemy from the mountains. But he delayed further movements for a month, repair-

ing his railroad communications, asking for reinforcements, and waiting for corn to ripen for food and forage. When he advanced, it was to turn the left of Bragg's position at Chattanooga, and "reach his rear between Dalton and Atlanta. To do this, he had to cross the Tennessee River below Chattanooga, and then pass the three or four successive mountain ridges. . . . Rosecrans reached the Tennessee River on the evening of the 20th of August, and shelled Chattanooga from the heights on the north bank on the 21st. Bridges were thrown over the river at Caperton's Ferry, mouth of Battle Creek, and Shell Mound, and the army, except the cavalry, safely crossed in face of the enemy. By the 8th of September" the several movements planned for Thomas, McCook and Crittenden were successfully accomplished, and Chattanooga was abandoned by the Confederates. "Thus the first object of Rosecrans's campaign was accomplished: the important strategic point Chattanooga was obtained. . . . Rosecrans, believing himself perfectly secure in Chattanooga, and being convinced that Bragg was fleeing southward, did nothing to fortify himself. Taking measures to pursue his antagonist, he directed Crittenden to leave one brigade at Chattanooga as a garrison, and with the rest move forward to Ringgold. Thomas was to march to Lafayette, and McCook upon Alpine and Summer Creek. But Bragg, so far from continuing, had stopped his retreat—he was concentrating at Lafayette. He had received, or was on the point of receiving, the powerful re-enforcements directed to join him. He was strictly ordered to check the farther advance of the Army of the Cumberland. . . . Rosecrans had separated three corps of his army by mountain ridges and by distances greater than those intervening between each of them and the enemy. Bragg had concentrated opposite his centre, and was holding such a position that he could attack any of them with overwhelming numbers. He had caused deserters and citizens to go into Rosecrans's lines to confirm him in the impression that the Confederates were in rapid retreat. . . . On the 11th of September, Crittenden, not stopping to fortify Chattanooga, pushed on toward Ringgold to cut off Buckner, who he had heard was coming from East Tennessee to the support of Bragg. Finding that Buckner had already passed, he turned toward Lafayette to follow him, going up the east side of the Chickamauga, but meeting a steadily increasing resistance he took alarm, and fell back across that stream at Lee and Gordon's Mills. The forces he had encountered were Cheatham's and Walker's divisions. Thomas, who had now discovered Bragg's position, directed McCook, who was advancing on Rome, to fall back instantly and connect with him. Rosecrans's troops had thus become scattered along an extended line from Lee and Gordon's Mills to Alpine, a space of about forty miles. By the 17th they were brought more within supporting distance, and on the morning of the 18th a concentration was begun toward Crawfish Spring, but it was slowly executed. At this time the two armies were confronting each other on the opposite banks of the Chickamauga, a stream which, rising at the junction of Missionary Ridge and Pigeon Mountain . . . empties into the beautiful Tennessee River above Chattanooga. In the Indian tongue Chickamauga means 'The Stagnant Stream,' 'The River of Death'—a name, as we shall soon find, of ominous import. Rosecrans was on the west bank of the Chickamauga. . . . On the 18th his right was . . . at Gordon's Mills, his left near the road across from Rossville. Bragg's intention was to flank this left and interpose between it and Chattanooga. . . . On the 18th Longstreet's troops were arriving from Virginia, and Bragg was ready. . . . The battle of Chickamauga commenced on the morning of the 19th." Bragg's flanking movement, executed under General Polk, and directed against the left of Rosecrans's line, where Thomas had command, did not succeed. "The centre was then assailed and pressed back, but, having been re-enforced, it recovered its ground. Night came, and the battle was thus far indecisive. . . . The night was spent in preparation. Thomas constructed abatis and breastworks before his lines. . . . Bragg was still determined to flank the national left, and intervene between it and Chattanooga. He had ordered Polk to begin the battle as soon as it was light enough to see," but Polk delayed and it was not until 10 o'clock that "Breckenridge's division, followed by Cleburne's, advanced against the breastworks of Thomas, which were mostly in Cleburne's front. Cleburne moved directly upon them, Breckenridge swinging round to flank them. With so much energy were these attacks made, that Thomas had to send repeatedly to Rosecrans for help. The Confederates had been gaining ground, but with these re-enforcements Thomas succeeded in driving back Cleburne with very great loss, and even in advancing on the right of Breckenridge." But, presently, by some blunder in the giving or construing of an order, one division—that of General Wood—was withdrawn from Rosecrans line and posted uselessly in the rear. "By this unfortunate mistake a gap was opened in the line of battle, of which Hindman, of Longstreet's corps, took instant advantage, and, striking Davis in flank and rear, threw his whole division into confusion. . . . That break in the line was never repaired. Longstreet's masses charged with such terrible energy that it was impossible to check them. The national right and centre were dispersed, flying toward Rossville and Chattanooga. Sheridan, however, at length succeeded in rallying a considerable portion of his division, and managed to reach Thomas. On Thomas, who, in allusion to these events, is often called 'The Rock of Chickamauga,' the weight of the battle now fell. Everything depended on his firmness. . . . In the flight of the right and part of the centre from the field, Rosecrans, McCook and Crittenden were enveloped and carried away. . . . Rosecrans . . . went to Chattanooga, and thence telegraphed to Washington that his army had been beaten. Thomas still remained immovable in his position," and at a critical moment he was saved from a movement into his rear, by General Gorden Granger, who pushed to the front with some reserves. "Night came, and the Confederates were still unable to shake him. But, as most of the army had retreated to Chattanooga, he now deliberately fell back to Rossville. . . . The dead and wounded he left in the hands of the enemy. On the 21st he offered battle again, and that night withdrew into the defences of Chattanooga."—J. W.

Draper, *Hist of the Am. Civil War, ch.* 67, *v.* 3. —"During the heavy fighting of the 20th, Thomas was the only general officer on the field of rank above a division commander. . . . Well was he called the 'Rock of Chickamauga,' . . . There is nothing finer in history than Thomas at Chickamauga. All things considered, the battle of Chickamauga, for the forces engaged, was the hardest fought and the bloodiest battle of the Rebellion. . . . The largest number of troops Rosecrans had of all arms on the field during the two days' fighting was 55,000 effective men. . . . Rosecrans's losses aggregated killed, 1,687; wounded, 9,394; missing, 5,255. Total loss, 16,336. Bragg, during the battle, when his entire five corps were engaged, had about 70,000 effective troops in line. . . . His losses, in part estimated, were 2,673 killed, 16,274 wounded, and 2,003 missing, a total of 20,950. A full report of the rebel losses was never made."—H. M. A. D. 1863 (August — October: Arkansas—Missouri). — The breaking of Confederate authority in Arkansas.—Occupation of Little Rock by national forces.— Rebel raids into Missouri.—"After the surrender of Vicksburg, the Federal Gen. Steele was sent to Helena, with a considerable force, and instructed to form a junction with Gen. Davidson, who was moving south from Missouri, by way of Crowley's Ridge, west of the St. Francis, and with the combined force drive the Confederates south of the Arkansas River. Having effected this junction and established his depot and hospitals at Duvall's Bluff, on the White River, Gen. Steele, on the 1st of August, advanced against the Confederate army, which fell back toward Little Rock. After several successful skirmishes, he reached the Arkansas River, and threw part of his force upon the south side, to threaten the Confederate communications with Arkadelphia, their depot of supplies, and flank their position at Little Rock. Gen. Marmaduke was sent out with a cavalry force to beat the Federals back, but was completely routed. Seeing what must be the inevitable result of this movement of Gen. Steele, the Confederate Gen. Holmes destroyed what property he could, and after a slight resistance retreated with his army in great disorder, pursued by the Federal cavalry, and on the 10th of September Gen. Steele, with the Federal army, entered the capital of Arkansas. His entire losses in killed, wounded and missing, in this whole movement, did not exceed 100. He captured 1,000 prisoners, and such public property as the Confederates had not time to destroy. The Federal cavalry continued to press the retreating Confederates southward; but a small force, which had eluded pursuit and moved eastward, attacked the Federal garrison at Pine Bluff, on the Arkansas, south of Little Rock, hoping to recapture it and thus cripple the Federals and break their communications. The attempt, which was made on the 28th of October, was repulsed with decided loss on the part of the confederates, and the same day the Federal cavalry occupied Arkadelphia, and the Confederates retreated toward the Red River. This completely restored Arkansas to the Federal authority, except a small district in the extreme southwest, and the region of Northwest Arkansas, over which the guerrilla and other irregular troops of the Confederates continued to roam, in their plundering excursions into Missouri, Kansas, and the Indian Territory. Some of these were conducted on a large scale. . . . The Confederate Gen. Cabell, collecting together as many of the guerrillas and Indians as possible, and some of the routed troops driven from Little Rock and its vicinity, started with a force variously estimated at from 4,000 to 10,000, in the latter part of September, from the Choctaw settlements of the Indian Territory, crossed the Arkansas River east of Fort Smith, and, on the 1st of October, a detachment of his troops, under Gen. Shelby, joined Coffee at Crooked Prairie, Mo., intending to make a raid into Southwestern Missouri. This combined force, numbering 2,000 or 2,500 men, penetrated as far as the Missouri River at Booneville, but were pursued by the Missouri militia, and finally brought to a stand about eight miles southwest of Arrow Rock, on the evening of the 12th of October. Gen. E. B. Brown, who commanded the Federal troops, fought them till dark that evening, and during the night, having detached a small force to attack them in the rear, renewed the battle the next morning at eight A. M. After a sharp contest they fled, completely routed and broken up, with a loss of several hundred in killed, wounded and prisoners. They were pursued to the Arkansas line and prisoners gleaned all the way. . . . With these last convulsive throes, the active existence of the Confederate authority in Arkansas died out. On the 12th of November a meeting was held at Little Rock, to consult on measures for the restoration of the State to the Union, and was succeeded by others in different parts of the State."—W. J. Tenney, *Military and Naval Hist. of the Rebellion, ch.* 36.

A. D. 1863 (August — December: South Carolina).—Siege and Reduction of Fort Wagner.—Bombardment of Fort Sumter and Charleston.—After the unsuccessful assault and bloody repulse of July 18th — See above: A. D. 1863 (July: South Carolina) — General Gillmore began against Fort Wagner the operations of a regular siege. "Trenches were dug, and by the middle of August the batteries were within a quarter-mile of Wagner and within two and a half miles of Sumter. The work on these batteries had to be done mostly by night, for the forts kept up a heavy fire. Another battery was also begun in the marsh on the west side of Morris Island. The black mud there was so soft that it would not bear the weight of a man, and was at least 16 feet deep. After the site was chosen, a lieutenant was ordered to superintend the work, and told to call for whatever materials he wanted. Being something of a wag, he sent to the quartermaster for 100 men 18 feet high, to work in mud 16 feet deep; but as men of that height could not be had, he had to be satis-

fied with workmen of common stature. All the work had to be done in the dark, for it was within range of the guns of the forts. During fourteen nights piles were driven through the mud into the solid ground beneath, and on them were piled 15,000 bags of sand to form a parapet. After breaking down several trucks, a monster eight-inch Parrott gun, a 200-pounder, was dragged across the swamp and mounted, and about the middle of August the Swamp Angel, as the soldiers named it, was ready to throw shells into Charleston, nearly five miles away. On the 17th of August twelve land-batteries and the monitors opened fire on Sumter, Wagner, and Gregg. The heaviest of the fire was aimed at Sumter, as General Gillmore wished to silence it before he made another assault on Wagner. The bombardment was kept up for seven days, when Gillmore sent a dispatch to General Halleck, saying: 'Fort Sumter is to-day (Aug. 24) a shapeless and harmless mass of ruins.'. On the 21st of August, General Gillmore wrote to General Beauregard, who was in command in Charleston, demanding the evacuation of Fort Sumter and of Morris Island, threatening, in case of refusal, to bombard Charleston. Not hearing from him, he ordered a few shells to be thrown into the city from the Swamp Angel. Some of them fell in the streets and frightened the people, but did little damage. Beauregard then wrote him a letter in which he accused him of barbarity in 'turning his guns against the old men, the women and children, and the hospitals of a sleeping city,' and called the act 'unworthy of any soldier.' General Gillmore replied that it was the duty of the commander of an attacked place to 'see to it that the non-combatants were removed,' and that he (Beauregard) had had forty days' time in which to do it. But the Swamp Angel was fired only a few times. At the thirty-sixth shot it burst and blew out the whole of its breech, and no other gun was mounted in its place. Gillmore then turned his attention once more to Fort Wagner, which he determined to assault again. To do this it was necessary to silence its guns and drive its defenders into the bomb-proofs; so a heavy fire was opened on it by the batteries, while the armored frigate New Ironsides poured eleven-inch shells into it from the sea side. The bombardment was kept up day and night, strong calcium lights being used by night to blind the Confederates and to show all parts of their works. The Confederates, driven from their guns, were obliged to fly for safety to their bomb-proofs. In the morning of September 7, the troops, under General Terry, were about ready to make the assault, when it was reported that the fort was empty. The garrisons of both Wagner and Gregg had fled during the night, and the whole of Morris Island was at last in possession of the Union troops. The next night an attack was made on Sumter by thirty boat-loads of men from the fleet. They reached the base of the walls and began to go up, thinking that the garrison was asleep; but before they reached the top a fire of musketry and hand-grenades was opened on them by the Confederates within, aided by some gun boats outside, and the assailants were driven off with a loss of about 200. But little more was done against Charleston during the rest of the year. General Gillmore thought that, as Sumter's guns were silenced, the fleet might easily pass into the harbor and capture Charleston. But Admiral Dahlgren did not care to run the risk of the torpedoes and powder-mines over which he knew he would have to pass. Besides, General Beauregard had taken advantage of the long delay in taking Wagner to strengthen the inner forts. Fort Johnson had been made into a powerful earthwork, and the fleet, even if Sumter were passed, would meet with as hot a fire as had been experienced outside. General Gillmore therefore contented himself with repairing Wagner and Gregg and turning their guns on Charleston and the forts defending it. As they were a mile nearer the city than the Swamp Angel battery, a slow bombardment was kept up until near the end of the year. About half of Charleston was reached by the shells, and many buildings were greatly injured. As the wharfs and most of the harbor were under fire, blockade-runners could no longer run in, and the business of the city was thus wholly destroyed."—J. D. Champlin, Jr., *Young Folk's Hist. of the War for the Union, ch.* 32.

A. D. 1863 (October—November: Tennessee).—The raising of the siege of Chattanooga.—"Battle above the Clouds," on Lookout Mountain.—Assault of Missionary Ridge.—The Rout of Bragg's army.—After its defeat at Chickamauga the National Army was practically besieged on Chattanooga. Bragg acquired strong positions on Lookout Mountain and Missionary Ridge, and was able to cut off all of Rosecrans's routes of supply, except one long and difficult wagon-road. On the 17th of October an important reorganization of the Union armies in the West was effected. "The departments of the Ohio, the Cumberland, and the Tennessee, were united under the title of Military Division of the Mississippi, of which General Grant was made commander, and Thomas superceded Rosecrans in command of the Army of the Cumberland. General Hooker, with two corps, was sent to Tennessee. Grant arrived at Chattanooga on the 23d of October, and found affairs in a deplorable condition. It was impossible to supply the troops properly by the one wagon-road, and they had been on short rations for some time, while large numbers of the mules and horses were dead. Grant's first care was to open a new and better line of supply. Steamers could come up the river as far as Bridgeport, and he ordered the immediate construction of a road and bridge to reach that point by way of Brown's Ferry, which was done within five days, the 'cracker line,' as the soldiers called it, was opened, and thenceforth they had full rations and abundance of everything. The enemy attempted to interrupt the work on the road; but Hooker met them at Wauhatchie, west of Lookout Mountain, and after a three-hours' action drove them off [with a loss of 416 killed and wounded, the Confederate loss being unknown]. Chattanooga was now no longer in a state of siege; but it was still seriously menaced by Bragg's army, which held a most singular position. Its flanks were on the northern ends of Lookout Mountain and Mission

Ridge, the crests of which were occupied for some distance, and its centre stretched across Chattanooga valley. This line was twelve miles long, and most of it was well intrenched. Grant ordered Sherman [coming from Memphis] to join him with one corps, and Sherman promptly obeyed, but as he did considerable railroad repairing on the way, he did not reach Chattanooga till the 15th of November. Meanwhile Longstreet with 20,000 troops had been detached from Bragg's army and sent against Burnside at Knoxville. After Sherman's arrival, Grant had about 80,000 men."—R. Johnson, *Short Hist. of the War of Secession, ch.* 20.—"My orders for battle," writes General Grant, "were all prepared in advance of Sherman's arrival, except the dates, which could not be fixed while troops to be engaged were so far away. The possession of Lookout Mountain was of no special advantage to us now. Hooker was instructed to send Howard's corps to the north side of the Tennessee, thence up behind the hills on the north side, and to go into camp opposite Chattanooga; with the remainder of the command, Hooker was, at a time to be afterwards appointed, to ascend the western slope between the upper and lower palisades, and so get into Chattanooga Valley. The plan of battle was for Sherman to attack the enemy's right flank, form a line across it, extend our left over South Chickamauga River so as to threaten or hold the railroad in Bragg's rear, and thus force him either to weaken his lines elsewhere or lose his connection with his base at Chickamauga Station. Hooker was to perform like service on our right. His problem was to get from Lookout Valley to Chattanooga Valley in the most expeditious way possible; cross the latter valley rapidly to Rossville, south of Bragg's line on Missionary Ridge, form line there across the ridge facing north, with his right flank extended to Chickamauga Valley east of the ridge, thus threatening the enemy's rear on that flank and compelling him to reinforce this also. Thomas, with the Army of the Cumberland, occupied the centre, and was to assault while the enemy was engaged with most of his forces on his two flanks. To carry out this plan, Sherman was to cross at Brown's Ferry and move east of Chattanooga to a point opposite the north end of Mission Ridge, and to place his command back of the foot-hills out of sight of the enemy on the ridge." Remaining in this concealed position until the time of attack, Sherman's army was then, under cover of night, to be rapidly brought back to the south side of the Tennessee, at a point where Missionary Ridge prolonged would touch the river, this being done by pontoons ready provided at a spot also concealed. The execution of the plan was delayed by heavy rains until November 23, when Burnside's distress at Knoxville forced Grant to begin his attack on Bragg by an advance of Thomas's army, at the center, before the flanking preparations were completed. "This movement [General Grant's narrative continues] secured to us a line fully a mile in advance of the one we occupied in the morning, and the one which the enemy had occupied to this time. The fortifications were rapidly turned to face the other way. During the following night they were made strong. We lost in this preliminary action about 1,100 killed and wounded, while the enemy probably lost quite as heavily, including the prisoners that were captured. With the exception of the firing of artillery, kept up from Missionary Ridge and Fort Wood until night closed in, this ended the fighting for the first day. . . . By the night of the 23d Sherman's command was in a position to move," and by daylight two divisions of his command were on the south side of the river, "well covered by the works they had built. The work of laying the bridge, on which to cross the artillery and cavalry, was now begun. . . . By a little past noon the bridge was completed, as well as one over the South Chickamauga . . . and all the infantry and artillery were on the south side of the Tennessee. Sherman at once formed his troops for assault on Missionary Ridge. . . . By half-past three Sherman was in possession of the height without having sustained much loss. . . . Artillery was dragged to the top of the hill by hand. The enemy did not seem to be aware of this movement until the top of the hill was gained. There had been a drizzling rain during the day, and the clouds were so low that Lookout Mountain and the top of Missionary Ridge were obscured from the view of persons in the valley. But now the enemy opened fire upon their assailants, and made several attempts with their skirmishers to drive them away, but without avail. Later in the day a more determined attack was made, but this, too, failed, and Sherman was left to fortify what he had gained. . . . While these operations were going on to the east of Chattanooga, Hooker was engaged on the west. He had three divisions . . . all west of Lookout Creek. The enemy had the east bank of the creek strongly picketed and entrenched. . . . The side of Lookout Mountain confronting Hooker's command was rugged, heavily timbered, and full of chasms. . . . Early on the morning of the 24th Hooker moved Geary's division, supported by a brigade of Cruft's, up Lookout Creek, to effect a crossing. The remainder of Cruft's division was to seize the bridge over the creek, near the crossing of the railroad. . . . This attracted the enemy so that Geary's movement farther up was not observed. A heavy mist obscured him from the view of the troops on the top of the mountain. He crossed the creek almost unobserved, and captured the picket of over 40 men on guard near by. He then commenced ascending the mountain directly in his front. . . . By noon Geary had gained the open ground on the north slope of the mountain, with his right close up to the base of the upper palisade, but there were strong fortifications in his front. The rest of the command coming up, a line was formed from the base of the upper palisade to the mouth of Chattanooga Creek. Thomas and I were on the top of Orchard Knob. Hooker's advance now made our line a continuous one. . . . The day was hazy, so that Hooker's operations were not visible to us except at the moments when the clouds would rise. But the sound of his artillery and musketry was heard incessantly. The enemy on his front was partially fortified, but was soon driven out of his works. During the afternoon the clouds, which had so obscured the top of Lookout all day as to hide whatever was going on from the view of those below, settled down and made it so dark where Hooker was as to stop operations for the time. At four o'clock Hooker reported his position as impregnable. By a little after five direct communication was established, and a brigade of troops was sent from Chattanooga to reinforce

him. . . . The morning of the 25th opened clear and bright, and the whole field was in full view from the top of Orchard Knob. It remained so all day. Bragg's headquarters were in full view. . . . Sherman was out as soon as it was light enough to see, and by sunrise his command was in motion. Three brigades held the hill already gained. Morgan L. Smith moved along the east base of Missionary Ridge; Loomis along the west base . . . and Corse with his brigade was between the two, moving directly towards the hill to be captured." The fighting was severe for hours, and Bragg moved heavy masses of troops to resist Sherman's advance, while a division from Thomas was sent to reinforce the latter. "It had now got to be late in the afternoon, and I had expected before this to see Hooker crossing the ridge in the neighborhood of Rossville and compelling Bragg to mass in that direction also. The enemy had evacuated Lookout Mountain during the night, as I expected he would. In crossing the valley he burned the bridge over Chattanooga Creek, and did all he could to obstruct the roads behind him. Hooker was off bright and early, with no obstructions in his front but distance and the destruction above named. He was detained four hours crossing Chattanooga Creek, and thus was lost the immediate advantage I expected from his forces. . . . But Sherman's condition was getting so critical that the assault for his relief could not be delayed any longer. Sheridan's and Wood's divisions had been lying under arms from early morning, ready to move the instant the signal was given. I now directed Thomas to order the charge at once." In this splendid charge the Union troops drove the Confederates from the first line of their works and then pushed on, with no further orders, to the second line, with the same success. "The retreat of the enemy along most of his line was precipitate, and the panic so great that Bragg and his officers lost all control over their men. Many were captured and thousands threw away their arms in their flight. Sheridan pushed forward until he reached the Chickamauga River at a point above where the enemy crossed. . . . To Sheridan's prompt movement the Army of the Cumberland and the nation are indebted for the bulk of the capture of prisoners, artillery, and small arms that day. . . . The enemy confronting Sherman, now seeing everything to their left giving way, fled also. . . . Hooker [pushing on to Rossville as soon as he had succeeded in getting across Chattanooga Creek] . . . came upon the flank of a division of the enemy, which soon commenced a retreat along the ridge. This threw them on Palmer. They could make but little resistance in the position they were caught in, and as many of them as could do so escaped. Many, however, were captured . . . The victory at Chattanooga was won against great odds, considering the advantage the enemy had of position."—U. S. Grant, *Personal Memoirs, ch.* 42–44 (*v.* 2).—"Grant's losses in these battles were 757 killed, 4,529 wounded, and 330 missing; total 5,616. The enemy's losses were fewer in killed and wounded, owing to the fact that he was protected by intrenchments, while the national soldiers were without cover. Grant captured 6,142 prisoners, 40 pieces of artillery, 69 artillery carriages and caissons, and 7,000 stand of small arms; by far the greatest capture, in the open field, which had then been made during the war. The battle of Chattanooga was the grandest ever fought west of the Alleghanies. It covered an extent of 13 miles, and Grant had over 60,000 men engaged. The rebels numbered only 45,000 men, but they enjoyed immense advantages of position in every part of the field." Pursuit of the retreating Confederates began early in the morning of the 26th, and considerable fighting occurred on that day and the next. At Ringgold, Hooker was checked by Cleburne's division, which held an easily defended gap while the main column with its trains were moved beyond reach. In this battle at Ringgold Hooker lost 65 killed and 377 wounded. He took three pieces of artillery and 230 prisoners.—A. Badeau, *Military Hist. of Ulysses S. Grant, ch.* 11–12 (*v.* 1).

A. D. 1863 (October—December: Tennessee).—The Siege of Knoxville.—"The Army of the Cumberland remaining quiet at Chattanooga, Bragg (or his superiors) conceived the idea of improving his leisure by a movement on Burnside, which Longstreet was assigned to lead. Burnside had by this time spread his force very widely, holding innumerable points and places southward and eastward of Knoxville by brigades and detachments; and Longstreet advancing silently and rapidly, was enabled to strike heavily [October 20] at the little outpost of Philadelphia, held by Col. F. T. Wolford, with the 1st, 11th, and 12th Kentucky cavalry and 45th Ohio mounted infantry—in all about 2,000 men. Wolford . . . withstood several hours, hoping that the sound of guns would bring him assistance from Loudon in his rear; but none arrived; and he was at length obliged to cut his way out; losing his battery and 32 wagons, but bringing off most of his command, with 51 prisoners. . . . Our total loss in prisoners to Longstreet southward of Loudon is stated by Halleck at 650. The enemy advancing resolutely yet cautiously, our troops were withdrawn before them from Lenoir and from Loudon, concentrating at Campbell's Station—Gen. Burnside, who had hastened from Knoxville at the tidings of danger, being personally in command. Having been joined by his old (9th) corps, he was now probably as strong as Longstreet; but a large portion of his force was still dispersed far to the eastward, and he apprehended being flanked by an advance from Kingston on his left. He found himself so closely pressed, however, that he must either fight or sacrifice his trains; so he chose an advantageous position and suddenly faced the foe: his batteries being all at hand, while those of his pursuers were behind; so that he had decidedly the advantage in the fighting till late in the afternoon, when they brought up three batteries and opened, while their infantry were extended on either hand, as if to outflank him. He then fell back to the next ridge, and again faced about; holding his position firmly till after nightfall; when—his

trains having meantime obtained a fair start—he resumed his retreat, and continued it unmolested until safe within the sheltering intrenchments of Knoxville. Our loss in this affair was about 300; that of the enemy was probably greater. . . . Longstreet continued his pursuit and in due time beleaguered the city [November 17], though he can hardly be said to have invested it. . . . The defenses were engineered by Capt. Poe, and were signally effective. Directly on getting into position, a smart assault was delivered on our right, held by the 12th Illinois, 45th Ohio, 3d Michigan, and 12th Kentucky, and a hill carried; but it was not essential to the defenses. Our loss this day was about 100; among them was Gen. W. P. Sanders, of Kentucky, killed. Shelling and skirmishing barely served to break the monotony for ten weary days, when—having been reenforced by Sam Jones, and one or two other small commands from Virginia—Longstreet delivered an assault, by a picked storming party of three brigades, on an unfinished but important work known as Fort Sanders, on our left, but was bloodily repelled by Gen. Ferrero, who held it—the loss of the assailants being some 800, . . . while on our side the entire loss that night was about 100; only 15 of these in the fort. And now—Bragg having been defeated by Grant before Chattanooga, and a relieving force under Sherman being close at hand—Longstreet necessarily abandoned the siege, and moved rapidly eastward unassailed to Russellville, Virginia: our entire loss in the defense having been less than 1,000; while his must have been twice or thrice that number. Sherman's advance reached the city, and Burnside officially announced the raising of the siege, Dec. 5th."—H. Greeley, *The American Conflict*, *v.* 2, *ch.* 18.

A. D. 1863 (November).—President Lincoln's Address at Gettysburg.—"By the retreat of Lee from Gettysburg and the immediate pursuit by Meade, the burial of the dead and care of the wounded on that great battlefield were left largely to the military and local authorities of the State of Pennsylvania. Governor Andrew G. Curtin gave the humane and patriotic duty his thoughtful attention; and during its execution the appropriate design of changing a portion of the field into a permanent cemetery, where the remains of the fallen heroes might be brought together, and their last resting-place suitably protected and embellished, was conceived and begun. The citizen soldiery from seventeen of the loyal States had taken part in the conflict on the Union side, and the several Governors of these States heartily coöperated in the project, which thus acquired a National character. This circumstance made it natural that the dedication ceremonies should be of more than usual interest and impressiveness. Accordingly, at the beginning of November, 1863, when the work was approaching its completion, Mr. David Wills, the special agent of Governor Curtin, and also acting for the several States, who had not only originated, but mainly superintended, the enterprise, wrote the following letter of invitation to President Lincoln: 'The several States having soldiers in the Army of the Potomac, who were killed at the battle of Gettysburg, or have since died at the various hospitals which were established in the vicinity, have procured grounds on a prominent part of the battlefield for a cemetery, and are having the dead removed to them and properly buried. These grounds will be consecrated and set apart to this sacred purpose, by appropriate ceremonies, on Thursday, the 19th instant. Hon. Edward Everett will deliver the oration. I am authorized by the Governors of the different States to invite you to be present and participate in these ceremonies, which will doubtless be very imposing and solemnly impressive. It is the desire that after the oration, you, as Chief Executive of the nation, formally set apart these grounds to their sacred use by a few appropriate remarks. It will be a source of great gratification to the many widows and orphans that have been made almost friendless by the great battle here, to have you here personally; and it will kindle anew in the breasts of the comrades of these brave dead, who are now in the tented field or nobly meeting the foe in the front, a confidence that they who sleep in death on the battlefield are not forgotten by those highest in authority; and they will feel that, should their fate be the same, their remains will not be uncared-for. We hope you will be able to be present to perform this last solemn act to the soldier dead on this battlefield.' President Lincoln expressed his willingness to perform the duty requested of him. . . . At the appointed hour on the 19th a vast procession, with military music, moved to the cemetery grounds where, in the midst of a distinguished auditory, the orator of the day, Edward Everett, made an address worthy alike of his own fame and the extraordinary occasion. . . . Mr. Everett ended in a brilliant peroration, the echoes of which were lost in the long and hearty plaudits of the great multitude, and then President Lincoln arose to fill the part assigned him in the programme. It was a trying ordeal to fittingly crown with a few brief sentences the ceremonies of such a day, and such an achievement in oratory; finished, erudite, apparently exhaustive of the theme, replete with all the strength of scholastic method and the highest graces of literary culture. If there arose in the mind of any discriminating listener on the platform a passing doubt whether Mr. Lincoln would or could properly honor the unique occasion, that doubt vanished with his opening sentence; for then and there the President pronounced an address of dedication so pertinent, so brief yet so comprehensive, so terse yet so eloquent, linking the deeds of the present to the thoughts of the future, with simple words, in such living, original, yet exquisitely molded, maxim-like phrases that the best critics have awarded it an unquestioned rank as one of the world's masterpieces in rhetorical art. He said: 'Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field, as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense,

we cannot dedicate — we cannot consecrate — we cannot hallow — this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. ' It is rather for us to be here dedicated to the great task remaining before us,— that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion— that we here highly resolve that these dead shall not have died in vain — that this nation, under God, shall have a new birth of freedom — and that government of the people, by the people, for the people, shall not perish from the earth.'" —J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 8, *ch.* 7.

A. D. 1863 (December). — The President's Message to Congress, at the opening of its session, December 8, was accompanied by the following Proclamation of Amnesty, which made known the terms of political reconstruction and rehabilitation that would be favored by the Executive, in dealing with rebellious citizens who might return to their allegiance:

"Whereas, in and by the Constitution of the United States, it is provided that the President 'shall have power to grant reprieves and pardons for offenses against the United States, except in cases of impeachment;' and Whereas a rebellion now exists whereby the loyal State governments of several States have for a long time been subverted, and many persons have committed and are now guilty of treason against the United States; and Whereas, with reference to said rebellion and treason, laws have been enacted by Congress declaring forfeitures and confiscation of property and liberation of slaves, all upon terms and conditions therein stated, and also declaring that the President was thereby authorized at any time thereafter, by proclamation, to extend to persons who may have participated in the existing rebellion, in any State or part thereof, pardon and amnesty, with such exceptions and at such times and on such conditions as he may deem expedient for the public welfare; and Whereas the congressional declaration for limited and conditional pardon accords with well established judicial exposition of the pardoning power; and Whereas, with reference to said rebellion, the President of the United States has issued several proclamations, with provisions in regard to the liberation of slaves; and Whereas it is now desired by some persons heretofore engaged in said rebellion to resume their allegiance to the United States, and to reinaugurate loyal State governments within and for their respective States: Therefore, I, Abraham Lincoln, President of the United States, do proclaim, declare and make known to all persons who have directly, or by implication, participated in the existing rebellion, except as hereinafter excepted, that a full pardon is hereby granted to them and each of them, with restoration of all rights of property, except as to slaves, and in property cases where rights of third parties shall have intervened, and upon the condition that every such person shall take and subscribe an oath, and thenceforward keep and maintain said oath inviolate; and which oath shall be registered for permanent preservation, and shall be of the tenor and effect following, to wit: 'I, ——— ———, do solemnly swear, in presence of Almighty God, that I will henceforth faithfully support, protect, and defend the Constitution of the United States, and the union of the States thereunder; and that I will, in like manner, abide by and faithfully support all acts of Congress passed during the existing rebellion with reference to slaves, so long and so far as not repealed, modified, or held void by Congress, or by decision of the Supreme Court; and that I will, in like manner, abide by and faithfully support all proclamations of the President made during the existing rebellion having reference to slaves, so long and so far as not modified or declared void by decision of the Supreme Court. So help me God.' The persons excepted from the benefits of the foregoing provisions are all who are, or shall have been, civil or diplomatic officers or agents of the so-called Confederate Government; all who have left judicial stations under the United States to aid the rebellion; all who are, or shall have been, military or naval officers of said so-called Confederate Government above the rank of colonel in the Army, or of lieutenant in the Navy; all who left seats in the United States Congress to aid the rebellion; all who resigned commissions in the Army or Navy of the United States, and afterwards aided the rebellion; and all who have engaged in any way in treating colored persons, or white persons in charge of such, otherwise than lawfully as prisoners of war, and which persons may have been found in the United States service as soldiers, seamen, or in any other capacity. And I do further proclaim, declare, and make known that whenever in any of the States of Arkansas, Texas, Louisiana, Mississippi, Tennessee, Alabama, Georgia, [Virginia?], Florida, South Carolina, and North Carolina, a number of persons, not less than one tenth in number of the votes cast in such State at the presidential election of the year of our Lord one thousand eight hundred and sixty, each having taken the oath aforesaid and not having since violated it, and being a qualified voter by the election law of the State existing immediately before the so-called act of secession, and excluding all others, shall re-establish a State government which shall be republican, and in nowise contravening said oath, such shall be recognized as the true government of the State, and the State shall receive thereunder the benefits of the constitutional provision which declares that 'the United States shall guaranty to every State in this Union a republican form of government, and shall protect each of them against invasion; and, on application of the Legislature, or the Executive (when the Legislature cannot be convened), against domestic violence.' And I do further proclaim, declare, and make known that any provision which may be adopted by such State government in relation to the freed people of such State, which shall recognize and declare their permanent freedom, provide for their education, and which may yet be consistent, as a temporary arrangement, with their present condition as a laboring, landless, and homeless class, will not be objected to by the national Executive. And it is suggested as not improper, that, in constructing a loyal State government in any

State, the name of the State, the boundary, the subdivisions, the constitution, and the general code of laws, as before the rebellion, be maintained, subject only to the modifications made necessary by the conditions hereinbefore stated, and such others, if any, not contravening said conditions, and which may be deemed expedient by those framing the new State government. To avoid misunderstanding, it may be proper to say that this proclamation, so far as it relates to State governments, has no reference to States wherein loyal State governments have all the while been maintained. And for the same reason, it may be proper to further say, that whether members sent to Congress from any State shall be admitted to seats constitutionally rests exclusively with the respective Houses, and not to any extent with the Executive. And still further, that this proclamation is intended to present the people of the States wherein the national authority has been suspended, and loyal State governments have been subverted, a mode in and by which the national authority and loyal State governments may be re-established within said States, or in any of them; and, while the mode presented is the best the Executive can suggest, with his present impressions, it must not be understood that no other possible mode would be acceptable. Given under my hand, at the City of Washington, the eighth day of December, in the year of our Lord, one thousand eight hundred and sixty-three, and of the independence of the United States of America the eighty-eighth. ABRAHAM LINCOLN."

In the Message Mr. Lincoln gave his reasons for the Proclamation, and explained the grounds on which he rested the policy declared in it, as follows: "On examination of this proclamation it will appear, as is believed, that nothing is attempted beyond what is amply justified by the Constitution. True, the form of an oath is given, but no man is coerced to take it. The man is only promised a pardon in case he voluntarily takes the oath. The Constitution authorizes the Executive to grant or withhold the pardon at his own absolute discretion; and this includes the power to grant on terms, as is fully established by judicial and other authorities. It is also proffered that if, in any of the States named, a State government shall be, in the mode prescribed, set up, such government shall be recognized and guaranteed by the United States, and that under it the State shall, on the constitutional conditions, be protected against invasion and domestic violence. The constitutional obligation of the United States to guarantee to every State in the Union a republican form of government, and to protect the State, in the cases stated, is explicit and full. But why tender the benefits of this provision only to a State government set up in this particular way? This section of the Constitution contemplates a case wherein the element within a State, favorable to republican government, in the Union, may be too feeble for an opposite and hostile element external to or even within the State; and such are precisely the cases with which we are now dealing. An attempt to guarantee and protect a revived State government, constructed in whole, or in preponderating part, from the very element against whose hostility and violence it is to be protected, is simply absurd. There must be a test by which to separate the opposing elements so as to build only from the sound; and that test is a sufficiently liberal one which accepts as sound whoever will make a sworn recantation of his former unsoundness. But if it be proper to require, as a test of admission to the political body, an oath of allegiance to the Constitution of the United States, and to the Union under it, why also to the laws and proclamations in regard to slavery? Those laws and proclamations were enacted and put forth for the purpose of aiding in the suppression of the rebellion. To give them their fullest effect, there had to be a pledge for their maintenance. In my judgment they have aided, and will further aid, the cause for which they were intended. To now abandon them would be not only to relinquish a lever of power, but would also be a cruel and an astounding breach of faith. I may add at this point, that while I remain in my present position I shall not attempt to retract or modify the Emancipation Proclamation; nor shall I return to slavery any person who is free by the terms of that proclamation, or by any of the acts of Congress. For these and other reasons it is thought best that support of these measures shall be included in the oath; and it is believed the Executive may lawfully claim it in return for pardon and restoration of forfeited rights, which he has clear constitutional power to withhold altogether, or grant upon the terms which he shall deem wisest for the public interest. It should be observed, also, that this part of the oath is subject to the modifying and abrogating power of legislation and supreme judicial decision. The proposed acquiescence of the national Executive in any reasonable temporary State arrangement for the freed people is made with the view of possibly modifying the confusion and destitution which must at best attend all classes by a total revolution of labor throughout whole States. It is hoped that the already deeply afflicted people in those States may be somewhat more ready to give up the cause of their affliction, if, to this extent, this vital matter be left to themselves; while no power of the national Executive to prevent an abuse is abridged by the proposition. The suggestion in the proclamation as to maintaining the political frame-work of the States on what is called reconstruction, is made in the hope that it may do good without danger of harm. It will save labor, and avoid great confusion. But why any proclamation now upon this subject? This question is beset with the conflicting views that the step might be delayed too long or be taken too soon. In some States the elements for resumption seem ready for action, but remain inactive, apparently for want of a rallying-point — a plan of action. Why shall A adopt the plan of B, rather than B that of A? And if A and B should agree, how can they know but that the General Government here will reject their plan? By the proclamation a plan is presented which may be accepted by them as a rallying-point, and which they are assured in advance will not be rejected here. This may bring them to act sooner than they otherwise would. The objection to a premature presentation of a plan by the national Executive consists in the danger of committals on points which could be more safely left to further developments. Care has been taken to so shape the document as to avoid embarrassments from this source. Say-

ing that, on certain terms, certain classes will be pardoned, with rights restored, it is not said that other classes, or other terms, will never be included. Saying that reconstruction will be accepted if presented in a specified way, it is not said it will never be accepted in any other way. The movements, by State action, for emancipation in several of the States, not included in the Emancipation Proclamation, are matters of profound gratulation. And while I do not repeat in detail what I have heretofore so earnestly urged upon this subject, my general views and feelings remain unchanged; and I trust that Congress will omit no fair opportunity of aiding these important steps to a great consummation. In the midst of other cares, however important, we must not lose sight of the fact that the war power is still our main reliance. To that power alone we can look, yet for a time, to give confidence to the people in the contested regions, that the insurgent power will not again overrun them. Until that confidence shall be established, little can be done anywhere for what is called reconstruction. Hence our chiefest care must still be directed to the army and navy, who have thus far borne their harder part so nobly and well. And it may be esteemed fortunate that in giving the greatest efficiency to these indispensable arms, we do also honorably recognize the gallant men, from commander to sentinel, who compose them, and to whom, more than to others, the world must stand indebted for the home of freedom disenthralled, regenerated, enlarged, and perpetuated. Abraham Lincoln."—A. Lincoln, *Complete Works, v. 2, pp.* 442-456.

A. D. 1863-1864 (December—April: Tennessee — Mississippi).—Winter operations.—Sherman's Meridian Expedition. — Longstreet's withdrawal from East Tennessee.— "Sherman was at Vicksburg. On a line with Vicksburg, but almost on the eastern boundary of the State, was the town of Meridian. Here two railroads crossed, one running north and south, extending from Mobile into the heart of Tennessee, and the other extending to the eastward into Alabama and Georgia. Railroads were few in the South at that time and the junction had made Meridian an important point. Here the Confederates had erected great warehouses for the storage of provisions and munitions of war. A considerable body of troops, too, was maintained at this point, whence they could be sent speedily by rail north or south, east or west, as the necessity might arise. General Sherman determined to fall upon Meridian, drive away the Confederate garrison, burn the arsenal and tear up the railroads so as to isolate the different parts of the Confederacy thenceforth. But in addition to accomplishing this he desired to effect the defeat and dispersal of the Confederate cavalry force under General Forrest, which was operating in Northern Mississippi and Southern Tennessee. Forrest was a brave and dashing leader. His men were hardy troopers, used to quick marches and reckless of danger. To crush him and annihilate his command would be a notable victory for the Union cause. Full of this project, Sherman boarded a steamer at Vicksburg and set out for Memphis, where were the headquarters of General W. Sooy Smith, then chief of cavalry in the division of the Mississippi. The river was full of great cakes of floating ice that bumped against the prow of the boat and ground against her sides until those on board feared that she might be sent to the bottom. But Memphis was reached without accident, and Sherman and the chief of cavalry were soon in earnest consultation. General Smith was ordered to take the field against Forrest with a force of 7,000 men. . . . It was agreed that General Smith should start from Memphis on February 1 and march southeast, while Sherman should leave Vicksburg February 3, and march due east. Thus they would effect a junction in the vicinity of Meridian. Sherman then re-embarked on the icy river and made his way back to Vicksburg. Promptly on the appointed day the head of Sherman's column passed out through the chain of earthworks that girdled the landward side of Vicksburg. It was to be an expedition of destruction — a raid. His force of 25,000 men was in light marching order and advanced with such rapidity that the Confederates were driven from the very first, without having time to rally and oppose the advance of the invaders. Jackson was reached without any fighting, other than slight skirmishing with Polk's cavalry. The ministerial general had but 9,000 men in all, so he dared not make a determined stand against Sherman, but fled, without even destroying his pontoon bridge across the Pearl River, whereby the Federal advance was much expedited. From Jackson eastward the path of Sherman's army was marked by a broad belt of ashes and desolation. No public property was spared, nor anything which could be applied to public uses. Mills, railway stations, and rolling stock were burned. Railway tracks were torn up, the ties heaped on roaring fires and the rails heated red-hot and twisted out of shape. Sometimes the soldiers would twine a hot rail about a young tree, making what they facetiously termed 'Jeff Davis's neck-ties.' To Sherman's lines came escaping slaves in droves, old and young men, women and pickaninnies. . . . The slaves still further impoverished their masters by taking horses and mules with them when they fled, so that after Sherman's army had passed, most of the plantations in its track were stripped of their live-stock, both cattle and human. When Meridian was reached its defenders were nowhere to be seen. Sherman took possession and waited for Smith. Days passed without any word coming from the cavalry column. After a week in Meridian, Sherman set the torch to the public buildings and retraced his steps toward Vicksburg. He had taken 400 prisoners, destroyed 150 miles of track, 67 bridges, 20 locomotives and 28 cars; had burned several thousand bales of cotton, a number of steam mills, and over 2,000,000 bushels of corn. Over 1,000 Union white refugees and 8,000 negroes followed in his wake. In 1866, the historian Lossing, passing through Meridian, asked the Mayor of the town if Sherman had done the place much injury. 'Injury!' was the emphatic reply, 'Why, he took it away with him.'"—W. J. Abbot, *Battle Fields and Victory, ch.* 1.—General Smith, in his report to General Sherman, gave the reasons for the falling back of the cavalry expedition, as follows: "We advanced to West Point and felt of the enemy, who was posted back of the Sakatonchee on our right and the Oktibbeha in our front, in force fully equal to my own that was available for service, encumbered as we were with our pack-mules and the captured stock, which by this time must have

numbered full 3,000 horses and mules. The force consisted of mounted infantry, which was dismounted and in strong position under good cover, and beyond obstacles which could only be passed by defiles. To attempt to force my way through under such circumstances would have been the height of folly. I could not cross the Tombigbee, as there were no bridges and the stream could not be forded. To have attempted to turn the position by our right would have carried me all the way round to Houston again, and Forrest could again check me at the Houlka Swamp. I was ten days behind time; could get no communication through to you; did not know but what you were returning, and so determined to make a push at Forrest in front while I retired all my incumbrances and my main body rapidly toward Okolona, just in time to prevent a rebel brigade from getting in my rear, which had been thrown back for that purpose. We then retired, fighting for over 60 miles day and night."—*Official Records, Series* 1, *v.* 32, *pt.* 1, *p.* 252.—In East Tennessee, during the winter little was done by either army. A slight encounter occurred at Dandridge, in January, between Longstreet's forces and those of the Union General Parke. In April Longstreet was recalled by Lee, and the Ninth Corps, with Burnside again in command, went back to the army of the Potomac.—J. D. Cox, *Atlanta* (*Campaigns of the Civil War, v.* 9), *ch.* 1–2.

A. D. 1863-1864 (December— July).—President Lincoln's plan of reconstruction, and its application to Louisiana.—The opposing Congressional plan.—"The proclamation which accompanied the Annual Message of the President for 1864 embodied the first suggestions of the Administration on the important subject of reconstructing the Governments of those States which had joined in the secession movement. The matter had been canvassed somewhat extensively by the public press, and by prominent politicians, in anticipation of the overthrow of the rebellion. . . . A considerable number of the friends of the Government, in both houses, maintained that, by the act of secession, the revolted States had put themselves outside the pale of the Constitution, and were henceforth to be regarded and treated, not as members of the Union, but as alien enemies:—that their State organizations and State boundaries had been expunged by their own act; and that they were to be readmitted to the jurisdiction of the Constitution, and to the privileges of the Union, only upon such terms and conditions as the Federal Government of the loyal States might prescribe. . . . After the appearance of the President's proclamation, the movement towards reconstruction in Louisiana assumed greater consistency, and was carried forward with greater steadiness and strength. On the 8th of January a very large Free State Convention was held at New Orleans, at which resolutions were adopted indorsing all the acts and proclamations of the President, and urging the immediate adoption of measures for the restoration of the State to its old place in the Union. On the 11th, General Banks issued a proclamation, appointing an election for State officers on the 22d of February, who were to be installed on the 4th of March, and another election for delegates to a convention to revise the Constitution of the State on the first Monday in April. The old Constitution and laws of Louisiana were to be observed, except so far as they relate to slavery. . . . Under this order, parties were organized for the election of State officers. The friends of the National Government were divided, and two candidates were put in nomination for Governor, Hon. Michael Hahn being the regular nominee, and representing the supporters of the policy of the President, and Hon. B. F. Flanders being put in nomination by those who desired a more radical policy than the President had proposed. Both took very decided ground against the continued existence of slavery within the State. . . . The election resulted in the election of Mr. Hahn. . . . Mr. Hahn was inaugurated as Governor on the 4th of March. On the 15th he was clothed with the powers previously exercised by General Banks, as military governor. . . . On March 16th, Governor Hahn issued a proclamation, notifying the electors of the State of the election for delegates to the convention previously ordered by General Banks. The party which elected Governor Hahn succeeded also in electing a large majority of the delegates to the convention, which met in New Orleans on the 6th of April. On the 11th of May it adopted, by a vote of 70 to 16, a clause of the new Constitution, by which slavery was forever abolished in the State. The Constitution was adopted on the 5th of September, by a vote of 6,836 to 1,566. Great umbrage was taken at these proceedings by some of the best friends of the cause, as if there had been an unauthorized and unjustifiable interference on the part of the President. . . . In Arkansas, where a decided Union feeling had existed from the outbreak of the rebellion, the appearance of the proclamation was the signal for a movement to bring the State back into the Union. On the 20th of January, a delegation of citizens from that State had an interview with the President, in which they urged the adoption of certain measures for the re-establishment of a legal State Government, and especially the ordering of an election for Governor. . . . Meantime, a convention had assembled at Little Rock, composed of delegates elected without any formality, and not under the authority of the General Government, and proceeded to form a new State Constitution, and to fix a day for an election. . . . The convention framed a constitution abolishing slavery, which was subsequently adopted by a large majority of the people. It also provided for the election of State officers on the day appointed for the vote upon the constitution; and the legislature chosen at that election elected two gentlemen, Messrs. Fishback and Baxter, as United States Senators, and also Representatives. These gentlemen presented their credentials at Washington. . . . The whole matter was referred to the Judiciary Committee, who . . . reported on the 27th of June that on the facts it did not appear that the rebellion was so far suppressed in Arkansas as to entitle the State to representation in Congress, and that therefore Messrs. Fishback and Baxter were not entitled to seats as Senators from the State of Arkansas. And the Senate on the next day adopted their report by a vote of 27 to 6. In the House, meanwhile,

the Committee on Elections, to whom the application of the Arkansas members had been referred, reported to postpone their admission until a commission could be sent to inquire into and report the facts of the election, and to create a commission for the examination of all such cases. This proposition was, however, laid on the table, and the members were not admitted. . . . The cause of the rejection of these Senators and Representatives was, that a majority in Congress had not agreed with the President in reference to the plan of reconstruction which he proposed. A bill for the reconstruction of the States was introduced into the Senate, and finally passed both Houses on the last day of the session. It provided that the President should appoint, for each of the States declared in rebellion, a Provisional Governor, who should be charged with the civil administration of the State until a State Government should be organized and such other civil officers as were necessary for the civil administration of the State; that as soon as military resistance to the United States should be suppressed and the people had sufficiently returned to their obedience, the Governor should make an enrolment of the white male citizens, specifying which of them had taken the oath to support the Constitution of the United States, and if those who had taken it were a majority of the persons enrolled, he should order an election for delegates to a Constitutional Convention, to be elected by the loyal white male citizens of the United States aged twenty-one years. . . . The bill further provided that when a constitution containing . . . provisions [excluding rebels from office, prohibiting slavery, and repudiating Confederate debts] should have been framed by the convention and adopted by the popular vote, the Governor should certify that fact to the President, who, after obtaining the assent of Congress, should recognize this government so established as the Government of the State, and from that date senators and representatives and electors for President and Vice-President should be elected in the State. . . . This bill thus passed by Congress was presented to the President just before the close of the session, but was not signed by him."—H. J. Raymond, *Life and Public Services of Abraham Lincoln, ch.* 16.—The President's reasons for not signing the bill were given to the public as well as to Congress in the following Proclamation:

"Whereas, at the late session, Congress passed a bill to 'guarantee to certain States, whose governments have been usurped or overthrown, a republican form of government,' a copy of which is hereunto annexed; And whereas the said bill was presented to the President of the United States for his approval less than one hour before the sine die adjournment of said session, and was not signed by him; And whereas the said bill contains, among other things, a plan for restoring the States in rebellion to their proper practical relation in the Union, which plan expresses the sense of Congress upon that subject, and which plan it is now thought fit to lay before the people for their consideration: Now, therefore, I, Abraham Lincoln, President of the United States, do proclaim, declare, and make known, that, while I am (as I was in December last, when by proclamation I propounded a plan for restoration) unprepared, by a formal approval of this bill, to be inflexibly committed to any single plan of restoration; and, while I am also unprepared to declare that the free-State constitutions and governments already adopted and installed in Arkansas and Louisiana shall be set aside and held for nought, thereby repelling and discouraging the loyal citizens who have set up the same as to further effort, or to declare a constitutional competency in Congress to abolish slavery in States, but am at the same time sincerely hoping and expecting that a constitutional amendment abolishing slavery throughout the nation may be adopted, nevertheless I am fully satisfied with the system for restoration contained in the bill as one very proper plan for the loyal people of any State choosing to adopt it; and that I am, and at all times shall be, prepared to give the executive aid and assistance to any such people, so soon as the military resistance to the United States shall have been suppressed in any such State, and the people thereof shall have sufficiently returned to their obedience to the Constitution and the laws of the United States, in which cases military governors will be appointed, with directions to proceed according to the bill. In testimony whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed. Done at the city of Washington, this eighth day of July, in the year of our Lord one thousand eight hundred and sixty-four, and of the independence of the United States the eighty-ninth. Abraham Lincoln. By the President: William H. Seward, Secretary of State."—A. Lincoln, *Complete Works, v.* 2, *p.* 545.

A. D. 1864 (January—February: Florida).—Unsuccessful Operations.—Battle of Olustee.—"Early in the winter of 1863–64, General Gillmore, commanding the Department of the South, . . . resolved upon an expedition into Florida to take possession of such portions of the Eastern and Northern sections of the State as could be easily held by small garrisons. . . . He afterwards added another detail to his plan: to assist in bringing Florida back into the Union, in accordance with the President's Proclamation of December 8, 1863. This came in time to be regarded by the opponents of the Administration as the sole purpose of the expedition, and Mr. Lincoln has received a great deal of unjust censure for having made a useless sacrifice of life for a political end. . . . The expedition to Florida was under the immediate charge of General Truman Seymour, an accomplished and gallant officer of the regular army. He landed at Jacksonville and pushed forward his mounted force 20 miles to Baldwin. . . . Gillmore himself arrived at Baldwin on the 9th of February, and after a full conference and, as he thought, understanding with Seymour, returned to Jacksonville. . . . On the 18th he was surprised at receiving a letter from Seymour, dated the day before, announcing his intention of moving at once to the Suwanee River without supplies, and asking for a strong demonstration of the army and navy in the Savannah River to assist his movement. . . . Gillmore wrote a peremptory letter, ordering him to restrict himself to holding Baldwin and the south prong of the St. Mary's River and occupying Palatka and Magnolia, and dispatched a staff officer to Florida with it. He arrived too late. Seymour had made up his mind that there was

less risk in going forward than in staying at Baldwin, and like the brave and devoted soldier that he was had resolved to take the responsibility. He marched rapidly out towards Olustee, where the enemy under General Joseph Finegan was supposed to be, but came upon them unexpectedly about two miles east of that place. The forces were equal in numbers, about 5,500 on each side; the advantage to the Confederates was that they were in a strong position selected by themselves and ready for the fight. General J. R. Hawley, who commanded a brigade of infantry in the battle, says: 'We rushed in, not waiting for the proper full formation, and were fought in detail.' . . . Seymour's attack was constantly repulsed with heavy loss, until at nightfall he fell back to a new line. He was not pursued, and retired in good order and unmolested to Jacksonville. The Union loss was 1861; the Confederate, 940. This misadventure put an end for the moment to the attempt to occupy Florida."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 8, *ch.* 11.

A. D. 1864 (February—March: Virginia).—Kilpatrick's and Dahlgren's Raid to Richmond.—"Public feeling throughout the North had been greatly excited by the deplorable condition of the prisoners of war held at Richmond. Early in the year, before the opening of the great campaign, some expeditions had been undertaken both from the Army of the Potomac and from Fortress Monroe, with the intention of relieving them. On February 27th, Custer, with 1500 horse, had crossed the Rapidan on a feint to the west of the Confederate army, while Kilpatrick, starting on the following day, moved down on its opposite flank, by Spottsylvania Court House, to within 3½ miles of Richmond, passing its first and second lines of defenses [March], but being obliged to fall back from its third. Pursued by a force of the enemy, he was compelled to cross the White House Railroad and move down the peninsula. A detachment of Kilpatrick's force, 400 strong, under Colonel Ulric Dahlgren, leaving the main body at Spottsylvania, had gone to the right through Louisa and Goochland Counties, intending to cross the James River and enter Richmond from the south, while Kilpatrick attacked it on the north. But the river was found to be too deep to be forded. Dahlgren passed down the north bank to the fortifications of Richmond, forcing his way through the outer works, but being repulsed from the inner. Finding that Kilpatrick's attempt had miscarried, he moved toward King and Queen Court House; but after crossing the Mattapony at Dabney's Ferry, he fell into an ambuscade [March 3], his command being scattered, and himself killed. Under a false pretense that papers were found upon him showing an intention to set fire to Richmond, and take the lives of Davis and his cabinet, his corpse was insulted and the place of its interment concealed. At the time of his death he was but 21 years of age."—J. W. Draper, *Hist. of the Am. Civil War, ch.* 82 (*v.* 3).—"The document alleged to have been found upon the person of Colonel Dahlgren is utterly discredited by the fact that the signature attached to it cannot possibly be his own, because it is not his name,—a letter is misplaced, and the real name Dahlgren is spelled 'Dalhgren'; hence it is undeniable that the paper is not only spurious, but is a forgery. . . . It is entirely certain that no such orders were ever issued by Colonel Dahlgren."—Admiral J. A. Dahlgren, *Memoir of Ulric Dahlgren, pp.* 233–234.

A. D. 1864 (March—April).—General Grant in chief command of the whole army.—His plans of campaign.—"Immediately after the victories at Chattanooga Mr. Washburne of Illinois, the devoted friend and firm supporter of General Grant through good and evil report, introduced a bill in Congress to revive the grade of lieutenant-general in the army. The measure occasioned a good deal of discussion. This high rank had never been conferred on any citizen of the republic except Washington, who held it for a short time before his death. It was discontinued for more than half a century and then conferred by brevet only upon General Scott. There were those who feared, or affected to fear, that so high a military rank was threatening to the liberties of the republic. The great majority of Congress, however, considered the liberties of the republic more robust than this fear would indicate, and the bill was finally passed on the 26th of February, and received the approval of the President on the 29th of February. . . . Immediately upon signing the bill the President nominated Grant to the Senate for the office created by it. . . . The Senate immediately confirmed his nomination, and on the 3d of March the Secretary of War directed him to report in person to the War Department as early as practicable. . . . He started for Washington the next day, but in the midst of his hurried preparations for departure he found time to write a letter of the most warm and generous friendship to Sherman." Grant's commission as Lieutenant-General of the Army of the United States was formally presented to him by President Lincoln on the 9th of March. "After the presentation of the commission a brief conversation took place. General Grant inquired what special service was expected of him. The President replied that our country wanted him to take Richmond; he said our generals had not been fortunate in their efforts in that direction and asked if the Lieutenant-General could do it. Grant, without hesitation, answered that he could if he had the troops. These the President assured him he should have. There was not one word said as to what route to Richmond should be chosen. The next day Grant visited General Meade at the headquarters of the Army of the Potomac at Brandy Station. . . . Meade said that it was possible Grant might want an officer to command the Army of the Potomac who had been with him in the West, and made especial mention of Sherman. He begged him if that was the case not to hesitate about making the change. . . . Grant assured him that he had no thought of making any change; and that Sherman could not be spared from the West. He returned to Washington on the 11th. The next day he was placed in command of all the armies by orders from the War Department; but without waiting for a single day to accept the lavish proffers of hospitality which were showered upon

him, he started West again on the evening of the 11th of March. In that short time he had utterly changed his views and plans for the future conduct of the war. He had relinquished the purpose he had hitherto firmly held of leading the Western armies on the great campaign to Atlanta and the sea, and had decided to take the field with the Army of the Potomac. . . . Sherman at his request was promoted to command the Military Division of the Mississippi, McPherson succeeded to Sherman's command of the Department of the Tennessee, and Logan was promoted to the command of McPherson's corps." The necessary arrangements were quickly made. General Sherman assumed his enlarged command on the 18th of March, and General Grant a few days later was with the Army of the Potomac. He "established his headquarters at Culpeper Court House near the end of March, and spent a month in preparations for the great campaign which he, in common with the entire North, hoped would end the war. . . . The plan of the Lieutenant-General, as set forth in his report, was extremely simple. So far as practicable, the armies were to move together, and towards one common center. Banks was to finish his operations in Louisiana, and, leaving a small garrison on the Rio Grande, was to concentrate an army of some 25,000 men, and move on Mobile. Sherman was to move simultaneously with the other armies, General Johnston's army being his objective, and the heart of Georgia his ultimate aim. Sigel, who was in command in the Shenandoah, was to move to the front in two columns, one to threaten the enemy in the Valley, the other to cut the railroads connecting Richmond with the Southwest. Gillmore was to be brought north with his corps, and in company with another corps, under W. F. Smith, was to form an army under General B. F. Butler to operate against Richmond south of the James. Lee's army was to be the objective point of Meade, reënforced by Burnside. As to the route by which the Army of the Potomac was to advance, Grant reserved his decision until just before he started upon his march. . . . The two armies lay in their intrenchments on both sides of the Rapidan. The headquarters . . . of Lee [were] at Orange Court House; the Army of Northern Virginia guarded the south bank of the river for 18 or 20 miles, Ewell commanding the right half, A. P. Hill the left. The formidable works on Mine Run secured the Confederate right wing, which was further protected by the tangled and gloomy thickets of the Wilderness. Longstreet had arrived from Tennessee with two fine divisions, and was held in reserve at Gordonsville. The two armies were not so unequally matched as Confederate writers insist. The strength of the Army of the Potomac, present for duty equipped, on the 30th of April, was 122,146; this includes the 22,708 of Burnside's Ninth Corps. The Army of Northern Virginia numbered at the opening of this campaign not less than 61,953. While this seems like a great disparity of strength, it must not be forgotton that the Confederate general had an enormous advantage of position. The dense woods and the thickly timbered swamps . . . were as well known to him as the lines of his own hand, and were absolutely unknown to his antagonist."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 8, *ch.* 13–14.

A. D. 1864 (March—May: Louisiana).—The Red River Expedition.—"As the third year began, Gen. Banks conceived the idea that the trade of Western Louisiana could be opened by the medium of the Red river, and projected an expedition to take possession of the country adjacent to its course. This river is open for navigation by larger vessels, only during the high water of March and April. Porter was to command the fleet of twenty of the finest vessels on the Mississippi, and Sherman was persuaded to lend some of his troops for the purpose. A. J. Smith was to start from Vicksburg with 10,000 men, while Banks would proceed up river from New Orleans, with Franklin's division. Steele from Little Rock was to operate towards Shreveport to join the main army. General Taylor was in command of the enemy's forces at Shreveport. The fleet started up the Red river in company with the transports carrying A. J. Smith's column. Fort De Russy was captured [March 14], the enemy retiring before our troops, and Alexandria and Nachitoches fell into our hands as the joint force advanced. Banks put in an appearance a week later. There was more or less skirmishing with the enemy's horse and outposts along the entire route; and near Mansfield, at Sabine Cross-Roads, the vanguard met the enemy in force. Sufficient care had not been taken to keep the several bodies concentrated. It was on Smith that the attack fell [April 8], and though this general's record for endurance is of the best, he was nevertheless badly worsted with a loss of 2,000 men out of 8,000 engaged, and some twenty guns. Retiring to Pleasant Hill, another stand was made for the possession of what had been so far gained. . . . The fleet had meanwhile reached Grand Ecore. High water was coming to an end, and Porter was obliged to return down river, to Alexandria. Here it was found that most of the vessels were of too heavy draught to pass the falls below the town; and the loss of most of them would have been certain, but for a dam and waterway ably constructed by Colonel Bailey, an engineer remarkably fertile in expedients. By means of this device the fleet was safely floated over. On the retreat, Alexandria was burned [May 15] by accident, traceable to no particular cause, though, naturally enough laid by the Confederates to our spirit of revenge."—T. A. Dodge, *Bird's-Eye View of our Civil War, ch.* 31.—"We prefer not to enter into the bitter discussions to which this disastrous campaign gave rise on both sides of the line. A life-long quarrel sprang up between Kirby Smith and Taylor, between Banks and Porter, while Franklin, Charles P. Stone (Banks's chief-of-staff), and Albert L. Lee, all of whom relinquished their commands, added their quota of misunderstanding and resentment. . . . The Committee on the Conduct of the War made an investigation of the matter in the year 1865, at the time when the antagonism between Mr. Lincoln and the Radicals in relation to the subject of reconstruction had assumed an acute form. . . . The charge was made by the committee against Banks, that what he had in view was to carry out measures for the establishment of a State government in Louisiana, and to afford an egress for cotton and other products of that region, and that the attention directed to the accomplishment of these

objects exerted an unfavorable influence on the expedition. . . . The honorable poverty in which General Banks has passed his subsequent life is the best answer to the reckless charges of his enemies."—J. G. Nicolay and J Hay, *Abraham Lincoln, v. 8, ch. 11.*

A. D. 1864 (March—October: Arkansas—Missouri).—Last important operations in the West.—Price's raid.—"During the winter of 1863–64 the forces of Generals Steele and Blunt held the Arkansas River as a Federal line of advance. . . . During this period of inactivity, however, Steele was making preparations for a vigorous spring campaign. It was decided that the column under General Banks and the columns under General Steele from Little Rock and Fort Smith should converge toward Shreveport, Louisiana. The Federal columns under Steele left Little Rock and Fort Smith the latter part of March, moved toward the Southern part of the State, and after some fighting and manœuvring drove General Price's forces from Camden, Arkadelphia and Washington. In the midst of these successful operations, Steele received information that Banks' army had been defeated and was retreating [See above (MARCH—MAY: LOUISIANA)], and that Price had received reënforcements from Kirby Smith of 5000 infantry and a complement of artillery, and would at once assume the offensive. Not feeling strong enough to fight the combined Confederate forces, Steele determined to fall back upon Little Rock. He had scarcely commenced his retrograde movement when Smith and Price began to press him vigorously. A retreating fight was kept up for several days, until the Federal army reached Jenkins's Ferry on the Saline River," where Smith and Price made an energetic attack on the Federal army (April 30) and were repulsed with heavy loss. "After the battle of Jenkins's Ferry, instead of making preparations to attack the Federal forces at Little Rock and Fort Smith, Price commenced organizing his forces for an expedition into Missouri. . . . Price's army for the invasion of Missouri numbered some 15,000 men and 20 pieces of artillery before crossing the Arkansas River, and consisted of three divisions, commanded by Generals Fagan, Marmaduke and Shelby. . . . About the 1st of September, while strong demonstrations were being made against Fort Smith and Little Rock, Price, with his army, crossed the Arkansas River about half-way between those points, at Dardanelle, and marched to the northern part of the State without opposition, and, in fact, without his movements being definitely known to General Rosecrans, who then commanded the Department of the Missouri at St. Louis," to which he had been appointed in January. At Pilot Knob, where they arrived September 26th, the Confederates were opposed by General Thomas Ewing, Jr., with a small force of 1051 men. The fortifications at Pilot Knob were strong and Ewing held them against the vigorous attacks of Price throughout the 27th, but evacuated that night, blowing up the magazine and retreating safely. The Confederate invaders then marched on St. Louis and attacked the outer defences of the city, some miles to the south of it, but found themselves opposed by the veterans of General A. J. Smith's division, which had been opportunely stopped on its way down the Mississippi River to join Sherman. Foiled at St. Louis, Price then moved upon Jefferson City, the State capital, but was closely pursued and driven off. Advancing westward, he was met at Lexington, October 20th, by forces from Kansas, under General Blunt, but forced the latter to retire from the town, after severe fighting. Thence to Independence his progress was steadily resisted by Generals Blunt and Curtis, with volunteers and militia from Kansas. At Independence, on the 22d, Pleasonton's cavalry, of Rosecrans's army, came up and formed a junction with the forces of Curtis, and the next day they engaged Price in battle near Westport. "The opposing armies fought over an area of five or six square miles, and at some points the fighting was furious. . . . About the middle of the afternoon Price's lines began to give way, and by sundown the entire Confederate army was in full retreat southward along the State line, closely pursued by the victorious Federal forces." At the crossing of the Marais des Cygnes River he lost ten pieces of his artillery and a large number of prisoners, including Generals Marmaduke and Cabell. "At Newtonia in south-west Missouri, on the 28th of October, Price made another stand, and was attacked by the pursuing forces . . . and finally driven from the field with heavy loss. This was next to the severest battle of the campaign. Blunt, and some of the Missouri troops, continued the pursuit to the Arkansas River, but Price did not again attempt to make a stand. His line of march from Westport to Newtonia was strewn with the débris of a routed army. He crossed the Arkansas River above Fort Smith with a few pieces of artillery, with his army demoralized and reduced by captures and dispersion to perhaps less than 5,000 men. Most of the noted guerrilla bands followed him from the State. The 'Price raid,' as it was called in the West, was the last military operation of much consequence that took place in Missouri and Arkansas. It is certain that Price lost more than he gained in war material and that the raid did not tend to strengthen the Confederate cause in the West."—W. Britton, *Résumé of Military Operations in Missouri and Arkansas*, 1864–65 (*Battles and Leaders, v. 4*).—"In General Price's report occurs the following summary of the campaign: 'I marched 1,434 miles, fought 43 battles and skirmishes, captured and paroled over 3,000 Federal officers and men, captured 18 pieces of artillery, 3,000 stand of small-arms, 16 stand of colors . . . and destroyed property to the cost of $10,000,000. I lost ten pieces of artillery, 2 stand of colors, 1,000 small arms, while I do not think I lost 1,000 prisoners. . . . I brought with me at least 5,000 recruits.'"—*Editor's note to above.*

A. D. 1864 (April: Tennessee).—The Massacre at Fort Pillow.—After General Sherman's return from his raid to Meridian, and General William Sooy Smith's return to Memphis, the Confederate cavalry leader Forrest advanced into Tennessee, devastating the country. "He captured Jackson in that State, on the 23d of March, and moving northward, appeared before Paducah, held by Colonel Hicks with 650 men. His demand for a surrender was

accompanied with a threat: 'If you surrender, you shall be treated as prisoners of war; but if I have to storm your works, you may expect no quarter:' he made three assaults, and then retired, having lost 1,500 men. On the 12th of April he was at Fort Pillow, which was garrisoned by 19 officers and 538 men, of whom 262 were negroes. This force was not a part of the army, but a nondescript body in process of formation, placed there to cover a trading-post for the convenience of families supposed to be friendly, or at least not hostile; it had been left in violation of Sherman's peremptory orders. The attack was made before sunrise; and after some severe fighting, Major Booth, the commanding officer of the garrison, was killed. Major Bradford, who succeeded him, drew the troops from the outer line of intrenchments into the fort, and continued the contest until afternoon. A gun-boat which had been co-operating in the defense, withdrew to cool or clean her guns, and, the fire slackening, Forrest sent a summons to surrender, and shortly after a second, demanding that the surrender should be made in twenty minutes. These terms were declined by Bradford. But while the negotiations were in progress, the assailants were stealthily advancing, and gaining such positions that they could rush upon the fort. Accordingly, as soon as Bradford's answer was received, they sprang forward. The fort was instantly carried." — J. W. Draper, *Hist. of the Am. Civil War, ch.* 74 (*v.* 3). — The following is Gen. Forrest's report of what occurred on the taking of the fort, made to General Polk on the 15th: "General: I attacked Fort Pillow on the morning of the 12th inst. with a part of Bell's and McCulloch's brigades, numbering 1,500, under Brig.-Gen. James R. Chalmers. After a short fight drove the enemy, 700 strong, into the fort under the cover of their gun-boats. Demanded a surrender, which was declined by Maj. L. F. Booth, commanding U. S. forces. I stormed the fort, and after a contest of thirty minutes captured the entire garrison, killing 500 and taking 200 horses and a large amount of quartermaster's stores. The officers in the fort were killed, including Major Booth. I sustained a loss of 20 killed and 60 wounded. Among the wounded is the gallant Lieut.-Col. Wiley M. Reed while leading the Fifth Mississippi. Over 100 citizens who had fled to the fort to escape conscription ran into the river and were drowned. The Confederate flag now floats over the fort. — N. B. Forrest." — On the same day, Gen. Forrest dispatched a longer report to Ass't.-Adj. Gen. Jack, in which he states: "Have dispatched by telegraph of the capture of Fort Pillow. Arrived there on the morning of the 12th and attacked the place with the portion of McCulloch's and Bell's brigades, numbering about 1,500 men, and after a sharp contest captured the garrison and all of its stores. A demand was made for the surrender, which was refused. The victory was complete, and the loss of the enemy will never be known from the fact that large numbers ran into the river and were shot and drowned. The force was composed of about 500 negroes and 200 white soldiers (Tennessee Tories). The river was dyed with the blood of the slaughtered for 200 yards. There was in the fort a large number of citizens who had fled there to escape the conscript law. Most of these ran into the river and were drowned. The approximate loss was upward of 500 killed, but few of the officers escaping. It is hoped that these facts will demonstrate to the Northern people that negro soldiers cannot cope with Southerners."— From the Union side, the following is the report of the first Federal officer who reached the scene: "I arrived off the fort at 6 A. M. on the morning of the 13th inst. [April]. . . . About 8 A. M. the enemy sent in a flag of truce with a proposal from General Forrest that he would put me in possession of the fort and the country around until 5 P. M. for the purpose of burying our dead and removing our wounded, whom he had no means of attending to. I agreed to the terms proposed. . . . We found about 70 wounded men in the fort and around it, and buried, I should think, 150 bodies. . . . All the wounded who had strength enough to speak agreed that after the fort was taken an indiscriminate slaughter of our troops was carried on by the enemy with a furious and vindictive savageness which was never equaled by the most merciless of the Indian tribes. Around on every side horrible testimony to the truth of this statement could be seen. . . . Strewn from the fort to the river bank, in the ravines and hollows, behind logs and under the brush where they had crept for protection from the assassins who pursued them, we found bodies bayoneted, beaten, and shot to death, showing how cold blooded and persistent was the slaughter of our unfortunate troops." — *Rept. of Acting-Master W. Ferguson, U. S. Steamer Silver Cloud* (*Official Records, Series* 1, *v.* 32, *pt.* 1, *p.* 571, 609–10).

ALSO IN: *Rept. of Joint Com. on the Conduct of the War* (*30th Cong., 1st Sess., H. R. Rept. No.* 65).—Comte de Paris, *Hist. of the Civil War in Am., v.* 4., *bk.* 4, *ch.* 1.

A. D. 1864 (April—May: North Carolina). —Exploits of the ram Albemarle.—Surrender of Plymouth.—"In the squadron [of the Confederates] we were gladdened by the success of our iron-clad ram Albemarle, which vessel, under Captain James B. Cooke, had (after overcoming innumerable difficulties) succeeded in descending the Roanoke river, April 19th [1864], and dispersing the Federal squadron off Plymouth, N. C. She sunk the steamer Southfield, and drove the other vessels off; and her presence led to the recapture of Plymouth by the Confederates. On the 5th of May the Albemarle started from Plymouth with the small steamer Bombshell in company, on what was called a secret expedition. I think it probable the intention was to destroy the wooden men-of-war in the sounds, and then tow troops in barges to Hatteras and retake it. If this could have been done the Albemarle would have had it all her own way, and Roanoke island, Newbern and other places would again have fallen into the hands of the Confederates. Shortly after leaving Plymouth the Albemarle fell in with the Federal squadron, consisting of the steamers Mattabesett, Sassacus, Wyalusing, Whitehead, Miami, Ceres, Commodore Hull and Seymour—all under the command of Captain Melancton Smith, and after a desperate combat was forced to return to Plymouth."—W. H. Parker, *Recollections of a Naval Officer, p.* 339.

A. D. 1864 (May: Virginia).—Grant's movement on Richmond.—The Battle of the Wilderness.—"The movement of the Army of the Potomac commenced early on the morning of the 4th of May, under the immediate direction and orders of Major-General Mead, pursuant to instructions. Before night the whole army was across the Rapidan—the Fifth and Sixth Corps crossing at Germanna Ford, and the Second Corps at United States' (Ely's) Ford, the cavalry, under Major-General Sheridan, moving in advance,—with the greater part of its trains, numbering about 4,000 wagons, meeting with but slight opposition. The average distance traveled by the troops that day was about 12 miles. This I regarded as a great success, and it removed from my mind the most serious apprehensions I had entertained, that of crossing the river in the face of an active, large, well-appointed, and ably commanded army, and how so large a train was to be carried through a hostile country and protected. Early on the 5th, the advance corps (the Fifth, Maj. Gen. G. K. Warren commanding), met and engaged the enemy outside his intrenchments near Mine Run. The battle raged furiously all day, the whole army being brought into the fight as fast as the corps could be got upon the field, which, considering the density of the forest [See above: A. D. 1863 (April—May: Virginia)], and narrowness of the roads, was done with commendable promptness. General Burnside, with the Ninth Corps, was at the time the Army of the Potomac moved, left with the bulk of his corps at the crossing of the Rappahannock River and Alexandria railroad, holding the road back to Bull Run, with instructions not to move until he received notice that a crossing of the Rapidan was secured, but to move promptly as soon as such notice was received. This crossing he was apprised of on the afternoon of the 4th. By 6 o'clock of the morning of the 6th he was leading his corps into action near the Wilderness Tavern, some of his troops having marched a distance of over 30 miles, crossing both the Rappahannock and Rapidan Rivers. Considering that a large proportion (probably two-thirds), of his command was composed of new troops, unaccustomed to marches and carrying the accouterments of a soldier, this was a remarkable march. The battle of the Wilderness was renewed by us at 5 o'clock on the morning of the 6th, and continued with unabated fury until darkness set in, each army holding substantially the same position that they had on the evening of the 5th. After dark the enemy made a feeble attempt to turn our right flank, capturing several hundred prisoners and creating considerable confusion. But the promptness of General Sedgwick, who was personally present and commanded that part of our line, soon reformed it and restored order. On the morning of the 7th reconnaissances showed that the enemy had fallen behind his intrenched lines, with pickets to the front, covering a part of the battle-field. From this it was evident to my mind that the two days' fighting had satisfied him of his inability to further maintain the contest in the open field, notwithstanding his advantage of position, and that he would await an attack behind his works. I therefore determined to push on and put my whole force between him and Richmond, and orders were at once issued for a movement by his right flank. On the night of the 7th the march was commenced toward Spottsylvania Court House, the Fifth Corps moving on the most direct road. But the enemy having become apprised of our movement, and having the shorter line, was enabled to reach there first."—Gen. U. S. Grant, *Official Report* (*Official Records. Series* 1, *v.* 36, *pt.* 1, *p.* 18).—The casualties of the Army of the Potomac and Burnside's Ninth Corps (then not incorporated with it) in the battle of the Wilderness were "2,265 killed, 10,220 wounded, and 2,902 missing. Total, 15,387. Killed and wounded, 12,485. . . . The woods took fire in many places, and it is estimated that 200 of our wounded perished in the flames and smoke. According to the tabular statement, Part First, 'Medical and Surgical History of the War,' the casualties in the Army of Northern Virginia were 2,000 killed, 6,000 wounded, and 3,400 missing. The authority for this statement is not given, and I do not find anywhere records of the loss of that army in the Wildnerness. . . . Both sides lost many valuable officers in this battle, [including, on the Union side, General Wadsworth]. . . . So far as I know, no great battle ever took place before on such ground. But little of the combatants could be seen, and its progress was known to the senses chiefly by the rising and falling sounds of a vast musketry that continually swept along the lines of battle many miles in length, sounds which at times approached to the sublime."—A. A. Humphreys, *The Virginia Campaign of '64 and '65* (*Campaigns of the Civil War*, *v.* 12), *ch.* 2.—"All the peculiar advantages of the Army of the Potomac were sacrificed in the jungle-fighting into which they were thus called to engage. Of what use here were the tactical skill and the perfection of form, acquired through long and patient exercise; of what use here the example and the personal influence of a Hays or a Hancock, a Brooke or a Barlow? How can a battle be fitly ordered in such a tangle of wood and brush, where troops can neither be sent straight to their destination nor seen and watched over, when, after repeatedly losing direction and becoming broken into fragments in their advance through thickets and jungles, they at last make their way up to the line of battle, perhaps at the point they were designed to reinforce, perhaps far from it? . . . It will never cease to be an object of amazement to me that, with such a tract in prospect, the character of it being known, in general, to army headquarters through the Chancellorsville campaign . . . a supreme effort was not made . . . to carry the Army of the Potomac either through these jungles toward Mine Run, or past it, toward Spottsylvania."—F. A. Walker, *Hist. of the Second Army Corps*, *ch.* 13.

Also in: E. M. Law, A. S. Webb, and others, *The Wilderness Campaign* (*Battles and Leaders*, *v.* 4).—U. S. Grant, *Personal Memoirs*, *ch.* 50–51 (*v.* 2).—W. Swinton, *The Twelve Decisive Battles of the War*, *ch.* 9.—A. L. Long, *Memoirs of Robt. E. Lee*, *ch.* 17.

A. D. 1864 (May: Virginia).—Sheridan's raid to Richmond.—"When the Army of the Potomac emerged from the Wilderness, Sheridan was sent to cut Lee's communications. This was the first of the remarkable raids of that remarkable leader, in Virginia, and, though short, was a destructive one. He took with him a greater portion of the cavalry led by Merritt, Gregg and Wilson, and, cutting loose from the

army, he swept over the Po and the Ta, crossed the North Anna on the 9th, and struck the Virginia Central railway at Beaver Dam Station, which he captured. He destroyed ten miles of the railway; also its rolling stock, with a million and a half of rations, and released 400 Union prisoners, on their way to Richmond from the Wilderness. There he was attacked in flank and rear by General J. E. B. Stuart and his cavalry, who had pursued him from the Rapid Anna [Rapidan], but was not much impeded thereby. He pushed on, crossed the South Anna at Ground-squirrel Bridge, and at daylight on the morning of the 11th, captured Ashland Station, on the Fredericksburg road, where he destroyed the railway property, a large quantity of stores, and the road itself for six miles. Being charged with the duty of not only destroying these roads, but of menacing Richmond and communicating with the army of the James, . . . Sheridan pressed on in the direction of the Confederate capital, when he was confronted by Stuart at Yellow Tavern, a few miles north of Richmond, where that able leader, having made a swift circuitous march, had concentrated all of his available cavalry. Sheridan attacked him at once, and, after a sharp engagement, drove the Confederates toward Ashland, on the north fork of the Chickahominy, with a loss of their gallant leader, who, with General Gordon, was mortally wounded. Inspirited by this success, Sheridan pushed along the now open turnpike toward Richmond, and made a spirited dash upon the outer works. Custer's brigade carried them at that point and made 100 prisoners. As in the case of Kilpatrick's raid, so now, the second line of works were too strong to be carried by cavalry. The troops in and around the city had rallied for their defense, and in an attack the Nationals were repulsed. Then Sheridan led his command across the Chickahominy, at Meadow Bridge, where he beat off a considerable force of infantry sent out from Richmond, and who attacked him in the rear, while another force assailed his front. He also drove the foe on his front, when he destroyed the railway bridge there, and then pushed on southward to Haxall's Landing, on the James River, where he rested three days and procured supplies. Then, by way of White House and Hanover Court House, he leisurely returned to the Army of the Potomac, which he rejoined on the 25th of May."—B. J. Lossing, *Field Book of the Civil War, v.* 3, *ch.* 11.

A. D. 1864 (May: Virginia).—Grant's movement upon Richmond: Spottsylvania Court House.—The Bloody Angle.—"Throughout the entire day succeeding this first great conflict [in The Wilderness], General Lee remained quiet, watching for some movement of his adversary. His success in the preliminary struggle had been gratifying, considering the great disproportion of numbers, but he indulged no expectation of a retrograde movement across the Rapidan, on the part of General Grant. He expected him rather to advance, and anxiously awaited some development of this intention. There were no indications of such a design up to the night of the 7th, but at that time, to use the words of a confidential member of Lee's staff, 'he all at once seemed to conceive the idea that his enemy was preparing to forsake his position, and move toward Hanover Junction via the Spottsylvania Court-House, and, believing this, he at once detailed Anderson's division with orders to proceed rapidly toward the court-house. General Anderson commenced his march about nine o'clock at night, when the Federal column was already upon its way. A race now began for the coveted position, and General Stuart, with his dismounted sharp-shooters behind improvised breastworks, harassed and impeded the Federal advance, at every step, throughout the night. This greatly delayed their march, and their head of column did not reach the vicinity of Spottsylvania Court-House until past sunrise. General Warren, leading the Federal advance, then hurried forward, followed by General Hancock, when suddenly he found himself in front of breastworks, and was received with a fire of musketry. Lee had succeeded in interposing himself between General Grant and Richmond. On the same evening the bulk of the two armies were facing each other on the line of the Po. . . . General Lee had taken up his position on the south bank of one of the four tributaries of the Mattapony. These four streams are known as the Mat, Ta, Po, and Nye Rivers, and bear the same relation to the main stream that the fingers of the open hand do to the wrist. General Lee was behind the Po, which is next to the Nye, the northernmost of these water-courses. Both were difficult to cross, and their banks heavily wooded. It was now to be seen whether, either by a front attack or a turning movement, General Grant could oust his adversary, and whether General Lee would stand on the defensive or attack. All day, during the 9th, the two armies were constructing breastworks along their entire fronts, and these works, from the Rapidan to the banks of the Chickahominy, remain yet [1871] in existence. On the evening of this day a Federal force was thrown across the Po, and on the Confederate left, but soon withdrawn; and on the 10th a similar movement took place near the same point, which resulted in a brief but bloody conflict, during which the woods took fire, and many of the assaulting troops perished miserably in the flames. The force was then recalled, and, during that night and the succeeding day, nothing of importance occurred, although heavy skirmishing and an artillery-fire took place along the lines. On the morning of the 12th, at the first dawn of day, General Grant made a more important and dangerous assault than any yet undertaken in the campaign. This was directed at a salient on General Lee's right centre, occupied by Johnson's division of Ewell's corps, and was one of the bloodiest and most terrible incidents of the war. For this assault [made by three divisions of Hancock's corps] General Grant is said to have selected his best troops. These advanced in a heavy charging column, through the half-darkness of dawn, passed silently over the Confederate skirmishers, scarcely firing a shot, and, just as the first streak of daylight touched the eastern woods, burst upon the salient, which they stormed at the point of the bayonet. The attack was a complete surprise, and carried everything before it. The Southern troops, asleep in the trenches, woke to have the bayonet thrust

into them, to be felled with clubbed muskets, and to find the works apparently in secure possession of the enemy before they could fire a shot. Such was the excellent success of the Federal movement, and the Southern line seemed to be hopelessly disrupted. Nearly the whole of Johnson's division were taken prisoners — the number amounting to more than 3,000 — and 18 pieces of artillery fell into the hands of the assaulting column. The position of affairs was now exceedingly critical; and, unless General Lee could reform his line at the point, it seemed that nothing was left him but an abandonment of his whole position. The Federal army had broken his line; was pouring into the opening; and, to prevent him from concentrating at the point to regain possession of the works, heavy attacks were begun by the enemy on his right and left wings. It is probable that at no time during the war was the Southern army in greater danger of a bloody and decisive disaster. At this critical moment General Lee acted with the nerve and coolness of a soldier whom no adverse event can shake. . . . Line of battle was promptly formed a short distance in rear of the salient then in the enemy's possession, and a fierce charge was made by the Southerners, under the eye of Lee, to regain it. . . . The word ferocious best describes the struggle which followed. It continued throughout the entire day, Lee making not less than five distinct assaults in heavy force to recover the works. The fight involved the troops on both flanks, and was desperate and unyielding. The opposing flags were at times within only a few yards of each other, and so incessant and concentrated was the fire of musketry that a tree of about 18 inches in diameter was cut down by bullets, and is still preserved, it is said, in the city of Washington, as a memorial of this bloody struggle. The fighting only ceased several hours after dark. Lee had not regained his advanced line of works, but he was firmly rooted in an interior and straighter line, from which the Federal troops had found it impossible to dislodge him."—*J. E. Cooke, Life of Gen. Robert E. Lee, pt.*8, *ch.* 4.—"For the distance of nearly a mile, amid a cold, drenching rain, the combatants [on the 12th, at the salient] were literally struggling across the breastworks. They fired directly into each other's faces, bayonet thrusts were given over the intrenchments; men even grappled their antagonists across the piles of logs and pulled them over, to be stabbed or carried to the rear as prisoners. . . . Never before, since the discovery of gunpowder, had such a mass of lead been hurled into a space so narrow as that which now embraced the scene of combat. Large standing trees were literally cut off and brought to the ground by infantry fire alone; their great limbs whipped into basket stuff that could be woven by the hand of a girl. . . . If any comparisons can be made between the sections involved in that desperate contest, the fiercest and deadliest fighting took place at the west angle, ever afterwards known as 'The Bloody Angle.' . . . All day the bloody work went on. . . . The trenches had more than once to be cleared of the dead, to give the living a place to stand. All day long, and even into the night, the battle lasted, for it was not till twelve o'clock, nearly twenty hours after the command 'Forward' had been given to the column at the Brown House, that the firing died down, and the Confederates, relinquishing their purpose to retake the captured works, began in the darkness to construct a new line to cut off the salient."—F. A. Walker, *Hist. of the Second Army Corps, ch.* 15.—General Humphreys estimates Grant's losses in killed and wounded on the 12th at 6,020; missing 800. Lee's losses that day in killed, wounded and prisoners he concludes to have been between 9,000 and 10,000. His estimate of losses on the 10th is 4,100 (killed and wounded) on the Union side, and 2,000 on the Confederate side. Major General John Sedgwick, commanding the Sixth Army Corps, was killed in the skirmishing of the 9th.—A. A. Humphreys, *The Virginia Campaign of '64 and '65, ch.* 3.

Also in: C. N. Galloway, *Hand to Hand Fighting at Spotsylvania* (*Battles and Leaders, v.* 4).—*Official Records, Series* 1, *v.* 36.

A. D. 1864 (May: Virginia).—Grant's movement upon Richmond: from Spottsylvania to the Chickahominy.—"The lines of Spottsylvania remained still intact, and General Grant, who might easily have turned the position and manœuvred his antagonist out of it, seemed bent on carrying it by direct attack. Accordingly, during the succeeding week [after the battle of the 12th], various movements of corps were made from flank to flank, in the endeavor to find a spot where the lines could be broken. These attempts were skilfully met at every point — the Confederates extending their line to correspond with the shiftings of the army; so that wherever attack was essayed, the enemy bristled out in breastworks, and every partial assault made was repulsed. Day by day Grant continued to throw out towards the left, in the hope of overlapping and breaking in the Confederate right flank: so that from occupying, as the army did on its arrival, a line extending four or five miles to the northwest of Spottsylvania Courthouse, it had at the end of ten days assumed a position almost due east of that place, the left resting at a distance of four miles at Massaponax Church. After twelve days of effort, the carrying of the position was seen to be hopeless; and General Grant, abandoning the attempt, resolved by a turning operation to disengage Lee from a position seen to be unassailable. Preparations for this movement were begun on the afternoon of the 19th; but the enemy, observing these, retarded its execution by a bold demonstration against the Union right. . . . This attack somewhat disconcerted the contemplated movement, and delayed it till the following night, May 20th, when the army, moving by the left, once more took up its march towards Richmond. Before the lines of Spottsylvania the Army of the Potomac had for twelve days and nights engaged in a fierce wrestle, in which it had done all that valor may do to carry a position by nature and art impregnable. . . . Language is inadequate to convey an impression of the labors, fatigues, and sufferings of the troops. . . . Above 40,000 men had already fallen in the bloody encounters of the Wilderness and Spottsylvania [Gen. Humphreys — in 'Virginia Campaign of '64 and '65,' p. 117 — makes the total of killed and wounded from May 5 to 21, to be 28,207, and the entire losses of the army, including the missing and the sick sent back to Washington, 37,335]. . . . The exhausted army began to lose its spirit. It was with joy, therefore, that it at length turned its back upon the lines of Spottsylvania. . . . The

two armies once fairly on the march . . . neither . . . seems to have sought to deal the other a blow . . . and both headed, as for a common goal, towards the North Anna. . . . The advances of the 21st and 22d brought the different corps [of the Army of the Potomac], which had moved on parallel roads at supporting distance, within a few miles of the North Anna River. Resuming the march on the morning of Monday, May 23d, the army in a few hours reached the northern bank of that stream. But it was only to descry its old enemy planted on the opposite side." Warren's corps crossed the river at Jericho Ford without resistance, but was furiously assailed late in the afternoon and held its ground, taking nearly 1,000 prisoners. The left column, under Hancock, forced a passage in the face of the enemy, carrying a bridge by storm. But nothing was gained by these successes. "While Lee, after the passage of Hancock on the left, threw his right wing back from the North Anna, and on the passage of Warren on the right threw back his left wing, he continued to cling with his centre to the river; so that . . . his army took up a very remarkable line in the form of an obtuse-angled triangle. . . . The game of war seldom presents a more effectual checkmate than was here given by Lee; for after Grant had made the brilliantly successful passage of the North Anna, the Confederate commander, thrusting his centre between the two wings of the Army of the Potomac, put his antagonist at enormous disadvantage, and compelled him, for the re-enforcement of one or the other wing, to make a double passage of the river. The more the position of Lee was examined, the more unpromising attack was seen to be; and after passing the two following days in reconnoissances, and destroying some miles of the Virginia Central Railroad, General Grant determined to withdraw across the North Anna and take up a new line of advance. The withdrawal from the North Anna was begun at dark of the 26th of May, when the Second, Fifth and Sixth Corps retired by different bridges to the north bank. . . . The Second Corps held position till the morning of the 27th, when it covered the rear. From the North Anna the line of march of the army made a wide circuit eastward and then southward to pass the Pamunkey. This river is formed by the confluence of the North and South Anna; and the Pamunkey in turn uniting with the Mattapony forms the York River, emptying into Chesapeake Bay. Thus the successful passage of the Pamunkey would not only dislodge Lee from the lines of the North and South Anna, but would bring the army in communication with a new and excellent water-base." The crossing of the Pamunkey, at and near Hanovertown, was accomplished without difficulty on the 27th and 28th, "and the routes to White House, at the head of York River, being opened up, the army was put in communication with the ample supplies floated by the waters of Chesapeake Bay. Grant's new turning movement was met by a corresponding retrograde movement on the part of Lee, and as he fell back on a direct line less than half the distance of the great detour made by the Army of the Potomac, it was not remarkable that, on crossing the Pamunkey, the Confederate force was again encountered, ready to accept the gage of battle. Lee assumed a position in advance of the Chickahominy. . . . The region in which the army was now operating revived many reminiscences in the minds of those who had made the Peninsular Campaign under McClellan. . . . Gaines' Mill and Mechanicsville were within an hour's ride; Fair Oaks could be reached in a two hours' trot; Richmond was ten miles off. . . . Reconnoissances showed Lee to be in a very strong position covering the approaches to the Chickahominy, the forcing of which it was now clear must cost a great battle." —W. Swinton, *Campaigns of the Army of the Potomac, pt.* 11, *ch.* 3–5.

Also in: A. Badeau, *Military Hist. of Ulysses S. Grant, ch.* 18–19 (*v.* 2).

A. D. 1864 (May: Virginia).—The Co-operative movement of the Army of the James.—In the plan and arrangement of General Grant's campaign, General Butler, commanding at Fortress Monroe, was instructed "to collect all the forces of his command that could be spared from garrison duty estimated at not less than 20,000, and operate on the south side of James River, Richmond being his objective. To his force 10,000 men from South Carolina, under Gillmore, were to be added. He was ordered to take City Point as soon as notification of movement was given, and fortify it. By this common advance from the Rapidan and Fortress Monroe the two armies would be brought into co-operation. . . . As arranged, Butler moved from Fortress Monroe on May 4th, Gillmore having joined him with the 10th Corps. The next day he occupied, without opposition, both City Point and Bermuda Hundred, his movement being a complete surprise. On the 7th he made a reconnoissance against the Richmond and Petersburg Railroad, destroying a portion of it after some fighting. On the night of the 9th he received dispatches from Washington informing him that Lee was retreating to Richmond and Grant in pursuit. He had, therefore, to act with caution, fearing that he might have Lee's whole army on his hands. On the evening of the 13th and morning of the 14th he carried a portion of the enemy's first line of defenses at Drury's Bluff, or Fort Darling. The time thus consumed from the 6th left no possibility of surprising and capturing Richmond and Petersburg, enabling, as it did, Beauregard to collect his forces in North and South Carolina, and bring them to the defense of these places. On the 16th the Confederates attacked Butler in his position in front of Drury's Bluff, forced him back into his entrenchments between the forks of James and Appomattox Rivers [in the district called Bermuda Hundred], and, intrenching strongly in his front, not only covered the railroads and city, but completely neutralized his forces. . . . Butler's army being confined at Bermuda Hundred, most of the re-enforcements from the South were now brought against the Potomac Army. In addition to this, probably not less than 15,000 men, under Breckenridge, arrived from the Western part of Virginia. The position of Bermuda Hundred being easy to defend, Grant, leaving only enough to secure what had been gained, took from it all available forces under W. F. Smith, and joined them to the Army of the Potomac."—J. W. Draper, *Hist. of the Am. Civil War, v.* 3, *pp.* 368 *and* 382–385.

Also in: A. A. Humphreys, *The Virginia Campaign of '64 and '65, ch.* 5.—*Official Records, Series* 1, *v.* 36, *pt.* 2.

A. D. 1864 (May: Georgia).— Sherman's Movement upon Atlanta: Johnston's Retreat.—Sherman now held command of the three armies of the Tennessee, the Cumberland, and the Ohio, having McPherson, Thomas and Schofield for their subordinate commanders, respectively. The main army of the rebellion in the West, Joe Johnston commanding, was at Dalton, northern Georgia, confronting Thomas at Chattanooga. "Grant and Sherman had agreed to act in concert. While the former should thrust Lee back upon Richmond, his late lieutenant was to push Johnston towards Atlanta. And Banks was to transfer his forces from New Orleans to Mobile and thence move towards and join hands with the Western armies. Sherman devoted his earliest energies to the question of transportation and railroads. Baggage was reduced to the lowest limits, the higher officers setting the example. Actual supplies and fighting-material were alone to be carried. Luxuries were to be things of the past; comforts to be forgotten. War's stern reality was to be each one's lot. Probably no officer in such high command ever lived so entirely from hand to mouth as did Sherman and his military family during the succeeding campaigns. The entire equipment of his army head-quarters would have shamed the shabbiest regimental outfit of 1861. Spring was to open with a general advance. It was agreed to put and keep the Confederates on the defensive by a policy of constant hammering. Bragg had been removed to satisfy public opinion in the South, but was nominally called to Richmond to act as Mr. Davis' chief-of-staff. Johnston, as commander of the Department, had personally undertaken to hold head against Sherman. But the fact that he possessed neither the President's good will nor that of his new adviser, militated much against a happy conduct of the campaign. Sherman's forces occupied a front sixteen miles in advance of Ringgold, just south of Chattanooga. McPherson and the Army of the Tennessee was on his right with 25,000 men and 100 guns. Thomas and the Army of the Cumberland held the centre with 60,000 men and 130 guns. Schofield and the Army of the Ohio formed the left wing. His command was 15,000 men and 30 guns. This grand total of 100,000 men and 260 guns formed an army of as good stuff as ever bore arms, and the confidence of the leader in his men and of the men in their leader was unbounded. Johnston himself foresaw the necessity of a strictly defensive campaign, to which his far from sanguine character, as well as his judgment as to what the existing conditions demanded, made him peculiarly suited. Counted after the same fashion as Sherman's army, Johnston had some 75,000 men. . . . He intrenched every step he took; he fought only when attacked; he invited battle only when the conditions were largely in his favor. Subsequent events showed how wise beyond his critics he could be. Sherman took the measure of the intrenchments at Dalton with care, and, though he outnumbered his antagonist, preferred not to hazard an engagement at such odds when he might force one on better ground. This conduct shows in strong contrast with Grant's, when the latter first met his opponent at this same moment in Virginia. Sherman despatched McPherson towards Resaca, on the railroad in Johnston's rear, with instructions to capture the town if possible. Combined with this flanking movement, a general advance was made upon the Confederate lines, and after tactical manœuvring of several days in front of Rocky Face Ridge, Johnston concluded to retire from his stronghold. McPherson had strangely failed to seize Resaca, though an excellent chance had offered, and at this place the Confederate army took up its new stand. . . . Sherman faced his antagonist on the line of Camp Creek in front of Resaca, with his right flank resting on the Oostanaula. From this position he operated by unintermitted tapping upon Johnston's defences at constantly varying points, without, however, bringing on a general engagement [though the losses were 2,747 Union and 2,800 Confederate]. . . . Sherman's uniform tactics during this campaign, varied indefinitely in details, consisted, as will be seen, in forcing the centre of the army upon Johnston's lines, while with the right and left he operated upon either flank as chance or ground best offered. Johnston did not propose to hazard an engagement unless all conditions were in his favor. He attempted a stand at Adairsville, twenty miles south of Resaca, but shortly withdrew to Kingston and Cassville. Each captain manœuvred for a chance to fight the other at a disadvantage. . . . From Cassville, Johnston retired across the Etowah. So far this campaign had been one of manœuvres. Neither combatant had suffered material loss. Like two wrestlers, as yet ignorant of each other's strength or quickness, they were sparring for a hold. . . . The Union army was growing skillful. Local difficulties multiplied many fold by bad maps and hostile population were overcome in considerable measure by an able corps of topographical engineers. . . . Bridges were uniformly burned and railroads wrecked by the retreating Confederates. To save delays in rebuilding, so far as possible, trestles were fitted in the rear to a scale with interchangeable timbers, so that bridges could be constructed with a speed never before dreamed of. No sooner had the Confederates put torch to a bridge, than a new one arose as by magic, and the whistle of the locomotive always followed hard upon the heels of the army."—T. A. Dodge, *Bird's-Eye View of our Civil War, ch.* 42–43.

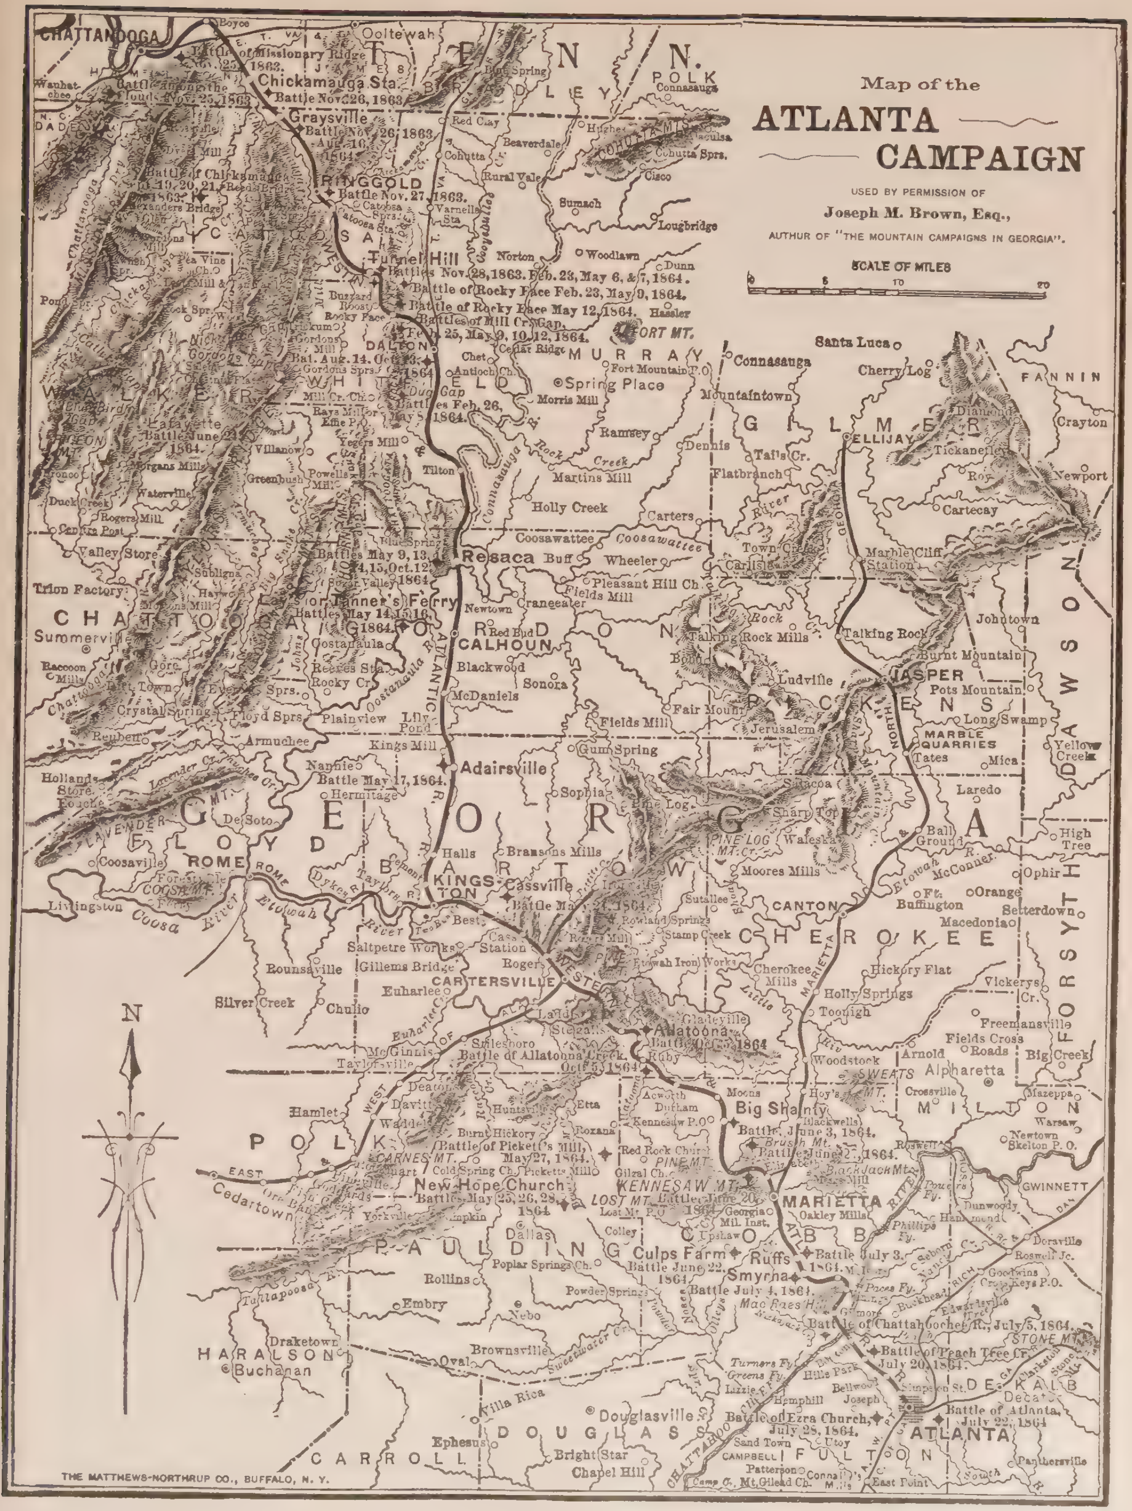
A. D. 1864 (May—June: Virginia).—Grant's Movement upon Richmond: The Battle of Cold Harbor.—"The passage of [the Pamunkey] had been completed on May 28, and then, after three days of marching, interspersed with the usual amount of fighting, the army found itself again confronted by Lee's main line on the Totopotomoy. The operations which followed were known as the battle of Cold Harbor. On the afternoon of May 31st, Sheridan, who was on the left flank of the army, carried, with his cavalry, a position near the old well and cross roads known as Old Cold Harbor, and, with his men dismounted behind rough breast-works, held it against Fitzhugh Lee until night. To this point, during the night, marched the vanguard of the Army of the Potomac. . . . About 9 the next day (June 1st) the head of the column reached Sheridan's position, and the cavalry was



withdrawn. The enemy, who had been seriously threatening Sheridan, withdrew from our immediate front within their lines and awaited us, occupying a strong outer line of intrenchments in front of our center, somewhat in advance of their main position, which included that on which the battle of Gaines' Mill had been fought two years before. It covered the approaches to the Chickahominy, which was the last formidable obstacle we had to meet before standing in front of the permanent works of Richmond. A large detachment, composed of the Eighteenth Corps and other troops from the Army of the James, under General W. F. Smith, had disembarked at White House on the Pamunkey, and was expected to connect that morning with the Sixth Corps at Cold Harbor. A mistake in orders caused an unnecessary march and long delay. In the afternoon, however, Smith was in position on the right of the Sixth Corps. Late in the afternoon both corps assaulted. The attack was made vigorously and with no reserves. The outer line in front of the right of the Sixth and the left of the Eighteenth was carried brilliantly, and the enemy was forced back, leaving several hundred prisoners in our hands. . . . This left the well and the old tavern at Cold Harbor in our rear, and brought us in front of the most formidable position yet held by the enemy. In front of him was a wooded country, interspersed with clearings here and there, sparsely populated, and full of swamps. Before daylight the Army of the Potomac stood together once more almost within sight of the spires of Richmond, and on the very ground where, under McClellan, they had defended the passage of the river they were now endeavoring to force. On the 2d of June our confronting line, on which the burden of the day must necessarily fall, consisted of Hancock on the left, Wright in the center, and Smith on the right. Warren and Burnside were still farther to the right, their lines refused, or drawn back, in the neighborhood of Bethesda Church, but not confronting the enemy. . . . No reconnoissance had been made other than the bloody one of the evening before. Every one felt that this was to be the final struggle. No further flanking marches were possible. Richmond was dead in front. No further wheeling of corps from right to left by the rear; no further dusty marches possible on that line, even 'if it took all summer.' The general attack was fixed for the afternoon of the 2d, and all preparations had been made, when the order was countermanded and the attack postponed until half-past four the following morning. Promptly at the hour named on the 3d of June the men moved from the slight cover of the rifle-pits, thrown up during the night, with steady, determined advance, and there rang out suddenly on the summer air such a crash of artillery and musketry as is seldom heard in war. No great portion of the advance could be seen from any particular point, but those of the three corps that passed through the clearings were feeling the fire terribly. Not much return was made at first from our infantry, although the fire of our batteries was incessant. The time of actual advance was not over eight minutes. In that little period more men fell bleeding as they advanced than in any other like period of time throughout the war. A strange and terrible feature of this battle was that as the three gallant corps moved on [necessarily diverging, the enemy's line forming an arc of a circle, with its concave side toward them] each was enfiladed while receiving the full force of the enemy's direct fire in front. . . . At some points the slashings and obstructions in the enemy's front were reached. Barlow, of Hancock's corps, drove the enemy from an advanced position, but was himself driven out by the fire of their second line. R. O. Tyler's brigade (the Corcoran Legion) of the same corps swept over an advance work, capturing several hundred prisoners. One officer alone, the colonel of the 164th New York [James P. McMahon], seizing the colors of his regiment from the dying color-bearer as he fell, succeeded in reaching the parapet of the enemy's main works, where he planted his colors and fell dead near the ditch, bleeding from many wounds. Seven other colonels of Hancock's command died within those few minutes. No troops could stand against such a fire, and the order to lie down was given all along the line. At points where no shelter was afforded, the men were withdrawn to such cover as could be found, and the battle of Cold Harbor, as to its result at least, was over. . . . Shortly after midday came the order to suspend for the present all further operations, and directing corps commanders to intrench, 'including their advanced positions,' and directing also that reconnoissances be made, 'with a view to moving against the enemy's works by regular approaches'. . . . When night came on the groans and moaning of the wounded, all our own, who were lying between the lines, were heart-rending. Some were brought in by volunteers from our intrenchments, but remained for three days uncared for beneath the hot summer suns and the unrefreshing dews of the sultry summer nights. . . . An impression prevails in the popular mind, and with some reason perhaps, that a commander who sends a flag of truce asking permission to bury his dead and bring in his wounded, has lost the field of battle. Hence the reluctance upon our part to ask a flag of truce. In effect it was done at last on the evening of the third day after the battle, when, for the most part, the wounded needed no further care and our dead had to be buried almost where they fell."—M. T. McMahon, *Cold Harbor* (*Battles and Leaders, v.* 4).—"According to the report of the Medical Director, Surgeon McParlin, the wounded brought to the hospitals from the battle of the 3d of June numbered 4,517. The killed were at least 1,100. The wounded brought to the hospitals from the battle of the 1st of June were 2,125; the killed were not less than 500. The wounded on the 1st and 3d of June were, therefore, 6,642, and the killed not less than 1,600; but, adopting the number of killed and missing furnished General Badeau from the Adjutant General's office, 1,769 killed, 1,537 missing (many— most, indeed — of them, no doubt, killed), we have 8,411 for the killed and wounded, and for the total casualties, 9,948."—A. A. Humphreys, *The Virginia Campaign of '64 and '65* (*Campaigns of the Civil War*), *p.* 191.—"I have always regretted that the last assault at Cold Harbor was ever made. . . . At Cold Harbor no advantage whatever was gained to compensate for the heavy loss we sustained. Indeed, the advantages other than those of relative losses, were on the Confederate side. . . . This charge seemed to revive their hopes temporarily;

but it was of short duration. The effect upon the Army of the Potomac was the reverse. When we reached the James River, however, all effects of the battle of Cold Harbor seemed to have disappeared."—U. S. Grant, *Personal Memoirs, ch.* 55 (*v.* 2).—*Official Records, Series* 1, *v.* 36.

A. D. 1864 (May—June: Virginia).—The Campaigning in the Shenandoah Valley, and Sheridan's raid to Trevillian Station.—"In the spring of 1864, the Department of West Virginia, which included the Shenandoah Valley, was under the command of Major-General Franz Sigel. A large portion of his forces was in the Kanawha region, under Brigadier-General George Crook. . . . In opening his Virginia campaign, Lieutenant-General Grant directed Sigel to form two columns, whereof one, under Crook, should break the Virginia and Tennessee Railroad at the New River bridge, and should also, if possible, destroy the salt-works at Saltville; while the other column, under Sigel himself, proceeding up the Shenandoah Valley, was to distract attention from Crook by menacing the Virginia Central Railroad at Staunton."—G. E. Pond, *The Shenandoah Valley in* 1864 (*Campaigns of the Civil War, v.* 11), *ch.* 2.—"Early in May, General Sigel entered the Valley with a force of 10,000 or 12,000 men [6,000 or 7,000, according to Pond, as above], and proceeded to advance toward Staunton. The Valley at that time was occupied only by a small force under General Imboden, which was wholly inadequate for its defence. General Breckenridge was therefore withdrawn from South-Western Virginia to oppose Sigel. On the 15th of May, Breckenridge with a force of 3,000 men [4,600 to 5,000—Pond] encountered Sigel at Newmarket and defeated him and compelled him to retire behind Cedar Creek. The cadets of the Virginia Military Institute formed a portion of Breckenridge's division, and behaved with distinguished gallantry. . . . After the battle of Newmarket Breckenridge was withdrawn from the Valley to reinforce Lee . . . in the neighborhood of Hanover Junction. In the meantime Crook and Averill had reached the Virginia and Tennessee Railroad, where they inflicted some damage, but were compelled to retire by a force sent against them by General Sam. Jones. They then proceeded to join the main column operating in the Valley. After the battle of Newmarket, Sigel was relieved by General David Hunter, who was instructed by General Grant to advance upon Staunton, thence to Charlottesville, and on to Lynchburg if circumstances favored that movement. Breckenridge having been withdrawn, General W. E. Jones was ordered to the Valley to oppose Hunter, who slowly advanced, opposed by Imboden with an almost nominal force. About the 4th of June, Imboden was joined by General Jones in the neighborhood of Harrisonburg with a force of between 3,000 and 4,000 men, which he had hastily collected in Southwestern Virginia. . . . Although greatly outnumbered, he [Jones] engaged Hunter near Port Republic [at the village of Piedmont, which gives its name to the battle], where he was defeated and killed. . . . After the fall of Jones, McCauslin opposed Hunter with gallantry and vigor, but his small force was no match for the greatly superior force against which he contended. The affairs in the Valley now began to attract the attention of the commanding generals of both armies. It was evident that if Hunter could succeed in taking Lynchburg and breaking up the canal and Central Railroad, it would only be necessary to tap the Richmond and Danville and the Petersburg and Weldon railroads to complete a line of circumvallation around Richmond and Petersburg. On the 7th of June General Grant detached General Sheridan, with a large cavalry force, with instructions to break up the Central Railroad between Richmond and Gordonsville, then proceed to the James River and Kanawha Canal, break that line of communication with Richmond, and then to co-operate with Hunter in his operations against Lynchburg. About the same time General Lee sent General Breckenridge with his division, 2,500 strong, to occupy Rockfish Gap of the Blue Ridge to deflect Hunter from Charlottesville and protect the Central Railroad as far as practicable. A few days later General Early was detached by General Lee to oppose Hunter, and take such other steps as in his judgment would tend to create a diversion in favor of Richmond. General Sheridan, in compliance with his instructions, proceeded by a circuitous route to strike the railroad somewhere in the neighborhood of Gordonsville. This movement was, however, discovered by General Hampton, who, with a considerable force of cavalry encountered Sheridan on the 12th of June at Travillians [or Trevillian's] Station. After much severe and varied fighting Sheridan was defeated, and in order to escape was obliged to make a night-retreat. [In his 'Memoirs,' Sheridan claims the victory, having forced Hampton back and taken 500 prisoners; but learning that Hunter would not meet him, as expected, at Charlottesville, he turned back to rejoin Grant south of Richmond]. . . . This was one of the most masterly and spirited cavalry engagements of the war. Hunter, finding Rockfish Gap occupied in force, was unable to comply with that part of his instructions which directed him to Charlottesville. He therefore continued his march up the Valley, with the view of reaching Lynchburg by way of some one of the passes of the Blue Ridge south of the James River. In the neighborhood of Staunton he was joined by Crook and Averill, increasing his force to about 20,000 men, including cavalry and artillery. From Staunton he advanced by way of Lexington and Buchanan, burning and destroying everything that came in his way, leaving a track of desolation rarely witnessed in the course of civilized warfare." Before Hunter's arrival at Lynchburg, General Early, who withdrew his corps (formerly Stonewall Jackson's, and lately commanded by Ewell), from Richmond on the 13th of June, had reached that city and was prepared to defend it. "Hunter, finding himself unexpectedly confronted by Early, relinquished his intended attack upon the city and sought safety in a rapid night-retreat."—A. L. Long, *Memoirs of Robert E. Lee, ch.* 18.

A. D. 1864 (May—September: Georgia).—Sherman's Movement upon Atlanta: New Hope Church.—Kenesaw.—Peach Tree Creek.—The siege and capture of the city.—From Cassville, for reasons given in his memoirs, Johnston continued his retreat behind the next spur of mountains to Allatoona. "Pausing for a few days," writes General Sherman, "to repair the railroad without attempting Allatoona, of

which I had personal knowledge acquired in 1844, I resolved to push on toward Atlanta by way of Dallas; Johnston quickly detected this, and forced me to fight him, May 25th–28th, at New Hope Church, four miles north of Dallas, with losses of 3,000 to the Confederates and 2,400 to us. The country was almost in a state of nature—with few or no roads, nothing that a European could understand; yet the bullet killed its victim there as surely as at Sevastopol. Johnston had meantime picked up his detachments, and had received reënforcements from his rear which raised his aggregate strength to 62,000 men, and warranted him in claiming that he was purposely drawing us far from our base, and that when the right moment should come he would turn on us and destroy us. We were equally confident, and not the least alarmed. He then fell back to his position at Marietta, with Brush Mountain on his right, Kenesaw his center and Lost Mountain his left. His line of ten miles was too long for his numbers, and he soon let go his flanks and concentrated on Kenesaw. We closed down in battle array, repaired the railroad up to our very camps, and then prepared for the contest. Not a day, not an hour, not a minute was there a cessation of fire. Our skirmishers were in absolute contact, the lines of battle and the batteries but little in rear of the skirmishers; and thus matters continued until June 27th, when I ordered a general assault, with the full coöperation of my great lieutenants, Thomas, McPherson and Schofield, as good and true men as ever lived or died for their country's cause; but we failed, losing 3,000 men to the Confederate loss of 630. Still, the result was that within three days Johnston abandoned the strongest possible position and was in full retreat for the Chattahoochee River. We were on his heels; skirmished with his rear at Smyrna Church on the 4th day of July, and saw him fairly across the Chattahoochee on the 10th, covered and protected by the best line of field intrenchments I have ever seen, prepared long in advance. . . . We had advanced into the enemy's country 120 miles, with a single-track railroad, which had to bring clothing, food, ammunition, everything requisite for 100,000 men and 23,000 animals. The city of Atlanta, the gate city, opening the interior of the important State of Georgia, was in sight; its protecting army was shaken but not defeated, and onward we had to go. . . . We feigned to the right, but crossed the Chattahoochee by the left, and soon confronted our enemy behind his first line of intrenchments at Peach Tree Creek, prepared in advance for this very occasion. At this critical moment the Confederate Governmont rendered us most valuable service. Being dissatisfied with the Fabian policy of General Johnston, it relieved him, and General Hood was substituted to command the Confederate army [July 18]. Hood was known to us to be a 'fighter' . . . and I confess I was pleased at this change. . . . I was willing to meet the enemy in the open country, but not behind well-constructed parapets. Promptly, as expected, General Hood sallied from his Peach Tree line on the 20th of July, about midday, striking the Twentieth Corps (Hooker), which had just crossed Peach Tree Creek by improvised bridges. The troops became commingled and fought hand to hand desperately for about four hours, when the Confederates were driven back within their lines, leaving behind their dead and wounded. These amounted to 4,796 men, to our loss of 1,710. We followed up and Hood fell back to the main lines of the city of Atlanta. We closed in, when again Hood, holding these lines with about one-half his force, with the other half made a wide circuit by night, under cover of the woods, and on the 22d of July enveloped our left flank 'in air,' a movement that led to the hardest battle of the campaign. He encountered the Army of the Tennessee—skilled veterans who were always ready to fight, were not alarmed by flank or rear attacks, and met their assailants with heroic valor. The battle raged from noon to night, when the Confederates, baffled and defeated, fell back within the intrenchments of Atlanta. Their losses are reported 8,499 to ours of 3,641; but among our dead was McPherson, the commander of the Army of the Tennessee. While this battle was in progress, Schofield at the center and Thomas on the right made efforts to break through the intrenchments at their fronts, but found them too strong to assault. The Army of the Tennessee was then shifted, under its new commander (Howard), from the extreme left to the extreme right, to reach if possible, the railroad by which Hood drew his supplies, when, on the 28th of July, he repeated his tactics of the 22d, sustaining an overwhelming defeat, losing 4,632 men to our 700. These three sallies convinced him that his predecessor, General Johnston, had not erred in standing on the defensive. Thereafter the Confederate army in Atlanta clung to its parapets. I never intended to assault these, but gradually worked to the right to reach and destroy his line of supplies, because soldiers, like other mortals, must have food. Our extension to the right brought on numerous conflicts, but nothing worthy of note, till about the end of August I resolved to leave one corps to protect our communications to the rear, and move with the other five to a point (Jonesboro') on the railroad 26 miles below Atlanta, not fortified. This movement was perfectly strategic, was successful, and resulted in our occupation of Atlanta, on the 2d of September, 1864. The result had a large effect on the whole country, at the time, for solid and political reasons. I claim no special merit to myself, save that I believe I followed the teachings of the best masters of the 'science of war' of which I had knowledge. . . . But I had not accomplished all, for Hood's army, the chief 'objective,' had escaped. Then began the real trouble. We were in possession of Atlanta, and Hood remained at Lovejoy's Station, 30 miles south-east, on the Savannah Railroad, with an army of about 40,000 veterans inured to war, and with a fair amount of wagons to carry his supplies, independent of the railroads."—W. T. Sherman and others, *Atlanta* (*Battles and Leaders, v.* 4).

A. D. 1864 (May—November).—The Twentieth Presidential Election.—Renomination and Re-election of Abraham Lincoln.—"Preparations for the nomination of candidates

had begun to be made, as usual, early in the spring of 1864. Some who saw most clearly the necessities of the future, had for some months before expressed themselves strongly in favor of the renomination of President Lincoln. But this step was contested with great warmth and activity by prominent members of the political party by which he had been nominated and elected four years before. Nearly all the original Abolitionists and many of the more decidedly anti-slavery members of the Republican party were dissatisfied, that Mr. Lincoln had not more rapidly and more sweepingly enforced their extreme opinions. Many distinguished public men resented his rejection of their advice, and many more had been alienated by his inability to recognize their claims to office. The most violent opposition came from those who had been most persistent and most clamorous in their exactions. And as it was unavoidable that, in wielding so terrible and so absolute a power in so terrible a crisis, vast multitudes of active and ambitious men should be disappointed in their expectations of position and personal gain, the renomination of Mr. Lincoln was sure to be contested by a powerful and organized effort. At the very outset this movement acquired consistency and strength by bringing forward the Hon. S. P. Chase, Secretary of the Treasury, a man of great political boldness and experience, and who had prepared the way for such a step by a careful dispensation of the vast patronage of his department, as the rival candidate. But it was instinctively felt that this effort lacked the sympathy and support of the great mass of the people, and it ended in the withdrawal of his name as a candidate by Mr. Chase himself. The National Committee of the Union Republican party had called their convention, to be held at Baltimore, on the 8th of June." Those who opposed Mr. Lincoln's nomination issued a call for a convention to be held at Cleveland, Ohio, on the 31st of May. The Cleveland Convention, attended by about 150 persons, put in nomination General John C. Fremont, for President, and General John Cochrane, of New York, for Vice President. "General Fremont's letter of acceptance was dated June 4th. Its main scope was an attack upon Mr. Lincoln for unfaithfulness to the principles he was elected to defend, and upon his administration for incapacity and selfishness. . . . He intimated that if the Baltimore convention would nominate any one but Mr. Lincoln he would not stand in the way of a union of all upon the nominee. . . . The Convention, the nomination and the letter of acceptance, fell dead upon the popular feeling [and Fremont withdrew his candidacy in September]. . . . The next form which the effort to prevent Mr. Lincoln's nomination and election took was an effort to bring forward General Grant as a candidate." But this was decisively checked by General Grant, himself. The Convention at Baltimore, when it assembled on the 8th of June, showed no hesitation in nominating Abraham Lincoln for reelection, and it associated with him, Andrew Johnson, of Tennessee, as its candidate for Vice President. The National Convention of the Democratic party was held at Chicago, beginning August 29th. The second resolution which it adopted in its platform declared that, "after four years of failure to restore the Union by the experiment of war . . . justice, humanity, liberty and the public welfare demand that immediate efforts be made for a cessation of hostilities, with a view to an ultimate convention of the States or other peaceable means, to the end that, at the earliest practicable moment, peace may be restored on the basis of the Federal Union of the States." On this issue, having nominated General George B. McClellan for President, and George H. Pendleton, of Ohio, for Vice President, the opponents of the war went to the country in the election, in November, and were overwhelmingly defeated. "Of all the States which voted on that day, General McClellan carried but three — New Jersey, Delaware and Kentucky."—H. J. Raymond, *Life and Public Services of Abraham Lincoln, ch.* 18.—The electoral vote was for Lincoln 212, for McClellan 21. The popular vote cast was, for Lincoln 2,213,665, for McClellan, 1,802,237. Many of the States had made provision for taking the votes of soldiers in the field, and the army vote was 116,887 for Lincoln against 33,748 for McClellan.—E. Stanwood, *Hist. of Presidential Elections, ch.* 21.

A. D. 1864 (June).—Repeal of the Fugitive Slave Laws.—At every session of Congress from 1861 to 1864 ineffectual attempts were made in the Senate and in the House of Representatives to accomplish the repeal of the Fugitive Slave Laws of 1793 and 1850. It was not until June of the latter year that the necessary bill was passed — by the House on the 6th, by a vote of 82 to 57, and by the Senate on the 22d by 27 to 12. The President approved it on the 28th, and it became a law.—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v.* 3, *ch.* 29.

A. D. 1864 (June: Virginia).—Grant's movement to the south of James River.—The Siege of Petersburg.—"In consequence of the check at Cold Harbor, a restlessness was becoming general among the people, which the government in vain pretended not to notice. . . . Public opinion, shaken in its confidence, already began to listen to the sinister interpretations of the opposition journals, when, in the last half of June, it learned that the lieutenant-general had boldly crossed the James and laid siege before Petersburg. . . .This passage of the James was . . . a very fine movement, as ably executed as it was boldly conceived. It inaugurated a new phase in the campaign. . . .Henceforth, the battering not having produced the expected effect, Grant was about to try the resources of military science, and give precedence to strategic combinations. In the first place, he took his measures so well to conceal his intentions from the enemy that the latter did not recognize the character of the movement until it was already executed. Warren was ordered to occupy Lee's attention by the menace of an advance on Richmond from the direction of White Oak Swamp, while Smith (W. F.) reëmbarked from White House to return to Bermuda Hundred, and Hancock, with the Second Corps, would be transferred to the right bank of the James by a flotilla of large steamers collected at

Wilcox Landing for that purpose. At the same time, a bridge of boats was thrown across a little below, where there were thirteen fathoms of water in the channel, and where the river was more than 2,000 feet broad. The Fifth and Sixth Corps crossed over on the bridge. Grant hoped to get hold of Petersburg by a 'coup de main.' If he had succeeded, the fall of Richmond would have soon followed in all probability. Unfortunately, delays occurred and contretemps which caused the opportunity to fail and completely modified the course of events. General Smith (W. F.), after having carried the first line, which was defended by militia only, did not know how to take advantage of his first success. Proceeding methodically and cautiously, where it was, above all, necessary to act with vigor and promptness, he put off the serious work until the next morning. Hancock, in his turn, debarked on the right bank, did not receive the order to march on Petersburg until he had been delayed to wait for rations which were behindhand, and went astray in his march owing to false indications on a map which had been sent to him as correct. In short, he lost precious hours in the afternoon of June 15, and on the morning of the 16th it was too late; Lee's troops had arrived. Nevertheless, the intrenchments thrown up hastily by the enemy were not so formidable that they might not be carried. In the morning, a fresh attack, with Birney's and Gibbon's divisions, met with some success, but with no decisive results. In the afternoon, the Ninth Corps having arrived, the attempt was renewed on a greater scale, and it ended by carrying the line at sundown, after a hard fight and considerable loss. On the next morning, a new assault, always by the Second Corps, supported by the Ninth. The enemy lost more ground and a redoubt of importance. In the evening, he succeeded in surprising the intrenchments which Burnside had taken from him. All these fights were not without cost; the loss of that day alone, on our side, amounted to 4,000 men. The Confederates defended the ground step by step, with such determination, only to gain the time necessary to finish a stronger and better selected line, on the hills immediately around the city. They retired to these lines in the following night, and during the whole of the 18th they sustained in them a series of attacks which met with no success. From that day, the siege of Petersburg was resolved upon, and regular works were begun. It must be remarked that this siege was not a siege, properly speaking. The place was never even invested. It lies 22 miles south of Richmond, on the right bank of the Appomattox, eight miles southwest of City Point, where that river empties into the James, and where the new base of supplies of the army was naturally established. So that we had turned Richmond to put ourselves across a part of the enemy's communications with the South, and directly threaten the rest. These communications were: the railroads to Norfolk, Weldon and Lynchburg, and the Jerusalem and Boydton roads, all ending at Petersburg. Besides these, the Confederate capital had only the James River Canal, to the west, and the Dansville railroad, to the south. The latter did not extend beyond the limits of Virginia, but it crossed the Lynchburg railroad at Burksville, which doubled its resources. If, then, we succeeded in enveloping Petersburg only on the right bank of the Appomattox, the population and the Confederate army would be reduced to draw all their supplies from Richmond by a single-track railroad. To accomplish that was our effort; to prevent it, the enemy's: that was the point towards which all the operations of the siege were directed for nine months. On the day on which we finally succeeded, Petersburg and Richmond fell at the same blow, and the whole structure of the rebellion crumbled with these two cities."—R. de Trobriand, *Four Years with the Army of the Potomac, ch.* 28.

ALSO IN: F. A. Walker, *Hist. of the Second Army Corps, ch.* 19–23.—U. S. Grant, *Personal Memoirs, ch.* 56 (*v.* 2).—*Official Records, Series* 1, *v.* 40.

A. D. 1864 (July).—The Greeley and the Jaques-Gilmore Peace Missions.—"Two abortive efforts to open a door to accommodation between the belligerents were made during this gloomy period. One of these originated with certain Confederates then in Canada, one of whom wrote [July 5, 1864] to the author of this work [Horace Greeley], averring that Messrs. Clement C. Clay, of Alabama, James P. Holcombe, of Virginia, and George N. Sanders (the writer) would proceed to Washington in the interest of Peace, if full protection were accorded them. Being otherwise confidentially assured that the two former had full powers from Richmond, Mr. Greeley forwarded the application to President Lincoln, urging that it be responded to, and suggesting certain terms of reunion and peace which he judged might be advantageously proffered to the Rebels, whether they should be accepted or rejected. . . . The 'Plan of Adjustment,' which he suggested that the President might advantageously offer," contemplated the restoration of the Union, abolition of slavery, with $400,000,000 paid in compensation to the slave states, and complete amnesty for all political offenses. "The President hereupon saw fit—alike to the surprise and the regret of his correspondent—to depute him to proceed to Niagara, and there communicate with the persons in question. He most reluctantly consented to go, but under a misapprehension which insured the failure of the effort in any event. Though he had repeatedly and explicitly written to the President that he knew nothing as to what the Confederates in Canada might or would propose as a basis of adjustment . . . it was expected on the President's part that he was virtually and substantially to negotiate and settle the basis of a pacification with them; so that their visit to Washington was, in effect, to be the result, and not the possible occasion, of adjustment and peace. . . . The whole matter thus terminated in failure and disappointment, with some exasperation on the Rebel side, and very decided condemnation on the part of the opposition. . . . Happily, another negotiation — even more irregular and wholly clandestine — had simultaneously been in progress at Richmond, with a similar result. Rev. Col. James F. Jaques, 73d Illinois, with Mr. J. R. Gilmore, of New York, had, with President Lincoln's knowledge, but without his formal permission, paid a visit to the Confederate capital on a Peace errand; being allowed to pass through the lines of both armies for the purpose. Arrived in Richmond they addressed a joint letter to Judah P. Benjamin, Secretary of

State, requesting an interview with President Davis, which was accorded; and a long, familiar, earnest colloquy ensued, wherein the Confederate chief presented his ultimatum in these terms: . . . . 'The North was mad and blind; it would not let us govern ourselves; and so the war came; and now it must go on till the last man of this generation falls in his tracks, and his children seize his musket and fight our battle, unless you acknowledge our right to self-government. We are not fighting for Slavery, we are fighting for Independence; and that or extermination we will have'. . . . Thus it was not only incontestably settled but proclaimed, through the volunteered agency of two citizens, that the War must go on until the Confederacy should be recognized as an independent power, or till it should be utterly, finally overthrown. The knowledge of this fact was worth more than a victory to the National cause."—H. Greeley, *The American Conflict, v.* 2, *ch.* 30.

A. D. 1864 (July: Virginia—Maryland.)—Early in the Shenandoah Valley.—His invasion of Maryland and approach to Washington.—"When Early had forced Hunter into the Kanawha region [See above: A. D. 1864 (May—June: Virginia)], far enough to feel assured that Lynchburg could not again be threatened from that direction, he united to his own corps General John C. Breckenridge's infantry division and the cavalry of Generals J. H. Vaughn, John McCausland, B. T. Johnson, and J. D. Imboden, which heretofore had been operating in southwest and western Virginia under General Robert Ransom, Jr., and with the column thus formed, was ready to turn his attention to the lower Shenandoah Valley. At Early's suggestion General Lee authorized him to move north at an opportune moment, cross the upper Potomac into Maryland and threaten Washington. . . . By rapid marching Early reached Winchester on the 2d of July, and on the 4th occupied Martinsburg, driving General Sigel out of that place the same day that Hunter's troops, after their fatiguing retreat through the mountains, reached Charlestown, West Virginia. Early was thus enabled to cross the Potomac without difficulty, when, moving around Harper's Ferry, through the gaps of the South Mountain, he found his path unobstructed till he reached the Monocacy, where Ricketts's division of the Sixth Corps, and some raw troops that had been collected by General Lew Wallace, met and held the Confederates till the other reinforcements that had been ordered to the capital from Petersburg could be brought up. Wallace contested the line of the Monocacy with obstinacy, but had to retire finally toward Baltimore. The road was then open to Washington, and Early marched to the outskirts and began against the capital the demonstrations [July 11–12] which were designed to divert the Army of the Potomac from its main purpose in front of Petersburg. Early's audacity in thus threatening Washington had caused some concern to the officials in the city, but as the movement was looked upon by General Grant as a mere foray which could have no decisive issue, the Administration was not much disturbed till the Confederates came in close proximity. Then was repeated the alarm and consternation of two years before, fears for the safety of the capital being magnified by the confusion and discord existing among the different generals in Washington and Baltimore; and the imaginary dangers vanished only with the appearance of General Wright, who with the Sixth Corps and one division of the Nineteenth Corps, pushed out to attack Early as soon as he could get his arriving troops in hand, but under circumstances that precluded celerity of movement; and as a consequence the Confederates escaped with little injury, retiring across the Potomac to Leesburg, unharassed save by some Union cavalry that had been sent out into Loudoun County by Hunter, who in the meantime had arrived at Harper's Ferry by the Baltimore and Ohio railroad. From Leesburg Early retired through Winchester toward Strasburg, but when the head of his column reached this place he found that he was being followed by General Crook with the combined troops of Hunter and Sigel only, Wright having returned to Washington under orders to rejoin Meade at Petersburg. This reduction of the pursuing force tempting Early to resume the offensive, he attacked Crook at Kernstown, and succeeded in administering such a check as to necessitate this general's retreat to Martinsburg, and finally to Harper's Ferry. Crook's withdrawal restored to Early the line of the upper Potomac, so, recrossing this stream, he advanced again into Maryland, and sending McCausland on to Chambersburg, Pennsylvania, laid that town in ashes [July 30] leaving 3,000 non-combatants without shelter or food. . . . This second irruption of Early and his ruthless destruction of Chambersburg led to many recommendations on the part of General Grant looking to a speedy elimination of the confusion then existing among the Union forces along the upper Potomac, but for a time the authorities at Washington would approve none of his propositions. . . . Finally the manœuvres of Early and the raid to Chambersburg compelled a partial compliance, though Grant had somewhat circumvented the difficulty already by deciding to appoint a commander for the forces in the field that were to operate against Early. On the 31st of July General Grant selected me as this commander. . . . On the evening of August 1, I was relieved from immediate duty with the Army of the Potomac, but not from command of the cavalry as a corps organization. I arrived at Washington on the 4th of August, and the next day received instructions from General Halleck to report to General Grant at Monocacy Junction, whither he had gone direct from City Point, in consequence of a characteristic despatch from the President indicating his disgust with the confusion, disorder and helplessness prevailing along the upper Potomac, and intimating that Grant's presence there was necessary."—P. H. Sheridan, *Personal Memoirs, v.* 1, *ch.* 23.

A. D. 1864 (July: Virginia).—The siege of Petersburg: The Mine.—"Burnside's corps held a position directly in front of Petersburg, including a point where our lines, owing to the nature of the ground, had been pushed up to within 150 yards of the enemy's, where a fort projected beyond their average front.

Under this fort a mine had been run from a convenient ravine or hollow within our lines, which was entirely screened from the enemy's observation; and this mine would seem to have been completed not only without countermining by the Rebels, but without being even suspected by them; though a report of its existence (probably founded on the story of some deserter or prisoner) was printed in one of the Richmond journals. All being ready, the morning of July 30th was fixed for springing the mine; which was to be instantly followed, of course, by the opening of our guns all along the front, and by an assault at the chasm opened in the enemy's defences by the explosion. . . . The explosion took place; hoisting the fort into the air, annihilating its garrison of 300 men, and leaving in its stead a gigantic hollow or crater of loose earth, 150 feet long by some 60 wide and 25 to 30 deep. Instantly, our guns opened all along the front; and the astounded enemy may well have supposed them the thunders of doom. But it was indispensable to successs that a column of assault should rush forward instantly and resolutely, so as to clear the chasm and gain the crest before the foe should recover from his surprise; and, on this vital point failure had already been secured. The 9th corps, as then constituted, was not that from which any commanding general would have selected a storming party; yet because it was Burnside's mine, his corps was, without discussion, allowed to furnish the column of assault. His inspecting officer had reported that, of its four divisions, that composed of Blacks was fittest for this perilous service; but Grant, discrediting this, had directed that one of the three White divisions should be chosen. Thereupon, the leaders of these divisions were allowed to cast lots to see which of them should go in—or rather which two of them should stay out—and the lot fell on the 1st, Brig.-Gen. Ledlie—and no man in the army believed this other than the worst choice of the three. . . . Several minutes passed—precious, fatal minutes!—before Ledlie's division, clearing with difficulty the obstacles in its path—went forward into the chasm, and there stopped, though the enemy at that point were still paralyzed and the deciding crest completely at our mercy. Then parts of Burnside's two remaining White divisions (Potter's and Wilcox's) followed; but once in the crater, Ledlie's men barred the way to a farther advance, and all huddled together, losing their formation and becoming mixed up; General Potter finally extricating himself, and charging toward the crest; but with so slender a following that he was soon obliged to fall back. Two hours were thus shamefully squandered, while the Rebels recovering their self-possession, were planting batteries on either side, and mustering their infantry in an adjacent ravine; and now—when more men in the crater could only render the confusion more hopeless and magnify the disaster—Burnside threw in his Black division; which, passing beyond and rather to the right of the crater, charged toward the crest, but were met by a fire of artillery and musketry which speedily hurled them back into the crater, where all order was lost, all idea of aught beyond personal safety abandoned, while the enemy's shells and balls poured into it like hail, rendering it an arena of unresisted slaughter. . . . A first Rebel assault on our unfortunates was repulsed in sheer desperation; and thousands of course took the risk of darting out of the death-trap and racing at top speed to our lines; but our loss in killed, wounded, and prisoners was 4,400; while that of the enemy, including 300 blown up in the fort, was barely 1,000."—H. Greeley, *The American Conflict, v. 2, pp.* 590–591.

A. D. 1864 (August: Virginia).—The Siege of Petersburg: Fighting for the Weldon Road.—Battle of Reams's Station.—The Dutch Gap Canal.—"Taking advantage of the absence of many of Lee's troops from Petersburg, Grant made a vigorous movement for securing possession of the Weldon road, not more than three miles from the left flank of his lines on the Jerusalem plank road. This movement was made by Warren, with the Fifth Corps, on the morning of the 18th of August, and at noon he reached the coveted railway without opposition, where he left Griffin to hold the point seized, while with the divisions of Ayres and Crawford he moved toward Petersburg. He had marched but a short distance when a division of Confederates suddenly and heavily fell upon his flank. . . . Warren held the ground he had gained at a cost of 1,000 men killed, wounded and prisoners." The next day (August 19), Lee sent Hill with a heavy force to drive Warren from the road, and the attempt, desperately made, was nearly successful, but not quite. Two days later it was repeated, and the Confederates were repulsed with a loss of 1,200 men. "In his entire movement for the possession of the road Warren lost, in killed, wounded and missing, 4,450 men. He now rendered his position almost impregnable, and General Lee was compelled to see one of his most important lines of communication wrested from him. On the day of Warren's Victory [August 21], Hancock, who . . . had been called from the north bank of the James [where an unsuccessful demonstration towards Richmond had been made from Deep Bottom], and who had moved with part of his corps rapidly toward the Weldon road, in the rear of Warren, struck that highway north of Reams's Station, and destroyed the track to that point and some miles south of it. He formed an intrenched camp at Reams's," and was attacked there on the 25th by Hill with such determination that he was forced back to a rear line, "where the troops had been rallied, and when night fell Hancock withdrew from Reams's Station. He had lost in the fight 2,400 of his 8,000 men, and five guns; 1,700 of the men were made prisoners. Hill's loss was but little less, and he, too, withdrew from Reams's. But this disaster did not loosen Warren's hold upon the Weldon road. . . . For about a month after the battle of Reams's Station there was comparative quiet along the lines of the opposing armies. . . . A strong party of colored soldiers had been set to work by General Butler on the north side of the James, under cover of a battery on that side mounting 100-pounder Parrott guns, in digging a canal across the narrow isthmus of a peninsula

formed by a sharp bend in the river, called Farrar's Island. By this canal it was intended to secure a nearer base of operations against Richmond, and afford a passage for the National war vessels, by which they might flank several important works of the Confederates." The Dutch Gap Canal, as it was called, did not prove successful, the necessary depth of water never being secured during the war, though the canal has been brought into use since.—B. J. Lossing, *Field Book of the Civil War, v. 3, ch. 13.*

A. D. 1864 (August: Alabama).—The Battle of Mobile Bay.—Capture of Confederate forts and fleet).—"After the capitulation of Vicksburg the vessels of the so-called Gulf Squadron which had been cruising on the lower Mississippi and its tributaries were in part joined to the Upper Squadron, under the command of Admiral Porter. The remainder were recalled to their duties on the outside blockade. Admiral Farragut was now free to turn his whole attention to the coast of the Gulf, whither he returned in January, 1864, after a well-earned rest at the North. Mobile was now the principal port in the possession of the Confederates in this quarter, and earnestly did the Admiral desire to attack and reduce the forts at the entrance of the bay. But troops were required to invest the forts after the fleet had passed them, and at this moment it seemed that there were no troops to be spared. It was also much to be desired that at least a few monitors should be added to the fleet, but neither were these as yet available. So the time wore on; winter passed into spring and spring into summer, but still the attack was not made. This delay was of incalculable advantage to the enemy, enabling him to complete his preparations. The Confederate force afloat in Mobile Bay was commanded by Admiral Franklin Buchanan. . . . This force consisted of only four vessels, but they nevertheless made an important addition to the defences of the place. Three of them were only paddle-wheel gunboats . . . while the fourth was the iron-clad ram Tennessee . . . the most formidable vessel that the Confederates had ever built. . . . The City of Mobile lies at the head of a long bay, which is about 20 miles wide at its lower end. The greater portion of the bay is very shallow, too shallow even for vessels of moderate draft. The entrance lies between a long sandspit . . . and a shoal. . . . The ship-channel between the shoals, five miles in length, is perhaps half a mile wide at its narrowest point. Two forts guarded the passage,—on the right hand Fort Morgan, on Mobile Point, and on the left Fort Gaines, on Dauphin Island. . . . In addition to the land and naval defences, additional protection had been given by obstructions in the water. A line of piles ran out from Fort Gaines, which was continued nearly across the main ship-channel by a triple line of torpedoes. The eastern end of the row of torpedoes was marked by a red buoy, and between the buoy and Fort Morgan the channel had been left open for blockade runners. The open space, only 100 yards wide, lay directly under the guns of the fort, and it was through this narrow passage that Admiral Farragut intended to carry his fleet. The ships were gradually assembled toward the latter part of July. The Admiral's plan of action was simple, but in the highest degree effective. His fleet consisted of four monitors and fourteen wooden vessels, seven of the latter large and seven small. The wooden vessels were arranged in pairs, as at Port Hudson, each of the larger vessels having a smaller one lashed to her port side, so that if one was disabled the engines of the other would carry both past the forts. The four monitors were placed in a flanking column inshore, between the fleet and Fort Morgan. . . . At six o'clock on the morning of the 5th of August the fleet started with the flood tide. The Admiral took up his position in the port main rigging of the Hartford, so that he might have a good post of observation. [According to accounts given by officers who were on board the Hartford, Admiral Farragut climbed the rigging, after the battle began, in order to get above the thickest of the smoke, and Captain Drayton sent a man to lash him where he stood, so that, if wounded, he might not fall to the deck]. . . . Above the fort, and just beyond the obstructions, lay the Confederate ram Tennessee and her three attendant gunboats. . . . Soon after half-past six the Tecumseh [the leading monitor] fired the first two shots at Fort Morgan. For half an hour after this, the ships advanced in silence. Then the fort opened on the Brooklyn, and presently the whole line of vessels was hotly engaged. Their concentrated fire kept down that of the enemy, and all seemed at this time to be going well with the fleet. The Tecumseh, though all the while advancing, was now silent, reserving her fire for the Tennessee, which lay beyond the obstructions. Captain Craven saw the red buoy, but it seemed so close to the beach that he thought there must have been a mistake in his orders; and altering his course, he headed straight for the Tennessee, passing to the westward of the buoy right over the line of torpedoes. Suddenly there came a frightful explosion; the huge mass of iron gave a lurch first to one side, then to the other; her bow made one downward plunge, her screw was seen for a moment revolving high in air, and she sank to the bottom of the channel. Of 120 men on board only 21 were saved. . . . From the Brooklyn, leading the main column, something was now descried in the water ahead which resembled torpedo-buoys, and the sloop, with the Octorara lashed to her side, suddenly stopped, and in a moment they were backing down on the vessels astern of them. The bows of the two ships turned, falling off towards the fort, so that they blocked up the channel. The Hartford, the Admiral's flag-ship, which was next astern, also stopped to prevent a collision, but she was drifting fast with the Metacomet toward the two vessels ahead, and the Richmond and Port Royal were close upon them, followed by the others. At that moment it seemed as if nothing could save the vessels of the fleet from being thrown into hopeless confusion, massed together as they were directly under the guns of the fort. It was in that moment, at the crisis of the battle, that the calm and dauntless spirit of the Admiral rose to its greatest height. . . . 'Captain Drayton, go ahead! Jouett, full speed!' came the command, in clear, ringing tones from the Admiral's place in the rigging. In a moment the Hartford had turned, and dash-

ing with the Metacomet past the Brooklyn, rushed straight over the barrier. Snap, snap, went the primers of the torpedoes under the bottom of the ship,—the officers and men could hear them,—but no explosion followed, and the Hartford passed safely into the waters above. Meanwhile the four ships lay entangled under Fort Morgan. A collision seemed inevitable, but Captain Jenkins of the Richmond, an officer of cool head and splendid courage, backed away from the others, and began a furious cannonade on the fort with his whole broadside, driving the enemy out of the water-batteries. The Brooklyn was by this means able to recover, and presently she steamed ahead, followed by the Richmond and the rest of the fleet. . . . No sooner was the battle with the fort over than a new battle began with the Tennessee. The moment that the ships had fairly entered the bay, the Confederate ram . . . came charging down the whole line, taking each vessel in turn," but doing no serious injury to any. On the arrival of the monitors, which had lagged behind, "the Tennessee took refuge under the guns of the fort, and the fleet rejoined the Hartford, now four miles up the bay." Meantime the Hartford and the Metacomet had disposed of two of the Confederate gunboats: the Selma, which surrendered, and the Gaines, which had been run ashore and set on fire. The third, the Morgan, took shelter, with the Tennessee, near the fort. "The Hartford had by this time come to anchor, and her crew went to breakfast. The other ships gradually joined her. But the battle was not yet over. It was now a little before nine o'clock, and suddenly the Tennessee was reported approaching." In the battle which ensued, the stout iron-clad was rammed repeatedly by the Monongahela, the Lackawanna, the Hartford and the Ossipee, and pounded by the terrible guns of the monitor Chickasaw, until, with her commander wounded, her tiller-chains and smoke stack gone, her port shutters jammed, and her armor starting from the frame, she raised the white flag. "A few days later the forts surrendered, and Mobile, as a Confederate port, ceased to exist. The fall of the city did not come about until some time afterward; indeed no immediate attempt was made upon it, for the capture of the forts and the occupation of Mobile Bay served every purpose of the Federal Government."—J. R. Soley, *The Sailor Boys of '61, ch.* 13.—"This great victory cost the Union fleet 335 men. . . . The losses in the rebel fleet were 10 killed and 16 wounded—confined to the Tennessee and Selma—and 280 prisoners taken. The loss in the forts is unknown."—L. Farragutt, *Life of David Glasgow Farragut, ch.* 27.

A. D. 1864 (August—October: Virginia).—Sheridan's Victories in the Shenandoah Valley.—Winchester.—Fisher's Hill.—Cedar Creek.—The famous Ride.—"The events of July showed the urgent need of unity of command in Northern Virginia, and the lieutenant-general, in August, consolidated these four departments [of Washington, the Susquehanna, West Virginia and the Middle Department] into one, named the Middle Military Division, under General Hunter. That officer, however, before entering on the proposed campaign, expressed a willingness to be relieved, and General P. H. Sheridan, who had been transferred from the Army of the Potomac to the command of the forces in the field under Hunter, was appointed in his stead." General Sheridan was appointed to the command on the 7th of August, and took the field with an effective force (which included the Sixth and Nineteenth Corps) of 40,000 men, 10,000 being cavalry. "His operations during that month and the fore part of September were mainly confined to manœuvres having for their object to prevent the Confederates from gaining the rich harvests of the Shenandoah Valley. But after once or twice driving Early southward to Strasburg, he each time returned on his path towards Harper's Ferry. General Grant had hesitated in allowing Sheridan to take a real initiative, as defeat would lay open to the enemy the States of Maryland and Pennsylvania before another army could be interposed to check him. Finding, however, while on a personal visit to General Sheridan, in the month of September, that that officer expressed great confidence of success, he authorized him to attack. At this time the Confederate force held the west bank of Opequan Creek, covering Winchester; and the Union force lay in front of Berryville, twenty miles south of Harper's Ferry. The situation of the opposing armies was peculiar: each threatened the communications of the other, and either could bring on a battle at any time. It would appear that General Early had designed assuming the offensive." He made a movement which General Sheridan was prompt to take advantage of, on the morning of September 19th, and a battle ensued—known as the battle of Winchester, but some times called the battle of Opequan Creek—which resulted in a victory for the latter. "It is due to state that there was a great disparity in the numbers engaged—Early's force consisting of 8,500 muskets and 3,000 sabres, while Sheridan's strength was thrice that of the aggregate Confederate force. Sheridan's preponderance in horse enabled him to extend far beyond and overlap the Confederate left, and when, after several hours of indecisive fighting between the infantry, a general advance was, at four P. M., made by the whole line, the cavalry, by an impetuous charge, carried the fortified heights: the Confederates . . . broke in confusion, retiring from the field and through Winchester, with the Union forces in pursuit. Night, however, prevented Sheridan from following up the victory, among the trophies of which were 2,500 prisoners, five pieces of artillery, and nine battle-flags. . . . After his defeat at Winchester, Early did not pause in his southward retreat till he reached Fisher's Hill, near Strasburg, 30 miles south of Winchester. This is a very defensible position, commanding the débouché of the narrow Strasburg valley between the north fork of the Shenandoah River and the North Mountain. On these obstacles Early rested his flank. In front of this position Sheridan arrived on the morning of the 22d and formed his force for a direct attack, while he sent Torbert with two divisions of cavalry by the parallel Luray Valley, to gain New Market, 20 miles in Early's rear. After much manœuvring, and several ineffectual efforts to

force the position, an attack of cavalry was made from the right. Under cover of this mask a corps of infantry was moved to that flank, and by an impetuous assault carried the Confederate left resting on the North Mountain. A general attack in front then disrupted Early's whole line, and the Confederates retired in great disorder, leaving behind 16 pieces of artillery and several hundred prisoners. . . . Early's retreat was not stayed until he reached the lower passes of the Blue Ridge, whither he retired with a loss of half his army. Sheridan, after pushing the pursuit as far as Staunton, and operating destructively against the Virginia Central Railroad, returned and took position behind Cedar Creek near Strasburg. Previously to abandoning the country south of Strasburg, it was laid waste by the destruction of all barns, grain, forage, farming implements, and mills. The desolution of the Palatinate by Turenne was not more complete. On the withdrawal of Sheridan, Early, after a brief respite, and being re-enforced by Kershaw's division of infantry and 600 cavalry from Lee's army, again marched northward down the Valley, and once more ensconced himself at Fisher's Hill. Sheridan continued to hold position on the north bank of Cedar Creek. Nothing more important than cavalry combats, mostly favorable to the Federal arms, took place, until the 19th of October, when Early assumed a bold offensive that was near giving him a victory as complete as the defeat he had suffered. . . . The army was, at this time, temporarily under the command of General Wright — Sheridan being absent at Washington. The position held by the Union force was too formidable to invite open attack, and Early's only opportunity was to make a surprise. This that officer now determined on, and its execution was begun during the night of the 18–19th of October." A flanking column, "favored by a heavy fog . . . attained, unperceived, the rear of the left flank of the Union force, formed by Crook's Corps . . . and rushed into the camp — the troops awaking only to find themselves prisoners. To rally the men in their bewilderment was impossible, and Crook's Corps, being thoroughly broken up, fled in disorder, leaving many guns in the hands of the enemy. As soon as this flank attack was developed, Early, with his other column, emerged from behind the hills west of Cedar Creek, and crossing that stream, struck directly the troops on the right of Crook. This served to complete the disaster, and the whole Union left and centre became a confused mass, against which the Confederates directed the captured artillery (18 guns), while the flanking force swept forward to the main turnpike. Such was the scene on which the light of day dawned. The only force not yet involved in the enemy's onset was the Sixth Corps, which by its position was somewhat in rear. With this General Ricketts quickly executed a change of front, throwing it forward at right angles to its former position, and firmly withstood the enemy's shock. Its chief service was, however, to cover the general retreat which Wright now ordered, as the only practicable means of reuniting his force. . . . At the first good position between Middletown and Newtown, Wright was able to rally and reform the troops, form a compact line, and prepare either to resist further attack or himself resume the offensive. It was at this time, about half-past ten A. M., that General Sheridan arrived upon the field from Winchester, where he had slept the previous night. Hearing the distant sounds of battle rolling up from the south, Sheridan rode post to the front, where arriving, his electric manner had on the troops a very inspiriting effect. General Wright had already brought order out of confusion and made dispositions for attack. . . . A counter-charge was begun at three o'clock in the afternoon. . . . A large part of Early's force, in the intoxication of success, had abandoned their colors and taken to plundering the abandoned Federal camps. The refluent wave was as resistless as the Confederate surge had been. . . . The retreat soon became a rout. . . . In the pursuit all the captured guns were retaken and 23 in addition. The captures included, besides, near 1,500 prisoners. . . . With this defeat of Early all operations of moment in the Shenandoah forever ended," and most of the troops on both sides were recalled to the main field of operations, at Petersburg.—W. Swinton, *Campaigns of the Army of the Potomac, ch.* 12, *pt.* 8.

A. D. 1864 (September—October: Georgia) Atlanta cleared of its former inhabitants.—Sherman's Preparations for the March to the Sea.—Hood's Raid to the rear.—"During the month of September, Sherman's army remained grouped about Atlanta. . . . The Army of the Cumberland, under Major-General Thomas, held Atlanta; the Army of the Tennessee, commanded by Major-General Howard, was at East Point; and the Army of the Ohio occupied Decatur. . . . Sherman now determined to make Atlanta exclusively a military post. On the 4th of September he issued the following orders: 'The city of Atlanta belonging exclusively for warlike purposes, it will at once be vacated by all except the armies of the United States and such civilian employes as may be retained by the proper departments of the Government.'. . . This order fell upon the ears of the inhabitants of Atlanta like a thunderbolt." To a remonstrance addressed to him by the mayor and two councilmen of the city, he replied: "We must have peace, not only at Atlanta, but in all America. To secure this we must stop the war that now desolates our once happy and favored country. To stop the war, we must defeat the rebel armies that are arrayed against the laws and Constitution, which all must respect and obey. To defeat these armies, we must prepare the way to reach them in their recesses. . . . My military plans make it necessary for the inhabitants to go away, and I can only renew my offer of services to make their exodus in any direction as easy and comfortable as possible. . . . War is cruelty and you cannot refine it; and those who brought war on our country deserve all the curses and maledictions a people can pour out. . . . You might as well appeal against the thunder-storm as against

these terrible hardships of war." A truce of ten days was arranged, during which "446 families were moved south, comprising 705 adults, 860 children and 79 servants, with an average of 1,651 pounds of furniture and household goods of all kinds to each family."—S. M. Bowman and R. B. Irwin, *Sherman and his Campaigns, ch.* 18.—"Gen. Hood, meanwhile, kept his forces in the neighborhood of Jonesboro, receiving his supplies by the Macon road. His army numbered about 40,000 men, exclusive of the Georgia militia; and, as if to show that no immediate offensive movement was contemplated, the latter were withdrawn from him by Gov. Brown soon after the evacuation of Atlanta. . . . To allow their principal Southern army to rust in inactivity, was not however the intention of the rebel authorites. . . . Something must be done, and that speedily, to arrest the progress of the Federal army, or Georgia and perhaps the Gulf States, would be irretrievably lost. . . . The whole army of Gen. Hood, it was decided, should rapidly move in a compact body to the rear of Atlanta, and, after breaking up the railroad between the Chattahoochee and Chattanooga, push on to Bridgeport and destroy the great railroad bridge spanning the Tennessee River at that place. Should this be accomplished, Atlanta would be isolated from Chattanooga, and the latter in turn isolated from Nashville, and Gen. Sherman, cut off from his primary and secondary bases, would find Atlanta but a barren conquest to be relinquished almost as soon as gained, and would be obliged to return to Tennessee. Atlanta would then fall from lack of provisions, or in consequence of the successful attacks of the Georgia militia. In connection with this movement, Gen. Forrest, confessedly their ablest cavalry officer, was already operating in Southern Tennessee. . . . A week sufficed to complete Gen. Hood's arrangements, and by the 2d of October his army was across the Chattahoochee and on the march to Dallas, where the different corps were directed to concentrate. At this point he was enabled to threaten Rome and Kingston, as well as the fortified places on the railroad to Chattanooga; and there remained open, in case of defeat, a line of retreat southwest into Alabama. From Dallas he advanced east toward the railroad, and, on the 4th, captured the insignificant stations of Big Shanty and Ackworth, effecting a thorough destruction of the road between the two places. He also sent a division under Gen. French to capture the Federal post at Allatoona Pass, where he had ascertained that a million and a half of rations for the Federal army were stored, on which he probably depended to replenish his commissariat. . . . Gen. Sherman, . . . immediately upon hearing that Gen. Hood had crossed the Chattahoochee, . . . despatched Gen. Corse with reënforcements to Rome, which he supposed the enemy were aiming at. During the previous week he had sent Gen. Thomas with troops to Nashville to look after Forrest. His bridges having meanwhile been carried away by a freshet which filled the Chattahoochee, he was unable to move his main body until the 4th, when three pontoons were laid down, over which the armies of the Cumberland, the Tennessee, and the Ohio crossed, and took up their march in the direction of Marietta, with 15 days' rations. The 20th corps, Gen. Slocum, was left to garrison Atlanta. Learning that the enemy had captured Big Shanty and Ackworth, and were threatening Allatoona, and alive to the imperative necessity of holding the latter place, Gen. Sherman at once communicated by signals instruction to Gen. Corse at Rome to reënforce the small garrison and hold the defences until the main body of the Federal army could come to his assistance. Upon receiving the message Gen. Corse placed 900 men on the cars, and reached Allatoona before the attack of French. With this addition the garrison numbered 1,700 men, with six guns. Early on the morning of the 5th, Gen. French, with 7,000 troops, approached Allatoona, and summoned the Federal commander, 'in order to save the unnecessary effusion of blood,' to make an immediate surrender; to which the latter replied: 'I shall not surrender, and you can commence the unnecessary effusion of blood whenever you please.' The battle opened at 8 A. M., and was waged hotly until 2 o'clock in the afternoon. Driven from fort to fort, until they reached their last defence, the garrison fought with an obstinacy and desperation worthy of the great stake for which they contended. Their general was wounded early in the action, but relaxed in no degree his efforts to repel the enemy. . . . During the heat of the contest Gen. Sherman reached the summit of Kenesaw Mountain, whence he repeatedly signalled to Gen. Corse to hold out to the last. The announcement of approaching succor animated the garrison to renewed exertions, and they threw back the assaulting columns of the enemy again and again, finally compelling them to retire, beaten and disheartened, in the direction of Dallas. Their retreat was hastened by the rapid approach of Stanley's (4th) corps from the direction of Pine Mountain. The enemy left 700 to 800 killed, wounded and prisoners in the hands of the Federals, and their total loss must have exceeded 1,000. The garrison lost 600 men. The town of Allatoona was reduced to a mere wreck by the severe fire of the enemy, and all the Federal artillery and cavalry horses were killed; but the valuable stores were saved, and the fort and pass held. The only important injury done by the rebels, was the destruction of six or seven miles of railroad between Big Shanty and Allatoona, which Gen. Sherman immediately commenced to repair. For several days subsequent to the fight at Allatoona, Gen. Sherman remained in the latter place, watching the movements of Hood, who, he suspected, would march for Rome, and thence toward Bridgeport, or else to Kingston. . . . Gen. Hood, however, crossing the Etowah and avoiding Rome, moved directly north, and on the 12th Stuart's corps of his army appeared in front of Resaca, the defences of which were held by Col. Weaver with 600 men and three pieces of artillery. . . . No serious attack was made upon the garrison, the enemy being more intent upon destroying the railroad toward Dalton than wasting their time or strength upon the reduction of a post, the possession of which they wisely considered would be of no particular advantage to them. . . . Meanwhile the rebel army, pursuing its devastating march north, reached Dalton on the 14th. . . . The 14th and 15th were employed by the enemy in continuing the destruction of the railroad as far as Tunnel Hill. . . . The approach of the Federal columns now warned Gen. Hood

to move off to the west, and the 16th found him in full retreat for Lafayette, followed by Gen. Sherman. . . . From Lafayette the enemy retreated in a southwesterly direction into Alabama through a broken and mountainous country, but scantily supplied with food for man or beast; and passing through Summerville, Gaylesville, and Blue Pond, halted at Gadsdens, on the Coosa River, 75 miles from Lafayette. Here he paused for several days, receiving a few reënforcements brought up by Gen. Beauregard, who had on the 17th assumed command of the Confederate military division of the West. . . . Gen. Hood still retained his special command, subject to the supervision or direction of Gen. Beauregard, and his army, after remaining a few days in Gadsden, moved, about the 1st of November, for Warrington, on the Tennessee River, 30 miles distant. Gen. Sherman meanwhile remained at Gaylesville, which place his main body reached about the 21st, watching the enemy's movements. . . . Whatever . . . might be the final result of Hood's flanking movement, it had entirely failed to interrupt the Federal communications to a degree that would compel the evacuation of Atlanta. . . . In the light of subsequent events it would now appear that Gen. Sherman, making only a show of following his adversary, deliberately lured him into Northern Alabama, for the purpose of pursuing an uninterrupted march with his own army through the heart of Georgia. The ill-advised plan of Gen. Hood had given him the very opportunity which he desired, and he prepared at once to avail himself of it."—W. J. Tenney, *Military and Naval History in the United States, ch.* 45.

A. D. 1864 (October).—Report on secret disloyal associations in the North.—Knights of the Golden Circle, etc.—"During more than a year past [this report bears date October 8, 1864], it has been generally known to our military authorities that a secret and treasonable organization, affiliated with the Southern Rebellion, and chiefly military in its character, has been rapidly extending itself throughout the West. A variety of agencies . . . have been employed, and successfully, to ascertain its nature and extent, as well as its aims and its results; and, as this investigation has led to the arrest, in several States, of a number of its prominent members, as dangerous public enemies, it has been deemed proper to set forth in full the acts and purposes of this organization. . . . This secret association first developed itself in the West in the year 1862, about the period [August] of the first conscription of troops, which it aimed to obstruct and resist. Originally known in certain localities as the 'Mutual Protection Society,' the 'Circle of Honor,' or the 'Circle' or 'Knights of the Mighty Host,' but more widely as the 'Knights of the Golden Circle,' it was simply an inspiration of the Rebellion, being little other than an extension, among the disloyal and disaffected at the North, of the association of the latter name, which had existed for some years at the South [see Golden Circle, Knights of], and from which it derived all the chief features of its organization. During the Summer and Fall of 1863, the Order, both at the North and South, underwent some modifications as well as a change of name. In consequence of a partial exposure which had been made of the signs and ritual of the Knights of the Golden Circle, Sterling Price had instituted, as its successor in Missouri, a secret political association, which he called the Corps de Belgique, or Southern League, his principal coadjutor being Charles L. Hunt, of St. Louis, then Belgian Consul at that city. . . . Meanwhile, also, there had been instituted at the North, in the autumn of 1863, by sundry disloyal persons, prominent among whom were Vallandigham and P. C. Wright, of New York, a secret, Order intended to be general throughout the country . . . and which was termed, and has since been widely known as the O. A. K., or 'Order of American Knights.' . . . The secret signs and character of the Order having become known to our military authorities, further modifications in the ritual and forms were introduced, and its name was finally changed to that of the O. S. L., or 'Order of the Sons of Liberty,' or the 'Knights of the Order of the Sons of Liberty.' These later changes are represented to have been first instituted . . . in May last [1864], but the new name was at once generally adopted throughout the West, though in some localities the association is still better known as the 'Order of American Knights.' Meanwhile, also, the Order has received certain local designations. In parts of Illinois it has been called at times the 'Peace Organization,' in Kentucky the 'Star Organization,' and in Missouri the 'American Organization;' these, however, being apparently names used outside of the lodges of the Order. Its members have also been familiarly designated as 'Butternuts' by the country people of Illinois, Indiana, and Ohio. . . . The 'Temples' or 'Lodges' of the Order are numerously scattered through the States of Indiana, Illinois, Ohio, Missouri, and Kentucky. They are also officially reported as established, to a less extent, in Michigan and the other Western States, as well as in New York, Pennsylvania, New Hampshire, Rhode Island, Connecticut, New Jersey, Maryland, Delaware, and Tennessee. . . . It has been asserted by delegates to the Supreme Council of February last, that the number was there represented to be from 800,000 to 1,000,000; but Vallandigham, in his speech last summer at Dayton, Ohio, placed it at 500,000, which is probably much nearer the true total. . . . Although the Order has, from the outset, partaken of the military character, it was not till the summer or fall of 1863 that it began to be generally organized as an armed body. . . . In March last the entire armed force of the Order capable of being mobilized for effective service was represented to be 340,000 men."—J. Holt, *Judge Advocate General's Rept. on Secret Associations and Conspiracies against the Government.*

A. D. 1864 (October).—The St. Albans Raid.—"Along the Northern border . . . the rebel agents, sent thither on 'detached service' by the Rebel Government, were active in movements intended to terrify and harass the people. On the 19th of October, a party of them made a raid into St. Albans, Vermont, robbing the banks there, and making their escape across the lines into Canada with their plunder, having killed one of the citizens in their attack. Pursuit was made, and several of the marauders were arrested in Canada. Proceedings were commenced to procure their extradition [which were protracted until after the close of the war]. . . . The Government received information that this affair was but one of a projected series, and that similar attempts would be made all along the frontier. More than this, there were threats, followed by actual attempts, to set fire to the principal Northern cities."—H. J. Raymond, *Life and Public Services of Abraham Lincoln, p.* 611.

A. D. 1864 (October: North Carolina).—The destruction of the ram Albemarle.—The ram Albemarle, which had proved in the spring so dangerous an antagonist to the blockading vessels in the North Carolina Sounds [see above: A. D. 1864 (April—May: North Carolina)], was still lying at Plymouth, in the Roanoke River, and another attack from her was feared by the fleet. "She was finally destroyed by a brave young lieutenant, William B. Cushing, who blew her up with a torpedo. Though only twenty years old, he was one of the most daring officers in the navy, and he had become noted for his fearlessness in the expeditions in the sounds and rivers of North Carolina. One dark night (Oct. 27) he set out from the fleet in a steam launch — a long open boat used by naval vessels — with a crew of thirteen officers and men. The launch was fitted with a torpedo which could be run out forward on the end of a long boom so as to be thrust under the vessel to be attacked. Cushing got within sixty feet of the Albemarle before his boat was seen. The guards then shouted the alarm, rang the boat's bell, and began firing their muskets at the launch. There was a raft of logs thirty feet wide around the Albemarle to protect her from just such attacks, but Cushing ran the bow of the launch upon the logs, lowered the boom so that the torpedo came right under the side of the vessel, and fired it. At the same moment a shot from one of the great guns of the ram crashed through the launch, and it was overwhelmed by a flood of water thrown up by the explosion of the torpedo. The Confederates called out to Cushing to surrender, but he refused, and ordering his men to save themselves as they best could, he sprang into the water amid a shower of musket balls and swam down the river. He succeeded in reaching the shore, almost exhausted, and hid himself during the next day in a swamp, where he was cared for by some negroes. From them he heard that the Albemarle had been sunk by his torpedo. The next night he found a small boat in a creek, paddled in it down the river, and before midnight was safe on board one of the vessels of the fleet. Only one other man of the party escaped, all the rest being either drowned or captured. The Albemarle being thus put out of the way, Plymouth was recaptured a few days afterward."—J. D. Champlin, Jr., *Young Folks' Hist. of the War for the Union, ch.* 33.

A. D. 1864 (November: Tennessee).—Hood's advance Northward.—The Battle of Franklin.—When General Sherman started on his march to the sea General Thomas was left to oppose Hood. "The force Thomas had for this purpose was curiously small, considering how formidable Hood's army had been in the Atlanta Campaign, and still was. All Thomas had for immediate field service were the Fourth and Twenty-Third Corps, numbering together about 22,000 infantry, and also about 3,000 cavalry. These troops were sent to Pulaski, Tennessee, in command of General Schofield, Thomas, himself remaining at Nashville. A little after the middle of November, 1864, Hood crossed the Tennessee River and inaugurated his campaign by a flank movement. He made a rapid march upon Columbia, with the view of getting in behind Schofield, who was at Pulaski. But Schofield retired to Columbia in time to frustrate Hood's plans. The two armies remained in close proximity to each other at Columbia until November 28th, when Hood made another skilfully-planned flank movement . . . to Spring Hill, in rear of Schofield. Again Hood was foiled. . . . General Thomas at Nashville wanted the Confederates held back as long as possible, in order that he might have time to receive there his expected reinforcement of A. J. Smith's corps. It was, therefore, Schofield's duty to check Hood's advance as long as he could. . . . He started General Stanley, with a division of 5,000 men, and a great part of his artillery, to Spring Hill (12 miles north of Columbia) early in the morning. He put two other divisions on the road. He held one division in front of Columbia, and prevented the enemy from crossing the river during the entire day, and also that night. Stanley reached Spring Hill in time to prevent Hood from occupying that place. He skirmished and fought with Hood's advance troops at Spring Hill during the afternoon of November 29th. . . . Schofield . . . accomplished exactly what he believed he could accomplish. He held back his enemy at Columbia with one hand and fenced off the blow at Spring Hill with the other. . . . The beneficial result of all this bold management of Schofield, November 29th, was apparent the next day in the battle of Franklin. Hood fought that great battle practically without his artillery. He only had the two batteries which he took with him on his detour to Spring Hill. Those two he used. . . . But his vast supply of artillery had all been detained at Columbia too long to be of any service at the time and place it was most needed. . . . The Federal troops left Spring Hill in the night for Franklin, ten miles distant. Early in the morning of November 30th they began to arrive at Franklin, and were placed in position covering the town. Early the same morning the Confederates moved up from Spring Hill, following hard upon the rearmost of the Federals. . . . General Stanley says, in his

official report: 'From one o'clock until four in the evening, the enemy's entire force was in sight and forming for attack. Yet, in view of the strong position we held, and reasoning from the former course of the rebels during the campaign, nothing appeared so improbable as that they would assault.'" The assault was made, however, with a terrible persistency which proved the ruin of Hood's army, for it failed. "The Confederate loss in this dreadful battle can be estimated from data given. There is good authority for stating the killed at 1,750. The usual proportion of killed and wounded is four or five to one. This would make the killed and wounded not less than 7,000 or 8,000. The attacking force numbered full 20,000. . . . Hood's loss was, indeed, more than one-third of the attacking force. The Federal loss was much smaller, being 1,222 killed and wounded. . . . One of the features of this battle was the enormous expenditure of ammunition [100 wagon loads] in the short time of its duration. . . . The expenditure of so much ammunition produced a dense smoke, which hung over the field, and brought on sudden darkness, like an eclipse. So noticeable was this phenomenon, it is mentioned in all the official reports. . . . In the darkness of the night the battle ended. The Confederates desisted, and the Federal line became quiet. . . . In their front, and so near that the outstretched hand could almost reach them, were thousands of men in the agonies of death. The wail that went up from that field as the thunder of the battle ceased can never be forgotten by those who heard it. . . . The [Federal] troops were quietly withdrawn before midnight. A silent rapid march brought them to Nashville the next morning, and weary with fighting and marching they bivouacked in the blue grass pastures under the guns of Fort Negley."—T. Speed, *The Battle of Franklin* (*Sketches of War Hist., Ohio Commandery L. L. of the U. S., v.* 3).

A. D. 1864 (November—December: Georgia). —Sherman's March to the Sea.—"It was at Alatoona [see above: (SEPTEMBER—OCTOBER)], probably, that Sherman first realized that, with the forces at his disposal, the keeping open of his line of communications with the North would be impossible if he expected to retain any force with which to operate offensively beyond Atlanta. He proposed, therefore, to destroy the roads back to Chattanooga, when all ready to move, and leave the latter place garrisoned. . . . Sherman thought Hood would follow him, though he proposed to prepare for the contingency of the latter moving the other way while he was moving south, by making Thomas strong enough to hold Tennessee and Kentucky. I myself [writes General Grant] was thoroughly satisfied that Hood would go north, as he did. On the 2d of November I telegraphed Sherman authorizing him definitely to move according to the plan he had proposed: that is, cutting loose from his base, giving up Atlanta and the railroad back to Chattanooga. . . . Atlanta was destroyed so far as to render it worthless for military purposes before starting, Sherman himself remaining over a day to superintend the work and see that it was well done. Sherman's orders for this campaign were perfect. Before starting, he had sent back all sick, disabled and weak men, retaining nothing but the hardy, well-inured soldiers to accompany him on his long march in prospect. . . . The army was expected to live on the country. . . . Each brigade furnished a company to gather supplies of forage and provisions for the command to which they belonged. . . . The skill of these men, called by themselves and the army 'bummers,' in collecting their loads and getting back to their respective commands, was marvellous."—U. S. Grant, *Personal Memoirs, ch.* 59 (*v.* 2). —All preparations being completed, General Sherman caused the foundries, mills and shops of every kind in Rome to be destroyed on the 10th of November, and "started on the 12th with his full staff from Kingston to Atlanta. . . . As Sherman rode towards Atlanta that night he met railroad trains going to the rear with furious speed. He was profoundly impressed with the strange aspect of affairs: two hostile armies marching in opposite directions, each in the full belief that it was achieving a final and conclusive result in the great war. 'I was strongly inspired,' he writes, 'with a feeling that the movement on our part was a direct attack upon the rebel army and the rebel capital at Richmond, though a full thousand miles of hostile country intervened; and that for better or worse it would end the war.' The result was a magnificent vindication of this soldierly intuition. His army consisted in round numbers of 60,000 men, the most perfect in strength, health, and intelligence that ever went to war. He had thoroughly purged it of all inefficient material, sending to the rear all organizations and even all individuals that he thought would be a drag upon his celerity or strength. His right wing, under Howard, consisted of the Fifteenth Corps, commanded by Osterhaus, in the absence of John A. Logan; and the Seventeenth Corps, commanded by Frank P. Blair, Jr. The left wing, commanded by Slocum, comprised the Fourteenth Corps, under Jeff. C. Davis, and the Twentieth Corps, under A. S. Williams. In his general orders he had not intimated to the army the object of their march. 'It is sufficient for you to know,' he said, 'that it involves a departure from our present base and a long, difficult march to a new one.' His special field orders are a model of clearness and conciseness. The habitual order of march was to be, wherever practicable, by four roads as nearly parallel as possible, and converging at points to be indicated from time to time. There was to be no general train of supplies; behind each regiment should follow one wagon and one ambulance; a due proportion of wagons for ammunition and provision behind each brigade; the separate columns were to start at seven in the morning and make about fifteen miles a day. The army was to subsist liberally on the country; forage parties, under the command of discreet officers, were to gather near the routes traveled whatever was needed by the command, aiming to keep in the wagons a reserve of at least ten days' provisions; soldiers were strictly forbidden to enter dwellings of inhabitants or commit trespasses; the power to destroy mills, houses, cotton gins, etc., was intrusted to corps commanders alone. No destruction of property was to be permitted in districts where the army was unmolested; but relentless devastation was ordered in case of the

manifestation of local hostility by the shooting of soldiers or the burning of bridges. . . . Precisely at seven o'clock on the morning of the 16th of November the great army started on its march. A band struck up the anthem of 'John Brown's body lies a-moldering in the grave'; the soldiers caught up the refrain, and, to the swelling chorus of 'Glory, Hallelujah,' the great march was begun. The month that followed will always remain to those 60,000 men the most romantic and inspiring memory of their lives. The weather was favorable all the way; to veterans the marches were of reasonable length; the work of destroying the Southern railroads was so easy to their experienced hands that it hardly delayed the day's march. With the exception of the affair on the 22d of November, when P. J. Phillips with a division of Smith's Georgia troops attacked C. C. Walcutt's Brigade, which was marching as the rear-guard of the right wing at Griswoldville, and met with a severe repulse, and a series of cavalry fights between Wheeler and Kilpatrick near Waynesboro', there was no fighting to do between Atlanta and Savannah. A swarm of militia and irregular cavalry hung, it is true, about the front and flank of the marching army, but were hardly a source of more annoyance than so many mosquitoes would have been. The foragers brought in every evening their heterogeneous supplies from the outlying plantations, and although they had to defend themselves every day from scattered forces of the enemy, the casualties which they reported each evening were insignificant. The utmost efforts of Sherman and his officers to induce the negroes to remain quietly at home were not entirely successful. The promise of freedom which was to come to them from the victory of the Union cause was too vague and indefinite to content them. . . . The simple-hearted freedmen gathered in an ever-increasing cloud in rear of the army; and when the campaign was over they peopled the sea-islands of Georgia and furnished, after the war, the principal employment of the Freedmen's Commission. The march produced an extraordinary effervescence throughout the Confederacy. If words could avail anything against heavy battalions, Sherman would have been annihilated in his first day's march. . . . As Sherman drew near to Milledgeville on the 23d of November the Georgia Legislature passed an act to levy the population en masse; but this act of desperate legislation had no effect in checking the march of the 'Yankees,' and the Governor, State officers, and Legislature fled in the utmost confusion as Sherman entered the place. The Union general occupied the Executive Mansion for a day; some of the soldiers went to the State House, organized themselves into a constituent assembly, and after a spirited mock-serious debate, repealed the ordinance of secession. Sherman took the greatest possible pains to prevent any damage to the city and marched out on the 24th on the way to Millen. . . . Finding it impossible to stop him, the Georgia State troops by sharp marching had made their way directly to the vicinity of Savannah, where Sherman himself arrived and invested the city from the Savannah to the little Ogeechee River, on the 10th of December."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 9, *ch.* 20.—On the 13th, Fort McAllister, which commanded the Ogeechee River, was stormed and taken by Hazen's division, and communication was opened with Admiral Dahlgren, and with General Foster, the Union commander at Port Royal. On the 17th, General Hardee, the Confederate commander at Savannah, refused a demand for the surrender of the city, but on the night of the 20th he escaped, with his forces, and on the 22d General Sherman telegraphed to President Lincoln: "I beg to present to you as a Christmas gift the city of Savannah, with 150 heavy guns and plenty of ammunition; also about 25,000 bales of cotton."

Sherman, *Memoirs, ch.* 20 (*v.* 2).—G. W. Nichols, *The Story of the Great March.*—W. B. Hazen, *Narrative of Military Service, ch.* 21–22.

A. D. 1864 (December: Tennessee).—The Battle of Nashville and the destruction of Hood's army.—After the battle of Franklin—see above: (NOVEMBER: TENNESSEE)—Hood went forward to Nashville, with his badly shaken army, and invested that place. Thomas was strongly fortified, and quietly took his time to make ready before striking his audacious antagonist, unmoved by repeated demands for an advance, from the War Office, the President, and General Grant. "With all just confidence in Thomas' ability, the entire North insisted on instant action, and Grant finally ordered Thomas either to move upon Hood at once or else turn over the command to Schofield. Thomas quietly replied that he would cheerfully do the latter, if directed, but would not attack Hood until he was satisfied that the time was ripe. He desired both favorable weather and to increase his force of mounted men. But the enemy was devastating a considerable part of Tennessee and was forcing all the young men into their ranks; and every one was fearful of a repetition of Bragg's march to the Ohio in 1862. Logan was finally ordered to Nashville to supplant Thomas. But before he could reach the ground, Thomas had struck his blow. His preparations had been two weeks before substantially completed. Small detachments were at Murfreesboro', Chattanooga, and along the railroad. This latter had been, however, interrupted by Hood for a number of days. A heavy storm of sleet and ice had made the country almost impassable and would render the operations of the attacking party uncertain. Thomas had made up his mind to wait for clearing weather. Finally came sunshine and with it Thomas' advance. Hood lay in his front, with Stewart on his left, Lee in the centre and Cheatham on the right, while a portion of Forrest's cavalry was operating out upon his left. He had some 44,000 men, but his check and heavy losses at Franklin had seriously impaired the 'morale' of his army as well as thinned his ranks. Hood could, however, not retreat. He was committed to a death-struggle with Thomas. It was his last chance as a soldier. The Union general had placed A. J. Smith on his right, the Fourth corps in the centre, and Schofield on the left. He advanced on Hood, bearing heavily with his right, while sharply demonstrating with his left. The position of the Confederate Army had placed A. J. Smith's corps obliquely to their general line of battle, an advantage not to be neglected. Smith pushed

in, later supported by Schofield, and successively capturing the field-works erected by the enemy's main line and reserves, disastrously crushed Hood's left flank. Meanwhile Wood was making all but equal headway against Hood's right, and the first day closed with remarkable success for the amount of loss sustained. Still this was not victory. The morrow might bring reverse. Hood's fight promised to be with clenched teeth. Hood seriously missed Forrest, whom he had detached on a raiding excursion and without whose cavalry his flanks were naked. Cheatham he moved during the night over from the right to sustain his left, which had proved the weaker wing. On the morning of the next day he lay intrenched upon the hills back of his former line, with either flank somewhat refused. Thomas sent Wilson with his cavalry to work his way unobserved around the extreme left flank thus thrown back. At 4 P. M. a general assault was made all along the line. Upon our left, Wood's advance did not meet with success. On the right, however, A. J. Smith's onset, concentrated at the salient of Hood's left centre, proved heavy enough to break down the Confederate defense. Sharply following up his successes, allowing no breathing time to the exultant troops, Smith pushed well home, and overcoming all resistance, drove the enemy in wild confusion from the field. Meanwhile Wilson's troopers, dismounted, fell upon the Confederate flank and rear and increased the wreck tenfold. This advantage again enabled Wood to make some headway, and with renewed joint effort the rout of the enemy became overwhelming. Almost all organization was lost in Hood's army as it fled across the country towards Franklin. Pursuit was promptly undertaken, but though seriously harassed, Hood saved himself beyond the Tennessee river with the remnants of his army. Thomas' losses were 3,000 men, Hood's were never officially given, but our trophies included 4,500 prisoners and 53 guns. Thomas had settled all adverse speculation upon his slowness in attacking Hood by the next to annihilation he wrought when he actually moved upon him. No army was so completely overthrown during our war."—T. A. Dodge, *Bird's-Eye View of our Civil War, ch.* 58.

Coppée, *General Thomas, ch.* 11–12.

A. D. 1864-1865 (December — January: North Carolina).— The Capture of Fort Fisher.— "In the latter part of 1864 two ports only, Wilmington and Charleston, remained to the Confederates. . . . The northward march of Sherman would cut off Charleston, too, so that the Confederates would have to abandon it. The National government now desired to complete its work by capturing Fort Fisher, and thus finally shutting off the Confederacy from all communication with the foreign world. The accomplishment of this task was in no wise easy. . . . The army and navy co-operated in the attempts to reduce Fort Fisher. There were more than 50 men-of-war tossing on the waves before the lowering sea-front of the work. Six thousand five hundred men were in the military force. They were in command of General B. F. Butler, whom we saw last in New Orleans. The General's active and ingenious mind conceived a plan for destroying the fort without sacrificing a single Federal soldier. He procured an old gunboat, painted it white and otherwise disguised it, so as to look like a blockade-runner, stored 250 tons of gunpowder in its hold with fuses penetrating every part, ran the craft in within 1,500 feet of the works and exploded it. Butler expected that the shock would demolish the seaward face of the fort altogether, and perhaps bury the guns under great masses of sand, but in this he was mistaken, for the heavy bastions were not in the least disturbed by the shock. . . . The navy then took its turn, and for some hours the heavy vessels of Admiral Porter's fleet poured so rapid and well aimed a fire upon the work, that the garrison were driven from their guns, and only the occasional report of a heavy cannon told that the fort was still tenanted. But secure in their heavy bomb-proofs, the garrison minded the storm of shells and solid shot no more than the well-housed farmer heeds a hail-storm. It was very clear that Fort Fisher could not be taken at long range. . . . The original plan had contemplated an assault as soon as the fire of the fleet should have silenced the guns of the fort, and in pursuance of this 700 men had been landed from the army transports. But the weather was too rough to permit of landing more troops that day, and the next morning General Butler concluded that Fort Fisher was impregnable, withdrew his men already landed, and sailed away, greatly to the disgust of the navy. This was on the 25th of December, 1864. The chagrin of the whole North over the failure of the expedition was so great that it was speedily determined to renew the attempt. January 13th saw a new Federal force, this time under command of General A. H. Terry, landing on the shore of the sandy neck of land above the fort. . . . At early dawn of the 15th the attack was begun. The ships arranged in a great semicircle poured their fire upon the fort, dismantling guns, driving the garrison to the bomb-proofs, and mowing down the stockade. A line of sharpshooters, each carrying a shovel in one hand and a gun in the other, spring out from Terry's most advanced lines, rush forward to within 175 yards of the fort and dig pits for their protection before the Confederates can attack them. Then the sharpshooters and the navy occupy the attention of the enemy, while Curtis's brigade dashes forward and digs a trench within 500 yards of the fort. By this time too a party of 2,000 sailors and marines has been landed from the fleet. They are to storm the sea-wall of the fort while the army attacks its landward face. Suddenly the thunder of the naval artillery is stilled. There is a moment of silence, and then the shrill scream of the whistles rises from every steamer in the fleet. It is the signal for the assault. The sailors on the beach spring to their feet and dash forward at a rapid run; they fire no shot, for they carry no guns. Cutlasses and pistols, the blue-jackets' traditional weapons, are their only arms. Toward the other side of the fort came Terry's troops. . . . The fate of the naval column is quickly determined. Upon it is concentrated the fire of the heaviest Confederate batteries, Napoleon guns, Columbiads, and

rifles shotted with grape and cannister. The blue-jackets, unable to reply to this murderous fire, and seeing their companions falling fast around them, waver, halt, and fall back to the beach, throwing themselves upon the ground to escape the enemy's missiles. But though repulsed they have contributed largely to the capture of the fort. While the chief attention of Confederates has been directed toward them, the troops have been carrying all before them on the other front. Colonel Lamb turns from his direction of the defense against the naval column to see three Union flags waving over other portions of the work. . . . The Confederates were determined, even desperate. Long after the fort was virtually in the hands of its captors they stubbornly clung to a bomb-proof. Finally they retreated to Battery Buchanan and there maintained themselves stoutly until late at night when, all hope being at an end, they surrendered themselves, and the National victory was complete."—W. J. Abbot, *Battle-Fields and Victory, ch.* 15.

A. D. 1865 (January).—Congressional adoption of the Thirteenth Amendment.—"On the last day of [January, 1865] . . . one of the grandest events of the century was witnessed in the House of Representatives in the final passage of the Constitutional Amendment [the Thirteenth] forever prohibiting slavery. Numerous propositions on the subject had been submitted, but the honor of drafting the one adopted belongs to Lyman Trumbull, who had introduced it early in the first session of this Congress. It passed the Senate on the 8th of April, 1864, only six members voting against it, . . . but failed in the House on the 15th of June following. It now came up on the motion of Mr. Ashley to reconsider this vote. Congress had abolished slavery in the District of Columbia, and prohibited it in all the Territories. It had repealed the Fugitive Slave law, and declared free all negro soldiers in the Union armies and their families; and the President had played his grand part in the Proclamation of Emancipation. But the question now to be decided completely overshadowed all others. The debate on the subject had been protracted and very spirited. . . . The time for the momentous vote had now come, and no language could describe the solemnity and impressiveness of the spectacle pending the roll-call. The success of the measure had been considered very doubtful, and depended upon certain negotiations, the result of which was not fully assured, and the particulars of which never reached the public. The anxiety and suspense during the balloting produced a deathly stillness, but when it became certainly known that the measure had prevailed the cheering in the densely-packed hall and galleries surpassed all precedent and beggared all description. Members joined in the general shouting, which was kept up for several minutes, many embracing each other, and others completely surrendering themselves to their tears of joy. It seemed to me I had been born into a new life."—G. W. Julian, *Political Recollections, ch.* 11.—"The Joint Resolution passed [the House of Representatives, on the 31st of January], 119 to 56, 8 not voting, 10 Democrats voting aye. . . . It was the greatest day the House had ever seen, nor is it likely ever to see a greater."—O. J. Hollister, *Life of Schuyler Colfax, p.* 245.—The Thirteenth Amendment, which was ratified before the close of the year by three-fourths of the States, and its embodiment in the Constitution of the United States proclaimed by the Secretary of State on the 18th of December, 1865, is as follows: "Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction. Section 2. Congress shall have power to enforce this article by appropriate legislation."

A. D. 1865 (February).—The Hampton Roads Peace Conference.—"Several informal attempts at opening negotiations for the termination of hostilities were made in the course of this Winter—Hon. Francis P. Blair, of Maryland, visiting Richmond twice on the subject, with the consent, though not by the request, of President Lincoln. At length, upon their direct application, Messrs. Alex. H. Stephens, John A. Campbell, and Robert M. T. Hunter, were permitted to pass Gen. Grant's lines before Petersburg, and proceed to Fortress Monroe; where [on board a steamer in Hampton Roads] they were met by Gov. Seward, followed by President Lincoln; and a free, full conference was had."—H. Greeley, *The American Conflict, v.* 2, *ch.* 30.—Secretary Seward first went to meet the three Confederate Commissioners, with the following letter of instructions from President Lincoln, dated January 31, 1865: "Hon. William H. Seward, Secretary of State: You will proceed to Fortress Monroe, Virginia, there to meet and informally confer with Messrs. Stephens, Hunter, and Campbell, on the basis of my letter to F. P. Blair, Esq., of January 18, 1865, a copy of which you have. You will make known to them that three things are indispensable, to wit: 1. The restoration of the national authority throughout all the States. 2. No receding by the executive of the United States on the slavery question from the position assumed thereon in the late annual message to Congress, and in preceding documents. 3. No cessation of hostilities short of an end of the war and the disbanding of all forces hostile to the government. You will inform them that all propositions of theirs, not inconsistent with the above, will be considered and passed upon in a spirit of sincere liberality. You will hear all they may choose to say, and report it to me. You will not assume to definitely consummate anything. Yours, etc., Abraham Lincoln." Two days later, the President followed him, persuaded by a telegram from General Grant to meet the Commissioners personally. In a subsequent message to the Senate, Mr. Lincoln reported the results of the conference as follows: "On the morning of the 3d, the three gentlemen, Messrs. Stephens, Hunter, and Campbell, came aboard of our steamer, and had an interview with the Secretary of State and myself, of several hours' duration. No question of preliminaries to the meeting was then and there made or mentioned. No other person was present; no papers were exchanged or produced; and it was, in advance, agreed that the conversation was to be informal and verbal merely. On our part the whole substance of the instructions to the Secretary of State, hereinbe-

fore recited, was stated and insisted upon, and nothing was said inconsistent therewith; while, by the other party, it was not said that in any event or on any condition, they ever would consent to reunion; and yet they equally omitted to declare that they never would so consent. They seemed to desire a postponement of that question, and the adoption of some other course first which, as some of them seemed to argue, might or might not lead to reunion; but which course, we thought, would amount to an indefinite postponement. The conference ended without result."— A. Lincoln, *Complete Works, v.* 2, *pp.* 644–649.

A. D. 1865 (February: South Carolina).—Evacuation of Charleston by the Confederates.—Federal occupation of the City.—While General Hardee, with 14,000 men, waited at Charleston for the expected coming of General Sherman to attack that city, the latter pursued a movement which made Charleston untenable and shook it like a ripened apple into the hands of General Gillmore, who was waiting at the gates. The Confederates evacuated the city in haste and with reckless disorder, and it was occupied by the Federal troops on the morning of the 18th of February. The following is the report of Colonel A. G. Bennett, who was the first to enter the city: "On the morning of February the 18th I received information that led me to believe the defences and lines guarding the city of Charleston had been deserted by the enemy. I immediately proceeded to Cummings Point, from whence I sent a small boat in the direction of Fort Moultrie, which boat, when 40 yards east from Fort Sumter, was met by a boat from Sullivan's Island, containing a full corps of band musicians abandoned by the enemy. These confirmed my belief of an evacuation. I had no troops that could be available under two hours, as, except in a few pontoon boats, there were no means whatever of landing troops near the enemy's works or into the city. I directed Major Hennessy to proceed to Fort Sumter and there replace our flag. The flag was replaced over the southeast angle of Fort Sumter at 9 o'clock A. M. I now pushed for the city, stopping at Fort Ripley and Castle Pinckney, from which works Rebel flags were hauled down and the American flag substituted. . . . I landed at Mill's wharf, Charleston, at 10 o'clock A. M. where I learned that a part of the enemy's troops yet remained in the city, while mounted patrols were out in every direction applying the torch and driving the inhabitants before them. I at once addressed to the Mayor of the city [a communication demanding its surrender]. . . . My whole force consisted of five officers and the armed crews of two small boats, comprising in all 22 men. Both officers and men volunteered to advance from the wharf into the city; but no reënforcements being in sight, I did not deem it expedient to move on. Public buildings, stores, warehouses, private dwellings, shipping, etc., were burning and being fired by armed Rebels, but with the force at my disposal it was impossible to save the cotton and other property. While awaiting the arrival of my troops at Mill's wharf, a number of explosions took place. The Rebel commissary depot was blown up, and with it is estimated that not less than 200 human beings — most of whom were women and children — were blown to atoms. These people were engaged in procuring food for themselves and their families by permission from the Rebel military authorities. . . . Observing a small boat sailing toward the bay under a flag of truce, I put off to it, and received from a member of the common council a letter [from the Mayor, announcing the evacuation of the city by the Confederate military authorities]. . . . The deputation sent to convey the above letter represented to me that the city was in the hands of either the Rebel soldiery or the mob. They entreated of me in the name of humanity to interpose my military authority and save the city from utter destruction. . . . Two companies of the 52d Pennsylvania regiment and about 30 men of the 3d Rhode Island volunteer heavy artillery having landed, I proceeded with them to the citadel. I here established my headquarters, and sent small parties in all directions with instructions to impress negroes wherever found, and to make them work the fire apparatus, until all fires were extinguished."— A. G. Bennett, *Report, Feb.* 24, 1865 (*quoted in Tenney's Military and Naval Hist. of the Rebellion, ch.* 49).—At noon on the 14th of April, 1865, the fourth anniversary of the lowering of the flag of the United States at Fort Sumter, it was formally raised by General Anderson over the ruins of the fort, with impressive ceremonies, in which many visitors from the North took part. An address was delivered on the occasion by the Rev. Henry Ward Beecher.

A. D. 1865 (February—March: The Carolinas).—Sherman's march from Savannah to Goldsboro.—The burning of Columbia.—The Battle of Bentonsville.—"By the middle of January, a lodgment had been effected in South Carolina [at Pocotaligo, on the railroad between Savannah and Charleston], and Sherman had his whole army once more in hand as a moving column. He had no idea of wasting time on either Charleston or Augusta, but he determined to play upon the fears of the rebels, and compel them to retain a force to protect those places. . . . Accordingly he gave out with some ostentation that he was moving upon either Charleston or Augusta. Early in January the heavy winter rains set in, rendering the roads almost impassable. . . . This flood delayed the departure of the column for quite two weeks. . . . On the 1st of February, the army designed for the active campaign from Savannah northward was again 60,000 strong; and, as before, was composed of two wings, the right under Howard and the left under Slocum. Kilpatrick was once more chief of cavalry. Sixty-eight guns accompanied the command. The wagons were 2,500 in number, and carried an ample supply of ammunition for one great battle, forage for a week, and provisions for twenty days. For fresh meat Sherman depended on beeves driven on the hoof, and such cattle, hogs, and poultry as might be gathered on the march. . . . Sherman . . . started on his northward march on the 1st of February. On that day his right wing was south of the Salkehatchie river, and his left still struggling in the swamps of the Savannah, at Sister's Ferry. . . . The division generals led their columns through the swamps, the water up to their shoulders, crossed over to the pine land beyond, and then, turning upon the rebels who

had opposed the passage, drove them off in utter disorder. All the roads northward had been held for weeks by Wheeler's cavalry, and details of negro laborers had been compelled to fell trees and burn bridges to impede the national march. Sherman's pioneers, however, removed the trees, and the heads of columns rebuilt the bridges before the rear could close up, and the rebels retreated behind the Edisto river at Branchville. . . . Sherman determined to waste no time on Branchville, which the enemy could no longer hold, and turned his columns directly north upon Columbia, where it was supposed the rebels would concentrate. Attempts were made to delay him at the crossings of the rivers; there were numerous bridge-heads with earth or cotton parapets to carry, and cypress swamps to cross; but nothing stayed his course. On the 13th, he learned that there was no enemy in Columbia except Hampton's cavalry. Hardee, at Charleston, took it for granted that Sherman was moving upon that place, and the rebels in Augusta supposed that they were Sherman's object; so Charleston and Augusta were protected, while Columbia was abandoned to the care of the cavalry." With little or no resistance, Sherman entered the capital of South Carolina on the 17th of February. "Hampton had ordered all cotton, public and private, to be moved into the streets and fired. Bales were piled up everywhere, the rope and bagging cut, and the tufts of cotton blown about by the wind, or lodged in the trees and against the houses, presented the appearance of a snow-storm. Some of these piles of cotton were burning in the heart of the town. Sherman, meanwhile, had given orders to destroy the arsenals and public property not needed by his army, as well as railroad stations and machines, but to spare all dwellings, colleges, schools, asylums, and 'harmless private property'; and the fires lighted by Hampton were partially subdued by the national soldiers. But before the torch had been put to a single building by Sherman's order, the smouldering fires set by Hampton were rekindled by the wind and communicated to the buildings around. About dark the flames began to spread, and were soon beyond the control of the brigade on duty in the town. An entire division was now brought in, but it was found impossible to check the conflagration, which by midnight had become quite unmanageable. It raged till about four A. M. on the 18th, when the wind subsided, and the flames were got under control. . . . Beauregard, meanwhile, and the rebel cavalry, had retreated upon Charlotte, in North Carolina, due north from Columbia; and on the 20th and 21st Sherman followed as far as Winnsboro. . . . At Winnsboro, however, Sherman turned his principal columns northeastward towards Goldsboro, still 200 miles away. Heavy rains again impeded his movements . . . and it was not till the 3d of March that the army arrived at Cheraw. At this point large quantities of guns and ammunition were captured, brought from Charleston under the supposition that here, at least, they would be secure. Hardee had moved due north from Charleston by his only remaining railroad, through Florence, but only reached Cheraw in time to escape with his troops across the Pedee river, just before Sherman arrived. . . . Having secured the passage of the Pedee . . . Sherman had but little uneasiness about the future. . . . On the 11th of March, Fayetteville was reached, and Sherman had traversed the entire extent of South Carolina. On the 12th, he sent a dispatch to Grant, the first since leaving the Savannah. . . . On the 15th of March, the command began its march for Goldsboro." The scattered Confederate forces were now getting together and General Johnston had been put in command of them. "Sherman estimated the entire rebel force at 37,000 infantry and 8,000 cavalry; but only Hardee, with 10,000 infantry and one division of cavalry, was in the immediate front." On the 15th Hardee was encountered at Averysboro, where he attempted to check Sherman's advance while Johnston concentrated in the rear. Some sharp fighting occurred, in which Sherman lost 77 men killed and 477 wounded. Hardee reported his loss at 500. In the morning he had disappeared. "From Averysboro both wings turned eastward by different roads, and on the night of the 18th of March the army was within 27 miles of Goldsboro, and only five from Bentonsville. The columns were now about ten miles apart." At Bentonsville, on the 19th, Slocum's wing was attacked by Johnston, who had marched his whole command with great rapidity, hoping to "overwhelm Sherman's left flank before it could be relieved by its co-operating column." But Slocum held his ground that day against six distinct assaults, and the next day Sherman brought his whole army into position. He did not push the enemy, however, either on the 20th or on the 21st, being uncertain as to Johnston's strength. During the night of the 21st the latter retreated. "The total national loss was 191 killed, and 1,455 wounded and missing. Johnston states his losses to have been 223 killed, 1,467 wounded, and 653 missing; but Sherman captured 1,621 prisoners. Sherman admits that he committed an error in not overwhelming his enemy. Few soldiers, however, are great enough to accuse themselves of an error, and fewer still but might accuse themselves of greater ones than can ever be laid at Sherman's door. At daybreak on the 22d . . . the army moved to Goldsboro, where Schofield had already arrived [see below: 1865 (FEBRUARY—MARCH: NORTH CAROLINA)]. . . . Thus was concluded one of the longest and most important marches ever made by an organized army in civilized war."—A. Badeau, *Military Hist. of Ulysses S. Grant, ch.* 31 (*v.* 3).—At Columbia, "I observed, as I passed along the street, that many shops had been gutted, and that paper, rags, and litter of all kinds lay scattered on the floors, in the open doorways, and on the ground outside. I was told on good authority that this had been done by the Confederate troops before our arrival. It was a windy day, and a great deal of loose cotton had been blown about and caught on the fences and in the branches of the shade trees along the street. It has been said that this had something to do with spreading the fire which afterward took place. I think this very doubtful. . . . I have never doubted that Columbia was deliberately set on fire in more than a hundred places. No one ordered it, and no one could stop it. The officers of high rank would have saved the city if possible; but the army was deeply imbued with the feeling that as South Carolina had begun the war she must suffer a stern retribution."—W. B. Hazen, *Narrative of Military Service, ch.* 23-25.—"I dis-

claim on the part of my army any agency in this fire, but, on the contrary, claim that we saved what of Columbia remains unconsumed."—*Sherman's Official Report* (*Rebellion Record, v.* 11).

ALSO IN: S. M. Bowman and R. B. Irwin, *Sherman and his Campaigns, ch.* 26–29.—H. W. Slocum and W. Hampton, *Sherman's March and The Battle of Bentonville* (*Battles and Leaders, v.* 4).

A. D. 1865 (February—March: North Carolina).—Occupation of Wilmington.—Battle of Kinston.—Junction with Sherman at Goldsboro.—On the 9th of February, General Schofield, transferred from the west, arrived at Fort Fisher with Cox's division of the Twenty-third Corps, and took command of the newly created Department of North Carolina. Advancing on Wilmington, the Confederates, under Hoke, retreating before him, he occupied that city on the 22d. This accomplished, General Cox was sent to Newberne to take command of forces ordered there, and to open communication thence by railroad with Goldsboro, preparatory to the arrival of General Sherman at that point. In the prosecution of this undertaking, he fought the battle of Kinston, March 10, repelling a fierce attack by Bragg with the forces which were being collected against Sherman. "After Bragg's retreat, Schofield steadily pressed the work of rebuilding the railway. Kinston was occupied on March 14th." On the 21st Schofield entered Goldsboro, "and there, in a couple of days more, was reassembled the grand army under Sherman, whose march from Savannah had been quite as remarkable as the former one from Atlanta to the sea."—J. D. Cox, *The March to the Sea* (*Campaigns of the Civil War*), *ch.* 9.

A. D. 1865 (February—March: Virginia).—Sheridan's destroying march through Central Virginia.—Battle of Waynesborough.—"The last campaign against Lee may be said to have been inaugurated when General Sheridan started with his cavalry from Winchester, Virginia, on the 27th of February, 1865, with a sort of carte blanche of destruction as to the enemy's supply depots and communications. The general's instructions looked to his crossing the James River above Richmond, and his possible junction with the command of General Sherman somewhere in North Carolina; but the swollen condition of the James and the destruction of the bridges prevented his crossing. . . . General Sheridan's command on this expedition consisted of the first cavalry division, under Brevet Major-General Wesley Merritt, and the third cavalry division, under Brevet Major-General Geo. A. Custer, to whose division was added one brigade of the cavalry of the old army of West Virginia, under Colonel Capehart. . . . They left Winchester on a damp, disagreeable morning. . . . But the spirits of the bold dragoons were not dampened, and they felt lively enough to push on to Waynesborough to the camp of General Jubal Early, late of the Confederacy, upon whom the brilliant Custer fell with his division, and soon had his guns, and men, and 'matériel,' and would have had him but that he had sufficient presence of mind to absent his person when he found how things were going. This was General Early's last appearance in public life. . . . Early's command at Waynesborough being now dispersed or captured, . . . General Sheridan proceeded to occupy Charlottesville. . . . Then on again toward Lynchburg and the James River. . . . When it was found impossible to cross the James River, attention was for a while directed to the demolition of the James River and Kanawha Canal. . . . When the ingenious destruction corps could devise no further damage here, the command turned off to try its hand upon a railroad or two. All the time the rains had descended — the flood-gates of the clouds were up and the water kept pouring through. . . . Although nothing short of a flotilla seemed likely to ride out the storm, the cavalry rode on hopefully, and came safely to harbor at the White House, on the Pamunkey, where supplies were furnished them, and where the March winds blew them dry again. . . . Immediately upon his arrival at this depot, General Sheridan reported to General Grant, at City Point, for orders."—*With General Sheridan in Lee's Last Campaign; by a Staff Officer, ch.* 2.

ALSO IN: G. E. Pond, *The Shenandoah Valley in* 1864, *ch.* 14.—A. Badeau, *Military Hist. of Ulysses S. Grant, ch.* 31 (*v.* 3).—P. H. Sheridan, *Personal Memoirs, v.* 2, *ch.* 4.

A. D. 1865 (March).—Emancipation of the families of colored soldiers.—"The President in his annual message, December, 1863, had estimated the colored soldiers in the service at 'nearly 100,000.' They were mostly from the border States, and the slaves of loyal masters. While they were fighting the battles of the country, their masters, who were generally opposed to their enlistment, could sell into perpetual slavery their wives and children. To deter slaves from enlisting, or to punish them when they did enlist, slave-masters made merchandise of the wives and children of colored soldiers, and often sold them into a harsher bondage. To put an end to a practice so cruel, unjust, injurious, and dishonorable to the country, Mr. Wilson introduced into the Senate on the 8th of January [1864], in his bill to promote enlistments, a provision declaring that when any man or boy of African descent, owing service or labor in any State, under its laws, should be mustered into the military or naval service of the United States, he, and his mother, wife, and children, should be forever free." The bill was warmly debated and its supporters did not succeed in bringing it to a vote during that session of Congress. At the next session, on the 13th of December, 1864, Mr. Wilson introduced a joint resolution "to make free the wives and children of persons who had been, or might be, mustered into the service of the United States." This passed the Senate a few days later, by a vote of 27 to 10; was passed by the House on the 22d of February, 1865, and signed by the President on the 3d of March.—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v.* 3, *ch.* 30.

A. D. 1865 (March).—President Lincoln's Second Inaugural Address.—"The days of the Confederacy were evidently numbered. Only the last blow remained to be struck. Then Lincoln's second inauguration came [March 4, 1865], and with it his second inaugural address. Lincoln's famous 'Gettysburg speech' has been much and justly admired. But far greater, as well as far more characteristic, was that inaugural in which

he poured out the whole devotion and tenderness of his great soul. It had all the solemnity of a father's last admonition and blessing to his children before he lay down to die. . . . No American President had ever spoken words like these to the American people. America never had a President who found such words in the depth of his heart."—C. Schurz, *Abraham Lincoln: an Essay, pp.* 103–104.

The following is the text of the Inaugural Address:

"Fellow-countrymen: At this second appearing to take the oath of the presidential office, there is less occasion for an extended address than there was at the first. Then a statement, somewhat in detail, of a course to be pursued, seemed fitting and proper. Now, at the expiration of four years, during which public declarations have been constantly called forth on every point and phase of the great contest which still absorbs the attention and engrosses the energies of the nation, little that is new could be presented. The progress of our arms, upon which all else chiefly depends, is as well known to the public as to myself; and it is, I trust, reasonably satisfactory and encouraging to all. With high hope for the future, no prediction in regard to it is ventured. On the occasion corresponding to this four years ago, all thoughts were anxiously directed to an impending civil war. All dreaded it — all sought to avert it. While the inaugural address was being delivered from this place, devoted altogether to saving the Union without war, insurgent agents were in the city seeking to destroy it without war — seeking to dissolve the Union, and divide effects, by negotiation. Both parties deprecated war; but one of them would make war rather than let the nation survive; and the other would accept war rather than let it perish. And the war came. One-eighth of the whole population were colored slaves, not distributed generally over the Union, but localized in the Southern part of it. These slaves constituted a peculiar and powerful interest. All knew that this interest was, somehow, the cause of the war. To strengthen, perpetuate, and extend this interest was the object for which the insurgents would rend the Union, even by war; while the government claimed no right to do more than to restrict the territorial enlargement of it. Neither party expected for the war the magnitude or the duration which it has already attained. Neither anticipated that the cause of the conflict might cease with, or even before, the conflict itself should cease. Each looked for an easier triumph, and a result less fundamental and astounding. Both read the same Bible, and pray to the same God; and each invokes his aid against the other. It may seem strange that any men should dare to ask a just God's assistance in wringing their bread from the sweat of other men's faces; but let us judge not, that we be not judged. The prayers of both could not be answered — that of neither has been answered fully. The Almighty has his own purposes. 'Woe unto the world because of offenses! for it must needs be that offenses come; but woe to that man by whom the offense cometh.' If we shall suppose that American slavery is one of those offenses which, in the providence of God, must needs come, but which, having continued through his appointed time, he now wills to remove, and that he gives to both North and South this terrible war, as the woe due to those by whom the offense came, shall we discern therein any departure from those divine attributes which the believers in a living God always ascribe to him? Fondly do we hope — fervently do we pray — that this mighty scourge of war may speedily pass away. Yet, if God wills that it continue until all the wealth piled by the bondman's 250 years of unrequited toil shall be sunk, and until every drop of blood drawn with the lash shall be paid by another drawn with the sword, as was said 3,000 years ago, so still it must be said, 'The judgments of the Lord are true and righteous altogether.' With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up the nation's wounds; to care for him who shall have borne the battle, and for his widow, and his orphan — to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations."—A. Lincoln, *Complete Works, v.* 2, *pp.* 656–657.

A. D. 1865 (March—April: Virginia).—The Flanking of Lee's lines.—Battle of Five Forks.—Final assault at Petersburg and Confederate retreat.— "One of the most anxious periods of my experience during the rebellion," wrote General Grant, "was the last few weeks before Petersburg. I felt that the situation of the Confederate army was such that they would try to make an escape at the earliest practicable moment, and I was afraid, every morning, that I would awake from my sleep to hear that Lee had gone, and that nothing was left but a picket line. . . . I was naturally very impatient for the time to come when I could commence the spring campaign, which I thoroughly believed would close the war. . . . Sherman was anxious that I should wait where I was until he could come up, and make a sure thing of it; but I had determined to move as soon as the roads and weather would admit of my doing so. I had been tied down somewhat in the matter of fixing any time at my pleasure for starting, until Sheridan, who was on his way from the Shenandoah Valley to join me, should arrive, as both his presence and that of his cavalry were necessary to the execution of the plans which I had in mind. However, [Sheridan] having arrived at White House on the 19th of March, I was enabled to make my plans. . . . It is now known that early in the month of March Mr. Davis and General Lee had a consultation about the situation of affairs in and about Richmond and Petersburg, and they both agreed that these places were no longer tenable for them, and that they must get away as soon as possible. They, too, were waiting for dry roads, or a condition of the roads which would make it possible to move. General Lee, in aid of his plan of escape, and to secure a wider opening to enable them to reach the Danville road with greater security than he would have in the way the two armies were situated, determined upon an assault upon the right of our lines around Petersburg." The assault was made by General Gordon early in the morning of March 25th, and Fort Stedman, with three contiguous batteries, were taken by surprise. The captured fort and batteries were soon recovered, however, and the Confederate troops who entered them were made prisoners. "This

effort of Lee's cost him about 4,000 men, and resulted in their killing, wounding and capturing about 2,000 of ours. . . . The day that Gordon was making dispositions for this attack (24th of March) I issued my orders for the movement to commence on the 29th. Ord, with three divisions of infantry and Mackenzie's cavalry, was to move in advance on the night of the 27th, from the north side of the James River, and take his place on our extreme left, 30 miles away. . . . Ord was at his place promptly. Humphreys and Warren were then on our extreme left with the 2d and 5th corps. They were directed on the arrival of Ord, and on his getting into position in their places, to cross Hatcher's Run and extend out west toward Five Forks, the object being to get into a position from which we could strike the South Side Railroad and ultimately the Danville Railroad. There was considerable fighting in taking up these new positions for the 2d and 5th corps, in which the Army of the James had also to participate somewhat, and the losses were quite severe. This was what was known as the battle of White Oak Road. . . . The 29th of March came, and fortunately, there having been a few days free from rain, the surface of the ground was dry, giving indications that the time had come when we could move. On that day I moved out with all the army available after leaving sufficient force to hold the line about Petersburg. It soon set in raining again, however, and in a very short time the roads became practically impassable for teams, and almost so for cavalry. . . . It became necessary . . . to build corduroy roads every foot of the way as we advanced, to move our artillery upon. The army had become so accustomed to this kind of work, and were so well prepared for it, that it was done very rapidly. The next day, March 30th, we had made sufficient progress to the south-west to warrant me in starting Sheridan with his cavalry over by Dinwiddie with instructions to then come up by the road leading north-west to Five Forks, thus menacing the right of Lee's line. . . . The column moving detached from the army still in the trenches was, excluding the cavalry, very small. The forces in the trenches were themselves extending to the left flank. Warren was on the extreme left when the extension began, but Humphreys was marched around later and thrown into line between him and Five Forks. My hope was that Sheridan would be able to carry Five Forks, get on the enemy's right flank and rear, and force them to weaken their centre to protect their right, so that an assault in the centre might be successfully made. General Wright's corps had been designated to make this assault, which I intended to order as soon as information reached me of Sheridan's success. . . . Sheridan moved back to Dinwiddie Court-House on the night of the 30th, and then took a road leading northwest to Five Forks. He had only his cavalry with him. Soon encountering the rebel cavalry he met with a very stout resistance. He gradually drove them back however until in the neighborhood of Five Forks. Here he had to encounter other troops, besides those he had been contending with, and was forced to give way. In this condition of affairs he notified me of what had taken place and stated that he was falling back toward Dinwiddie gradually and slowly, and asked me to send Wright's corps to his assistance. I replied to him that it was impossible to send Wright's corps . . . and that I would send Warren. Accordingly orders were sent to Warren to move at once that night (the 31st) to Dinwiddie Court-House and put himself in communication with Sheridan as soon as possible, and report to him. He was very slow in moving, some of his troops not starting until after 5 o'clock next morning. . . . Warren reported to Sheridan about 11 o'clock on the 1st, but the whole of his troops were not up so as to be much engaged until late in the afternoon. . . . Sheridan succeeded by the middle of the afternoon or a little later in advancing up to the point from which to make his designed assault upon Five Forks itself. He was very impatient to make the assault and have it all over before night, because the ground he occupied would be untenable for him in bivouac during the night. . . . It was at this junction of affairs that Sheridan wanted to get Crawford's division in hand, and he also wanted Warren. He sent staff officer after staff officer in search of Warren, directing that general to report to him, but they were unable to find him. At all events Sheridan was unable to get that officer to him. Finally he went himself. He issued an order relieving Warren and assigning Griffin to the command of the 5th corps. The troops were then brought up and the assault successfully made. . . . It was dusk when our troops under Sheridan went over the parapets of the enemy. The two armies were mingled together there for a time in such manner that it was almost a question which one was going to demand the surrender of the other. Soon, however, the enemy broke and ran in every direction; some 6,000 prisoners, besides artillery and small-arms in large quantities, falling into our hands. . . . Pursuit continued until about 9 o'clock at night, when Sheridan halted his troops, and knowing the importance to him of the part of the enemy's line which had been captured, returned. . . . This was the condition which affairs were in on the night of the 1st of April. I then issued orders for an assault by Wright and Parke at 4 o'clock on the morning of the 2d." The assault was successfully made, and the outer works of Petersburg were soon in the hands of the National troops. Early in the morning of the 3d the enemy evacuated Petersburg and Grant and Meade took possession of the city. The following day they were visited there by President Lincoln, who had been at City Point for a week, or more, watching the course of events.—U. S. Grant, *Personal Memoirs, ch.* 63–65 (*v.* 2).

A. D. 1865 (April 11).—President Lincoln's last public address.—His view of Reconstruction in Louisiana.—On the evening of the 11th of April, a great multitude of people gathered about the White House, to convey their congratulations to the President and to signify their joy at the sure prospect of peace. Mr. Lincoln came out and spoke to them, expressing first his participation in their gladness, and then turning to discuss briefly the criticism which had opened upon his policy of reconstruction, as practically

illustrated in Louisiana. He spoke of his message and proclamation of December, 1863 (quoted above); of the approval given to them by every member of his cabinet; of the entire silence at the time of all who had become critics and objectors since action under the plan had been taken in Louisiana. He then went on as follows: "When the message of 1863, with the plan before mentioned, reached New Orleans, General Banks wrote me that he was confident that the people, with his military coöperation, would reconstruct substantially on that plan. I wrote to him and some of them to try it. They tried it, and the result is known. Such has been my only agency in getting up the Louisiana government. As to sustaining it, my promise is out, as before stated. But as bad promises are better broken than kept, I shall treat this as a bad promise, and break it whenever I shall be convinced that keeping it is adverse to the public interest; but I have not yet been so convinced. I have been shown a letter on this subject, supposed to be an able one, in which the writer expresses regret that my mind has not seemed to be definitely fixed on the question whether the seceded States, so called, are in the Union or out of it. It would perhaps add astonishment to his regret were he to learn that since I have found professed Union men endeavoring to make that question, I have purposely forborne any public expression upon it. As appears to me, that question has not been, nor yet is, a practically material one, and that any discussion of it, while it thus remains practically immaterial, could have no effect other than the mischievous one of dividing our friends. As yet, whatever it may hereafter become, that question is bad as the basis of a controversy, and good for nothing at all — a merely pernicious abstraction. We all agree that the seceded States, so called, are out of their proper practical relation with the Union, and that the sole object of the government, civil and military, in regard to those States is to again get them into that proper practical relation. I believe that it is not only possible, but in fact easier, to do this without deciding or even considering whether these States have ever been out of the Union, than with it. Finding themselves safely at home, it would be utterly immaterial whether they had ever been abroad. Let us all join in doing the acts necessary to restoring the proper practical relations between these States and the Union, and each forever after innocently indulge his own opinion whether in doing the acts he brought the States from without into the Union, or only gave them proper assistance, they never having been out of it. The amount of constituency, so to speak, on which the new Louisiana government rests, would be more satisfactory to all if it contained 50,000, or 30,000, or even 20,000, instead of only about 12,000, as it does. It is also unsatisfactory to some that the elective franchise is not given to the colored man. I would myself prefer that it were now conferred on the very intelligent, and on those who serve our cause as soldiers. Still, the question is not whether the Louisiana government, as it stands, is quite all that is desirable. The question is, will it be wiser to take it as it is and help to improve it, or to reject and disperse it? Can Louisiana be brought into proper practical relation with the Union sooner by sustaining or by discarding her new State government? Some 12,000 voters in the heretofore slave State of Louisiana have sworn allegiance to the Union, assumed to be the rightful political power of the State, held elections, organized a State government, adopted a free-State constitution, giving the benefit of public schools equally to black and white, and empowering the legislature to confer the elective franchise upon the colored man. Their legislature has already voted to ratify the constitutional amendment recently passed by Congress, abolishing slavery throughout the nation. These 12,000 persons are thus fully committed to the Union and to perpetual freedom in the State — committed to the very things, and nearly all the things, the nation wants — and they ask the nation's recognition and its assistance to make good their committal. Now, if we reject and spurn them, we do our utmost to disorganize and disperse them. We, in effect, say to the white man: You are worthless or worse; we will neither help you, nor be helped by you. To the blacks we say: This cup of liberty which these, your old masters, hold to your lips we will dash from you, and leave you to the chances of gathering the spilled and scattered contents in some vague and undefined when, where, and how. If this course, discouraging and paralyzing both white and black, has any tendency to bring Louisiana into proper practical relations with the Union, I have so far been unable to perceive it. If, on the contrary, we recognize and sustain the new government of Louisiana, the converse of all this is made true. We encourage the hearts and nerve the arms of the 12,000 to adhere to their work, and argue for it, and proselyte for it, and fight for it, and feed it, and grow it, and ripen it to a complete success. The colored man, too, in seeing all united for him, is inspired with vigilance, and energy, and daring, to the same end. Grant that he desires the elective franchise, will he not attain it sooner by saving the already advanced steps toward it than by running backward over them? Concede that the new government of Louisiana is only to what it should be as the egg is to the fowl, we shall sooner have the fowl by hatching the egg than by smashing it. Again, if we reject Louisiana we also reject one vote in favor of the proposed amendment to the national Constitution. To meet this proposition it has been argued that no more than three-fourths of those States which have not attempted secession are necessary to validly ratify the amendment. I do not commit myself against this further than to say that such a ratification would be questionable, and sure to be persistently questioned, while a ratification by three-fourths of all the States would be unquestioned and unquestionable. I repeat the question: Can Louisiana be brought into proper practical relation with the Union sooner by sustaining or by discarding her new State government? What has been said of Louisiana will apply generally to other States. And yet so great peculiarities pertain to each State, and such important and sudden changes occur in the same State, and withal so new and unprecedented is the whole case that no exclusive and inflexible plan can safely be prescribed as to details and collaterals. Such exclusive and inflexible plan would surely become a new entanglement. Important principles may and must be inflexible. In the present situation, as

the phrase goes, it may be my duty to make some new announcement to the people of the South. I am considering, and shall not fail to act when satisfied that action will be proper."—A. Lincoln, *Complete Works*, *v.* 2, *pp.* 673–675.

A. D. 1865 (April: Virginia).—The abandonment of Richmond and retreat of Lee.—Battle of Sailor's Creek.—Surrender at Appomattox Court House.—"The success of the Federal army in breaking the lines of Petersburg had rendered the retreat of the Confederate force imperative. An effort to hold Richmond with every line of communication with the South broken or in imminent danger would have been madness. But by abandoning his works and concentrating his army, which still amounted to about 30,000 men, General Lee might retire to some natural stronghold in the interior, where the defensible features of the country would enable him to oppose Grant's formidable host until he could rally strength to strike an effective blow. This course was at once decided upon, and early on the morning of the 2d of April, Lee sent a despatch to the Government authorities at Richmond informing them of the disastrous situation of affairs and of the necessity of his evacuating Petersburg that night. Orders were also sent to the forces north of the James to move at once and join him, while all the preparations necessary for the evacuation of Richmond, both as the seat of government and as a military post, were expeditiously made. There was, indeed, no time to be lost. . . . By midnight the evacuation was completed. . . . As the troops moved noiselessly onward in the darkness that just precedes the dawn, a bright light like a broad flash of lightning illumined the heavens for an instant; then followed a tremendous explosion. 'The magazine at Fort Drewry is blown up,' ran in whispers through the ranks, and again silence reigned. Once more the sky was overspread by a lurid light, but not so fleeting as before. It was now the conflagration of Richmond that lighted the night-march of the soldiers, and many a stout heart was wrung with anguish at the fate of the city and its defenceless inhabitants. The burning of public property of little value had given rise to a destructive fire that laid in ashes nearly one-third of the devoted city. . . . The retreat of Lee's army did not long remain unknown to the Federals. The explosion of the magazine at Fort Drewry and the conflagration of Richmond apprised them of the fact, and they lost no time in taking possession of the abandoned works and entering the defenceless cities. On the morning of the 3d of April the mayor of Richmond surrendered the city to the Federal commander in its vicinity, and General Weitzel took immediate possession. He at once proceeded to enforce order and took measures to arrest the conflagration, while with great humanity he endeavored to relieve the distressed citizens. . . . As soon as Grant became aware of Lee's line of retreat he pushed forward his whole available force, numbering 70,000 or 80,000 men, in order to intercept him on the line of the Richmond and Danville Railroad. Sheridan's cavalry formed the van of the pursuing column, and was closely followed by the artillery and infantry. Lee pressed on as rapidly as possible to Amelia Court-house, where he had ordered supplies to be deposited for the use of his troops on their arrival. . . . The hope of finding a supply of food at this point, which had done much to buoy up the spirits of the men, was destined to be cruelly dispelled. Through an unfortunate error or misapprehension of orders the provision-train had been taken on to Richmond without unloading its stores at Amelia Court-house. . . . It was a terrible blow alike to the men and to their general. . . . The only chance remaining to the Army of Northern Virginia was to reach the hill-country without delay. Yet here it was detained by the error of a railroad official, while the precious minutes and hours moved remorselessly by. . . . Yet no murmur came from the lips of the men to the ear of their commander, and on the evening of that unfortunate day [April 5th] they resumed their weary march in silence and composure. Some small amount of food had been brought in by the foragers, greatly inadequate for the wants of the soldiers, yet aiding them to somewhat alleviate the pangs of hunger. A handful of corn was now a feast to the weary veterans as they trudged onward through the April night. . . . Sheridan's cavalry was already upon the flank of the Confederate army, and the infantry was following with all speed. . . . During the forenoon of [the 6th] the pursuing columns thickened and frequent skirmishes delayed the march. These delays enabled the Federals to accumulate in such force that it became necessary for Lee to halt his advance in order to arrest their attack till his column could close up, and the trains and such artillery as was not needed for action could reach a point of safety. This object was accomplished early in the afternoon. Ewell's, the rearmost corps in the army, closed upon those in front at a position on Sailor's Creek, a small tributary of the Appomattox River. . . . His corps was surrounded by the pursuing columns and captured with but little opposition. About the same time the divisions of Anderson, Pickett, and Bushrod Johnson were almost broken up, about 10,000 men in all being captured. The remainder of the army continued its retreat during the night of the 6th, and reached Farmville early on the morning of the 7th, where the troops obtained two days' rations, the first regular supplies they had received during the retreat. At Farmville a short halt was made to allow the men to rest and cook their provisions. The effective portion of the Army of Northern Virginia did not now exceed 10,000 men. This great reduction had been caused by the disaster of the previous day at Sailor's Creek, by desertions on the retreat, and by an exhaustion which obliged many to leave the ranks. Those who still remained by their colors were veterans whose courage never failed, and who were yet ready to face any odds. The heads of the Federal columns beginning to appear about eleven o'clock, the Confederates resumed their retreat." On the afternoon of the 7th, Lee received a note from Grant calling upon him to surrender, and replied to it, asking what terms would be offered. Further notes were exchanged between the two commanders the following day, while the retreat continued. Lee hoped to reach Appomattox Court House and secure supplies that were there, which might enable him to "push on to the Staunton River and maintain himself behind that stream until a junction could be made with Johnston." But when, in the afternoon of April 8th, he reached the neighborhood of Appomat-

tox Court House, "he was met by the intelligence of the capture of the stores placed for his army at the station two miles beyond. Notwithstanding this overwhelming news, he determined to make one more effort to force himself through the Federal toils that encompassed him." This attempt was made at three o'clock on the morning of the 9th of April, General Gordon leading the attack, which failed. Lee then yielded to his fate, and sent a flag of truce, asking for an interview with Grant to arrange terms of surrender. "Grant had not yet come up, and while waiting for his arrival General Lee seated himself upon some rails which Colonel Talcott of the Engineers had fixed at the foot of an apple tree for his convenience. This tree was half a mile distant from the point where the meeting of Lee and Grant took place, yet wide-spread currency has been given to the story that the surrender took place under its shade, and 'apple-tree' jewelry has been profusely distributed from the orchard in which it grew. About 11 o'clock General Lee, accompanied only by Colonel Marshall of his staff, proceeded to the village to meet General Grant, who had now arrived. The meeting between the two renowned generals took place at the house of a Mr. McLean at Appomattox Courthouse, to which mansion, after exchanging courteous salutations, they repaired to settle the terms on which the surrender of the Army of Northern Virginia should be concluded. . . . The written instrument of surrender covered the following points: Duplicate rolls of all the officers and men were to be made, and the officers to sign paroles for themselves and their men, all agreeing not to bear arms against the United States unless regularly exchanged. The arms, artillery, and public property were to be turned over to an officer appointed to receive them, the officers retaining their side-arms and private horses and baggage. In addition to this, General Grant permitted every man of the Confederate army who claimed to own a horse or mule to retain it for farming purposes, General Lee remarking that this would have a happy effect. . . . After completion of these measures General Lee remarked that his men were badly in need of food, that they had been living for several days on parched corn exclusively, and requested rations and forage for 25,000 men. These rations were granted out of the car-loads of Confederate provisions which had been stopped by the Federal cavalry. . . . Three days after the surrender the Army of Northern Virginia had dispersed in every direction, and three weeks later the veterans of a hundred battles had changed the musket and the sword for the implements of husbandry. . . . Thousands of soldiers were set adrift on the world without a penny in their pockets to enable them to reach their homes. Yet none of the scenes of riot that often follow the disbanding of armies marked their course."—A. L. Long, *Memoirs of Robert E. Lee, ch.* 21.—"General Grant's behavior at Appomattox was marked by a desire to spare the feelings of his great opponent. There was no theatrical display; his troops were not paraded with bands playing and banners flying, before whose lines the Confederates must march and stack arms. He did not demand Lee's sword, as is customary, but actually apologized to him for not having his own, saying it had been left behind in the wagon; promptly stopped salutes from being fired to mark the event, and the terms granted were liberal and generous. 'No man could have behaved better than General Grant did under the circumstances,' said Lee to a friend in Richmond. 'He did not touch my sword; the usual custom is for the sword to be received when tendered, and then handed back, but he did not touch mine.' Neither did the Union chief enter the Southern lines to show himself or to parade his victory, or go to Richmond or Petersburg to exult over a fallen people, but mounted his horse and with his staff started for Washington. Washington, at Yorktown, was not as considerate and thoughtful of the feelings of Cornwallis or his men. Charges were now withdrawn from the guns, flags furled, and the Army of the Potomac and the Army of Northern Virginia turned their backs upon each other for the first time in four long, bloody years."—F. Lee, *General Lee, ch.* 15.

A. D. 1865 (April: Virginia). — President Lincoln at Richmond.—The assembling and dispersing of "the gentlemen who have acted as the Legislature of Virginia."— Virtual Proclamations of the end of the war.—"President Lincoln had been at City Point and vicinity for several days before the fall of Richmond, in constant communication with the General-in-chief, at the front, receiving dispatches from him and transmitting them instantly to the Secretary of War, whence they were diffused over the country, by the telegraph. On the day after Richmond was evacuated, he went up to that city in Admiral Porter's flag-ship, the Malvern, Captain Ralph Chandler, with the Sangamon, several tugs, and 30 small boats, with about 300 men, had already cleared the channel of the river of torpedoes, and made the navigation comparatively safe. When near Rocketts, the President and the Admiral left the Malvern, and proceeded to the city in the commander's gig. With its crew, armed with carbines, they landed and walked to Weitzel's quarters, in the late residence of Davis, cheered on the way by the huzzas and grateful ejaculations of a vast concourse of emancipated slaves, who had been told that the tall man was their Liberator. They crowded around him so thickly, in their eagerness to see him, and to grasp his hand, that a file of soldiers were needed to clear the way. After a brief rest at Weitzel's, the President rode rapidly through the principal streets of Richmond, in an open carriage, and, at near sunset, departed for City Point. Two days afterward, the President went to Richmond again, accompanied by his wife, the Vice-President, and several Senators, when he was called upon by leading Confederates, several of them members of the rebel Virginia Legislature, whose chief business was to endeavor to arrange a compromise whereby the equivalent for submission should be the security to the Virginia insurgents, as far as possible, of their political power and worldly possessions. The President was assured by Judge Campbell,

a member of the Confederate 'Government' (who, for two years, had been satisfied, he said, that success was impossible), that the so-called Virginia Legislature, if allowed to reassemble, with the Governor, would work for the reconstruction of the Union, their first step being the withdrawal of the Virginia troops from the field, on condition that the confiscation of property in Virginia should not be allowed. Anxious to end the war without further bloodshed, if possible, and satisfied that the withdrawal of the Virginia troops — in other words, nearly all of Lee's army — would accomplish it, he left with General Weitzel, on his departure from Richmond [April 6], authority to allow 'the gentlemen who have acted as the Legislature of Virginia, in support of the rebellion, to assemble at Richmond and take measures to withdraw the Virginia troops and other support from resistance to the General Government.' A safeguard was given. The fugitives returned, with the Governor, but instead of performing in good faith what had been promised in their name, they began legislating generally, as if they were the legal representatives of the people of Virginia. So soon as notice of this perfidy was given to the President after his return to Washington, he directed Weitzel to revoke the safeguard, and allow 'the gentlemen who had acted as the Legislature of Virginia' to return to private life. The surrender of Lee had, meanwhile, made the contemplated action unnecessary. The President was blamed by the loyal people for allowing these men to assemble with acknowledged powers; and the Confederates abused him for dissolving the assembly. The President returned to Washington City on the day of Lee's surrender, where he was the recipient of a multitude of congratulations because of the dawn of peace. On the 11th he issued proclamations, one declaring the closing, until further notice, of certain ports in the Southern States, whereof the blockade had been raised by their capture, respectively; and the other, demanding, henceforth, for our vessels in foreign ports, on penalty of retaliation, those privileges and immunities which had hitherto been denied them on the plea of according equal belligerent rights to the Republic and its internal enemies. . . . On the following day an order was issued from the War Department, which had been approved by General Grant, putting an end to all drafting and recruiting for the National army, and the purchase of munitions of war and supplies; and declaring that the number of general and staff officers would be speedily reduced, and all military restrictions on trade and commerce be removed forthwith. This virtual proclamation of the end of the war went over the land on the anniversary of the evacuation of Fort Sumter [April 14], while General Anderson was replacing the old flag over the ruins of that fortress."—B. J. Lossing, *Field Book of the Civil War, v. 3, ch. 21.*

A. D. 1865 (April 14th).—The Assassination of President Lincoln.—"From the very beginning of his Presidency, Mr. Lincoln had been constantly subject to the threats of his enemies and the warnings of his friends. . . . Although he freely discussed with the officials about him the possibilities of danger, he always considered them remote, as is the habit of men constitutionally brave, and positively refused to torment himself with precautions for his own safety. He would sum the matter up by saying that both friends and strangers must have daily access to him in all manner of ways and places; his life was therefore in reach of any one, sane or mad, who was ready to murder and be hanged for it; that he could not possibly guard against all danger unless he were to shut himself up in an iron box, in which condition he could scarcely perform the duties of a President; by the hand of a murderer he could die only once; to go continually in fear would be to die over and over. He therefore went in and out before the people, always unarmed, generally unattended. . . . Four years of threats and boastings, of alarms that were unfounded, and of plots that came to nothing thus passed away; but precisely at the time when the triumph of the nation over the long insurrection seemed assured, and a feeling of peace and security was diffused over the country, one of the conspiracies, not seemingly more important than the many abortive ones, ripened in the sudden heat of hatred and despair. A little band of malignant secessionists, consisting of John Wilkes Booth, an actor, of a family of famous players, Lewis Powell, alias Payne, a disbanded rebel soldier from Florida, George Atzerodt, formerly a coachmaker, but more recently a spy and blockade runner of the Potomac, David E. Herold, a young druggist's clerk, Samuel Arnold and Michael O'Laughlin, Maryland secessionists and Confederate soldiers, and John H. Surratt, had their ordinary rendezvous at the house of Mrs. Mary E. Surratt, the widowed mother of the last named, formerly a woman of some property in Maryland, but reduced by reverses to keeping a small boarding-house in Washington. Booth was the leader of the little coterie. He was a young man of twenty-six. . . . He was a fanatical secessionist; had assisted at the capture and execution of John Brown, and had imbibed at Richmond and other Southern cities where he had played, a furious spirit of partisanship against Lincoln and the Union party. After the reëlection of Mr. Lincoln, which rang the knell of the insurrection, Booth, like many of the secessionists North and South, was stung to the quick by disappointment. He visited Canada, consorted with the rebel emissaries there, and at last — whether or not at their instigation cannot certainly be said — conceived a scheme to capture the President and take him to Richmond. He spent a great part of the autumn and winter inducing a small number of loose fish of secession sympathies to join him in this fantastic enterprise. . . . There are indications in the evidence given on the trial of the conspirators that they suffered some great disappointment in their schemes in the latter part of March, and a letter from Arnold to Booth, dated March 27, showed that some of them had grown timid of the consequences of their contemplated enterprise and were ready to give it up. He advised Booth, before going further, 'to go and see how it will be taken in R——d.' But timid as they might be by nature, the whole group was so completely under the ascendency of Booth that they did not dare disobey him when in his presence; and after the surrender of Lee, in an access of malice and rage which was akin

to madness, he called them together and assigned each his part in the new crime, the purpose of which had arisen suddenly in his mind out of the ruins of the abandoned abduction scheme. This plan was as brief and simple as it was horrible. Powell, alias Payne, the stalwart, brutal, simple-minded boy from Florida, was to murder Seward; Atzerodt, the comic villain of the drama, was assigned to remove Andrew Johnson; Booth reserved for himself the most difficult and most conspicuous rôle of the tragedy; it was Herold's duty to attend him as a page and aid in his escape. Minor parts were assigned to stage carpenters and other hangers-on, who probably did not understand what it all meant. Herold, Atzerodt, and Surratt had previously deposited at a tavern at Surrattsville, Maryland, owned by Mrs. Surratt, but kept by a man named Lloyd, a quantity of ropes, carbines, ammunition, and whisky, which were to be used in the abduction scheme. On the 11th of April Mrs. Surratt, being at the tavern, told Lloyd to have the shooting irons in readiness, and on Friday, the 14th, again visited the place and told him they would probably be called for that night. The preparations for the final blow were made with feverish haste; it was only about noon of the 14th that Booth learned the President was to go to Ford's Theater that night. It has always been a matter of surprise in Europe that he should have been at a place of amusement on Good Friday; but the day was not kept sacred in America, except by the members of certain churches. It was not, throughout the country, a day of religious observance. The President was fond of the theater; it was one of his few means of recreation. It was natural enough that, on this day of profound national thanksgiving, he should take advantage of a few hours' relaxation to see a comedy. Besides, the town was thronged with soldiers and officers, all eager to see him; it was represented to him that appearing occasionally in public would gratify many people whom he could not otherwise meet. . . . From the moment Booth ascertained the President's intention to attend the theater in the evening his every action was alert and energetic. He and his confederates, Herold, Surratt and Atzerodt, were seen on horseback in every part of the city. He had a hurried conference with Mrs. Surratt before she started for Lloyd's tavern. . . . Booth was perfectly at home in Ford's Theater, where he was greatly liked by all the employees, without other reason than the sufficient one of his youth and good looks. Either by himself or with the aid of his friends he arranged his whole plan of attack and escape during the afternoon. He counted upon address and audacity to gain access to the small passage behind the President's box; once there, he guarded against interference by an arrangement of a wooden bar to be fastened by a simple mortice in the angle of the wall and the door by which he entered, so that the door could not be opened from without. He even provided for the contingency of not gaining entrance to the box by boring a hole in its door, through which he might either observe the occupants or take aim and shoot. He hired at a livery stable a small, fleet horse, which he showed with pride during the day to barkeepers and loafers among his friends. The moon rose that night at ten o'clock. A few minutes before that hour he called one of the underlings of the theater to the back door and left him there holding his horse. He then went to a saloon near by, took a drink of brandy, and, entering the theater, passed rapidly through the crowd in rear of the dress circle and made his way to the passage leading to the President's box. He showed a card to a servant in attendance and was allowed to pass in. He entered noiselessly, and, turning, fastened the door with the bar he had previously made ready, without disturbing any of the occupants of the box, between whom and himself there yet remained the slight partition and the door through which he had bored the hole. . . . Holding a pistol in one hand and a knife in the other, he opened the box door, put the pistol to the President's head, and fired; dropping the weapon, he took the knife in his right hand, and when Major Rathbone sprang to seize him he struck savagely at him. Major Rathbone received the blow on his left arm, suffering a wide and deep wound. Booth, rushing forward, then placed his left hand on the railing of the box and vaulted lightly over to the stage. It was a high leap, but nothing to such a trained athlete. . . . He would have got safely away but for his spur catching in the folds of the Union flag with which the front of the box was draped. He fell on the stage, the torn flag trailing on his spur, but instantly rose as if he had received no hurt, though in fact the fall had broken his leg; he turned to the audience, brandishing his dripping knife, and shouting the State motto of Virginia, 'Sic Semper Tyrannis,' and fled rapidly across the stage and out of sight. Major Rathbone had shouted, 'Stop him!' The cry went out, 'He has shot the President.' From the audience, at first stupid with surprise, and afterwards wild with excitement and horror, two or three men jumped upon the stage in pursuit of the flying assassin; but he ran through the familiar passages, leaped upon his horse, which was in waiting in the alley behind, rewarded with a kick and a curse the call-boy who had held him, and rode rapidly away in the light of the just risen moon. The President scarcely moved; his head drooped forward slightly, his eyes closed. . . . It was afterward ascertained that a large derringer bullet had entered the back of the head on the left side, and, passing through the brain, had lodged just behind the left eye. By direction of Rathbone and Crawford, the President was carried to a house across the street and laid upon a bed in a small room at the rear of the hall, on the ground floor. . . . The President had been shot a few minutes past ten. The wound would have brought instant death to most men, but his vital tenacity was extraordinary. . . . At twenty-two minutes after seven he died. Stanton broke the silence by saying, 'Now he belongs to the ages.'" At the same hour in which the President was murdered, an attempt was made by one of Booth's fellow conspirators to kill the Secretary of State. Mr. Seward had been thrown from his carriage a few days before and was prostrated by the serious injuries received. Pretending to bring a prescription from his physician, the assassin, Payne, made his way into the sick-room of the Secretary and stabbed him three times, but not fatally, in the neck and cheek. Two sons, Frederick and Augustus Seward, were seriously wounded in defending their father, and a soldier-nurse who was present struggled bravely with the assassin,

though weaponless, and was stabbed repeatedly. Payne escaped for the time, but was caught a few days later. Booth made his way to Port Tobacco, and thence across the Potomac, into Virginia, assisted and concealed by numerous sympathizers. He eluded his pursuers until the 25th of April, when he was hunted down by a party of soldiers, while sleeping in a barn, below Fredericksburg, and, refusing to surrender, was shot. "The surviving conspirators, with the exception of John H. Surratt, were tried by a military commission sitting in Washington in the months of May and June. . . . Mrs. Surratt, Payne, Herold, and Atzerodt were hanged on the 7th of July; Mudd, Arnold, and O'Laughlin were imprisoned for life at the Tortugas, though the term was afterwards shortened; and Spangler, the scene shifter at the theater, was sentenced to six years in jail. John H. Surratt escaped to Canada," and thence to England. "He wandered over Europe, enlisted in the Papal Zouaves, deserted and fled to Egypt, where he was detected and brought back to Washington in 1867. His trial lasted two months and ended in a disagreement of the jury."—J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 10, *ch.* 14–15.

Pittman, *Report of the Trial of the Conspirators.— Trial of John H. Surratt.*—T. M. Harris, *Assassination of Lincoln: a History.*

A. D. 1865 (April 15th).— Succession of Andrew Johnson, Vice President, to the Presidency. — "On the day after the assassination, Mr. Johnson, having been apprised of the event, took the oath of office, at his rooms, in the presence of the Cabinet, and of several members of Congress, and was thus quietly inducted into the high position so summarily vacated by the martyred President. In the few remarks made on the occasion, as to 'an indication of any policy which may be pursued,' he said it 'must be left for development as the administration progresses'; and his own past course in connection with the Rebellion 'must be regarded as a guaranty for the future.' To several delegations which waited upon him he was, however, more explicit. . . . 'I know it is easy, gentlemen [he said to a delegation from New Hampshire], for any one who is so disposed to acquire a reputation for clemency and mercy. But the public good imperatively requires a just discrimination in the exercise of these qualities. . . . The American people must be taught to know and understand that treason is a crime. . . . It must not be regarded as a mere difference of political opinion. It must not be excused as an unsuccessful rebellion, to be overlooked and forgiven.' . . . It is not surprising, therefore, with utterances like these, in such seeming harmony with his antecedents as a Southern Unionist, — antecedents which had secured his nomination and election to the Vice-Presidency,— that many were disposed to regard his advancement to the Presidency at that particular juncture as but another evidence of Providential favor, if not of Divine interposition, by which the nation was to be saved from what many feared might prove Mr. Lincoln's ill-timed leniency and misplaced confidence. . . . Such gratulations, however, were of short continuance. Whatever the cause or design, the new President soon revealed the change that had taken place and the purpose to adopt and pursue a policy the exact reverse of what, with such prompt and unequivocal words, he had indicated."— H. Wilson, *Rise and Fall of the Slave Power in Am., v.* 3, *ch.* 43.—"Johnson was inaugurated at 11 o'clock on the morning of the 15th, and was at once surrounded by radical and conservative politicians, who were alike anxious about the situation. I spent most of the afternoon in a political caucus, held for the purpose of considering the necessity for a new Cabinet and a line of policy less conciliatory than that of Mr. Lincoln; and while everybody was shocked at his murder, the feeling was nearly universal that the accession of Johnson to the Presidency would prove a godsend to the country. Aside from Mr. Lincoln's known policy of tenderness to the Rebels, which now so jarred upon the feelings of the hour, his well-known views on the subject of reconstruction were as distasteful as possible to radical Republicans. . . . On the following day, in pursuance of a previous engagement, the Committee on the Conduct of the War met the President at his quarters in the Treasury Department. He received us with decided cordiality, and Mr. Wade said to him: 'Johnson we have faith in you. By the gods, there will be no trouble now in running the government!'"— G. W. Julian, *Political Recollections, ch.* 11.

A. D. 1865 (April 26th).—General Johnston's surrender.— On the 11th of April, at Smithfield, North Carolina, General Sherman had news of the surrender of Lee. Entering Raleigh on the 13th, he received, next day, a communication from the Confederate General Johnston proposing a truce "to permit the civil authorities to enter into the needful arrangements to terminate the existing war." In reply he invited a conference with Johnston, which occurred on the 17th — the day on which news of the assassination of President Lincoln was received. "Sherman said frankly that he could not recognize the Confederate civil authority as having any existence, and could neither receive nor transmit to Washington any proposition coming from them. He expressed his ardent desire for an end to devastation, and offered Johnston the same terms offered by Grant to Lee. Johnston replied that he would not be justified in such a capitulation, but suggested that they might arrange the terms of a permanent peace. The suggestion pleased General Sherman; the prospect of ending the war without the shedding of another drop of blood was so tempting to him that he did not sufficiently consider the limits of his authority in the matter." The result was that, on the 18th, Sherman and Johnston signed a memorandum of agreement which provided for the disbanding of all the Confederate armies, the recognition of the State governments of the several States lately forming the rebel Confederacy, the complete restoration of their old status in the Union, and complete amnesty to all concerned in the rebellion. This was forwarded to Washington, and, of course, it was disapproved, but with an unnecessary publication of sharp censure of General Sherman, and with expressions that seemed to imply distrust of the loyalty of his motives. General Grant was ordered to proceed to General Sherman's headquarters and to direct

further operations. He executed this mission with great delicacy, and his presence with Sherman was hardly known. The latter held a second conference with Johnston on the 26th, and there General Johnston made the surrender of his army on the same terms that had been granted to Lee. — J. G. Nicolay and J. Hay, *Abraham Lincoln, v.* 10, *ch.* 12.

A. D. 1865 (April—May).— The end of the Rebellion. — Fall of Mobile. — Stoneman's Raid.—Wilson's Raid.—Capture of Jefferson Davis.—The final surrenders.— After the surrender of Johnson, "there were still a few expeditions out in the South that could not be communicated with, and had to be left to act according to the judgment of their respective commanders. . . . The three expeditions which I had tried so hard to get off from the commands of Thomas and Canby did finally get off: one under Canby himself, against Mobile, late in March; that under Stoneman from East Tennessee on the 20th; and the one under Wilson, starting from Eastport, Mississippi, on the 22d of March. They were all eminently successful, but without any good result. Indeed much valuable property was destroyed and many lives lost at a time when we would have liked to spare them. . . . Stoneman entered North Carolina and then pushed north to strike the Virginia and Tennessee Railroad. He got upon that road, destroyed its bridges at different places and rendered the road useless to the enemy up to within a few miles of Lynchburg. His approach caused the evacuation of that city about the time we were at Appomattox, and was the cause of a commotion we heard of there. He then pushed south, and was operating in the rear of Johnston's army about the time the negotiations were going on between Sherman and Johnston for the latter's surrender. In this raid Stoneman captured and destroyed a large amount of stores, while 14 guns and nearly 2,000 prisoners were the trophies of his success. Canby appeared before Mobile on the 27th of March. The city of Mobile was protected by two forts, besides other intrenchments — Spanish Fort, on the east side of the bay, and Fort Blakely, north of the city. These forts were invested. On the night of the 8th of April, the National troops having carried the enemy's works at one point, Spanish Fort was evacuated; and on the 9th, the very day of Lee's surrender, Blakely was carried by assault, with a considerable loss to us. On the 11th the city was evacuated. . . . Wilson moved out [from Eastport, Miss.] with full 12,000 men, well equipped and well armed. He was an energetic officer and accomplished his work rapidly. Forrest was in his front, but with neither his old-time army nor his old-time prestige. . . . He had a few thousand regular cavalry left, but not enough to even retard materially the progress of Wilson's cavalry. Selma fell on the 2d of April. . . . Tuscaloosa, Montgomery and West Point fell in quick succession. These were all important points to the enemy by reason of their railroad connections, as depots of supplies, and because of their manufactories of war material. . . . Macon surrendered on the 21st of April. Here news was received of the negotiations for the surrender of Johnston's army. Wilson belonged to the military division commanded by Sherman, and of course was bound by his terms. This stopped all fighting. General Richard Taylor had now become the senior Confederate officer still at liberty east of the Mississippi River, and on the 4th of May he surrendered everything within the limits of this extensive command. General E. Kirby Smith surrendered the trans-Mississippi department on the 26th of May, leaving no other Confederate army at liberty to continue the war. Wilson's raid resulted in the capture of the fugitive president of the defunct confederacy before he got out of the country. This occurred at Irwinsville, Georgia, on the 11th of May. For myself, and I believe Mr. Lincoln shared the feeling, I would have been very glad to have seen Mr. Davis succeed in escaping, but for one reason: I feared that, if not captured, he might get into the trans-Mississippi region and there set up a more contracted confederacy. . . . Much was said at the time about the garb Mr. Davis was wearing when he was captured. [Mr. Davis, in his own narrative, and Captain G. W. Lawton, of the 4th Michigan Cavalry, which made the capture, agree in stating that the fugitive chief of the Confederacy wore when taken a lady's 'waterproof,' with a shawl over his head and shoulders. Mr. Davis says that he picked up his wife's waterproof in mistake for his own when he ran from the tent in which he was surprised, while camping, and that his wife threw the shawl over him. Captain Lawton asserts that he carried a tin-pail, that he affected to be bent with age, and that when he stepped out Mrs. Davis asked the soldiers at the tent entrance to let her 'old mother' go to the run for water.] I cannot settle this question from personal knowledge of the facts; but I have been under the belief, from information given to me by General Wilson shortly after the event, that when Mr. Davis learned that he was surrounded by our cavalry he was in his tent dressed in a gentleman's dressing gown. Naturally enough, Mr. Davis wanted to escape, and would not reflect much how this should be accomplished provided it might be done successfully. . . . Every one supposed he would be tried for treason if captured, and that he would be executed. Had he succeeded in making his escape in any disguise it would have been adjudged a good thing afterwards by his admirers."— U. S. Grant, *Personal Memoirs, ch.* 69 (*v.* 2).—"Davis was taken, via Savannah and the ocean, to Fortress Monroe; where he was long closely and rigorously imprisoned, while his family were returned by water to Savannah and there set at liberty. Secretary Reagan — the only person of consequence captured with Davis — was taken to Boston, and confined, with Vice-President Stephens (captured about this time also in Georgia), in Fort Warren; but each was liberated on parole a few months thereafter."— H. Greeley, *The American Conflict, v.* 2, *ch.* 35.

Lawton, "*Running at the Heads*" (*Atlantic Monthly, Sept.*, 1865).—J. Davis, *Rise and Fall of the Confederate Gov't, ch.* 54 (*v.* 2).— C. C. Andrews, *Hist. of the Campaign of Mobile.*

A. D. 1865 (May). — Feeling of surrendered Confederate officers. — After the surrender of Johnston, General Jacob D. Cox was put in command of the military district within which the surrender occurred, and had charge of the arrangements made for paroling and disbanding the Confederate forces. In a paper prepared for the Ohio Commandery of the Military Order of the Loyal Legion of the United States, General Cox has given an interesting report of conversations which he had in that connection with General Johnston and General Hardee. Talking with General Hardee of the war, the latter was asked "what had been his own expectation as to the result, and when had he himself recognized the hopelessness of the contest. 'I confess,' said he, laughing, 'that I was one of the hot Southerners who shared the notion that one man of the South could whip three Yankees; but the first year of the war pretty effectually knocked that nonsense out of us, and, to tell the truth, ever since that time we military men have generally seen that it was only a question how long it would take to wear our army out and destroy it. We have seen that there was no real hope of success, except by some extraordinary accident of fortune, and we have also seen that the politicians would never give up till the army was gone. So we have fought with the knowledge that we were to be sacrificed with the result we see to-day, and none of us could tell who would live to see it. We have continued to do our best, however, and have meant to fight as if we were sure of success.' . . . Johnston was very warm in his recognition of the soldierly qualities and the wonderful energy and persistence of our army and the ability of Sherman. Referring to his own plans, he said he had hoped to have had time enough to have collected a larger force to oppose Sherman, and to give it a more complete and efficient organization. The Confederate government had reckoned upon the almost impassable character of the rivers and swamps to give a respite till spring — at least they hoped for this. 'Indeed,' said he, with a smile, 'Hardee here,' giving a friendly nod of his head toward his subordinate, 'reported the Salkchatchie Swamps as absolutely impassable; but when I heard that Sherman had not only started, but was marching through those very swamps at the rate of thirteen miles a day, making corduroy road every foot of the way, I made up my mind there had been no such army since the days of Julius Cæsar.' Hardee laughingly admitted his mistaken report from Charleston, but justified it by saying that all precedent was against such a march, and that he would still have believed it impossible if he had not seen it done."—J. D. Cox, *The Surrender of Johnston's Army* (*Sketches of War Hist., Ohio Commandery, Loyal Legion, U. S., v.* 2, *pp.* 249–256).

A. D. 1865 (May). — Statistics of the Civil War.—"In a statistical exhibit of deaths in the Union army, compiled (1885), under the direction of Adjutant-General Drum, by Joseph W. Kirkley, the causes of death are given as follows: Killed in action, 4,142 officers, 62,916 men; died of wounds received in action, 2,223 officers, 40,789 men, of which number 99 officers and 1,973 men were prisoners of war; died of disease, 2,795 officers and 221,791 men, of which 83 officers and 24,783 men were prisoners; accidental deaths (except drowned), 142 officers and 3,972 men, of which 2 officers and 5 men were prisoners; drowned, 106 officers and 4,838 men, of which 1 officer and 6 men were prisoners; murdered, 37 officers and 483 men; killed after capture, 14 officers and 90 men; committed suicide, 26 officers and 365 men; executed by United States military authorities, 267 men; executed by the enemy, 4 officers and 60 men; died from sunstroke, 5 officers and 308 men, of which 20 men were prisoners; other known causes, 62 officers and 1,972 men, of which 7 officers and 312 men were prisoners; causes not stated, 28 officers and 12,093 men, of which 9 officers and 2,030 men were prisoners. Total 9,584 officers, and 349,944 men, of which 219 officers and 29,279 men were prisoners. Grand aggregate, 359,528; aggregate deaths among prisoners, 29,498. Since 1885 the Adjutant-General has received evidence of the death in Southern prisons of 694 men not previously accounted for, which increases the number of deaths among prisoners to 30,192, and makes a grand aggregate of 360,222." Total number of men furnished to the United States Army and Navy during the War from the several States and Territories, 2,778,304; of which number, 2,494,592 were white troops, 101,207 were sailors and marines, and 178,975 were colored troops. "The work of mustering out volunteers began April 29th and up to August 7th 640,806 troops had been discharged; on September 14th the number had reached 741,107, and on November 15th 800,963. On November 22d, 1865, the Secretary of War reported that Confederate troops surrendered and were released on parole" to the number of 174,223. Official returns show the whole number of men enrolled (present and absent) in the active armies of the Confederacy, as follows: Jan. 1, 1862, 318,011; Jan. 1, 1863, 465,584; Jan. 1, 1864, 472,781; Jan. 1, 1865, 439,675. "Very few, if any, of the local land forces, and none of the naval, are included in the tabular exhibit. If we take the 472,000 men in service at the beginning of 1864, and add thereto at least 250,000 deaths occurring prior to that date, it gives over 700,000. The discharges for disability and other causes and the desertions would probably increase the number (inclusive of the militia and naval forces) to over 1,000,000. Northern writers have assumed that the Confederate losses equalled the Union losses; no data exist for a reasonably accurate estimate." — *Battles and Leaders of the Civil War, v.* 4, *pp.* 767–768.— "In the four years of their service the armies of the Union, counting every form of conflict, great and small, had been in 2,265 engagements with the Confederate troops. From the time when active hostilities began until the last gun of the war was fired, a fight of some kind — a raid, a skirmish, or a pitched battle — occurred at some point on our widely extended front nearly eleven times per week upon an average. Counting only those engagements in which the Union loss in killed, wounded, and missing exceeded 100, the total number was 330,— averaging one every four and a half days. From the northernmost point of contact to the southernmost, the distance by any practicable line of communication was more than 2,000 miles. From East to West the extremes were 1,500 miles apart. During the first year of hostilities — one of preparation on both sides — the battles were . . .

35 in number, of which the most serious was the Union defeat at Bull Run. In 1862 the war had greatly increased in magnitude and intensity, as is shown by the 84 engagements between the armies. The net result of the year's operations was highly favorable to the Rebellion. In 1863 the battles were 110 in number — among them some of the most significant and important victories for the Union. In 1864 there were 73 engagements, and in the winter and early spring of 1865 there were 28. In fact, 1864–65 was one continuous campaign. . . . Not only in life but in treasure the cost of the war was enormous. In addition to the large revenues of the Government which had been currently absorbed, the public debt at the close of the struggle was $2,808,549,437.55. The incidental losses were innumerable in kind, incalculable in amount. Mention is made here only of the actual expenditure of money — estimated by the standard of gold. The outlay was indeed principally made in paper, but the faith of the United States was given for redemption in coin — a faith which has never been tarnished, and which in this instance has been signally vindicated by the steady determination of the people. Never, in the same space of time, has there been a National expenditure so great. . . . For the three years of the rebellion, after the first year, our War Department alone expended $603,314,411.82, $690,391,048.66, and $1,030,690,400 respectively. . . . At the outbreak of hostilities the Government discovered that it had no Navy at command. The Secretary, Mr. Welles, found upon entering his office but a single ship in a Northern port fitted to engage in aggressive operations. . . . By the end of the year 1863 the Government had 600 vessels of war which were increased to 700 before the rebellion was subdued. Of the total number at least 75 were ironclad."—J. G. Blaine, *Twenty Years of Congress, v. 2, ch. 2, and v. 1, ch. 25.*—"Eleven Confederate cruisers figured in the 'Alabama claims' settlement between the United States and Great Britain. They were the Alabama, Shenandoah, Florida, Tallahassee, Georgia, Chickamauga, Nashville, Retribution, Sumter, Sallie and Boston. The actual losses inflicted by the Alabama ($6,547,609) were only about $60,000 greater than those charged to the Shenandoah. The sum total of the claims filed against the eleven cruisers for ships and cargoes was $17,900,633, all but about $4,000,000 being caused by the Alabama and Shenandoah. . . . In the 'Case of the United States' . . . it is stated that while in 1860 two-thirds of the commerce of New York was carried on in American bottoms, in 1863 three-fourths was carried on in foreign bottoms. The transfer of American vessels to the British flag to avoid capture is stated thus: In 1861, vessels 126, tonnage 71,673; in 1862, vessels 135, tonnage 64,578; in 1863, vessels 348, tonnage 252,579; in 1864, vessels 106, tonnage 92,052. . . . The cruisers built or purchased in England for the Confederate navy, were the Florida, Alabama, Shenandoah and Rappahannock. The latter never made a cruise, and the others were procured for the government by James D. Bulloch, naval agent. . . . He also had constructed in France the armored ram Stonewall."—J. T. Scharf, *Hist. of the Confederate States Navy, ch. 26.*—See ALABAMA CLAIMS. — "The greatest of all the lessons afforded to humanity by the Titanic struggle in which the American Republic saved its life is the manner in which its armies were levied, and, when the occasion for their employment was over, were dismissed. Though there were periods when recruiting was slow and expensive, yet there were others, when some crying necessity for troops was apparent, that showed almost incredible speed and efficiency in the supply of men. Mr. Stanton, in his report for 1865, says: 'After the disasters on the Peninsula in 1862, over 80,000 troops were enlisted, organized, armed, equipped, and sent into the field in less than a month. Sixty thousand troops have repeatedly gone to the field within four weeks; and 90,000 infantry were sent to the armies from the five States of Ohio, Indiana, Illinois, Iowa, and Wisconsin within twenty days.'"—J. G. Nicolay and J. Hay, *Abraham Lincoln, v. 10, ch. 17.* — See, also, PRISONS AND PRISON-PENS, CONFEDERATE.

A. D. 1865 (May — July).— President Johnson's measures of Reconstruction in the insurrectionary States.—"On the 10th of May the President [Andrew Johnson] issued a proclamation declaring substantially that actual hostilities had ceased, and that 'armed resistance to the authority of the Government in the insurrectionary States may be regarded at an end.' This great fact being officially recognized, the President found himself face to face with the momentous duty of bringing the eleven States of the Confederacy into active and harmonious relations with the Government of the Union. . . . An extra session of Congress seemed specially desirable at the time, and had one been summoned by the President, many of the troubles which subsequently resulted might have been averted. . . . Declining to seek the advice of Congress, in the embarrassments of his position, President Johnson necessarily subjected himself to the counsel and influence of his Cabinet," in which he had made no changes since President Lincoln's death. Among the members of the cabinet, the one who succeeded in obtaining ascendancy was Mr. Seward, who had rapidly recovered from his injuries and resumed the direction of the Department of State. Mr. Seward "was firmly persuaded that the wisest plan of reconstruction was the one which would be speediest; that for the sake of impressing the world with the strength and the marvelous power of self-government, with its Law, its Order, its Peace, we should at the earliest possible moment have every State restored to its normal relations with the Union. He did not believe that guarantee of any kind beyond an oath of renewed loyalty was needful. He was willing to place implicit faith in the coercive power of self-interest operating upon the men lately in rebellion. . . . By his arguments and by his eloquence Mr. Seward completely captivated the President. He effectually persuaded him that a policy of anger and hate and vengeance could lead only to evil results. . . . The President was gradually influenced by Mr. Seward's arguments, though their whole tenor was against his strongest predilections and against his pronounced and public committals to a policy directly the reverse. . . . Mr. Seward's influence was supplemented and enhanced by the timely and artful interposition of clever men from the South. . . . He [President Johnson] was not especially open to flattery, but it was noticed that words of commendation

from his native section seemed peculiarly pleasing to him. . . . On the 29th of May . . . two decisive steps were taken in the work of reconstruction. Both steps proceeded on the theory that every act needful for the rehabilitation of the seceded States could be acomplished by the Executive Department of the Government. . . . The first of these important acts of reconstruction, upon the expediency of which the President and Mr. Seward had agreed, was the issuing of a Proclamation of Amnesty and Pardon to 'all persons who have directly or indirectly participated in the existing Rebellion,' upon the condition that such persons should take and subscribe an oath — to be registered for permanent preservation — solemnly declaring that henceforth they would 'faithfully support, protect, and defend, the Constitution of the United States and the union of the States thereunder;' and that they would also 'abide by and faithfully support all laws and proclamations which have been made during the existing Rebellion, with reference to the emancipation of slaves.' . . . The general declaration of amnesty was somewhat narrowed in its scope by the enumeration, at the end of the proclamation, of certain classes which were excepted from its benefit." Of the thirteen classes thus excepted, the first six were nearly identical with those excepted in President Lincoln's proclamation of December 8, 1863 — see above: A. D. 1863 (DECEMBER). The classes that he now added were: "Seventh, 'All persons who have been, or are, absentees from the United States for the purpose of aiding the Rebellion.' . . . Eighth, 'All officers in the rebel service who had been educated at the United-States Military or Naval Academy.' . . . Ninth, 'All men who held the pretended offices of governors of States in insurrection against the United States.' . . . Tenth, 'All persons who left their homes within the jurisdiction and protection of the United States, and passed beyond the Federal military lines into the pretended Confederate States for the purpose of aiding the Rebellion.' . . . Eleventh, 'All persons who have been engaged in the destruction of the commerce of the United States upon the high seas . . . and upon the lakes and rivers that separate the British Provinces from the United States.' . . . Twelfth, 'All persons who, at the time when they seek to obtain amnesty and pardon, are in military, naval, or civil confinement, as prisoners of war, or persons detained for offenses of any kind either before or after conviction.' . . . Thirteenth, 'All participants in the Rebellion, the estimated value of whose taxable property is over $20,000.' . . . Full pardon was granted, without further act on their part, to all who had taken the oath prescribed in President Lincoln's proclamation of December 8, 1863, and who had thenceforward kept and maintained the same inviolate. . . . A circular from Mr. Seward accompanied the proclamation, directing that the oath might 'be taken and subscribed before any commissioned officer, civil, military, or naval, in the service of the United States, or before any civil or military officer of a loyal State or Territory, who, by the laws thereof, may be qualified to administer oaths.' Every one who took the oath was entitled to a certified copy of it, . . . and a duplicate, properly vouched, was forwarded to the State Department. . . . With these details complete, a second step of great moment was taken by the Government on the same day (May 29). A proclamation was issued appointing William W. Holden provisional governor of the State of North Carolina. . . . The proclamation made it the duty of Governor Holden, 'at the earliest practicable period, to prescribe such rules and regulations as may be necessary and proper for assembling a convention — composed of delegates who are loyal to the United States and no others — for the purpose of altering or amending the Constitution thereof, and with authority to exercise, within the limit of said State, all the powers necessary and proper to enable the loyal people of the State of North Carolina to restore said State to its constitutional relations to the Federal Government.' . . . It was specially provided in the proclamation that in 'choosing delegates to any State Convention no person shall be qualified as an elector or eligible as a member unless he shall have previously taken the prescribed oath of allegiance, and unless he shall also possess the qualifications of a voter as defined under the Constitution and Laws of North Carolina as they existed on the 20th of May, 1861, immediately prior to the so-called ordinance of secession.' Mr. Lincoln had in mind, as was shown by his letter to Governor Hahn of Louisiana, to try the experiment of negro suffrage, beginning with those who had served in the Union Army, and who could read and write; but President Johnson's plan confined the suffrage to white men, by prescribing the same qualifications as were required in North Carolina before the war. . . . A fortnight later, on the 13th of June, a proclamation was issued for the reconstruction of the civil government of Mississippi, and William L. Sharkey was appointed provisional governor. Four days later, on the 17th of June, a similar proclamation was issued for Georgia with James Johnson for provisional governor, and for Texas with Andrew J. Hamilton for provisional governor. On the 21st of the same month Lewis E. Parsons was appointed provisional governor of Alabama, and on the 30th Benjamin F. Perry was appointed provisional governor of South Carolina. On the 13th of July the list was completed by the appointment of William Marvin as provisional governor of Florida. The precise text of the North-Carolina proclamation, 'mutatis mutandis,' was repeated in each one of those relating to these six States. . . . For the reconstruction of the other four States of the Confederacy different provisions were made." In Virginia, the so-called "Pierpont government" — see VIRGINIA: A. D. 1861 (JUNE — NOVEMBER) — "the shell of which had been preserved after West Virginia's separate existence had been recognized by the National Government, with its temporary capital at Alexandria, was accepted by President Johnson's Administration as the legitimate Government of Virginia. All its archives, property, and effects, as was afterwards said by Thaddeus Stevens, were taken to Richmond in an ambulance. . . . A course not dissimilar to that adopted in Virginia was followed in Louisiana, Arkansas, and Tennessee. In all of them the so-called 'ten-percent' governments established under Mr. Lincoln's authority were now recognized. . . . The whole scheme of reconstruction, as originated by Mr. Seward and adopted by the President, was in operation by the middle of July, three months after the assassination of Mr. Lincoln. Every step taken was watched with the deepest solici-

tude by the loyal people. The rapid and thorough change in the President's position was clearly discerned and fully appreciated. His course of procedure was dividing the Republican party, and already encouraging the hopes of those in the North who had been the steady opponents of Mr. Lincoln's war policy, and of those in the South who had sought for four years to destroy the Great Republic."—J. G. Blaine, *Twenty Years of Congress, v.* 2, *ch.* 3-4.

A. D. 1865 (July—December).—Reports of Carl Schurz and General Grant on the condition of affairs in the lately rebellious States.—In the summer of 1865 the Hon. Carl Schurz was commissioned by President Johnson to visit the Southern States and investigate the condition of affairs in them. Mr. Schurz, on returning from this mission, made a report of the result of his observations and inquiries, and the conclusions to which they led him, which was transmitted to the Senate, by the President, on the 18th of December. The views thus submitted were summarized at the close of the report, as follows: "I may sum up all I have said in a few words. If nothing were necessary but to restore the machinery of government in the States lately in rebellion in point of form, the movements made to that end by the people of the south might be considered satisfactory. But if it is required that the southern people should also accommodate themselves to the results of the war in point of spirit, those movements fall far short of what must be insisted upon. The loyalty of the masses and most of the leaders of the southern people consists in submission to necessity. There is, except in individual instances, an entire absence of that national spirit which forms the basis of true loyalty and patriotism. The emancipation of the slaves is submitted to only in so far as chattel slavery in the old form could not be kept up. But although the freedman is no longer considered the property of the individual master, he is considered the slave of society, and all independent State legislation will share the tendency to make him such. The ordinances abolishing slavery passed by the conventions under the pressure of circumstances will not be looked upon as barring the establishment of a new form of servitude. Practical attempts on the part of the southern people to deprive the negro of his rights as a freeman may result in bloody collisions, and will certainly plunge southern society into restless fluctuations and anarchical confusion. Such evils can be prevented only by continuing the control of the national government in the States lately in rebellion until free labor is fully developed and firmly established, and the advantages and blessings of the new order of things have disclosed themselves. This desirable result will be hastened by a firm declaration on the part of the government, that national control in the south will not cease until such results are secured. Only in this way can that security be established in the south which will render numerous immigration possible, and such immigration would materially aid a favorable development of things. The solution of the problem would be very much facilitated by enabling all the loyal and free-labor elements in the south to exercise a healthy influence upon legislation. It will hardly be possible to secure the freedman against oppressive class legislation and private persecution, unless he be endowed with a certain measure of political power. As to the future peace and harmony of the Union, it is of the highest importance that the people lately in rebellion be not permitted to build up another 'peculiar institution' whose spirit is in conflict with the fundamental principles of our political system; for as long as they cherish interests peculiar to them in preference to those they have in common with the rest of the American people, their loyalty to the Union will always be uncertain. I desire not to be understood as saying that there are no well-meaning men among those who were compromised in the rebellion. There are many, but neither their number nor their influence is strong enough to control the manifest tendency of the popular spirit. There are great reasons for hope that a determined policy on the part of the national government will produce innumerable and valuable conversions. This consideration counsels lenity as to persons, such as is demanded by the humane and enlightened spirit of our times, and vigor and firmness in the carrying out of principles, such as is demanded by the national sense of justice and the exigencies of our situation." With the report of Mr. Schurz, the President transmitted to the Senate, at the same time, a letter written by General Grant after making a hurried tour of inspection in some of the Southern States, during the last week of November and early in December. General Grant wrote: "Four years of war, during which law was executed only at the point of the bayonet throughout the States in rebellion, have left the people possibly in a condition not to yield that ready obedience to civil authority the American people have generally been in the habit of yielding. This would render the presence of small garrisons throughout those States necessary until such time as labor returns to its proper channel, and civil authority is fully established. I did not meet any one, either those holding places under the government or citizens of the southern States, who think it practicable to withdraw the military from the south at present. The white and the black mutually require the protection of the general government. There is such universal acquiescence in the authority of the general government throughout the portions of country visited by me, that the mere presence of a military force, without regard to numbers, is sufficient to maintain order. The good of the country, and economy, require that the force kept in the interior, where there are many freedmen, (elsewhere in the southern States than at forts upon the seacoast no force is necessary,) should all be white troops. The reasons for this are obvious without mentioning many of them. The presence of black troops, lately slaves, demoralizes labor, both by their advice and by furnishing in their camps a resort for the freedmen for long distances around. White troops generally excite no opposition, and therefore a small number of them can maintain order in a given district. Colored troops must be kept in bodies sufficient to defend themselves. It is not the thinking men who would use violence towards any class of troops sent among them by the general government, but the ignorant in some places might; and the late slave seems to be imbued with the idea that the property of his

late master should, by right, belong to him, or at least should have no protection from the colored soldier. There is danger of collisions being brought on by such causes. My observations lead me to the conclusion that the citizens of the southern States are anxious to return to self-government, within the Union, as soon as possible; that whilst reconstructing they want and require protection from the government; that they are in earnest in wishing to do what they think is required by the government, not humiliating to them as citizens, and that if such a course were pointed out they would pursue it in good faith. It is to be regretted that there cannot be a greater commingling, at this time, between the citizens of the two sections, and particularly of those intrusted with the lawmaking power. . . . In some instances, I am sorry to say, the freedman's mind does not seem to be disabused of the idea that a freedman has the right to live without care or provision for the future. The effect of the belief in division of lands is idleness and accumulation in camps, towns, and cities. In such cases I think it will be found that vice and disease will tend to the extermination or great reduction of the colored race. It cannot be expected that the opinions held by men at the south for years can be changed in a day, and therefore the freedmen require, for a few years, not only laws to protect them, but the fostering care of those who will give them good counsel, and on whom they rely."—39*th Cong., 1st sess., Senate Ex. Doc. no.* 2, *pp.* 45–46, 106–107.

A. D. 1865 (December).—The end of Slavery.—Proclamation of the adoption of the Thirteenth Amendment. See above: A. D. 1865 (JANUARY).

A. D. 1865-1866. — The creation of the Freedmen's Bureau.—On the last day of the 38th Congress, March 3, 1865, an Act was passed to establish a bureau for the relief of freedmen and refugees. It was among the last Acts approved by Mr. Lincoln, and was designed as a protection to the freedmen of the South and to the class of white men known as "refugees,"—driven from their homes on account of their loyalty to the Union. The Act provided that the Bureau should have "supervision and management of all abandoned lands, and the control of all subjects relating to refugees and freedmen from rebel States, or from any district of country within the territory embraced in the operations of the army, under such rules and regulations as may be prescribed by the head of the bureau and approved by the President. The said bureau shall be under the management and control of a commissioner, to be appointed by the President, by and with the advice and consent of the Senate. . . . The Secretary of War may direct such issues of provisions, clothing, and fuel as he may deem needful for the immediate and temporary shelter and supply of destitute and suffering refugees and freedmen, and their wives and children, under such rules and regulations as he may direct. . . . The President may, by and with the advice and consent of the Senate, appoint an assistant commissioner for each of the States declared to be in insurrection, not exceeding ten. . . . Any military officer may be detailed and assigned to duty under this act without increase of pay or allowances. . . . The commissioner, under the direction of the President, shall have authority to set apart for the use of loyal refugees and freedmen such tracts of land, within the insurrectionary States, as shall have been abandoned, or to which the United States shall have acquired title by confiscation, or sale, or otherwise. And to every male citizen, whether refugee or freedman, as aforesaid, there shall be assigned not more than 40 acres of such land, and the person to whom it is so assigned shall be protected in the use and enjoyment of the land for the term of three years, at an annual rent not exceeding 6 per centum upon the value of said land as it was appraised by the State authorities in the year 1860. . . . At the end of said term, or at any time during said term, the occupants of any parcels so assigned may purchase the land and receive such title thereto as the United States can convey. . . . On the 20th of May, 1865, Major-Gen. O. O. Howard was appointed Commissioner of the Freedmen's Bureau. He gave great attention to the subject of education; and after planting schools for the freedmen throughout a great portion of the South, in 1870 — five years after the work was begun — he made a report. It was full of interest. In five years there were 4,239 schools established, 9,307 teachers employed, and 247,333 pupils instructed. In 1868 the average attendance was 89,396; but in 1870 it was 91,398, or 79¾ per cent. of the total number enrolled. The emancipated people sustained 1,324 schools themselves, and owned 592 school buildings. The Freedmen's Bureau furnished 654 buildings for school purposes."—G. W. Williams, *Hist. of the Negro Race in Am., pt.* 8, *ch.* 21–22 (*v.* 2).—As the original act, "by experience, had proved somewhat inadequate for the ends in view, Congress, in the early part of February, 1866, submitted an act amendatory . . . for executive approval. Its main features consisted in the reservation of three millions of acres of public land in the South from the operation of the homestead and pre-emption laws for occupation by former slaves at a rental to be approved by designated authorities, an extension of the former means of relief in the way of food and clothing, and the punishment, by tribunals composed of the agents and officials of the bureau, of all persons who should violate the rights under this act of its designated beneficiaries. . . . The President, chafing under the non-admission to their representation in Congress of the Southern States which under his policy had been restored, vetoed the bill February 19 on various grounds, among the more important of which, and the only ones of particular import, were that the measure violated constitutional guarantees in that no person by our organic code should be deprived of life, liberty or property without due process of law, and that taxation should never be imposed without representation. . . . February 21st the bill was again put upon its passage, but not obtaining a two-thirds vote in the Senate, consequently failed to become a law. . . . The third Freedmen's Bureau bill, of July, 1866, was another attempt to amend the original law of March 3, 1865, as to juridical measures for the enforcement thereof, and to perfect the distribution of the abandoned and confiscated lands of the South among the blacks. It was much milder in form than the one vetoed in February of the same year, as it did not make violations of the

proposed law a criminal offence. It proposed to give jurisdiction of such violations, however, to military tribunals, made up of the agents and officers of the bureau, until the Southern States had been restored to their representation in Congress. . . . July 16, 1866, the President vetoed the bill as a matter of course. He could have pursued no other action without self-contradiction. Congress, moreover, could not have reasonably expected a different result. It framed the bill not with an eye for executive approval, but with regard to its ability to pass it over the disapproval of that official, which it did on the same day the veto message was received, thereby making it a law of the land."—O. Skinner, *The Issues of Am. Politics, pt.* 2, *ch.* 2.—"The law made the agents of this Bureau guardians of freedmen, with power to make their contracts, settle their disputes with employers, and care for them generally. The position of Bureau agent was one of power, of responsibility, capable of being used beneficently, and sometimes, no doubt, it was; but these officials were subjected to great temptation. . . . Nearly every one of these agents who remained South after reconstruction was a candidate for office; and many actually became Governors, Judges, Legislators, Congressmen, Postmasters, Revenue officers, etc."—H. A. Herbert, *Why the Solid South? ch.* 1.

A. D. 1865-1866 (December—April).— The Reconstruction question in Congress.— The Joint Committee of Fifteen.— The shaping of the Fourteenth Amendment.— The "independent measures of the Executive for reconstruction were far from giving satisfaction to the Republican party. Within a few days after the meeting of Congress, in December, 1865, Mr. Stevens, of Pennsylvania, asked leave to introduce a joint resolution which provided that a committee of fifteen members should be appointed — nine of whom were to be members of the House and six to be members of the Senate — for the purpose of inquiring into the condition of the states which had formed the so-called Confederate States of America. This committee was to report whether these states or any of them were entitled to be represented in either house of Congress. Leave was given to report at any time, by bill or otherwise, and until such should be made and finally acted upon by Congress, no member was to be received into either house from any of those states. All papers relating to this representation in Congress were to be referred to this committee without debate. This resolution was adopted in the House by a vote of — yeas 133, nays 36." In the Senate it received amendments which made it a concurrent, instead of a joint resolution, and which struck out the clause relating to the non-admittance of members from the States in question pending the committee's report, and also that which required a reference of papers to the committee without debate.— S. S. Cox, *Three Decades of Federal Legislation, ch.* 18.— The Joint Committee on Reconstruction was constituted by the appointment (December 14), on the part of the House, of Thaddeus Stevens, Elihu B. Washburn, Justin S. Morrill, Henry Grider, John A. Bingham, Roscoe Conkling, George S. Boutwell, Henry T. Blow, and Andrew J. Rogers; and by the appointment (December 21), on the part of the Senate, of William Pitt Fessenden, James W. Grimes, Ira Harris, Jacob M. Howard, Reverdy Johnson, and George H. Williams. The most serious question connected with the problem of reconstruction was that arising from the great increase of representation in Congress, and consequent augmentation of political weight and power, that must necessarily accrue to the lately rebellious States from the emancipation of their slaves. To this question the Committee gave their attention first. By an original provision of the Constitution, representation is based on the whole number of free persons in each State and three-fifths of all other persons. "When all become free, representation for all necessarily follows. As a consequence the inevitable effect of the rebellion would be to increase the political power of the insurrectionary States, whenever they should be allowed to resume their positions as States of the Union. As representation is by the Constitution based upon population, your committee [said their report, when made, on the 8th of June, 1866] did not think it advisable to recommend a change of that basis. . . . It appeared to your committee that the rights of these persons by whom the basis of representation had been thus increased should be recognized by the general government. . . . It did not seem just or proper that all the political advantages derived from their becoming free should be confined to their former masters, who had fought against the Union, and withheld from themselves, who had always been loyal. . . . Doubts were entertained whether Congress had power, even under the amended Constitution, to prescribe the qualifications of voters in a State, or could act directly on the subject. It was doubtful, in the opinion of your committee, whether the States would consent to surrender a power they had always exercised, and to which they were attached. As the best if not the only method of surmounting the difficulty, and as eminently just and proper in itself, your committee came to the conclusion that political power should be possessed in all the States exactly in proportion as the right of suffrage should be granted, without distinction of color or race. This it was thought would leave the whole question with the people of each State, holding out to all the advantage of increased political power as an inducement to allow all to participate in its exercise." To this conclusion the committee arrived as early as the 22d of January, when they made a preliminary report, recommending an amendment to the constitution to the effect that "Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed: Provided, That whenever the elective franchise shall be denied or abridged in any State on account of race or color, all persons of such race or color shall be excluded from the basis of representation." Grave objections were found to the proposed exclusion of the colored race as a whole from the basis of representation, in case the suffrage should be denied to any part of it. It was shown, moreover, that disfranchisement might be practically accomplished on other grounds than that of race or color and the intended effect of the constitutional provision evaded. Hence the proposition of the Committee

failed in the Senate (March 9, 1866), though adopted by the House (Jan. 31). On the 20th of February, the Committee on Reconstruction reported a concurrent resolution, "That in order to close agitation upon a question which seems likely to disturb the action of the Government, as well as to quiet the uncertainty which is agitating the minds of the people of the eleven States which have been declared to be in insurrection, no Senator or Representative shall be admitted into either branch of Congress from any of said States until Congress shall have declared such State entitled to such representation." The House adopted this important concurrent resolution the same evening. In the Senate it was debated until the 2d of March, when it was passed by a vote of 29 to 18. On the 30th of April the Reconstruction Committee reported a joint resolution embodying a comprehensive amendment to the Constitution, designed to protect the rights of the freedmen of the South, as citizens of the United States, and to fix the basis of representation in Congress, as well as to settle other questions arising out of the Rebellion. As adopted by Congress in June, and subsequently ratified by the legislatures of the necessary number of States this became what appears as the Fourteenth Amendment to the Constitution of the United States — see below: A. D. 1866 (JUNE). "This proposed amendment to the Constitution was accompanied by two bills, one of which provided that when any State lately in insurrection should have ratified the amendment, its Senators and Representatives, if found duly elected and qualified, should be admitted as members of Congress. The other bill declared the high ex-officials of the late Confederacy ineligible to any office under the Government of the United States."— W. H. Barnes, *Hist. of the 39th Cong., ch.* 3, *and* 13–19.

A. D. 1866 (April).—The passage of the first Civil Rights Bill over the President's veto.—"Immediately on the reassembling of Congress after the holidays, January 5, 1866, Mr. Trumbull [in the Senate], in pursuance of previous notice, introduced a bill 'to protect all persons in the United States in their civil rights, and furnish the means of their vindication.' This bill, having been read twice, was referred to the Committee on the Judiciary." A few days later the bill was reported back from the Committee, and it came up for discussion on the 29th of January. On the 1st of February it passed the Senate and went to the House. In that body it was reported from the Judiciary Committee on the 1st of March, and debate upon the measure began. It passed the House, with some amendments, March 13th, by a vote of 111 to 38. The amendments of the House were agreed to by the Senate, and it went to the President, who returned it with an elaborate veto message on the 27th of March. In the Senate, on the 6th of April, by 33 ayes to 15 nays, and in the House three days later, by 122 affirmative votes to 41 in the negative, the bill was passed notwithstanding the veto, and became law. As enacted, the Civil Rights Bill declared "that all persons born in the United States and not subject to any foreign Power, excluding Indians not taxed, are . . . citizens of the United States; and such citizens of every race and color, without regard to any previous condition of slavery or involuntary servitude, except as a punishment for crime, . . . shall have the same right in every State and Territory of the United States to make and enforce contracts, to sue, be parties, and give evidence, to inherit, purchase, lease, sell, hold, and convey real and personal property, and to full and equal benefit of all laws and proceedings for the security of person and property as is enjoyed by white citizens, and shall be subject to like punishment, pains, and penalties, and to none other, any law, statute, ordinance, regulation, or custom to the contrary notwithstanding." Section 2 of the act provided penalties for its violation. The remaining sections gave to the district and circuit courts of the United States cognizance of all crimes and offenses committed against the provisions of the act; extended the jurisdiction of those courts and enlarged and defined the powers and duties of the district attorneys, marshals, deputy marshals and commissioners of the United States, to that end; made it lawful for the President "to employ such part of the land or naval forces of the United States, or of the militia, as shall be necessary to prevent the violation and enforce the due execution of this act;" and, finally, provided that "upon all questions of law arising in any cause under the provisions of this act a final appeal may be taken to the Supreme Court of the United States."— W. H. Barnes, *Hist. of the 39th Cong., ch.* 9–11.

A. D. 1866 (June).—Congressional adoption of the Fourteenth Amendment.—The joint resolution, embodying the important amendment to the Federal Constitution which became, when ratified, the Fourteenth Amendment, reported to Congress on the 30th of April, 1866, by the Joint Committee on Reconstruction—see above: A. D. 1865–1866 (DECEMBER—APRIL)—was passed by the House of Representatives on the 10th of May, and by the Senate on the 8th of June, with amendments which the House concurred in on the 13th of June. Having no constitutional power to veto the resolution, President Johnson sent a message to Congress on the 22d expressing his disapproval of it. The proposed constitutional amendment as it passed both Houses of Congress, and as it became part of the constitution of the United States by subsequent ratification of the States, is as follows: "Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws. Section 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not

taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State. Section 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability. Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void. Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article."—W. H. Barnes, *Hist. of the 39th Cong., ch.* 17–18.

A. D. 1866-1867 (October — March).—The Reconstruction issue before the people.—Congress sustained by the North. — President Johnson and the South. — Rejection of the Fourteenth Amendment by the Southern States.— In the elections of 1866 the canvass turned upon the issue between Congress and the President concerning Reconstruction, and the popular verdict was overwhelmingly adverse to the Presidential policy, while a new Congress was elected far more Radical in disposition than its predecessor. Every Northern State was swept by the Republicans, with heavily increased majorities. Even those "which had been tenaciously Democratic gave way under the popular pressure. . . . The aggregate majority for the Republicans and against the Administration in the Northern States was about 390,000 votes. In the South the elections were as significant as in the North, but in the opposite direction. Wherever Republican or Union tickets were put forward for State or local offices in the Confederate States, they were defeated by prodigious majorities. Arkansas gave a Democratic majority of over 9,000, Texas over 40,000, and North Carolina 25,000. The border slave States were divided. Delaware, Maryland and Kentucky gave strong majorities for the Democrats, while West Virginia and Missouri were carried by the Republicans. The unhappy indication of the whole result was that President Johnson's policy had inspired the South with a determination not to submit to the legitimate results of the war, but to make a new fight and, if possible, regain at the ballot-box the power they had lost by war. The result of the whole election was to give to the Republicans 143 representatives in Congress and to the Democrats but 49." But when Congress assembled, in December, the President was found to be inflexibly determined to pursue the line of policy which he had marked out. In his message he reiterated his views "with entire disregard of the popular result which had so significantly condemned him. . . . The President's position . . . excited derision and contempt in the North, but it led to mischievous results in the South. The ten Confederate States which stood knocking at the door of Congress for the right of representation, were fully aware, as was well stated by a leading Republican, that the key to unlock the door had been placed in their own hands. They knew that the political canvass in the North had proceeded upon the basis, and upon the practical assurance (given through the press, and more authoritatively in political platforms), that whenever any other Confederate State should follow the example of Tennessee, it should at once be treated as Tennessee had been treated. Yet, when this position had been confirmed by the elections in all the loyal States, and was, by the special warrant of popular power, made the basis of future admission, these ten States, voting upon the Fourteenth Amendment at different dates through the winter of 1866–67, contemptuously rejected it. In the Virginia Legislature only one vote could be found for the Amendment. In the North-Carolina Legislature only 11 votes out of 148 were in favor of the Amendment. In the South-Carolina Legislature there was only one vote for the Amendment. In Georgia only two votes out of 169 in the Legislature were in the affirmative. Florida unanimously rejected the Amendment. Out of 106 votes in the Alabama Legislature only ten could be found in favor of it. Mississippi and Louisiana both rejected it unanimously. Texas, out of her entire Legislature, gave only five votes for it, and the Arkansas Legislature, which had really taken its action in the preceding October, gave only three votes for the Amendment. . . . It was naturally inferred and was subsequently proved, that the Southern States would not have dared to take this hostile attitude except with the encouragement and the unqualified support of the President."— J. G. Blaine, *Twenty Years of Congress, v.* 2, *ch.* 10–11.—"No factor in those elections [of 1866] proved more potential than the rejection by Southern Legislatures of the pending Fourteenth Amendment to the Constitution of the United States. The clauses on which its acceptance or rejection turned in these assemblies were: Section II., which apportioned Representatives in Congress upon the basis of the voting population; and Section III., which provided that no person should hold office under

the United States who, having taken an oath as a Federal or state officer to support the Constitution, had subsequently engaged in the war against the Union. It was claimed by the friends of the Amendment to be especially unfair that the South should have representation for its freedmen and not give them the ballot. The right, however, of a state to have representation for all its free inhabitants, whether voters or not, was secured by the Constitution, and that instrument even allowed three-fifths representation for slaves. New York, Ohio, and other states denied the ballot to free negroes; some states excluded by property qualification and others by educational tests, yet all enjoyed representation for all their peoples. The reply to this was that the Constitution ought to be amended because the South would now have, if negroes were denied the ballot, a larger proportion of non-voters than the North. Southern people were slow to see that this was good reason for change in the Constitution, especially as they believed they were already entitled to representation, and conceived that they ought to have a voice in proposing as well as in the ratification of amendments. Five of the restored states had already ratified the Thirteenth Amendment, and such ratification had been counted valid. If they were states, they were certainly entitled to representation. So they claimed. It was perhaps imprudent for Southern people at that time to undertake to chop logic with their conquerors, or indeed to claim any rights at all. . . . The insuperable objection, however, to the ratification of the Fourteenth Amendment was to be found in the clause which required the people of the late Confederate States to disfranchise their own leaders, to brand with dishonor those who had led them in peace and in war."—H. A. Herbert, *Why the Solid South?* (*Noted Men on the Solid South*) *pp.* 15-16.—In a letter addressed, November 25, 1866, to General Richard Taylor, lately of the Confederate army, and brother-in-law of Jefferson Davis, General Grant wrote: "I have talked with several members of Congress who are classed with the Radicals; Schenck and Bidwell for instance. They express the most generous views as to what would be done if the Constitutional amendments proposed by Congress were adopted by the Southern States. What was done in the case of Tennessee was an earnest of what would be done in all cases. Even the disqualification to hold office imposed on certain classes by one article of the amendment would, no doubt, be removed at once, except it might be in the cases of the very highest offenders, such, for instance, as those who went abroad to aid in the Rebellion, those who left seats in Congress, etc. All or very nearly all would soon be restored, and so far as security to property and liberty is concerned, all would be restored at once. I would like exceedingly to see one Southern State, excluded State, ratify the amendments to enable us to see the exact course that would be pursued. I believe it would much modify the demands that may be made if there is delay." "But the President's endeavors did not cease. . . . He used all the authority of his office to dissuade the Southerners from accepting the amendment which the entire North had ratified. . . . He converted good feeling and good will on both sides into discord, and precipitated disasters almost equal to those from which the State had barely escaped. . . . This view of Johnson's conduct was thenceforth steadily maintained by Grant."—A. Badeau, *Grant in Peace, ch.* 5.

A. D. 1866-1867 (December—March).—The Tenure-of-Office Bill.—"Against the early decision of the founders of the Government, . . . against the repeatedly expressed judgment of ex-President Madison, against the equally emphatic judgment of Chief Justice Marshall, and above all, against the unbroken practice of the Government for 78 years, the Republican leaders now determined to deprive the President of the power of removing Federal officers. Many were induced to join in the movement under the belief that it was important to test the true meaning of the Constitution in the premises, and that this could be most effectively done by directly restraining by law the power which had been so long conceded to the Executive Department. To that end Mr. Williams of Oregon, on the first Monday of December, 1866, introduced a bill 'to regulate the tenure of civil offices.'"—J. G. Blaine, *Twenty Years of Congress, v.* 2, *p.* 270.—"After grave consideration and protracted discussion in both houses of Congress, the [Tenure-of-Office bill] was passed near the close of the session. On the 2d of March [1867] the bill encountered the veto of the President, who saw in the measure serious interference with the ability of the Executive to keep his oath to preserve, protect, and defend the Constitution of the United States. The bill was immediately passed over the veto without debate. The act thus passed provides that officers appointed by and with the advice and consent of the Senate shall hold their offices until their successors are in like manner appointed and qualified. Members of the Cabinet hold their offices during the term of the President by whom they are appointed, and for one month thereafter, subject to removal by consent of the Senate."—W. H. Barnes, *Hist. of the 39th Cong., p.* 560.—Soon after the inauguration of President Grant, in 1868, the Tenure-of-Office act was so far modified as to practically release the President from the restraint which it put upon his power of removal.—J. G. Blaine, *Twenty Years of Congress, v.* 2, *ch.* 18, *and App. B.*

A. D. 1866-1871.—The Ku-Klux Klan of the Southern States and its outrages.—"It would have been contrary to the experience of mankind, and an exception to all the teachings of history, if the social and political revolution which the results of the war had imposed on the states then recently insurgent had gone into operation peacefully, harmoniously, and successfully. It was impossible for such to be the case. The transition was from a state in which the superiority and domination of the white race over the colored race existed unquestioned for centuries. It was to a condition of things in which the most prominent whites were disfranchised and deprived of the right to hold public offices. Their late slaves were enfranchised, and the judicial and other offices were largely filled by dishonest and unfriendly strangers from the North. What was worse still, many of these places were filled by ignorant and brutal negroes. The transition was too sudden and violent. It was hard to submit to it quietly. No people, least of all such

a proud and intolerant people as that of the South, could see their local governments transferred from their own hands into the hands of their former slaves without being goaded into violent resistance. This resistance took the form, in most of the Southern States, not of armed opposition to the Federal or the state governments, but of organized intimidation and terrorism. It was directed against the colored people and against their white allies and leaders. It made an objective point of the agents of the Freedmen's Bureau, ministers of the gospel, and school teachers,—all adventurers from the North, or men who had, in quest of fortune, immigrated into these states. All of these classes were regarded as public or private enemies. They were designated by the opprobrious title of 'carpet-baggers.' The history of these outrages fills many volumes of reports made by joint and separate committees of the two houses of Congress. It is from these volumes, from reports of military commanders in the South, and from other official documents, that the following epitome, exhibiting the lawlessness that prevailed in the Southern States during the . . . decade between 1865 and 1875, is made. These documents are so full of the details of crime and violence, and are so voluminous, that it is exceedingly difficult to select from them, or to convey a correct idea of their relations. Very soon after the close of the Civil War, almost as soon as the Reconstruction acts were begun to be put in operation, secret societies were organized in various states of the South. Their object, either secret or avowed, was to prevent the exercise of political rights by the negroes. These societies took various names, such as 'The Brotherhood,' 'The Pale Faces,' 'The Invisible Empire,' 'The Knights of the White Camellia'; but all these were finally merged into, or compounded with, the formidable and dreaded society denominated the 'Ku-Klux Klan.' Their acts of lawlessness and cruelty have passed into local and congressional history as 'Ku-Klux outrages.' The State of Virginia was a remarkable exception to the other states in its exemption from crimes of this character; while the two neighboring States of North Carolina and Tennessee furnished, perhaps, more material for investigation into Ku-Klux outrages than any other portion of the South. This barbarous and bloodthirsty organization is said to have originated in 1866. There is no doubt that the Ku-Klux Klan was organized at first only to scare the superstitious blacks. It is true that it arose out of the frivolities of some young Tennesseans. Horrid tales were told to frighten the negroes from roaming about and pilfering. The testimony before the committee on that subject, of which the writer was a member, showed that they daily visited houses and talked their foolish talk; that they were 'mummicking about,'—whatever that means. . . . There is no doubt that political reasons had their influence after the Ku-Klux were under way. . . . Certain it is, that they soon came to be made use of, in the most arbitrary, cruel, and shocking manner, for the furtherance of political ends, and for the crushing out of Republicanism in the Southern States; to which party the colored people were almost unanimously attached. The crimes and outrages narrated in these pages had their origin, almost exclusively, in political causes,—in the effort on the part of the whites to set at naught the rights of suffrage guaranteed to the negroes, and to exclude from Federal, state, county, and local offices all persons whose reliance for election to such offices was mainly, if not altogether, on negro votes. General Forrest estimated the strength of the Ku-Klux organization in Tennessee at 40,000. He expressed the belief that it was still stronger in other states. The members were sworn to secrecy, under the penalty of death for breach of fidelity. Their ordinary mode of operation —as gathered from the mass of evidence — was to patrol the country at night. They went well armed and mounted. They wore long white gowns. They masked their faces. Their appearance terrified the timid and superstitious negroes who happened to see them as they rode past, and who then regarded them as ghostly riders. But most frequently they surrounded and broke into the cabins of the negroes; frightened and maltreated the inmates; warned them of future vengeance; and probably carried off some obnoxious negro, or 'carpet-bagger,' whose fate it was to be riddled with murderous bullets, hung to the limb of a tree, or mercilessly whipped and tortured, for some offense, real or imaginary, but generally because he was active in politics or in negro schools or churches. . . . According to the majority report of the Senate select committee of March 10, 1871, the Ku-Klux associations, by whatever name known, were instituted in North Carolina in 1867 or 1868. . . . The report of the Senate committee of the 10th of March, 1871, before referred to, recites a startling number of Ku-Klux outrages. They embrace whipping, mutilation, and murder. These cruelties took place in North Carolina, between December, 1868, and December, 1870. The report gives some of the horrifying details." —S. S. Cox, *Three Decades of Federal Legislation, ch.* 25–26.—"Senator Scott, in a speech in the Senate, gave as the result of the investigation that came to his own knowledge, as follows: In North Carolina, in 14 counties, there were 18 murders and 315 whippings. In South Carolina, 9 counties, 35 murders and 276 other flagrant outrages. In Georgia, 29 counties, 72 murders and 126 whippings. In Alabama, 26 counties, 215 murders and 116 other outrages. In Florida, in one county alone there were 153 cases of homicide. In Mississippi, 20 counties, 23 homicides and 76 other cases of outrage. In 99 counties in different States he found 526 homicides and 2,009 cases of whipping. But the committee state that in Louisiana alone in the year 1868 there were more than 1,000 murders, and most of them were the result of the operations of the Ku Klux."—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v.* 3, *ch.* 45.

A. D. 1867 (January).—Negro Suffrage in the District of Columbia.— As early as the 18th of January, 1866, the House of Representatives passed a bill extending the suffrage in the District of Columbia, by striking out the word "white" from all laws and parts of laws prescribing the qualification of electors for any office in the District, and declaring that no person should be disqualified from voting at any election in the District on account of color. As it was known that the President would veto the bill if sent to him,

the Senate held it until the next session. In December, 1866, it was called up in that body by Senator Sumner, and after considerable debate was passed, December 13th. On the 7th of January following it was returned by the President with his veto, but was passed over the veto by the Senate (29 to 10) the same day, and by the House (113 to 38) the day following, thus becoming a law.—W. H. Barnes, *Hist. of the 39th Cong., ch. 4 and 21.*

A. D. 1867 (March).—The Purchase of Alaska. See ALASKA: A. D. 1867.

A. D. 1867 (March).—The Military Reconstruction Acts of Congress.—"Congress had declared amply enough how the rebel States should not be reinstated. Two years after the close of the war, however, the Union was still unrestored, and while claiming, under the Constitution, absolute jurisdiction of the question, Congress had failed to prescribe the terms on which the Union should be restored. . . . Both the country and Congress were at last convinced by the course of events that affirmative Congressional action was indispensable, involving the sweeping away of Mr. Johnson's ex-rebel State governments and the enfranchisement of the emancipated slaves. Mr. Stevens had been of that opinion ever since the emasculation by the Senate of the Fourteenth Amendment, as adopted by the House [which had proposed to exclude from the right to vote for Representatives in Congress and for Presidential electors, 'until the 4th day of July, in the year 1870, all persons who voluntarily adhered to the late insurrection, giving it aid and comfort'], and immediately thereupon proposed a measure containing the germ of the Military Reconstruction Act. Called up from time to time, and pressed upon the attention of the House by Mr. Stevens, it was passed on the 13th day of February, 1867, after a four weeks' debate upon it in Committee of the Whole. By the 20th both Houses had agreed upon it, and passed it. On the 2d day of March the President returned it to the House with his veto, over which it was at once passed by both Houses; and with only two days of the Thirty-ninth Congress to spare, it become law."—O. J. Hollister, *Life of Schuyler Colfax, ch. 9.*—The Military Reconstruction Act set forth in its preamble that "Whereas, no legal State governments or adequate protection for life or property now exists in the rebel States [enumerating all the late Confederate States except Tennessee]; . . . and whereas it is necessary that peace and good order should be enforced in said States until loyal and republican State governments can be legally established: therefore, Be it enacted, . . . That said rebel States shall be divided into military districts and made subject to the military authority of the United States, as hereinafter prescribed; and for that purpose Virginia shall constitute the first district, North Carolina and South Carolina the second district, Georgia, Alabama and Florida the third district, Mississippi and Arkansas the fourth district, and Louisiana and Texas the fifth district." Sections 2, 3 and 4 of the act made it the duty of the President to assign to the command of each of the said districts an officer of the army not below the rank of brigadier-general, and defined the duties and powers of such commander, providing for the assignment to him of an adequate military force. Section 5 provided "That when the people of any one of said rebel States shall have formed a constitution of government in conformity with the Constitution of the United States in all respects, framed by a convention of delegates elected by the male citizens of said State 21 years old and upward, of whatever race, color, or previous condition, who have been resident in said State for one year previous to the day of such election, except such as may be disfranchised for participation in the rebellion or for felony at common law, and when such constitution shall provide that the elective franchise shall be enjoyed by all such persons as have the qualifications herein stated for electors of delegates, and when such constitution shall be ratified by a majority of the persons voting on the question of ratification who are qualified as electors for delegates, and when such constitution shall have been submitted to Congress for examination and approval, and Congress shall have approved the same, and when said State, by a vote of its Legislature elected under said constitution, shall have adopted the amendment to the Constitution of the United States, proposed by the Thirty-ninth Congress, and known as article fourteen, and when said article shall have become a part of the Constitution of the United States, said State shall be declared entitled to representation in Congress, and Senators and Representatives shall be admitted therefrom on their taking the oath prescribed by law, and then and thereafter the preceding sections of this act shall be inoperative in said State." It was further provided that no person excluded from office by the Fourteenth Amendment should be a member of the convention to frame a constitution for any of said rebel States, and that any civil government which might exist in any of the said States prior to the admission of its representatives to Congress should be deemed provisional only, and subject to the paramount authority of the United States. "The friends of this measure were dissatisfied with it on the ground of its incompleteness in not containing provisions for carrying it into effect in accordance with the purpose of its framers. . . . The Fortieth Congress, meeting on the 4th of March, immediately upon the close of its predecessor, proceeded without delay to perfect and pass over the President's veto [March 23, 1867] a bill supplementary to the act to provide for the more efficient government of the rebel States." By this supplementary act specific instructions were given as to the course of procedure to be followed in making a registration of the voters qualified under the act and in conducting the elections provided for.—W. H. Barnes, *Hist. of the 39th Cong., ch. 22.*

ALSO IN: *Why the Solid South?* (*Noted Men on the Solid South.*)

A. D. 1868 (March — May).—Impeachment and Trial of President Johnson.—"Until the spring of 1866, a year after Mr. Johnson became President, there was entire harmony between him and his Cabinet. . . . No objection was raised even to that part of the President's first message which treated of the suffrage question, by any member of the Cabinet. It was in fact approved by all, and by none more heartily than by Mr. Stanton. A change took place soon after the Civil Rights bill became a law over the President's veto, and bitter con-

troversy arose between the President and Congress. In this controversy, and at its commencement, Mr. Dennison [Postmaster-general] and Mr. Harlan [Secretary of the Interior] sided with Congress and tendered their resignations, which were very reluctantly accepted. They resigned because they could not heartily sustain the President, but there was no breach of the social relations which had existed between them. Mr. Speed [Attorney-general] soon after followed the example of Dennison and Harlan. Mr. Stanton [Secretary of War] also sided with Congress, but he did not resign. He was advised by prominent political and personal friends to 'stick,' and he did so, contrary to all precedent and in opposition to the judgment of conservative men of his party. . . . He attended the Cabinet meetings, not as an adviser of the President, but as an opponent of the policy to which he had himself been committed, and the President lacked the nerve to dismiss him. . . . In this crisis of his political life, Mr. Johnson exhibited a want of spirit and decision which astonished those who were familiar with his antecedents. He knew when the Tenure-of-Office Bill was before Congress that the object of its leading supporters was to tie his hands, and yet he refrained from using them when they were free. . . . When he did act he acted unwisely. He retained Mr. Stanton in his Cabinet when his right to remove him was unquestionable. He suspended him [August 12, 1867] after the Tenure-of-Office Bill had become a law, and in accordance with its provisions, [directing General Grant to act as Secretary of War ad interim]; and when the Senate refused to approve of the suspension [January 13, 1868], he issued orders for his removal and the appointment of Lorenzo Thomas to be Secretary of War ad interim. If he had tried to give his enemies an advantage over him, to furnish them with weapons for his own discomfiture, he could not have done it more effectually. . . . If he had removed Mr. Stanton instead of suspending him, and justified his action on the ground that his control of the members of his Cabinet was a constitutional right of which he could not be deprived by Congress, he probably would not have been impeached. The gist of the charges against him was that he had violated a law of Congress in removing Mr. Stanton, or issuing an order for his removal, after the Senate had refused to sanction his suspension. In the articles of impeachment there were other charges against the President, the most serious of which were that he had delivered intemperate, inflammatory speeches, which were intended to bring into contempt the Congress of the United States and duly enacted laws. The speeches made by the President in Cleveland, St. Louis, and other places in August and September, 1866 — in fact, all his public addresses during his contest with Congress — were in the worst possible taste, derogatory to himself and to his high position; but they . . . did not constitute good ground for his impeachment; and this was the opinion of the House, which in January, 1867, after they were made, refused to impeach him by the decisive vote of 108 to 57. Other causes for his impeachment were subsequently sought for. His bank account was examined. His private conduct in Washington was carefully scrutinized. Men were employed to investigate his public and private character in Tennessee, but nothing was found to his discredit. . . . Nothing was found to justify his impeachment but the order which he issued for the removal of Mr. Stanton and his appointment of General Thomas to be Secretary of the War Department ad interim after the Senate had refused to sanction Mr. Stanton's suspension." The formal presentment by the House of Representatives of its Impeachment against the President, at the bar of the Senate, sitting as a Court of Impeachment, was made on the 5th day of March, 1868. The answer of the President was presented on the 23d; the trial opened on Monday, the 30th of March, and closed on the 26th of May following. "The trial was a very interesting one, not only to the people of the United States, but to the people of other countries. . . . It was the first instance in the history of nations of the trial of the head of a government before one of the branches of the law-making power, sitting as a judicial tribunal, on charges presented by another. The presiding officer was the Chief Justice of the Supreme Court — the senators of the respective States were the jury — the House of Representatives the prosecutor. The managers to conduct the impeachment for the House were John A. Bingham, George S. Boutwell, James F. Wilson, Benjamin F. Butler, Thomas Williams, Thaddeus Stevens and John A. Logan, all members of the House, all lawyers, and some of them distinguished in the profession. The President entered his appearance by Henry Stanbery, Benjamin K. Curtis, Jeremiah S. Black, William M. Evarts, and Thomas A. K. Nelson. William S. Groesbeck, in the course of the trial, appeared and took part as counsel for the President in place of Mr. Black." The result of the trial was a failure of the Impeachment. The senators who voted "guilty" were 35 in number — being less than two-thirds of the whole — against 19. Of those who voted in the negative, seven were Republicans who had steadily opposed the President's policy; four were Republicans who had adhered to him throughout; eight were Democrats.—H. McCulloch, *Men and Measures of Half a Century, ch.* 26. —In the opinion of Mr. Blaine, "the sober reflection of later years has persuaded many who favored Impeachment that it was not justifiable on the charges made," and that "the President was impeached for one series of misdemeanors, and tried for another series."—J. G. Blaine, *Twenty Years of Congress, v.* 2, *ch.* 14.

A. D. 1868.—The Burlingame Treaty with China. See China: A. D. 1857–1868.

A. D. 1868 (November).— The Twenty-first Presidential Election. — General Ulysses S. Grant, nominated by the Republican party, was elected President in November 1868, by 3,012,833 votes of the people against 2,703,249 votes cast for Horatio Seymour, ex-Governor of New York, the candidate of the Democratic party. The electoral vote returned and counted was 214 for Grant and 80 for Seymour, who carried the States of New York, New Jersey, Delaware, Maryland, Georgia, Louisiana, Kentucky, and Oregon. Schuyler Colfax, of Indiana, was elected Vice President, over General Frank P. Blair.— E. Stanwood, *Hist. of Presidential Elections, ch.* 22.

A. D. 1868-1870. — Reconstruction complete.—Restoration of all the Southern States to representation in Congress.—"On the 22d of June, 1868, an act was passed, with the following preamble and resolution, for the admission of Arkansas:—'Whereas the people of Arkansas, in pursuance of an act entitled, An act for the more efficient government of the Rebel States, passed March 2, 1867, and the acts supplementary thereto, have framed and adopted a constitution of State government, which is republican, and the legislature of said State has duly ratified the amendment of the Constitution of the United States proposed by the XXXIXth Congress, and known as Article XIV.; Therefore, Be it enacted, etc., that the State of Arkansas is entitled and admitted to representation in Congress, as one of the States of the Union, upon the following fundamental condition.' The 'fundamental condition,' as finally agreed upon, was, 'That there shall never be in said State any denial or abridgment of the elective franchise, or of any other right, to any person by reason or on account of race or color, except Indians not taxed.' The bill was vetoed by the President on the 20th, but passed over the veto on the 22d in the House by the vote of 111 to 31, and in the Senate by a vote of 30 to 7. On the 25th of June a similar act was passed admitting the States of North Carolina, South Carolina, Louisiana, Georgia, Alabama, and Florida, in pursuance of a similar preamble, with the conditions that they should ratify the Fourteenth Amendment, that they should not deprive 'any citizen, or class of citizens of the State of the right to vote by the constitution thereof'; and that no person prohibited from holding office by said Amendment should be 'deemed eligible to any office in either of said States unless relieved from disability as provided in said amendment'; the State of Georgia being also required to declare 'null and void' certain provisions of its constitution, and 'in addition give the assent of said State to the fundamental condition hereinbefore imposed on the same.' The bill passed the House, May 14,—yeas 110, nays 35; in the Senate, June 9,—yeas 31, nays 5. It was vetoed by the President on the 25th, and passed, the same day, by both houses, over the Presidential veto. On the 27th of January, 1870, Virginia was admitted into the Union by a vote, in the House, of 136 to 58; and in the Senate by a vote of 47 to 10. The following were the preamble, oaths, and conditions precedent: 'Whereas the people of Virginia have framed and adopted a constitution of State government which is republican; and whereas the legislature of Virginia, elected under said constitution, has ratified the Fourteenth and Fifteenth Amendments of the Constitution of the United States; and whereas the performance of these several acts in good faith is a condition precedent to a representation of the State in Congress,' said State should be admitted to a representation in Congress; with the additional conditions precedent, however, that the constitution should never be so amended as to deprive any class of citizens of the right 'to vote,' 'to hold office,' on account of race, color, or previous condition of servitude; neither should there be 'other qualifications' required for such reason; nor should any be deprived of 'school rights or privileges' on such account. On the 3d of February Mississippi was admitted by a bill resembling the former in every particular, by substantially the same vote. On the 30th of March Texas was readmitted to the Union on a bill very similar, though not identical with the above. . . . By this act of Congress the last of the 'wayward sisters' was brought back and restored to the family of States, and the fractured Union was, outwardly at least, repaired. It was ten years, eight months, and twenty days after South Carolina raised the banner of revolt and led off in 'the dance of death.'"—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v.* 3, *ch.* 44.

A. D. 1869-1870.—The Fifteenth Constitutional Amendment.—"The great defect of the Fourteenth Amendment, as freely charged during its discussion, was its at least tacit recognition of the right of States to disfranchise the ex-slaves, should they so elect. True, they could not do it without sacrificing so much in the basis of their representation in Congress; but if they were willing to make that sacrifice, there was nothing in the amendment to prevent such discrimination. To remedy that defect . . . it was resolved to incorporate into the organic law a new provision for their protection, and to supplement the amendments of the Constitution already adopted by another. There were accordingly introduced into both houses, almost simultaneously, measures for that purpose. . . . In the House, on the 11th of January, 1869, Mr. Boutwell reported from the Committee on the Judiciary a joint resolution proposing an amendment which provided that the right to vote of no citizen should be abridged by the United States or any State by reason of race, color, or previous condition of slavery." The joint resolution was adopted in the House, 150 affirmative to 42 negative votes, on the 30th of January. Adopted in the Senate with amendments, by 39 to 16 votes, it went to a Committee of Conference, on whose report the joint resolution was finally adopted by both Houses on the 25th of February, and submitted for ratification to the legislatures of the States, in the following form: "Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude. Section 2. The Congress shall have power to enforce this article by appropriate legislation." "The amendment received the votes of 29 States, constituting the requisite three fourths, and thus became a part of the organic law. On the 30th of March, 1870, President Grant communicated the fact to Congress in a special message."—H. Wilson, *Hist. of the Rise and Fall of the Slave Power, v.* 3, *ch.* 47.

A. D. 1869-1890.—Recovery of the domination of Whites at the South.—Suppression of the Colored vote.—Prosperity of the Southern States.—"Between 1869 and 1876, the whites had in every Southern State except South Carolina, Florida, and Louisiana, regained control of the government, and in 1876 those three States were also recovered. The circumstances were different, according to the character of the population in each State. In some a union of the moderate white Republicans with the Democrats, brought about by the disgust of all property holders at the scandals they saw and at the increase to their burdens as tax-payers, had secured legitimately chosen majorities, and ejected the corrupt officials. In some the same result was attained by paying or otherwise inducing the negroes not to go to the polls, or by driving them away by threats or actual violence. Once possessed again of a voting majority, the whites, all of whom had by 1872 been relieved of their disabilities, took good care, by a variety of devices, legal and extra-legal, to keep that majority safe; and in no State has their control of the government been since shaken. President Hayes withdrew, in 1877, such Federal troops as were still left at the South, and none have ever since been despatched thither. . . . With the disappearance of the carpet-bag and negro governments, the third era in the political history of the South since the war began. The first had been that of exclusively white suffrage; the second, that of predominantly negro suffrage. In the third, universal suffrage and complete legal equality were soon perceived to mean in practice the full supremacy of the whites. To dislodge the coloured man from his rights was impossible, for they were secured by the Federal Constitution which prevails against all State action. The idea of disturbing them was scarcely entertained. Even at the election of 1872 the Southern Democrats no more expected to repeal the Fifteenth Amendment than the English Tories expected at the election of 1874 to repeal the Irish Church Disestablishment Act of 1869. But the more they despaired of getting rid of the amendment, the more resolved were the Southern people to prevent it from taking any effect which could endanger their supremacy. They did not hate the negro, certainly not half so much as they hated his white leaders by whom they had been robbed. 'We have got,' they said, 'to save civilization,' and if civilization could be saved only by suppressing the coloured vote, they were ready to suppress it. . . . The modes of suppression have not been the same in all districts and at all times. At first there was a good deal of what is called 'bulldozing,' i. e. rough treatment and terrorism, applied to frighten the coloured men from coming to or voting at the polls. Afterwards, the methods were less harsh. Registrations were so managed as to exclude negro voters, arrangements for polling were contrived in such wise as to lead the voter to the wrong place so that his vote might be refused; and, if the necessity arose, the Republican candidates were counted out, or the election returns tampered with. 'I would stuff a ballot-box,' said a prominent man, 'in order to have a good, honest government;' and he said it in good faith, and with no sense of incongruity. Sometimes the local negro preachers were warned or paid to keep their flocks away. . . . Notwithstanding these impediments, the negro long maintained the struggle, valuing the vote as the symbol of his freedom, and fearing to be reenslaved if the Republican party should be defeated. Leaders and organizers were found in the Federal office-holders, of course all Republicans. . . . After 1884, however, when the presidency of the United States passed to a Democrat, some of these office-holders were replaced by Democrats and the rest became less zealous. . . . Their friends at the North were exasperated, not without reason, for the gift of suffrage to the negroes had resulted in securing to the South a larger representation in Congress and in presidential elections than it enjoyed before the war, or would have enjoyed had the negroes been left unenfranchised. They argued, and truly, that where the law gives a right, the law ought to secure the exercise thereof; and when the Southern men replied that the negroes were ignorant, they rejoined that all over the country there were myriads of ignorant voters, mostly recent immigrants, whom no one thought of excluding. Accordingly in 1890, having a majority in both Houses of Congress and a President of their own party, the Republican leaders introduced a bill subjecting the control of Federal elections to officers to be appointed by the President, in the hope of thus calling out a full negro vote, five sixths of which would doubtless have gone to their party. The measure appeared to dispassionate observers quite constitutional, and the mischief it was designed to remedy was palpable. . . . It passed the House, but was dropped in the Senate under the threat of an obstructive resistance by the (then Democratic) minority. Secure, however, as the dominance of the whites seems now to be against either Northern legislation or negro revolt, the Southern people are still uneasy and sensitive on the subject. . . . This horror of negro supremacy is the only point in which the South cherishes its old feelings. Hostility to the Northern people has almost disappeared. . . . Just because they felt that they had fought well, they submitted with little resentment, and it has become a proverb among them that the two classes which still cherish bitterness are the two classes that did not fight,— the women and the clergy. . . . Not, however, till the whites regained control between 1870 and 1876, did the industrial regeneration of the country fairly begin. Two discoveries coincided with that epoch which have had an immense effect in advancing material prosperity, and changing the current of men's thoughts. The first was the exploration of the mineral wealth of the highland core of the country. . . . The second discovery was that of the possibility of extracting oil from the seeds of the cotton plant, which had formerly been thrown away, or given to hogs to feed on. The production of this oil has swelled to great proportions, making the cultivation of cotton far more profitable. . . . Most of the crop now raised, which averages eight millions of bales, and in 1894 was expected to exceed ten millions (being more than double that which was raised, almost wholly by slave labour, before the war), is now raised by white farmers; while the mills which spin and weave it into marketable goods are daily increasing and building up fresh industrial communities."—J. Bryce, *The American Commonwealth* (*3d ed.*), *ch.* 92 (*v.* 2).

A. D. 1870.—The Ninth Census.—Total population, 38,558,371 (exceeding that of 1860 by 7,115,049), classed and distributed as follows:

	White.	Black.
North Atlantic division.		
Maine	624,809	1,606
New Hampshire	317,697	580
Vermont	329,613	924
Massachusetts	1,443,156	13,947
Rhode Island	212,219	4,980
Connecticut	527,549	9,668
New York	4,330,210	52,081
New Jersey	875,407	30,658
Pennsylvania	3,456,609	65,294
	12,117,269	179,738
South Atlantic division.		
Delaware	102,221	22,794
Maryland	605,497	175,391
District of Columbia	88,278	43,404
Virginia	712,089	512,841
West Virginia	424,033	17,980
North Carolina	678,470	391,650
South Carolina	289,667	415,814
Georgia	638,926	545,142
Florida	96,057	91,689
	3,635,238	2,216,705
North central division.		
Ohio	2,601,946	63,213
Indiana	1,655,837	24,560
Illinois	2,511,096	28,762
Michigan	1,167,282	11,849
Wisconsin	1,051,351	2,113
Minnesota	438,257	759
Iowa	1,188,207	5,762
Missouri	1,603,146	118,071
Dakota	12,887	94
Nebraska	122,117	789
Kansas	346,377	17,108
	12,698,503	273,080
South central division.		
Kentucky	1,098,692	222,210
Tennessee	936,119	322,331
Alabama	521,384	475,510
Mississippi	382,896	444,201
Louisiana	362,065	364,210
Texas	564,700	253,475
Arkansas	362,115	122,169
	4,227,971	2,204,106
Western division.		
Montana	18,306	183
Wyoming	8,726	183
Colorado	39,221	456
New Mexico	90,393	172
Arizona	9,581	26
Utah	86,044	118
Nevada	38,959	357
Idaho	10,618	60
Washington	22,195	207
Oregon	86,929	346
California	499,424	4,272
	910,396	6,380
Grand total	33,589,377	4,880,009

In addition the census shows 63,199 Chinese, 55 Japanese, and 25,731 civilized Indians, making a total of 38,558,371, as stated above. In the decade preceding this census the immigrant arrivals numbered 2,466,752, of which 1,106,970 were from the British Islands, and 1,073,429 from other parts of Europe.

A. D. 1871.—Renewed Negotiations with Great Britain.—The Joint High Commission, the Treaty of Washington and the Geneva Award. See ALABAMA CLAIMS: A. D. 1869–1871; 1871; and 1871–1872.

A. D. 1871.—The first Civil-Service Reform Act. See CIVIL-SERVICE REFORM IN THE UNITED STATES.

A. D. 1871 (April).—The Force Bill.—At the extra session of Congress, which met March 4, 1871 a sweeping Act was passed to enforce the Fourteenth Amendment. "This Act allowed suit in Federal courts by the party injured against any person who should in any way deprive another of the rights of a citizen; it made it a penal offence to conspire to take away from any person the rights of a citizen; it provided that inability, neglect, or refusal by any State to suppress such conspiracy, to protect the rights of its citizens, or to call upon the President for aid, should be 'deemed a denial by such State of the equal protection of the laws' under the XIVth Amendment; it declared such conspiracies, if not suppressed by the authorities, 'a rebellion against the Government of the United States'; it authorized the President, 'when in his judgment the public safety shall require it,' to suspend the privilege of the writ of habeas corpus in any district, and suppress the insurrection by means of the army and navy; and it excluded from the jury-box any person 'who shall, in the judgment of the court, be in complicity with any such combination or conspiracy.' The authority to suspend the privilege of the writ of habeas corpus was to cease after the end of the next regular Session of Congress."—A. Johnston, *Hist. of Am. Politics, 2d ed., p.* 214.

ALSO IN: *Annual Cyclopædia*, 1871, *p.* 228.

A. D. 1872.—Decision of the San Juan Water Boundary Question by the Emperor of Germany. See SAN JUAN OR NORTHWESTERN WATER-BOUNDARY QUESTION.

A. D. 1872.—The Twenty-second Presidential Election.—The leading candidates for President in 1872 were General Grant, nominated for re-election by the main body of the Republican Party, and Horace Greeley, of New York, put forward by a revolted section of that party and accepted and supported by the Democratic Party. "In 1870 the Republican party in Missouri had split into two parts. The 'Radical' wing wished to maintain for the present the disqualifications imposed on the late rebels by the State Constitution during the war; the 'Liberal' wing, headed by B. Gratz Brown and Carl Schurz, wished to abolish these disqualifications and substitute 'universal amnesty and universal enfranchisement.' Supported by the Democrats, the Liberal Republicans carried the State, though opposed by the Federal office-holders and the influence of the Administration. This success stimulated a reaction in the National Republican party, many of whose members believed that the powers of the Federal Government over the local concerns of the States had already been enforced up to or beyond constitutional limits, that the various enforcement Acts were designed rather for the political advance-

ment of President Grant's personal adherents than for the benefit of the country, the freedmen, or even of the Republican party; and that the efforts to police the Southern States by the force of the Federal Government ought to cease. In the spring of 1871 the Liberal Republicans and Democrats of Ohio began to show symptoms of common feeling on these subjects, and during the summer the 'Liberal' movement continued to develop within the Republican party. January 24th, 1872, the Missouri Liberals issued a call for a National Convention at Cincinnati in the following May." At the meeting in Cincinnati the Liberal Republican Convention nominated Horace Greeley for President, and B. Gratz Brown for Vice President. The Democratic National Convention which met at Baltimore, June 9th, adopted these candidates, with the "platform" on which they were nominated. "A few recalcitrant Democrats met at Louisville, Ky., September 3d, and nominated Charles O'Conor, of New York, and John Quincy Adams, of Massachusetts."—A. Johnston, *Hist. of Am. Politics, 2d ed., ch.* 22.—The Prohibitionists put in nomination James Black, of Pennsylvania, for President, and John Russell, of Michigan, for Vice President. The Republican nominee for Vice President, on the ticket with General Grant, was Henry Wilson, of Massachusetts. The popular vote cast was 3,585,444, or 3,597,132, for Grant, and 2,843,563, or 2,834,125 for Greeley (according to the return that may be counted from Louisiana, where two rival returning boards disputed authority with one another); 29,489 for O'Conor and 5,608 for Black. Mr. Greeley died on the 29th of November, 1872, before the electoral colleges cast their vote, the consequence being that the Democratic votes in the colleges were scattered. The following is the electoral vote for President as counted by Congress: Grant, 286; Thomas A. Hendricks, 42; B. Gratz Brown 18; Charles J. Jenkins 2; David Davis, 1. The votes of Louisiana and Arkansas were rejected, as were three votes cast in Georgia for Horace Greeley, deceased.—E. Stanwood, *Hist. of Presidential Elections, ch.* 23.

Also in: G. W. Julian, *Political Recollections, ch.* 15.—E. McPherson, *Handbook of Politics for* 1872 *and* 1874.

A. D. 1872-1873.—The Credit Mobilier Scandal. See Credit Mobilier Scandal.

A. D. 1873.—The so-called "demonetization of silver."—"We have heard a great deal in later years about the surreptitious demonetization of silver in 1873. There was, however, vastly too much criticism wasted on the act of 1873; for the real demonetization of silver in the United States was accomplished in 1853. It was not the result of accident; it was a carefully considered plan, deliberately carried into legislation in 1853, twenty years before its nominal demonetization by the act of 1873. . . . In 1853 the single standard was gold. This was a situation which no one rebelled against. Indeed, no one seemed to regard it as anything else than good fortune (except so far as the subsidiary coins had disappeared). . . . In the debates it was proposed that, as the cause of the change in the relative values of gold and silver was the increased product of gold, the proper remedy should be to increase the quantity of gold in the gold coins. . . . There was no discussion as to how a readjustment of the ratio between the two metals might be reached, for it was already decided that only one metal was to be retained. This decision, consequently, carried us to a point where the ratio between the two metals was not of the slightest concern. And so it remained. The United States had no thought about the ratios between gold and silver thereafter until the extraordinary fall in the value of silver in 1876. . . . In the provisions of the act of 1853 nothing whatever was said as to the silver dollar-piece. It had entirely disappeared from circulation years before, and acquiescence in its absence was everywhere found. No attempt whatever was thereafter made to change the legal ratio, in order that both metals might again be brought into concurrent circulation. Having enough gold, the country did not care for silver. . . . In 1873 we find a simple legal recognition of that which had been the immediate result of the act of 1853, and which had been an admitted fact in the history of our coinage during the preceding twenty years. In 1853 it had been agreed to accept the situation by which we had come to have gold for large payments, and to relegate silver to a limited service in the subsidiary coins. The act of 1873, however, dropped the dollar piece out of the list of silver coins. In discontinuing the coinage of the silver dollar, the act of 1873 thereby simply recognized a fact which had been obvious to everybody since 1849. It did not introduce anything new, or begin a new policy. Whatever is to be said about the demonetization of silver as a fact must center in the act of 1853. Silver was not driven out of circulation by the act of 1873, which omitted the dollar of 412½ grains, since it had not been in circulation for more than twenty-five years. . . . The act of February 12, 1873, is known as the act which demonetized the silver dollar. Important consequences have been attached to it, and it has even been absurdly charged that the law was the cause of the commercial crisis of September, 1873. As if a law which made no changes in the actual metallic standard in use, and which had been in use thus for more than twenty years, had produced a financial disaster in seven months! To any one who knows of the influence of credit and speculation, or who has followed the course of our foreign trade since the Civil War, such a theory is too absurd to receive more than passing mention. To the year 1873 there had been coined of 412½-grain dollars for purposes of circulation, only $1,439,457, and these were coined before 1806."—J. L. Laughlin, *Hist. of Bimetallism in the U. S., pt.* 1, *ch.* 5 *and* 7.—See, also, Money and Banking: A. D. 1848-1893.

A. D. 1873.—The Panic.—"The panic of 1873 differed very materially from the other great panics by which this country has been afflicted. Lack of capital was the main difficulty in 1837 and 1857. Population had increased so rapidly that millions of human beings were out of work, and apprehension spread lest there might not be food enough to go around. In 1873, however, men were well employed. Business of all kinds was in excellent condition, and no one doubted for a moment that there would be plenty for every man to eat. The excellent condition of trade, in fact, was the chief factor in the panic of 1873. Every one was busy, and wanted money with which to carry on his trade. For two years before the crash, money had been

in great demand. Railroads had recently been built to an extent such as this country had never known before. Whereas, in 1861, railroad construction amounted to only 651 miles, in 1871 it reached the then unprecedented figure of 7,779 miles. This new mileage, moreover, was mainly in the West, where the immediate remuneration was but slight. Railroads were being pushed forward into regions which could not be expected to return an income for twenty years. The cost of railroad construction in this country during the five years preceding September, 1873, was estimated by the Comptroller of the Currency at no less than $1,700,000,000. The money to pay for this extravagant building was obtained, not from the earnings of the old portions of the road, but from enormous issues of railroad bonds, placed to a large extent among the banks of this country, but still more among the capitalists of Europe. In the Northern Pacific Company occurred the most flagrant abuse of railroad credit the world has ever known. . . . One after another of the Western roads defaulted in paying the interest on its bonds. The result was, that, by the summer of 1873, the market for new issues of railroad bonds had practically disappeared. Meantime the banks and bankers of New York were loaded down with railroad paper. The railroads had borrowed money for short periods in the expectation that before their notes fell due they would have raised the money to make payment by the sale of bonds. A temporary relief was felt, in June, 1873, through the customary midsummer ease in money. But this temporary respite only made the difficulty worse. Deluded by the momentary calm, the New York banks added still further to their loans. . . . The year before, money had grown tight early in September, and the more cautious banks began gradually to call their loans, fearing that the experience of 1872 might be renewed. But the rates for money did not noticeably increase, and the only cause for excitement early in the month was the failure, on September 8, of the Mercantile Warehouse and Security Company, owing to advances on bonds of the Missouri, Kansas & Texas Railroad. This was followed, on the 13th, by the failure of Kenyon Cox & Co., of which firm Daniel Drew was a member, caused by loans to the Canada Southern Railroad. By this time the sky was heavily overcast. Money was now advancing rapidly, the New York banks were calling loans on every hand, and new loans on railroad paper were scarcely to be had at all. Suddenly, on the 18th of September, the tempest burst. On the morning of that dark day, Jay Cooke, the agent of the U. S. Government, with some four millions of deposits from all parts of the country, and his fifteen millions of Northern Pacific paper, declared his inability to meet his debts. The report flew down 'the street' with the ferocity of a cyclone. Railroad shares were thrown upon the market by the bushel, in utter disregard of their intrinsic value. . . . Stock brokers continued to announce their failures all day long. Nothing seemed able to withstand the shock, and when, on September 19, the great banking house of Fisk & Hatch went under, terror became universal. A run was started on the Union Trust Co., which was believed to have close intimacy with Vanderbilt's railroads, and on the Fourth National Bank, whose dealings were largely with Wall street brokers. The panic was by this time so general that the banks began to refuse one another's certified checks, and on the 20th a considerable number of the New York banks suspended payment. On that day the Union Trust Co., the National Trust Co., and the National Bank of the Commonwealth all closed their doors. At 11 o'clock on the 20th, the New York Stock Exchange, for the first time in its history, closed its doors, and the Governing Committee announced that the board would not be opened till further notice. This high-handed measure caused an outcry for the moment, but on calmer judgment it was generally conceded that the measure was a good one. On the evening of that Saturday, September 20, the Clearing House Association met and adopted a plan similar to that adopted in the panic of 1857, and in substance this: Any bank in the Clearing House Association might deposit with a committee of five persons, to be appointed for that purpose, an amount of its bills receivable, or other securities to be approved by the committee, and the committee were then to issue to that bank certificates of deposit, bearing interest at 5 per cent. per annum, to an amount not exceeding 75 per cent. of the securities or bills receivable so deposited. These certificates could be used in settlement of balances at the Clearing House for a period not to extend beyond the 1st of the following November, and they were to be received by creditor banks during that period daily, in the proportion which they bore to the aggregate amount of the debtor balances paid at the Clearing House. The amount of certificates should not exceed $10,000,000. The legal tenders belonging to the associated banks were to be considered and treated as a common fund held for mutual aid and protection, and the committee were given power to equalize the same by assessment or otherwise in their discretion. This scheme, simple as it was, proved of the utmost efficacy in mitigating the evils that must always follow a distrust among banks. The lull occasioned by the intervening Sunday was employed by President Grant and Secretary of the Treasury Richardson in a visit to New York. All day long they gave audience to business men at the Fifth Avenue Hotel. Suggestions of every description were offered as a remedy for the disease. The most feasible proposition, and that which was finally adopted, was the purchase of Government bonds. . . . Shortly after his return from the Fifth Avenue Hotel, Secretary Richardson announced his intention to buy Government bonds, and, in a few days, $13,000,000 of the U. S. greenbacks were thus absorbed. . . . On Tuesday, September 30, the Stock Exchange was once more opened. It was expected on all hands that this would be the signal for another onslaught. But so general was this expectation that most persons refrained for the moment from offering their stocks. As a result, the market opened a trifle higher than it had closed ten days before. It continued to advance, moreover, till October 7. On that day a new decline set in, and on October 14 came a fearful drop, which carried prices lower than on September 20. From this reaction there was a gradual improvement till October 31, when the failure of Hoyt, Sprague & Co., the great mill owners of Providence and New York, once more shook the

market and brought stocks, on October 31 and November 1, to the lowest prices of the year. With those prices it became manifest that the panic had reached its end. Money had already begun to flow to New York both from Europe and from the West, and the public, tempted by the excessive decline in stocks, began to purchase freely. The result was a steady though gradual improvement through the remainder of the year."—*The Panic of* 1873 (*Banker's Mag., Nov.*, 1891).

A. D. 1875. — The Whisky Ring. See WHISKY RING.

A. D. 1875.—The second Civil Rights Bill and its declared unconstitutionality.—"Congress, to give full effect to the fourteenth amendment to the federal Constitution, passed an act in 1875, which provided that all persons within the jurisdiction of the United States shall be entitled to the full and equal enjoyment of the accommodations, advantages, facilities, and privileges of inns, public conveyances on land and water, theatres and other places of public amusement, subject only to the conditions and limitations established by law, and applicable alike to citizens of every race and color, regardless of any previous condition of servitude. . . . In 1883 the act was held unconstitutional. The Fourteenth Amendment, says Bradley, J., does not 'invest Congress with power to legislate upon subjects which are within the domain of State legislation, but to provide modes of relief against State legislation or State action of the kinds referred to. It does not authorize Congress to create a code of municipal law for the regulation of private rights; but to provide modes of redress against the operation of State laws and the action of State officers, executive and judicial, when these are subversive of the fundamental rights specified in the amendment.' Civil Rights Cases, 109 U. S. 3."— T. M. Cooley, *Constitutional Limitations which rest upon the Legislative Power of the States, 6th ed., pp.* 733–734 *and foot-note.*

A. D. 1876.— Admission of Colorado into the Union. See COLORADO: A. D. 1806–1876.

A. D. 1876. — The Sioux War. — Battle of Little Big Horn. — Death of General Custer. — Hostilities with a poweral confederation of Sioux or Dakota tribes of Indians, in the northwest, were brought about, in the spring of 1876, by gold discoveries in the Black Hills and the consequent rush of miners into the Indian reservation. To subdue the hostile Indians, three military expeditions were set in motion,— from Fort Fetterman, under General Crook, from Fort Ellis, in Montana, under General Gibbon, and from Bismarck, in Dakota, under General Terry. These were to converge on the upper waters of the Yellowstone, where Sitting Bull, the able chief of the Sioux, had his camp, in the valley of the small stream commonly known as the Little Big Horn. The Sioux warrior used the advantages of his central position like a Napoleon, striking his assailants in turn, as they came near, with far stronger forces than they knew him to possess. Crook was forced back; Gibbon was brought to a halt. Terry came last on the ground. His command included the famous Seventh Cavalry,—the regiment of General Custer. In ignorance of the surprising number of braves which Sitting Bull had collected, Custer was sent to make a detour and attack the Indian camp from the rear. Doing so, on the 25th of June, he rode into a death trap. Five companies of the regiment, with its heroic commander at their head, were surrounded so overwhelmingly that not one man escaped. The remaining seven companies were too far from the others to cooperate in the attack. They fortified a bluff and held their ground until the 27th, when Terry and Gibbon came to their relief. The Indians retreated toward the mountains. The campaign was soon resumed, and prosecuted through the fall and winter, until Sitting Bull and some of his followers fled into British America and the remaining hostiles surrendered.— F. Whittaker, *Complete Life of General George A. Custer, b'k.* 8, *ch.* 4–5.

A. D. 1876. — The Centennial Exhibition at Philadelphia.—In 1871, the Congress of the United States passsed an act to provide for the commemoration, in 1876, of the centennial anniversary of the Declaration of Independence, by holding an exhibition, at Philadelphia, "of American and foreign arts, products, and manufactures." The act created a commission, composed of one delegate from each state and territory of the United States, to which commission was committed the "exclusive control" of the contemplated exhibition; though the State of Pennsylvania was required to make provision for the erection of suitable buildings. "To the surprise of those writers who had contended that there would be no exhibits from abroad,' there was shown a universal desire on the part of all nations to co-operate liberally in the World's Fair of 1876. These different governments appropriated large sums of money, selected as commissioners men of the highest standing, loaned to the exhibition their most valuable works of art, and in every sense indicated a desire on the part of the Old World to forget the past and to unite itself closely with the future of the New. Singular as it may seem, there was no disposition on the part of Congress to facilitate and aid in carrying out this grand enterprise. The money had to be raised by private subscription, from all sections of the United States, and it was only by a determined and persistent effort with Congress that at last a government loan was secured of $1,500,000, which loan has been called up by the government and repaid since that time. The City of Philadelphia appropriated $1,000,000 and the State of Pennsylvania $1,500,000, and all other states, notably New Jersey, Delaware, Connecticut, New Hampshire, etc., subscribed to the stock issued by the Centennial Board of Finance. In 1873, the location so well known as Fairmount Park was selected for the exposition, and immediate possession given by the City of Philadelphia, free from all expense or charge, and who also liberally contributed to the success of the World's Fair 1876 by the erection of two magnificent bridges over the Schuylkill at a cost of over $2,500,000, in addition to the various improvements made in Fairmount Park. . . . The total number of exhibitors at the World's Fair 1876 was estimated at 30,864, the United States heading the list with 8,175; Spain and her colonies, 3,822; Great Britain and colonies, 3,584; and Portugal, 2,462. . . .

The exhibition opened on the 10th of May, 1876, and from that time until Nov. 10, 1876, there were admitted a grand total of 9,910,966 persons, of whom 8,004,274 paid admission fees amounting to $3,813,724.49."— *C. B. Norton, World's Fairs, ch.* 6.

A. D. 1876-1877.—The Twenty-third Presidential Election and its disputed result.—The Electoral Commission.—Four candidates for the Presidency were named and voted for by as many different parties in 1876, although the contest of the election was practically between the Republicans and Democrats, as in previous years. The former, after a prolonged struggle of rival factions, put in nomination ex-Governor Rutherford B. Hayes, of Ohio, with William A. Wheeler, of New York, for Vice President. The candidates of the Democratic party were ex-Governor Samuel J. Tilden, of New York, for President, and Thomas A. Hendricks, of Indiana, for Vice President. Before these nominations were made, the Prohibition Reform party and the party calling itself the Independent, but popularly known as the "Greenback party," had already brought candidates into the field. The first named put Green Clay Smith, of Kentucky and G. T. Stewart, of Ohio, in nomination; the nominees of the last named were Peter Cooper, of New York, and Samuel F. Cary, of Ohio. "Thirty-eight States participated in the election. Colorado had been admitted to the Union in August, 1876, and, in order to save an additional election, the choice of electors for that occasion was conferred upon the legislature. All the other States appointed them by popular vote. The polls had hardly closed on the day of election, the 7th of November, when the Democrats began to claim the presidency. The returns came in so unfavorably for the Republicans that there was hardly a newspaper organ of the party which did not, on the following morning, concede the election of Mr. Tilden. He was believed to have carried every Southern State, as well as New York, Indiana, New Jersey, and Connecticut. The whole number of electoral votes was 369. If the above estimate were correct, the Democratic candidates would have 203 votes, and the Republican candidates 166 votes. But word was sent out on the same day from Republican headquarters at Washington that Hayes and Wheeler were elected by one majority; that the States of South Carolina, Florida, and Louisiana had chosen Republican electors. Then began the most extraordinary contest that ever took place in the country. The only hope of the Republicans was in the perfect defence of their position. The loss of a single vote would be fatal. An adequate history of the four months between the popular election and the inauguration of Mr. Hayes, would fill volumes. Space can be given here for only a bare reference to some of the most important events. Neither party was over-scrupulous, and no doubt the acts of some members of each party were grossly illegal and corrupt. . . . In four States, South Carolina, Florida, Louisiana, and Oregon, there were double returns. In South Carolina there were loud complaints that detachments of the army, stationed near the polls, had prevented a fair and free election. Although the board of State canvassers certified to the choice of the Hayes electors, who were chosen on the face of the returns, the Democratic candidates for electors met on the day fixed for the meeting of electors and cast ballots for Tilden and Hendricks. In Florida there were allegations of fraud on both sides. The canvassing board and the governor certified to the election of the Hayes electors, but, fortified by a court decision in their favor, the Democratic electors also met and voted. In Louisiana there was anarchy. There were two governors, two returning boards, two sets of returns showing different results, and two electoral colleges. In Oregon the Democratic governor adjudged one of the Republican electors ineligible, and gave a certificate to the highest candidate on the Democratic list. The Republican electors, having no certificate from the governor, met and voted for Hayes and Wheeler. The Democratic elector, whose appointment was certified to by the governor, appointed two others to fill the vacancies, when the two Republican electors would not meet with him, and the three voted for Tilden and Hendricks. All of these cases were very complicated in their incidents, and a brief account which should convey an intelligible idea of what occurred is impossible. . . . Thus, for the first and only time in the history of the country, the election ended in such a way as to leave the result in actual doubt, and in two States the number of legal votes given for the electors was in dispute. . . . As soon as the electoral votes were cast it became a question of the very first importance how they were to be counted. It was evident that the Senate would refuse to be governed by the 22nd joint rule [under which no electoral vote to which any member of either House objected could be counted unless both Houses agreed to the counting of it]—in fact the Senate voted to rescind the rule,—and it was further evident that if the count were to take place in accordance with that rule it would result in throwing out electoral votes on both sides on the most frivolous pretexts. It was asserted by the Republicans that, under the Constitution, the President of the Senate alone had the right to count, in spite of the fact that the joint rule, the work of their party, had assumed the power for the two Houses of Congress. On the other hand, the Democrats, who had always denounced that rule as unconstitutional, now maintained that the right to count was conferred upon Congress. A compromise became necessary, and the moderate men on both sides determined to effect the establishment of a tribunal, as evenly divided politically as might be, which should decide all disputed questions so far as the Constitution gave authority to Congress to decide them. The outcome of their efforts was the Electoral Commission law of 1877," by which a Commission was created, consisting of fifteen members—the Senate appointing five from its own body, the House five, and four Associate-Justices of the Supreme Court, designated in the bill, appointing a fifth from the same court. The Senators selected were Edmunds, Morton, Frelinghuysen (Republicans), and Thurman and Bayard (Democrats). The Representatives were Payne, Hunton, Abbott (Democrats), and Garfield and Hoar (Republicans). The four Supreme Court Justices designated by the Act were Clifford, Field (Democrats), Strong and Miller (Republicans). They selected for the fifth member of the Commission Justice Bradley, who was a Republican. "The

natural choice of the justices would have been their associate, David Davis; but he had been elected only five days before as senator from Illinois, and it was regarded by him and by others as improper that he should serve. Thus the commission consisted of eight Republicans and seven Democrats. If Judge Davis had been selected, there would have been only seven Republicans, and the result of the operation of the law might have been different. . . . The count had begun on the first day of February, and the final vote upon Wisconsin was not reached until the early morning of March 2. As question after question was decided uniformly in favor of the Republicans, it became evident to the Democrats that their case was lost. They charged gross partisanship upon the Republican members of the Electoral Commission, in determining every point involved in the dual returns for their own party, though as a matter of fact there does not seem to have been much room for choice between the two parties on the score of partisanship. Each member of the commission favored by his vote that view which would result in adding to the electoral vote of his own party. But as the result of the count became more and more certainly a Republican triumph, the anger of the Democrats arose. Some of them were for discontinuing the count; and the symptoms of a disposition to filibuster so that there should be no declaration of the result gave reason for public disquietude. But the conservative members of the party were too patriotic to allow the failure of a law which they had been instrumental in passing to lead to anarchy or revolution, and they sternly discountenanced all attempts to defeat the conclusion of the count. The summing up of the votes [Hayes, 185; Tilden, 184], was read by Mr. Allison of Iowa, one of the tellers on the part of the Senate, at a little after four o'clock, on the morning of the 2d of March, amid great excitement. . . . Mr. Ferry thereupon declared Rutherford B. Hayes elected President, and William A. Wheeler Vice-President, of the United States. The decision was acquiesced in peaceably by the whole country, and by men of every party. But the Democrats have never ceased to denounce the whole affair as a fraud. . . . It is to be hoped that the patriotism of the American people and their love of peace may never again be put to such a severe test as was that of 1876 and 1877." According to the Democratic count, the popular vote stood: Tilden, 4,300,590; Hayes, 4,036,298; Cooper, 81,737; Smith, 9,522. The Republican count gave: Tilden, 4,285,992; Hayes, 4,033,768. —E. Stanwood, *Hist. of Presidential Elections, ch.* 24.

A. D. 1877-1891.—The Farmers' Alliance. —The Farmers' Alliance "is the outcome of a movement which first culminated, shortly after the Civil War had ended, in the formation of the Patrons of Husbandry, or, as they were more commonly called, 'The Grange,' the object of which organization was the mutual protection of farmers against the encroachments of capital. The collapse of the Grange was due to a mistake it had made in not limiting its membership originally to those whose interests were agricultural. The first 'Alliance' was formed in Texas, to oppose the wholesale buying up of the public lands by private individuals. . . . For about ten years the Alliance remained a Southern organization. In 1887, about ten years after the first local Alliance in Texas was formed, and five after the State Alliance, the 'Farmers' Union' of Louisiana united with it, under the name of the 'Farmers' Alliance and Co-operative Union of America.' Branches were quickly established," in other Southern States. "'Later in the same year, the 'Agricultural Wheel,' a similar society operating in the States of Arkansas, Missouri, Kentucky, and Tennessee, was amalgamated with the Alliance, the new organization being called 'The Farmers' and Laborers' Union of America.' The spirit of the movement had simultaneously been embodied in the 'National Farmers' Alliance' of Illinois, which was started in 1877, and quickly extended into Wisconsin, Minnesota, Iowa, Missouri, Kansas, and Dakota. A minor organization, the 'Farmers' Mutual Benefit Association,' was started in 1887, in the southern part of Illinois. Finally, in 1889, at a meeting held in St. Louis, these different bodies were all practically formed into a union for political purposes, aiming at legislation in the interests of farmers and laborers; and the present name of the 'Farmers' Alliance and Industrial Union' was chosen. . . . Its main professed object is the destruction of the money power in public affairs, and the opposition of all forms of monopoly. It demands the substitution of legal tender treasury notes for National bank notes; also an extension of the public currency sufficient for the transaction of all legitimate business, the money to be given to the people on security of their land, at the lowest rates consistent with the cost of making and handling it. It demands government control, not only of money, but of the means of transportation and every other public function."— *Quarterly Register of Current Hist., v.* 1, *p.* 132.

A. D. 1878.— The Bland Silver Bill.— The act familiarly known as the Bland Bill was passed by Congress in 1878. "Although the silver dollar of which the coinage was resumed in 1878 dates back as a coin to the earlier days of the Republic, its reissue in that year marks a policy so radically new that the experience of previous years throws practically no light on its working. The act of 1878 provided for the purchase by the government, each month, of not less than two million dollars' worth, and not more than four million dollars' worth, of silver bullion, for coinage into silver dollars at the rate of 412½ grains of standard silver (or 371¼ grains of fine silver) for each dollar. The amount of the purchases, within the specified limits, was left to the discretion of the Secretary of the Treasury. As every Secretary of the Treasury, throughout the period in which the act was in force, kept to the minimum amount, the practical result was a monthly purchase of two million dollars' worth of silver bullion. The act is sometimes described as having called for a monthly issue of two million silver dollars; but this was not the exact situation. The amount

of silver obtainable with two million dollars obviously varies according to the price of the metal in terms of the dollars with which the purchases are made. In February, 1878, when the first purchases were made, those dollars were the inconvertible United States notes, or greenbacks, worth something less than their face in gold. . . . When specie payments were resumed, on the first of January, 1879, and the greenbacks became redeemable in gold, the measure of value in the United States became gold, and the extent of the coinage of silver dollars under the act of 1878 became simply a question of how much silver bullion could be bought with two million dollars of gold. The price of silver in 1878 was, in terms of gold, not far from a dollar for an ounce of standard silver. After 1878 it went down almost steadily. . . . The silver dollar of 412½ grains contains less than an ounce (480 grains) of standard silver. The monthly purchase of two million dollars' worth of silver therefore yielded more than two million silver dollars, the amount being obviously greater as the price of silver went lower. On the average, the monthly yield was not far from two and a half millions of silver dollars. So much each month, therefore, or thirty millions of silver dollars a year, was roughly the addition to the currency of the community from the act of 1878. An important provision of the act of 1878 was that authorizing the issue of silver certificates against the deposit of silver dollars. . . . The dollars and certificates between them constitute what we may call the silver currency of the act of 1878. The passage of that act was due to causes easily described. It was part of the opposition to the contraction of the currency and the resumption of specie payments, which forms the most important episode of our financial history between 1867 and 1879. . . . No doubt some additional force was given to the movement in favor of the use of silver from the desire of the silver-mining States and their representatives, that the price of the metal should be kept up through a larger use of it for coinage. But this element, while sometimes prominent in the agitation, was not then, as it has not been in more recent years, of any great importance by itself. The real strength of the agitation for the wider use of silver as money comes from the conviction of large masses of the people that the community has not enough money."—F. W. Taussig, *The Silver Situation in the U. S., pt.* 1.—See, also, MONEY AND BANKING: A. D. 1848–1893.

A. D. 1880.—The Twenty-fourth Presidential Election.—For the twenty-fourth Presidential election, in 1880, the Republicans, meeting at Chicago, June 2, named General James A. Garfield, of Ohio, as its candidate for President and Chester A. Arthur, of New York, for Vice President. The so-called Greenback party (which had appeared four years before, in the election of 1876), meeting at Chicago on the 9th of June, put in nomination, for President, James B. Weaver of Iowa, and, for Vice President, B. J. Chambers, of Texas. The main object and principle of the Greenback party was set forth in the following declarations of its platform: "That the right to make and issue money is a sovereign power to be maintained by the people for the common benefit. The delegation of this right to corporations is a surrender of the central attribute of sovereignty. . . . All money, whether metallic or paper, should be issued and its volume controlled by the government, and not by or through banking corporations, and, when so issued, should be a full legal tender for all debts, public and private. . . . Legal tender currency [the greenback notes of the civil-war period] should be substituted for the notes of the national banks, the national banking system abolished, and the unlimited coinage of silver, as well as gold, established by law." The Prohibitionists (Temperance), in convention at Cleveland, June 17, nominated Neal Dow, of Maine, for President, and A. M. Thompson, of Ohio, for Vice President. On the 22d of June, at Cincinnati, the Democratic party held its convention and nominated General Winfield S. Hancock, of Pennsylvania, for President, and William H. English, of Indiana, for Vice President. At the election, in November, the popular vote cast was 4,454,416 for Garfield, 4,444,952 for Hancock, 308,578 for Weaver, and 10,305 for Dow. The electoral votes were divided between Garfield and Hancock, being 214 for the former and 155 for the latter. Every former slave-state was carried by the Democratic party, together with New Jersey, California and Nevada.—E. McPherson, *Handbook of Politics for* 1880 *and* 1882.

Missouri	2,022,826	145,350
Dakota	133,147	401
Nebraska	449,764	2,385
Kansas	952,155	43,107
	16,961,423	385,621

	White.	Black.
South Central division.		
Kentucky	1,377,179	271,451
Tennessee	1,138,831	403,151
Alabama	662,185	600,103
Mississippi	479,398	650,291
Louisiana	454,954	483,655
Texas	1,197,237	393,384
Arkansas	591,531	210,666
	5,901,315	3,012,701
Western division.		
Montana	35,385	346
Wyoming	19,437	298
Colorado	191,126	2,435
New Mexico	108,721	1,015
Arizona	35,160	155
Utah	142,423	232
Nevada	53,556	488
Idaho	29,013	53
Washington	67,199	325
Oregon	163,075	487
California	767,181	6,018
	1,612,276	11,852
Grand total	43,402,970	6,580,793

In addition the census shows 105,465 Chinese, 148 Japanese, and 66,407 civilized Indians, making a total of 50,155,783, as stated above. The immigrants arriving in the country during the preceding ten years numbered 2,944,695, of whom 989,163 were from the British Islands and 1,357,801 from other parts of Europe.

A. D. 1881.— The brief administration of President Garfield. — His assassination. — "President Hayes had left the new administration a heritage of hatred from the Stalwart element of the Republican party. It was President Garfield's chief wish, politically, to heal up the chasm which the past had opened, and not to recognize one faction more than another. . . . The defeat of the Stalwarts at Chicago [see STALWARTS AND HALF-BREEDS], by Garfield, naturally tended to transfer their hostility from the outgoing to the incoming President. For months before the inauguration, the embarrassment which threatened Garfield was foreseen by the country." The inevitable outbreak of hostilities occurred the moment that the President made a nomination in New York which was distasteful to the arrogant Senator from that State, Roscoe Conkling, who imperiously led the Stalwart forces. This happened upon the presentation of the name of William H. Robertson for Collector of the Port of New York. In order to force a division in the Republican party upon the quarrel between himself and President Garfield, Senator Conkling resigned his seat in the Senate of the United States and presented himself to the Legislature of New York as a candidate for re-election. He counted, without doubt, upon an easy triumph, expecting to be returned to Washington, bearing the mandate of his party, so to speak, and humbling the President into submissive obedience to his behests. He was disappointed; his re-election was defeated; but the furious contest which went on during some weeks, engendered bitter passions, which had their effect, no doubt, in producing the awful tragedy that soon ensued. By the end of June the clamor of the strife had greatly subsided; the Senate had adjourned, and the weary President made ready to join Mrs. Garfield at Long Branch, where she was just recovering from a serious illness. "On the morning of the 2d of July . . . the President made ready to put his purpose into execution. Several members of the Cabinet, headed by Secretary Blaine, were to accompany him to Long Branch. A few ladies, personal friends of the President's family, and one of his sons, were of the company; and as the hour for departure drew near they gathered at the dépôt of the Baltimore and Potomac Railway to await the train. The President and Secretary Blaine were somewhat later than the rest. . . . When the carriage arrived at the station at half-past nine o'clock, the President and Mr. Blaine left it and entered the ladies' waiting-room, which they passed through arm in arm. A moment afterwards, as they were passing through the door into the main room, two pistol shots suddenly rang out upon the air. Mr. Blaine saw a man running, and started toward him, but turned almost immediately and saw that the President had fallen. It was instantly realized that the shots had been directed with fatal accuracy at the beloved President. Mr. Blaine sprang toward him, as did several others, and raised his head from the floor. . . . A moment after the assassin was discovered . . . and, in the middle of B Street, just outside of the dépôt, was seized by the policemen and disarmed. A pistol of very heavy caliber was wrenched out of his hand, and it became clear that a large ball had entered the President's body. The assassin gave his name as Charles Jules Guiteau. . . . [He] was found to be a mixture of fool and fanatic, who, in his previous career, had managed to build up, on a basis of total depravity, a considerable degree of scholarship. He was a lawyer by profession, and had made a pretense of practicing in several places — more particularly in Chicago. . . . In the previous spring, about the time of the inauguration, he had gone to Washington to advance a claim to be Consul-General at Paris. . . . Hanging about the Executive Mansion and the Department of State for several weeks, he seemed to have conceived an intense hatred of the President, and to have determined on the commission of the crime." The wounded President lingered for eighty days, during which long period of suffering there were many alternations of hope and fear in his case. He died on the 19th of September. His assassin was tried and executed for the crime, though much doubt of his sanity exists. The Vice-President, Chester A. Arthur, became President for the remainder of the term.— J. C. Ridpath, *Life and Work of James A. Garfield, ch.* 12–13.

A. D. 1882.—Passage of the Edmunds Bill, to suppress Polygamy in Utah. See UTAH: A. D. 1882–1893.

A. D. 1883.—Passage of the Pendleton Civil Service Reform Bill. See CIVIL-SERVICE REFORM IN THE UNITED STATES.

A. D. 1884.— Financial Disasters. — "The month of May, 1884, concludes the prosperous period which followed the crisis of 1873. During this period the most gigantic speculations in railroads occurred; the zenith of the movement was in 1880, and as early as 1881 a retrograde movement began, only to end in the disasters in question. The decline in prices had been steady for three years; they had sunk little by little under the influence of a ruinous competition, caused by the number of new lines and the

lowering of rates, but above all through the manipulations by the managers on a scale unexampled until now. In connection with the disasters of May, 1884, the names of certain speculators who misused other people's money, such as Ward, of Grant & Ward; Fish, President of the Marine Bank; and John C. Eno, of the Second National Bank, will long be remembered. General Grant, who was a silent partner in Ward's concern, was an innocent sufferer, both in fortune and reputation."— C. Juglar, *Brief Hist. of Panics, pp.* 102–103.

A. D. 1884.—The Twenty-fifth Presidential Election.—Appearance of the Independents or "Mugwumps."— James G. Blaine, of Maine, and General John A. Logan, of Illinois, nominated at Chicago, June 3, were the Republican candidates for President and Vice President, in the election of 1884. The Democratic National Convention, held, likewise, at Chicago, July 8, put forward Governor Grover Cleveland, of New York, as its candidate for President, with Thomas A. Hendricks, of Indiana, for Vice President. General Benjamin F. Butler, of Massachusetts, and General A. M. West, of Mississippi, received double nominations, from the National or Greenback party and an Anti-Monopoly party (so-called) for President and Vice President, respectively; while the Prohibitionists put in nomination John P. St. John, of Kansas, and William Daniel, of Maryland. The election was an exceedingly close one, its result turning upon a plurality of only 1,149 in New York, by which that state was given to Cleveland, with its 36 electoral votes, securing his election. The total popular vote counted as follows: Cleveland, 4,874,986; Blaine, 4,851,981; Butler, 175,370; St. John, 150,369. The electoral vote was divided between Cleveland and Blaine, 219 for the former and 182 for the latter. —E. McPherson, *Hand-book of Politics,* 1884 *and* 1886.—*Annual Cyclopædia,* 1884.—"At the presidential election of 1884 a section of the Republican party, more important by the intelligence and social position of the men who composed it than by its voting power, 'bolted' (to use the technical term) from their party, and refused to support Mr. Blaine. Some simply abstained, some, obeying the impulse to vote which is strong in good citizens in America, voted for Mr. St. John, the Prohibitionist candidate, though well aware that this was practically the same thing as abstention. The majority, however, voted against their party for Mr. Cleveland, the Democratic candidate; and it seems to have been the transference of their vote which turned the balance in New York State, and thereby determined the issue of the whole election in Mr. Cleveland's favour." This group "goes by the name of Mugwumps. . . . The name is said to be formed from an Indian word denoting a chief or aged wise man, and was applied by the 'straight-out' Republicans to their bolting brethren as a term of ridicule. It was then taken up by the latter as a term of compliment; though the description they used formally in 1884 was that of 'Independent Republicans.' . . . The chief doctrine they advocate is . . . the necessity of reforming the civil service by making appointments without reference to party, and a general reform in the methods of politics by selecting men for Federal, State, and municipal offices, with reference rather to personal fitness than to political affiliations."—J. Bryce, *The American Commonwealth* (*3d ed., rev.*), *ch.* 56, *with foot-note* (*v.* 2).

A. D. 1885–1888.—Termination of the Fishery Articles of the Treaty of Washington. — Renewed controversies. — The rejected Treaty. See FISHERIES, NORTH AMERICAN: A. D. 1877–1888.

A. D. 1886.—Act to provide successions to the Presidency in case of death.—"An act of 1791 provided that in case of the death, resignation, or disability of both president and vice-president, the succession should devolve first upon the president pro tempore of the Senate and then upon the speaker of the House of Representatives, until the disability should be removed or a new election be held. But supposing a newly elected president to die and be succeeded by the vice-president before the assembling of the newly elected Congress; then there would be no president pro tempore of the Senate and no speaker of the House of Representatives, and thus the death of one person might cause the presidency to lapse. Moreover the presiding officers of the two houses of Congress might be members of the party defeated in the last presidential election; indeed, this is often the case. Sound policy and fair dealing require that a victorious party shall not be turned out because of the death of the president and vice-president. Accordingly an act of 1886 provided that in such an event the succession should devolve upon the members of the cabinet in the following order: secretary of state, secretary of the treasury, secretary of war, attorney-general, postmaster-general, secretary of the navy, secretary of the interior. This would seem to be ample provision against a lapse."—J. Fiske, *Civil Government in the United States, ch.* 8.

A. D. 1886-1887.—Repeal of the Tenure-of-Office Act.—The question of the force and validity of the Tenure-of-office Act [see A. D. 1866–1867 (DEC.—MARCH)] in its interference with the power of the Executive to make removals from office, was brought to a sharp issue with the Senate by President Cleveland. He had suspended from office a district attorney in Alabama, and the Senate, when Congress came together, called on him for the grounds of his action, and for the papers relating to the case. He refused to comply with the demand in an able message, which strenuously asserted that the accountability of the President for such action was to the people alone. "On behalf of the President it was contended that his power of removal was absolute and not in any way subject to the consent of the Senate; that the Senate had no right to call for papers relating to a subject as to which it could take no action, and that the papers relating to suspensions were not official but were private. . . . On behalf of the Senate it was contended that the power of removal was not involved; that the suspensions and the appointments under consideration were made under the Tenure-of-office Act, and were expressly referred, by the President in the nomination messages, to that law; that under that law the removal of an officer was subject to the approval of the Senate; that such officer would resume his office, if the Senate took no action, at the end of the session; that the removal of an officer and the appointment of a successor were connected subjects, to be considered together;

that the right of the Houses of Congress to be informed as to the acts of the Executive Department could not be limited as claimed; and, finally, that the particular resolution called for papers relating to the management of his office by the officer suspended, which was a proper subject of inquiry."—B. Harrison, *This Country of Ours, ch.* 6.—The effect of the discussion raised was to bring about, in March, 1887, the passage of a bill repealing the Tenure-of-office Act.—Grover Cleveland, *The Independence of the Executive* (*Atlantic Monthly, June–July,* 1900).

A. D. 1886-1893.—The Bering Sea controversy and arbitration.—"Four serious international controversies have arisen out of the rival claims of Russia, Great Britain, Spain, and the United States to the shores and waters of the northwest coast of the continent of North America. The first of these was in consequence of an attempt of the Spanish Government, in 1790, to prevent the British from trading with the natives of that coast. It was settled by the Nootka Sound Convention of October 28, 1790, by which the subjects of both powers enjoyed equal privileges of trade to all points not already occupied. The second controversy was the result of an attempt of Russia in 1821 to prohibit England and the United States from trading anywhere north of the 51st parallel, or to approach within 100 Italian miles of the coast. Both governments energetically protested and secured treaties in 1824 and 1825, by which they retained the right of fishing and of landing on unoccupied points of that coast. The third controversy was as to the division of the coast between Great Britain and the United States, Spain having by the treaties of 1824 and 1825 accepted the parallel of 54° 40′ as her southern boundary. The rival claims of the two remaining powers, after long diplomatic discussion, were settled by the treaty of July 17, 1846, according to which the parallel of 49° was made the dividing line. By the treaty of March 30, 1867, with Russia, all the dominions and claims of that country on the continent of North America and the outlying islands thereof were transferred to the United States. A further, and still pending, controversy arose in 1886 through the seizure by United States vessels of Canadian vessels engaged in the taking of seals in waters not far distant from the Aleutian Islands. The claim of the United States was that it had acquired from Russia exclusive rights in Behring Sea, at least with regard to seal fishing. The British Government representing the Canadians denied that there could be any exclusive rights outside three miles off shore. By an agreement of February 29, 1892, the question has been submitted to arbitration," the arbitrators to give "a distinct decision" upon each of the following five points: "1. What exclusive jurisdiction in the sea now known as the Behring's Sea, and what exclusive rights as the seal fisheries therein, did Russia assert and exercise prior and up to the time of the cession of Alaska to the United States? 2. How far were these claims of jurisdiction as to the seal fisheries recognized and conceded by Great Britain? 3. Was the body of water now known as the Behring's Sea included in the phrase 'Pacific Ocean,' as used in the treaty of 1825 between Great Britain and Russia, and what rights, if any, in the Behring's Sea, were held and exclusively exercised by Russia after said treaty? 4. Did not all the rights of Russia as to the jurisdiction and as to the seal fisheries in Behring's Sea east of the water boundary, in the treaty between the United States and Russia of the 30th of March, 1867, pass unimpaired to the United States under that treaty? 5. Has the United States any right, and if so, what right, of protection or property in the fur-seals frequenting the islands of the United States in Behring's Sea, when such seals are found outside the ordinary three-mile limit?"—*American History Leaflets, no.* 6.—The arbitrators to whom these points of the question were submitted under the treaty were seven in number, as follows: Justice John M. Harlan, of the Supreme Court of the United States, and Senator John T. Morgan, of Alabama, appointed by the United States; Rt. Hon. Lord Hannan, and Sir John S. D. Thompson, Prime Minister of Canada, appointed by Great Britain; Senator Baron Alphonse de Courcelles, formerly French Ambassador at Berlin, appointed by the French government; Senator Marquis E. Visconti Venosta, appointed by the Italian government; and Judge Mons. Gregers Gram, Minister of State, appointed by the government of Sweden. The Court of Arbitration met at Paris, beginning its sessions on March 23, 1893. The award of the Tribunal, signed on the 15th of August, 1893, decided the five points submitted to it, as follows: (1) That Russia did not, after 1825, assert or exercise any exclusive jurisdiction in Bering Sea, or any exclusive rights in the seal fisheries; (2) that no such claims on the part of Russia were recognized or conceded by England; (3) that the body of water now known as Bering Sea was included in the phrase "Pacific Ocean," as used in the treaty of 1825 between Great Britain and Russia, and that no exclusive rights of jurisdiction in Bering Sea or as to the seal fisheries there were held or exercised by Russia after the treaty of 1825; (4) that all the rights of Russia as to jurisdiction and the seal fisheries in Bering Sea east of the water boundary did pass unimpaired to the United States under the treaty of March 30, 1867; (5) that the United States has not any right of protection or property in the fur seals frequenting the islands of the United States in Bering Sea, when such seals are found outside the ordinary three-mile limit. Mr. Morgan alone dissented from the decision rendered on the first and second points, and on the second division of the third point. Justice Harlan and Mr. Morgan both dissented on the fifth point. On the fourth point, and on the first division of the third, the decision was unanimous. These points of controversy disposed of, the Arbitrators proceeded to prescribe the regulations which the Governments of the United States and Great Britain shall enforce for the preservation of the fur seal. The regulations prescribed prohibit the killing, capture or pursuit of fur seals, at any time or in any manner, within a zone of sixty miles around the Pribilov Islands; prohibit the same from May 1 to July 31 in all the part of the Pacific Ocean, inclusive of Bering Sea, which is north of 35° north latitude and eastward of the 180th degree of longitude from Greenwich till it strikes the water boundary described in Article I. of the Treaty of 1867 between the United States and Russia; and following that line up to Bering

Straits; allow only sailing vessels, with licenses, to take part in fur seal fishing operations, and forbid the use of nets, firearms and explosives, except as to shot guns outside of Bering Sea. As promulgated, the Award bore the signatures of all the Arbitrators.—*The Behring Sea Arbitration: Letters to The Times.*

A. D. 1887.—The Electoral Count Act.—To avoid the recurrence of any such dangerous question as that which arose in 1876, relative to the counting of electoral votes for President and Vice-President (see A. D. 1876–1877), Congress passed an Act, approved Feb. 3, 1887, which provides that any contest regarding the choice of electors must be decided, as provided by the laws of the State, at least six days before the meeting of the electors on the second Monday in January; that a certificate of election must be issued by the State Executive in triplicate to the electors and transmitted by them to the President of the Senate with their votes for President and Vice-President; that objection to the reception of any return must be in writing, and signed by one member of each House. In the language of the Act: "No electoral vote or votes from any State which shall have been regularly given by electors whose appointment has been lawfully certified to, according to Section 3 of this Act, from which but one return has been received, shall be rejected, but the two Houses concurrently may reject the vote or votes when they agree that such vote or votes have not been so regularly given by electors whose appointment has been so certified. If more than one return, or paper purporting to be a return, from a State shall have been received by the President of the Senate, those votes, and those only, shall be counted which shall have been regularly given by the electors who are shown by the determination mentioned in Section 2 of this Act to have been appointed, if the determination in said section provided for shall have been made. . . . But in case there shall arise the question which of two or more of such State authorities determining what electors have been appointed, as mentioned in Section 2 of this Act, is the lawful tribunal of such State, the votes regularly given of those electors, and those only, of such State shall be counted whose title as electors the two Houses, acting separately, shall concurrently decide is supported by the decision of such State so authorized by its laws. And in such case of more than one return, or paper purporting to be a return, from a State, if there shall have been no such determination of the question in the State aforesaid, then those votes, and those only, shall be counted which the two Houses shall concurrently decide were cast by lawful electors appointed in accordance with the laws of the State, unless the two Houses, acting separately, shall concurrently decide such votes not to be the lawful votes of the legally appointed electors of such State." If the two Houses disagree, the votes of those electors holding the certificate of the State Executive shall be counted.

A. D. 1887.—Inter-State Commerce Act.—By an Act of Congress approved February 4, 1887, the railroads of the country passing through more than one State were placed under the supervision of the general government in certain particulars. The Act forbade special rates to special shippers, and the charging for the carriage of passengers or a given class of freight — conditions being the same — any greater compensation for a shorter than for a longer haul over the same line in the same direction.

A. D. 1887-1888.—Tariff Message of President Cleveland.—Attempted revision of the Tariff.—Defeat of the Mills Bill. See TARIFF LEGISLATION (UNITED STATES): A. D. 1884–1888.

A. D. 1888.—The Twenty-sixth Presidential election.—President Cleveland was nominated for re-election by the Democratic National Convention, held at St. Louis, June 5, with Allen G. Thurman, of Ohio, for Vice President. The Republican Convention, at Chicago, June 19, named Benjamin Harrison, of Indiana, for President, and Levi P. Morton, of New York, for Vice President. At Indianapolis, May 30, the Prohibition party had already put in nomination General Clinton B. Fisk, of New Jersey, and John A. Brooks, of Missouri, for President and Vice President, respectively. The Union Labor Party, convening at Cincinnati, May 15, had nominated Alson J. Streeter, of Illinois, and Charles E. Cunningham, of Arkansas; the United Labor Party, a rival organization, had put forward Robert H. Cowdrey, of Illinois, and William H. T. Wakefield, of Kansas; and still another labor ticket had been brought forward in February, at Washington, where an organization calling itself the Industrial Reform party, put Albert E. Redstone, of California, and John Colvin, of Kansas, in nomination. At Des Moines, Iowa, May 15, the National Equal Rights party had named a woman for the Presidency, in the person of Mrs. Belva Lockwood, of Washington, with Alfred H. Love, of Philadelphia, named for Vice President. Finally, in August, an organization attempting to revive the American Party of former days, convening at Washington, presented James L. Curtis, of New York, for President, and James R. Greer of Tennessee (who declined the honor) for Vice President. In the ensuing election, the popular vote was distributed as follows: Cleveland 5,540,329; Harrison, 5,439,853; Fisk, 249,506; Streeter, 146,935; Cowdrey, 2,818; Curtis, 1,591. Notwithstanding the greater number of votes cast for Cleveland (his plurality being 100,476), Harrison was chosen President by the electoral votes, receiving 233, while 168 were given for Cleveland.—*Appletons' Annual Cyclopædia*, 1888, *pp.* 773-782, *and* 799-828.

A. D. 1889-1890.—The opening of Oklahoma.—The Johnstown Flood.—The Pan-American Congress.—Admission of seven new States.—"In the centre of Indian Territory there is a large district called, in the Indian language, Oklahoma, or the 'Beautiful Land.' This tract was finally purchased from the Indians by the United States, early in 1889. On the 22d of April, of that year, some 50,000 persons were waiting impatiently on the borders of Oklahoma for President Harrison's signal, giving them permission to enter and take up lands in the coveted region. At precisely twelve o'clock, noon, of that day, the blast of a bugle announced that Oklahoma was open to settlement. Instantly an avalanche of human beings rushed wildly across the line, each one eager to get the first chance. Towns made of rough board-shanties and of tents sprang up in all directions. The chief of these were Oklahoma City and Guthrie. At the end of four months, the latter had a population of about 5,000, with four daily

papers and six banks; and arrangements, doubtless since completed, were being made to start a line of street cars, and light the city with electricity. A week after the opening of Oklahoma, the centennial anniversary of the inauguration of Washington, and of the beginning of our government under the Constitution, was celebrated in New York City [April 29—May 1]. . . . In a little less than a month from that occasion, the most terrible disaster of the kind ever known in our history occurred (May 31, 1889) in Western Pennsylvania. By the breaking of a dam, a body of water forty feet high and nearly half a mile in width swept down through a deep and narrow valley. In less than fifteen minutes, the flood had traversed a distance of eighteen miles. In that brief time, it dashed seven towns out of existence, and ended by carrying away the greater part of Johnstown. The whole valley at that place was choked with ruins; at least 5,000 persons lost their lives, and property worth ten million dollars was utterly destroyed. In the autumn (October 2, 1889), representatives of the leading governments of Central and of South America, together with the Republic of Mexico, met representatives chosen by the United States in a conference or congress held at Washington. The object of the congress was to bring about a closer union of the Americas, for purposes of trade, and of mutual advantage. The delegates spent six weeks in visiting the principal commercial and manufacturing cities of the United States. They then returned to Washington, and devoted the greater part of the remainder of the year and part of 1890 to the discussion of business."—D. H. Montgomery, *Leading Facts of Am. History, sect.* 390-392.—"An act to provide for the division of Dakota into two States, and to enable the people of North Dakota, South Dakota, Montana, and Washington, to form constitutions and State governments . . . was approved by President Cleveland, February 22, 1889. This act provided that the Territory of Dakota should be divided on the line of the seventh standard parallel. . . . On the 4th of July, 1889, the four conventions assembled — for North Dakota at Bismarck, for South Dakota at Sioux Falls, for Montana at Helena, and for Washington at Olympia."—F. N. Thorpe, *Recent Constitution-making in the U. S.* (*Annals of the Am. Acad. of Pol. and Soc. Science, Sept.*, 1891).—Acceptable constitutions having been framed and adopted in the several proposed new states, North Dakota and South Dakota were admitted to the Union by proclamation of President Harrison, November 3, 1889, Montana, November 8, and Washington, November 11, in the same year. "Early in the session of the fifty-first Congress, Wyoming presented her claims for Statehood, asking for admission to the Union under the Constitution of September, 1889, which was adopted by the people on Nov. 5 following. The bill for admission passed the House of Representatives on March 27, 1890, passed the Senate on June 27, and received the President's signature on July 10. By its terms Wyoming became a state from and after the date of the President's approval." Idaho had previously been admitted, by a bill which received the President's signature on the 3d of July, 1890.—*Appletons' Annual Cyclopædia*, 1890 *and* 1889.

A. D. 1890.—McKinley Tariff Act. See TARIFF LEGISLATION (UNITED STATES): A. D. 1890.

A. D. 1890.—The Eleventh Census.—Total population 62,622,250 (exceeding that of 1880 by 12,466,467, classed and distributed as follows:

	White.	Black.

California	1,111,672	11,322
	2,870,257	27,081
Grand total	54,983,890	7,470,040

In addition the census shows 107,475 Chinese, 2,039 Japanese, and 58,806 civilized Indians, making a total of 62,622,250, as stated above.

Immigration in the preceding decade rose to 5,246,613 in the total arrivals, 1,462,839 being from the British Islands and 3,258,743 from other European countries. In the single year ending June 30, 1890, the immigrants arriving from Europe numbered 443,225 (273,104 males, 170,121 females), of whom 57,020 were from England; 53,024 from Ireland; 12,041 from Scotland; 92,427 from Germany; 22,062 from Hungary; 11,073 from Poland; 33,147 from Russia; 51,799 from Italy; 29,632 from Sweden; 11,370 from Norway; 9,366 from Denmark; 6,585 from France.

A. D. 1890-1893.—The Silver Bill and its effect.—Financial Panic.—Extra Session of Congress.—Repeal of the Sherman Act.—"The act of July 14, 1890 [known as the Sherman Act], repealed the silver act of 1878, and so brought to a close the precise experiment tried under that measure. . . . But the new act . . . is even more remarkable than that of 1878. It is unique in monetary history. It provides that the Secretary of the Treasury shall purchase each month at the market price four and a half million ounces of silver bullion. In payment he shall issue Treasury notes of the United States, in denominations of between one dollar and one thousand dollars. These Treasury notes, unlike the old silver certificates, are a direct legal tender for all debts, public or private, unless a different medium is expressly stipulated in the contract. They differ from the silver certificates in another respect; they are redeemable either in gold or silver coin, at the discretion of the Secretary of the Treasury. The indirect process of redemption which, as we have seen, was applied to the silver certificates, is replaced for the new notes by direct redemption. The avowed object is to keep the silver money equal to gold, for it is declared to be 'the established policy of the United States to maintain the two metals at a parity with each other on the present legal ratio, or such ratio as may be provided by law.' The act of 1878 is repealed; but the coinage of two million ounces of silver into dollars is to be continued for a year (until July 1, 1891). Thereafter it is directed that only so many silver dollars shall be coined as may be needed for redeeming any Treasury notes presented for redemption. Practically, this means that the coinage shall cease; redemption in silver dollars will not be called for. The coinage of silver dollars accordingly was suspended by the Treasury on July 1, 1891; a change which was the occasion of some vociferous abuse and equally vociferous praise, but which in reality was of no consequence whatever. The monthly issues of the new Treasury notes vary, like those of the old silver certificates, with the price of silver. But the new issues vary directly with the price of silver, while, as we have seen, the old issues varied inversely with the price. The volume of Treasury notes issued is equal to the market price of four and one half million ounces of silver. If silver sells at $1.20 an ounce, the monthly issue of notes will be $5,400,000; if at $1.00 an ounce, $4,500,000. For a month or two after the passage of the act, the price of silver advanced rapidly, and at its highest, in August, 1890, touched $1.21. But the rise proved to be but temporary. After September a steady decline set in, and continued almost without interruption through the rest of 1890, through 1891, and through 1892. The year 1891 opened with silver at a price of about $1.00 an ounce; by the close of the year the price had fallen to about 95 cents. In 1892 a still further and more marked decline set in, and by the close of the year the price had gone as low as 85 cents."—F. W. Taussig, *The Silver Situation in the U. S., ch.* 6. —"On June 5 [1893] President Cleveland publicly declared his purpose to call an extra session of Congress to meet in the first half of September for the consideration of the country's financial conditions, which seemed critical. On the 26th of June the authorities of India closed the mints in that empire to the free coinage of silver. The signs of a panic immediately multiplied and four days later appeared the president's proclamation summoning Congress to meet in extra session August 7. The call was based on the 'perilous condition in business circles,' which was declared to be largely the result of a 'financial policy . . . embodied in unwise laws, which must be executed until repealed by Congress.' The issue of this proclamation was the signal for much excitement among the Populists and in silver-producing circles. Silver conventions were held in Denver, July 11, and in Chicago, August 2, in which addresses were made and resolutions adopted denouncing with much energy any proposition to repeal the Sherman Act without some provision for the free coinage of silver, and claiming that the existing financial crisis was a deliberately devised scheme of British and American bankers, with President Cleveland as their ally, to bring about the exclusion of silver from use as money. The president's message, presented to the houses August 8, brought the question before Congress. The message embodied an exposition of what Mr. Cleveland considered the evils of the Sherman Act, concluding with an earnest recommendation that its purchase clause be immediately repealed. While still holding that tariff reform was imperatively demanded, the president considered that it should be postponed to action on the silver law. In Congress the silver men, without reference to party lines, took an attitude of energetic resistance to any project for unconditional repeal of the purchase clause."—*Political Science Quarterly, December,* 1893.—In the House, the resistance was soon overcome by strong pressure of unmistakable public opinion, and the repeal was carried on the 28th of August. In the Senate the Silver faction proved so much stronger that it blocked the bill until the end of October, indifferent to the ruinous effect which this action was having on the business and the industries of the country. In September, while the fate of the bill remained in doubt, the "Banker's Magazine" reported that the doubt had "aggravated the money stringency, until it absolutely became impossible for the great majority of business men to obtain the necessary funds, or credit to transact their affairs. In this respect, probably, no panic within the memory of the present generation has been so severe; and yet, it has been the least violent for one so universal and protracted. But it is the collapse that follows an acute attack of disease, which leaves its victim prostrated, after the crisis has been passed, and which must precede ultimate recovery, by giving

time to restore exhausted strength. . . . This was different from most panics this country has experienced, inasmuch as it was strictly an artificial one, caused by bad legislation, rather than general financial kite flying, while commercial affairs were seldom, if ever, on a sounder or safer basis, from the fact that they had, for a long time, been more free from speculation, with but few exceptions, than for years. Hence it has been the financial machinery by which commerce is transacted, rather than commerce itself, that has been deranged; and, for this reason, trade will revive much more rapidly when this artificial pressure is removed, than it has revived after former panics, which were either purely financial, or commercial, or both, as the result of wild speculation and general inflation of prices."—H. A. Pierce, *A Review of Finance and Business* (*Banker's Magazine, Sept.*, 1893).—The repeal measure was finally carried in the Senate, becoming law by the President's signature November 1, when a slow recovery of business confidence began, much retarded and disturbed, however, by the uncertainty attending expected action of Congress on tariff and currency questions. See, also, MONEY AND BANKING: A. D. 1848-1893.

A. D. 1892.—Chinese Exclusion Act.—A bill "to absolutely prohibit the coming of Chinese persons into the United States," reported by Mr. Geary, of California, was passed by the House, April 4, 1892, yeas 179, nays 43, 107 not voting. In the Senate, a substitute, going little further than to continue the then existing laws for the regulation of Chinese immigration, was reported from the Committee on Foreign Relations and adopted. The two bills were referred to a Conference Committee, with the result that a compromise measure, slightly modified from the House bill, was passed by both branches of Congress, on the 3d and 4th of May, and signed by the President on the 5th. It continues former laws for ten years. It directs "that any Chinese person or person of Chinese descent when convicted and adjudged under any of said laws to be not lawfully entitled to be or remain in the United States," shall be removed to China, or to such other country as he may prove to be a subject or citizen of. It declares that any such person under arrest "shall be adjudged to be unlawfully within the United States, unless such person shall establish, by affirmative proof, . . . his lawful right to remain in the United States"; and that any such person "convicted and adjudged to be not lawfully entitled to be or remain in the United States shall be imprisoned at hard labor for a period of not exceeding one year, and thereafter removed from the United States, as hereinbefore provided." The act denies bail, on an application for a writ of habeas corpus, by a Chinese person seeking to land in the United States. It requires all Chinese laborers who were within the limits of the United States at the time of the passage of the act, and who were entitled to remain, to obtain certificates of residence, from district collectors of internal revenue, and orders the deportation of those who had failed to do so at the expiration of one year. This extraordinary measure of exclusion has been commonly known as the "Geary Act."—E. McPherson, *Hand-book of Politics*, 1892.

A. D. 1892.—Settlement of the Alaskan Boundary.—A convention between the governments of the United States and Great Britain was entered into and ratifications exchanged in August, 1892, providing for a coincident or joint survey, "as may in practice be found most convenient," to determine the boundary line between Alaska and the Canadian provinces.

A. D. 1892.—The Twenty-seventh Presidential Election.—Five parties presented candidates in the presidential election held November 8, 1892—namely: the Democratic, the Republican, the People's, or Populist, the Prohibitionist, and the Socialistic Labor. The nominees of the Democratic Party were Grover Cleveland, for President, and Adlai E. Stevenson, for Vice President; of the Republican Party, Benjamin Harrison and Whitelaw Reid, for President and Vice President, respectively; of the Populist Party, James B. Weaver and James G. Field; of the Prohibition Party, John Bidwell and James B. Cranfill; of the Socialistic Labor Party, Simon Wing and Charles H. Matchett. The dominant issues in the canvass were the tariff question and the silver question. "The Democrats named no electoral tickets in Colorado, Idaho, Kansas, North Dakota, and Wyoming, but voted for the people's party electors with the object of taking those States away from the Republicans. They put out an electoral ticket in Nevada, but still voted mostly for the Populist electors. In North Dakota also there was a partial fusion between the Democrats and the People's party, and in Minnesota a part of the Weaver electoral ticket was accepted by the Democrats. In Louisiana there was a fusion of the Republicans and the People's party, each nominating half of the 8 electors. In Alabama there was a fusion of some of the Republicans with the People's party. In Texas a Republican ticket called the Lily White was set up, which differed from the regular ticket. In Michigan a new electoral law, which was declared constitutional by the United States Supreme Court on Oct. 17, 1892, provided for the separate election of a Presidential elector in each Congressional district, and in consequence the electoral vote of the State was divided. In Oregon the name of one of the four electors on the People's ticket was also placed on the Democratic ticket. . . . The total popular vote cast was reported as 12,154,542," of which Cleveland received 5,556,553; Harrison, 5,175,577; Weaver, 1,122,045; Bidwell 279,191; Wing, 21,191. The electoral votes of the States were cast as follows: Cleveland, 277; Harrison, 145; Weaver, 22; giving Cleveland a clear majority of 110.—*Appletons' Annual Cyclopædia*, 1892.—"The most striking feature of the elections was the great losses of the Republicans in the West. Illinois and Wisconsin went Democratic by large majorities, California and Ohio were very close, and Colorado, Idaho, Kansas and Nevada chose Populist electors. The Democrats carried all the Northern states generally regarded as doubtful, viz., Connecticut, New York and Indiana, but they nearly lost Delaware. An unusual incident of the result was the division of the electo-

ral votes in several states, owing to the closeness of the popular vote. Thus in Ohio one Cleveland elector and in Oregon one Weaver elector was chosen, the others being Republican; and in California and North Dakota Mr. Harrison secured single votes in the same way. From the conditions of fusion between the Democrats and Populists in the last-named state, it resulted that one of her three electoral votes was given to each of the three candidates. In Michigan, under the district method of choosing electors recently established, Harrison got nine votes and Cleveland five."—*Political Science Quarterly, June*, 1893.

A. D. 1894-1895.—Provision for the admission of Utah as a State.—On the 17th of July, 1894, the President, by his signature, gave effect to a bill which provides for the admission of Utah to the Union as a State. The admission, however, cannot become a completed fact before the later part of the year 1895, since the bill provides for the holding of a convention in March, 1895, to frame a constitution for the proposed new State, and for submitting such constitution to the people at the election in November, 1895.

A. D. 1895.—The Status of Civil-service Reform.—Commissioner Roosevelt's Review.—"In 1883 the civil service law was established at Washington, and in the larger post-offices and custom-houses throughout the country, taking in a total of some 14,000 employees. The great extensions since have all taken place during the last six years, a period which happens to include my own term of service with the Commission, so that I write of them at first hand. In 1889 the railway mail service was added, in 1893 all the free delivery post-offices, and in 1894 all the smaller custom-houses and the internal revenue service. Other important but smaller extensions have been made, and the larger offices have grown, so that now about 50,000 employees are under the protection of the law. There are, of course, and there always must be in a body so large, individual cases where the law is evaded, or even violated; and as yet we do not touch the question of promotions and reductions. But, speaking broadly, and with due allowance for such comparatively slight exceptions, these 50,000 places are now taken out of the political arena. They can no longer be scrambled for in a struggle as ignoble and brutal as the strife of pirates over plunder; they no longer serve as a vast bribery chest with which to debauch the voters of the country. Those holding them no longer keep their political life by the frail tenure of service to the party boss and the party machine; they stand as American citizens, and are allowed the privilege of earning their own bread without molestation so long as they faithfully serve the public. The classified service, the service in which the merit system is applied, has grown fast. It is true that the outside service where the spoils theories are still applied in all their original nakedness, has grown only less fast. The number of offices under the government has increased very rapidly during the last twenty years; but the growth of the classified service has been even more rapid, so that a constantly increasing percentage of the whole is withdrawn from the degrading grasp of the spoils system. Now, something like a quarter of all the offices under the federal government in point of numbers, representing nearly a half in point of salaries, has been put upon the basis of decency and merit. This has been done by the action of successive Presidents under the law of 1883, without the necessity of action by Congress. There still remain some things that can be done without further legislation. For instance, the labor force in the navy yards was put on a merit basis, and removed from the domain of politics, under Secretary Tracy. This was done merely by order of the Secretary of the Navy, which order could have been reversed by his successor, Secretary Herbert. Instead of reversing it, however, Secretary Herbert has zealously lived up to its requirements, and has withstood all pressure for the weakening of the system in the interests of the local party machines and bosses. It is unsafe to trust to always having Secretaries of the Navy like Messrs. Tracy and Herbert. The Civil Service Commission should be given supervision over the laborers who come under the direction of Cabinet officers. Indeed, all the laboring force and all the employees of the District of Columbia employed by the federal government should be put under the Commission. When this has been done, and when a few other comparatively slight extensions have been made, all that can be accomplished by the unaided action of the executive will have been accomplished. Congress must then itself act by passing some such bill as that of Senator Lodge in reference to fourth-class postmasters; by passing some bill in reference to the consular service on the outlines of that suggested by Senator Morgan (but giving power to the Civil Service Commission itself in the matter); and then by providing that all postmasters and similar officers shall hold office during good behavior, including as well those nominated by the President and confirmed by the Senate as those appointed by the President alone. Of all the offices under the federal government, not one in a hundred can properly be called political."—T. Roosevelt, *The Present Status of Civil Service Reform* (*Atlantic, Feb.*, 1895).

A. D. 1895.—President Cleveland's Special Message on the condition of the National Finances.—In a special message to Congress, on the 28th of January, 1895, President Cleveland renewed an earnest appeal which he had made at the opening of the session, for legislation to correct the mischievous working of the existing currency system of the country. The condition of the national finances, produced by unwise laws, was set forth clearly in this message, as follows: "With natural resources unlimited in variety and productive strength, and with a people whose activity and enterprise seek only a fair opportunity to achieve national success and greatness, our progress should not be checked by a false financial policy and a heedless disregard of sound monetary laws, nor should the timidity and fear which they engender stand

in the way of our prosperity. It is hardly disputed that this predicament confronts us to-day. Therefore, no one in any degree responsible for the making and execution of our laws should fail to see a patriotic duty in honestly and sincerely attempting to relieve the situation. . . . The real trouble which confronts us consists in a lack of confidence, widespread and constantly increasing, in the continuing ability or disposition of the Government to pay its obligations in gold. This lack of confidence grows to some extent out of the palpable and apparent embarrassment attending the efforts of the Government under existing laws to procure gold, and to a greater extent out of the impossibility of either keeping it in the Treasury or canceling obligations by its expenditure after it is obtained. The only way left open to the Government for procuring gold is by the issue and sale of its bonds. The only bonds that can be so issued were authorized nearly twenty-five years ago, and are not well calculated to meet our present needs. Among other disadvantages, they are made payable in coin, instead of specifically in gold, which, in existing conditions, detracts largely and in an increasing ratio from their desirability as investments. It is by no means certain that bonds of this description can much longer be disposed of at a price creditable to the financial character of our Government. The most dangerous and irritating feature of the situation, however, remains to be mentioned. It is found in the means by which the Treasury is despoiled of the gold thus obtained without canceling a single Government obligation and solely for the benefit of those who find profit in shipping it abroad or whose fears induce them to hoard it at home. We have outstanding about five hundred millions of currency notes of the Government for which gold may be demanded, and, curiously enough, the law requires that when presented and, in fact, redeemed and paid in gold, they shall be reissued. Thus the same notes may do duty many times in drawing gold from the Treasury; nor can the process be arrested as long as private parties, for profit or otherwise, see an advantage in repeating the operation. More than $300,000,000 in these notes have already been redeemed in gold, and notwithstanding such redemption they are all still outstanding. Since the 17th day of January, 1894, our bonded interest-bearing debt has been increased $100,000,000 for the purpose of obtaining gold to replenish our coin reserve. Two issues were made amounting to fifty millions each — one in January and the other in November. As a result of the first issue there was realized something more than $58,000,000 in gold. Between that issue and the succeeding one in November, comprising a period of about ten months, nearly $103,000,000 in gold were drawn from the Treasury. This made the second issue necessary, and upon that more than fifty-eight millions in gold was again realized. Between the date of this second issue and the present time, covering a period of only about two months, more than $69,000,000 in gold have been drawn from the Treasury. These large sums of gold were expended without any cancellation of Government obligations or in any permanent way benefiting our people or improving our pecuniary situation. The financial events of the past year suggest facts and conditions which should certainly arrest attention. More than $172,000,000 in gold have been drawn out of the Treasury during the year for the purpose of shipment abroad or hoarding at home. While nearly one hundred and three millions of this amount was drawn out during the first ten months of the year, a sum aggregating more than two-thirds of that amount, being about sixty-nine millions, was drawn out during the following two months, thus indicating a marked acceleration of the depleting process with the lapse of time. The obligations upon which this gold has been drawn from the Treasury are still outstanding and are available for use in repeating the exhausting operation with shorter intervals as our perplexities accumulate. . . . It will hardly do to say that a simple increase of revenue will cure our troubles. The apprehension now existing and constantly increasing as to our financial ability does not rest upon a calculation of our revenue. The time has passed when the eyes of investors abroad and our people at home were fixed upon the revenues of the Government. Changed conditions have attracted their attention to the gold of the Government. There need be no fear that we cannot pay our current expenses with such money as we have. There is now in the Treasury a comfortable surplus of more than $63,000,000, but it is not in gold, and therefore does not meet our difficulty. . . . Whatever ideas may be insisted upon as to silver or bimetallism, a proper solution of the question now pressing upon us only requires a recognition of gold as well as silver, and a concession of its importance, rightfully or wrongfully acquired, as a basis of national credit, a necessity in the honorable discharge of our obligations payable in gold, and a badge of solvency. . . . In my opinion the Secretary of the Treasury should be authorized to issue bonds of the Government for the purpose of procuring and maintaining a sufficient gold reserve and the redemption and cancellation of the United States legal-tender notes and the Treasury notes issued for the purchase of silver under the law of July 14, 1890. . . . The principal and interest of these bonds should be payable on their face in gold, because they should be sold only for gold or its representative, and because there would now probably be difficulty in favorably disposing of bonds not containing this stipulation. . . . National banks should not be allowed to take out circulating notes of a less denomination than $10, and when such as are now outstanding reach the Treasury, except for redemption and retirement, they should be canceled and notes of the denomination of $10 and upward issued in their stead. Silver certificates of the denomination of $10 and upward should be replaced by certificates of denominations under $10. As a constant means for the maintenance of a reasonable supply of gold in the Treasury our duties on imports should be paid in gold, allowing all other dues to the Government to be paid in any other form of money. I believe all the provisions I have suggested should be embodied in our laws if we are to enjoy a complete reinstatement of a sound financial condition." The President's recommendations were not acted upon. The silver interest in Congress defeated all measures introduced for the purpose and left the situation unchanged. The Government was forced to a new issue of bonds under the old act, for the replenishing of its gold reserve.

UNITED STATES OF AMERICA: Historical Geography.—Between the exterior and the interior historical geography of the United States the relation differs from that in most other countries. The internal historical geography of the Old World nations, barring the feudal period, involves so largely questions concerning mere provincial administration that it has no claim, from a geographical standpoint, to an importance equal to the shifting of the great national frontiers. Examples of this are found in the Roman and Byzantine empires, and in the majority of the modern states. In our own case however the order of interest is reversed. Our internal geography has attracted the chief attention of the student, not so much from the greater difficulty of the subject as from its vast importance in the early history of our government. It is not, indeed, too much to say that the organization of the present government under the constitution is an event of scarcely greater importance than the determination of the final policy of the states and the nation concerning the unoccupied western lands. It is this fact alone which gives the higher degree of relative importance to our internal historical geography. The general facts concerning our external geography are quickly told. The outlines of the entire subject are contained in the enumeration of the eight cessions, as follows: the original territory ceded by Great Britain at the peace of Paris in 1783 (see page 3403); the Louisiana purchase from France in 1803 (pages 2093, and 3443); the acquisition of Florida from Spain by the treaty of 1819 (page 1184); the admission of Texas in 1845 (page 3187); the undisputed acquisition of the Oregon country by treaty with Great Britain in 1846 (page 2454); the first Mexican cession by the peace of Guadalupe Hidalgo in 1848 (page 2219); the second Mexican cession, known as the Gadsden purchase, in 1853 (page 140); and the purchase of Alaska from Russia in 1867 (page 37). The enumeration of these eight acquisitions, all of which, save the final one, are shown on the first United States map, affords a complete picture of the successive stages of our territorial growth. The occasion of these different annexations, as well as their exact territorial extent, would involve us in a series of details which are beyond the purpose of the present article. It should be observed, however, that in several cases the map shows the territories in question as finally determined by treaty or survey, rather than their actual extent as understood at the time the annexations were made. This is one of the inevitable disadvantages in the purely cartographic treatment of such a subject. The historical map is compelled from its nature to give a tangible appearance to matters which are often very intangible in fact. In the case, for example, of what we may call the first United States, the country as recognized by the treaty of Paris, the western line of the Mississippi was the only boundary which was not the subject of future discussion. The southern frontier as arranged at Paris was affirmed by treaty with Spain in 1795. On the other side, however, Great Britain retained a number of posts in the Old Northwest up to the Jay treaty of 1794; the boundary between the upper Mississippi and the Lake of the Woods, imperfectly described in the Paris treaty, was not settled until 1818; the line from the intersection of the St. Lawrence to the Sault Ste. Marie was established in 1822 by joint commission under the treaty of Ghent; while the Maine frontier question, the most difficult and obstinate of all our boundary disputes, was not finally settled until the year 1842. The Louisiana purchase of 1803 brought in fresh questions concerning our territorial limits. On three sides, the North, West and Southwest the frontiers of this vast area were undefined. On the northern side the boundary was settled with Great Britain by the treaty of 1818 which carried the line along the forty-ninth parallel to the Rocky Mountains, while the treaty of 1819 with Spain, which ceded Florida to the United States, also defined the limits of Louisiana on the Southwest. This line of 1819 has an additional importance, in that it drew the frontier between Spain and the United States along the forty-second parallel to the Pacific coast. The importance of this lay in the fact that it gave us a clear title on the Spanish side to the so-called Oregon country. The exact connection, real or supposed, between this territory and the Louisiana country was for many years one of the disputed points in American historical geography. The belief in this connection, at one time general, undoubtedly had its origin in the undefined character of Louisiana at the time of the purchase, and the fact that our government turned this indefiniteness to its own purpose in advancing its Oregon claims. It is now clear, however, from the evidence of the old maps, the official statement of the limits of the region, of which there is but one in existence (the Crozat grant of 1712) and lastly the understanding of France herself at the time of the cession, that Louisiana did not include in its limits any part of the Pacific watershed. A map published in a subsequent work of the French plenipotentiary placed the western boundary of Louisiana at the one hundred and tenth meridian. A line drawn in this arbitrary fashion and unsanctioned by the terms of the treaty itself may be regarded merely as one of convenience. If this view is correct it is certainly more convenient and, at the same time, more logical, to consider the western boundary as extending to the Rocky Mountain watershed,—a line which would not deviate to any radical extent from the meridian in question. The historical connection however between the Louisiana purchase and our subsequent acquisition of the Oregon country is perfectly clear. The exploration of the latter followed almost immediately but its final annexation was delayed by the opposing claim of Great Britain. In this controversy the claim of the United States was merely relative as opposed to that of England. The just claimant was undoubtedly the king of Spain, whose rights, based on discovery, antedated those of either of the contesting powers. The Spanish title, however, having, as we have seen, been relinquished by the treaty of 1819, the issue between Great Britain and the United States became clearly defined. A joint occupation of the disputed territory by the two powers ensued from 1818 to 1846. In the latter year was negotiated the compromise treaty, which continued our northern line of 1818 on the forty-ninth parallel from the Rocky Mountains to the Pacific coast. From the treaty of 1846 we may date the completion of our northern frontier, although the ownership of certain islands be-

tween Vancouver and the mainland was not settled until 1872. A few more years witnessed the completion of our southern frontier, as well. In 1845 Texas was admitted to the Union. The western boundary of the Rio Grande, claimed by the new state under her constitution of 1836, led directly to the war with Mexico, and by that war to the great additional cession at Guadalupe Hidalgo in 1848. The southern boundary was finally completed by the Gadsden purchase of 1853. Coming now to the study of our internal geography, we find ourselves in contact with what is practically a distinct subject. Here we encounter a whole series of those weighty questions, the solution of which figures so prominently in the early history of the American government. We have already noted that the first western boundary of the United States was placed by the treaty of 1783 at the Mississippi river. But during the Paris negotiations our ally France and quasi ally Spain both opposed this westward extension of our territory and it was long an open question, even after our independence itself was assured, whether we should not be compelled to accept a western boundary on the Appalachian range. Years before the final settlement of the question at Paris, the expectancy of the Mississippi boundary had given rise to questions which caused an undercurrent of dissension between the states during the entire period of the Revolutionary War. In their relation to the western land question, the thirteen original states divide themselves into two classes, the claimant and non-claimant states. In the first class were Massachusetts, Connecticut, New York, Virginia, the two Carolinas and Georgia; in the second, New Hampshire, Rhode Island, New Jersey, Pennsylvania, Delaware and Maryland. The claims of the seven first named states covered every inch of our prospective western domain and in the country north of the Ohio, known as the Old Northwest, there were opposing claims of two and in some districts of even three states to the same territory. The extent of these claims is indicated on the map of the Federated states in 1783. They rested for the most part upon the royal grants and charters to the colonies, and, in the case of New York, upon the treaties with the Iroquois. Their relative merits where conflicting, or their collective merit as a whole, are questions which we will not attempt to discuss. It is sufficient to observe that if insisted upon in their entirety they would have presented an insuperable obstacle to the formation of an American federate government. In the proceedings of the Continental Congress, as well as in the state legislative bodies, touching this western domain, we may find the germs of nearly all the political and constitutional questions which have made the greater part of our subsequent history. The relative rank and power of the states, the obligation of one state towards another, the individual rights of states as opposed to the collective rights of the Union; all of these questions entered into the great problem which the nation was now called upon to solve. The objections to the western claims by the non-claimant states, though urged with varying degrees of vehemence and accompanied with many widely differing alternatives, may be fairly resolved into the two following contentions: that it was unjust that so vast a domain, whose acquisition at the peace could only be insured through the joint labor of all the states, should thereafter become the property of a certain favored few, and also that the claims if allowed would in the end give the claimant states a preponderating power which would be extremely prejudicial if not dangerous to the others. Of all the non-claimant states, Maryland was the most determined in her opposition, and it is to her that Professor Herbert B. Adams in his monograph on "Maryland's Influence upon Land Cessions to the United States," assigns the chief credit for the final creation of the first national domain (see page 3396). The claim though a just one cannot be asserted without an important qualification. The proposition advanced by Maryland, that a national title to the western lands be asserted by a clause in the Articles of Confederation, was manifestly one to which the claimant states would never give their consent. It was due, however, to the action of Maryland, — which refused for more than three years, from November 1777 to March 1781, to ratify the articles, — that the question was kept open until the claimant states, in order to complete the circle of the Union, found it necessary to adopt the policy of voluntary cessions, suggested by Congress. The history in detail of the several state cessions involves many questions concerning the distribution and sale of public lands which need not concern us. Some of the offers of cession, at first conditional and partial, were made absolute and final, as, one by one, the besetting difficulties were cleared away. The dates of the final cessions by the seven claimant states in order were as follows: New York 1781, Virginia 1783, Massachusetts 1785, Connecticut 1786, South Carolina 1787, North Carolina 1790, Georgia 1802. Certain land reservations north of the Ohio, as shown on the map of the United States in 1790, were made by both Virginia and Connecticut; but Virginia renounced jurisdiction over these lands in the cession, and Connecticut did likewise in 1800, the two states reserving merely the property rights. The territory south of the Ohio was not included in the Virginia cession of 1783 but the district of Kentucky was made the subject of a second cession in 1789. The completion of this list closed the interesting chapter in our history covered by the state cessions and gave to the United States the sovereignty over its first great western public domain. Before pursuing this subject further, let us see in what relation the cessions stand to the present form of the thirteen original states. Some boundary contentions still remained, but these are not of historic importance. The claim of Massachusetts in what is now Western New York was settled by joint commission in 1786, while Pennsylvania purchased a tract of land on lake Erie from the general government in 1792. At the present day sixteen states stand upon the territory which remained to the original thirteen, the three additional ones each springing from the partition of one of the older states. In 1790 New York assented to the independence of Vermont, which was admitted to the Union in the following year; in 1820 Maine was separated from Massachusetts and admitted; and finally, in 1862, West Virginia was set off from Virginia and became a state in 1863. We will now resume the subject of the disposition of the western lands. We have already noted the termination

of that stage of their history which involves the territorial claims of individual states. The second stage concerns itself with the evolution of what may be called the American system of territorial government. The first, indeed, had not reached its completion before the second began to receive the greater measure of public attention. The western land cessions to the government were made with the general understanding, tacit in most cases, but in that of Virginia explicitly stated, that the ceded territory should eventually be formed into additional states. The first national domain may therefore be regarded as a district held in trust by the government for a special purpose. This view, which was not only required by the terms of the Virginia cession, but also represented the general sentiment of the time, has formed the basis of our entire subsequent policy in dealing with the national domain, — a policy which has remained unaltered even in the case of the immense territories that afterwards came into the direct possession of the government by treaty with foreign powers. The one question remaining was the erection of the legislative machinery which should provide for the government of the territories during their preparation for statehood. The problem was finally solved by the Ordinance of 1787 for the government of the Northwest territory. This famous ordinance, the first of the long series of acts concerning territorial government, was the last noteworthy piece of legislation under the old Articles of Confederation, and the year which witnessed both the successful inauguration of our territorial policy and the adoption of the new constitution is the most memorable in the entire history of American institutions. The history of the enactment of the Ordinance, for many years veiled in obscurity, has been fully elucidated by the late W. F. Poole (monograph on "The Ordinance of 1787"); the full text is printed in its proper place in this work (page 2432). Many of its provisions, suited only for the special occasion of their use, are now antiquated and obsolete, and neither their letter nor spirit find a place in subsequent territorial legislation. But the fact remains that this act was in a certain sense the great prototype; it was the first to organize and set in motion the machinery of our territorial policy. A policy that has provided without friction for the tremendous national expansion which has ensued during the present century may justly be regarded as one of the greatest achievements in the political history of the American government. In our own day, when the admission of a new state or the erection of a new territory is regarded as hardly more than a routine event in the working of our political system, it is easy for us to underestimate the vital importance of the first steps which were taken concerning the regulation of the national domain. It was because those steps were to determine in a measure our entire future policy, that the history of the old Continental Congress should form an absorbing theme for every student of our internal geography. It is unnecessary to follow this subject in detail through its later history, which is simply a monotonous record of legislative enactments for the organization of new territories or the admission of new states. The principle had been fully established; the history of the next century, followed step by step, can show very little beyond its consistent application. Political considerations have, it is true, often delayed or prematurely hastened the admission of new states, but there has been one case only where we have been called upon again to face a question similar to that which was solved by the old congress. The circumstances of the admission of the republic of Texas bear no analogy to that of any other state received into the Union since the formation of the government. Here was, not a state created by mere legislative enactment, but an independent foreign sovereignty, admitted to the Union at its own solicitation, bringing with it as a dower a territory immeasurably greater than the national policy had ever before assigned to a single state. Once more therefore we have the old question of a troublesome state sovereignty in immense unoccupied lands. The comparative absence of friction in the solution of this new problem proves again the efficiency of the old policy in dealing with all such questions. No cession of territory was wrung from Texas or in this case even solicited. The state was admitted to the Union in 1845 claiming a continuous western boundary on the Rio Grande. In 1850, after the peace of Guadalupe Hidalgo had determined our boundary on the Mexican side, Texas sold to the General Government, for the sum of $10,000,000, all of her territorial claims north and west of her present boundaries. With some modifications the history of the original cessions repeats itself in this transaction, which was the last occasion of a great transfer of territory to the Union by one of its members. There are many other features in our internal geography, among the most notable the institution of slavery, which would be worthy of attention were the space to permit. In view of this limitation, however, we cannot pursue the subject beyond this general review of its main outlines. There is a dearth of works on American historical geography subsequent to the Declaration of Independence. It is a subject, indeed, which cannot be very satisfactorily studied simply through the literature dealing exclusively with the topic. Of the atlases Professor Albert Bushnell Hart's "Epoch Maps Illustrating American History" is the best; the most serviceable of the text works is Henry Gannett's pamphlet on "Boundaries of the United States and of the several States and Territories, with a Historical Sketch of the Territorial Changes," published as bulletin No. 13 of the United States Geological Survey. Townsend MacCoun's "Historical Geography of the United States" and the later chapters of Walter B. Scaife's "America, its Geographical History" are also useful. An excellent account of our geographical history during the early years of the Government, covering the period of the state cessions, may be found in B. A. Hinsdale's "Old Northwest, with a View of the Thirteen Colonies as constituted by the Royal Charters." For a more careful study there is of course no substitute for the texts of the grants, charters, treaties and legislative acts of Congress, and the more important of these are freely quoted from in Mr. Gannett's work.— Alan C. Reiley.

A selected bibliography of historical geography in general, including that of the United States, will be found appended to this volume. —Appendix H.

UNIVERSALISM.—"Universalism, using the word in its present theological meaning, is the doctrine or belief that it is the purpose of God, through the grace revealed in our Lord Jesus Christ, to save every member of the human race from sin. The word suggests nothing with regard to any human founder, any place where it was first promulgated, any particular form of church polity, any rite or ordinance, any opinion of the equality or the subordination of the Son to the Father. Universalism is not dependent on these. It may be and to some extent has been and is still entertained by those in Christian sects whose denominational titles emphasize these respective particularities. . . . The presence of Universalism may be traced to the earliest period of Christian history. The existence of the Universalist denomination reaches but little beyond a century. . . . Organized Universalism, the creation and establishment of the Universalist Church, had its chief, but not exclusive, instrument in the ministry of Rev. John Murray, who, born in Alton, England, December 10 (O. S.) 1741, landed in America in the latter part of September 1770."—R. Eddy, *Hist. of Universalism*, ch. 7 and 4 (*Am. Church Hist. Series*, v. 7). — "Mr. Murray arrived in America in 1770, and after much going to and fro organized, in 1779, at Gloucester, Mass., the first congregation in America on distinctly Universalist principles. Another man, along other lines of thought, had been working his way to somewhat similar conclusions. In 1782 Elhanan Winchester, a thoroughly Calvinistic Baptist minister in Philadelphia, left there his estranged brethren, and gathered strong and organized them into a 'Society of Universal Baptists,' holding to the universal restoration of mankind to holiness and happiness. The two differing schools fraternized in a convention of Universalist churches at Philadelphia in 1790, at which articles of belief and a plan of organization were set forth, understood to be from the pen of Dr. Benjamin Rush; and a constitution containing the holding of views in harmony with the union of the churches was framed, and the obligation of mutual and universal love which flow from that union."—L. W. Bacon, *A Hist. of American Christianity*, ch. 24 (*Am. Church Hist. Series*, v. 3).

USCOCKS, The. — "During the reign of Ferdinand [Emperor, 1558–1564], several bodies of Christians, quitting the provinces which had been recently conquered by the Turks, obtained from the Austrian sovereigns a refuge at Clissa, in Dalmatia, under the condition of forming themselves into a frontier militia continually in arms against the infidels, and, from their emigration, received the name of Uscocks, which, in the language of the country, signifies wanderers. They fulfilled the purpose of their establishment; and, being at length expelled by the Turks, received a new asylum at Segna, a ruined fortress in Croatia, on the coast of the Adriatic gulph. Here, their numbers increasing by the accession of Italian banditti and other marauders, they were rendered more formidable than before; for they no longer confined their predatory incursions to the land, but became pirates by sea. . . . Their audacity increasing with success and plunder, they pillaged, without distinction, the vessels of all the nations who traded in the Adriatic." They were attacked by the Turks and the Venetians, and the latter, at length, in the early part of the 17th century, forced the Duke of Styria, who had protected the freebooters, to allow their stronghold at Segna to be demolished. "The Uscocks, being transplanted to Carlstadt, soon lost their name and distinction."—W. Coxe, *Hist. of the House of Austria, ch.* 42 (*v.* 2).

USIPETES AND TENCTHERI, Cæsar's overthrow of the.—The Usipetes and Tenctheri, two German tribes, whose home was on the lower course of the Rhine, north and south of the Lippe, being hard pressed by the Suevi, crossed the Rhine, B. C. 55, and began to spread themselves along the Valley of the Meuse. Cæsar marched against them with great promptitude, refused to parley with them, accused them of treacherous attempts to gain time, and was himself charged with wicked treachery, in seizing their chiefs who met him with pacific propositions. It is certain, at all events, that he was able to attack them when they were deprived of leaders, and to slaughter them with so little resistance that not one Roman soldier was killed. Those who escaped the sword were driven into the Rhine (probably at its point of junction with the Moselle) and almost the entire mass of 180,000 are said to have perished. The remnant took refuge with the Sicambri or Sigambri, on the farther shore of the Rhine. Cæsar demanded the surrender of them, and, when refused, he caused his engineers to bridge the river in ten days, led his army across it and laid waste the country of the Sigambri. This was the first crossing of the Rhine by the Romans. The Suevi offered battle to the Roman invaders, but Cæsar prudently returned, and destroyed the bridge.—Cæsar, *Gallic Wars, bk.* 4, *ch.* 1–19.

A. D. 1849-1850.—The proposed State of Deseret.—Organization of the Territory of Utah.—Its name.—"Until the year 1849 the Mormons were entirely under the control of their ecclesiastical leaders, regarding the presidency not only as their spiritual head, but as the source of law in temporal matters. . . . There was already in their midst a small percentage of gentile citizens, gathered . . . from nearly all the civilized nations of the earth. . . . Not infrequently litigation arose among the gentiles, or between Mormon and gentile; and though strict justice may have been done by the bishops, it was difficult for the latter to believe that such was the case. . . . Thus it became advisable to establish for the benefit of all some judicial authority that could not be questioned by any, whether members of the church or not, and this authority must be one that, being recognized by the government of the United States, would have the support of its laws and the shield of its protection. Further than this, if the Mormons neglected to establish such government, the incoming gentiles would do so ere long. Early in 1849, therefore, a convention was summoned of 'the inhabitants of that portion of Upper California lying east of the Sierra Nevada Mountains,' and on the 4th of March assembled at Salt Lake City. A committee was appointed to draught a constitution, under which the people might govern themselves until congress should otherwise provide by law. A few days later the constitution was adopted, and a provisional government organized, under the name of the State of Deseret. An immense tract of country was claimed, extending from latitude 33° to the border of Oregon, and from the Rocky Mountains to the Sierra Nevada, together with a section of the territory now included in southern California, and the strip of coast lying between Lower California and 118° 30′ of west longitude. The seat of government was to be at Salt Lake City." In July Almon W. Babbitt was elected delegate to Congress, and that body was petitioned to admit the provisionally organized State into the Union. The delegate and his petition met with a cool reception at Washington; but in September, 1850, Congress passed an act organizing the Territory of Utah, and Brigham Young was appointed Governor. "The act to establish a territorial government for Utah placed the southern boundary at the 37th parallel, the section between that limit and the 33d parallel being included in the Territory of New Mexico [organized at the same time], with the exception of the part transferred to California, by which State Utah was to be bounded on the west. On the north, Oregon was to remain as the boundary, and on the east the Rocky Mountains." "The word Utah originated with the people inhabiting that region. Early in the 17th century, when New Mexico was first much talked of by the Spaniards, the principal nations of frequent mention as inhabiting the several sides of the locality about that time occupied were the Navajos, the Yutas, the Apaches, and the Comanches. Of the Utah nation, which belongs to the Shoshone

family, there were many tribes. . . . The early orthography of the word Utah is varied." "Yuta" "was a common spelling by the early Spaniards, and might be called the proper one. Later we have 'Youta,' 'Eutaw,' 'Utaw,' and 'Utah.'"—H. H. Bancroft, *Hist. of the Pacific States, v.* 21 (*Utah*), *ch.* 17, *and foot-note, p.* 34.—See, also, AMERICAN ABORIGINES: SHOSHONEAN FAMILY.

A. D. 1857-1859.—The Mormon Rebellion. —"To this would-be 'State of Deseret' President Fillmore had assigned Brigham Young, the spiritual head of the church, as territorial governor; and by 1857, when a Democratic President showed the disposition to apply the usual temporal rule of rotation to the office, Young was rebellious, and the whole Mormon population, refusing allegiance to any one but their consecrated head, began to drill and gird on their armor for resistance. Judges of the territorial courts had to flee for their lives; justice, which had long been tampered with to absolve church members from punishment, was deprived of process. It was charged that the Mormon hierarchy had leagued with Indian tribes to impel them to atrocities against the Gentile inhabitants, while their own Danites, or destroying angels, were secretly set apart and bound by horrid oath to pillage and murder such as made themselves obnoxious to the theocracy. . . . President Buchanan appointed as the new governor of Utah Alfred Cumming, a man combining courage with discretion, and filled the judicial and other vacancies which existed. To protect those new officers and aid them in discharging their functions, he ordered a detachment of regulars to accompany them to the Salt Lake region. The need of this was soon apparent. Early in September, 1857, a part of the troops left Fort Laramie, and on the 15th of the same month Brigham Young, parading audaciously the commission he still held from the United States, forbade all armed forces from entering the territory, and called upon his people to defend themselves against the 'armed mercenary mob' of invaders. His legislature, meeting later, sustained him in his bitter diatribe against the 'profane, drunken, and corrupt officials,' which a Washington administration was trying to force upon Utah territory at the point of the bayonet. A Mormon force had meanwhile advanced to impede the approach of our regulars, capturing and burning three supply trains of wagons laden with tents and provisions, stampeding the horses, and so crippling Fort Bridger, which was distant some twelve days' march from Salt Lake city, as to deprive our army, on its arrival, of a proper winter's shelter after its long and fatiguing march, and compel General Johnston, who commanded this important post, to despatch part of his forces upon a dreary and hazardous expedition to New Mexico for further supplies. Johnston's despatches in October showed the President that unless a large force was quickly sent out, a long conflict would be inevitable. Buchanan and his Secretary of War asked from the present Congress ten new regiments, of which five might be used to bring the Mormons to subjection. But the Lecompton controversy was raging; and the use of Federal troops to put down the free-State movement in Kansas had caused such mistrust and irritation that none but the President's unshaken supporters felt inclined to place more troops at his disposal. The bill for an army increase was lost, though both Houses passed a measure authorizing the President to accept for the Utah disturbances two regiments of volunteers. The volunteers were not called out; but Buchanan mustered a military force out of the regulars strong enough to overawe and overpower Utah's rebellious inhabitants. Two peace commissioners also bore to Utah a proclamation from the President, dated April 6th, which offered free pardon, except to those who persisted still in disloyal resistance. Governor Cumming, upon his arrival, made a like announcement. These conciliatory efforts, backed by an irresistible show of military strength, brought the Mormons to a speedy acknowledgment of allegiance. They fought not a battle, but manifested a purpose to burn their houses and make a new and peaceable retreat into the wilderness. From this purpose, after some conferences, they were at length dissuaded; and it was agreed in June between the Mormon leaders and our commissioners that the United States soldiery should be kept out of sight as much as possible while Utah remained tranquil. On the last day of the same month the new governor, accompanied by Brigham Young, came back to Salt Lake city to assume functions which were fully recognized. A few days earlier, and before the Mormons had begun to return to their homes, General Johnston and his troops, leaving Fort Bridger, reached the desolate city, marched through its streets, and, crossing its river Jordan, encamped on the opposite bank. While abandoning all further effort at violent resistance, the Mormons still clung to the hope of being left to govern themselves and preserve their institutions against the world's contaminating touch, by gaining the indispensable condition of practical isolation and independence. To this Congress in its next winter's session they renewed the former petitions they had presented for immediate admission to the Union as the 'State of Deseret.' And should this request be denied, they prayed that the organic act of the territory might be so amended as to give the inhabitants the right to choose their own governor, judges, and other officers. All this Congress quietly ignored; and in military circles it was still generally believed that, for all this outward show of loyal acquiescence, the Mormons felt at heart no more affection for the United States than for any foreign nation; that the only rule they really recognized was that of their religion and the will of their hierarchy; and that force must still be used to compel them. Such views were entertained by General Albert Sidney Johnston, the military commander at Utah, destined to later distinction in the art of war. But Cumming, the governor, who had the temporizing instincts of a civilian, thought differently. The two came into collision when Mormons were brought to trial in the courts for a slaughter of emigrants in 1857, known as the Mountain Meadow massacre. [This was the massacre, by Indians and Mormons, of a party of 136 emigrants, from Arkansas and Missouri, who were passing through Utah to California; it occurred in September, 1857, in a valley called the Mountain Meadows, about 300 miles south of Salt Lake city; only 17 young children were saved from the slaughter.] At the request of the

Federal judge, Johnston furnished a military detachment to guard the prisoners; and when Cumming, the governor, interposed because of the angry remonstrance of the people, Johnston would not remove them. Buchanan, being appealed to, sustained the governor's authority."— J. Schouler, *Hist. of the U. S., ch.* 22 (*v.* 5).

A. D. 1882-1893. — The Edmunds Act and its enforcement.—Abandonment of Polygamy by the Mormons.— Proclamation of Amnesty for past offenses against the law.— In March, 1882, an Act of Congress (known as the Edmunds Act) was passed for the purpose of making efficient the law against polygamy in the territories, which had stood among the statutes of the United States for twenty years, without power on the part of the federal courts or officials in Utah to enforce it, as against Mormon juries. Besides repeating the penalties prescribed in the Act of 1862, the Act of 1882 provides, in its eighth section, that "no polygamist, bigamist, or any person cohabiting with more than one woman, and no woman cohabiting with any of the persons described as aforesaid in this section, in any Territory or other place over which the United States have exclusive jurisdiction, shall be entitled to vote at any election held in any such Territory or other place, or be eligible for election or appointment to or be entitled to hold any office or place of public trust, honor, or emolument in, under, or for any such Territory or place, or under the United States." The ninth and last section is as follows: "Sec. 9. That all the registration and election offices of every description in the Territory of Utah are hereby declared vacant, and each and every duty relating to the registration of voters, the conduct of elections, the receiving or rejection of votes, and the canvassing and returning of the same, and the issuing of certificates or other evidence of election, in said Territory, shall, until other provisions be made by the legislative assembly of said Territory, as is hereinafter by this section provided, be performed, under the existing laws of the United States and said Territory, by proper persons, who shall be appointed to execute such offices and perform such duties by a Board of five persons, to be appointed by the President, by and with the advice and consent of the Senate, not more than three of whom shall be members of one political party, and a majority of whom shall be a quorum. The members of said Board so appointed by the President shall each receive a salary at the rate of three thousand dollars per annum, and shall continue in office until the legislative assembly of said Territory shall make provision for filling said offices as herein authorized. The Secretary of the Territory shall be the secretary of said Board and keep a journal of its proceedings, and attest the action of said Board under this section. The canvass and return of all the votes at elections in said Territory for members of the legislative assembly thereof shall also be returned to said Board, which shall canvass all such returns and issue certificates of election for those persons who, being eligible for such election, shall appear to have been lawfully elected, which certificates shall be the only evidence of the right of such persons to sit in such assembly: Provided, That said Board of five persons shall not exclude any person otherwise eligible to vote from the polls on account of any opinion such person may entertain on the subject of bigamy or polygamy, nor shall they refuse to count any such vote on account of the opinion of the person casting it on the subject of bigamy or polygamy, but each house of such assembly, after its organization, shall have power to decide upon the elections and qualifications of its members. And at or after the first meeting of said legislative assembly whose members shall have been elected and returned according to the provisions of this act, said legislative assembly may make such laws, conformable to the organic act of said Territory, and not inconsistent with other laws of the United States, as it shall deem proper concerning the filling of the offices in said Territory declared vacant by this act."— The following Proclamation, issued by the President of the United States on the 4th day of January, 1893, may be looked upon as the sequel and consequence of the legislation recorded above: "Whereas Congress, by a statute approved March 22, 1882, and by statutes in furtherance and amendment thereof, defined the crimes of bigamy, polygamy, and unlawful cohabitation in the Territories and other places within the exclusive jurisdiction of the United States and prescribed a penalty for such crimes; and Whereas, on or about the 6th day of October, 1890, the Church of the Latter-Day Saints, commonly known as the Mormon Church, through its president, issued a manifesto proclaiming the purpose of said church no longer to sanction the practice of polygamous marriages and calling upon all members and adherents of said church to obey the laws of the United States in reference to said subject-matter; and Whereas it is represented that since the date of said declaration the members and adherents of said church have generally obeyed said laws and have abstained from plural marriages and polygamous cohabitation; and Whereas, by a petition dated December 19, 1891, the officials of said church, pledging the membership thereof to a faithful obedience to the laws against plural marriage and unlawful cohabitation, have applied to me to grant amnesty for past offenses against said laws, which request a very large number of influential non-Mormons, residing in the Territories, have also strongly urged; and Whereas, the Utah Commission, in their report bearing date September 15, 1892, recommended that said petition be granted and said amnesty proclaimed, under proper conditions as to the future observance of the law, with a view to the encouragement of those now disposed to become law abiding citizens; and Whereas, during the past two years such amnesty has been granted to individual applicants in a very large number of cases, conditioned upon the faithful observance of the laws of the United States against unlawful cohabitation; and there are now pending many more such applications: Now therefore, I, Benjamin Harrison, President of the United States, by virtue of the power in me vested, do hereby declare and grant a full amnesty and pardon to all persons liable to the penalties of said act by reason of unlawful cohabitation under the color of polygamous or plural marriage, who have since November 1,

1890, abstained from such unlawful cohabitation; but upon the express condition that they shall in the future faithfully obey the laws of the United States hereinbefore named, and not otherwise. Those who shall fail to avail themselves of the clemency hereby offered will be vigorously prosecuted. In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed. Done at the city of Washington this 4th day of January, in the year of our Lord 1893, and of the Independence of the United States the 117th. Benjamin Harrison."

UTAHS, UTES, PIUTES, etc. See AMERICAN ABORIGINES: SHOSHONEAN FAMILY.

UTICA: Origin.—"The most ancient Phœnician colonies were Utica, nearly on the northernmost point of the coast of Africa, and in the same gulf (now known as the gulf of Tunis) as Carthage, over against Cape Lilybæum in Sicily, — and Gades, or Gadeira, on the south-western coast of Spain; a town which, founded perhaps near one thousand years before the Christian era, has maintained a continuous prosperity, and a name (Cadiz) substantially unaltered, longer than any town in Europe. How well the site of Utica was suited to the circumstances of Phœnician colonists may be inferred from the fact that Carthage was afterwards established in the same gulf and near to the same spot, and that both the two cities reached a high pitch of prosperity."—G. Grote, *Hist. of Greece, pt.* 2, *ch.* 18.

Relations to Carthage. See CARTHAGE, THE DOMINION OF.

Curio's defeat.—Curio, the legate or lieutenant sent first by Cæsar to Africa (B. C. 49), to attack the Pompeian forces in that quarter, undertook with two legions to reduce the city of Utica, which had became the capital of the Roman Province. Juba, king of Numidia, who was personally hostile to both Curio and Cæsar, came to the assistance of the Pompeians and forced Curio to withdraw from its besieging lines into the neighboring Cornelian camp, which was a famous military entrenchment left by Scipio Africanus. There he might have waited in safety for re-enforcements; but the wily Numidian tempted him out by a feigned retreat and then overwhelmed him. Curio and most of his men were slain.—C. Merivale, *Hist. of the Romans, ch.* 16.

UTRECHT: The Episcopal Principality.—"At the last ford of the Rhine a hamlet had in Roman times been built, possibly a fort also. Nothing is preserved regarding it but the name, which, in the mutations of language, passed from Ultrajectum into Utrecht. Towards the conclusion of the 7th century, Clement Willebrod, an English priest, who had been educated at the monastery of Ripon, coming as a missionary into those parts, succeeded, with the aid of eleven of his fellow-countrymen, in winning over the Frisian people to the Christian faith. He fixed his abode at Utrecht, of which he was afterwards appointed bishop; and gifts of land, at the time of little worth, were made to his successors by Pepin and Charlemagne. Such was the commencement of the temporal grandeur of the prince-bishops, whose dynasty attained to a power little less than sovereign during the middle ages. . . . With ready access to the sea, and not without an early disposition towards these pursuits which their kinsmen of the Rhineland towns were beginning to follow, the inhabitants of Utrecht soon became good sailors and good weavers, and their city throve apace. Enriched by successive grants of privileges and lands, the bishops of Utrecht gradually became powerful feudal lords."—W. T. McCullagh, *Industrial Hist. of Free Nations, ch.* 8 (*v.* 2).

A. D. 1456.—The bishopric grasped by the House of Burgundy.—"Utrecht was still a separate state, governed by its sovereign bishop, who was elected by the votes of the chapter, subject to the approval of the Pope. On the vacancy which occurred towards the end of the year 1455, the choice of the canons fell upon Gisbert van Brederode, who had previously been archdeacon of the cathedral, and was held in general esteem amongst the people as well as the clergy. The Duke of Burgundy coveted so rich a prize, rather for its political importance, however, . . . than for any direct or immediate gain." The Duke appealed to Rome; Gisbert was put back into his archdeaconry, with an annuity for life, and David, a natural son of Duke Philip, was made bishop. "Thus the foundation was laid for the permanent union of Utrecht to the other provinces, although its final accomplishment was destined to be deferred yet many years."—W. T. McCullagh, *Industrial Hist. of Free Nations, ch.* 10 (*v.* 2).

A. D. 1712-1714.—The Treaties which ended the War of the Spanish Succession, forming the Peace of Utrecht and the Treaty of Rastadt.—The long War of the Spanish Succession was brought to a close (except as between Germany and France) by negotiations at Utrecht, which resulted in the concluding of a number of treaties between the several powers concerned, constituting collectively what is known as the Peace of Utrecht. Negotiations to this end were begun by England and France early in 1711, and preliminaries were settled between them and signed in October of that year. This action of the English compelled the other allies to consent to a general conference, which opened at Utrecht January 29, 1712. The discussion of terms lasted more than a year, while the war went on. Between Germany and France the war still continued and it was at Rastadt (March, 1714), not Utrecht, that the last named powers came to their agreement of peace. The several treaties concluded at Utrecht were most of them signed on the 31st day of March, O. S., or April 11, N. S., in the year 1713, "by the plenipotentiaries of France, England, Portugal, Prussia, Savoy, and the United Provinces; the emperor resolving to continue the war, and the

king of Spain refusing to sign the stipulations until a principality should be provided in the Low Countries for the princess Ursini, the favourite of his queen [a demand which he subsequently withdrew]. The chief articles of this memorable pacification were to the following purport: It was stipulated that, . . . Philip, now established on the Spanish throne, should renounce all right to the crown of France; that the dukes of Berry and Orléans, the next heirs to the French monarchy after the infant dauphin, should in like manner renounce all right to the crown of Spain, in the event of their accession to the French throne; that, on the death of Philip, and in default of his male issue, the succession of Spain and the Indies should be secured to the duke of Savoy; that the island of Sicily should be instantly ceded by his Catholic majesty to the same prince, with the title of king; that France should also cede to him the valleys of Pragelas, Oulx, Sezanne, Bardonache, and Château-Dauphin, with the forts of Exilles and Fenestrelles, and restore to him the duchy of Savoy and the county of Nice; and that the full property and sovereignty of both banks and the navigation of the Marañan, or river of Amazons, in South America, should belong to the king of Portugal. It was declared that the king of Prussia should receive Spanish Guelderland, with the sovereignty of Neufchâtel and Valengin, in exchange for the principality of Orange and the lordship of Châlons, and that his regal title should be acknowledged; that the Rhine should form the boundary of the German empire on the side of France; and that all fortifications, beyond that river, claimed by France, or in the possession of his most Christian majesty, should either be relinquished to the emperor or destroyed; that the kingdom of Naples, the duchy of Milan, and the Spanish territories on the Tuscan shore, should be ceded to the house of Austria; that the sovereignty of the Spanish Netherlands should likewise be secured to that family; but that the elector of Bavaria (to whom they had been granted by Philip) should retain such places as were still in his possession, until he should be reinstated in all his German dominions, except the Upper Palatinate, and also be put in possession of the island of Sardinia, with the title of king: that Luxemburg, Namur, and Charleroy should be given to the states-general as a barrier, together with Mons, Menin, Tournay, and other places; and that Lisle, Aire, Bethune, and St. Venant, should be restored to France. It was agreed that the French monarch should acknowledge the title of queen Anne, and the eventual succession of the family of Hanover to the British throne; that the fortifications of Dunkirk (the cause of much jealousy to England, and raised at vast expense to France) should be demolished, and the harbour filled up; that the island of St. Christopher (which had long been possessed jointly by the French and English, but from which the French had been expelled in 1702) should be subject to this country [England]; that Hudson's Bay and Straits (where the French had founded a settlement, but without dispossessing the English, and carried on a rival trade during the war), the town of Placentia, and other districts of the island of Newfoundland (where the French had been suffered to establish themselves, through the negligence of government), and the long-disputed province of Nova Scotia (into which the French had early intruded, out of which they had been frequently driven, and which had been finally conquered by an army from New England in 1710), should be considered as the dependencies of the British crown: that Minorca and the fortress of Gibraltar (conquered from Spain) should remain in the possession of Great Britain; and that the Assiento, or contract for furnishing the Spanish colonies in South America with negroes, should belong to the subjects of Great Britain for the term of thirty years. That these conditions, especially on the part of Great Britain, were very inadequate to the success and expense of the war, will be allowed by every intelligent man, whose understanding is not warped by political prejudices. . . . The other confederates had greater cause to be satisfied, and the emperor [Charles VI.] as much as any of them; yet was he obstinate in refusing to sign the general pacification, though two months were allowed him to deliberate on the terms. But he had soon reason to repent his rashness in resolving to continue the war alone. . . . The imperial army on the Rhine, commanded by prince Eugene, was not in a condition to face the French under Villars, who successively took Worms, Spire, Keiserlautern, and the important fortress of Landau. He forced the passage of the Rhine . . . and reduced Freyburg, the capital of the Breisgau. Unwilling to prosecute a disastrous war, the emperor began seriously to think of peace; and conferences, which afterward terminated in a pacific treaty, were opened between prince Eugene and Villars, at Ranstadt. The terms of this treaty, concluded on the 6th of March (N. S.) 1714 [but ratified at Baden the next September, and sometimes called the Treaty of Baden], were less favourable to the emperor than those which had been offered at Utrecht. The king of France retained Landau, which he had before proposed to cede, with several fortresses behind the Rhine, which he had agreed to demolish [but restored Freiburg]. He procured the full re-establishment of the electors of Bavaria and Cologne in their dominions and dignities; the former prince consenting to relinquish Sardinia to the emperor, in return for the Upper Palatinate. . . . The principal articles in regard to Italy and the Low Countries were the same with those settled at Utrecht. Relaxing in his obstinacy, the king of Spain also acceded to the general pacification."—W. Russell, *Hist. of Modern Europe, pt.* 2, *letter* 23 (*v.* 3).

VANDALS: Origin and early movements.—"Gibbon declares that a striking resemblance, in manners, complexion, religion, and language, indicates that the Goths and Vandals were originally one great people; and he cites the testimony of Pliny and Procopius in support of this belief. According to this theory, therefore, the Vandals are of the Teutonic stock. Other learned men have endeavoured to identify them with the Wendes; and the Wendes, as we have seen, according to the authority of Jornandes and others, were members of the Slavic race. The question has been examined, with great learning and ingenuity, by M. L. Marcus, Professor at the College of Dijon, in a work upon Vandal history. His conclusion, drawn from a comparison of what Tacitus, Pliny, Procopius, and Jornandes have left us upon the subject, is favourable to the hypothesis of Gibbon. Between the Wendes and the Vindili of Pliny, who were undoubtedly Vandals, he considers that no nearer point of union can be found than that of the Asiatic origin common to all nations of Slavic and Teutonic blood. He accounts for the fact that some confusion upon the subject subsists in ancient

writers, by the supposition that the Slaves, after the great migration of Goths and Vandals to the South, occupied the locality they had abandoned on the coasts of the Baltic, and became inheritors of the name, as well as of the land, of their predecessors. Hence they were commonly, though incorrectly, called Vindili, or Vandals. . . . The earliest locality of the tribe, so far as authentic history can trace them, seems to have been the district between the Vistula and the Elbe. Here they were found by the Langobardi, in their migration towards the South. . . . In the time of Pliny, we have that writer's testimony to the fact that the Vandals were still to be found between the two rivers. But during the next two centuries their unwarlike habits must have tended to diminish their importance among their fierce and active neighbours, of whom the Goths were the most formidable, and probably the most aggressive. Tacitus, at any rate, in his tractate upon the Germans [A. D. 100], merely notices them by name. . . . Another half-century finds them in a strong position among the mountains which form the northern frontier of Bohemia. It is certain that they took part in the great Marcomannic war [A. D. 168–180]. . . . In the treaty made by Commodus, the son of Marcus Aurelius, with the Marcomanni [A. D. 180], the Vandals are one of the tribes secured from the hostility of those persevering enemies of the Roman empire. At this time, Ptolemy informs us that the Vandals occupied the districts lying around the sources of the Elbe; and all other investigation confirms the statement." A hundred years later, the Vandals appear to have been planted in a district on the Danube, east of the Theiss; from which they were soon afterwards driven by the Goths. They were then permitted by the emperor Constantine to pass the frontiers of the empire and settle in Pannonia, where they accepted Christianity and exhibited "the greatest aptitude for commerce and the arts of peace." Despite their Christianity, however, and despite their aptitude for the "arts of peace," the Vandals, after seventy years of friendly neighboring with the Romans, joined the savage pack of Alans, Sueves and Burgundians which, on the last day of the year 406, broke into Gaul and shattered the empire and the civilization of Rome beyond the Alps.—J. G. Sheppard, *The Fall of Rome, lect.* 7.

Also in: T. Hodgkin, *Italy and her Invaders, bk.* 3, *ch.* 2 (*v.* 2).

A. D. 428.—Conquests in Spain.—"After the retreat of the Goths [A. D. 418] the authority of Honorius had obtained a precarious establishment in Spain, except only in the province of Gallicia, where the Suevi and the Vandals had fortified their camps in mutual discord and hostile independence. The Vandals prevailed, and their adversaries were besieged in the Nervasian hills, between Leon and Oviedo, till the approach of Count Asterius compelled, or rather provoked, the victorious barbarians to remove the scene of war to the plains of Bætica. The rapid progress of the Vandals soon required a more effectual opposition, and the master-general Castinus marched against them with a numerous army of Romans and Goths. Vanquished in battle by an inferior enemy, Castinus fled with dishonour to Tarragona. . . . Seville and Carthagena became the reward, or rather the prey, of the ferocious conquerors."—E. Gibbon, *Decline and Fall of the Roman Empire, ch.* 33.—Southern Spain, the ancient Bætica, acquired from the Vandals the name Vandalusia, which became Andalusia.—R. G. Latham, *Ethnology of Europe, ch.* 2.

A. D. 429-439.—Conquests in Africa.—In May, A. D. 429, the Vandals passed from Spain into Africa, invited by Count Boniface, the Roman governor of the African province. The latter had been deceived by an intriguing rival, Count Aetius, who persuaded him that the imperial Court at Ravenna were planning his disgrace and death. Thus incited to rebellion, as an act of self defense, he called the Vandals to his help. The latter had just fallen under the leadership of a new and terrible king — the bold and ruthless Genseric, who was destined to make the name of his people a proverb through all time for ferocity and barbarism. To the Vandals were united the Alans, and Genseric invaded Africa with some 80,000 men. He was joined, moreover, by great numbers of disaffected native Mauritanians, or Moors, and was welcomed by swarms of the fanatical Donatists, whose "vandalism" could quite equal his own. Count Boniface shrank aghast from the terrible invasion he had summoned, and learning, too late, how foully he had been played upon, returned to his allegiance with penitent energy and zeal. He turned his arms against Genseric; but it was in vain. "The victorious barbarians insulted the open country; and Carthage, Cirta, and Hippo Regius were the only cities that appeared to rise above the general inundation. . . . The seven fruitful provinces, from Tangier to Tripoli, were overwhelmed. . . . The Vandals, where they found resistance, seldom gave quarter; and the deaths of their valiant countrymen were expiated by the ruin of the cities under whose walls they had fallen. Careless of the distinctions of age or sex or rank, they employed every species of indignity and torture to force from the captives a discovery of their hidden wealth." Defeated in a battle which he ventured, Boniface retired into Hippo Regius and stood a siege of fourteen months. A second battle, won by the Vandals, decided the fate of the city, but its inhabitants escaped, for the most part, by sea, before the barbarians broke in. The great Bishop of Hippo, the venerable St. Augustine, was in the city when the siege began, but died before it ended, in his seventy-sixth year. "When the city, some months after his death, was burned by the Vandals, the library was fortunately saved which contained his voluminous writings." Hippo fell in the summer of A. D. 431. It was not until eight years later that Carthage succumbed,—taken treacherously, by surprise, on the 9th of October, 439; being 585 years after the destruction of the ancient city by the younger Scipio. The provinces of Africa were now fully in the possession of the Vandals, and the loss of their corn supply carried famine to Rome and Italy.—E. Gibbon, *Decline and Fall of the Roman Empire, ch.* 33.

Also in: J. C. L. de Sismondi, *Fall of the Roman Empire, ch.* 7.—T. Hodgkin, *Italy and Her Invaders, bk.* 3, *ch.* 2.

A. D. 429-477.—In Sicily. See Sicily: A. D. 429–525.

A. D. 431-533.—Ruin of Africa under their dominion.—"The Vandals were bigoted Arians and their government was peculiarly tyrannical; they always treated the Roman inhabitants of Africa as political enemies, and persecuted them as religious opponents. The Visigoths in Spain had occupied two thirds of the subjugated lands, the Ostrogoths in Italy had been satisfied with one third; and both these people had acknowledged the civil rights of the Romans as citizens and Christians. The Vandals adopted a different policy. Genseric reserved immense domains to himself and to his sons. He divided the densely peopled and rich districts of Africa proper among the Vandal warriors, exempting them from taxation and binding them to military service. . . . They seized all the richest lands, and the most valuable estates, and exterminated the higher class of the Romans. Only the poorer proprietors were permitted to preserve the arid and distant parts of the country. Still, the number of the Romans excited the fears of the Vandals, who destroyed the walls of the provincial towns in order to prevent the people from receiving succours from the Eastern Empire. . . . When Genseric conquered Carthage, his whole army amounted only to 50,000 warriors; yet this small horde devoured all the wealth of Africa in the course of a single century, and, from an army of hardy soldiers, it was converted into a caste of luxurious nobles living in splendid villas round Carthage. In order fully to understand the influence of the Vandals on the state of the country which they occupied, it must be observed that their oppressive government had already so far lowered the condition and reduced the numbers of the Roman provincials, that the native Moors began to reoccupy the country from which Roman industry and Roman capital had excluded them. . . . As the property of the province was destroyed, its Roman inhabitants perished."—G. Finlay, *Greece Under the Romans, ch. 3, sect. 5.*

A. D. 455.—The sack of Rome by Genseric. See Rome: A. D. 455

A. D. 533-534.—End of the kingdom and nation.—The weakened and disordered state of the Vandal kingdom, concurring with the revival of a military spirit in the eastern Roman empire, which the great soldier Belisarius had brought about, encouraged the Emperor Justinian to attempt, A. D. 533, a reconquest of the lost Roman provinces in Africa. With a fleet of six hundred ships, bearing 37,000 men, Belisarius set sail from Constantinople in the month of June and landed early in September on the African coast, about five days journey from Carthage,—having halted at a port in Sicily on the voyage. A few days later, he defeated the Vandal king, Gelimer, in a battle (Ad Decimus) fought at ten miles distance from his capital, and entered Carthage in triumph (September 15, A. D. 533), received with joy by its Roman and Catholic inhabitants, long persecuted and humiliated by the Arian Vandals. A second and decisive battle was fought some weeks afterwards at Tricamaron, twenty miles away from Carthage, and there and then the Vandal kingdom came to its end. Gelimer fled into the wilds of Numidia, was pursued, and, having surrendered himself in the March following, was sent to Constantinople, and passed the remainder of his days in peace and modest luxury on a comfortable estate in Galatia. "The fall of the Vandal monarchy was an event full of meaning for the future history of Africa. There can be little doubt that in destroying it Justinian was unconsciously removing the most powerful barrier which might in the next century have arrested the progress of Mohammedanism."—T. Hodgkin, *Italy and Her Invaders, bk. 4, ch. 15 (v. 3).*—"The bravest of the Vandal youth were distributed into five squadrons of cavalry, which adopted the name of their benefactor. . . . But these rare exceptions, the reward of birth or valour, are insufficient to explain the fate of a nation whose numbers, before a short and bloodless war, amounted to more than 600,000 persons. After the exile of their king and nobles, the servile crowd might purchase their safety by abjuring their character, religion, and language; and their degenerate posterity would be insensibly mingled with the common herd of African subjects. Yet even in the present age, and in the heart of the Moorish tribes, a curious traveller has discovered the white complexion and long flaxen hair of a northern race; and it was formerly believed that the boldest of the Vandals fled beyond the power, or even the knowledge, of the Romans, to enjoy their solitary freedom on the shores of the Atlantic ocean."—E. Gibbon, *Decline and Fall of the Roman Empire, ch. 41.*

VARANGIAN SEA.—One of the ancient names of the Baltic.—R. G. Latham, *Native Races of Russian Empire, ch. 16.*

VARANGIANS, OR WARINGS.—THE WARING GUARD.—Varangians "was the name of the Byzantine equivalent to the 'soldiers of a free-company' in the 11th and 12th centuries. The soldiers were almost wholly Scandinavians—to a great extent the Swedes of Russia. The reasons against believing Varangian to be the same word as Frank, are: 1. The mention of Franci along with them, as a separate people. 2. The extent to which the Varangians were Scandinavians, rather than Germans of the Rhine. In favour of it is: The form of the present Oriental name for Europeans—Feringi. This, in my mind, preponderates. Connected by name only with the Franks, the truer ethnological affinities of the Varangians

were with the Scandinavians of Russia."—R. G. Latham, *The Germania of Tacitus, Epilegomena, sect.* 17.—"Many of the Warings and probably of the English also had taken military service at an early period under the Byzantine emperors. They formed a body-guard for the Emperor, and soon gained for themselves a renown greater than that possessed by the earlier imperial guard of the Immortals. The Byzantine writers usually speak of them as the barbarian guard or as the axe-bearers. Their weapon was the Danish battle-axe, or rather bill, and seems not to have had two blades turning different ways like those of a halberd, but to have had one with a sharp steel spike projecting, so that the weapon could be used either to strike or to thrust. Anna, the daughter of Alexis the First, calls them Warings or Varangians. Nicetas speaks of them as Germans. The Western writers call them usually Danes, or 'English and Danes.' The conquest of England by William the Norman caused many of the English to emigrate to Russia and so to Constantinople, where they joined the Waring guard. . . . Warings and English, while occupants of the Greek palace, still spoke their own language, had their own laws, and chose, with certain exceptions, their own officers. The one in command was called the acolyth, or follower, because his place was immediately behind the Emperor."—E. Pears, *The Fall of Constantinople, ch.* 6, *sect.* 3.

VATICAN, THE.—THE LEONINE CITY.—"The name Vatican was applied by the writers of the Augustan age to the whole range of hills extending along the western bank of the Tiber, including the Janiculum and the Monte Mario. . . . But the name Vaticanus has now been restricted to the small hill standing behind the Basilica of St. Peter's, upon which the Vatican Museum and the Papal Gardens are situated. This hill is a small projecting portion of the range which includes the Janiculum and Monte Mario, and it is separated from the Janiculum by a depression, along which the street of the Borgo S. Spirito runs. The derivation of the name Vatican is lost. Gellius has preserved a quotation from Varro, in which the word is said to be derived from a deity Vaticanus, the presiding god of the first rudiments of speech ('vagire,' 'vagitanus'). Paulus Diaconus gives a different explanation, founded on the supposed expulsion of the Etruscans in fulfilment of an oracle ('vatum responso expulsis Etruscis'); and from this Niebuhr and Bunsen, following him, have supposed that an Etruscan city existed here in ancient times. There appears to be no sufficient evidence of such a settlement."—R. Burn, *Rome and the Campagna, ch.* 11.—In the ninth century, at the time of the pontificate of Leo IV., "the nations of the West and North who visited the threshold of the apostles had gradually formed the large and populous suburb of the Vatican, and their various habitations were distinguished, in the language of the times, as the 'schools' of the Greeks and Goths, of the Lombards and Saxons. But this venerable spot was still open to sacrilegious insult: the design of enclosing it with walls and towers exhausted all that authority could command or charity would supply: and the pious labour of four years was animated in every season and at every hour by the presence of the indefatigable pontiff. The love of fame, a generous but worldly passion, may be detected in the name of the Leonine City, which he bestowed on the Vatican; yet the pride of the dedication was tempered with Christian penance and humility."—E. Gibbon, *Decline and Fall of the Roman Empire, ch.* 52.

VECTIGAL, THE.—VECTIGALIA.—"Pascua—Vectigalia—Publicum—are the terms employed to denote generally the Revenues of Rome, from whatever source derived. Pascua, i. e. Pasture lands, signified Revenue; because, in the earliest ages, the public income was derived solely from the rent of pastures belonging to the state. . . . Vectigal is the word used more frequently than any other to denote the Revenue of the state generally. . . . Publicum, in its widest acceptation, comprehended every thing which belonged to the community at large."—W Ramsay, *Manual of Roman Antiq., ch.* 8.—"Cicero states that there was a difference between Sicily and all the other Roman provinces in the management of the Vectigal, which is the name for the contribution which the provinces made to the Roman State. All the provinces except Sicily paid either a fixed land-tax (vectigal stipendiarium) or tenths [decumæ] or other quotæ of their produce, and these tenths were let at Rome by the censors to the Publicani, who paid the State a certain sum for the privilege of collecting the tenths and made out of them what profit they could. . . . The tenths of wheat and barley were let in Sicily to the Publicani, but sometimes a community would bid for its tenths and pay them itself."—G. Long, *Decline of the Roman Republic, v.* 3, *ch.* 4.

VEHMGERICHTS.—VEHMIC COURTS.—"In times when political, social, and legal life are in process of fermentation, and struggling towards a new order of things, the ordinary tribunals lose their authority, and from the body of the people men spring up to protect the right in a primitive fashion, and to punish the criminal who has escaped the ordinary penalties of the law. Thus, at the close of the Middle Ages, or, more precisely, the first half of the 15th century, the Vehmgerichts (or Vehmic Courts, also called Free Courts, Franchise Courts, Secret Courts) rose to an authority which extended all over Germany, which knew no respect of persons, and before which many evil-doers in high places, who had bade defiance to the ordinary tribunals, were made to tremble. The name 'Vehme' is derived from the old German 'vervehmen,' which means to ban, or to curse. The Vehmic courts were peculiar to Westphalia, and even there could only be held on the 'Red Land' —that is, the district between the Rhine and the Weser. They were dependent on the German Emperor alone, and their presidents, the Free-counts, received from the Emperor in person, or from his representative, the Elector of Cologne, the power of life and death. They traced their origin to Charlemagne, who, respecting the legal customs of the old heathen Saxons, introduced county courts among them after they had been converted to Christianity. For, even in the most ancient times, the Saxon freemen used to assemble at an appointed season, after they had held their great sacrifice, and hold a 'Thing' under the presidency of one of their oldest members, called the Grave, or Count, where they inflicted punishment and administered justice. The Vehmic court consisted of a Free-count and a number of assessors, who were called 'The Initiated,' because they knew the secrets of the holy Vehme. There must be at least fourteen of these assessors, but there were generally twice that number. As it was no secret when a man was an assessor, and as it contributed greatly to the safety of his person, since people took good care not to molest a member of the holy Vehme, it gradually came about that men from every German province obtained admission into the number of assessors. When the Emperor Sigismund was elected into the number of 'The Initiated' at the Franchise Court of Dortmund, the number of assessors is said to have amounted to 100,000, among whom were many princes and nobles. And about a thousand assessors are said to have been present when the ban was issued against Duke Henry of Bavaria in 1429. . . . There was a 'secret court' to which only the initiated had access, and a 'public court' which was held in the morning in the light of day at a known court-house. The presidents' chairs were always set in the open air under a lime, oak, pear, or hawthorn tree, and often near a town, castle, or village. At Dortmund the president's chair was placed close to the town wall under a lime-tree, which, though sadly shattered, is still standing between the rails inside the railway station. Round the stone table were ranged three stone benches for the assessors; on the table there was carved in relief the German imperial eagle, and on it was placed the sword of justice. . . . The Vehmic court which was originally, and was bound to be, a public one, gradually altered its character, enveloped itself in mysterious darkness, and under the cloak of secrecy lent itself to all sorts of unrighteous objects. In 1461, accordingly, princes and cities leagued together to suppress the irregularities of these courts, and as soon as the orderly administration of justice came into existence with the rise of the new princely authority, they perished from their own impotence."—A. W. Grube, *Heroes of History and Legend, ch.* 13.

VENEDI, The.—"The Venedi extended beyond the Peucini and Bastarnæ [around the mouths of the Danube] as far as the Baltic Sea; where is the Sinus Venedicus, now the Gulf of Dantzig. Their name is also preserved in Wenden, a part of Livonia. When the German nations made their irruption into Italy, France, and Spain, the Venedi, also called Winedi, occupied their vacant settlements between the Vistula and Elbe. Afterward they crossed the Danube, and seized Dalmatia, Illyricum, Istria, Carniola, and the Noric Alps. A part of Carniola still retains the name of Windismarck derived from them. This people were also called Slavi."— Tacitus, *The Germans, note to Oxford Translation, ch.* 46.—"The Venedi [of Tacitus] . . . are obviously the Wends—the name by which the Germans always designate the neighbouring Slavonian populations; but which is no more a national name than that of Wälsch, which

they apply in like manner to the Latin races on their southern frontiers."—E. H. Bunbury, *Hist. of Ancient Geography, ch.* 26, *sect.* 2, *foot-note* (*v.* 2).—See, also, Slavonic Peoples; and Vandals.

VENETI OF CISALPINE GAUL, The. —One of the tribes or nations of Cisalpine Gaul bore the name of the Veneti. The Veneti occupied the country between the rivers Adige and Plavis and seem to have been considerably civilized when they first appear in history. They became allies of the Romans at an early day and were favorably dealt with when Gallia Cisalpina was added to the dominions of Rome. "No ancient writer distinctly states to what race the Veneti belonged. They are said to have resembled the Illyrians in dress and manners; but the very way in which this statement is made shows that its author did not regard them as Illyrians. . . . I have no doubt that the Veneti belonged to the race of the Liburnians, and that accordingly they were a branch of the widespread Tyrrheno-Pelasgians, in consequence of which they also became so easily Latinized." The capital city of the Veneti was Patavium (modern Padua). "Patavium was a very ancient and large town, and it is strange that it appears as such in Roman history all at once. It is mentioned as early as the fifth century [B. C.], during the expedition of the Spartan Cleonymus; it is also spoken of at the time of Caesar and of the triumvirs. But Strabo is the first who describes Patavium as a large town, and in such a manner as to make it evident that it was an ancient place. He says that, next to Rome, it was the wealthiest city of Italy. . . . In the time of Augustus it was a large commercial and manufacturing place."—B. G. Niebuhr, *Lects. on Ancient Ethnog. and Geog., v.* 2, *p.* 246.

VENETI OF WESTERN GAUL, The. —"The Veneti were one of the Armoric states of the Celtae. Their neighbours on the south were the Namnetes or Nannetes (Nantes), on the east the Redones, and on the north the Curiosolitae, and the Osismi in the north-west part of Bretagne, in the department of Finistère. The chief town of the Veneti was Dariorigum, now Vannes, on the bay of Morbihan in the French department of Morbihan, which may correspond nearly to the country of the Veneti. The Veneti were the most powerful of all the maritime peoples who occupied the peninsula of Bretagne. They had many vessels in which they sailed to the island Britannia, to Cornwall and the parts along the south coast of England, as we may assume. They surpassed all their neighbours in skill and experience in naval affairs."—G. Long, *Decline of the Roman Republic, v.* 4, *ch.* 6.—The Veneti, "together with the Aulerci, Rhedones [or Redones], Carnutes, Andi and Turones, occupied the whole space between the lower Seine and the lower Loire, and were apparently closely united among themselves."—C. Merivale, *Hist. of the Romans, ch.* 7.—"The Andes [Andi] are the people whom Tacitus names the Andecavi, and the copyists of Ptolemy have named Ondicavae. They were west of the Turones, and their position is defined by the town Juliomagus or Civitas Andecavorum, now Angers on the Mayenne."—G. Long, *Decline of the Roman Republic, v.* 4, *ch.* 6.—"In my opinion these Veneti were the founders of the Veneti in the Adriatic, for almost all the other Keltic nations in Italy have passed over from the country beyond the Alps, as for instance the Boii and Senones. . . . However, I do not maintain my opinion positively; for in these matters probability is quite sufficient."—Strabo, *Geography; tr. by Hamilton and Falconer, bk.* 4, *ch.* 4, *sect.* 1.

Cæsar's campaign.—Cæsar's third campaign in Gaul, B. C. 56, was directed against the Veneti and their Armorican neighbors. These tribes had submitted themselves in the previous year to Cæsar's lieutenant, the younger Crassus; but the heavy exactions of the Romans provoked a general rising, and Cæsar was called to the scene in person. The Veneti were so amphibious a race, and their towns were generally placed so much out of the reach of a land army, that he found it necessary to build a fleet at the mouth of the Loire and bring it up against them. But the Veneti were better sailors than the Romans and their ships were more strongly built, so that the advantage would have still remained to them if Roman inventiveness had not turned the scale. Cæsar armed his men with hooked knives at the end of long poles, with which they cut the rigging of the Venetian ships and brought down their clumsy sails, which were of leather. By this means he overcame and destroyed them, in a great naval fight. When the survivors submitted, he ruthlessly slew the senatorial elders and sold the remnant of the people into slavery.—Cæsar, *Gallic Wars, bk.* 3, *ch.* 7–16.

VENEZUELA: Aboriginal inhabitants. See American Aborigines: Caribs and their Kindred, and Coajiro.

A. D. 1499-1550.—Discovery and naming of the province.—Its first occupation by German adventurers. —"The province contiguous to Santa Martha on the east was first visited by Alonso de Ojeda, in the year 1499 [see America: A. D. 1499–1500]; and the Spaniards, on their landing there, having observed some huts in an Indian village, built upon piles, in order to raise them above the stagnated water which covered the plain, were led to bestow upon it the name of Venezuela, or little Venice. . . . They made some attempts to settle there, but with little success. The final reduction of the province was accomplished by means very different from those to which Spain was indebted for its other acquisitions in the new world. The ambition of Charles V. often engaged him in operations of such variety and extent that his revenues were not sufficient to defray the expense of carrying them into execution. Among other expedients for supplying the deficiency of his funds, he had borrowed large sums from the Velsers of Augsburg, the most opulent merchants at that time in Europe. By way of retribution for these, or in hopes, perhaps, of obtaining a new loan, he bestowed upon them the province of Venezuela, to be held

as an hereditary fief from the crown of Castile, on condition that within a limited time they should render themselves masters of the country, and establish a colony there. . . . Unfortunately they committed the execution of their plan to some of those soldiers of fortune with which Germany abounded in the 16th century. These adventurers, impatient to amass riches, that they might speedily abandon a station which they soon discovered to be very uncomfortable, instead of planting a colony in order to cultivate and improve the country, wandered from district to district in search of mines, plundering the natives with unfeeling rapacity, or oppressing them by the imposition of intolerable tasks. In the course of a few years, their avarice and exactions, in comparison with which those of the Spaniards were moderate, desolated the province so completely that it could hardly afford them subsistence, and the Velsers relinquished a property from which the inconsiderate conduct of their agents left them no hope of ever deriving any advantage. When the wretched remainder of the Germans deserted Venezuela, the Spaniards again took possession of it."—W. Robertson, *Hist. of America, bk.* 7.

A. D. 1829-1886.—Summary record of revolutions and civil wars.—The strife of the Yellows and the Blues.—"In all countries, under whatever name they may be known, there are two great political parties; the conservatives and the reformers. . . . Venezuela is no exception to the general rule; there is the 'Oligarquia,' which desires to let things alone, and the 'Liberal' party, which wishes to remould them in accordance with the spirit of the age. The Spanish misgovernment left a legacy of bitterness and anarchy that has been the cause of much misery. Political passion runs very high in the country, and its history for a generation between these two parties has been a continual struggle, always more or less warlike. The existence of Venezuela in an independent capacity is due, in a large measure, to the personal ambition of Paez, by whose influence the great Liberator was exiled from his fatherland, and the republic separated from Colombia. Whatever may have been the real wishes of the people, the death of Bolivar put an end to all thoughts of re-union; and Paez became its first constitutional president. The second president was the learned Dr. José Maria Vargas, whose election in March 1835 was said to have been irregular, and led to the 'Revolucion de las Reformas.' He was deposed and expelled in July, but in August recalled to power! General Paez now took the field against the 'reformistas,' and a civil war ensued, continuing until March 1836, when they were completely subjugated, and treated with great rigour by order of the Congress, but against the desire of Paez, who entreated to be allowed to deal with them clemently. In 1836, Dr. Vargas resigned the presidency, and after the remainder of his term had been occupied by three vice-presidents, General Paez, in 1839, became again the legitimate head of the nation. Now that the grave had closed over Simon Bolivar, the passions which had prevented the recognition of his greatness died also, and on the 17th of December 1842, the ashes of the immortal Liberator were transferred from Santa Maria with every mark of public respect and honour and received a magnificent national funeral, in the Temple of San Francisco, in Caracas. The fifth president was General Soublette, and the sixth General José Tadeo Monagas, who was elected in 1847. A great part of the Venezuelan people believe that all the evils that have fallen upon the republic since 1846 have had their origin in the falsification of votes, said to have taken place during the election of Monagas for president. The liberal candidate was Antonio Leocadio Guzman; and it is asserted that he had a majority of votes. . . . Monagas did not have an easy tenure of office, for the opposition of Paez led to two years of civil war. Here it may be noted to the credit of the liberal party that, at a time when many of its opponents were prisoners, it abolished the penalty of death for political offences. To his brother, General José Gregorio Monagas, afterwards president of the republic, was due the emancipation of the slaves. The famous law of March 24th, 1854, conceded liberty and equal rights to all; but by a strange irony of fortune, he who had given the precious boon of freedom to thousands died himself incarcerated in a political prison. . . . At the beginning of 1859 the discontent of the liberals had reached a pitch which led to the outbreak of the War of the Federation. It was in this struggle that the present leader of the liberal party first displayed his military skill." Antonio Guzman Blanco, born in 1830 and educated for the law, lived some years in the United States, part of the time as Secretary of Legation at Washington. Driven from Venezuela in 1858, "his expatriation soon after brought him in contact, first in St. Thomas and afterwards in Curazao, with General Falcon, then the head of 'los liberales.' Falcon landed in Venezuela in July 1859, and proclaimed the Federal Republic. Many rose to support him, and in Caracas, on the 1st of August, the president, Monagas, was arrested; the next day the same troops declared against the Federation, and fired upon the people! So commenced the five years' War of the Federation, which has left, even to the present day, its black and ruined tracks across the face of the country. On the 30th of September was fought the battle of Sabana de la Cruz, resulting in the fall of Barquisimeto. In this action, so fortunate for the liberals, Guzman Blanco made his acquaintance with war, and showed so much military talent and energy that he was induced to leave his civil duties and take a 'comandante's' commission. The victory of Santa Ines, in December of the same year, followed. . . . The attack on San Carlos followed soon after, and was a disaster for the federals, who lost their general, Zamora, and were forced to retreat. Falcon sought aid in Nueva Gran-

ada." The next year Guzman Blanco won the victory of Quebrada-seca, October 21, 1862. "Other victories followed, and were crowned by the grand and decisive combat of the 16th, 17th, and 18th of April, which gave the province of Caracas to the Federals, and led to a treaty between the two parties. The peace of Coche was arranged by Señor Pedro José Rojas, secretary to the Dictator, as Paez was sometimes called, and Guzman Blanco, as representative of Falcon, the chief of the revolution. Paez, by this treaty, undertook to abdicate 30 days later, when an assembly of 80, nominated in equal parts by the chiefs of each party, was to decide on a programme for the future. The assembly met in Victoria, and nominated Falcon President and Guzman Blanco provisional vice-president of the Federation. Falcon entered Caracas in triumph on July 24, 1863, and Guzman Blanco became Minister of Finance and of Foreign Relations." Guzman Blanco visited Europe in 1864 and 1867 to negotiate loans. "Meanwhile, in Caracas, the 'oligarquia,' which now assumed the name of the Blue party (El Partido Azul), was not idle, and its activity was increased by dissensions in the opposition. A section of the liberal party [or 'los amarillos'—'Yellows'] had become greatly disaffected to Marshal Falcon, who abdicated in favour of two revolutionary chiefs, Bruzual and Urrutia. This led to the treaty of Antimano, by which the 'partido azul' recognized the new government, but directly afterwards proclaimed the presidency of General José Tadeo Monagas. Three days' sanguinary combat, at the end of July 1868, gave it possession of Caracas." Guzman Blanco, returning at this juncture from Europe, was driven to take refuge in the island of Curazao; but in February, 1870, he reappeared in Venezuela; was supported by a general rising; took Caracas by assault, and defeated the Blues in several battles. "The congress of plenipotentiaries of the states met at Valencia, and nominated Guzman Blanco provisional president, and by the end of the year the enemy was nearly everywhere defeated."—J. M. Spence, *The Land of Bolivar, v.* 1, *ch.* 8.—From the liberation of Venezuela to the present time, "every successive President seems to have been employed, during his short lease of power, in trying to enrich himself and his adherents, without the least consideration for his unfortunate country. On paper all the laws are perfect, and the constitution all that could be desired, but experience has shown that the influence of the executive power is able to subdue and absorb every other power, legislative or judicial. One law which the Congress passed, viz :—that of division of the National property among the defenders of the country, as the only way of rewarding their heroic services, has become a precedent of very bad import. At first, those who had risen and driven out the Spaniards divided the land among themselves, but as successive Generals strove for and gained the Presidency they again forfeited the property of the opposing party, and divided their possessions among their own followers. . . . Paez, Vargas, Paez, Zea, Soublette, Paez, Gil, Monagas, Falcon, Monagas, Polidor, Pulgar, Blanco, Linares, Blanco, Crespo, and again Blanco, have succeeded each other with marvellous rapidity, the principal occupation of the deposed President being to conspire against his successor. Some of them succeeded to power more than once, but Don Gusman Blanco alone, since Bolivar, seems to have got a firm hold of the Government, and although, by the letter of the Constitution, he can only hold power for two years at a time, and cannot possibly hold two terms consecutively, yet the intervening Presidents were little more than dummies to keep his seat warm. . . . At present [1886] Don Gusman Blanco is supreme. He is reported to be immensely wealthy, and is a man of great capacity and intelligence."—W. Barry, *Venezuela, ch.* 5.

A. D. 1869-1892.—The constitution.—The rule of General Blanco.—The Revolution of 1889.—"The Venezuelan Constitution is modelled after the American Constitution, with modifications grounded upon the Calhoun doctrine of State rights [see CONSTITUTION OF VENEZUELA]. The confederation consists of eight States, which are supreme and coördinate in their sovereign rights. The National Government represents, not the people, but the States. . . . In 1869 opened an era of peace and progress under the political domination of General Guzman Blanco. For 20 years, whether he was the head of a Provisional Government established by force of arms, or the constitutional Executive, or Minister to France, his will was the supreme force in the State. . . . He suppressed Clericalism and established genuine religious liberty. He built rail-ways, improved the public roads, and adorned the cities. . . . He developed the industries and commerce of the country, and promoted its prosperity by a policy at once strong and pacific. It was a system of political absolutism. . . . A reaction against it was inevitable. . . . The signal for a political revolution was raised by university students in October, 1889. They began operations by flinging stones at a statue of Guzman Blanco in Carácas. . . . It was a singularly effective revolution, wrought without bloodshed or excitement. This political movement was successful because Guzman Blanco was in Paris, and his personal representative in the executive office was not disposed to resent public affronts to his patron. The President, Dr. Rojas Paul, was a wise and discreet man. . . . He reörganized his Cabinet so as to exclude several of the devoted partisans of Guzman Blanco, and brought Dr. Anduesa Palacio into the field as a candidate for the Presidency. . . . Anduesa's administration, instead of being an era of reform, reproduced all the vices and corruption of the old order, and none of its progressive virtues. After two years it ended in civil war, usurpation, and the enforced resignation of Anduesa."—I. N. Ford, *Tropical America, ch.* 12.

A. D. 1892-1893.—Constitutional Government restored.—Anduesa Palacio resigned in favor of Vice President Villegas, and the legality of the succession was disputed by the opposition, under ex-President Joaquin Crespo. The civil war continued, and three short-lived dictatorships were set up in succession; but in June, 1893, a new constitution was adopted. Crespo was elected President for a term of four years.

VENICE.

A. D. 452.—The origin of the republic.—When Attila the Hun, in the year 452, crossed the Alps and invaded Italy, "the savage destroyer undesignedly laid the foundations of a republic which revived, in the feudal state of Europe, the art and spirit of commercial industry. The celebrated name of Venice, or Venetia, was formerly diffused over a large and fertile province of Italy, from the confines of Pannonia to the river Addua, and from the Po to the Rhætian and Julian Alps. Before the irruption of the barbarians, fifty Venetian cities flourished in peace and prosperity. . . . Many families of Aquileia, Padua, and the adjacent towns, who fled from the sword of the Huns, found a safe though obscure refuge in the neighbouring islands. At the extremity of the Gulf, where the Adriatic feebly imitates the tides of the ocean, near a hundred small islands are separated by shallow water from the continent, and protected from the waves by several long slips of land, which admit the entrance of vessels through some secret and narrow channels. Till the middle of the 5th century these remote and sequestered spots remained without cultivation, with few inhabitants, and almost without a name. But the manners of the Venetian fugitives, their arts and their government, were gradually formed by their new situation; and one of the epistles of Cassiodorus, which describes their condition about seventy years afterwards, may be considered as the primitive monument of the republic. . . . Fish was the common, and almost the universal, food of every rank: their only treasure consisted in the plenty of salt which they extracted from the sea."—E. Gibbon, *Decline and Fall of the Roman Empire, ch.* 35.—"The inhabitants of Aquileia, or at least the feeble remnant that escaped the sword of Attila, took refuge at Grado. Concordia migrated to Caprularia (now Caorle). The inhabitants of Altinum, abandoning their ruined villas, founded their new habitations upon seven islands at the mouth of the Piave, which, according to tradition, they named from the seven gates of their old city. . . . From Padua came the largest stream of emigrants. They left the tomb of their mythical ancestor, Antenor, and built their humble dwellings upon the islands of Rivus Altus and Methamaucus, better known to us as Rialto and Malamocco. This Paduan settlement was one day to be known to the world by the name of Venice. But let us not suppose that the future Queen of the Adriatic sprang into existence at a single bound like Constantinople or Alexandria. For 250 years, that is to say for eight generations, the refugees on the islands of the Adriatic prolonged an obscure and squalid existence,—fishing, salt-manufacturing, damming out the waves with wattled vine-branches, driving piles into the sand-banks; and thus gradually extending the area of their villages. Still these were but fishing villages, loosely confederated together, loosely governed, poor and insignificant. . . . This seems to have been their condition, though perhaps gradually growing in commercial importance, until at the beginning of the 8th century the concentration of political authority in the hands of the first doge, and the recognition of the Rialto cluster of islands as the capital of the confederacy, started the Republic on a career of success and victory."—T. Hodgkin, *Italy and Her Invaders, bk.* 2, *ch.* 4 (*v.* 2).

A. D. 554-800.—A dukedom under the Exarchs of Ravenna. See Rome: A. D. 554–800.

A. D. 568.—A refuge from the invading Lombards. See Lombards: A. D. 568–573.

A. D. 697-810.—The early constitution of government.—Origin of the Doges.—Resistance to Pippin, king of the Lombards.—Removal to the Rialto and founding of the new capital city.—"Each island had at first its own magistrate: the magistrates of the most considerable being called Tribunes Major, the others, Tribunes Minor, and the whole being equally subject to the council-general of the community; which thus constituted a kind of federal republic. This lasted nearly three hundred years, when it was found that the rising nation had fairly outgrown its institutions. Dangerous rivalries arose among the tribunes. . . . At a meeting of the Council-General in A. D. 697, the Patriarch of Grado proposed the concentration of power in the hands of a single chief, under the title of Doge or Duke. The proposition was eagerly accepted, and they proceeded at once to the election of this chief. 'It will be seen (remarks Daru) that the Dogeship saved independence and compromised liberty. It was a veritable revolution, but we are ignorant by what circumstances it was brought about. Many historians assert that the change was not effected till the permission of the Pope and the Emperor was obtained.' The first choice fell on Paolo Luca Anabesto. It was made by twelve electors, the founders of what were thenceforth termed the electoral families. The Doge was appointed for life: he named his own counsellors: took charge of all public business; had the rank of prince, and decided all questions of peace and war. The peculiar title was meant to imply a limited sovereignty, and the Venetians uniformly repudiated, as a disgrace, the bare notion of their having ever submitted to a monarch. But many centuries passed away before any regular or well-defined limits were practically imposed; and the prolonged struggle between the people and the Doges, depending mainly on the personal character of the Doge for the time being, constitutes the most startling and exciting portion of their history." The third Doge, one Urso, alarmed the people by his pretensions to such a degree that they slew him, and suppressed his office for five years, substituting a chief magistrate called "maestro della milizia." "The Dogeship was then [742] restored in the person of Theodal Urso (son of the last Doge), who quitted Heraclea [then the Venetian capital] for Malamocco, which thus became the capital." In his turn, Theodal Urso lost the favor of the people and was deposed and blinded. "It thenceforth became the received custom in Venice to put out the eyes of deposed Doges." Later in the 8th century the Dogeship was secured by a family which went far towards making it hereditary, and rendering it boldly tyrannical; but the yoke of the would-be despots — Giovanni and Maurice, father and son — was broken in 804, and they were driven to flight. The head of the conspiracy which expelled them, Obelerio, was then proclaimed Doge. "The events of the next five

years are involved in obscurity. One thing is clear. Pepin, King of the Lombards [son of Charlemagne], either under the pretence of a request for aid from the new Doge, or to enforce some real or assumed rights of his own, declared war against the Republic, and waged it with such impetuosity that his fleet and army, after carrying all before them, were only separated from Malamocco, the capital, by a canal. In this emergency, Angelo Participazio, one of those men who are produced by great occasions to mark an era, proposed that the entire population should remove to Rialto, which was separated by a broader arm of the sea from the enemy, and there hold out to the last. No sooner proposed than done. They hastily embarked their all; and when Pepin entered Malamocco, he found it deserted. After losing a large part of his fleet in an ill-advised attack on Rialto, he gave up the enterprise, and Angelo Participazio was elected Doge in recognition of his services, with two tribunes for counsellors. One of his first acts was to make Rialto the capital, instead of Malamocco or Heraclea, which had each been the seat of Government at intervals. 'There were round Rialto some sixty islets, which the Doge connected by bridges. They were soon covered with houses. They were girt with a fortification; and it was then that this population of fugitives gave to this rising city, which they had just founded in the middle of a morass, the name of Venetia, in memory of the fair countries from which their fathers had been forcibly expatriated. The province has lost its name, and become subject to the new Venice.'"—*The Republic of Venice* (*Quarterly Review, Oct.*, 1874, *v.* 137), *pp.* 417–420. In 803 Charlemagne concluded a treaty, at Aix-la-Chapelle, with Nicephorus I. the Byzantine or Eastern Emperor, establishing boundaries between the two empires which disputed the Roman name. "In this treaty, the supremacy of the Eastern Empire over Venice, Istria, the maritime parts of Dalmatia, and the south of Italy, was acknowledged; while the authority of the Western Empire in Rome, the exarchate of Ravenna, and the Pentapolis, was recognised by Nicephorus. The commerce of Venice with the East was already so important, and the Byzantine administration afforded so many guarantees for the security of property, that the Venetians, in spite of the menaces of Charlemagne, remained firm in their allegiance to Nicephorus. . . . Venice, it is true, found itself in the end compelled to purchase peace with the Frank empire, by the payment of an annual tribute of thirty-six pounds of gold, in order to secure its commercial relations from interruption; and it was not released from this tribute until the time of Otho the Great. It was during the reign of Nicephorus that the site of the present city of Venice became the seat of the Venetian government, Rivalto (Rialto) becoming the residence of the duke and the principal inhabitants, who retired from the continent to escape the attacks of Pepin [king of Italy, under his father, Charlemagne]. Heraclea had previously been the capital of the Venetian municipality. In 810 peace was again concluded between Nicephorus and Charlemagne, without making any change in the frontier of the two empires."—G. Finlay, *Byzantine Empire*, 716–1057, *bk.* 1, *ch.* 2, *sect.* 1.

A. D. 810-961.—Spread of commerce and naval prowess.—Destruction of Istrian pirates.—Conquests in Dalmatia.—"During the ninth, and the first sixty years of the tenth centuries,—from the government of Angelo Participazio, to the coming into Italy of Otho the Great,—the Venetian affairs, with brief intervals of repose, were wholly occupied with civil commotions and naval wars. The doges of the republic were often murdered; its fleets were sometimes defeated; but, under every adverse circumstance, the commercial activity, the wealth, and the power of the state were still rapidly increasing. In the ninth century the Venetians, in concert with the Greeks, encountered, though with indifferent success, the navies of the Saracens; but the Narentines, and other pirates of Dalmatia, were their constant enemies, and were frequently chastised by the arms of the republic. The Venetian wealth invited attacks from all the freebooters of the seas, and an enterprise undertaken by some of them who had established themselves on the coast of Istria deserves, from its singularity and the vengeance of the republic, to be recorded in this place. According to an ancient custom, the nuptials of the nobles and principal citizens of Venice were always celebrated on the same day of the year and in the same church. . . . The Istrian pirates, acquainted with the existence of this annual festival, had the boldness [A. D. 944] to prepare an ambush for the nuptial train in the city itself. They secretly arrived over night at an uninhabited islet near the church of Olivolo, and lay hidden behind it with their barks until the procession had entered the church, when darting from their concealment they rushed into the sacred edifice through all its doors, tore the shrieking brides from the arms of their defenceless lovers, possessed themselves of the jewels which had been displayed in the festal pomp, and immediately put to sea with their fair captives and their booty. But a deadly revenge overtook them. The doge, Pietro Candiano III., had been present at the ceremony: he shared in the fury and indignation of the affianced youths: they flew to arms, and throwing themselves under his conduct into their vessels, came up with the spoilers in the lagunes of Caorlo. A frightful massacre ensued: not a life among the pirates was spared, and the victors returned in triumph with their brides to the church of Olivolo. A procession of the maidens of Venice revived for many centuries the recollection of this deliverance on the eve of the purification. But the doge was not satisfied with the punishment which he had inflicted on the Istriots. He entered vigorously upon the resolution of clearing the Adriatic of all the pirates who infested it: he conquered part of Dalmatia, and he transmitted to his successors, with the ducal crown, the duty of consummating his design."—G. Procter, *Hist. of Italy, ch.* 1, *pt.* 2.

A. D. 829.—The translation of the body of St. Mark.—The Winged Lion of St. Mark.—"In the second year of the reign of Doge Giustiniano Particiacio there was brought to Venice from Alexandria the body of the holy evangelist St. Mark. For, as Petrus Damianus says, Mark was brought from Alexandria into Venice, that he who had shone in the East like the morning

star might shed his rays in the regions of the West. For Egypt is held to be the East and Venice the West. There he had held the rule of the Church of Alexandria, and here, being, as it were, born again, he obtained the sovereignty of Aquileia. Now this is how the thing was done. The king of the Saracens wishing to build himself a palace in Babylon, gave command that stones should be taken from the Christian churches and other public places, that they might build him a splendid house. And at that time there came by chance to the Church of St. Mark, Bon, tribune of Malamocco, and Rustico da Torcello, who had been forced by the wind, contrary to the edicts of Venice, to put in to the harbour of Alexandria with ten ships laden with merchandise, and they observing the sadness of the guardians of the church (two Greeks, by name Stauratio, a monk, and Theodoro, a priest), inquired the cause. And they answered that by reason of the impious edict of the king they feared the ruin of the church. Thereupon they prayed them to give them the holy body that they might carry it to Venice, promising them that the Doge of Venice would receive it with great honour. But the keepers of the church were filled with fear at their petition, and answered reproaching them and saying: 'Know ye not how the blessed St. Mark, who wrote the Gospel, St. Peter dictating at his request, preached in these parts and baptised into the faith the men of these regions? If the faithful should become aware, we could not escape the peril of death.' But to that they answered: 'As for his preaching, we are his firstborn sons, for he first preached in the parts of Venetia and Aquileia. And in peril of death it is commanded, "If they persecute you in one city, flee ye to another," which the evangelist himself obeyed when in the persecution at Alexandria he fled to Pentapolis.' But the keepers said: 'There is no such persecution now that we should fear for our persons.' But while they spake, came one and broke down the precious stones of the church, and when they would not suffer it they were sorely beaten. Then the keepers seeing the devastation of the church, and their own great danger, listened to the prayer of the Venetians and appointed them a day when they should receive the holy body. Now the body was wrapped in a robe of silk sealed with many seals from the head to the feet. And they brought the body of St. Claudia, and having cut the robe at the back and taken away the body of St. Mark, they placed in its stead the blessed Claudia, leaving the seals unbroken. But a sweet odour quickly spread into the city, and all were filled with astonishment, and not doubting that the body of the evangelist had been moved, they ran together to the church. But when the shrine was opened and they saw the garment with the seals unbroken, they returned quickly to their homes. And when the body should be borne to the boats, they covered it with herbs and spread over it porkflesh for the passers-by to see, and went crying, 'Khanzir, khanzir!' which is the Saracen's abomination. And when they reached the ships they covered it with a sail while they passed through the Saracen ships. And as they sailed to Venice the ship which bore it with many others was saved from peril of shipwreck. For when the ships had been driven in the night by a tempestuous wind and were not far from Monte, the blessed St. Mark appeared to the Monk Dominic and bade him lower the sails of the ships. Which, when they had done, the dawn appearing, they found themselves close to the island which is called Artalia. And ten of them, having asked and obtained pardon for breaking the edicts of the Doge, they came to the port of Olivola. And the Doge, and the clergy, and the people came to meet them, and brought the body, with songs of thanksgiving, to the Doge's chapel."—*Old Chronicle; translated in "The City in the Sea," by the Author of "Belt and Spur," ch.* 3.—"Our fathers did not welcome the arrival of the captured eagles of France, after the field of Waterloo, with greater exultation than the people of Venice the relics of the blessed Evangelist. They abandoned themselves to processions, and prayers, and banquets, and public holidays. . . . The winged 'Lion of St. Mark' was blazoned on the standards, and impressed on the coinage of the Republic. . . . The Lion became the theme of many political symbols. Thus it was represented with wings to show that Venetians could strike with promptitude; sitting, as a sign of their gravity in counsel — for such is the usual attitude of sages; with a book in its paws, to intimate their devotion to commerce; in war time the book was closed, and a naked sword substituted."—W. H. D. Adams, *The Queen of the Adriatic, pp.* 42–43.— See, also, Lion of St. Mark.

A. D. 1032-1319.— Development of the constitution of the aristocratic Republic.— The Grand Council.— The Council of Ten.— The Golden Book.—"It was by slow and artfully disguised encroachments that the nobility of Venice succeeded in substituting itself for the civic power, and investing itself with the sovereignty of the republic. During the earlier period, the doge was an elective prince, the limit of whose power was vested in assemblies of the people. It was not till 1032 that he was obliged to consult only a council, formed from amongst the most illustrious citizens, whom he designated. Thence came the name given them of 'pregadi' (invited). The grand council was not formed till 1172, 140 years later, and was, from that time, the real sovereign of the republic. It was composed of 480 members, named annually on the last day of September, by 12 tribunes, or grand electors, of whom two were chosen by each of the six sections of the republic. No more than four members from one family could be named. The same counsellors might be re-elected each year. As it is in the spirit of a corporation to tend always towards an aristocracy, the same persons were habitually re-elected; and when they died their children took their places. The grand council, neither assuming to itself nor granting to the doge the judicial power, gave the first example of the creation of a body of judges, numerous, independent, and irremovable; such, nearly, as was afterwards the parliament of Paris. In 1179, it created the criminal 'quarantia'; called, also, the 'vecchia quarantia,' to distinguish it from two other bodies of forty judges, created in 1229. The grand council gave a more complete organization to the government formed from among its members. It was composed of a doge; of six counsellors of the red robe, who remained only eight months in office, and who, with the doge, formed the 'signoria';

and of the council of pregadi, composed of 60 members, renewed each year. . . . In 1249, the sovereign council renounced the election of the doge, and intrusted it to a commission drawn by lot from among the whole council; this commission named another: which, reduced by lot to one fourth, named a third; and by these alternate operations of lot and election, at length formed the last commission of 41 members, who could elect the doge only by a majority of 25 suffrages. It was not till towards the end of the 13th century that the people began to discover that they were no more than a cipher in the republic, and the doge no more than a servant of the grand council,—surrounded, indeed, with pomp, but without any real power. In 1289, the people attempted themselves to elect the doge; but the grand council obliged him whom the popular suffrages had designated to leave Venice, and substituted in his place Pietro Gradenigo, the chief of the aristocratic party. Gradenigo undertook to exclude the people from any part in the election of the grand council, as they were already debarred from any participation in the election of a doge. . . . The decree which he proposed and carried on the 28th of February, 1297, is famous in the history of Venice, under the name of 'serrata del maggior consiglio' (shutting of the grand council). He legally founded that hereditary aristocracy,—so prudent, so jealous, so ambitious,—which Europe regarded with astonishment; immovable in principle, unshaken in power; uniting some of the most odious practices of despotism with the name of liberty; suspicious and perfidious in politics; sanguinary in revenge; indulgent to the subject; sumptuous in the public service, economical in the administration of the finances; equitable and impartial in the administration of justice; knowing well how to give prosperity to the arts, agriculture, and commerce; beloved by the people who obeyed it, whilst it made the nobles who partook its power tremble. The Venetian aristocracy completed its constitution, in 1311, by the creation of the Council of Ten, which, notwithstanding its name, was composed of 16 members and the doge. Ten counsellors of the black robe were annually elected by the great council, in the months of August and September; and of the six counsellors of the red robe, composing a part of the signoria, three entered office every four months. The Council of Ten, charged to guard the security of the state with a power higher than the law, had an especial commission to watch over the nobles, and to punish their crimes against the republic. In this they were restrained by no rule: they were, with respect to the nobility, the depositaries of the power of the great council, or rather of a power unlimited, which no people should intrust to any government. Some other decrees completed the system of the 'serrata del maggior consiglio.' It was forbidden to the quarantia to introduce any 'new man' into power. In 1315, a register was opened, called the Golden Book, in which were inscribed the names of all those who had sat in the great council. In 1319, all limitation of number was suppressed; and, from that period, it sufficed to prove that a person was the descendant of a counsellor, and 25 years of age, to be by right a member of the grand council of Venice."—J. C. L. de Sismondi, *Hist. of the Italian Republics, ch.* 5.—"When the Republic was hard pressed for money, inscriptions in the Golden Book were sold at the current price of 100,000 ducats. . . . Illustrious foreigners were admitted, as they are made free of a corporation amongst us. . . . The honour was not disdained even by crowned heads. . . . The original 'Libro d' oro' was publicly burned in 1797, but extracts, registers, and other documents are extant from which its contents might be ascertained."—*The Republic of Venice* (*Quart. Rev., v.* 137, *p.* 433).

A. D. 1099-1101.—The first Crusade.—"The movement of the crusades brings Venice to the very forefront of European history. Her previous development had been slowly preparing the way for her emergence. The Council, held at Clermont in 1095, resolved that the armament should leave Europe early in the following year. The Pope and the leaders of the Crusades were obliged to turn their attention to the question of transport for the vast and amorphous mob, which, without discipline, with no distinction of ranks, with no discrimination between soldier and monk, between merchant and peasant, between master and man, was now bent on reaching the Holy Land, almost as eager to die there as to achieve the object of their mission, the recovery of the Sepulchre. The three maritime states of Italy—Genoa, Pisa, and Venice—were each ready to offer their services. Each was jealous of the other, and each determined to prevent the other from reaping any signal commercial advantage from the religious enthusiasm of Europe. Venice was not only the most powerful, but also the most eastern, of the three competitors. It was natural that the choice should fall on her. When the Pope's invitation to assist in the Crusade reached the city, however, it seems that the Government did not at once embrace the cause officially in the name of the whole Republic. There was, at first, a tendency to leave the business of transport to private enterprise. But on receipt of the news that Jerusalem had fallen, the Venetian Government began to take active steps in the matter. . . . The Crusade was accepted with enthusiasm. The whole city engaged in preparing a fleet which should be worthy of the Republic. Then, after a solemn mass in S. Mark's, at which the standard of the Cross and the standard of the Republic were presented to the leaders, the soldiers of the Cross embarked on the fleet which numbered 200 ships, and set sail down the Adriatic, making for Rhodes, where they were to winter. At Rhodes two incidents of great significance in Venetian history took place. The Eastern Emperors had never viewed with favour the incursion of the Crusaders. The creation of the kingdom of Jerusalem was really a usurpation of Imperial territory. Alexius I. now endeavoured to persuade the Venetians to withdraw from the enterprise. In this he failed; Venice remained true to the Cross, and to her commercial interests. It is at this point that we find the beginnings of that divergence between Constantinople and the Republic, which eventually declared itself in open hostility, and led up to the sack of Constantinople in the fourth Cru-

sade. Alexius, finding that the Venetians were not inclined to obey him, resolved to punish them. An instrument was ready to his hand. The Pisans saw with disfavour the advent of their commercial rivals in Eastern waters. They were willing to hoist the Imperial standard as opposed to the crusading cross, and to sail down upon the Venetians at Rhodes. They were defeated. The Venetians released all the prisoners except thirty of the more prominent among them who were detained as hostages. The first fruits of the Crusade, as far as Venice was concerned, were the creation of two powerful enemies, the Emperor and the Pisans."—H. F. Brown, *Venice, ch.* 6.

A. D. 1114-1141.—Wars for Dalmatia with the Hungarians. See HUNGARY: A. D. 1114–1301.

A. D. 1127-1128.—Beginning of quarrels with the Byzantine Empire.—"Previous to this time [about 1127], the Venetian republic had generally been a firm ally of the Byzantine empire, and, to a certain degree, it was considered as owing homage to the Emperor of Constantinople. That connection was now dissolved, and those disputes commenced which soon occupied a prominent place in the history of Eastern Europe. The establishment of the Crusaders in Palestine had opened a new field for the commercial enterprise of the Venetians, and in a great measure changed the direction of their maritime trade; while the frequent quarrels of the Greeks and Franks compelled the trading republics of Italy to attach themselves to one of the belligerent parties, in order to secure a preference in its ports. For a short time, habit kept the Venetians attached to the empire; but they soon found that their interests were more closely connected with the Syrian trade than with that of Constantinople. They joined the kings of Jerusalem in extending their conquests, and obtained considerable establishments in all the maritime cities of the kingdom. From having been the customers and allies of the Greeks, they became their rivals and enemies. The commercial fleets of the age acted too often like pirates; and it is not improbable that the Emperor John had good reason to complain of the aggressions of the Venetians. Hostilities commenced; the Doge Dominico Michieli, one of the heroes of the republic, conducted a numerous fleet into the Archipelago, and plundered the islands of Rhodes and Chios, where he wintered. Next year he continued his depredations in Samos, Mitylene, Paros, and Andros. . . . Peace was re-established by the emperor reinstating the Venetians in the enjoyment of all the commercial privileges they had enjoyed before the war broke out."—G. Finlay, *Hist. of the Byzantine and Greek Empires, bk.* 3, *ch.* 2, *sect.* 2.

A. D. 1177.—Pretended Papal Grant of the sovereignty of the Adriatic.—Doubtful story of the humiliation of Frederick Barbarossa.—A "notable epoch in early Venetian history is the grant on which she based her claim to the sovereignty of the Adriatic. In the course of the fierce struggle between Alexander III. and Frederick Barbarossa [see ITALY: A. D. 1174–1183], the Pope, when his fortunes were at the lowest, took refuge with the Venetians, who, after a vain effort at reconciliation, made common cause with him, and in a naval encounter obtained so signal a victory that the Emperor was compelled to sue for peace and submit to the most humiliating terms. The crowning scene of his degradation has been rendered familiar by the pencil, the chisel, and the pen. . . . The Emperor, as soon as he came into the sacred presence, stripped off his mantle and knelt down before the Pope to kiss his feet. Alexander, intoxicated with his triumph and losing all sense of moderation or generosity, placed his foot on the head or neck of his prostrate enemy, exclaiming, in the words of the Psalmist, 'Super aspidem et basiliscum ambulabis' &c ('Thou shalt tread upon the asp and the basilisk'. . .). 'Non tibi, sed Petro' ('Not to thee, but Peter'), cried the outraged and indignant Emperor. 'Et mihi et Petro' ('To both me and Peter'), rejoined the Pope, with a fresh pressure of his heel. . . . Sismondi (following a contemporary chronicler) narrates the interview without any circumstance of insult, and describes it as concluding with the kiss of peace. There are writers who contend that Alexander was never at Venice, and that the Venetians obtained no victory on his behalf. But the weight of evidence adduced by Daru strikes us to be quite conclusive in favour of his version. . . . In return for the good offices of Venice on this occasion . . . Alexander presented the reigning Doge, Ziani, with a ring, saying, 'Receive this ring, and with it, as my donation, the dominion of the sea, which you, and your successors, shall annually assert on an appointed day, so that all posterity may understand that the possession of the sea was yours by right of victory, and that it is subject to the rule of the Venetian Republic, as wife to husband.' . . . The well-known ceremony of wedding the Adriatic, religiously observed with all its original pomp and splendour during six centuries, was in itself a proclamation and a challenge to the world. It was regularly attended by the papal nuncio and the whole of the diplomatic corps, who, year after year, witnessed the dropping of a sanctified ring into the sea, and heard without a protest the prescriptive accompaniment: 'Desponsamus te, mare, in signum veri perpetuique domini' (we espouse thee, sea, in sign of true and perpetual dominion)."—*The Republic of Venice* (*Quart. Rev., Oct.*, 1874, *v.* 137), *pp.* 421–423.

A. D. 1201.—Cause of Hostility to Constantinople.—"Of late years the Venetians had had difficulties with the New Rome. . . . These difficulties arose, in great measure, from the fact that the influence of Venice in Constantinople was no longer sufficient to exclude that of the other Italian republics. . . . But the hostility to Constantinople reached its height when the Venetians learned that Alexis had, in May 1201, received an embassy from Genoa, and was negotiating with Ottobono della Croce, its leader, for the concession of privileges for trade in Romania which Venice had hitherto regarded as exclusively her own. From this time the Doge appears to have determined to avenge the wrongs of his state on the ruler who had ventured to favour his rivals."—E. Pears, *The Fall of Constantinople, ch.* 8.

A. D. 1256-1258.—Battles with the Genoese at Acre.—"At the period of the Crusades, it was usual in those cities or towns where the Christians held sway, to assign to each of the mercantile communities which had borne a part in the conquest or recovery of the particular district, a separate quarter where they might have their own mill, their own oven, their own bath, their own weights and measures, their own church, and where they might be governed by their own laws, and protected by their own magistrates. . . . At Saint Jean d'Acre, however, the Church of Saint Sabbas was frequented by the Venetians and the Genoese in common; and it happened that, in course of time, both nations sought to found a right to the exclusive property of the building." Collisions ensued, in one of which (1256), the Genoese drove the Venetians from their factory at Acre and burned the church of Saint Sabbas. The Venetians retaliated by sending a squadron to Acre which destroyed all the Genoese shipping in the port, burned their factory, and reduced a castle near the town which was held by a Genoese garrison. Early in 1257 the fleets of the two republics met and fought a battle, between Acre and Tyre, in which the Venetians were the victors. On the 24th of June, 1258, a second battle was fought very nearly on the same spot, and again Venice triumphed, taking 2,600 prisoners and 25 galleys. Through the efforts of the Pope, a suspension of hostilities was then brought about; but other causes of war were working in the east, which soon led to fresh encounters in arms between the two jealous commercial rivals.—W. C. Hazlitt, *Hist. of the Venetian Republic, ch.* 11 (*v.* 1).

14th Century. — Fleets. — Commerce. — Industries.—"In the 14th century Venice had 3,000 merchantmen manned by 25,000 sailors. A tenth part of these were ships exceeding 700 tons burden. There were besides 45 war-galleys manned by 11,000 hands; and 10,000 workmen, as well as 36,000 seamen, were employed in the arsenals. The largest of the war-galleys was called the Bucentaur; it was a state vessel of the most gorgeous description. Every year the Doge of Venice, seated upon a magnificent throne surmounted by a regal canopy, dropped from this vessel a ring into the Adriatic, to symbolise the fact that land and sea were united under the Venetian flag. This ceremony commemorated the victory gained over the fleet of the Emperor Frederick Barbarossa in 1177, when the Venetians obliged him to sue for peace [see above: A. D. 1177]. Ascension Day was selected for its celebration, and the Bucentaur, glorious with new scarlet and gold, its deck and seats inlaid with costly woods, and rowed with long banks of burnished oars, for many years bore the Doge to plight his troth with the words, 'We espouse thee, O Sea! in token of true and eternal sovereignty.' The merchant fleet of Venice was divided into companies sailing together according to their trade. Their routes, and the days for departure and return, their size, armament, crew, and amount of cargo, were all defined. In those times the seas were as much infested with pirates as the deserts with robbers; each squadron therefore hired a convoy of war-galleys for its protection on the voyage. There were six or seven such squadrons in regular employment. The argosies of Cyprus and Egypt, and the vessels engaged in the Barbary and Syrian commerce, concentrated their traffic chiefly at Alexandria and Cairo. The so-called Armenian fleet proceeded to Constantinople and the Euxine, visiting Kaffa and the Gulf of Alexandretta. A Catalonian fleet traded with Spain and Portugal, and another with France; while the most famous of all, the Flanders galleys, connected the seaports of France, England, and Holland with the great commercial city of Bruges. The internal traffic with Germany and Italy was encouraged with equal care, oriental produce arriving from Constantinople and Egypt, and many other commodities being distributed, at first by way of Carinthia, and afterwards of the Tyrol. Germans, Hungarians, and Bohemians conducted this distribution. In Venice a bonded warehouse (fondaco dei tedeschi), or custom-house, was accorded to the Germans, where they were allowed to offer their wares for sale, though only to Venetian dealers. Similar privileges were granted to the Armenians, Moors, and Turks, but not to the Greeks, against whom a strong animosity prevailed. . . . The ancient industries of preparing salt and curing fish were never disregarded. The Adriatic sands supplied material adapted for a glass of rare beauty and value, of which mirrors and other articles of Venetian manufacture were made. Venetian goldsmiths' work was universally famed. Brass and iron foundries prepared the raw material for the armourers, whose weapons, helmets, and bucklers were unsurpassed for strength and beauty. Ship-building, with a people whose principle it was always to have more ships than any other state, was necessarily a very important branch of industry. Not satisfied with penetrating to every part already opened to enterprise, the Venetians travelled into regions before unknown, and gave to the world the record of their daring adventures. Maffeo and Nicolo Polo spent fifteen years visiting Egypt, Persia, India, the Khan of Tartary, and the Grand Khan or Emperor of China. Marco Polo, son of Nicolo, as well as Barthema and Joseph Barbaro, extended the knowledge obtained by their precursors in northern Europe and Asia."—J. Yeats, *Growth and Vicissitudes of Commerce, pp.* 98-101. — For some further account, see TRADE: MEDIÆVAL.

A. D. 1378-1379.—Renewed war with Genoa.—The defeat at Pola.—The treaty of June, 1355, between Venice and Genoa (see CONSTANTINOPLE: A. D. 1348–1355), established a peace which lasted only until April, 1378, when, "a dispute having arisen between the rival States in relation to the island of Tenedos, which the Venetians had taken possession of, the Signory formally declared war against Genoa, which it denounced as false to all its oaths and obligations. On the 26th of this month, Vettore Pisani was invested with the supreme command of the naval forces of the republic. . . . The new commander-in-chief was the son of Nicolo Pisani, and had held a commission in the Navy for 25 years. . . . Of the seamen he was the idol. . . . Pisani sailed from Venice early in May, with 14 galleys; and, on the 30th of the month, while cruising off Antium, came across a Genoese squadron of 10 galleys, commanded by Admiral Fieschi. It was blowing a gale at the time, and five of Pisani's vessels, which had parted company with him, and fallen to leeward, were unable to rejoin him, while one of Fieschi's drifted ashore, and was wrecked. Thus the battle which immediately ensued was between equal forces; but the Genoese admiral was no match for Vettore Pisani," and sustained a disastrous defeat, losing four vessels, with all their officers and crew. "During the summer, Pisani captured great numbers of the enemy's merchantmen; but was unable to find their fleet, which, under Luciano Doria, was actively engaged in cutting up Venetian commerce in the East. In November he asked permission to return to Venice to refit his vessels, which were in a very bad condition, but this was denied him; and, being kept constantly cruising through the winter, at its expiration only six of his vessels were found to be seaworthy. Twelve others, however, were fitted out at their own expense and sent to him by his friends, who perceived that his political enemies were making an effort to ruin him. At the end of February, 1379, Michele Steno and Donato Zeno were appointed by the Government 'proveditori' of the fleet. These officers, like the field deputies of the Dutch republic in later times, were set as spies over the commander-in-chief, whose operations they entirely controlled. On the 1st of May, Pisani left Brindisi, bound to Venice, having a large number of merchantmen in charge, laden with wheat; and, on the 6th instant, as the weather looked squally, put into Pola, with his convoy, for the night. On the following morning, at day-break, it was reported to him that Doria was off the port with 25 vessels; whereupon he determined not to leave his anchorage until Carlo Zeno, whom he was expecting with a reenforcement of 10 galleys, should be seen approaching. But the Proveditori, loudly denouncing such a determination as a reflection upon the valor of his officers and men, ordered him, peremptorily, in the name of the Senate, to engage the enemy without delay." The result was an overwhelming defeat, out of which Pisani brought six galleys, only—"which were all that were saved from this most terrible engagement, wherein 800 Venetians perished and 2,000 were taken prisoners. . . . Pisani was now violently assailed by his enemies; although they well knew that he had fought the battle of Pola against his own judgment, and agreeably to the wishes of the government, as made known to him by its accredited agents, Michele Steno and Donato Zeno. The Great Council decreed his immediate removal from the supreme command, and he was brought to Venice loaded with chains." Condemned, upon trial before the Senate, he was sentenced to imprisonment for six months.—F. A. Parker, *The Fleets of the World, pp.* 100–105.

A. D. 1379-1381.—The war of Chioggia.—The dire extremity of the Republic and her deliverance.—After the great victory of Pola, which cost the Genoese the life of Luciano D'Oria, they lost no time in pressing their beaten enemy, to make the most of the advantage they had won. "Fresh galleys were forthwith placed under the command of Pietro, another of the noble D'Oria family; and before the eyes of all Genoa, and after the benediction of the archbishop, the fleet sailed from the harbour, and a great cry was raised from roof to roof, and from window to window, and each alley and each street re-echoed it with enthusiasm, 'to Venice! to Venice!' On arriving in the Adriatic, Pietro D'Oria joined the fleet already there, and prepared for his attack on Venice. These were pitiful days for the Queen of the Adriatic, the days of her greatest peril and humiliation. The Lord of Padua joined the Genoese; the King of Hungary sent troops, as did also the Marquis of Friuli, and all seemed lost to her both by sea and land. Everywhere within the city was misery and dismay. . . . To possess himself of Chioggia, which was 25 miles distant from Venice, was D'Oria's first plan. It was the key of the capital, commanded the entrance to the harbour, and cut off any assistance which might come from Lombardy. Chioggia was very strong in itself, defended by bastions on all sides; its weak point lay in being built on two sides of a river, which was spanned by a large wooden bridge. It was the first care of the defenders to block up the mouth of this river. After a few days of gallant defence, and a few days of gallant attack by sea and land, the defenders of Chioggia were reduced to the last extremity. The entrance to the river was broken open, and the bridge, which for some time was a stumbling-block to the besiegers, was destroyed with all the soldiers upon it by the bravery of a Genoese sailor, who took a boat laden with tar and wool and other combustible materials, and set fire to it, escaping by means of swimming. The defenders having thus perished in the flames, and Chioggia being taken [August, 1379], the triumph of the Genoese was at its height. It now seemed as if Pietro D'Oria had but the word of command to give, and Venice would have met with the same fate as Pisa had but a century before. But with this the fortune of the Ligurians began to wane. One small cannon of leather, with a wooden car, brought from Chioggia as a trophy to Genoa, is all that exists to-day to testify to their victory." The Venetians, in consternation at the fall of Chioggia, sent a deputation to D'Oria humbly offering to submit to any terms of peace he might dictate; but the insolent victor ordered them home with the message that there could be

no peace until he had entered their city to bridle the bronze horses which stand on the Piazza of St. Mark. This roused the indignation and courage of Venice anew, and every nerve was strained in the defense of the port. "Vettor Pisani, who since the defeat at Pola had languished in prison, was brought out by unanimous consent, and before an assembled multitude he quietly and modestly accepted the position of saviour of his country. . . . The one saving point for Venice lay in the arrival of a few ships from Constantinople, which . . . Carlo Zeno had under his command, endeavouring to make a diversion in the favour of the Venetians at the Eastern capital. Pending the return of this fleet, the Venetians made an attack on Chioggia. And an additional gleam of hope raised the spirits of Pisani's men in the disaffection of the King of Hungary from the Genoese cause; and gradually, as if by the magic hand of a fickle fortune, Pietro D'Oria found himself and his troops besieged in Chioggia, instead of going on his way to Venice as he had himself prophesied. But the Genoese position was still too strong, and Pisani found it hopeless to attempt to dislodge them; his troops became restless: they wished to return to Venice, though they had sworn never to go back thither except as conquerors. It was in this moment of dire distress that the ultimate resort was vaguely whispered from the Venetian Council Hall to the Piazza. A solemn decree was passed, 'that if within four days the succour from Carlo Zeno did not arrive, the fleet should be recalled from Chioggia, and then a general council should be held as to whether their country could be saved, or if another more secure might not be found elsewhere.' Then did the law-givers of Venice determine that on the fifth day the lagunes should be abandoned, and that they should proceed en masse to Crete or Negropont to form for themselves a fresh nucleus of power on a foreign soil. It is indeed hard to realize that the fate of Venice, associated with all that is Italian, the offspring of the hardy few who raised the city from the very waves, once hung in such a balance. But so it was, when towards the evening of the fourth day [January 1, 1380] sails were descried on the horizon, and Carlo Zeno arrived to save his country from so great a sacrifice. Meanwhile, at Chioggia the Genoese were day by day becoming more careless; they felt their position so strong, they talked merrily of fixing the day when they should bivouac on the Piazza of St. Mark. Little did they dream of the net of misfortune into which they were being drawn so fast. Besides reinforcements by sea, assistance by land flocked in towards Venice. Barnabo Visconti, and his company of the Star, a roving company of Germans, and the celebrated Breton band under Sir John Hawkwood, the Englishman, all hurried to assist the fallen banner of St. Mark. Pietro D'Oria did all he could to maintain discipline amongst his troops; but when he fell one day in an engagement, through being struck by a Venetian arrow, a general demoralization set in, and their only thought was how to save themselves and abandon Chioggia. . . . On the 18th of February, 1380, the Venetians made another gallant attack. Both sides fought with desperation, the Genoese for life, their rivals for their country and their country's fame. Fearful slaughter occurred amongst the Genoese, and they were obliged to retire within the walls. . . . Driven to extremities, on the 22nd of June in that year, 4,000 Genoese were taken to the public prisons in Venice. . . . Since both parties were tired of war, and weakened with these extreme efforts, it was no difficult matter to establish a peace [August 8, 1381]."—J. T. Bent, *Genoa, ch.* 8.

A. D. 1494-1503.—The rising power and spreading dominion of the republic.—The fears and jealousies excited.—"The disturbances which had taken place in Italy since Charles VIII.'s advent there [see Italy: A. D. 1494–1496; 1499–1500; 1501–1504], came very opportunely for their [the Venetians'] plans and policy. On every available occasion the Venetians spread their power all round about them. In the struggle between Charles and Ferrantino [or Ferdinand, of Naples] they acquired five fine cities in Apulia, excellently situated for their requirements, which they peopled by the reception of fugitive Jews from Spain. Moreover, in the kingdom of Naples, one party had declared for them. . . . Tarento raised their standard. During the Florentine disorders they were within an ace of becoming masters of Pisa. In the Milanese feuds they acquired Cremona and Ghiara d'Adda. Their power was all the more terrible, as they had never been known to lose again anything which they had once gotten. No one doubted that their aim was the complete sovereignty over the whole of Italy. Their historians always talked as if Venice was the ancient Rome once more. . . . The Turkish war,

which had kept them a while employed, now at an end, they next tried their fortune in Romagna, and endeavoured, availing themselves of the quarrels between the returning nobles and Cesar [Borgia, son of Pope Alexander VI.], to become, if not the sole, at all events the most powerful, vassals of the papal chair. . . . The Venetians prepared to espouse the cause of those whom Cesar had suppressed. The cities reflected how genuine and substantial that peace was that the lion of Venice spread over all its dependencies. Having appeared in this country at the end of October, 1503, and having first promised the Malatesti other possessions in their own country, they took Rimini, with the concurrence of the prince and citizens. Without ado they attacked Faenza. . . . They continued their conquests, and, in the territories of Imola, Cesena, and Forli, took stronghold after stronghold. . . . Then it was that the first minister of France stated his belief that, 'had they only Romagna, they would forthwith attack Florence, on account of a debt of 180,000 guilders owing them.' If they were to make an inroad into Tuscany, Pisa would fall immediately on their arrival. Their object in calling the French into the Milanese territory was, that they considered them more fitted to make a conquest than to keep it; and, in the year 1504, they were negotiating how it were possible to wrest Milan again from them. Could they only succeed in this, nothing in Italy would be able longer to withstand them. 'They wanted,' as Macchiavelli said, 'to make the Pope their chaplain.' But they met with the staunchest resistance in Julius [the Pope, Julius II.], as in him they could discover no weak point to attack. As pointedly as he could express himself, he declared to them, on the 9th November, 1503, that, 'though hitherto their friend, he would now do his utmost against them, and would besides incite all the princes of Christendom against them.'"— L. von Ranke, *Hist. of the Latin and Teutonic Nations, bk.* 2, *ch.* 3.

15-17th Centuries.—The decline of Venetian commerce and its causes.—"Commerce was for a long time free at Venice; and the republic only began to decline when its government had caused the source of its prosperity to be exhausted by monopoly. At first all the young patricians were subjected to the most severe ordeals of a commercial training. They were often sent as novices on board state-vessels to try fortune with a light venture, so much did it enter into the views of the administration to direct all citizens toward industrial occupations! The only reproach that can be brought against the Venetians, is the effort to exclude foreigners from all competition with them. Although commercial jealousy had not yet erected prohibitions into a system, and the ports of the republic were open to all the merchandise of the world, yet the Venetians only permitted its transportation in their own ships; and they reigned as absolute masters over all the Mediterranean. War had given them security from the Pisans, the Sicilians and the Genoese. Spain, long occupied by the Moors, gave them little occasion of offence. France disdained commerce; England had not yet begun to think of it; the republic of Holland was not in existence. Under cover of the right of sovereignty on the gulf, which she had arrogated to herself, Venice reserved the almost exclusive right to navigate. Armed flotillas guarded the mouths of all her rivers, and allowed no barque to enter or depart without being vigorously examined. But what profited that jealous solicitude for the interests of her navigation? A day came when the Portuguese discovered the Cape of Good Hope, and all that structure of precautions and mistrust suddenly fell to pieces. Here begin the first wars of customs-duties, and political economy receives from history valuable instruction. The Venetians had levelled all obstacles, but for themselves alone, and to the exclusion of other nations. Their legislation was very strict in respect to foreigners, in the matter of commerce. The laws forbade a merchant who was not a subject of the republic to be even received on board a vessel of the state. Foreigners paid customs-duties twice as high as natives. They could neither build nor buy vessels in Venetian ports. The ships, the captains, the owners, must all be Venetian. Every alliance between natives and strangers was interdicted; there was no protection, no privileges and no benefits save for Venetians: the latter, however, all had the same rights. In Venice itself, and there alone, was it permitted to negotiate with the Germans, Bohemians and Hungarians. As national manufactures acquired importance, the government departed from the liberal policy it had hitherto pursued, and the manufacturers obtained an absolute prohibition of such foreign merchandise as they produced. In vain, in the 17th century, did declining commerce urge the reëstablishment of former liberties and the freedom of the port: the attempt was made for a brief moment, but the spirit of restriction won the day, and the prohibitory régime early prepared the way for the death of the republic. The people of Italy, however, pardoned the Venetians for their commercial intolerance, because of the moderate price at which they delivered all commodities. The Jews, Armenians, Greeks and Germans flocked to Venice and engaged with safety in speculations, which were always advantageous, because of the security which the credit institutions gave and the recognized probity of the merchants. But soon Venice saw numerous manufactures spring up in Europe rivaling her own, and her commerce encountered most formidable competition in that of the Portuguese, Dutch, Spanish and English. The discovery of the Cape of Good Hope [see PORTUGAL: A. D. 1463–1498] took away from her the monopoly of the spices of the Indies. The taking of Constantinople, by Mahomet II, had already deprived her of the magnificent privileges which her subjects enjoyed in that rich capital of the Orient. But the discovery of America and the vigorous reprisals of Charles V, who, at the commencement of his reign, in 1517, doubled the customs-duties which the Venetians paid in his states, completed the ruin of that fortunate monopoly which had made all Europe tributary. Charles V raised the import and export duties on all Venetian merchandise to twenty per cent; and this tariff, which would to-day appear mod-

erate, sufficed then to prevent the Venetians from entering Spanish ports. Such was the origin of the exclusive system, the fatal invention which the republic of Venice was so cruelly to expiate. So long as she sought fortune only in the free competition of the talent and capital of her own citizens, she increased from age to age and became for a moment the arbiter of Europe; but as soon as she wished to rule the markets by the tyranny of monopoly, she saw a league formed against her commerce, formidable for a very different reason from that of Cambray."—J.-A. Blanqui, *Hist. of Pol. Economy in Europe, ch.* 20. For some further account, see TRADE: MODERN.

A. D. 1501.—Hostile schemes of the Emperor and the King of France. See ITALY: A. D. 1501-1504.

A. D. 1508-1509.—The League of Cambrai.—The republic despoiled of her continental provinces.—"The craving appetite of Louis XII., . . . sharpened by the loss of Naples, sought to indemnify itself by more ample acquisitions in the north. As far back as 1504 [see ITALY: A. D. 1504-1506], he had arranged a plan with the emperor for the partition of the continental possessions of Venice. . . . The scheme is said to have been communicated to Ferdinand [of Aragon] in the royal interview at Savona [1507]. No immediate action followed, and it seems probable that the latter monarch, with his usual circumspection, reserved his decision until he should be more clearly satisfied of the advantages to himself. At length the projected partition was definitely settled by the celebrated treaty of Cambray, December 10th, 1508, between Louis XII. and the emperor Maximilian, in which the Pope, King Ferdinand, and all princes who had any claims for spoliations by the Venetians, were invited to take part. The share of the spoil assigned to the Catholic monarch [Ferdinand] was the five Neapolitan cities, Trani, Brindisi, Gallipoli, Pulignano, and Otranto, pledged to Venice for considerable sums advanced by her during the late war. The Spanish court, and, not long after, Julius II., ratified the treaty, although it was in direct contravention of the avowed purpose of the pontiff, to chase the 'barbarians' from Italy. It was his bold policy, however, to make use of them first for the aggrandisement of the church, and then to trust to his augmented strength and more favorable opportunities for eradicating them altogether. Never was there a project more destitute of principle or sound policy. There was not one of the contracting parties who was not at that very time in close alliance with the state, the dismemberment of which he was plotting. As a matter of policy, it went to break down the principal barrier on which each of these powers could rely for keeping in check the overweening ambition of its neighbors, and maintaining the balance of Italy. The alarm of Venice was quieted for a time by assurances from the courts of France and Spain that the league was directed solely against the Turks, accompanied by the most hypocritical professions of good will, and amicable offers to the republic. The preamble of the treaty declares that, it being the intention of the allies to support the pope in a crusade against the infidel, they first proposed to recover from Venice the territories of which she had despoiled the church and other powers, to the manifest hindrance of these pious designs. . . . The true reasons for the confederacy are to be found in a speech delivered at the German diet, some time after, by the French minister Hélian. 'We,' he remarks, after enumerating various enormities of the republic, 'wear no fine purple; feast from no sumptuous services of plate; have no coffers overflowing with gold. We are barbarians. Surely,' he continues in another place, 'if it is derogatory to princes to act the part of merchants, it is unbecoming in merchants to assume the state of princes.' This, then, was the true key to the conspiracy against Venice; envy of her superior wealth and magnificence, hatred engendered by her too arrogant bearing, and lastly the evil eye with which kings naturally regard the movements of an active, aspiring republic. To secure the co-operation of Florence, the kings of France and Spain agreed to withdraw their protection from Pisa, for a stipulated sum of money [see PISA: A. D. 1494-1509]. There is nothing in the whole history of the merchant princes of Venice so mercenary and base as this bartering away for gold the independence for which this little republic had been so nobly contending for more than 14 years. Early in April, 1509, Louis XII. crossed the Alps at the head of a force which bore down all opposition. City and castle fell before him, and his demeanor to the vanquished, over whom he had no rights beyond the ordinary ones of war, was that of an incensed master taking vengeance on his rebellious vassals. In revenge for his detention before Peschiera, he hung the Venetian governor and his son from the battlements. This was an outrage on the laws of chivalry, which, however hard they bore on the peasant, respected those of high degree. . . . On the 14th of May, 1509, was fought the bloody battle of Agnadel, which broke the power of Venice and at once decided the fate of the war. Ferdinand had contributed nothing to these operations, except by his diversion on the side of Naples, where he possessed himself without difficulty of the cities allotted to his share. They were the cheapest, and, if not the most valuable, were the most permanent acquisitions of the war, being reincorporated in the monarchy of Naples. Then followed the memorable decree by which Venice released her continental provinces from their allegiance, authorizing them to provide in any way they could for their safety; a measure which, whether originating in panic or policy, was perfectly consonant with the latter. The confederates, who had remained united during the chase, soon quarrelled over the division of the spoil. Ancient jealousies revived. The republic, with cool and consummate policy, availed herself of this state of feeling. Pope Julius, who had gained all that he had proposed, and was satisfied with the humiliation of Venice, now felt all his former antipathies and distrust of the French return in full force. The rising flame was diligently fanned by the artful emissaries of the republic, who at length effected a reconciliation on her behalf with the haughty pontiff. The latter . . . planned a new coalition for the expulsion of the French, calling on the other allies to take part in it."—W. H. Prescott, *Hist. of the Reign of Ferdinand and Isabella, pt.* 2, *ch.* 22 (*v.* 3).

16th Century.—The Art of the Renaissance. —"It was a fact of the greatest importance for the development of the fine arts in Italy that painting in Venice reached maturity later than in Florence. Owing to this circumstance one chief aspect of the Renaissance, its material magnificence and freedom, received consummate treatment at the hands of Titian, Tintoretto, and Veronese. To idealise the sensualities of the external universe, to achieve for colour what the Florentines had done for form, to invest the worldly grandeur of human life at one of its most gorgeous epochs with the dignity of the highest art, was what these great artists were called on to accomplish. Their task could not have been so worthily performed in the fifteenth century as in the sixteenth, if the development of the æsthetic sense had been more premature among the Venetians. Venice was precisely fitted for the part her painters had to play. Free, isolated, wealthy, powerful; famous throughout Europe for the pomp of her state equipage, and for the immorality of her private manners; ruled by a prudent aristocracy, who spent vast wealth on public shows and on the maintenance of a more than imperial civic majesty: Venice with her pavement of liquid chrysoprase, with her palaces of porphyry and marble, her frescoed façades, her quays and squares aglow with the costumes of the Levant, her lagoons afloat with the galleys of all nations, her churches floored with mosaics, her silvery domes and ceilings glittering with sculpture bathed in molten gold: Venice luxurious in the light and colour of a vaporous atmosphere, where sea-mists rose into the mounded summer clouds; arched over by the broad expanse of sky, bounded only by the horizon of waves and plain and distant mountain ranges, and reflected in all its many hues of sunrise and sunset upon the glassy surface of smooth waters: Venice asleep like a miracle of opal or of pearl upon the bosom of an undulating lake:—here and here only on the face of the whole globe was the unique city wherein the pride of life might combine with the lustre of the physical universe to create and stimulate in the artist a sense of all that was most sumptuous in the pageant of the world of sense. . . . The Venetians had no green fields and trees, no garden borders, no blossoming orchards, to teach them the tender suggestiveness, the quaint poetry of isolated or contrasted tints. Their meadows were the fruitless furrows of the Adriatic, hued like a peacock's neck; they called the pearl-shells of their Lido flowers, fior di mare. Nothing distracted their attention from the glories of morning and of evening presented to them by their sea and sky. It was in consequence of this that the Venetians conceived colour heroically, not as a matter of missal-margins or of subordinate decoration, but as a motive worthy in itself of sublime treatment. In like manner, hedged in by no limitary hills, contracted by no city walls, stifled by no narrow streets, but open to the liberal airs of heaven and ocean, the Venetians understood space and imagined pictures almost boundless in their immensity. Light, colour, air, space: those are the elemental conditions of Venetian art; of those the painters weaved their ideal world for beautiful and proud humanity. . . . In order to understand the destiny of Venice in art, it is not enough to concentrate attention on the peculiarities of her physical environment. Potent as these were in the creation of her style, the political and social conditions of the Republic require also to be taken into account. Among Italian cities Venice was unique. She alone was tranquil in her empire, unimpeded in her constitutional development, independent of Church interference, undisturbed by the cross purposes and intrigues of the despots, inhabited by merchants who were princes, and by a free-born people who had never seen war at their gates. The serenity of undisturbed security, the luxury of wealth amassed abroad and liberally spent at home, gave a physiognomy of ease and proud self-confidence to all her edifices. The grim and anxious struggles of the Middle Ages left no mark on Venice. How different was this town from Florence, every inch of whose domain could tell of civic warfare. . . . It is not an insignificant, though a slight, detail, that the predominant colour of Florence is brown, while the predominant colour of Venice is that of mother-of-pearl, concealing within its general whiteness every tint that can be placed upon the palette of a painter. The conditions of Florence stimulated mental energy and turned the forces of the soul inwards. Those of Venice inclined the individual to accept life as he found it. Instead of exciting him to think, they disposed him to enjoy, or to acquire by industry the means of manifold enjoyment. To represent in art the intellectual strivings of the Renaissance was the task of Florence and her sons; to create a monument of Renaissance magnificence was the task of Venice."—J. A. Symonds, *Renaissance in Italy: The Fine Arts, ch.* 7.

A. D. 1606-1607.—The Republic under the guidance of Fra Paolo Sarpi.—Conflict with the Pope.—The Interdict which had no terrors. —"In the Constitution of the Republic at this time [1606] there were three permanent officials called Counsellors of Law, or State Counsellors, whose duties were to instruct the Doge and Senate on the legal bearings of any question in dispute in which the Republic was involved.

But at the beginning of this year, because of the ecclesiastical element that frequently appeared in these quarrels (for they were mostly between the State and the Pope), the Senate resolved to create a new office, namely, that of 'Teologo-Consultore,' or Theological Counsellor. In looking about for one to fill this office the choice of Doge and Senate unanimously fell upon Fra Paolo Sarpi. . . . I have called Fra Paolo Sarpi the greatest of the Venetians. . . . Venice has produced many great men — Doges, soldiers, sailors, statesmen, writers, poets, painters, travellers — but I agree with Mrs. Oliphant that Fra Paolo is 'a personage more grave and great, a figure unique in the midst of this ever animated, strong, stormy, and restless race'; and with Lord Macaulay, who has said of him that 'what he did, he did better than anybody.' . . . He was supreme as a thinker, as a man of action, and as a transcript and pattern of every Christian principle. . . . Foreigners who came to Venice sought above all things to see him as 'the greatest genius of his age.' . . . On the 28th of January, 1606, he entered upon his public duties." From that time until his death, seventeen years later, he not only held the office of Theological Counsellor, but the duties of the three Counsellors of Law were gradually transferred to him, as those offices were vacated, in succession, by death. "During this time question after question arose for settlement, many of which were of momentous import, the resolution of which bore, not upon the interests of Venice merely, but of Europe; and affected, not the then living generation only, but a remote posterity. In every case Fra Paolo's advice was sought, in every case it was followed, and in every case it was right. The consequence was that the history of the Republic during these seventeen years was one unbroken record of great intellectual and moral victories. . . . Never was there in any land, by any Government, a servant more honoured and more beloved. The solicitude of the Doge, of the dreaded Council of Ten, of the Senate, of the whole people, for the safety and well-being of their Consultore, was like that of a mother for her only child. 'Fate largo a Fra Paolo'—'Make room for Fra Paolo,' was often heard as he passed along the crowded Merceria. Fra Paolo loved Venice with an undying devotion, and Venice loved him with a romantic and tender affection. The Pope, whose quarrels with the Republic were the chief cause of the creation of the office of Theological Counsellor, and of Fra Paolo's election to it, was Paul V. . . . Strained relations . . . [had] existed between Venice and the Vatican during the last years of Clement VIII.'s Pontificate. His seizure of the Duchy of Ferrara, his conduct in the matter of the Patriarch Zane's appointment, his attempt to cripple the book-trade of Venice by means of the Index Expurgatorius, all led to serious disputes, in every one of which he got the worst of it. Pope Paul V., who was then Cardinal Borghese, chafed at what he considered Clement's pusillanimity. Talking of these matters to the Venetian ambassador at Rome, Leonardo Donato, he once said, 'If I were Pope, I would place Venice under an interdict and excommunication;' 'And if I were Doge,' was the reply, 'I would trample your interdict and excommunication under foot.' Curiously enough, both were called upon to fill these offices, and both proved as good as their words. . . . Paul V. . . . found several excuses for quarrel. The Patriarch, Matteo Zane — he whose appointment had been a matter of dispute with Clement VIII. — died, and the Senate appointed Francesco Vendramin as his successor. Pope Paul claimed the right of presentation, and demanded that he should be sent to Rome for examination and approval. The Senate replied by ordering his investiture, and forbidding him to leave Venice. Again, money had to be raised in Brescia for the restoration of the ramparts, and the Senate imposed a tax on all the citizens — laymen and ecclesiastics alike. Pope Paul V. claimed exemption for the latter, as being his subjects. The Senate refused to listen to him. . . . These differences were causing both the Pope and the Republic to look to their armoury and to try the temper of their weapons, when two more serious matters occurred which brought them into open warfare. The prologue was passed, the drama was about to open. First, two priests in high position were leading flagrantly wicked and criminal lives. . . . The Senate sent its officers, and had the offenders seized and brought to Venice, and locked up from further mischief in the dungeons of the Ducal Palace. Pope Paul V. angrily remonstrated, and peremptorily demanded their instant liberation, on the ground that being priests they were not amenable to the secular arm. . . . Secondly, two ecclesiastical property laws were in force throughout the Republic; by one the Church was prohibited from building any new monasteries, convents, or churches without the consent of the Government under penalty of forfeiture; and by the other it was disqualified from retaining property which it might become possessed of by donation or by inheritance, but was bound to turn it into money. . . . Pope Paul V. . . . demanded the repeal of these property laws. These two demands, regarding the imprisoned ecclesiastics and the property laws, were first put forward in October, 1605. . . . Early in December, the Pope, impatient to bring the quarrel to a head, threatened to place Venice under interdict and excommunication if it did not yield to his demands. . . . It was at this acute stage of the quarrel that the Republic laid hold of Fra Paolo Sarpi, and, as we have already noted, made him its Theological Counsellor, and the struggle henceforth became, to a large extent, a duel between 'Paul the Pope, and Paul the Friar.' On the very day that Fra Paolo accepted this office he informed the Senate that two courses of action were open to them. They could argue the case either de jure or de facto. First, de jure, that is, they could appeal against the judgment of the Pope to a Church Council. . . . Secondly, the Republic could adopt the de facto course; that is, it could rely on its own authority and strength. It could set these over against the Pope's, and whilst willing to argue out the matter in a spirit of reason with him, yet meet his force with opposing force. If he turned a deaf ear to right, there was no help for it but to make it a question of might. The de facto course was therefore the one Fra Paolo recommended; adding very significantly, 'He who appeals to a Council admits that the righteousness of his cause may be questioned, whereas that of Venice is indisputable.' The Senate hailed the advice thus given, and instructed him

to draw out a reply to the Pope's brief in accordance with it. . . . From the moment this reply was received a bitter controversy was set on foot. Renewed demands came from Rome, and renewed refusals were sent from Venice. . . . Meanwhile the eyes of all the Courts of Europe were directed to the great struggle, and Venice made them more than spectators by laying its case as prepared by their Consultore fairly and fully before them. The time had not arrived for any nation to enter as a party into the contest, but all frankly expressed their opinions, which were, with the exception of that of Spain, unequivocally on the side of Venice. . . . At last the Pope determined to put into execution the threats contained in the briefs, and to place the Republic under interdict and excommunication. On the 17th of April, 1606, the bull of interdict and excommunication was launched; twenty-four days being allowed Venice for repentance, with three more added of the Pope's gracious clemency. The die was thus cast by Pope Paul V., by which he was either to humble the Republic, or discredit himself and his 'spiritual arms' in the sight of Europe. The bull was a sweeping one. . . . No more masses were to be said. Baptism, marriage, and burial services were to cease. The churches were to be locked up, and the priests could withdraw from the devoted land. All social relationships were dissolved. Marriages were declared invalid, and all children born were illegitimate. Husbands could desert their wives, and children disobey their parents. Contracts of all kinds were declared null and void. Allegiance to the Government was at an end."—A. Robertson, *Fra Paolo Sarpi, ch.* 5, *and preface.*—"It was proposed in the college of Venice to enter a solemn protest, as had been done in earlier times; but this proposal was rejected, on the ground that the sentence of the pope was in itself null and void, and had not even a show of justice. In a short proclamation, occupying only a quarto page, Leonardo Donato made known to the clergy the resolution of the republic to maintain the sovereign authority, 'which acknowledges no other superior in worldly things save God alone.' Her faithful clergy would of themselves perceive the nullity of the 'censures' issued against them, and would continue the discharge of their functions, the cure of souls and the worship of God, without interruption. No alarm was expressed, no menaces were uttered, the proclamation was a mere expression of confidence and security. It is, however, probable that something more may have been done by verbal communication. By these proceedings, the question of claim and right became at once a question of strength and of possession. Commanded by their two superiors—the pope and the republic—to give contradictory proofs of obedience, the Venetian clergy were now called on to decide to which of the two they would render that obedience. They did not hesitate; they obeyed the republic: not a copy of the brief was fixed up. The delay appointed by the pope expired; public worship was everywhere conducted as usual. As the secular clergy had decided, so did also the monastic orders. The only exception to this was presented by the orders newly instituted, and in which the principle of ecclesiastical restoration was more particularly represented; these were the Jesuits, Theatines, and Capuchins. The Jesuits, in so far as they were themselves concerned, were not altogether decided; they first took counsel of their Provincial at Ferrara, and afterwards of their General in Rome, who referred the question to the pope himself. Paul V. replied that they must either observe the interdict, or shake the dust from their feet and leave Venice. A hard decision assuredly, since they were distinctly informed that they would never be permitted to return; but the principle of their institution allowed them no choice. Embarking in their boats, they departed from the city, and took shelter in the papal dominions. Their example influenced the other two orders. A middle course was proposed by the Theatines, but the Venetians did not think it advisable; they would suffer no division in their land, and demanded either obedience or departure. The deserted churches were easily provided with other priests, and care was taken that none should perceive a deficiency. . . . It is manifest that the result was a complete schism. The pope was amazed; his exaggerated pretensions were confronted by the realities of things with the most unshrinking boldness. Did any means exist by which these might be overcome? Paul V. thought at times of having recourse to arms. . . . Legates were despatched, and troops fitted out; but in effect they dared not venture to attempt force. There would have been cause to apprehend that Venice would call the Protestants to her aid, and thus throw all Italy, nay the Catholic world at large, into the most perilous commotions. They must again betake themselves, as on former occasions, to political measures, for the adjustment of these questions touching the rights of the Church. . . . I have neither inclination nor means for a detailed account of these negotiations through the whole course of the proceedings. . . . The first difficulty was presented by the pope, who insisted, before all things, that the Venetian laws, which had given him so much offence, should be repealed; and he made the suspension of his ecclesiastical censures to depend on their repeal. But the Venetians, also, on their part, with a certain republican self-complacency, were accustomed to declare their laws sacred and inviolable. When the papal demand was brought under discussion in January, 1607, although the college wavered, yet at last it was decidedly rejected in the senate. The French, who had given their word to the pope, succeeded in bringing the question forward once more in March, when of the four opponents in the college, one at least withdrew his objections. After the arguments on both sides had again been fully stated in the senate, there was still, it is true, no formal or express repeal of the laws, but a decision was adopted to the effect that 'the republic would conduct itself with its accustomed piety.' However obscure these words appear, the ambassador and the pope thought they discovered in them the fulfilment of their wishes. The pope then suspended his censures."—L. Ranke, *Hist. of the Popes, bk.* 6, *sect.* 12 (*v.* 2).—"The moral victory remained with Venice. She did not recall her laws as to taxation of the clergy and the foundation of new churches and monasteries [nor permit the Jesuits to return, until many years later]. . . . The hero of the whole episode, Fra Paolo Sarpi, continued to live quietly in his convent of the Servites at S. Fosca.

The Government received warning from Rome that danger was threatening. In its turn it cautioned Fra Paolo. But he paid little or no heed." On the 25th of October, 1607, towards five o'clock in the evening, as he was returning to his convent, he was attacked by three assassins, who inflicted serious wounds upon him and left him for dead. By great care, however, Fra Paolo's life was saved, and prolonged until 1623. The would-be assassins escaped into the Papal States, where "they found not only shelter but a welcome."—H. F. Brown, *Venice, ch.* 20.

VERDUN, The Treaty of: A. D. 843.—The contest and civil war which arose between the three grandsons of Charlemagne resulted in a treaty of partition, brought about in 843, which forever dissolved the great Frank Empire of Clovis, and of the Pippins and Karls who finished what he began. "A commission of 300 members was appointed to distribute itself over the surface of the empire, and by an exact examination of the wealth of each region, and the wishes of its people, acquire a knowledge of the best means of making an equitable division. The next year the commissioners reported the result of their researches to the three kings, assembled at Verdun, and a treaty of separation was drawn up and executed, which gave Gaul, from the Meuse and Saône as far as the Pyrenees, to Karl; which gave Germany, beyond the Rhine, to Ludwig the Germanic; and which secured to Lother Italy, with a broad strip on the Rhine, between the dominions of Karl and Ludwig, under the names of Lotheringia or Lorraine. This was the first great treaty of modern Europe; it began a political division which lasted for many centuries; the great empire of Karl was formally dismembered by it, and the pieces of it scattered among his degenerate descendants."—P. Godwin, *Hist. of France: Ancient Gaul, ch.* 18.—"The treaty of Verdun, in

843, abrogated the sovereignty that had been attached to the eldest brother and to the imperial name in former partitions; each held his respective kingdom as an independent right. This is the epoch of a final separation between the French and German members of the empire. Its millenary was celebrated by some of the latter nation in 1843."—H. Hallam, *The Middle Ages, ch.* 1, *pt.* 1 (*v.* 1).—See, also, FRANKS: A. D. 814–962.

VERGOBRET, The.—The chief magistrate of the tribe of Gauls known as the Ædui was called the vergobret. "Cæsar terms this magistrate vergobretus, which Celtic scholars derive from the words 'ver-go-breith,' ('homme de jugement,' O'Brien, Thierry). He was elected by a council of priests and nobles, and had the power of life and death. But his office was only annual." Divitiacus, the Æduian friend of Cæsar and the Romans, had been the vergobret of his tribe.—C. Merivale, *Hist. of the Romans, ch.* 6, *foot-note.*

VERMANDOIS, House of.—The noble House of Vermandois which played an important part in French history during the Middle Ages, boasted a descent from Charlemagne, through his best loved son, Pippin, king of Italy. "Peronne and the Abbey of Saint-Quintin composed the nucleus of their Principality; but, quietly and without contradiction, they had extended their sway over the heart of the kingdom of Soissons; and that antient Soissons, and the rock of Lâon, and Rheims, the prerogative city of the Gauls, were all within the geographical ambit of their territory. In such enclavures as we have named, Vermandois did not possess direct authority. Lâon, for example, had a Count and a bishop, and was a royal domain."—Sir F. Palgrave, *Hist. of Normandy and Eng., bk.* 1, *ch.* 5, *sect.* 6 (*v.* 1).

VERMONT: A. D. 1749-1774.—Beginning of settlement.—The New Hampshire Grants and the conflict with New York.—Ethan Allen and the Green Mountain Boys.—"Among the causes of the controversies which existed between the colonies in early times, and continued down to the revolution, was the uncertainty of boundary lines as described in the old charters. . . . A difficulty of this kind arose between the colony of New York and those of Connecticut, Massachusetts, and New Hampshire. By the grant of King Charles II. to his brother, the Duke of York, the tract of country called New York was bounded on the east by Connecticut River, thus conflicting with the express letter of the Massachusetts and Connecticut charters, which extended those colonies westward to the South Sea, or Pacific Ocean. After a long controversy, kept up at times with a good deal of heat on both sides, the line of division between these colonies was fixed by mutual agreement at 20 miles east of Hudson's River, running nearly in a north and south direction. . . . The Massachusetts boundary was decided much later to be a continuation of the Connecticut line to the north, making the western limit of Massachusetts also 20 miles from the same river. . . . Meantime New Hampshire had never been brought into the controversy, because the lands to the westward of that province beyond Connecticut River had been neither settled nor surveyed. There was indeed a small settlement at Fort Dummer on the western margin of the River, which was under the protection of Massachusetts. . . . Such was the state of things when Benning Wentworth became governor of New Hampshire, with authority from the King to issue patents for unimproved lands within the limits of his province. Application was made for grants to the west of Connecticut River, and even beyond the Green Mountains, and in 1749 he gave a patent for a township 6 miles square, near the north west angle of Massachusetts, to be so laid out, that its western limit should be 20 miles from the Hudson, and coincide with the boundary line of Connecticut and Massachusetts continued northward. This township was called Bennington. Although the governor and council of New York remonstrated against this grant, and claimed for that colony the whole territory north of Massachusetts as far eastward as Connecticut River, yet Governor Wentworth was not deterred by this remonstrance from issuing other patents, urging in his justification, that New Hampshire had a right to the same extension westward as Massachusetts and Connecticut." After the British conquest of Canada, 1760, "applications for new patents thronged daily upon Governor Wentworth, and within four years' time the whole number of townships granted by him, to the westward of Connecticut River, was 138. The territory including these townships was known by the name of the New Hampshire Grants, which it retained till the opening of the revolution, when its present name of Vermont began to be adopted."—J. Sparks, *Life of Ethan Allen* (*Library of Am. Biog., v.* 1).—"Lieutenant Governor Colden, acting chief magistrate of New York in the absence of General Monckton, perceiving the necessity of asserting the claims of that province to the country westward of the Connecticut river, wrote an energetic letter to Governor Wentworth, protesting against his grants. He also sent a proclamation among the people, declaring the Connecticut river to be the boundary between New York and New Hampshire. But protests and proclamations were alike unheeded by the governor and the people until the year 1764, when the matter was laid before the King and council for adjudication. The decision was in favor of New York. Wentworth immediately bowed to supreme authority, and ceased issuing patents for lands westward of the Connecticut. The settlers, considering all questions in dispute to be thus finally disposed of, were contented, and went on hopefully in the improvement of their lands. Among these settlers in the Bennington township were members of the Allen family, in Connecticut, two of whom, Ethan and Ira, were conspicuous in public affairs for many years, as we shall hereafter have occasion to observe. The authorities of New York, not content with the award of territorial jurisdiction over the domain, proceeded, on the decision of able legal authority,

to assert the right of property in the soil of that territory, and declared Wentworth's patents all void. They went further. Orders were issued for the survey and sale of farms in the possession of actual settlers, who had bought and paid for them, and, in many instances, had made great progress in improvements. In this, New York acted not only unjustly, but very unwisely. This oppression, for oppression it was, was a fatal mistake. It was like sowing dragons' teeth to see them produce a crop of full-armed men. The settlers were disposed to be quiet, loyal subjects of New York. They cared not who was their political master, so long as their private rights were respected. But this act of injustice converted them into rebellious foes, determined and defiant. . . . Meanwhile speculators had been purchasing from New York large tracts of these estates in the disputed territory, and were making preparations to take possession. The people of the Grants sent one of their number to England, and laid their cause before the King and council. He came back in August, 1767, armed with an order for the Governor of New York to abstain from issuing any more patents for lands eastward of Lake Champlain. But as the order was not 'ex post facto' in its operations, the New York patentees proceeded to take possession of their purchased lands. This speedily brought on a crisis, and for seven years the New Hampshire Grants formed a theater where all the elements of civil war, except actual carnage, were in active exercise. . . . The hardy yeomanry who first appeared in arms for the defense of their territorial rights, and afterwards as patriots in the common cause when the Revolution broke out, were called Green Mountain Boys."—B. A. D. 1777-1778.—State independence declared and constitution framed.—Admission to the Union denied.—"The settlers in the land which this year [1777] took the name of Vermont refused by a great majority to come under the jurisdiction of New York; on the 15th of January 1777, their convention declared the independence of their state. At Windsor, on the 2d of June, they appointed a committee to prepare a constitution; and they hoped to be received into the American union. But, as New York opposed, congress, by an uncertain majority against a determined minority, disclaimed the intention of recognising Vermont as a separate state. . . . On the 2d of July the convention of Vermont reassembled at Windsor. The organic law which they adopted, blending the culture of their age with the traditions of Protestantism, assumed that all men are born free and with inalienable rights; that they may emigrate from one state to another, or form a new state in vacant countries; that 'every sect should observe the Lord's day, and keep up some sort of religious worship'; that every man may choose that form of religious worship 'which shall seem to him most agreeable to the revealed will of God.' They provided for a school in each town, a grammar-school in each county, and a university in the state. All officers, alike executive and legislative, were to be chosen annually and by ballot; the freemen of every town and all one year's residents were electors. Every member of the house of representatives must declare his 'belief in one God . . .; in the divine inspiration of the scriptures; and in the Protestant religion.' The legislative power was vested in one general assembly, subject to no veto. . . . Slavery was forbidden and forever; and there could be no imprisonment for debt. . . . After the loss of Ticonderoga, the introduction of the constitution was postponed [until March, 1778], lest the process of change should interfere with the public defence."—G. Bancroft, *Hist. of the U. S.* (*Author's last revision*), *v.* 5, *pp.* 157, *and* 161–162.

A. D. 1781.—Negotiations with the British authorities as an independent State.—Vermont had repeatedly applied for admission into the Union; but the opposition of her neighbors, who claimed her territory, and the jealousy of the southern states, who objected to the admission of another northern state, prevented favorable action in Congress. In 1780 a fresh appeal was made with a declaration that if it failed the people of the Green Mountains would propose to the other New England states and to New York, "an alliance and confederation for mutual defense, independent of Congress and of the other states." If neither Congress nor the northern states would listen to them, then, said the memorial, "they are, if necessitated to it, at liberty to offer or accept terms of cessation of hostilities with Great Britain without the approbation of any other man or body of men." "The British generals in America had for some time entertained hopes of turning the disputes in relation to Vermont to their own account, by detaching that district from the American cause and making it a British province. But the first intimation of their views and wishes was communicated in a letter from Colonel Beverly Robinson to Ethan Allen; dated New York, March 30th, 1780. In July, this letter was delivered to Allen in the street in Arlington, by a British soldier in the habit of an American farmer. Allen perused the letter, and then told the bearer that he should consider it, and that he might return. . . . Allen immediately communicated the contents of this letter to Governor Chittenden and some other confidential friends, who agreed in opinion, that no answer should be returned. Robinson, not receiving a reply to his letter and supposing it to have been miscarried, wrote again to Allen on the 2d of February, 1781, enclosing his former letter. In his second letter, after saying he had received new assurances of the inclination of Vermont to join the king's cause, he said that he could then write with more authority; and assured Allen that he and the people of Vermont could obtain the most favorable terms, provided they would take a decisive and active part in favor of Great Britain. He requested an answer; and that the way might be pointed out for continuing the correspondence; and desired to be informed in what manner the

people of Vermont could be most serviceable to the British cause. Allen returned no answer to either of these letters; but, on the 9th of March, 1781, inclosed them in a letter to Congress, informing them of all the circumstances which had thus far attended the business. He then proceeded to justify the conduct of Vermont in asserting her right to independence, and expressed his determinate resolution to do every thing in his power to establish it. . . . 'I am confident,' said he, 'that Congress will not dispute my sincere attachment to the cause of my country, though I do not hesitate to say, I am fully grounded in opinion, that Vermont has an indubitable right to agree on terms of a cessation of hostilities with Great Britain, provided the United States persist in rejecting her application for an union with them.' . . . During the spring of 1780, some of the scouting parties belonging to Vermont had been taken by the British and carried prisoners to Canada. On the application of their friends to Governor Chittenden, he, in the month of July, sent a flag with a letter to the commanding officer in Canada, requesting their release or exchange. In the fall, the British came up lake Champlain in great force, and a very favorable answer was returned by General Haldimand to Governor Chittenden's letter. A flag was at the same time sent to Ethan Allen, then a brigadier general and commanding officer in Vermont, proposing a cessation of hostilities with Vermont, during negotiations for the exchange of prisoners."—Z. Thompson, *Hist. of the State of Vermont, ch.* 4, *sect.* 6.—"The immediate results were a truce, which covered not only Vermont but the frontiers of New York to Hudson river; the disbanding of the militia of Vermont; and the retiring of the British troops to winter quarters in Canada. Until the truce became generally known, the results of it occasioned much surprise in New York. It was further agreed, that the commissioners of both parties should meet on the subject of the cartel, and go together to Canada. This was attempted, but failed on account of the difficulty of getting through the ice on Lake Champlain. After contending several days with the elements, the commissioners separated; but 'while their men [wrote Ira Allen] were breaking through the ice, much political conversation and exhibits of papers took place.' Williams ['Hist. of Vermont'] is more definite: 'the British agents availed themselves of this opportunity to explain their views, to make their proposals, and offer as complete an establishment for Vermont, from the royal authority, as should be desired. The commissioners from Vermont treated the proposals with affability and good humor, and though they avoided bringing anything to a decision, the British concluded they were in a fair way to effect their purposes.' The subsequent negotiations at Isle aux Noix, between Ira Allen and the British commissioners, as to matters beyond settling a cartel, were secret, and even the commander of the post had no knowledge of them, although he was associated with the British commissioners on the question of an exchange of prisoners. These facts show that the public had no knowledge except of a truce for a humane and proper attempt to relieve citizens of Vermont, and its officers and soldiers, who were then prisoners in Canada; and the conclusion is that all the suspicion that then existed of the patriotism and fidelity of the great body of the people of the state, and all the obloquy since drawn from the negotiation with Haldimand and cast upon the state, were entirely unjust. If any body was really at fault, the number implicated was very small. Williams asserted that 'eight persons only in Vermont, were in the secret of this correspondence;' and Ira Allen that, in May, 1781, 'only eight persons were in the secret, but more were added as the circumstances required.'"—*Vt. Hist. Soc. Coll., v.* 2, *introd.*—"By the definitive treaty between Great Britain and the United States, Sept. 3, 1783, Vermont was included within the boundaries separating the independent American from British territory, and thus the independence of Vermont was acknowledged first by the mother country. The State had been de facto independent from its organization; and therefore the following record, with the other papers contained in this and the first volume of the Historical Society Collections covers the existence of Vermont as an independent and sovereign state."—*The same, p.* 397.

A. D. 1790-1791.—Renunciation of the claims of New York and admission of the State to the Union.—"The rapid increase of the population of Vermont having destroyed all hope on the part of New York of re-establishing her jurisdiction over that rebellious district, the holders of the New York grants, seeing no better prospect before them, were ready to accept such an indemnity as might be obtained by negotiation. Political considerations had also operated. The vote of Vermont might aid to establish the seat of the federal government at New York. At all events, that state would serve as a counterbalance to Kentucky, the speedy admission of which was foreseen. The Assembly of New York [July, 1789] had appointed commissioners with full powers to acknowledge the independence of Vermont, and to arrange a settlement of all matters in controversy. To this appointment Vermont had responded, and terms had been soon arranged. In consideration of the sum of $30,000, as an indemnity to the New York grantees, New York renounced all claim of jurisdiction [October 7, 1790], consented to the admission of Vermont into the Union, and agreed to the boundary heretofore claimed—the western line of the westernmost townships granted by New Hampshire and the middle channel of Lake Champlain. This arrangement was immediately ratified by the Legislature of Vermont. A Convention, which met at the beginning of the year [1791], had voted unanimously to ratify the Federal Constitution, and to ask admission into the Union. Commissioners were soon after appointed by the Assembly to wait upon Congress and to negotiate the admission. No opposition was made to it, and [February 18, 1791] within fourteen days after the passage of the bill for the prospective admission of Kentucky Vermont was received into the Union, from and after the termination of the present session of Congress. The Constitution under which Vermont came into the Union, originally adopted in 1777, had been slightly altered in 1785. Most of its provisions seem to have been copied from the first

Constitution of Pennsylvania. . . . The revision of 1785 struck out the requirement of Protestantism; another revision in 1793, still following the example of Pennsylvania, released the members of Assembly from the necessity of any religious subscription."—R. VERMONT UNIVERSITY.—"At the time of the organization of the State government . . . the University of Vermont was endowed with lands which proved subsequently to amount to 29,000 acres. In 1791 the university was organized. . . . The early years of the university, planted as it was in the wilderness, were full of struggles and misfortunes. The State was generous in the extreme at the beginning, but failed to support the university it had created. The land was poor and brought little income, the whole tract bringing but 2,500 dollars at that time. In 1813 the buildings of the university were seized by the Government and used for the storage of United States arms, by which much damage was suffered, and the houseless students all left, most of them to shoulder muskets against the British invaders. The buildings were rented in 1814 for the United States Army. Worse misfortunes occurred in 1824, the buildings being consumed by fire, but were restored by the citizens of Burlington in the following year. For the first ninety-five years of the corporate existence of the university the State never gave anything toward the support of it more than has been set forth in the above statements."—F. W. A. D. 493-525.—Residence of Theodoric the Ostrogoth.—"Pavia and Verona [as well as his ordinary capital city, Ravenna] were also places honoured with the occasional residence of Theodoric. At both he built a palace and public baths. . . . At Verona, the palace, of which there were still some noble remains incorporated into the castle of the Viscontis, was blown up by the French in 1801, and an absolutely modern building stands upon its site. . . . It seems probable that Theodoric's residence at both these places depended on the state of Transalpine politics. When the tribes of the middle Danube were moving suspiciously to and fro, and the vulnerable point by the Brenner Pass needed to be especially guarded, he fixed his quarters at Verona. When Gaul menaced greater danger, then he removed to Ticinum [Pavia]. It was apparently the fact that Verona was his coign of vantage, from whence he watched the German barbarians, which obtained for him from their minstrels the title of Dietrich of Bern. Thus strangely travestied, he was swept within the wide current of the legends relating to Attila, and hence it is that the really grandest figure in the history of the migration of the peoples appears in the Nibelungen Lied, not as a great king and conqueror on his own account, but only as a faithful squire of the terrible Hunnish king whose empire had in fact crumbled into dust before the birth of Theodoric."—T. Hodgkin, *Italy and her Invaders, bk.* 4, *ch.* 8 (*v.* 3).

11-12th Centuries.—Acquisition of Republican Independence. See Italy: A. D. 1056–1152.

A. D. 1236-1259.—The tyranny of Eccelino di Romano and the crusade against him.—"In the north-eastern corner of Italy the influence of the old Lombard lords, which had been extinguished there as in most other parts of the peninsula, was succeeded by that of a family that had accompanied one of the emperors from Germany. . . . The eye of a traveller passing from Verona to Padua may still be struck by one or two isolated hills, which seem as it were designed by nature to be meet residences for the tyrants of the surrounding plains. One of these gave birth to a person destined to become the scourge of the neighbouring country. . . . Eccelino di Romano . . . was descended from a German noble brought into Italy by Otho III. The office of Podesta of Verona had become hereditary in his family. In the wars of the second Frederic [1236–1250], he put himself at the head of the Ghibellines in the surrounding principalities, and became a strenuous supporter of the emperor. Under the protection of so powerful an ally, he soon made himself master of Padua, where he established his headquarters, and built the dungeons, where the most revolting cruelties were inflicted on his victims."—W. P. Urquhart, *Life and Times of Francesco Sforza, bk.* 1, *ch.* 3 (*v.* 1).—In 1237, the emperor, Frederick II., "obliged to return to Germany, left under the command of Eccelino a body of German soldiers, and another of Saracens, with which this able captain made himself, the same year, master of Vicenza, which he barbarously pillaged, and the following year of Padua. . . . Eccelino judged it necessary to secure obedience, by taking hostages from the richest and most powerful families; he employed his spies to discover the malcontents, whom he punished with torture, and redoubled his cruelty in proportion to the hatred which he excited." Subsequently, the emperor confided "the exclusive government of the Veronese marches [also called the Trevisan marches] to Eccelino. The hatred which this ferocious man excited by his crimes fell on the emperor. Eccelino imprisoned in the most loathsome dungeons those whom he considered his enemies, and frequently put them to death by torture, or suffered them to perish by hunger. . . . In the

single town of Padua there were eight prisons always full, notwithstanding the incessant toil of the executioner to empty them; two of these contained each 300 prisoners. A brother of Eccelino, named Alberic, governed Treviso with less ferocity, but with a power not less absolute." Eccelino maintained the power which he had gathered into his hands for several years after Frederick's death. At length, the pope, "Alexander IV., to destroy the monster that held in terror the Trevisan march, caused a crusade to be preached in that country. He promised those who combated the ferocious Eccelino all the indulgences usually reserved for the deliverers of the Holy Land. The marquis d'Este, the count di San Bonifazio, with the cities of Ferrara, Mantua, and Bologna, assembled their troops under the standard of the church; they were joined by a horde of ignorant fanatics from the lowest class." Headed by the legate Philip, archbishop of Ravenna, the crusaders took Padua, June 18, 1256, and "for seven days the city was inhumanly pillaged by those whom it had received as deliverers. As soon as Eccelino was informed of the loss he had sustained, he hastened to separate and disarm the 11,000 Paduans belonging to his army; he confined them in prisons, where all, with the exception of 200, met a violent or lingering death. During the two following years, the Guelphs experienced nothing but disasters: the legate, whom the pope had placed at their head, proved incompetent to command them; and the crowd of crusaders whom he called to his ranks served only to compromise them, by want of courage and discipline. . . . The following year, this tyrant, unequalled in Italy for bravery and military talent, always an enemy to luxury, and proof against the seductions of women, making the boldest tremble with a look, and preserving in his diminutive person, at the age of 65, all the vigor of a soldier, advanced into the centre of Lombardy, in the hope that the nobles of Milan, with whom he had already opened a correspondence, would surrender this great city." But, by this time, even his old Ghibelline associates had formed alliances with the Guelphs against him, and he was beset on all sides. "On the 16th of September, 1259, whilst he was preparing to retire, he found himself stopped at the bridge of Cassano. . . . Repulsed, pursued as far as Vimercato, and at last wounded in the foot, he was made prisoner and taken to Soncino: there, he refused to speak; rejected all the aid of medicine; tore off all the bandages from his wounds, and finally expired, on the eleventh day of his captivity. His brother with all his family were massacred in the following year."— J. C. L. de Sismondi, *Hist. of the Italian Republics, ch.* 3–4.

Also in: J. Miley, *Hist. of the Papal States, bk.* 7, *ch.* 1 (*v.* 3).

A. D. 1260-1338.—Rise of the House of the Scaligeri.—Successes of Can' Grande della Scala.—Wars and Reverses of Mastino.—After the death of Eccelino, Verona, by its own choice came under the government of the first Mastino della Scala, who established the power of a house which became famous in Italian history. Mastino's grandson, Cane, or Can' Grande della Scala, "reigned in that city from 1312 to 1329, with a splendor which no other prince in Italy equalled. . . . Among the Lombard princes he was the first protector of literature and the arts. The best poets, painters, and sculptors of Italy, Dante, to whom he offered an asylum, as well as Uguccione da Faggiuola, and many other exiles illustrious in war or politics, were assembled at his court. He aspired to subdue the Veronese and Trevisan marches, or what has since been called the Terra Firma of Venice. He took possession of Vicenza; and afterwards maintained a long war against the republic of Padua, the most powerful in the district, and that which had shown the most attachment to the Guelph party and to liberty." In 1328, Padua submitted to him; and "the year following he attacked and took Treviso, which surrendered on the 6th of July, 1329. He possessed himself of Feltre and Cividale soon after. The whole province seemed subjugated to his power; but the conqueror also was subdued." He died on the 22d of the same month in which Treviso was taken.—J. C. L. de Sismondi, *Hist. of the Italian Republics, ch.* 6.—Can' Grande was succeeded by his nephew, the second Mastino della Scala, who, in the next six years, "extended his states from the north-eastern frontiers of Italy to the confines of Tuscany; and the possession of the strong city of Lucca now gave him a secure footing in this province. He shortly made it appear to what purpose he meant to apply this new advantage. Under the plea of re-establishing the Ghibelin interests, but in reality to forward his own schemes of dominion, he began to fill all Tuscany with his machinations. Florence was neither slow to discover her danger, nor to resent the treachery of her faithless ally,"—which Mastino had recently been. Florence, accordingly, formed an alliance with Venice, which Mastino had rashly offended by restricting the manufacture of salt on the Trevisan coast, and by laying heavy duties on the navigation of the Po. Florence agreed "to resign to Venice the sole possession of such conquests as might be made in that quarter; only reserving for herself the acquisition of Lucca, which she was to obtain by attacking Mastino in Tuscany, entirely with her own resources. Upon these terms an alliance was signed between the two republics, and the lord of Verona had soon abundant reason to repent of the pride and treachery by which he had provoked their formidable union (A. D. 1336). . . . During three campaigns he was unable to oppose the league in the field, and was compelled to witness the successive loss of many of his principal cities (A. D. 1337). His brother Albert was surprised and made prisoner in Padua, by the treachery of the family of Carrara, who acquired the sovereignty of that city; Feltro was captured by the Duke of Carinthia, Brescia revolted, and fell with other places to Azzo Visconti. . . . In this hopeless condition Mastino artfully addressed himself to the Venetians, and, by satisfying all their demands, detached them from the general interests of the coalition (A. D. 1338). By a separate treaty which their republic concluded with him, and which was then only communicated to the Florentines for their acceptance, Mastino ceded to Venice Treviso, with other fortresses and possessions, and the right of free navigation on the Po; he agreed at the same time to yield Bassano and an extension of territory to the new lord of Padua, and to confirm the sovereignty of Brescia to Azzo Visconti; but for the Florentine republic no farther advantage was stipulated than the enjoyment of a

few castles which they had already conquered in Tuscany."—G. Procter, *Hist. of Italy, ch.* 4, *pt.* 3.

VERONA, The Congress of (after Troppau and Laybach).—"The rapid spread of revolution in Europe inspired serious misgivings among the great powers, and impelled the Holy Alliance [see Holy Alliance] to show its true colours. Austria was especially alarmed by the movement in Naples [see Italy: A. D. 1820–1821], which threatened to overthrow its power in Italy, and Metternich convoked a congress at Troppau, in Upper Silesia (Oct., 1820), at which Austria, Russia, Prussia, France and England were represented. Neapolitan affairs were the chief subject of discussion, and it was soon evident that Austria, Russia and Prussia were agreed as to the necessity of armed intervention. England made a formal protest against such high-handed treatment of a peaceful country; but as the protest was not supported by France, and England was not prepared to go to war for Naples, it was disregarded. The three allied powers decided to transfer the congress to Laybach and to invite Ferdinand I. to attend in person." The result of the conference at Laybach was a movement of 60,000 Austrian troops into Naples and Sicily, in March, 1821, and a restoration of Ferdinand, who made a merciless use of his opportunity for revenge.— R. Lodge, *Hist. of Modern Europe, ch.* 25, *sect.* 8.— From Laybach, the allied sovereigns issued a circular to their representatives at the various foreign courts, in which portentous document they declared that "useful and necessary changes in legislation and in the administration of states could only emanate from the free will, and from the intelligent and well-weighed convictions, of those whom God has made responsible for power. Penetrated with this eternal truth, the sovereigns have not hesitated to proclaim it with frankness and vigour. They have declared that, in respecting the rights and independence of legitimate power, they regarded as legally null, and disavowed by the principles which constituted the public right of Europe, all pretended reforms operated by revolt and open hostilities." "These principles, stated nakedly and without shame, were too much even for Lord Castlereagh. In a despatch, written early in the year 1821, while admitting the right of a state to interfere in the internal affairs of another state when its own interests were endangered, he protested against the pretension to put down revolutionary movements apart from their immediate bearing on the security of the state so intervening, and denied that merely possible revolutionary movements can properly be made the basis of a hostile alliance. The principles of the Holy Alliance were not intended to remain a dead letter; they were promptly acted upon. Popular movements were suppressed in Naples and Piedmont; and intervention in Spain, where the Cortes had been summoned and the despotic rule of Ferdinand VII. had been overthrown, was in contemplation. Greece imitated the example set in the western peninsulas of Europe. The Congress of Verona was summoned, and Lord Castlereagh (now the Marquis of Londonderry) was preparing to join it, when in an access of despondency, the origin of which is variously explained, he took his own life." He was succeeded in the British Ministry by Mr. Canning.—F. H. Hill, *George Canning, ch.* 20.— "The first business which presented itself to Mr. Canning was to devise a system by which the Holy Alliance could be gradually dissolved, and England rescued from the consequences of her undefined relations with its members. The adjourned Congress was on the point of assembling at Verona, and as it was necessary to send a representative in place of Lord Castlereagh, who seems to have been terrified at the prospect that lay before him, the Duke of Wellington was selected, and dispatched without loss of time. . . . The very first blow he [Canning] struck in the Congress of Verona announced to the world the attitude which England was about to take, and her total denial of the rights of the Alliance to interfere with the internal affairs of any independent nation. It appeared that France had collected a large army in the south, and not having legitimate occupation for it, proposed to employ it in the invasion of Spain [see Spain: A. D. 1814–1827]. This monstrous project was submitted to Congress, and ardently approved of by Russia. It was now that England spoke out for the first time in this cabal of despots. . . . After some interchanges of notes and discussions agreed to by the allies, the British plenipotentiary, as he was instructed, refused all participation in these proceedings, and withdrew from the Congress. This was the first step that was taken to show the Alliance that England would not become a party to any act of unjust aggression or unjustifiable interference. A long correspondence ensued between Mr. Canning and M. de Chateaubriand. . . . The French king's speech, on opening the Chambers, revealed the real intentions of the government, which Mr. Canning had penetrated from the beginning. The speech was, in fact, a declaration of war against Spain, qualified by the slightest imaginable hypothesis. But, happily for all interests, there was no possibility of disguising the purpose of this war, which was plainly and avowedly to force upon the people of Spain such a constitution as the king (a Bourbon), in the exercise of his absolute authority, should think fit to give them. . . . Against this principle Mr. Canning entered a dignified protest. . . . Although he could not avert from Spain the calamity of a French invasion, he made it clear to all the world that England objected to that proceeding, and that she was no longer even to be suspected of favoring the designs of the Holy Alliance. The French army made the passage of the Bidassoa. From that moment Mr. Canning interfered no farther. He at once disclosed the system which he had already matured and resolved upon. Having first protested against the principle of the invasion, he determined to maintain the neutrality of England in the war that followed. By this course he achieved the end he had in view, of

severing England from the Holy Alliance without embroiling her in any consequent responsibilities. . . . Mr. Canning's 'system' of foreign policy, as described in his own language, resolved itself into this principle of action, that 'England should hold the balance, not only between contending nations, but between conflicting principles; that, in order to prevent things from going to extremities, she should keep a distinct middle ground, staying the plague both ways.' . . . The development of this principle, as it applied to nations, was illustrated in the strict but watchful neutrality observed between France and Spain; and, as it applied to principles, in the recognition of the independence of the Spanish-American colonies. The latter act may be regarded as the most important for which Mr. Canning was officially responsible, as that which exerted the widest and most distinct influence over the policy of other countries, and which most clearly and emphatically revealed the tendency of his own. It showed that England would recognize institutions raised up by the people, as well as those which were created by kings. It gave the death-blow to the Holy Alliance." The logic and meaning of Mr. Canning's recognition of the Spanish American republics found expression in one famous passage of a brilliant speech which he made in the House of Commons, December 12, 1826, vindicating his foreign policy. "If France," he said, "occupied Spain, was it necessary, in order to avoid the consequences of that occupation, that we should blockade Cadiz? No, I looked another way — I sought materials of compensation in another hemisphere. Contemplating Spain such as our ancestors had known her, I resolved that if France had Spain, it should not be Spain with the Indies. I called the New World into existence to redress the balance of the Old."— R. Bell, *Life of the Rt. Hon. George Canning, ch.* 13.

VERRAZANO, Voyages of. See America: A. D. 1523–1524.

VERSAILLES. — Louis XIV. "preferred Versailles to his other chateaux, because Fontainebleau, Chambord, Saint-Germain, were existences ready created, which Francois I. and Henri IV. had stamped with the ineffaceable imprint of their glory: at Versailles, everything was to be made, save the modest beginning left by Louis XIII. . . . At Versailles, everything was to be created, we say,— not only the monuments of art, but nature itself. This solitary elevation of ground, although pleasing enough through the woods and hills that surrounded it, was without great views, without sites, without waters, without inhabitants. . . . The sites would be created by creating an immense landscape by the hand of man; the waters would be brought from the whole country by works which appalled the imagination; the inhabitants would be caused, if we may say so, to spring from the earth, by erecting a whole city for the service of the chateau. Louis would thus make a city of his own, a form of his own, of which he alone would be the life. Versailles and the court would be the body and soul of one and the same being, both created for the same end, the glorification of the terrestrial God to whom they owed existence. . . . The same idea filled the interior of the palace. Painting deified Louis there under every form, in war and in peace, in the arts and in the administration of the empire; it celebrated his amours as his victories, his passions as his labors. All the heroes of antiquity, all the divinities of classic Olympus, rendered him homage or lent him their attributes in turn. He was Augustus, he was Titus, he was Alexander; he was thundering Jupiter, he was Hercules, the conqueror of monsters; oftener, Apollo, the inspirer of the Muses and the king of enlightenment. Mythology was no longer but a great enigma, to which the name of Louis was the only key; he was all the gods in himself alone. . . . Louis, always served in his desires by the fertility of his age, had found a third artist, Lenostre, to complete Lebrun and Mansart. Thanks to Lenostre, Louis, from the windows of his incomparable gallery of mirrors, saw nought that was not of his own creation. The whole horizon was his work, for his garden was the whole horizon. . . . Whole thickets were brought full-grown from the depths of the finest forests of France, and the arts of animating marble and of moving waters filled them with every prodigy of which the imagination could dream. An innumerable nation of statues peopled the thickets and lawns, was mirrored in the waters, or rose from the bosom of the wave. . . . Louis had done what he wished; he had created about him a little universe, in which he was the only necessary and almost the only real being. But terrestrial gods do not create with a word like the true God. These buildings which stretch across a frontage of twelve hundred yards, the unheard-of luxury of these endless apartments, this incredible multitude of objects of art, these forests transplanted, these waters of heaven gathered from all the slopes of the heights into the windings of immense conduits from Trappes and Palaiseau to Versailles, these waters of the Seine brought from Marly by gigantic machinery through that aqueduct which commands from afar the valley of the river like a superb Roman ruin, and later, an enterprise far more colossal! that river which was turned aside from its bed and which it was undertaken to bring thirty leagues to Versailles over hills and valleys, cost France grievous efforts and inexhaustible sweats, and swallowed up rivers of gold increasing from year to year. . . . Versailles has cost France dearly, very dearly; nevertheless it is important to historic truth to set aside in this respect too long accredited exaggerations. . . . The accounts, or at least the abstracts of the accounts, of the expenditures of Louis XIV. for building, during the greater part of his reign, have been discovered. The costs of the construction, decoration, and furnishing of Versailles, from 1664 to 1690, including the hydraulic works and the gardens, in addition to the appendages, — that is, Clagny, Trianon, Saint-Cyr, and the two churches of the new city of Versailles,— amount to about one hundred and seven millions, to which must be added a million, or a million and a half perhaps, for the expenses of the years 1661–1663, the accounts of which are not known, and three million two hundred and sixty thousand francs

for the sumptuous chapel, which was not built until 1699–1710. The proportion of the mark to the franc having varied under Louis XIV., it is difficult to arrive at an exact reduction to the present currency. . . . The expenses of Versailles would represent to-day more than four hundred millions. This amount is enormous; but it is not monstrous like the twelve hundred millions of which Mirabeau speaks, nor, above all, madly fantastic like the four thousand six hundred millions imagined by Volney."—H. Martin, *Hist. of France: Age of Louis XIV.*, *v.* 1, *ch.* 3.

VESTAL VIRGINS.—"The Vestals ('virgines Vestales,' 'virgines Vestæ') were closely connected with the college of pontifices. They are said to have come from Alba soon after the foundation of Rome: at first there were two Vestals for each of the two tribes, Ramnes and Tities; afterwards two others were added for the Luceres, and the number of six was exceeded at no period. The vestal, on being chosen, was not allowed to be younger than six or older than ten years. . . . She was clad in white garments and devoted to the service of Vesta for thirty years. . . . After this period she was at liberty either to remain in the service of the goddess (which was generally done) or to return to her family and get married. Her dress was always white; round her forehead she wore a broad band like a diadem ('infula'), with ribbons ('vittæ') attached to it. During the sacrifice, or at processions, she was covered with a white veil. . . . She was carefully guarded against insult or temptation; an offence offered to her was punished with death; . . . in public every one, even the consul, made way to the lictor preceding the maiden. At public games and pontifical banquets she had the seat of honour; and a convicted criminal accidentally meeting her was released. Amongst her priestly functions was the keeping of the eternal fire in the temple of Vesta, each Vestal taking her turn at watching. . . . Breach of chastity on the part of the Vestal was punished with death."—E. Guhl and W. Koner, *Life of the Greeks and Romans, sect.* 103.

VIA SACRA AT ROME, The.—"The Via Sacra began at the Sacellum Streniæ, which was on the part of the Esquiline nearest to the Colosseum; on reaching the Summa Via Sacra . . . it turned a little to the right, descending the Clivus Sacer; at the foot of the slope it passed under the arch of Fabius, by the side of the Regia; thence it ran in a straight line, passing by the Basilica Æmilia, the arch of Janus, the Curia Hostilia, till it reached the foot of the Capitoline Hill, where, turning to the left, it ascended the Clivus Capitolinus, and reached its termination at the temple of Jupiter Capitolinus. The Via Sacra, as Ovid tells us, took its name from the sacred rites which were performed on it. Along this road passed the processions of priests with the sacred animals to be sacrificed at the altar of Jupiter Capitolinus. . . . Along this road also passed the triumphal processions of the victorious Roman generals. The procession entered Rome by the Porta Triumphalis, passed through the Circus Maximus, then, turning to the left, proceeded along the road at the foot of the south-east slope of the Palatine, when it joined the Via Sacra, and again turned to the left and

ascended the Velia; on reaching the Summa Via Sacra it descended the Clivus Sacer, and then passed along the rest of the Via Sacra till it reached its destination at the temple of Jupiter Capitolinus, where the victorious general lay before the god the spoils of his conquests."—H. VICTORIA, Queen of England, A. D. 1837.

VICTORIA, The Australian Colony of.—"The Colony of Victoria comprises that part of the south-easterly portion of the Australian Continent which lies between the parallels of 34° and 39° south latitude, and the meridians of 141° and 150° east longitude. It is bounded on the north and north-east by New South Wales, from which it is separated by the river Murray, and by an imaginary line drawn from Forest Hill, a considerable elevation not far distant from the sources of the Murray, to Cape Howe; on the west by South Australia — the meridian of 141° marking the frontier between the two Colonies; and on the south and south-east by the Southern Ocean, Bass's Strait and the Pacific Ocean. Its extreme length from east to west is 480 miles; its breadth, 240 miles; and its area, 87,884 square miles, or 56,245,760 acres, which is slightly less than the area of the island of Great Britain. The coast-line, which is broken by several inlets, extends from Cape Howe in a south-westerly direction, to Cape Wilson (the most southerly point of the Continent), a distance of 250 miles, thence westwardly to the mouth of the river Glenelg (long. 141°), a further distance of about 420 miles. This is exclusive of the length of the shores of the principal inlets; if these be added, the coast-line falls little short of 1,000 miles in length. The general aspect of Victoria — if we except the Wimmera district, in the north-west, which is flat and somewhat sterile — is greatly diversified, the surface, on the whole, exhibiting greater variety of formation, with more frequent alternation of hill and plain, and a larger proportion of fertile country, than any other of the Colonies on the Australian mainland. The Australian Alps extend from New South Wales into the easterly division of Victoria.... The average height of the mountain summits in this part of the Colony may be taken to be from 4,000 to 5,000 feet. From the Australian Alps high grounds extend, in a more or less westerly direction, throughout the Colony, and, as in New South Wales, separate its seaward division from the plains of the interior. The coast region is watered by rivers of no great length (from 100 to 200 miles) flowing directly into the Pacific and Southern Oceans; while the rivers of the inland region are mostly affluents of the Murray. With the exception of the Murray, none of the Victorian rivers are of very considerable size, and many of them are subject to remarkable fluctuations in their volume of water, often becoming in the hot season mere rivulets, and occasionally drying up altogether, to the great loss of stock-owners, whose cattle perish in great numbers from drought. . . . Of the coast rivers, taking their rise on the southern slope of the Great Dividing Range, the principal are the Snowy, 120 miles long, the Latrobe, 130 miles, the Yarra Yarra, 150 miles, the Hopkins, 155 miles, and the Glenelg, 281 miles. The most important river of Victoria is, however, the Murray, 1,300 miles long, 980 miles of which flow along the Victorian frontier. This river is navigable, as is also its affluent, the Goulburn, 345 miles long. . . . The Colony is divided into four districts, called respectively Gipps Land, the Murray, Wimmera, and Loddon, and 37 counties. The counties form the more thickly populated part of the country."—*Her Majesty's Colonies* (*Colonial and Indian Exhibition*, 1886), *pp.* 181–3.

A. D. 1893.—Liberal Land Policy.—Labor Colonies.—Village Settlements.—"Victoria has legislated on the 'back to the land' lines in recent years. In 1893 'The Settlement on Lands Act' was passed for the promotion of village settlements, Labour colonies, and of homestead associations. These practical measures have not yet borne much fruit in this colony in the way of solving the unemployed problem, but they lead the way thereto. . . . Victoria has much less of an area, and consequently less soil for settlements, than any of the other colonies except Tasmania. She has, therefore, paid more attention in the recent past to furthering manufacturing industries than to the opening up of the land for pushing employment in that way. . . . Under the Act of 1893 land not otherwise appropriated, and not of an auriferous nature or permanently reserved, can be appropriated for purposes of homestead associations, Labour colonies, and village settlements. The amount of land set apart for a homestead association cannot exceed 2000 acres. This area is subdivided into holdings of not more than 50 acres, and the number of persons in a particular association must not be less than one member to 50 acres of the total area set

apart for the purposes of such association. The right of permissive occupancy will be given for a period of three years to any member of a society or association seeking such a holding of land. The fulfilment of certain conditions, not difficult or expensive, gives a member over 18 years of age a state lease. The member agrees in this document to carry out certain improvements, in a given time, to pay the rent to the state and such moneys as the Land Board may advance to him for the development of his holding. He must not sublet, assign, or borrow money on the security of the holding. He must reside on his allotment, or near it, and carry on the industry of agriculture, dairying, gardening, grazing, or similar occupation. Land is set apart for the purposes of a township near every association area, and each member of the association can obtain a 'lot' of an acre in extent in such township, on lease, if he applies within one year of the setting apart by the Land Board of the land for such township site. This wise provision prevents the possibility of ground-rent landlordism in connection with such associations. The provisions for the establishment of Labour colonies follow, to some extent, those described in my account of the Murray River Labour Settlements [see SOUTH AUSTRALIA]. . . . Land, however, is much more scarce in Victoria, and there are one or two conditions imposed of an interesting nature. An area for a Labour colony is to consist of 1500 acres. This land is vested in three trustees named by the government. Provision is made for the election of four more trustees, representing persons or bodies subscribing to the funds of such colonies. The joint committee hears applications for membership of a Labour colony, and undertakes the management of same. . . . The state undertakes to donate £2 towards equipping such Labour colonies for every £1 subscribed by members or supporters. . . . Village settlements are also provided for in the Act of 1893."—M. Davitt, *Life and Progress in Australasia, ch.* 28.

VIENNA, The Congress of.—"At the end of September [1814] the centre of European interest passed to Vienna. The great council of the Powers, so long delayed, was at length assembled. The Czar of Russia, the Kings of Prussia, Denmark, Bavaria, and Würtemberg, and nearly all the statesmen of eminence in Europe, gathered round the Emperor Francis and his Minister, Metternich, to whom by common consent the presidency of the Congress was offered. Lord Castlereagh represented England, and Talleyrand France. Rasumoffsky and other Russian diplomatists acted under the immediate directions of their master, who on some occasions even entered into personal correspondence with the Ministers of the other Powers. Hardenberg stood in a somewhat freer relation to King Frederick William: Stein was present, but without official place. The subordinate envoys and attachés of the greater Courts, added to a host of petty princes and the representatives who came from the minor Powers, or from communities which had ceased to possess any political existence at all, crowded Vienna. In order to relieve the antagonisms which had already come too clearly into view, Metternich determined to entertain his visitors in the most magnificent fashion; and although the Austrian State was bankrupt, and in some districts the people were severely suffering, a sum of about £10,000 a day was for some time devoted to this purpose. The splendour and the gaieties of Metternich were emulated by his guests. . . . The Congress had need of its distractions, for the difficulties which faced it were so great that, even after the arrival of the Sovereigns, it was found necessary to postpone the opening of the regular sittings until November. By the secret articles of the Peace of Paris, the Allies had reserved to themselves the disposal of all vacant territory, although their conclusions required to be formally sanctioned by the Congress at large. The Ministers of Austria, England, Prussia, and Russia accordingly determined at the outset to decide upon all territorial questions among themselves, and only after their decisions were completely formed to submit them to France and the other Powers. Talleyrand, on hearing of this arrangement, protested that France itself was now one of the Allies, and demanded that the whole body of European States should at once meet in open Congress. The four Courts held to their determination, and began their preliminary sittings without Talleyrand. But the French statesman had, under the form of a paradox, really stated the true political situation. The greater Powers were so deeply divided in their aims that their old bond of common interest, the interest of union against France, was now less powerful than the impulse that made them seek the support of France against one another. Two men had come to the Congress with a definite aim: Alex-

ander had resolved to gain the Duchy of Warsaw, and to form it, with or without some part of Russian Poland, into a Polish kingdom, attached to his own crown: Talleyrand had determined, either on the question of Poland, or on the question of Saxony, which arose out of it, to break allied Europe into halves, and to range France by the side of two of the great Powers against the two others. The course of events favoured for a while the design of the Minister: Talleyrand himself prosecuted his plan with an ability which, but for the untimely return of Napoleon from Elba, would have left France, without a war, the arbiter and the leading Power of Europe. Since the Russian victories of 1812, the Emperor Alexander had made no secret of his intention to restore a Polish Kingdom and a Polish nationality. Like many other designs of this prince, the project combined a keen desire for personal glorification with a real generosity of feeling. Alexander was thoroughly sincere in his wish not only to make the Poles again a people, but to give them a Parliament and a free Constitution. The King of Poland, however, was to be no independent prince, but Alexander himself: although the Duchy of Warsaw, the chief if not the sole component of the proposed new kingdom, had belonged to Austria and Prussia after the last partition of Poland, and extended into the heart of the Prussian monarchy. Alexander insisted on his anxiety to atone for the crime of Catherine in dismembering Poland: the atonement, however, was to be made at the sole cost of those whom Catherine had allowed to share the booty. Among the other Governments, the Ministry of Great Britain would gladly have seen a Polish State established in a really independent form; failing this, it desired that the Duchy of Warsaw should be divided, as formerly, between Austria and Prussia. Metternich was anxious that the fortress of Cracow at any rate should not fall into the hands of the Czar. Stein and Hardenberg, and even Alexander's own Russian counsellors, earnestly opposed the Czar's project, not only on account of the claims of Prussia on Warsaw, but from dread of the agitation likely to be produced by a Polish Parliament among all Poles outside the new State. King Frederick William, however, was unaccustomed to dispute the wishes of his ally; and the Czar's offer of Saxony in substitution for Warsaw gave to the Prussian Ministers, who were more in earnest than their master, at least the prospect of receiving a valuable equivalent for what they might surrender. By the treaty of Kalisch, made when Prussia united its arms with those of Russia against Napoleon (Feb. 27th, 1813), the Czar had undertaken to restore the Prussian monarchy to an extent equal to that which it had possessed in 1805. It was known before the opening of the Congress that the Czar proposed to do this by handing over to King Frederick William the whole of Saxony, whose Sovereign, unlike his colleagues in the Rhenish Confederacy, had supported Napoleon up to his final overthrow at Leipzig. Since that time the King of Saxony had been held a prisoner, and his dominions had been occupied by the Allies. The Saxon question had thus already gained the attention of all the European Governments. . . . Talleyrand alone made the defence of the King of Saxony the very centre of his policy, and subordinated all other aims to this. His instructions, like those of Castlereagh, gave priority to the Polish question; but Talleyrand saw that Saxony, not Poland, was the lever by which he could throw half of Europe on to the side of France; and before the four Allied Courts had come to any single conclusion, the French statesman had succeeded, on what at first passed for a subordinate point, in breaking up their concert. For a while the Ministers of Austria, Prussia, and England appeared to be acting in harmony; and throughout the month of October all three endeavoured to shake the purpose of Alexander regarding Warsaw. Talleyrand, however, foresaw that the efforts of Prussia in this direction would not last very long, and he wrote to Louis XVIII. asking for his permission to make a definite offer of armed assistance to Austria in case of need. Events took the turn which Talleyrand expected. . . . He had isolated Russia and Prussia, and had drawn to his own side not only England and Austria but the whole body of the minor German States. . . . On the 3rd of January, 1815, after a rash threat of war uttered by Hardenberg, a secret treaty was signed by the representatives of France, England, and Austria, pledging these Powers to take the field, if necessary, against Russia and Prussia in defence of the principles of the Peace of Paris. The plan of the campaign was drawn up, the number of the forces fixed. Bavaria had already armed; Piedmont, Hanover, and even the Ottoman Porte, were named as future members of the alliance. It would perhaps be unfair to the French Minister to believe that he actually desired to kindle a war on this gigantic scale. Talleyrand had not, like Napoleon, a love for war for its own sake. His object was rather to raise France from its position as a conquered and isolated Power; to surround it with allies. . . . The conclusion of the secret treaty of January 3rd marked the definite success of his plans. France was forthwith admitted into the council hitherto known as that of the Four Courts, and from this time its influence visibly affected the action of Russia and Prussia, reports of the secret treaty having reached the Czar immediately after its signature. The spirit of compromise now began to animate the Congress. Alexander had already won a virtual decision in his favour on the Polish question, but he abated something of his claims, and while gaining the lion's share of the Duchy of Warsaw, he ultimately consented that Cracow, which threatened the Austrian frontier, should be formed into an independent Republic, and that Prussia should receive the fortresses of Dantzic and Thorn on the Vistula, with the district lying between Thorn and the border of Silesia. This was little for Alexander to abandon; on the Saxon question the allies of Talleyrand gained most that they demanded. The King of Saxony was restored to his throne, and permitted to retain Dresden and about half of his dominions. Prussia received the remainder. In lieu of a further expansion in Saxony, Prussia was awarded territory on the left bank of the Rhine, which, with its recovered Westphalian provinces, restored the monarchy to an area and population equal to that which it had possessed in 1805. But the dominion given to Prussia beyond the Rhine, though considered at the time to be a poor equivalent for the second half of Saxony, was in reality a gift of far greater

value. It made Prussia, in defence of its own soil, the guardian and bulwark of Germany against France. . . . It gave to Prussia something more in common with Bavaria and the South, and qualified it, as it had not been qualified before, for its future task of uniting Germany under its own leadership. The Polish and Saxon difficulties, which had threatened the peace of Europe, were virtually settled before the end of the month of January."—C. A. Fyffe, *Hist. of Modern Europe, v.* 2, *ch.* 1.—"Prussia obtained Posen with the town of Thorn in the east, and in the west all that had been lost by the treaty of Tilsit, the duchies of Jülich and Berg, the old electoral territories of Cologne and Trier with the city of Aachen, and parts of Luxemburg and Limburg. Russia received the whole of the grand-duchy of Warsaw except Posen and Thorn, and Alexander fulfilled his promises to the Poles by granting them a liberal constitution. . . . Swedish Pomerania had been ceded by the treaty of Kiel to Denmark, but had long been coveted by Prussia. The Danish claims were bought off with two million thalers and the duchy of Lauenburg, but Hanover had to be compensated for the latter by the cession of the devotedly loyal province of East Friesland, one of the acquisitions of Frederick the Great. Hanover, which now assumed the rank of a kingdom without opposition, was also aggrandised by the acquisition of Hildesheim, Goslar, and other small districts. Austria was naturally one of the great gainers by the Congress. Eastern Galicia was restored by Russia, and the Tyrol, Salzburg, and the Inn district by Bavaria. As compensation for the Netherlands, Venetia and Lombardy became Austrian provinces. Bavaria, in return for its losses in the east, received Würzburg, Aschaffenburg, and its former possessions in the Palatinate. Long discussions took place about the constitution to be given to Germany, and here the hopes of the national party were doomed to bitter disappointment. . . . Finally a Confederation was formed [see GERMANY: A. D. 1814–1820] which secured the semblance of unity, but gave almost complete independence to the separate states. The members numbered thirty-eight, and included the four remaining free cities, Frankfort, Hamburg, Lübeck, and Bremen, and the kings of Denmark and the Netherlands. . . . In Italy the same process of restoration and subdivision was carried out. Victor Emmanuel I. recovered his kingdom of Sardinia, with the addition of Genoa as compensation for the portion of Savoy which France retained. Modena was given to a Hapsburg prince, Francis IV., son of the archduke Ferdinand, and Beatrice the heiress of the house of Este. Tuscany was restored to Ferdinand III., a brother of the Austrian Emperor. Charles Louis, son of the Bourbon king of Etruria, was compensated with Lucca and a promise of the succession in the duchy of Parma, which was for the time given to Napoleon's wife, Maria Louisa. Pius VII. had already returned to Rome, and the Papal states now recovered their old extent. But Pius refused at first to accept these terms because he was deprived of Avignon and the Venaissin, and because Austrian garrisons were *in* occupation of Ferrara and Comacchio. Naples was left for a time in the hands of Joachim Murat, as a reward for his desertion of Napoleon after the battle of Leipzig. Switzerland was declared independent and neutral, but its feudal unity was loosened by a new constitution (Aug., 1815). The number of cantons were raised to twenty-two by the addition of Geneva, Wallis (Vallais), and Neufchâtel, the last under Prussian suzerainty. The position of capital was to be enjoyed in rotation by Berne, Zurich, and Lucerne. The kingdom of the Netherlands was formed for the house of Orange by the union of Holland and Belgium and the addition of Luxemburg, which made the king a member of the German Confederation. The professed object of this artificial union of Catholics and Protestants was the erection of a strong bulwark against French aggressions."—R. Lodge, *Hist. of Modern Europe, ch.* 24, *sect.* 52.

A. D. 1606-1607.—The Virginia Company of London and its charter.—The colony planted at Jamestown.—"The colonization of the North American coast had now become part of the avowed policy of the British government. In 1606 a great joint-stock company was formed for the establishment of two colonies in America. The branch which was to take charge of the proposed southern colony had its headquarters in London; the management of the northern branch was at Plymouth in Devonshire. Hence the two branches are commonly spoken of as the London and Plymouth Companies. The former was also called the Virginia Company, and the latter the North Virginia Company, as the name of Virginia was then loosely applied to the entire Atlantic coast north of Florida. The London Company had jurisdiction from 34° to 38° north latitude; the Plymouth Company had jurisdiction from 45° down to 41°; the intervening territory, between 38° and 41° was to go to whichever company should first plant a self-supporting colony."—J. Fiske, *The Beginnings of New Eng., ch.* 2.—"The charter for colonizing the great central territory of the North American continent, which was to be the chosen abode of liberty, gave to the mercantile corporation nothing but a wilderness, with the right of peopling and defending it. By an extension of the prerogative, which was in itself illegal, the monarch assumed absolute legislative as well as executive powers. . . . The general superintendence was confided to a council in England; the local administration of each colony to a resident council. The members of the superior council in England were appointed exclusively by the king, and were to hold office at his good pleasure. Their authority extended to both colonies, which jointly took the name of Virginia. Each of the two was to have its own resident council, of which the members were from time to time to be ordained and removed according to the instructions of the king. To the king, moreover, was reserved supreme legislative authority over the several colonies, extending to their general condition and the most minute regulation of their affairs. . . . The summer was spent in preparations for planting the first colony, for which the king found a grateful occupation in framing a code of laws. The superior council in England was permitted to name the colonial council, which was independent of the emigrants, and had power to elect or remove its president, to remove any of its members, and to supply its own vacancies. Not an element of popular liberty or control was introduced. Religion was established according to the doctrine and rites of the church within the realm. . . . Then, on the 19th day of December, in the year of our Lord 1606, one hundred and nine years after the discovery of the American continent by Cabot, forty-one years from the settlement of Florida, the squadron of three vessels, the largest not exceeding 100 tons' burden, with the favor of all England, stretched their sails for 'the dear strand of Virginia, earth's only paradise.' . . . The enterprise was ill concerted. Of the 105 on the list of emigrants, there were but 12 laborers and few mechanics. They were going to a wilderness, in which, as yet, not a house was standing; and there were 48 gentlemen to 4 carpenters. Neither were there any men with families. Newport, who commanded the ships, was acquainted with the old passage, and sailed by way of the Canaries and the West India Islands. As he turned to the north, a severe storm, in April, 1607, carried his fleet beyond the settlement of Raleigh, into the magnificent bay of the Chesapeake. The headlands received and retain the names of Cape Henry and Cape Charles, from the sons of King James; the deep water for anchorage, 'putting the emigrants in good Comfort,' gave a name to the northern point; and within the capes a country opened which appeared to 'claim the prerogative over the most pleasant places in the world.' . . . A noble river was soon entered, which was named from the monarch; and, after a search of seventeen days, . . . on the 13th of

May they reached a peninsula about 50 miles above the mouth of the stream, where the water near the shore was so very deep that the ships were moored to trees. Here the council, except Smith, who for no reason unless it were jealousy of his superior energy was for nearly a month kept out of his seat, took the oath of office, and the majority elected Edward Maria Wingfield president for the coming year. Contrary to the earnest and persistent advice of Bartholomew Gosnold, the peninsula was selected for the site of the colony, and took the name of Jamestown."—G. Bancroft, *Hist. of the U. S., pt.* 1, *ch.* 6 (*v.* 1).

A. D. 1607-1610.—The settlement at Jamestown and the services of Captain John Smith.—"Among the leaders of the expedition were Gosnold, the voyager and discoverer, and a prime mover in the affair; Wingfield, one of the first-named patentees, John Smith, Ratcliffe, Martin, Kendall, and Percy. Of these men John Smith has become famous. He has taken place among the founders of states, and a romantic interest has attached itself to his name. For centuries his character and deeds have been applauded, while in late years they have become a theme for censure and detraction. Modern investigation has relentlessly swept away the romance, and torn in pieces many of the long accepted narratives in which Smith recorded his own achievements. Yet it was not wholly by a false and fluent pen that Smith obtained and held his reputation. He was something more than a plausible writer of fiction. He was the strongest and most representative man among the Virginian colonists. . . . With this hopeful company Newport left the Downs on the 1st of January, 1607. The worthy Richard Hakluyt sent them a paper containing much good advice and some ingenious geographical speculations, and Drayton celebrated their departure in clumsy verses filled with high-flown compliments. The advice of the priest and the praise of the poet were alike wasted. By an arrangement ingeniously contrived to promote discord, devised probably by royal sagacity, the box containing the names of the council was not to be opened until the voyagers reached their destination. Dissension broke out almost immediately. Whatever the merits of the differences, this much is certain, that Smith was the object of the concentrated jealousy and hatred of his companions. . . . On the 13th of May, 1607, the settlers landed at James-town, sent out exploring parties, and began fortifications. A fortnight later, under the command of Wingfield, they repulsed an attack by the Indians; and on the 22d of June Newport sailed for England, and left them to their own resources. The prospect must have been a dreary one: nothing answered to their expectations. Instead of valuable mines, the adventurers found only a most fertile soil; instead of timid, trusting South American Indians, they encountered wild tribes of hardy, crafty, and hostile savages; instead of rich, defenceless, and barbarian cities, an easy and splendid spoil, they found a wilderness, and the necessity of hard work. From the miserable character of the settlers, dangerous factions prevailed from the first, until Smith obtained control, and maintained some sort of order—despotically, perhaps, but still effectually. No one would work, and famine and the Indians preyed upon them mercilessly. A small fort and a few wretched huts, built after much quarrelling, represented for many months all that was accomplished. The only relief from this dark picture of incompetent men perishing, without achievement, and by their own folly, on the threshold of a great undertaking, is to be found in the conduct of Smith. Despite almost insurmountable obstacles, Smith kept the colony together for two years. He drilled the soldiers, compelled labor, repaired the fort, traded with the Indians, outwitted them and kept their friendship, and made long and daring voyages of discovery. He failed to send home a lump of gold, but he did send an excellent map of the Company's territory. He did not discover the passage to the South Sea, but he explored the great bays and rivers of Virginia. He did not find Raleigh's lost colonists, but he managed to keep his own from total destruction. The great result of all Smith's efforts was the character of permanency he gave to the settlement. Because he succeeded in maintaining an English colony for two consecutive years in America, the London Company had courage to proceed; and this is what constitutes Smith's strongest claim to the admiration and gratitude of posterity. To suppose that he had the qualities of a founder of a state is a mistake, although in some measure he did the work of one. . . . His veracity as a historian in the later years of his life has been well-nigh destroyed. But little faith can be placed in the 'Generall Historie,' and modern investigation has conclusively relegated to the region of legend and of fiction the dramatic story of Smith's rescue by Pocahontas. The shadow of doubt rests upon all his unsupported statements; but nothing can obscure his great services, to which the world owes the foundation of the first English colony in America. Yet, after all his struggles, Smith was severely blamed by the Company, apparently because Virginia was not Peru. In a manly letter he sets forth the defects of the colony, the need of good men with families, industrious tradesmen and farmers, not 'poor gentlemen and libertines.' Before, however, the actual orders came to supersede him, Smith resigned, or was forced out of the government, and returned to England. The feeble life of the colony wasted fast after his departure and during the sickness of Percy, who succeeded to the command."—H. C. Lodge, *Short Hist. of the Eng. Colonies in Am., ch.* 1.
